This project arose through Mahler's connection with the family of Carl von Weber, grandson of the composer and a resident of Leipzig. Mahler laboriously transcribed and then completed the unfinished sketches of *Die drei Pintos*, making additional use of minor works by Weber and a small amount of his own original composition based on Weber's thematic material (in particular the entr'acte preceding Act 2). The work aroused considerable interest, not least on the part of Richard Strauss, who looked at and was impressed by Mahler's material during a conducting trip he made to Leipzig in 1887 (the meeting was the first in a fruitful professional and personal relationship that lasted until Mahler's death). The reconstructed *Die drei Pintos* received its successful première in Leipzig, under Mahler's baton, in January 1888; Tchaikovsky was present in an audience that included many influential critics and impresarios. Disappointment over the somewhat cool response of Cosima Wagner to his *Lohengrin* in 1887 was thus effectively dispelled; future productions of *Die drei Pintos* promised financial returns (the work was taken up by various theatres) and brought Mahler's name into prominence in the European musical press.

Work on *Die drei Pintos* had led to a complex romantic entanglement between Mahler and Carl von Weber's wife, Marion. Mahler's involvement with the family had developed into warm friendship, focussing at first on the couple's three children, in whose company he claimed (unconvincingly) to have discovered for the first time Arnim and Brentano's romantic collection of recreated German folk poetry, *Des Knaben Wunderhorn*. His earliest settings from it nevertheless date from this period. The relationship with Marion von Weber deepened; their planned elopement may have been a retrospective fantasy on Mahler's part, but the intensity of his feelings contributed to the inception and composition of his First Symphony and of the first movement of the Second Symphony, later entitled 'Todtenfeier'. Neither work reached a final form or public performance at that time and Mahler's compositional gifts were still a matter of sceptical conjecture even for some of his closest acquaintances, although the Staegemann and Weber families both reacted with enthusiasm to his piano performances of the newly drafted First Symphony. In May 1888, however, Mahler concluded his appointment at Leipzig by resigning after a public altercation with the chief stage manager, Goldberg, with whom his relationship had long been tense.

In the absence of clear plans, he was happy to return to Prague that summer to prepare for a tour of *Die drei Pintos* with Cornelius's *Der Barbier von Bagdad*. At first the rehearsals went well and cordial relations were re-established with Angelo Neumann. Mahler nevertheless suffered a stinging humiliation when one of his characteristic outbursts at a rehearsal of *Der Barbier* led to an argument with Neumann, who summarily dismissed him. Absorption in composition in a local café almost caused him to miss an important meeting with the cellist David Popper, who was a professor at the Budapest Academy of Music. A Viennese friend of Mahler's, the increasingly influential musicologist Guido Adler, had enthusiastically described his character and abilities to Popper, who was canvassing ideas about candidates for the directorship of the Royal Hungarian Opera in Budapest, which urgently needed revitalization and reform. Some prominent conductors, including Felix Mottl, were considered, but Popper's impressions of the 28-year-old Mahler confirmed Adler's recommendation and were significant in the ensuing negotiations. These concluded with Mahler signing a contract that put him in artistic control of one of the major theatres of the Austro-Hungarian empire.

5. BUDAPEST, 1888–91. In Prague the politics of nationalism had provided a complicated backdrop to Mahler's role as official representative of German culture; in Budapest they were problematically internal to the institution he headed from October 1888. Hungary's position in the dual monarchy led to irresolvable tensions between two forms of nationalist identity. Each had its proponents among the Magyar aristocrats who formed a significant part of the audience that supported opera in Budapest; for both groups nationalism entailed curbing

desires for self-determination on the part of Hungary's internal ethnic minorities (Slovaks, Serbs, Croats and Slovenes). The more liberal Magyar nationalists, whose influence was increasing when Mahler arrived, sympathized with the formerly unifying German culture of Austria but required that librettos be translated into Hungarian and that native Hungarian singers fill as many roles as possible. The conservative faction favoured a more radical, anti-Austrian policy of cultural Magyarization, for example entailing the composition of 'Hungarian' operas by Hungarian composers.

Mahler's enforced Magyar sympathies were easily reconciled with his own artistic ideals where members of the liberal, German-orientated tendency were concerned. The significant Hungarian politician Count Albert Apponyi and the composer Ödön de Mihalovich, director of the Budapest Academy, were admirers of Wagner and became influential supporters of Mahler. So too did the State Secretary Ferenc von Beniczky, who was responsible for the management of the Budapest theatres and assumed the role of Intendant of the Royal Opera. The reason for the ascendancy of the liberals lay partly in the failure to maintain standards and audience levels on the part of the Erkel family, which had come to dominate the Royal Opera. Anti-Austrian nationalism was expressed in the historical and folklorist stage works of the aging composer Ferenc Erkel, whose sons Alexander (Sándor) and Gyula were employed as conductors at the opera house. Sándor Erkel had in fact been running it, as nominal director, in an increasingly negligent and unadventurous fashion. His continued presence, effectively demoted to a subordinate role as conductor, was to pose obvious problems to the incoming 'Austrian' director.

Mahler addressed the double task of increasing box-office returns while pursuing an effective Magyarization policy by concentrating initially on administration, planning and rehearsal. He took the conductor's stand himself for the first time in January 1889, in a half *Ring* cycle. *Das Rheingold* and *Die Walküre*, sung for the first time in Hungarian, were performed in the correct order, with no tickets available for individual operas; the audience was required to attend both or none. The demands of the liberal, Germanophile Magyars were thus satisfied in characteristically idealistic fashion. The critic Ludwig Karpath later recalled the electrifying effect of Mahler's innovations and performance style on the Royal Opera's partly philistine audience. Some of its members, particularly supporters of the Erkel brothers, resented the new director on anti-Semitic grounds and questioned the appropriateness of his relatively high salary. Other valuable accounts of Mahler's strategy and day-to-day life in Budapest (where he made efforts to learn Hungarian) were recorded by his Viennese friend, the historian and archaeologist Fritz Löhr and by a former conservatory acquaintance, the violinist and viola player Natalie Bauer-Lechner, who established a friendship with Mahler that was to last, with an increasing intensity of commitment on her part, until Mahler's marriage in 1902. Löhr, on his first visit to Budapest, observed Mahler's efforts to establish productive social relationships with influential members of Budapest society. Bauer-Lechner's observations from the end of Mahler's time in Budapest (autumn 1891) reflect his latterly embattled position in the city's cultural life, which helped to exacerbate minor opera-house disputes of the kind that he was always prone to generate. (On this occasion two singers, who considered themselves to have been dishonoured by his criticism, had publicly challenged Mahler to a duel; he declined.)

The intervening years were marked both by triumphs and by a series of personal and professional crises. Mahler's domestic circumstances and emotional life were profoundly affected in 1889 by family deaths. His father died in February; in the autumn the death of his married younger sister Leopoldine was followed by that of his long-ailing mother. By the end of the year Mahler had become head of a family comprising his two sisters, Emma and Justine, and his brothers Alois and Otto. Since Alois was doing military service, Mahler's primary concern was for his two sisters. After the sale of the Iglau house and Bernhard Mahler's business, he arranged for them to move in with Fritz Löhr and his wife in Vienna (Otto, now a student at the conservatory, was already lodging there). The elder of Mahler's sisters, Justine, stayed with him in Budapest for two extended periods during which their already affectionate relationship deepened into a mutually supportive friendship on which Mahler came increasingly to rely.

His stressful public life in Budapest disrupted the routine of spare-time composition that he had established in Leipzig. New projects seem not to have been significantly advanced between 1888 and 1891; however, music of the Leipzig period was presented there in the two earliest concerts in which works he considered important were performed in public. On 13 November 1889, shortly after his mother's death, Mahler included his songs *Frühlingsmorgen*, *Erinnerung* and *Scheiden und Meiden* (all subsequently published in the 1892 collection *Lieder und gesänge*) in a group he performed with the soprano Bianca Bianchi at a Budapest chamber concert. The local critics responded favourably to what they judged accomplished examples of German song. More momentous was the première of the first version of the First Symphony (presented as a five-movement 'Symphonic Poem in two Parts') a week later, on 20 November.

The symphony's reception was later represented by Mahler and his friends as a disaster which hindered the development of his reputation as a composer. Both operatic and wider cultural politics must in fact have influenced the Budapest audience's response to its performance under Mahler's baton in the middle of an otherwise conventional concert conducted by Sándor Erkel. Mahler and Erkel factions had expressed their feelings audibly in the hall, but the performance had clearly been of considerable power (Fritz Löhr testified to the impression made on both him and Mahler by the dress-rehearsal on 19 November, before an invited audience). The critics were most inventively nonplussed by the final two movements, in which the symphony's radical 'new Romanticism' seemed perplexingly and perversely expressed. What particularly hurt Mahler was a negative review by Viktor von Herzfeld, a Vienna Conservatory contemporary who had won (in 1884) the coveted Beethoven Prize that Mahler had twice failed to secure.

Following a Christmas spent with his brothers and sisters at the Löhrs' house in Vienna, Mahler found his position at the Budapest Opera beginning to change in the early months of 1890. There had been a significant move to the nationalist-conservative right in Hungarian politics. The resignation in March of the Prime Minister

Kalman Tisza and his replacement by Count Gyula Szapáry were the outward signs of a process that was clearly threatening to the Intendant, Beniczky. Mahler was meanwhile occupied with productions of Meyerbeer's *Les Huguenots* and Halévy's *La Juive*, along with further performances of *Die Walküre* (public opinion militated against his completion of a full Hungarian *Ring* cycle). His concern to respond pragmatically to the political situation in Budapest may be gauged from his care to mark the national celebration of the 400th anniversary of the death of King Matthias Corvinus with a gala concert featuring music by Ferenc Erkel, who shared some of the conducting with his son Sándor. The closing highlight of the 1889–90 season, however, was a new production of Mozart's *Le nozze di Figaro* with which Mahler delighted liberal supporters such as Count Apponyi.

The summer of 1890 began with a working Italian tour with his sister Justine, the purpose being to seek out promising future guest singers (Mahler had persistent difficulty in finding suitably trained Hungarians) and to assess the viability of some of the new Italian operas. Of the two such operas he staged in Budapest, Mascagni's *Cavalleria rusticana* was to prove influentially successful (the other was Franchetti's *Asrael*). The second half of the summer brought the Mahler and Löhr families together again in a rented villa in Hinterbrühl, where Mahler worked on *Wunderhorn* settings that later appeared in the second and third volumes of the *Lieder und Gesänge* (1892).

The 1891–2 season in Budapest opened against a background of mounting tension which led Mahler to begin negotiations with the director of the Hamburg Stadttheater, with a view to obtaining a post there. The decision proved timely. On 22 January 1891 Beniczky was replaced as Intendant by the nationalist Magyar aristocrat Count Géza Zichy. His agenda, supported by the conservative press and the new political climate, was clear: to remove from Mahler all executive power over artistic decisions. Zichy, a one-armed pianist with pretensions as a poet and composer, imposed his own artistic views with a determination that was coloured by anti-Semitic prejudice. Mahler's final triumph in Budapest was another Mozart opera, mounted before Zichy took over: a production of *Don Giovanni* in which he aimed for an unfashionable degree of 'authenticity' by restoring the original recitatives (long abandoned in favour of spoken dialogue), accompanying them himself on an upright piano in the orchestra pit. The production was received with unusual enthusiasm by Brahms, who was visiting Budapest. The satisfaction at winning the support of so influential a musician was deepened by the knowledge that it might open doors that would otherwise remain closed to him, particularly in Vienna; Mahler began to foster a respectful friendship with the older composer.

The end of Mahler's period at the Royal Hungarian Opera was marked by inevitable conflict between himself and Zichy, although he managed to show a degree of judicious forbearance once his contract with Hamburg was settled. He submitted his resignation in March 1891. An audience demonstration in his favour at a *Lohengrin* performance on 16 March (he was not conducting) must have given Mahler some satisfaction as he prepared to take up his new, if technically lower-status, position in Hamburg. (By a curious turn of events, his successor in Budapest was his former Leipzig rival Arthur Nikisch, whom Zichy honoured with a considerably higher salary.)

6. Hamburg, 1891–7. Although Mahler planned at one stage to stay more or less permanently in Budapest, his affection for his native language, and hearing it sung, contributed to his pleasure at being back in Germany when he took up his post as chief conductor at the Hamburg Stadttheater in March 1891. His relations with the director Bernhard Pohl (known as Pollini) were often little less tense and stormy than those with Gilsa in Kassel or Zichy in Budapest; like the latter, Pollini retained overall executive power (although he may have tempted Mahler with the possibility of a directorship). However, he was not a court official but a modern impresario. Pollini's aim was to attract and maintain as large an audience as possible; in the Hanseatic free port of Hamburg economic viability was as important as the policing of an official public culture.

He was at first careful not to constrain Mahler, who rewarded Pollini's expectations by achieving resounding critical success with his initial appearances, conducting *Siegfried* and *Tannhäuser*. In April 1891 Mahler conducted *Tristan und Isolde* for the first time. His heavy conducting schedule militated against adequate rehearsal (of prime concern to the idealist in him) and led him that summer, unusually, to take advantage of Hamburg's access to the sea – the harbour area was one of his favourite afternoon walks – and make a solitary holiday trip to Copenhagen and Norway. That autumn Mahler worked hard to maintain high performance standards in both familiar repertory and new operas, for example Tchaikovsky's *Yevgeny Onegin*, whose German première impressed its composer. As always, Mahler's technique was to insist upon a concentrated rehearsal involvement that many singers and players found difficult to sustain. He inspired hatred and respect in almost equal measure; on one occasion a member of the opera staff had to summon the police to escort him home after a harassed flautist had gathered friends in the street with the intention of attacking Mahler.

The audience was fascinated by and largely supportive of his theatrical idealism, as a result of which Pollini was as happy to suffer the occasional outburst as he was to have him maintain the frequency of his appearances at the conductor's stand (at a time when publicity was not given to the name of the evening's staff conductor). Mahler's first Hamburg season ended with his taking the singers to participate in a six-week German opera season in London. This was organized by the English impresario Sir Augustus Harris, who devoted equal attention to opera and lavish Christmas pantomimes. Mahler conducted the first complete *Ring* cycles to be given in London, before joining his family for a holiday in Berchtesgaden. Fear of the serious cholera epidemic in Hamburg that summer caused him to delay returning to his post; Pollini angrily imposed a fine that signalled the end of their predominantly cordial relations.

Tensions between Mahler and his superiors were often productive, and he continued to achieve impressive results in the 1892–3 season. This did not prevent a deepening dissatisfaction with the unrelenting regime of repertory opera (in which a theatre offered a different production, from a currently-rehearsed group, on each night of the week). He famously denounced its 'traditional' style of performance as *Schlamperei* ('slovenliness'). Mahler's

increasing interest in the more idealistic world of the symphony concert at that time was closely linked to his longstanding admiration for Hans von Bülow, who was resident conductor of the Hamburg subscription concerts. Bülow had come to respect Mahler's style of conducting, particularly of Wagner, and a relationship between them developed. Bülow's celebrated eccentricities as a concert conductor began to include conversational asides to Mahler, whom Bülow seated close to his podium. Mahler became an unofficial deputy as Bülow's health declined and succeeded him after his death in 1894. Mahler met with little encouragement from Bülow, however, when he played the older man his *Todtenfeier* movement at the piano.

In 1893 Mahler established the standard pattern of his working summers for the rest of his life, returning to Austria – to Steinbach on the south-east shore of the Attersee in the Salzkammergut – and renting rooms for his family in a lakeside inn. They were joined there by Natalie Bauer-Lechner, who began systematically to compile the 'Mahleriana' diaries which later formed a significant posthumous source of information about his life and ideas during that period. (It was at Steinbach, in a one-room studio he had built by the lakeside in 1894, that he completed the Second and Third Symphonies in draft score, orchestrating them during the winter months in Hamburg.) In October 1893 Mahler conducted the second performance of his First Symphony, in Hamburg, in a revised version (still in five movements) as '*Titan*, a tone-poem in symphony form', its individual movements also bearing descriptive titles. The concert included six of Mahler's *Wunderhorn* settings. Its location, the popular Ludwig Konzerthaus with its (expanded) resident orchestra, encouraged the scorn of some critics, although the audience's response was positive. Thanks to Richard Strauss, the symphony received a third and rather more influential performance the following year (3 June 1894) in Weimar at the annual festival of the Allgemeiner deutscher Musikverein.

The 1894–5 season proved to be a particularly significant one, not only with respect to Mahler's work at the Stadttheater, where he directed successful productions of Humperdinck's *Hänsel und Gretel* (which had been given its première the previous year by Strauss in Weimar), and Verdi's *Falstaff*. Hans von Bülow's death in February 1894 enabled Mahler to take over the Hamburg subscription concerts and provided him with a welcome opportunity to put his interpretative ideas more systematically to work in the concert hall. Bülow's memorial service in the city's Michaeliskirche (29 March 1894) also provided Mahler with long-sought inspiration for the still uncompleted finale of his Second Symphony. Klopstock's 'Resurrection' ode, sung during the service, supplied the opening lines of its choral text, the rest of which was written by Mahler himself; he completed the symphony that summer at Steinbach. Bruno Walter joined the Stadttheater as a somewhat awed junior conductor in 1894, soon becoming a valued ally and friend. Walter's recollections of Mahler at that time valuably complement those of others of his Hamburg friends, like the composer and critic Ferdinand Pfohl and the Czech composer Josef Bohuslav Foerster. The latter part of the season included personal tragedy for Mahler, whose brother Otto shot himself in February 1895. Increased concern for his two sisters led him to move them to Hamburg, where the three shared a home whose domestic arrangements were managed by his elder sister, Justine (a role she kept until both she and Mahler were married in 1902).

Family commitments added to Mahler's burdensome duties in Hamburg, where he had signed a new five-year contract in 1894. His extra work with the Philharmonic subscription concerts in 1894–5 was as stimulating as it was controversial; his editorial liberties with the scoring and tempos of Beethoven's Ninth Symphony caused a furore that contributed, along with financial losses during the season, to the decision not to re-engage him. Rumours about his possible departure from Hamburg were coloured by gossip about his affair with the soprano Anna von Mildenburg, who joined the opera company for the 1895–6 season (and to whom Mahler wrote about the first complete performance of his Second Symphony – at his own expense – in Berlin in December 1895). Elaborately prepared plans to leave Hamburg were realized soon after he completed his Third Symphony in the summer of 1896. Mahler's sights had long been set on returning to Vienna and he judiciously mobilized influential friends there, as well as in Budapest (which he visited during a conducting tour in March 1897 which took him to Russia for the first time). The sophisticated campaign was aimed at securing him the directorship of the Vienna Hofoper: a leading European theatre, served by a no less significant orchestra (the Vienna Philharmonic). Having removed the official barrier to the appointment of a Jew by converting to Roman Catholicism on 23 February 1897, Mahler began work as a Kapellmeister in Vienna in April 1897; by 8 September he had been promoted to director.

7. VIENNA, 1897–1907. Mahler characteristically saw his task at the Hofoper as a reforming one. Standards of

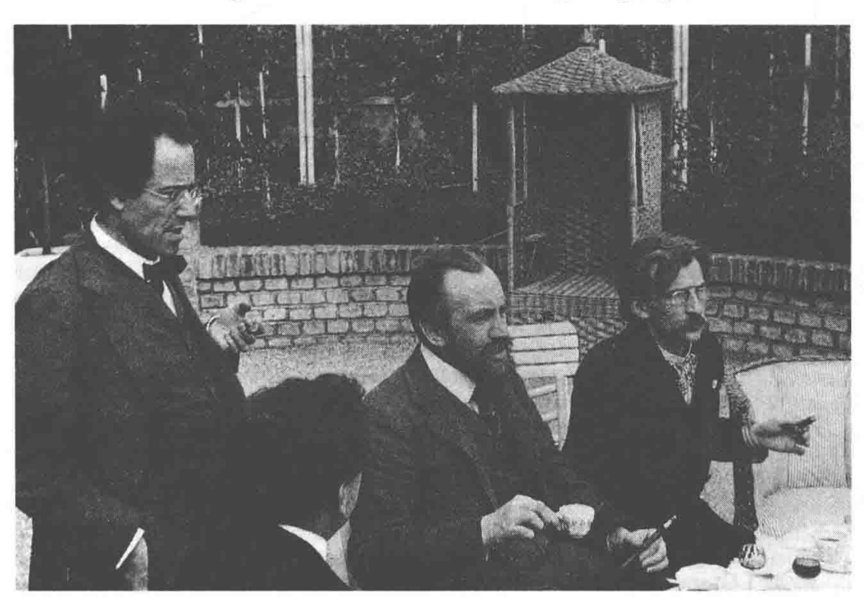
performance and artistic direction had declined under his predecessor, the ailing Wilhelm Jahn, who had been happy to cater to the undemanding needs of a pleasure-loving Viennese audience. Of the Hofoper's other conductors only Hans Richter commanded wide respect. Mahler anticipated entrenched opposition in the imperial capital, divided politically between conservative, anti-Semitic supporters of its new Christian Socialist mayor, Karl Lueger, and those whose sympathies were with Victor Adler's left-wing Social Democratic party. His own position was further complicated by the theoretically mediating cultural role of the opera company as a court institution run by the emperor's chamberlain through his assistant, and eventual successor, Prince Alfred Montenuovo. Mahler's début for his 'trial' week was on 11 May 1897 with *Lohengrin*. The success of that performance, followed later in the month by a sparklingly restaged *Zauberflöte*, demonstrated Mahler's commitment to German culture (Wagner and Mozart were to remain central to his operatic repertory). His additional, more iconoclastic commitment to works outside the German tradition was shown by his first fully new production as director: Smetana's Czech-nationalist opera *Dalibor*, staged, after consultation with the National Theatre in Prague, on the emperor's nameday (4 October 1897). Its significance must be interpreted in the light of the serious civil unrest over the repercussions of the 'Badeni Ordinances', which had recently granted equal official rights to the Czech language alongside German in Bohemia. Mahler's recomposed ending, leaving Dalibor triumphantly alive, might have been calculated to excite Czech nationalist feelings; a police presence in the theatre was accordingly arranged.

The cumulative effect of Mahler's perfectionism and daring at the Hofoper encouraged rapidly increased press and public interest whose economic effects impressed his superiors. Such interest was nevertheless to prove intrusive and damaging to Mahler himself. His insensitivity to the feelings of players and singers exacerbated the frequent scandals that were fostered by the more scurrilous and anti-Semitic members of Vienna's close-knit but politically diverse press community. (The most personally distressing event of this period was the removal to an asylum of his friend Hugo Wolf, who in October 1897 began to suffer delusions brought on by tertiary syphilis.) His strategy developed in stages. His early years in Vienna were marked by a painstaking involvement with every aspect of production and management as he worked to build up a strong company of intelligent singers who were able to act convincingly. His treatment even of respected older singers and orchestral players was often peremptory. The result was a decade of opera in Vienna that was later

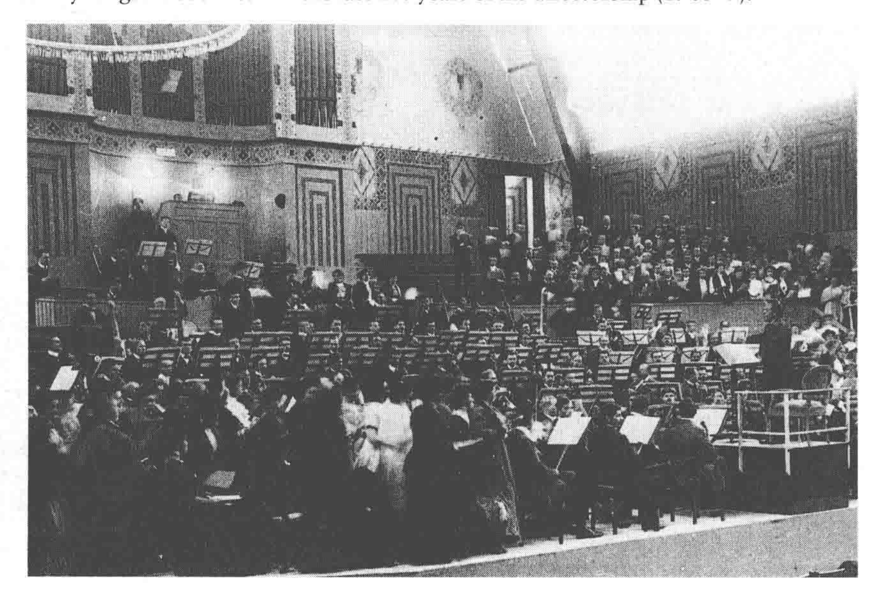


recalled as an almost continuous festival of memorable productions, although the toll on Mahler's mental and physical health was considerable. In the 1898–9 season Mahler took over from Hans Richter as conductor of the subscription concerts and thus added to his already heavy work-load. He accordingly took care to establish a congenial domestic environment and cherished the summer vacation months, which he saved for composition.

His life began gradually to settle into a less stressful pattern in the course of that season, which found him installed in a spacious modern apartment (in a new block on the Auenbruggergasse, designed by the leading modernist architect in Vienna, Otto Wagner). This he shared with his sister Justine, Emma having married the cellist Eduard Rosé, brother of the Vienna Philharmonic's leader Arnold Rosé, in August 1898. Mahler's three symphonies and the *Lieder eines fahrenden Gesellen* were in prospect of achieving wider recognition; all were now published or due to be published (partly thanks to a Bohemian grant arranged by Guido Adler in 1897). In April 1899 he conducted the Viennese première of his Second Symphony. Although over-work and ill health (particularly related to haemorrhoids) had contributed to the restriction of his compositional output to *Wunderhorn* settings since 1896, the summer of 1899, spent near Alt Aussee, brought a first draft of parts of the Fourth Symphony. This was completed in the summer of 1900 in a new composing studio, larger than the one at Steinbach, built in the pine forest above the southern shore of the Wörthersee in Carinthia, where Mahler had bought land on which to build a lakeside villa (completed in 1901).

His three seasons as conductor of the Philharmonic concerts in Vienna were noless controversial than the one in Hamburg. The hostility of some members of the orchestra was matched by that of many Viennese critics who were scornful of his theatrical gestures (frequently recorded and satirized in press cartoons and silhouette drawings) and his apparently disrespectful tendency to alter the scoring and heighten the effects of rhythmic and dynamic contrast in works by composers as revered as Schumann and Beethoven. His first season had included a version for full string orchestra of the latter's String Quartet in F minor (op.95) in a repertory featuring relatively new music by Humperdinck and Richard Strauss as well as a range of familiar Classical and Romantic works. The performance of his Second Symphony which ended the season on 9 April 1899 was not, however, integral to it but a separate charity event; even in his second season (1899–1900) Mahler included only a single group of four of his own orchestral songs. That season's

4. Gustav Mahler inside the Kaiserlich-königliches Hofoperntheater, Vienna, 1903



5. Mahler (extreme left) at a party in the garden of the Moll villa, with Max Reinhardt, Carl Moll and Hans Pfitzner, 1905

highpoint was an ambitious trip to Paris with the orchestra to give five concerts in June as part of the World Exposition. On this visit Mahler first made the acquaintance of Colonel Georges Picquart and other supporters of Alfred Dreyfus, including Sophie Clemenceau (sister of his Viennese acquaintance Berta Szeps-Zuckerkandl), in whose house he met his future wife at a dinner party in November 1901.

By that time Mahler had resigned as conductor of the Philharmonic concerts, after a particularly stormy season in which he had included his reorchestrated version of Beethoven's Ninth Symphony. Three weeks later (17 February 1901) he conducted the première of his own *Das klagende Lied* in its revised, two-part version. On 24 February a punishing afternoon concert, featuring Bruckner's Fifth Symphony, was followed by an evening performance of *Die Zauberflöte*. Haemorrhoids had once again been troubling him; during the night he suffered a serious loss of blood which necessitated emergency treatment, a subsequent operation and convalescence. That summer was the first in his new villa, near Maiernigg on the Wörthersee, where he was joined by Natalie Bauer-Lechner, his sister Justine and her future husband Arnold Rosé. By the end of it he had composed three of the *Kindertotenlieder*, four of the independent Rückert songs, *Der Tamboursg'sell* and part of theFifth Symphony.

A new chapter in Mahler's life opened with his marriage to Alma Schindler on 9 March 1902, an event that excited Viennese gossip and shocked his closest friends, many of whom had learnt of his engagement only from newspaper reports. Some foresaw the problems that might attend Mahler's relationship with a woman almost 20 years younger than himself. Alma was the bright and attractive daughter of the Austrian landscape painter Emil Schindler; after his death her mother had married his former pupil Carl Moll, a prominent figure in the Modernist movement in Viennese art, closely associated with the Secession movement led by Gustav Klimt (one of Alma's many admirers). When she met Mahler, Alma was having an affair with her composition teacher Alexander Zemlinsky. Mahler had staged the première of Zemlinsky's opera *Es war einmal* at the Hofoper in 1900; Zemlinsky's friendship with Schoenberg enlarged the circle of younger modernist artists and musicians into which Alma introduced her husband. Mahler's musical contribution (a wind-band arrangement of part of the finale of Beethoven's Ninth Symphony) to the 14th exhibition of the Secession in 1902 – whose topic was derived from its focal sculpture: Max Klinger's *Beethoven* – brought him into contact with another Secessionist, Alfred Roller, whom he employed as an innovative designer at the Hofoper from 1903. Mahler's involvement with Vienna's musical modernists was closest in the 1904–5 season, during which he was elected honorary president of the Vereinigung Schaffender Tonkünstler: a concert-giving association, modelled on Klimt's Secession, which aimed to introduce the Viennese concert audience to a wide range of new music. Zemlinsky and Schoenberg, along with the latter's new pupils (from 1904) Anton Webern and Alban Berg, were central figures in this short-lived venture which nevertheless provided a model for later associations devoted to the promotion of new music.

Typical for her generation, Alma's attitude towards Mahler's music was initially ambivalent; her sceptical response to the Fourth Symphony (which was given its first performance in Vienna on 12 January 1902) was no doubt painfully focussed by Mahler's insistence that their marriage was conditional upon her renouncing her own ambitions as a composer. She later interpreted that ultimatum as a key to the problems that soon beset their relationship, particularly during the summer months in the Wörthersee villa. During the morning she was expected to be the unobtrusive housewife, looking after their daughters (Maria, born 3 November 1902, and Anna, born 15 June 1904) while Mahler composed in his forest studio. At first he clearly profited both mentally and creatively from the marriage. The conducting trip to Russia which had doubled as a honeymoon in March 1902 (they had left Vienna too soon to be able to attend the wedding of Justine and Arnold Rosé on the day after their own) was the first of a series of such absences from Vienna. These were increasingly to involve performances of his own music and signified a gradual change in Mahler's interpretation of his role at the Hofoper during the last five years of his directorship (1903–7).

6. Mahler conducting a full rehearsal of his Symphony no. 8 before the first performance in the Ausstellungshalle, Munich, September 1910

7. Mahler with his elder daughter Maria ('Putzi'), who died aged 4

While he retained a close interest in all productions and worked hard to maintain and strengthen the company he had built up, Mahler began to appear at the conductor's stand less frequently and relinquished much of the day-to-day work to staff conductors like Franz Schalk and Bruno Walter (who had followed Mahler to Vienna in 1901). Certain new productions he took particular interest in, however, supervising the rehearsals and conducting at least the opening night. These included some of the relatively few new operas staged during his time at the Hofoper (like Strauss's *Feuersnot* in January 1902, Charpentier's *Louise* in March 1903 and Pfitzner's *Die Rose vom Liebesgarten* in April 1905). Mahler's relatively conservative repertory was to some extent dictated by the imperial censors, who resisted his efforts to stage Strauss's *Salome* in the 1905–6 season, finding its blasphemous implications and immoral subject matter inappropriate for a court theatre (the opera was in fact staged in Vienna, at the Deutsches Volkstheater, in 1907). The most consummate and innovatory productions of the Mahler era were those staged with Roller's symbolist-inspired and unusually lit sets from 1903: particularly *Tristan und Isolde* (21 February 1903), *Don Giovanni* (21 December 1905), *Die Walküre* (4 February 1907) and Gluck's *Iphigénie en Aulide* (18 March 1907). The Gluck was Mahler's last new production at the Hofoper.

Absences from Vienna to conduct his own works became more frequent after the highly successful première of the complete Third Symphony at the Allgemeiner Deutscher Musikverein festival in Krefeld on 9 June 1902. The Second and Third Symphonies gained increasing critical and popular acclaim. The first of many guest appearances as conductor of the Third Symphony took place in Amsterdam (October 1903), where Mahler forged a close link with the Concertgebouw Orchestra and its conductor Willem Mengelberg (whose devotion to his music was demonstrated in the Amsterdam Mahler festival of 1920, which greatly contributed to the composer's growing posthumous reputation). Mahler premières became significant and eagerly awaited events. The Fifth Symphony was first performed in Cologne in October 1904, the Sixth in Essen in May 1906 and the Seventh in Prague in September 1908. The last of his premières Mahler lived to conduct was that of the Eighth Symphony (two performances) in Munich in September 1910, attended by a large audience that included many influential European musicians and writers (fig.6).

8. Europe and New York, 1907–11. In the 1906–7 season, Mahler's conducting trips had begun to anger Prince Montenuovo and encouraged a dangerous escalation in the opera-house scandals (often involving disgruntled singers) which the anti-Semitic press, in particular, was ready to exploit. He had already signed a contract with Heinrich Conried, director of the Metropolitan Opera House in New York, before personal tragedy struck in the summer of 1907. After Mahler's return with Alma from a conducting engagement in Rome, their two daughters (who had stayed behind with their English governess) both succumbed to illness. Anna soon recovered, but Maria died from a combination of scarlet fever and diphtheria on 12 July 1907. Alma and her mother both needed medical attention after the removal of Maria's body from the Wörthersee villa. Mahler, after a routine examination by the doctor attending them, learnt that his own heart was in poor order. A Viennese specialist subsequently confirmed a valvular defect and recommended a programme of exercise that drastically curtailed

GESELLSCHAFT DER MUSIKFREUNDE IN WIEN

Sonntag, den 24. November 1907, mittags halb 1 Uhr
im großen Musikvereins-Saale

I. AUSSERORDENTL. GESELLSCHAFTS-KONZERT.

Zur Aufführung gelangt:

GUSTAV MAHLER

ZWEITE SINFONIE (C-MOLL)

für Soli, Chor, Orchester und Orgel.

1. Satz: ALLEGRO MAESTOSO. (Mit durchaus ernstem und feierlichem Ausdruck.)
2. Satz: ANDANTE CON MOTO.
3. Satz: SCHERZO. (In ruhig fließender Bewegung.)
4. Satz: „URLICHT" aus: „Des Knaben Wunderhorn".
5. Satz: FINALE.

MITWIRKENDE:

Frau ELISE ELIZZA, k. k. Hof-Opernsängerin.
Fräulein GERTRUD FÖRSTEL, k. k. Hof-Opernsängerin.
Fräulein HERMINE KITTEL, k. k. Hof-Opernsängerin.
Fräulein BELLA PAALEN, k. k. Hof-Opernsängerin.
Herr RUDOLF DITTRICH, k. k. Hoforganist.
Der SINGVEREIN DER GESELLSCHAFT DER MUSIKFREUNDE.
Das K. K. HOF-OPERNORCHESTER.

DIRIGENT: DER KOMPONIST.

Preis dieses Programmes 20 Heller.

8. Programme of Mahler's farewell concert, Grosser Saal, Musikverein, Vienna, 24 November 1907

Mahler's habitual enthusiastic walking, swimming and cycling.

After a final staging of *Fidelio* in Vienna on 15 October 1907 and a farewell performance of his Second Symphony in the Musikvereinsaal in November (fig.8), Mahler departed for the USA, with Alma, as one of many high-profile European artists who were being invited to add lustre to the cultural life of New York. The considerable financial rewards were outweighed, in Mahler's case, by the socially élitist and aesthetically conservative style of the Metropolitan Opera, where Wagner was still performed with the cuts that had long been restored in Vienna. He was nevertheless impressed by the musicians he found there and sensed potential for improvement and change. His soloists were of world class (they included Caruso and Chaliapin) and while grief over Maria's death shadowed him, Mahler had a successful and rewarding season there, making his début with *Tristan und Isolde* (1 January 1908). His repertory was once again dominated by Wagner (*Die Walküre* and *Siegfried*) and Mozart (*Le nozze di Figaro* and *Don Giovanni*), although he also conducted *Fidelio* with sets recreated from Roller's Vienna designs.

In May 1908, setting the pattern for the remaining years of his life, Mahler returned with Alma to Europe, where conducting engagements (including the première of his Seventh Symphony in Prague on 9 September) were fitted around a summer vacation devoted largely to composition. The Wörthersee villa had been sold (the events of the previous summer made it unbearable) and a new summer apartment rented in the Tyrol, in the ancient farmhouse of Alt-Schluderbach. This was not far from Toblach (now Dobbiaco) and the Landro valley, which had long been Mahler's favourite access point for the Dolomites. The last of his composing studios was an easily reached wooden summer-house at the edge of a pine forest. The new work he drafted that summer was *Das Lied von der Erde*.

Mahler's second New York season began with a contract for a month of orchestral conducting. He was to direct the New York Symphony Orchestra in three concerts, the second of which (8 December 1908) was the American première of his Second Symphony. His return to the Metropolitan Opera on 23 December, with *Tristan und Isolde*, was somewhat embattled, because Conried's successor as director, Giulio Gatti-Casazza, had imported Toscanini as a rival attraction to Mahler. Toscanini had insisted on conducting *Tristan*, but Mahler's protestations were heeded (he also conducted a series of performances of *The Bartered Bride* and a revival of *Figaro*). The season concluded with more concert conducting, this time with a specially reconstituted New York Philharmonic Orchestra, which he was to take over as principal conductor in the following season (the first in which he managed largely to escape from the opera house and devote himself to the more congenial task of orchestral conducting). This

9. Mahler with Alma (to his left), Maria Moll, his daughter Anna (turning to the camera), the conductor Oskar Fried and Anna Moll (Alma's mother)

he began in October 1909 after a summer in which he drafted much of the Ninth Symphony before making a conducting trip to the Netherlands.

The New York Philharmonic season of 1909–10 gave Mahler much pleasure. His ambitiously eclectic choice of programmes (including modern works by Richard Strauss, Pfitzner and Rachmaninoff) inspired conflicting reviews; his licence with Beethoven received the usual condemnation, not least from émigré German critics, as did his performance of his own First Symphony (16 December 1909). The busy season concluded with an American tour with the orchestra before he returned to conducting engagements in Europe (the Second Symphony in Paris and concerts in Rome). That vacation, during which he sketched most of the Tenth Symphony, was marked by both triumph and catastrophe: triumph with the Eighth Symphony's first performances (Munich, 12 and 13 September), catastrophe in the form of his discovery that Alma had begun an affair with the young Walter Gropius while taking a cure at Tobelbad. Gropius followed her to Toblach, where Mahler pressed Alma to decide between them. Ostensibly committing herself to remain with Mahler, she secretly arranged to continue the relationship with Gropius (who later became her second husband). She admitted in her memoirs that both she and Mahler knew that their marriage had become a 'lie'. The period immediately before the première of the Eighth Symphony, which Mahler now dedicated to Alma (fig.10), was marked by both reawakened love for her and despairing self-castigation which led him to seek the advice of Sigmund Freud in Leiden (although brief and informal, their meeting seems to have afforded Mahler therapeutic insight).

10. Title-page of the piano duet arrangement of Mahler's Eighth Symphony (Vienna: Universal Edition, 1912), dedicated to Alma Mahler; the arrangement, by Alfred Neufeld, was revised by Alban Berg

Annotations in the manuscript sketches of the Tenth Symphony bear witness to the intense distress that underlay the outward stability which Mahler and Alma had regained by the time they returned to the USA for the 1910–11 season. Mahler's concert programming became even more adventurous, including works by such composers as Debussy, Elgar and MacDowell. Developing tension in his relations with the orchestra and its financial backers was overshadowed by what at first seemed a fatigue-induced illness in February 1911. It shortly became apparent to his doctors that Mahler had contracted bacterial endocarditis, from which there was little hope of recovery. The complex stages of his return, via a clinic in Paris, to Vienna, where he died on 18 May, were managed by Alma with relatively little direct assistance and increasing interest from the press. He was buried in the Grinzing cemetery on 22 May 1911.

9. MUSICAL STYLE. Mahler's impulse towards assimilation into German culture prompted a lively ambition to master the repertory and techniques of the classical music which helped to shape his experience and aspirations. That ambition was also fired by the idealist aesthetics of Romanticism which positioned Austro-German classical music as 'higher' than other types in possessing spiritual and philosophical significance which transcended or even reconciled social and racial difference. Some of Mahler's earliest recollections, recounted to Natalie Bauer-Lechner, indicate that he began at an early age to interpret his musical performances for his family as symbolic dramas or narratives about people and social justice. He claimed, for example, to have invented a story for Beethoven's Variations op.121*a* on Wenzel Müller's *Ich bin der Schneider Kakadu*; the events of the tailor's life ended with a parody funeral march whose moral (Mahler decided) was: 'Now this poor beggar is the same as any king!' Mahler's later, implicitly less egalitarian ideas about musical signification, were revealed in something he appears to have told Freud, in 1910, about his youthful memory of an angry scene between his parents; he had fled, only to encounter a barrel organ in the street playing the popular song *Ach, du lieber Augustin*. He believed this experience had impaired his ability to disentangle 'high tragedy' from 'light amusement' in his music. His major works both articulate and seek to resolve the cultural tensions mapped by such stories.

The stylistic and generic plurality of 'voices' in his symphonies has been prized as a function of their subversively modernist, even postmodernist, character. That it struck Mahler as problematic illuminates the propensity for parody or irony, often explicitly indicated in directions in the score, which contributes to their authenticity as cultural documents, resounding the very contradictions that Mahler's own inherited aesthetic ideals required to be resolved or transcended. The disruptive effect attributed by his culture to unabsorbed ethnic or popular influences in serious music is focussed in the family story of a visit to the synagogue during which the infant Mahler had shouted his disapproval at the solemn singing, intervening with a spirited rendering of the ribald Moravian-Czech street-song *At' se pinkel házi* ('Let the knapsack rock'). His subsequent concern about the conflicting appropriateness of 'high' and 'low'

musical styles was inevitably resolved more successfully in conceptual narrative than in supposedly purely musical terms, although his works' complex and innovatory internal features have begun to inspire systematic analytical investigation. Mahler's descriptive interpretations of his music deserve to be reckoned as integral to its identity as a rhetorical discourse that was both constructing and keeping separate the complementary worlds of private experience and the public ceremonial which channelled and normalized it. Mahler's public pronouncements, from around 1900, denigrating the value and integrity of descriptive programmes require judicious cultural-historical interpretation and must not be accorded disproportionate authority; he no less frequently indicated that music was, for him, a higher form of philosophizing. To accept, with Theodor Adorno, that Mahler's works incorporate a critique of the cultural assumptions upon which they rely is to find significance in their many unusual features which fall outside the boundaries of more conventional musical concerns such as tonal argument and structural modelling. A list of such features might utilize the following categories: timbre, orchestration and the employment of extreme volume levels; the disposition of instrumental forces in space; the treatment of genre; detailed performance-related score directions (occasionally indicating parodistic or ironic intent); handwritten annotations in his manuscript scores; the symbolic or allegorical representation in music of gendered subjects, forces of nature or fate and group identity; and allusions to identifiable forms of ethnic or urban popular music (particularly dance forms like the ländler and the waltz).

10. 'Das klagende Lied', early songs, First Symphony. The relatively small number of Mahler's surviving compositions, coupled with the assured personal style of the earliest of them, has given rise to speculation about lost or destroyed works from his student years. Surviving records and recollections have encouraged attempts to compile a list of such works, which seem to have included an overture (*Die Argonauten*) and a number of chamber works with piano. A single authenticated Piano Quartet movement (possibly from 1876) has survived: this purposeful sonata structure in A minor demonstrates sympathetic knowledge of Schubert, Schumann and Brahms. Of Mahler's two early operatic projects, *Herzog Ernst vom Schwaben* and *Rübezahl*, only the libretto of the latter survives, although music drafted for it appears to have originated in or been incorporated into at least one early song and parts of *Das klagende Lied*. A *Symphonisches Praeludium* discovered in the 1970s, in a piano transcription apparently copied by Mahler's friend Rudolf Krzyzanowski, is probably by Krzyzanowski himself or another of Mahler's student circle; Hans Rott's remarkable Symphony in E (which Mahler admired and quoted from, after Rott's death, in his own Second and Third Symphonies) similarly testifies to the manner in which their enthusiasm for Wagner and Bruckner must have informed the style and aims of all three.

With the exception of the Piano Quartet movement, all Mahler's earliest surviving works link poetic representation with musical aims. As well as texts for himself to set (e.g. *Das klagende Lied*, *Rübezahl*), Mahler wrote effective lyric poetry throughout his life. Goethe, Hölderlin and later Rückert are among his obvious models, although the stylized manner of the authentic but artfully refashioned 'Old German songs' of Arnim and Brentano's *Des Knaben Wunderhorn* anthology (1805–8) is evident in Mahler's lyrics long before he claimed to have discovered it around 1887. The writing, and setting, of such poetry played a part in Mahler's efforts to create an identifiably 'German' voice. Surviving songs from 1880 (*Im Lenz*, *Winterlied* and *Maitanz im Grünen*) anticipate the more concentrated attempt of the three volumes of *Lieder und Gesänge* (published in 1892) to contribute to the tradition of the German piano-accompanied song.

While the term 'Gesang' was already signifying a more artful and expressively naturalistic lyric form, requiring a through-composed and less regularly periodic folksong style to that of the lied (e.g. *Erinnerung* in volume i of the *Lieder und Gesänge*), the dominant manner of Mahler's songs is defined by a rhetoric of arch naivety, masking considerable complexity of musical detail and symbolic meaning. The youthfully loving subject in close rapport with an anthropomorphized Nature (*Frühlingsmorgen*, *Ich ging mit Lust durch einen grünen Wald*) characteristically signifies an idyllic or utopian realm of existence, the disillusioning loss of which may be suggested by music whose diatonic clarity is subject to minor-key inflections and enigmatic forms of closure. Even an ostensibly uncomplicated *Wunderhorn* setting like *Um schlimme Kinder artig zu machen* (*Lieder und Gesänge*, ii) proves on closer inspection to involve the rejection of an amorous invitation; its verbal pretext – the woman's unseen and perhaps merely figurative children – is dutifully maintained by music that demands to be read as if between quotation marks.

Dance forms, serenades, children's songs, military signals and marches contribute to a complex vocabulary of signification in these songs, where stylistic and generic allusion is usually employed in preference to the establishment of a clearly defined and expressively engaged authorial voice (although Mahler subsequently proved familiar with the techniques appropriate in the period, derived from the slow movements of late Beethoven and the chromatic 'prose' style of Wagner's *Tristan und Isolde*). A similar, if still more elaborately complex rhetoric is deployed in the longest surviving example of Mahler's work from the period around 1880, the cantata *Das klagende Lied*, much of whose first version (completed in November 1880) predates any of the surviving music so far mentioned, with the exception of the Piano Quartet movement. This long-undervalued narrative piece was originally in three parts (the first was dropped in the revised version in which the work was first performed in 1901); its tale of two brothers who search for a flower that will win the hand of a 'proud queen' derives from the world of the Romantic fairy tale, specifically 'The Singing Bone' from the *Kinder- und Hausmärchen* of J.L. and W.C. Grimm. Mahler's setting of his own verse text (mostly in six-line stanzas with an *ABABCC* rhyme scheme) represents a remarkable achievement; its rejection in September 1883 by Liszt, to whom it had been sent for consideration for performance at an Allgemeiner deutscher Musikverein festival, must have been especially disappointing.

Deploying a large orchestra, chorus, two boy singers (in the first version) and four adult soloists, *Das klagende Lied* selectively treats scenes of dramatic action in a rich and multi-faceted narrative that involves stylized authorial

intervention and apostrophe, interpolations by a kind of Greek chorus (in a style often evoking that of a Bach chorale) and the complicated conceit, derived from the original tale, whereby even the tragic climax of the work is precipitated by a musically articulated story-within-a-story. The boy who had found the flower was murdered by his evil brother (Part 1, Waldmärchen); one of the dead boy's bones is later discovered by a minstrel, who fashions a flute from it (Part 2, Der Spielmann); when he plays the flute at the wedding of the queen and the surviving brother, it sings in the voice of the latter's victim (Part 3, Hochzeitsstück). The murdered brother's song of lamentation ('klagende Lied') thus intervenes catastrophically in the celebrations, in a passage whose operatic and melodramatic qualities are made all the more telling by Mahler's first experimental use of offstage music (a wind and percussion band). Ostensibly evoking distant festivities, the effect of a military band playing outside the auditorium, oblivious to and even in direct conflict with the emotions and musical discourse of the onstage characters, seems to have been designed to turn the whole performance into an enacted parable of the double intervention by music in a scene of musically evoked power. The conclusion of *Das klagende Lied* is appropriately desolate: a sparse threnody evoking the deserted hall whose lights are extinguished as the castle ramparts crumble.

The ambivalence about meaning informing the early songs was here carried to daring heights. One of the public functions of music in Mahler's culture was to adorn the power of the state and support its official ideology; the suspicion that his works contained a moral or even political threat informed much of the negative criticism that greeted its rare performances, up to and including the première in Vienna (1901) of *Das klagende Lied*. Many features of his first three symphonies tend to justify that suspicion, although the formative work from which the First Symphony grew, the *Lieder eines fahrenden Gesellen* (1883–5), was a more intimate essay in the cultural negotiation of personal emotion occasioned by the Kassel love-affair with Johanna Richter, to whom Mahler dedicated six poems from which the song cycle's four texts were chosen.

The fact that the first of these owes something to a poem from *Des Knaben Wunderhorn* nevertheless serves as a warning against simplistic readings of the cycle as autobiographical. Mahler carefully avoided references to locations or objects foreign to the world of the German Romantic lyric, where fields, woods and roadside lime trees provided a setting for the emotional dramas of simple souls whose only possessions might be feelings of love and loss. The wayfarer of the cycle is a standard cultural type whose musical voice is a mosaic of musical manners, sharply characterized and artfully deployed. Only in this respect does the cycle demonstrate features subversive of the cultural norms it otherwise adopts. Particularly in the final orchestral version of what was originally written for voice and piano, the insistent contrast between the opening song's lamenting phrase *Wenn mein Schatz Hochzeit macht* ('When my love gets married') and its dance-like instrumental diminution suggests a more specifically Bohemian or Moravian folkdance than Romantic idealism would normally have favoured; the unusual tonal design of individual songs (the second moves from D major to F♯ major, the third from D minor to E♭ minor, the fourth from E minor to F minor) even signals the expressive authenticity and licence of nascent Modernism. Conventional and unconventional elements in the cycle are united in structural schemes that juxtapose irresolvably contrasting states and worlds of feeling. The second song, *Ging heut' morgens übers Feld*, evokes an idyllic realm of flowers and talking birds whose illusory reality is threatened in the question and answer of its postludial aside: 'Will my happiness really begin now? No! The kind I mean can never blossom in me!' Appropriately, the final song's resolution of the contradiction between 'love and sorrow / world and dream' insists upon the tread of a funeral march that turns F major into F minor.

The direct quotation of the F major music in the third movement of the First Symphony (marked 'wie eine Volksweise' – 'like a folksong') betrays Mahler's desire to naturalize his musical wayfarer and introduces the elaborate relationship that exists between the *Lieder eines fahrenden Gesellen* and the symphony, whose two parts draw on the cycle's juxtaposition of nature idyll and the troubled reality of subjective experience. The link between the two works is emphasized by the fact that most of the material of the exposition of the symphony's first movement (following the slow introduction) is derived from the cycle's second song. The tension between conformist assimilation and transgressive innovation, evident in Mahler's indecision about how to describe and title the symphony, was reflected in the different techniques and musical manners employed in its two parts (represented in the published version by movements 1 and 2 and movements 3 and 4 respectively). At its first performance, in Budapest (when the first part also included the later-discarded 'Blumine' movement between the other two), the pastoral-idyllic Part 1 was in general better received than Part 2, with its 'new romantic' excesses. At that time the work's modernity was additionally signalled by its being presented as a symphonic poem. Mahler's decision not to publish an explanatory programme nevertheless emphasized his contradictory ideas about how he wanted the work to be understood. For its second performance, in Hamburg, he retitled it and added an elaborately literary programme (compiled with the help of his friend in Hamburg, Ferdinand Pfohl). It alludes to at least two novels by Jean Paul (*Titan* and the *Siebenkäs*), E.T.A. Hoffmann's *Fantasiestücke in Callots Manier* and the illustration for a children's book mentioned in connection with the third movement; the title of the finale (See v below) seems to refer to Dante:

Part 1

Titan, a tone poem in symphony form

'From the days of youth', Flower-, Fruit- and Thorn-pieces

i. 'Spring and no end' (Introduction and Allegro Comodo). The Introduction depicts the awakening of Nature from the long sleep of winter.
ii. 'Blumine' (Andante)
iii. 'With full sails' (Scherzo)

Part 2

iv. Stranded! (A funeral march in 'the manner of Callot'.) The following might explain this movement: the external inspiration for the piece came to the author from a parodistic picture well known to all children in Austria: 'The Huntsman's Funeral', from an old children's book: the animals of the forest accompany the dead huntsman's bier to the grave; hares escort the little troop, in front of them marches a group of Bohemian

musicians, accompanied by playing cats, toads, crows etc. Stags, deer, foxes and other four-legged and feathered animals follow the procession in comic attitudes. In this passage the piece is intended to have now an ironically merry, now a mysteriously brooding mood, onto which immediately:

v. 'D'all Inferno' (Allegro furioso) follows, like the suddenly erupting cry of a heart wounded to its depths.

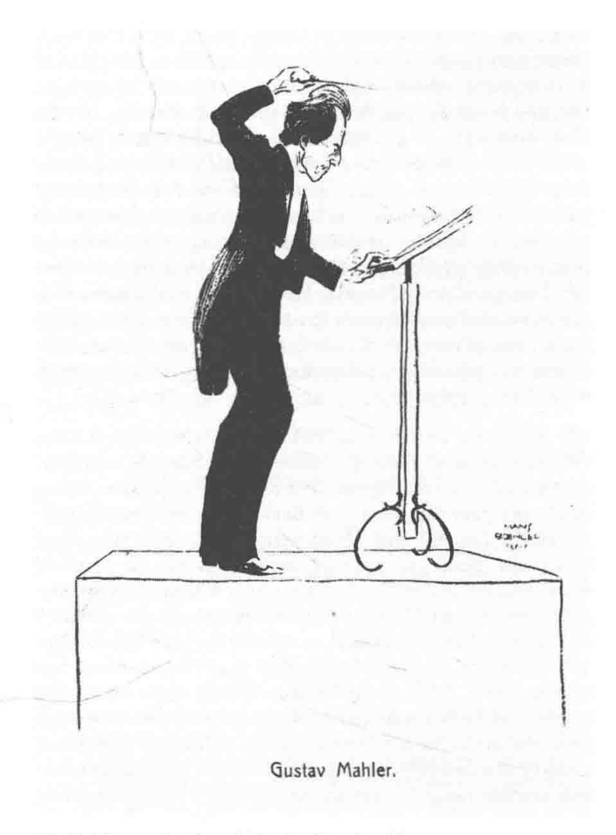
The four-movement version in which the symphony is now known remains rich in imagery and technical diversity. In the opening bars Mahler uses the extraordinary orchestral effect of a unison A over seven octaves in the strings, all except the lowest basses playing harmonics, 'Wie ein Naturlaut' ('Like a sound of nature'); a kind of virtual-reality effect is created by three offstage trumpets (the first two directed to be placed initially 'in the very far distance'), as if to stress a physical separation between the platform orchestra as Nature, with its expicitly marked cuckoo calls, and the realm of human activity. Mahler characteristically consigned to the silence between the second and third movements the disillusioning dramatic catastrophe, figured as the tragic love experience which separates the symphony's protagonist, like the wayfarer of the song cycle, from the comforts of youthful illusion. What follows is the most experimental of the symphony's four movements: an ironic funeral march based on the children's round *Bruder Martin* ('Frère Jacques'), whose trio-like interpolations include one of Mahler's most explicit evocations of the Bohemian street musicians encountered in his childhood; the pungent, chromatically inflected orchestral timbre is appropriately enriched (at a point marked 'Mit Parodie') with a percussion part for a bass drum with Turkish cymbals attached, to be played by a single musician. Only in the symphony's finale does Mahler mobilize all the resources of the post-Wagnerian orchestra in a large-scale dramatic narrative. Daemonic forces and heroic aspiration are colourfully symbolized in a movement whose expressive poles are represented on the one hand by the delicately-nuanced 'Gesang' theme that functions as a contrasting second subject, on the other by a triumphal march, whose final statement follows a cyclic flashback to the opening of the first movement (on whose falling 4ths it is based). Already, at the end of this work, Mahler was experimenting with ways of intensifying available techniques for creating an overwhelming volume of sound. He suggests in the score that the expanded horn section (he seems to have envisaged at least nine players at this point) should stand up, bells raised, in order to surmount the rest of the orchestral tutti with their peroration.

11. Second, Third and Fourth Symphonies, later 'Wunderhorn' songs. Where the First Symphony, particularly in its original five-movement version, demonstrates clear affinities with Berlioz's *Symphonie fantastique*, the Second and Third Symphonies advertise their status as heirs to another source work of musical Romanticism in Germany: Beethoven's Ninth Symphony, as interpreted by Wagner in *Das Kunstwerk der Zukunft* ('a richly gifted individual . . . took up into his solitary self the spirit of community that was absent from our public life'). Both symphonies include solo song and choral elements. Each was interpreted by Mahler (through annotations in the manuscript score, published movement titles or discursively elaborated narrative programmes) as articulating ideas of democratic inclusiveness and leading to a utopian vision through a drama of spiritual and even social struggle.

Surviving programmatic explanations, both formal and informal, of the Second Symphony (1888–94) suggest that its evolution and completion were dependent upon the narrative conceptualization of its structure. The programme Mahler drafted for a 1901 performance in Dresden indicates a progression from unresolvable subjective anxiety through a series of illustrative 'intermezzos' (movements 2–5) to a large-scale finale: a symphonic cantata for soloists, chorus and orchestra in which the progression from tension to resolution is reinterpreted as a narrative of apocalypse and subsequent redemption (the 'Resurrection' of the symphony's subsequent unofficial subtitle). Judeo-Christian mythology supplied certain of its details, but reinterpreted and even subverted in a striking manner. If Mahler's programmatic justification of his generically diverse suite of movements extended established 19th-century precedents, the symphony's scale and close matching of musical and conceptual details were highly original. The difference of rhetorical manner between the first- and second-subject material of the opening movement, respectively in C minor and E major, is rooted in post-Beethovenian symphonic practice as influenced by Romanticism and the 19th-century operatic overture. Mahler nevertheless extended the principle of contrast by opposing music of explosive urgency, generating a symphonic funeral march (C minor), to music of delicately focussed lyricism (E major) that is rich in harmonic, textural and expressive signs denoting a fragile and alienated subjectivity. This is far removed from the gloomy reality of the funeral rites which the movement's abandoned title ('Todtenfeier') signalled as its primary mood: one which has been linked (see Hefling, H(ii) 1988–9) to an unstated programme derived from the Polish poet Adam Mickiewicz's *Todtenfeier*, as translated into German by Mahler's friend Siegfried Lipiner. Mahler himself described it as evoking the funeral of the hero of his First Symphony, the prologue to its sequel representing an angry and questioning meditation upon mortality.

His retention of the First Symphony's division into two parts, while relocating the break in the Second to a five-minute pause following the first movement, established a productive precedent for his later works, also reflecting a persisting contradiction between developmental narrative and the traditionally varied sequence of symmetrically resolved symphonic movements (here compounded by the time which lapsed between the composition of the first movement, whose earlier version as *Todtenfeier* (1888) has now been published, and the completion of the rest of the symphony in 1893–4). The contrast between the 'New German' complexity of the first movement's formal plan, extreme volume levels and climactically emphasized harmonic dissonance and the more conventional size and mid-19th-century manners of the Andante had its own precedent, however, in the originally planned contrast between the first and the second ('Blumine') movements of the First Symphony and must be considered integral to Mahler's intention. The movement's modal ambivalence between major and minor possibly suggested its programmatic description as a 'blissful moment in [the hero's] life and a mournful memory of youth and lost innocence'.

The third movement grafts elements of the energetic Beethovenian scherzo onto an instrumental reworking of material used in the contemporary orchestral *Wunderhorn* song *Des Antonius von Padua Fischpredigt*. Nowhere is the many-layered conceptual or programmatic complexity



of Mahler's so-called *Wunderhorn* style of symphonic composition better illustrated than in this 'naive' song about St Anthony's fruitless attempts to preach Christian morals to unheeding fish. Mahler regarded it as both humorous, in its stylized evocation of the fishes' movements, and highly serious in symbolic implication; he associated its extended symphonic version with images of the subjective alienation from conventional society of the symphony's subjective protagonist and (in the Dresden programme) an extreme form of existential despair:

> he loses, together with the clear eyes of childhood, the sure foothold which love alone gives. He despairs of himself and of God. The world and life become a chaotic nightmare [*wirren Spuk*]; loathing for all being and becoming seizes him with iron fist and drives him to an outburst of despair.

The problematic stylistic and generic contradiction in Mahler's early symphonies is strikingly demonstrated: the trio-like evocation of St Anthony's sermon, with its climactic 'outburst of despair', is isolated from the Scherzo material, whose ironic characterization (as both commonplace and subjectively inaccessible or unsympathetic) is heightened by colourful orchestration and the use of unconventional instruments, like the E♭ clarinet, and 'unmusical' timbres, like that of the 'Ruthe' (a bunch of twigs tapped on the side of the bass drum). The symphony's generic range is further extended in the fourth movement ('Urlicht'), which adopts an implicitly more authentic voice of stylized simplicity in its setting, for solo contralto, of a prayerful expression of faith from the *Wunderhorn* anthology. The setting contrasts a solemn brass chorale with the more chromatic, almost erotic expressive urgency and metrical naturalism (involving short-term changes of time signature) of the soloist's determination to return to God ('Je lieber möcht' ich in Himmel sein!'), establishing a precedent for Mahler's later treatment of the symphonic adagio. On another level, the third and fourth movements' juxtaposition of childlike subjective conviction and the alienating crudity and insensitivity imputed to humanity *en masse* generates a more specifically ideological tension which Mahler seeks to resolve in the enormous finale, projecting an alternative, idealized community of redemptively freed spirits, individually justified by subjective aspiration and unmarked by the hierarchical structures of earthly power. The movement falls into a linked series of formal units. An expansive introduction (beginning with a direct quotation of the explosive 'outburst' from the third movement) is followed by a grandiose orchestral march, programmatically interpreted as the procession of the arisen dead to Judgment: 'they all come marching along in a mighty procession: beggars and rich men, common folk and kings, the Church Militant, the Popes. All give vent to the same terror, the same lamentations and paroxysms'. The march culminates in a deliberately distanced representation of the Last Trump by offstage brass and timpani (headed 'Der grosse Appell!' in the manuscript), while a solo orchestral flute plays an improvisatory, cadenza-like 'nightingale song'. The dynamic favouring of the earthly nightingale over the trumpets of the apocalypse heralds what Mahler clearly intended to be an unexpected reversal of the anticipated judgment in an egalitarian redemption. The movement's closing section begins with a hushed choral setting in G♭ of the first two stanzas of Klopstock's 'Aufersteh'n', after which contralto and soprano soloists continue with words written by Mahler himself. A concluding crescendo of all orchestral and choral forces then leads to an extended peroration in E♭, complete with bells and organ: 'You will rise again, / my heart, in a moment!/ What you have overcome [*geschlagen*] / will lead you to God!'

The Second Symphony gained popularity in Mahler's lifetime only in the wake of the initially more readily appreciated Third Symphony, whose first complete performance at the 1902 Allgemeiner deutscher Musikverein festival in Krefeld, six years after it had been completed, represented Mahler's first conclusive public success with a new symphony. This is striking in view of the Third's arguably more arcane extension and intensification of all the salient features of the Second, to which it formed an ambitious conceptual sequel (draft plans for movement titles cited by Paul Bekker (H(i)1921) appear to have indicated that a Fourth Symphony was planned at the same time). Structural similarities between the Second and Third Symphonies include the unequal disposition of the movements in two parts, the first alone comprising Part 1, and the bold mixture of genres adopted for the movements of Part 2, including a minuet-tempo second movement, a scherzo based on an independently existing *Wunderhorn* song (*Ablösung im Sommer*) and a solo contralto setting as fourth movement. In the Third Symphony, however, the choral fifth movement shrinks in proportion and scope to a short setting, for contralto, women's chorus and children, of a naive religious text from the *Wunderhorn* anthology; it is followed, in the finale, by Mahler's first extended orchestral Adagio.

Movement titles and manuscript annotations testify to an elaborate programmatic conception, publicized in various forms at the symphony's earliest, incomplete

11. Mahler conducting: design by Hans Boehler

performances. The programme evolved through many stages, from an early idea for a lighter, ostensibly more 'pastoral' work (in the Beethovenian sense) to complement the Second Symphony. After beginning with the second movement he seems to have composed movements 3–6 in numerical order. The delicate Biedermeier sentimentality of the second movement was originally associated with a notion of childlike simplicity, implied in the sketch's title formula: 'Was das Kind erzählt'. This heading was later adapted for the *Wunderhorn* song *Das himmlische Leben*, which briefly figured in plans as the symphony's concluding seventh movement, entitled 'Was mir das Kind erzählt'. All but the first movement eventually bore similarly constructed titles. These suggested an allegorical scheme opening with a musical creation-piece that drew upon Greek mythology as mediated by Goethe's *Faust* (Part 2). In the 1896 manuscript the first movement is headed 'Introduction: Pan awakes / leading directly to / no.1. Summer marches in (Bacchic procession)'. The subsequent movements are: 2. 'What the flowers in the meadow tell me', 3. 'What the animals in the forest tell me', 4. 'What man tells me', 5. 'What the angels tell me', 6. 'What love tells me' (in the sixth movement the first page of the score bears the couplet 'Vater, sieh an die Wunden mein! / Kein Wesen lass verloren sein!').

The Third Symphony arguably takes as its theme the process of Mahler's assimilation while extending the iconoclastic implications of the Second's finale in the half-hour long first movement. Similarly structured around a proliferating march, its progress from D minor to F major is portrayed, in internal score annotations (e.g. 'Pan schläft', 'Die Schlacht beginnt!'), as a battle between the opposed 'forces' of the expositional duality: here representing death and winter inertia on the one hand, the awakening 'life' forces of Pan on the other. The often deliberately realistic vulgarity of the military-band style orchestration of the march highlights the implicitly subversive origins of its main theme (a student song by Binzer – *Wir hatten gebauet ein stattliches Haus* – beloved of anti-Habsburg, pan-Germanists in Mahler's student days) and lends an almost concrete political implication to the 'anarchic' qualities that outraged the work's more consevative critics.

The evolutionary programme of the rest of the symphony accommodates the historically successive forms of the minuet and trio and the Beethovenian scherzo in a unique manner, as representing the consciousness of plants and animals respectively (in a scheme that seems to have owed much to the philosophical writings of Schopenhauer, Friedrich Lange and others). In both movements, evocations of folkdance, like the ländler in the second, suggest an anthropomorphic subtext which is emphasized in score markings like 'Grob!' ('coarse') at one boisterous eruption of the scherzo material in the third movement. It is flanked by statements of the sentimental melody of a distant post horn which, like the trumpet melody in the scherzo of the Second Symphony, seems to represent a superior form of human consciousness, inaccessible to the animals' framing scherzo material (parallels between the movements extend to the climactic outburst that occurs of the end of each). The hushed 'Mitternachtslied' ('O Mensch! Gib Acht!') from Nietzsche's *Also sprach Zarathustra* proclaims the work's mid-1890s modernity in conclusive fashion (Richard Strauss's tone poem inspired by Nietzsche's book was also completed in 1896); Mahler's symmetrical setting of it as a two-stanza lyric is esoterically subtle in its orchestration. Its predominant manner is one of restrained solemnity broken periodically by a rising 3rd motif in the oboe part, marked 'Der Vogel der Nacht!' in the manuscript score.

The subsequent, celebratory setting of 'Es sungen drei Engel einen süsses Gesang', with children imitating bell sounds, provides an effective foil for the extended orchestral Adagio. Bruckner, Wagner and Beethoven all seem to have influenced its variational exploration of the tension between chorale-like benediction and an urgently aspiring *espressivo* string style, characterized by significant levels of passing dissonance. This concluding celebration of 'divine love', its culminatory peroration in a transfigured D major, was readily admired even by the symphony's detractors – a fact which highlights its tendency towards assimilationist reconciliation (anticipating Mahler's conversion to Roman Catholicism before his return to Vienna in 1897). From this perspective the symphony might be read as an unlikely lexicon of sentiments that sustained the mythology of the Austro-Hungarian empire in the fragile and increasingly fragmented last stage of its history.

The four-movement Fourth Symphony (completed in 1900) nevertheless seems to accept the contradictory nature of that vision, framing its more modestly proportioned evocation of classical symphonic manners as a complicatedly humorous conceit: a 'child's vision' illuminated by the closing *Wunderhorn* song for solo soprano, *Das himmlische Leben* (once planned for the conclusion of the Third: it shares musical material with 'Es sungen drei Engel'). The Fourth Symphony's posthumous reputation as one of Mahler's more approachable, straightforward works does not correspond with its original reception as an exercise in sacrilegious modernity. Mahler's most explicit realization of one of the implications of Wagner's interpretation of the late 18th-century symphony as characterized by 'lofty glee' exposed the ideological work done by the notion of 'classical music' in policing the lines of demarcation between high and low styles. Both are invoked in the second movement (with its scordatura violin representing Freund Hain, 'Death the Fiddler') and surprisingly juxtaposed in the predominantly slow third movement.

The 'himmlische Leben' song – whose energetic, even violent ritornello threatens the naive dream of its verses – ends the 'tetralogy' (as he once described it) of Mahler's first four symphonies by exemplifying the *Wunderhorn* style of the 1890s. A number of his other settings extend the boundaries of the orchestral lied, almost creating a specific genre of allegorical songs exploring contrasting 'voices' in an evolving, quasi-symphonic discourse (particularly where male and female characters engage in dialogue, as in *Der Schildwache Nachtlied*, composed, like *Das himmlische Leben*, in 1892). The Fourth Symphony was intended to be designated a symphonic 'humoresque', alluding to the generic title ('Humoresken'), that Mahler gave to his orchestral *Wunderhorn* songs in order to distinguish them from the more conventional lieder to which he reverted in his later settings of Rückert. His final *Wunderhorn* songs, up to and including the last two composed (*Revelge* and *Der Tamboursg'sell*, 1899 and 1901) represent above all a sharply focussed repository of the generic types of music

on which his early symphonies rely: varieties of march, quasi-*moto perpetuo* pieces (e.g. *Das irdische Leben* and *Des Antonius von Padua Fischpredigt*), dances, the lullaby (as in the outer sections of *Das himmlische Leben*) and specifically symbolized expressive 'song'.

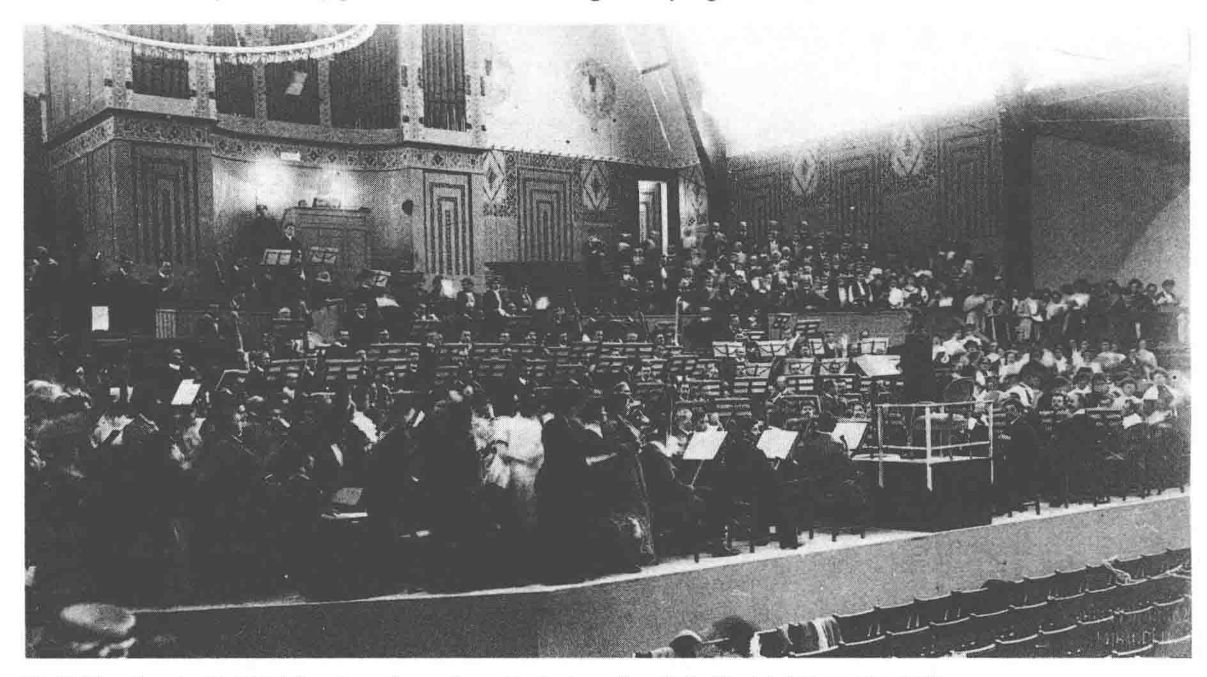
12. Fifth and Sixth Symphonies, Rückert settings. Changing reception history has unintentionally highlighted the historical character of Mahler's purely orchestral, 'middle-period' symphonies. The rehabilitation of his reputation after World War II, particularly in German-speaking countries was marked by a tendency to consider the Fifth and Sixth Symphonies his most successful and musically rewarding: as more traditional kinds of symphonic discourse, demonstrating the relevant signifiers of mastery. It would be equally appropriate to regard these two works as experiments in the new style to which Mahler himself referred in the case of the Fifth. The cumulative, heterodox structures of the earlier symphonies are replaced, in the Fifth, by a somewhat more uniform model. Its orchestral polyphony is also denser, more frequently mixed in timbre, in the manner of Richard Strauss, and less marked by simultaneously juxtaposed individual sonorities (Mahler experienced difficulty with the Fifth's orchestration and laboured on it in revisions). There is also a reduced reliance on explicitly characterized musical manners of intentionally ironic or naive effect. Instead, Mahler opted for a rhetoric that brings to the foreground a constructed musical subjectivity whose task is to control and unify the protean character changes that define its discourse. Symbolically projected voices and quasi-naturalistic scenarios are still present, but where formerly they were external to the alienated subject, such manners now tend to be presented more frequently as subjective modes, embraced and exploited with Nietzschean élan.

The opening, explicitly titled funeral march ('Trauermarsch') might appear to resist characterization as significantly new. Its initial motif is derived from the Fourth Symphony's first movement, just as the first part's division into two movements relates to early plans for the Third. However, the role of the march seems to be to highlight the contrasting, urgent authenticity of the structurally prepared intervention at cue '7' ('Leidenschaftlich. Wild') by music that projects a focalized position of the subject whose character is clarified in the energetic second movement ('Stürmisch bewegt. Mit grösster Vehemenz'). Its conflicts and oppositions here model a stream of consciousness which becomes a globalized object of audience attention. Marked by passages of 'dissolution' and 'breakthrough' (to adopt two of Adorno's critical categories), its gestural character is often cruder and more provisional than those of the earlier symphonies, although the rich string sonority heightens the sophisticated urban quality of its syncopated, dance-like accompaniment figures.

The overall narrative of the Fifth Symphony (whose tonality moves from C♯ minor to D major) optimistically resounds with acquired cultural power. Its composition appropriately extended from Mahler's first summer in his villa on the Wörthersee (1901) to that of 1902, during which period he had met and married Alma Schindler (to whom he claimed to have sent the Adagietto as a form of musical love letter). The broadly conceived and ebullient Scherzo (presented as a separate Part 2) and the equally high-spirited Rondo-Finale represent hitherto rare examples in Mahler of extended movements in which allegorical teleology is subordinated to the formal exploration of affect. The contrapuntally virtuoso and bravura Rondo completes the symphony's Part 3, the title of whose preludial Adagietto suggests intimacy and its subordinate role (its main theme is good-humouredly guyed in the Rondo-Finale). The Rondo opens with an allusion to a motif from the comical *Wunderhorn* song *Lob des hohen Verstandes* and climactically restores the chorale-like material that had crowned the second movement. The former might sanction a reading of its character as celebrating the symbolic victory of Mahler the nightingale over the ill-informed 'donkeys' who had criticized and obstructed him, although the work's prolix and sometimes rhetorically over-determined effects led one thoughtful French critic, Romain Rolland, to hear in it worrying signs of what he saw as Germanic force and self-confidence.

The fragility of that self-confidence was starkly emphasized by the Sixth Symphony (1903–4). This was composed during the period of Mahler's closest contact with the younger Viennese modernists, to whose circle his uneasily progressing marriage to Alma Schindler gave him access. Conducted by Mahler with the subtitle 'Tragic' on at least one occasion, the Sixth displays an inverse relationship between symbolic subjective security and structural conciseness (it has four movements, the first with repeated exposition in the Classical manner). Specific biographical reasons for its cumulatively depressive and even suicidal manner are often sought, although Mahler explored as a logical proposal the insight that subjective authenticity and a positively constructed teleology (permitting a happy ending) might have no causal link.

The Sixth Symphony's first movement reverts to sharply characterized and opposed elements, like those of the first movement of the Second and Third Symphonies. A coercive A minor march is replaced by music of energetic lyricism which Mahler described as a representation of his young wife, although it, too, functions rhetorically as a subjective mode, urgently insistent upon its superior claim to authenticity. Other elements are added to the relentless succession of these two (in A minor and F major), most notably music that evokes an experience of high-mountain solitude: unrelated triads and 7th chords drift like mist (celesta and high tremolando strings) while offstage cowbells are heard. Mahler's last printed revision of 1906 somewhat contradictorily directs that these be played 'so as to produce a realistic impression of a grazing herd of cattle .... Special emphasis is laid on the fact that this technical remark admits of no programmatic interpretation'. The fact that this unusually evoked site of experience is linked to an emergent lyrical idea recalling one of the resurrection motifs of the Second Symphony is significant, although the provisional nature of the first movement's resonantly positive conclusion is emphasized not only by the elegiac qualities of the Andante – originally presented as the third movement but subsequently relocated as the second – but also by the grotesque and almost surreal qualities of the Scherzo, whose insistent opening idea maintains both the key (A minor) and manner of the first movement's march (the changing time signatures of the 'Altväterisch' Trio may refer to an authentic Bohemian folkdance). Mahler's apparent intention to return to the



12. Autograph MS of Mahler's song 'Liebst du um Schönheit', composed August 1902 (private collection)

original order of the two middle movements was not registered in a further printing.

The Sixth Symphony reverts to the practice of locating its main dramatic narrative in an extended finale: here, however, a kind of anti-narrative whose musical argument relies upon a prodigious introductory resource of motivic, thematic and sonorous elements, including two deep bells offstage. The promised achievements of breakthrough by a series of effortfully approached and emphatically realized climaxes are denied by the devastating 'hammer blows': intended to sound like an axe striking into wood (originally on three occasions, reduced to two in the printed score). Each inspires a rhetoric of reversal and denial which glosses the symphony's primary musical motto: a chord of A major changing to A minor accompanied, in the percussion, by a militaristic rhythmic figure which is stated with vehement finality at the symphony's close.

The work's cumulative negativity focusses the philosophical and psychological implications of the new style, whose more intimate lyrical counterpart may be found in Mahler's settings of the early 19th-century poet Friedrich Rückert, dating from this period (1901–4). They fall into two groups: one an intended cycle, the *Kindertotenlieder*, the other a less formally related collection of five songs. Given Mahler's modernist connections at this time, Rückert represented a conservative choice of poet. While his settings flirt with consumable sentimentality, the *Kindertotenlieder* (begun in 1901) and independent songs like *Ich atmet' einen linden Duft* and *Ich bin der Welt abhanden gekommen* model a lyrical discourse of great subtlety, accompanied by modest, chamber-like forces (the addition of a piano to the harps in *Um Mitternacht* is not of proven authenticity).

13. Seventh and Eighth Symphonies, 'Das Lied von der Erde'. Mahler's compulsive desire that his summer retreats bear compositional fruit may have generated an unintentionally self-contradictory discourse in the Fifth and Sixth Symphonies. The Seventh appears once again to have developed, with the two intermezzo-like 'Nachtmusik' movements of 1904, from an attempt to write music of a different character to that of his last completed symphony. In the following summer uncertainty about the symphony of which they might form a part seems to have been resolved with the inspirational conception of the first movement's opening as Mahler was being rowed across the Wörthersee. For the first time since the Third Symphony he developed a movement from an initiating figure, eventually the tenor horn line with its characteristic rhythm and supporting harmony, which he likened to a mysterious voice or sound of nature: 'Hier röhrt die Natur!' was how Mahler characterized it for Richard Specht. The slow introduction echoes those of the Third's first and the Sixth's final movement; it generates the main Allegro con fuoco theme and is subsequently significant in altering the perspective of a movement that otherwise tends to mirror the structure of the first movement of the

13. Mahler rehearsing his Eighth Symphony, first performed in the Ausstellungshalle, Munich, 12 September 1910

Sixth Symphony. Here, however, the Allegro con fuoco provokes without tyrannizing the effulgent contrasting theme. Its epiphanic restatement at the climax of the development is preceded by an extended passage in which individuated instrumental voices refocus and recharacterize elements of the movement's material in a manner that recalls the symbolic animal voices of earlier symphonies. Hinted musical references to the First and Third, here and in the first 'Nachtmusik' (whose 'Wunderhorn' signals are marked 'calling' and 'answering' in the score), suggest an allegory of regression and consequent renewal. The centrepiece of the five-movement structure is a 'Schattenhaft' scherzo, darkly evoking Mahler's *moto perpetuo* manner. The second 'Nachtmusik', Andante amoroso (fourth movement), and the ebullient Rondo-Finale form a unit recalling the third part of the Fifth Symphony. The humour and striking eclecticism of the Rondo have habitually confounded critical comprehension of its vaudeville-like series of musical performances, which culminate in a transfigured return of the main Allegro figure of the first movement.

That same figure, bearing an obvious relationship to the introductory march of the Sixth Symphony, finds its literal apotheosis in the opening of the Eighth Symphony (1906–7), which Mahler again conceived 'inspirationally' after a period of anxiety about composing a new work. His anxiety found exuberant expression in the words of the Latin hymn *Veni Creator Spiritus*, whose setting he rapidly sketched as the first part of a symphonic cantata for double chorus, boys' choir, soloists and large orchestra (including mandolin, celesta, piano, harmonium and organ). The second part, reverting to the manner and metaphysical preoccupations of the Second and Third Symphonies, became Mahler's most ambitious essay in festival-symphonic ceremonial; he described the Eighth as a joyful 'gift to the nation'.

The opening movement, an extended sonata structure in E♭ (the key of the Second Symphony's conclusion), is predominantly jubilant in mood, its polyphony owing much to Mahler's recent study of Bach's cantatas. This invocatory challenge to a Catholic Christian creator spirit is succeeded, in the second movement, by a setting of the closing scene of Goethe's *Faust* (Part 2). In a last public affirmation of his intellectual 'Germanness', Mahler returned to a metaphysical and transcendental narrative (comparisons with the finale of the Second Symphony are relevant on many levels) animated by a Platonic reading of Goethe's celebrated closing lines: 'Das Ewig-Weibliche / Zieht uns hinan!'. In a reinterpretation of Wagner's 'redemption through love', with its dubious image of women as men's self-sacrificing saviours, Mahler strategically read Goethe's intention as a celebration of erotic love and the fusion of a now incorporeal male subject (Faust's 'immortal part' is voicelessly present in Goethe's stage directions) with its desired female object. The penitentially faithful, abandoned Gretchen is linked, through a series of biblical female characters, to the Mater Gloriosa. Mahler used a slightly abridged text, but retained Goethe's successive scenic levels with their spirit guides and exemplars. The overwhelming orchestral tutti of the work's final paean is augmented by a separately placed brass group which proclaims a transformatory reduction of the work's originating motif, now a musical *deus ex machina*.

The powerful physicality of that climax, commanded by Mahler's notoriously masterful and domineering baton, emphatically underlines the contradictions of the Eighth, whose 'double' first performance (12 and 13 September 1910) represented the climax of his public career as a conductor-composer (fig.13). It was during the elaborate preparations for those performances that the concert's promoter (Emil Gutmann) coined the work's popular nickname, the 'Symphony of a Thousand', as a marketing slogan. Its internal contradictions are compounded by the fact that Mahler's own ability to subscribe to its positive vision had been undermined by the crises of 1907, following his daughter Maria's death: crises which

bore fruit in *Das Lied von der Erde* (1908). This orchestral song cycle, based on German versions of ancient Chinese poetry collected by Hans Bethge in *Die chinesische Flöte* (1907), was as original in form and technique as it was assured in its urgently lucid clarification of the subjective dialectic of the Fifth and Sixth Symphonies.

Real Chinese music may have inspired the metrical innovations which contribute to quasi-heterophonic passages for solo instruments. In the extended last movement, 'Der Abschied', such passages project stylized images of the natural world as described by the singer 'In narrative tone, without expression'. For tenor and contralto soloists in strict alternation (the second movement permits the contralto to be replaced by a baritone), the cycle's six movements fall into three pairs. The middle pair recall youth and beauty while the first and last present a tensely contested balance between energetic abandonment to existential despair (particularly in the two drinking songs; the ape howling its laughter amid gravestones is a crucial image in the opening movement) and a more controlled attempt to maintain lyrical equilibrium beyond the destructive expressionist 'moment'. The possibility of that balance, of an extended symphony in the conventional manner, was to be the implicit theme of Mahler's last two works, neither of which (like *Das Lied von der Erde*) he lived to hear performed.

14. Ninth and Tenth Symphonies. *Das Lied von der Erde* ends with music whose lyrical energy fades without formal closure (an idyllically evoked nature seems to survive the departed authorial subject) and with the same closing word, 'ewig!', as the Eighth Symphony. Utopian celebration is thus replaced with elegy in a move whose biographical determinants have often been reckoned to affect Mahler's last two symphonies in a similar manner. These certainly extended the timbral, structural and expressive preoccupations of the earlier work, but in a musical discourse more specifically intensified by the developing crisis in his marriage. This led him to envisage the loss of Alma, referred to in late poems and score annotations as his muse or 'lyre': associated both with the art he practised and with the sensual and conceptual solace it ideally offered.

The four-movement Ninth Symphony is based on such a conflation in a symbolically terminal statement of the tradition in which Mahler worked. Anticipating the expressionists' alienated reliance upon individual subjective authority while seeking to contain its threat within the cultural form of the extended symphony, he developed in the opening Andante comodo a revised version of his favoured expositional duality. A melody of consoling, elegiac lyricism in D major (some commentators have heard it as a form of lullaby), is succeeded by a dissonant, tensely animated D minor music of expressive anguish and aspiration whose reward – a heroic, fanfare-like gesture – is both a climax and the prelude to an intensified return to the initial idea. Score directions like 'Schattenhaft' and 'Wie ein schwerer Kondukt' indicate how the figurative topics of his earlier symphonies play their part in a movement whose private meaning is further emphasized by annotations in the manuscript (at the return to the original tempo, 25 bars after cue '13', he wrote 'O Jugend[zeit] En[t]schwundene! O Liebe! Verwehte!'; and shortly before the movement's end: 'Leb' wol! Leb' wol!').

The fragile diminuendo of its conclusion poses a renewed question about extension and continuation which is answered by two movements in which the semiotic role of genre is characteristically heightened: a ländler-tempo movement whose title 'Scherzo' was crossed out and replaced in the manuscript with 'Menuetto infinito', and an angry, bravura Rondo Burleske whose cental climax presents and then ironically mocks a transcendental breakthrough complex. Heavenward flight, on the wings of harp glissandos, is cut short by a crudely skittish E♭ clarinet figure, in fact a travestied version of a motif from the expansively hymnic Adagio with which the work concludes. In its final moments the Adagio quotes from the *Kindertotenlieder* (no.4) a musical phrase which had set the words 'The day is beautiful on those heights'; its 'ersterbend' conclusion recalls those of the first movement and *Das Lied von der Erde* with poignant effect and is inscribed, like the first movement, with manuscript annotations ('Lebt wol! Lebt wol!', following 'O Schönheit! / Liebe!').

Accorded official status as an uncompleted work, the Tenth Symphony acquired mythical significance that was emphasized by the posthumous publication in facsimile of its evidently complete draft. This has provoked a number of fully realized performing versions (the major task being the transcription and orchestration of the second, fourth and fifth movements, the first and third having been more or less completely scored). The most widely performed is that by Deryck Cooke. This reveals the outlines and musical substance of a remarkable successor to the Ninth Symphony, whose often intimately signifying discourse it raises to new levels of urgent eloquence. Like its predecessor, the Tenth begins and ends with slow movements, although the symmetry of its final, five-movement structure is related to that of the Seventh Symphony; like the Ninth, it proclaims its private meaning in manuscript annotations that are often precisely matched to musical detail (although in some cases, as on the opening and closing pages of the fourth movement, their nature and appearance indicate extreme emotional distress linked to Mahler's relationship to Alma: 'The Devil dances it with me / Madness take me, cursed one! / Destroy me, that I forget that I am! / that I cease to be, that I de. . . [*das ich ver. . .*]', at the end: 'You alone know what it means! . . . Ah! Farewell my lyre!').

The F♯ major Adagio with which the symphony opens is one of Mahler's finest essays in the genre. The vehemently dissonant chord accretion built up at its climax concentrates the anguish that prompts urgent leaps and octave displacements in the main theme. Two energetic scherzos, the first related to the manner of the Ninth's Menuetto infinito, the second to its Rondo Burleske, flank a curiously brief movement, titled 'Purgatorio', whose reversion to the *Wunderhorn* manner of Mahler's earlier *moto perpetuo* movements seems linked to a similarly detailed concern about musical signification. On a page bearing the words 'O Gott! O Gott! warum hast du mich verlassen?', Mahler writes the word 'Erbarmen!' ('Have mercy!') over a principal descending figure. This reappears early in the funereal introduction to the finale, which begins with the muffled drumstroke with which the previous scherzo had concluded (Mahler seems to have recalled it from a New York fireman's funeral which he witnessed in 1908). In spite of the alternative lyrical mode proposed by an expansive solo flute theme (the instrumentation is specified), the same descending figure erupts at the very end of the movement,

14. Autograph draft orchestral score of the third movement of Mahler's Ninth Symphony, composed 1908–9 (private collection)

annotated 'Almschi!' in the F♯ major version and in the earlier drafted conclusion in B major. In both, that inscription is preceded by the protestation: 'für dich leben! / für dich sterben!' ('to live for you! / to die for you!'). The specificity of that gesture, its multimedia character and the theoretical incompleteness of the work it concludes, help to confirm Adorno's assessment of Mahler's music as paradoxically inimical to the cultural category of art it nevertheless contributed to, relied upon and heightened in so significant a manner.

WORKS

Edition: *Gustav Mahler: Sämtliche Werke: kritische Gesamtausgabe*, ed. Internationale Gustav Mahler Gesellschaft (Vienna, 1960–) [MW]

This list includes only extant works and lost works whose music survives in other compositions; only the principal manuscripts of complete works are given, unless otherwise stated. For keys, an oblique stroke denotes alternation, a dash denotes a progressive scheme.

PETER FRANKLIN

Mahler-Kalkstein, Menahem. *See* AVIDOM, MENAHEM.

Mahling, Christoph-Hellmut (*b* Berlin, 25 May 1932). German musicologist. He studied musicology with Gerstenberg, Müller-Blattau and Salmen at the universities of Tübingen and Saarbrücken and took the doctorate in 1962 at Saarbrücken with a dissertation on the history of the opera chorus. He then became assistant lecturer there and completed the *Habilitation* in 1972 under Wiora with a study of the orchestra in Germany between 1700 and 1850. He was professor at Saarbrücken University (1972–81). From 1981 he was professor and head of the musicology department at Mainz University, as well as executive committee member (1982–7) and later president of the IMS (1987–92), president of the Gesellschaft für Musikforschung (1997–), and chairman of the Gluck Gesamtausgabe editorial board. He has been editor of *Die Musikforschung* (1969–81), the Mainzer Studien zur Musikwissenschaft (1986–), the Répertoire International de la Presse Musicale (1987–) and numerous Festschriften and conference reports. His main research interests are

opera, performing practice and the music of the 18th and 19th centuries, especially that of Mozart.

HANS HEINRICH EGGEBRECHT/WOLFGANG RUF

Mahmudov, Mirhalil (*b* Tashkent, 2 Feb 1947). Uzbek composer, a younger brother of Tajiyev. He graduated in 1971 from the Tashkent Conservatory where he studied with Feliks Yanov-Yanovsky and Rumil Vildanov; he taught there from 1981. Characteristic of his style is a natural lyricism and the perceptible influence of Uzbek folklore. His work ranges from oratorio and symphony to film scores and arrangements of traditional songs. He won a Komsomol Prize in 1982.

RAZIA SULTANOVA

Mahomayev, (Abdul) Muslim (*b* Grozniy, 18 Sept 1885; *d* Nal′chik, 28 July 1937). Azerbaijani composer and conductor. He studied at the teachers' seminary in Gori (1899–1904), together with his friend and colleague Hajibeyov. It was at this time that he began to take a serious interest in music, playing the violin and the clarinet in orchestras and studying Azerbaijani folklore. After graduating he worked in the village of Bekovich and then (1905–11) at Lenkoran College, where he organized musical evenings and theatrical performances. On moving subsequently to Baku he began an unbroken involvement with the musical stage. At the Azerbaijani Musical Theatre he was successively an orchestral player, conductor and director; and in 1916 he composed his first large work, the opera *Shakh Ismail*, which remains among his best achievements. In the first edition of the opera, *mugam* improvisation predominated, musical numbers alternating with spoken dialogue, but in the second and third editions, Mahomayev notated many of the improvisatory passages and introduced recitatives. As the first successful attempt at a transition from improvisation to developed operatic forms, *Shakh Ismail* had an important role in the evolution of Azerbaijani music.

Besides composing in a wide variety of genres, Mahomayev gave a great deal of time to public activity: he led a department of the National Commissariat of Enlightenment, he was artistic director and conductor of the musical theatre (from 1924) and in 1929 he was appointed musical director of the Azerbaijani Radio Centre. In 1935 he received the title Honoured Artist of the Azerbaijani SSR. Mahomayev's last major composition was the opera *Nergiz* (1934), which concerns the struggle of peasants against oppression. All of the music is notated, yet the result is truly national. Thus Mahomayev developed from *mugam* opera to works freely using the forms of European music. His melodic gifts and his organic links with Azerbaijani folk music were always integral parts of his creative personality.

WORKS

YURIY GABAY

Mahon. English family of musicians of Irish origin. One generation of brothers and sisters was particularly notable. Their father, William, is thought to have gone to Oxford from Salisbury in the 1740s and to have been an orchestral player in the Holywell Music Room. His wife Catherine (*b* ?Salisbury, *c*1732; *d* Salisbury, 12 July 1808) was a singer; she had a benefit at Oxford in 1773. After rearing a large family she returned to Salisbury in 1785 with her daughters Sarah and Catherine, who became pupils of Joseph Corfe. The activities of the family are hard to disentangle, for first names are seldom given in concert announcements. Their probable chronology is as shown below:

(1) **John Mahon** [Mahone, Mahoon] (*b* ?Oxford, *c*1749; *d* Dublin, Jan 1834). Composer, clarinettist, violinist and viola player. He did more than anyone in the 18th century to popularize the clarinet in England. He made his début at the Holywell Music Room in 1772 with a clarinet concerto, and was a member of the Oxford Volunteers Band. In 1773 he played in London and by 1777 he had gone with his brother William to live there. In London John appeared at Covent Garden, Hanover Square, the Haymarket, the Pantheon and Ranelagh. He played in most of the principal cities in England; he was probably the 'Mr Mahon' who performed each year in the Three Choirs Festival from 1773 to 1811 and in every Birmingham Festival from 1778 to 1823. He made several lengthy visits to Ireland and was married in Dublin. He often played obbligatos, accompanying his sister Mrs Second, as well as Mrs Billington and Mme Catalani. He used a five-key clarinet and a seven-key basset-horn. As a violinist, he played at the 1784 Handel commemoration, and he led the orchestra at the Holywell Music Room for many years. In 1783 he became a member of the Royal Society of Musicians. He retired to Dublin in 1825.

WORKS

Concerto no.1, cl/ob/fl, orch (London, 1785)
Concerto no.2, cl/ob/fl/vn, orch (London, *c*1785)
Hope, thou Cheerful Ray of Light, song, S, cl (London, 1796)
Slow and Quick Marches for the Oxford Association military band (*c*1797)
A New and Complete Preceptor for the Clarinet (London, 1803)
4 Duets . . . in which are introduced Favourite Airs, 2 cl (London, 1803)

(2) **William Mahon** (*b* ?Oxford, *c*1751; *d* Salisbury, 3 May 1816). Clarinettist, oboist, violinist and viola player, brother of (1) John Mahon. Like his brother, he was a pioneer on the clarinet and was as good a performer, but he left no compositions. He too played in the Oxford Volunteers Band. His début was at the Holywell Music Room in 1774, when he played an oboe concerto. In London he played the clarinet at Covent Garden, Drury Lane, Hanover Square, the New Musical Fund Concerts and Ranelagh, and was also heard in Blandford and Worcester. His most important assignment was as soloist and orchestral player in the London Philharmonic Society, from its inception in 1813 until his death. As a viola player he appeared at the Handel commemorations of 1784 and 1786, and as a violinist he led the Salisbury orchestra for over 30 years.

(3) **Sarah Second** [née Mahon] (*b* ?Oxford, *c*1767; *d* London, 16 Oct 1805). Soprano, sister of (1) John Mahon and (2) William Mahon. In 1790 she married J. Second, a well-known Bath dancing-master. She was the most accomplished of the five sisters, all sopranos, and Parke in his *Musical Memoirs* related that 'her singing was inferior only to Mrs Billington'. She made her Oxford début in 1785 and later sang at Covent Garden, Ranelagh, and at the Bath, Birmingham, Salisbury, Three Choirs and Winchester festivals. She was principal in the first English performances of Haydn's *Creation* and Mozart's Requiem.

There were two other brothers. Ross Mahon (*b* *c*1755; *d* Blandford, 25 Feb 1789) was a musician in the Dorset Regiment of Militia. He appeared at the Winchester Festival of 1787 with John and James. James Mahon (*b* *c*1763) was a bass and played the trumpet. He appeared frequently at West-Country festivals, was a principal singer at the Handel commemorations of 1786 and 1787, and sang in the first English performance of Mozart's Requiem in 1801.

There were four other sisters. Mrs Ambrose [Ambrosse] (?Mary; *b* ?1766) was the most popular of the sisters in Oxford; she appeared many times at festivals, including those of Winchester, Birmingham, Salisbury and the Three Choirs, and was a principal singer at the Handel commemorations of 1786 and 1787. In about 1786 she married the Rev. John Ambrose of Poulton. Elizabeth Mahon (*b* ?late 1750s) was often referred to as 'the celebrated Miss Mahon of Oxford', where she made her début in 1778. She sang at the Handel commemorations of 1786 and 1787, but after her marriage to the Rev. John Warton, whose father was headmaster of Winchester, she rarely performed. Mrs Munday (*b* ?late 1750s; *d* Salisbury, 1809) appears to have married young, making her début only in 1792 at Oxford. She sang at Ranelagh in 1793, and was the mother of the celebrated singer Eliza Salmon, born at Oxford in 1787. Catherine Mahon (*b* 5 Nov *c*1768; *d* Salisbury, 10 May 1833) married Joseph Tanner in 1793.

PAMELA WESTON

Mahoon, Joseph (*d* London, 17 Nov 1773). English spinet and harpsichord maker. He worked in Golden Square, London. In 1729 he was appointed 'harpsichord maker to His Majesty'. Of his surviving instruments, 13 are traditional English bentside spinets.

A Mahoon harpsichord can be seen in plate 2 of Hogarth's *Rake's Progress* (1735). Of the two surviving harpsichords, the single-manual harpsichord of 1742 has a rounded tail, and the large double-manual harpsichord

of 1738 has various antique features, such as its plain walnut case. Its compass of *F′G′–f‴* was standard, as was the 8′, 8′, lute, 4′ specification. Less standard was that the lute stop plucked the strings playable from the lower manual, so that if the lute was left 'on' when the lower 8′ was being played, it damped it and gave a kind of buff effect (as directed by notes written in a contemporary hand), a 'not very satisfactory' expedient (Hubbard).

The publication in 1992 of the workbooks of Thomas Green, who tuned keyboard instruments in the Hertford area (see Sheldrick), has brought to light a possible further member of the Mahoon family. Green's accounts contain two references to harpsichords by Hugh Mahoon, one of which he tuned in 1736 and recorded in his notebook as 'a Small Harpsichord … Hugh Mahoon a unison and 2 octaves'. This latter specification is most unusual.

DONALD HOWARD BOALCH, PETER WILLIAMS/CHARLES MOULD

Mahōrī. Classical instrumental ensemble of THAILAND. It combines melodic and rhythmic percussion with string and wind instruments. Although the term *mahōrī* originally referred to an exclusively female string ensemble consisting of a *kračhappī* (plucked lute), a *sǫ sām sāi* (spike fiddle), a *thōn* (goblet drum) and a singer who kept time with the *krap phuang* (clappers), during the 20th century it came to denote a much larger, mixed-gender ensemble that plays the lighter, more tuneful repertory for entertainment occasions. The player of the spike fiddle leads the ensemble, which consists of xylophones (*ranāt ēk* and *ranāt thum*), circular gong-chimes (*khǫng wong yai* and *khǫng wong lek*), two-string fiddles (*sǫ duang* and *sǫ ū*), a zither (*čhakhē*) and one or more vertical duct flutes (*khlui*), supported rhythmically and metrically by a pair of small cymbals (*ching*) and one or more drums. Because the xylophones and circular gong-chimes are tuned to a 'compromise' seven-note scale of equal intervals, the more flexibly pitched strings and flute must accommodate them. The ensemble's size may vary greatly, also including instruments such as the metallophones *ranāt ēk lek* and *ranāt thum lek*. The xylophones and circular gong-chimes used in the *mahōrī* are normally smaller than those of the PĪ PHĀT ensemble.

Mahoti [Mahout], **Antoine.** *See* MAHAUT, ANTOINE.

Mahrenholz, Christhard [Christian Reinhard] (*b* Adelebsen, nr Göttingen, 11 Aug 1900; *d* Hanover, 15 March 1980). German theologian and musicologist. He studied the piano, the organ and the cello before taking a degree in theology and musicology with Ludwig, Schering and Abert at the universities of Göttingen and Leipzig (from 1918). In 1923 he took the doctorate with a dissertation on Scheidt. While working as a pastor and head of the administration department of the Landeskirchenamt, Hanover (1930–65), he established his reputation as a highly respected church music scholar through his teaching and many publications. He was a lecturer at Göttingen University, where he was made honorary professor in 1946 and awarded an honorary doctorate in 1948, and was co-editor of the journal *Musik und Kirche* (from 1929), the music collection *Handbuch der deutschen evangelischen Kirchenmusik* (1933–74), the multi-volume history of church music *Handbuch zum evangelischen Kirchengesang* (1953–90) and the journal *Jahrbuch für Liturgik und Hymnologie* (1955–80). He was also general editor (from 1932) of the Scheidt collected edition, for which he edited several volumes, and a member of the editorial board of the new Bach collected edition. As president of the Verband evangelischer Kirchenchöre Deutschlands (1934–73) and chairman of the Neue Bach-Gesellschaft (1949–74), he played an important role in the revitalization of German Protestant church music by both promoting the performance of this music and setting high standards of scholarship. He also oversaw the restitution (1947–60) of over 14,000 bells which had been seized during the war and performed regularly as a concert organist and continuo player until 1950. His papers are held in Hanover.

Mahrenholz's scholarship drew upon his training in both theology and musicology. His writings focussed on hymnology and the history of Protestant church music, particularly on the terminology and musical sources associated with the Protestant repertory. He was also known for his studies on the acoustic properties of organs and bells.

HANS HEINRICH EGGEBRECHT/R

Mährisch Ostrau (Ger.). *See* OSTRAVA.

Mahu [Machu], **Stephan** (*b* ?1480–90; *d* ?1541). Composer active in Vienna. His name and places of employment imply that he may have been of Flemish or Hungarian–Slovak origin. By 1528 he had been in Vienna for several years as a trombonist in the service of Queen Anna, wife of Archduke Ferdinand I. From about 1530 to about 1539 he also served in Ferdinand's court chapel as assistant Kapellmeister to Arnold von Bruck. No mention of him is made after 1541. Mahu's works are predominantly sacred. His most important work, the *Lamentationes Hieremiae*, uses Gregorian chants as migrating cantus firmi. His works often have alternating sections of polyphony, homophony and canon in the style of the later Netherlanders, but certain instances of elegant part-writing foreshadow characteristics of Palestrina's style. Though Mahu's settings of German lied melodies resemble those of Heinrich Finck and Arnold von Bruck, his contribution to this genre is considerably smaller. Mahu sets a varied choice of texts including a song of divorce *Ich armes keutzlein* and the famous lament *Ach hilf mich leid*. His arrangement of two lieder into a polyphonic quodlibet is similar to efforts by Arnold von Bruck. Although Mahu was a Catholic, he set some Lutheran chorales including the four-voice settings *Christ der ist erstanden* and *Wir glauben all an einen Gott* and the five-voice works *Ein' feste Burg* and *Herr Gott erhör mein Stimm und Klag*, which appeared in Georg Rhau's *Newe deudsche geistliche Gesenge* (Wittenberg, 1544). Johann Zanger (speaking probably of a period about 1527) asserted that Mahu was an authority on music theory, and recorded a meeting between Mahu, Bruck and Lapicida.

OTHMAR WESSELY/WALTER KREYSZIG

Mahwash (*b* Kabul, 1947). Afghan singer. Born with the name Ferīda, she came from a religious background. Her father, Mohammad Ayūb, was a shopkeeper, her mother a Qur'anic teacher in a secondary school. She became a typist and secretary and was employed for some time in this capacity at Radio Afghanistan. In 1967 she started singing on Radio Afghanistan under the stage name Mahwash, by which she is generally known. She soon became an extremely popular radio artist; in 1971 the radio audience voted her outstanding singer of the year. As a fully professional singer she was much in demand for élite wedding parties in Kabul.

A number of songwriters composed material for her, including Ustād Nabi Gol, Hafīzullah Khyāl, Madadi and Ustād Hāshem, who gave her some training in classical singing. In 1977 she was given the title of USTĀD by the Minister of Information and Culture. Many Afghan cognoscenti felt this was inappropriate, if only because this title is never applied to women. In 1991 Mahwash left Afghanistan, and was in due course given asylum in the USA. She settled in California and continued her career as a singer in the USA and Europe. Her success owed much to the business acumen of her husband Fārūq who sat on stage with her during performances, reading requests from the audience and finding the appropriate texts in hand-written songbooks.

ABDUL-WAHAB MADADI (with JOHN BAILY)

Maichelbeck, Franz Anton [Maichelbek, Franciscum Antonium] (*b* nr Konstanz, 6 July 1702; *d* Freiburg, 14 June 1750). German composer and cleric. He was the son of Sebastian Maichelbeck and Anna Maria Koch. In 1721 he was a student of theology in Freiburg, but by 1725 had moved to Rome to study music. After his return to Freiburg in 1727 or 1728, he served as organist and minor church official (*praesentarius*) at Freiburg Cathedral and professor of Italian at the university (1730). His obituary describes him as a very learned man of music, highly esteemed by his contemporaries.

Maichelbeck's most important published works, *Die auf dem Clavier spielende … Caecilia* op.1, and *Die auf dem Clavier lehrende Caecilia* op.2, were directed towards the amateur keyboard player and present both theoretical instruction and material for performance. The study pieces, labelled as sonatas, each consist of a series of binary movements in the style of a dance or variation; in this format they are more in the realm of the keyboard suite than of the sonata. The pervasive two-part texture offers ample opportunity for the performer to fill in harmonies and ornamentation, as Maichelbeck suggested in the preface, but there is little evidence of the Italian style to which he referred in the title. In his op.2 (1738), Maichelbeck was among the earliest composers to specify in a printed work the use of the thumb within designated keyboard patterns, perhaps a ramification of the work's didactic purpose. His attention to fingering patterns and their implications for performance have led some to place him in the company of other 18th-century keyboard tutors such as François Couperin.

WORKS

Die auf dem Clavier spielende … Caecilia … VIII Sonaten, op.1 (Augsburg, 1736)

Die auf dem Clavier lehrende Caecilia, op.2 (Augsburg, 1738)
Der auf dem Clavier lehrende Caecilia Dritter Theil in Exempeln derer Versen und Tonen bestehet (Augsburg, 1738)
VI ... Missen (Freiburg, 1739)
Locutus ite a Deo factus, S, A, org, formerly *A-Wgm*, now lost

DOUGLAS A. LEE

Maier, Michael (*b* Rendsburg, 1569; *d* Magdeburg, 1622). German physician, alchemist, writer and composer. He studied medicine at Basle in 1596 and philosophy at Rostock in 1597. In 1608 the Emperor Rudolf II summoned him as his physician to his court at Prague, then a celebrated centre of intellectual activity of a hermetic nature. In 1611 he visited Amsterdam. After Rudolf's death in 1612, he left for England, where he met Robert Fludd and became one of the main proponents of the Rosicrucian movement. He returned to Prague in 1616, but, finding the court markedly less receptive to alchemy than formerly, he moved to Kassel as physician to Moritz, landgrave of Hesse, who was influenced by alchemical mysticism and was also a noted patron of music. In 1620 he settled at Magdeburg, where he practised medicine during the short period until his death. He wrote some 20 books on hermetic philosophy. Some of these are concerned with various aspects of the musical symbolism of the planets (e.g. the music of the spheres and the parallelism of metals and sounds), of animals (e.g. the swan, nightingale, goose, sheep and bee) and of the Greek myths (e.g. Apollo and the Muses, Hermione and Atlanta).

For musicians, the most immediately interesting of Maier's works is *Atalanta fugiens* (Oppenheim, 1617, 2/1618/*R*, Eng. trans., 1989), a book of emblems, each of which is expressed musically as well as visually and is interpreted through a philosophical commentary. The music consists of 50 two-part canons on a single cantus firmus, the Christe of the plainchant Kyrie *Cunctipotens genitor*, the trope text of which, current in Protestant literary anthologies, had allegorical significance for Maier. The three musical voices, singing the words of the emblematic epigram, were also allegorized as representing the fleeing Atalanta, the pursuant Hippomenes and the golden apple he has tossed in her path to distract her. The musical dimension of the allegory is rather forced, as the cantus firmus does nothing to slow the canonic *dux* down so the *comes* can overtake it, but the alchemical significance is more straightforward: the *dux* Atalanta stands for the alchemists' 'mercury' or desirable wisdom, fixed and held by the 'sulphur' of the *comes* Hippomenes, while the apple cantus firmus is the 'salt' that links humanity to the gods.

Maier seems to have been attracted to the *Synopsis musicae novae* (1612) of Johannes Lippius, which first advanced a triadic theory of harmony by connecting the musical triad with the mystery of the Trinity. Lippius offered a simple compositional method based on root-position triads over a bass, which Maier, who was not a professional musician, appears to have experimented with in order to compose his canons. They are undoubtedly clumsy, full of exposed 4ths and consecutive 5ths and 8ves, and melodically banal. Their musical triviality is outweighed, however, by their intellectual ambition.

JACQUES REBOTIER/R

Maier, Peter. *See* MEYER, PETER.

Maigret, Adam. French chaplain and possibly composer, who may be identifiable with ADAM.

Maigret, Robert. *See* MEIGRET.

Maiguashca, Mesías (*b* Quito, 24 Dec 1938). Ecuadorian composer and performer. He studied at the National Conservatory in Quito, the Eastman School (1958–65), the Di Tella Institute, Buenos Aires, with Ginastera and the Hochschule für Musik in Cologne. After returning to the National Conservatory as a teacher (1965–6) he moved to Germany, where he attended the Darmstadt summer courses and the Cologne courses for new music. From 1968 to 1972 he worked in the electronic studio of West German Radio in close association with Stockhausen, whose ensemble he joined for performances at Expo 70 in Osaka, and whose collective composition *Ensemble* he prepared for disc.

He was a founder-member in 1971 of the Oeldorf community of composers and performers. Since then he has been living in Germany, specializing in electronic music, and he has been invited to work in the Cologne Studio for Electronic Music, in the Centre Européen pour la Recherche Musicale in Metz, at IRCAM in Paris and in the Zentrum für Kunst und Medientechnologie in Karlsruhe. His works have been performed in the most important European festivals. Teaching activities have taken him to Metz, Stuttgart, Basle, Quito and Gyor. Since 1990 he has been the director of the Studio for Electronic Music in the Musikhochschule in Freiburg.

Some of Maiguashca's early works reveal an interest in Ecuadorian folk music, but it was the contact with Stockhausen that decisively determined his compositional orientation. However, materials from his native land are

used in the electronic piece *Ayayayayay* in a most specific manner: the composition is built from sounds which Maiguashca recorded during a visit to Ecuador in 1969, and takes advantage of both their representational and their purely acoustic properties. His series of *Übungen* are exercises in the possibilities of the various instrumental combinations used. That for clarinet, violin and cello, for example, exploits various forms of ensemble playing, from tightly composed duos and trios to overlaying of quite heterogeneous lines. He has also worked with live electronics and mixed media.

GERARD BÉHAGUE

Maillard [Maillart], **Jean** (*fl c*1538–70). French composer. Most of his works were published in Paris, probably indicating that he was resident there for at least part of his life. His name is mentioned in the Prologue to Rabelais' *Quart livre [de] Pantagruel* (1548), and by Ronsard, in the Preface to Le Roy & Ballard's *Livre de meslanges* (1560). These citations, taken with the evidence of a portrait of a middle-aged composer printed in 1565, as well as the content and pattern of his publications, suggest that he was born in about 1515. His publication of the coronation motet *Domine salvum fac regem* in 1553 and the dedication of his two motet collections of 1565 to King Charles IX and the Queen Mother, Catherine de' Medici, respectively, suggests a link with the French court; the few surviving records of the royal chapel and household do not mention his name. Several men named Jean Maillard are traceable in Paris between the 1540s and 60s, among them Jehan Maillard, poet and scrivener to François I and then Henry VIII; he published *Le premier recueil de la muse cosmopolitique*, which contains a polyphonic paraphrase of the Lord's Prayer. Another Jean Maillard, mentioned by Bèze and Henri Estienne as Dean of the Faculty of Theology in the University of Paris, died in about 1567. However, none of these men is definitely identifiable with the composer; nor can he be positively associated with the later musicians Gilles Maillard of Thérouanne, who was living in Lyons in 1584, or Pierre Maillart of Valenciennes.

The absence of his name in Le Roy & Ballard's new collections after 1571, together with the appeal to Catherine de' Medici in the preface to the *Modulorum ... secundum librum* (1565) for 'the return of the most refined graces, hidden or banished from your France ... during these stormy times' may signify that Maillard harboured Protestant sympathies that caused him to be excluded from the Catholic court and capital. Even though his output of predominantly Latin sacred music, including a collection of 25 motets, two masses and two Magnificats copied in ultra-Catholic Spain (*E-Bc* 682), suggests an ecclesiastical career, more than a hint of protest can be gleaned from his setting of three *chansons spirituelles* – including *Hélas mon Dieu ton ire* by the Huguenot poet Guillaume Guéroult – and of a paraphrase of Psalm xv (*Qui est-ce qui conversera*) by Marot (RISM 1553[18]).

Maillard's six surviving masses include a requiem for four voices, a *Missa Virginis Mariae* paraphrasing the plainchant melodies of the Mass of the Virgin, three four-voice parody masses on chansons by Cadéac or Lupi Second (*Je suis déshéritée*), Certon (*M'amie un jour*), Sermisy (*Missa pro vivis*, based on *O combien est malheureux*) and one based on a motet by Richafort (*Ego sum qui sum*). Of his 86 motets, 44 are for four voices, 32 for five, nine for six and one for seven voices; more than half of the motets are freely composed and the others based on plainchant melodies, presented usually in long note values in the superius, but occasionally in the tenor, or paraphrased with successive motifs treated in imitation. His five-voice *Exaudi Domine* uses an ostinato from Josquin's *Faulte d'argent*, while one of his two four-voice settings of *Inviolata integra* combines the chant for the sequence with those of three different antiphons. Like other French composers, Maillard generally used short melodic motifs of limited range in close imitation; he also occasionally employed canonic devices, most effectively in the six-voice motet *Fratres mei elongaverunt* and the four-voice *Congregati sunt inimici nostri*. He fairly frequently employed techniques of word-painting, as in the Cecilian responsory *Cantantibus organis* and the Easter sequence *Victimae paschali laudes*.

Most of his chansons set either courtly epigrams of four or eight lines by poets such as Marot, Saint-Gelais, Scève and Sainte-Marthe, or anonymous anecdotal narratives; these works are very much in the style of the 1540s established by Sermisy, Sandrin, Janequin and Certon. Occasionally he turned to older forms (as in the rondeaux *Du mal que j'ay* and *Ceste belle petite bouche*). His earliest works were printed simultaneously by Moderne in Lyons and Attaingnant in Paris; his later pieces appeared in Le Roy's collections, including two five-voice pieces in the retrospective *Meslanges* of 1560.

Three of the motets appeared in the lute intabulation by Adrian Le Roy (1551[24]) before their partbook publication in 1553[7]. Many of the chansons were also arranged for lute, guitar, cittern and vihuela in publications by Gerle, Le Roy, Phalèse and others between 1546 and 1578; Goudimel based a mass on the chanson *Tant plus je mets*, Palestrina a mass on *Eripe me*, while Lassus parodied other motets and chansons.

MARIE-ALEXIS COLIN, FRANK DOBBINS

Maillart, Aimé [Louis] (*b* Montpellier, 24 March 1817; *d* Moulins-sur-Allier, 26 May 1871). French composer. From 1833 he was a pupil at the Paris Conservatoire, where he studied with Halévy, Leborne, Elwart and Guérin. In 1841 he won the Prix de Rome. On his return to Paris he began writing operas, the first of which, *Gastibelza, ou Le fou de Tolède*, was the opening work at the Opéra-National (later the Théâtre Lyrique) in 1847; it later appeared in New Orleans and Buenos Aires. His most successful opera was *Les dragons de Villars* (1856) which became popular throughout Europe, reaching New Orleans in 1859 and New York in 1868; it is still occasionally performed in France and Germany. His last two operas, *Les pêcheurs de Catane* and *Lara*, proved less enduring, though the latter was performed in Belgium, Spain, Germany, England and Poland. Maillart's music is characterized by graceful melodies, a colourful, theatrical style and skilful instrumentation.

□

Maillart, Pierre (*b* Valenciennes, 1550; *d* Tournai, 16 Aug 1622). Franco-Flemish musician and theorist. In 1563 Maillart entered the Flemish chapel of Philip II of Spain in Madrid, where he studied with Jean de Bonmarché, director of the chapel from 1564 until his death in 1569. In 1570 Maillart left Spain, first for Leuven, where he is known to have studied at the university (1572), then for Antwerp (1574) and finally for Tournai, where he was named *phonascus* (singing master) at the cathedral (1581), and later canon (1589). On 23 May 1606, Maillart succeeded Anselme Barbet as *chantre* of Tournai Cathedral, where notable musicians were employed both before (François Regnart, George de La Hèle) and after (Géry Ghersem) his time. In this capacity he wrote masses and motets, but none of his compositions appears to have survived. On 19 August 1609 Maillart was granted a royal privilege for the printing of his major work, *Les tons, ou discours, sur les modes de musique, et les tons de l'église, et la distinction entre iceux* (Tournai, 1610/*R*), a book that had influence through much of the 17th century, and is referred to by such writers as G.B. Doni, Isaac Beeckman and especially Marin Mersenne (both in his correspondence and in his printed works).

In *Les tons* Maillart attempted to distinguish between the terms *mode* and *ton*, which he believed had been unnecessarily confused, and to clarify the tonal organization characteristic of each. To him, *mode* described an octave species (*diapason*) based on a final, divided into two unequal parts (made up of the primary intervals of a 4th and a 5th arranged in harmonic or arithmetic progression), and comprising the seven diatonic scale steps. He argued for a system of 12 modes, rejecting one of 14 modes (much as did Glarean), as the tonal basis for all music, including chant. In rejecting a 14-mode system, Maillart reasoned against attempts at expanding the six-syllable solmization system into one of seven syllables (in particular, that proposed by Erycius Puteanus in his *Musathena*, 1602). *Ton*, on the other hand, he considered a sub-species of *mode*, devised for the specific and practical purpose of chanting psalmody and, therefore, having special characteristics. Each psalm tone, according to Maillart, is divisible into three parts – *intonation*, *médiation*, *fin* (*saeculorum amen*) – of which only the *médiation* is tonally invariable, dwelling on the dominant,

whereas the first and third parts vary according to the choice of antiphon that precedes and material that follows. As a consequence, the eight psalm tones are determined by their dominants, since the finals often are either unclear or varied in actual use. By extension, Maillart suggested altering specific finals of some of the psalm tones to suit the needs of performance (for example, he recommended the adoption of C for F as the final in modes 5 and 6), and a connection can be seen between Maillart's system of eight tones and those proposed later in the 17th century, for example, by Jean Denis (*Traité de l'accord de l'espinette*, 1650) and Guillaume Gabriel Nivers (*Traité de la composition de musique*, 1667). Appended to the treatise, which has two essential parts (the first devoted to *mode* and the second to *ton*), is a smaller third part, dealing with elements of notation, mensuration and other matters intended as aids in the performance of chant.

ALBERT COHEN

Maille (*fl* 1539–49). French composer. 21 four-voice chansons by him were published in Paris between 1539 and 1549. All use amorous texts set in the suave style of Sermisy's courtly chansons, except for *Une bergière un jour aux champs*, which was in fact ascribed to Nicolas de Marle in other publications. Maille preferred eight- or ten-line *épigrammes* to the normal four- or five-line poems of the preceding generation. He did not use popular melodies or texts that had been set by earlier composers, but some of his pieces, including *A qui me doibz-je retirer*, *Dictes pourquoy*, *Las me fault-il*, *Que gagnez-vous* and *Si j'ay du bien*, were used as models by later composers.

WORKS

all for four voices

Edition: *Le Gendre, Maille, Morpain: Collected chansons*, ed. C.A. Miller, CMM, lxxxvi (1981)

A qui me doibz-je retirer, 1540[14] (lute intabulation, 1546[32-33]); Dame d'honneur où vertu se repose, 1544; Dictes pourquoy vostre amitié s'efface (C. Marot), 1539[17]; En esperant qu'au nouveau temps d'ever, 1544[7]; Est-il point vray ou si je l'ay songé (François I or Claude Chappuys), 1540[14]; Honneur, beaulté, doulceur et bonne grace, 1548[3]; Je croy le feu plus grant que vous ne dictes, 1541[6]; Je ne le puis ny le veulx changer, 1546[14]; Je vous supplie, entendez-moy (Marguerite of Navarre), 1547[8]

Las me fault-il tant de mal supporter, 1539[17] (lute intabulation, 1546[31]); Las si amour vertu compaigne avoit, 1543[8]; Le cler soleil au plus hault degré luyt, 1544[7]; Le grand désir que sentois approcher, 1546[14]; N'est-ce pas grand cruaulté, 1547[11]; O vous Amour, 1547[8]; Pélérin suis d'un voyage, 1548[3]; Que gagnez-vous à vouloir differer?, 1540[14]; Si j'ay du bien, hélas c'est par mensonge (M. de Saint-Gelais), 1542[14-15]; Si l'estincelle en ung petit moment, 1541[5–6] Vouldriés-vous bien estant de vous aymé, 1542[14]

Une bergière un jour aux champs, 1549[28] (attrib. N. de Marle in 1545[10-11] and 1551[6])

FRANK DOBBINS

Mailloche double (Fr.). *See* TAMPON.

Maimonides (1135–1204). Jewish rabbi and influential writer on music. *See* JEWISH MUSIC, §I, 4.

Mainardi, Enrico (*b* Milan, 19 May 1897; *d* Munich, 10 April 1976). Italian cellist. He studied with Giuseppe Magrini at the Milan Conservatory, and with Hugo Becker in Berlin; he also studied composition in Milan with Giacomo Orefice, and later in Venice with Malipiero. His début in Milan (when he was 13) was followed by a European concert season and international recognition. At the age of 16 he played Reger's Fourth Sonata op.116 with the composer at the Heidelberg Bach-Reger Festival. Mainardi formed duos with Dohnányi, Backhaus, Carlo Zecchi and Edwin Fischer; with Fischer he also formed a trio, first with Kulenkampff and later with Schneiderhan. Pizzetti's Cello Concerto (1933–4) was written for him, as were Malipiero's Cello Concerto (1937) and Triple Concerto (1938). In 1933 Strauss invited Mainardi to record *Don Quixote*, with the composer conducting. Mainardi made many other recordings, often directing the orchestra while playing the solo part in Baroque and Classical concertos. From 1930 he taught the cello and chamber music at the Accademia di S Cecilia, Rome, and in Berlin, Salzburg and Lucerne. He held international masterclasses and seminars specializing in the cello and chamber works of Bach, Beethoven, Brahms, Chopin and Pizzetti. Among his pupils were Siegfried Palm, Erkki Rautio and Joan Dickson, his assistant for many years.

Mainardi's playing was characterized by clear, warm tone and the use of moderate tempos; he never permitted the display of impeccable technique to overrule the integrity of his interpretation. His compositions include four cello concertos, sonatas for cello (unaccompanied and with piano), more than 20 chamber works, songs and orchestral works. He edited Bach's cello suites, using a second staff to analyse their contrapuntal structure and clarify his technical suggestions, and Wagenseil's cello concertos, of which he gave the first modern performance following their discovery in 1953.

LYNDA MACGREGOR

Maine, Basil (Stephen) (*b* Norwich, 4 March 1894; *d* Sheringham, Norfolk, 13 Oct 1972). English critic and writer on music. He studied at Cambridge under Charles Wood, Edward Dent and Cyril Rootham, and was for a time assistant organist at Durham Cathedral. From 1925 to 1937 he was music critic for several daily and weekly London papers, including the *Daily Telegraph* and the *Sunday Times*.

Maine was also a novelist and historical biographer, and for a time an actor in a Shakespearean company. The combination of musical and histrionic gifts brought him much into demand as speaker in such works as Bliss's *Morning Heroes* (in which he appeared in the first performance in the Norwich Festival of 1930), Honegger's *Le roi David* and Stravinsky's *The Soldier's Tale*. His musicianship enabled him to avoid in his speech the unconscious imitation of musical rhythm and cadence. In 1939 he was ordained priest in the Church of England, and he held various livings in East Anglia.

H.C. COLLES/PETER PLATT

Mainerio [Maynerius, Mayner, Meyner], **Giorgio** (*b* Parma, *c*1535; *d* Aquileia, 3 or 4 May 1582). Italian composer. He was a priest; in 1560 he became *cappellano* and in 1565 *mansionario* (beneficed priest) at Udine Cathedral, then at the diocesan church of the patriarchs of Aquileia. His duties included singing on feast days, and in 1560 the cathedral chapter noted that he was proficient 'in arte et scientia canendi'. In 1570 he became *mansionario* at Aquileia Cathedral where he also acted intermittently as chapter administrator and taught the choirboys singing. In 1574 he dedicated his *Magnificat octo tonorum* (Venice, 1574) to the dean, canons and chapter of the cathedral. Two years later the chapter appointed him *maestro di cappella*.

Mainerio's *Il primo libro de balli* (Venice, 1578; ed. in Musikalische Denkmäler, v, Mainz, 1961) is one of the most important sources of ensemble dance music surviving from the second half of the 16th century. It contains 21 four-part dances, 12 of which are followed by a second paired dance. Two different types of musical construction are used: some are based on a harmonic and metrical framework, while in others the melody is the predominant element. Three pieces deserve particular mention: the *Ballo francese*, the earliest known example of a true variation for instrumental ensemble, and the *Pass'e mezzo antico* and *Pass'e mezzo moderno*, the earliest extant suites for instrumental ensemble. Several of the dances later appeared anonymously (in RISM 1583[21]) and organ intabulations of the *Pass'e mezzo antico* and other dances were published by Jakob Paix (RISM 1583[23]). Mainerio's sacred works display contrapuntal writing within a strong harmonic framework, or, in the pieces for larger forces, a more homophonic style with competent use of *cori spezzati*.

MANFRED SCHULER

Mainpiece. A term used to refer to the principal work in the 18th-century London theatre when more than one item was presented on the programme. Like the term AFTERPIECE, its application was contextual; if there was only one work in the programme, the term was redundant. Much of the repertory used as mainpieces in multiple-bill programmes was serious drama, but occasionally masques were performed as mainpieces.

□

Mainstream jazz. A term coined in the 1950s by the writer on jazz Stanley Dance to describe the work of contemporary musicians working in the swing idiom of the 1930s and 40s. However, it is now more widely used for any jazz improvised on chord sequences in the essentially solo style developed by Louis Armstrong and others in the late 1920s. Some writers have broadened it further to apply to jazz-rock and other fusion styles, but most would exclude the free or aleatory jazz of the avant garde, rock-based jazz, and dixieland and other traditional forms. *See also* JAZZ, §15.

JAMES LINCOLN COLLIER

Mainvielle-Fodor, Joséphine. *See* FODOR family, (4).

Mainwaring, John (*b* Drayton Manor, Staffs., bap. 4 Aug 1724; *d* Cambridge, 15 April 1807). English divine and early biographer of Handel. He studied at St John's College, Cambridge, and was ordained in 1748; in 1749 he was appointed rector of Church Stretton, Shropshire. He was a fellow of his college from 1748 to 1788, when he was elected Lady Margaret Professor of Divinity in the university. Mainwaring began suffering from asthma in 1749, and travelled to the Continent because of ill-health in 1750, 1773–5 and 1785. In the latter year he was in Rome at the same time as William Coxe, Thomas Gray and Hester Lynch Piozzi, and frequented the *conversazioni* at Cardinal Bernis's palace. The resignation of his fellowship in 1788 left him free to marry, and in November of that year he married the 25-year-old Anne Wilding, daughter of a prominent Shropshire family and sister of his former curate.

In addition to his sermons and pamphlets, Mainwaring was the author of the first part of *Memoirs of the Life of the Late George Frederic Handel, To which is added, A Catalogue of his Works, and Observations upon them* (London, 1760/*R*; Ger. trans. J. Mattheson, 1761/*R*; abridged Fr. trans. J.-B.A. Suard, 1768). The other contributors were James Harris for the 'Catalogue' and Robert Price for the 'Observations'. The whole was issued anonymously, although Mainwaring later acknowledged his authorship. Biographical data had been supplied in part by John Christopher Smith the younger, but material about Handel's early life may have come directly from the composer himself. The book is thus a primary source for Handeliana, but it also is a primary, though not unproblematic, document for music aesthetics and criticism. Abridged versions appeared in the *Gentleman's Magazine*, *London Chronicle*, *London Magazine* and *Universal Magazine*.

JAMIE C. KASSLER/GRAYDON BEEKS

Mainz. Town in Germany. Situated at the confluence of the Rhine and the Main, it is the state capital of the Rhineland Palatinate. The Archbishop of Mainz was Hofbischof to the German emperor; from 1257 he was also chairman of the princely electoral college. Before the Reformation the diocese was by far the biggest north of the Alps. A sacramentary of St Alban (*c*800) of Reichenau-influenced design and a 10th-century sequentiary of the type found in Fulda and St Gallen point to musical activity. The parish church of St Peter has a 12th-century psalter and hymnal, and the parish church of St Valentin at Kiedrich possesses a 14th-century gradual from Mainz Cathedral. Up to the 19th century plainchant was sung in Germanic style in the religious institutions and parish churches of Mainz, except in those of the Carmelites and Franciscans, who used Roman style. The earliest polyphonic work recorded in Mainz is a two-part conductus, *Vernans virtus*, found in an antiphoner associated with the Carmelite convent since the 14th century but possibly dating from considerably earlier.

The glittering imperial festival held by Friedrich Barbarossa in 1184, which brought together knights, poets, singers and musicians from all over Europe, was crucial in the development of the German Minnesang. From 1295 to 1318 Frauenlob (Heinrich von Meissen) lived in Mainz and founded a school for Meistersinger which spawned the *Gross Buch von Mencz* (now lost), on which the Munich and Donaueschingen song manuscripts were based. The school was dissolved around 1500 but in about 1552 a new school was formed. Religious plays at Easter, Ascension and Whitsun, with both spoken and sung parts, were probably performed in the 15th century and the early 16th, though only the texts remain. Meistersinger plays and Passion plays were supplemented by the humanistic *Schulkomödie*, a form taken up by the Jesuit college, founded in 1561.

The first mention of an organ in Mainz Cathedral dates from 1334. Arnolt Schlick's *Tabulaturen etlicher lobgesäng* were published by Schoeffer in Mainz in 1512. Notable among 15th-century organ builders was Heinrich Traxdorf. The Hofkapelle originated during the reign of Archbishop Elector Albrecht of Brandenburg (1514–45); Jan le Febure (*d c*1612) and Gabriel Plautzius (*fl* Mainz 1612–41) were the first recorded Kapellmeister. The *Catholisch Cantual oder Psalmenbüchlein* (1605), also known as the *Mainzer Cantual*, appeared during the reign of Elector Johann Schweickard von Cronberg. P.J. Baudrexel was Kapellmeister from 1679 to 1691. During this time the works of the violinist J.J. Walther were published in Mainz by Ludwig Bourgeat.

In the 18th century the music of the Hofkapelle reached its peak under three Bohemian Kapellmeister, Jan Ondráček (1724–43), Jan Zach (1745–56) and J.M. Schmid (1756–87). Notable composers were Giovanni Punto, J.F.X. Sterkel and G.A. Kreusser, and the cathedral canon H.F.K.A. von Kerpen. In 1711 members of the nobility had built their own theatre, the Mainzer Adelstheater, which gave mainly French music theatre; Italian opera was later given in the Komödienhaus (built 1767). In 1788 Elector Charles Joseph von Erthal founded the Mainzer Nationaltheater, which soon became one of Germany's foremost companies. Some Mozart operas received their German-language premières in Mainz. Opera was directed until 1792 by Vincenzo Righini. Music was encouraged in the numerous collegiate churches and monasteries, especially those of the Augustinian order, whose most notable composer was Alexius Molitor. Various activities were organized by families of violin makers, particularly the Diehl family, and organ builders: Kohlhaas, J.J. Dahm, Johann Onimus, J.A.I. Will, and the Stumm family from the nearby village of Rhaunen. The firm of Alexander Brothers (founded 1782; still active) became world-renowned for their brass instruments, particularly horns. Founded in the 1780s, the music publishing firm of B. Schott's Söhne (renamed Schott Musik International GmbH & Co. KG in 1995) now owns branches in many countries.

After the demise of the princely state and archbishopric in the aftermath of the French Revolution, it was not until the 1830s that musical societies began to spring up. The Liedertafel was founded in 1831 and supported by a ladies' singing circle from 1837. Directed by Heinrich Esser (1841–7), Friedrich Lux (1864–91) and Fritz Volbach (1891–1907), the society became one of the most respected German oratorio choirs. The Mittelrheinischer Musikverband organized ten large music festivals between 1855 and 1894, four of them in Mainz. In 1890 the Liedertafel opened its own concert hall. The theatre was refounded in 1817 as the Grossherzogliches Hessisches Nationaltheater and was designated a civic theatre by 1833, with new premises on the Gutenbergplatz. In 1915 it came under the control of the city and in 1990 became a Staatstheater. Important musicians who worked there included Conradin Kreutzer (1844–5), E.N. von Reznicek (1887–8), Hans Pfitzner (1893–5), Emil Steinbach (1877–1909), Karl Elmendorff (1920–23) and K.M. Zwissler (1936–67). The symphony orchestra, founded in 1876 and renamed the Philharmonisches Orchester in 1984, plays for operas as well as giving concerts. The Mainzer Kammerorchester was founded by Günter Kehr in 1955. The work of the Pflege der Kirchenmusik was furthered by the cathedral choir, founded in 1866, which earned a high reputation ('Sixtina am Rhein') under the Kapellmeister G.V. Weber (1866–1904).

The Musikhochschule grew out of the Schumacher'schen Konservatorium (founded in 1881), and in 1937 was renamed the Peter-Cornelius-Konservatorium. Its most prominent directors were Hans Rosbaud (1921–8) and Hans Gál (1929–33). The Johannes-Gutenberg-Universität (1477–1816, reopened in 1946) houses a collegium musicum, a music department with an emphasis on school music, and a Musikwissenschaftliches Institut; the latter has been directed by Arnold Schmitz (1946–62), Hellmut Federhofer (1962–79) and Christoph-Hellmut Mahling (from 1981). The Stiftung Villa Musica sponsors the further education of young musicians. The city has a Bischöfliches Institut für Kirchenmusik and a regional studio for Südwestfunk, and is the home of Zweiten Deutschen Fernsehens.

HERBERT SCHNEIDER/GÜNTER WAGNER

Mainzer, Friedrich. Austrian music publisher. *See under* DOBLINGER.

Mainzer, Joseph (*b* Trier, 21 Oct 1801; *d* Manchester, 10 Nov 1851). German teacher and organizer. Trained as a chorister at Trier Cathedral, Mainzer was ordained priest in 1826 following a curtailed apprenticeship as a mining engineer. After two years of further musical study, he was appointed singing master at the seminary at Trier, for which he produced his *Singschule*. During his apprenticeship he had been made deeply aware of the misery of the mine-workers, and his political conscience was stirred; his consequent pamphleteering aroused police suspicion and, renouncing the priesthood, he fled, first to Brussels, then to Paris, where he arrived late in 1834. In both cities he lived by music journalism and teaching, while pursuing fruitless operatic ventures; but in Paris he decided to devote his musical gifts to the service of the artisan by starting a series of free singing classes in 1835. Hundreds of adult pupils were quickly enrolled, and Mainzer's throng of labourers in their *bleu de travail* earnestly learning to sing became one of the sights of Paris. Chorley's account of a Mainzer class first drew public attention to the movement in England. Growing fear of insurrection in Paris, however, led to the banning of these classes during 1839 and following another operatic failure there Mainzer left for London, where he opened a similar series of classes in May 1841, introducing as a textbook his *Singing for the Million*. His classes soon began to rival those of John Hullah, begun four months earlier and themselves inspired by Mainzer's endeavours in Paris; but in November 1841 Mainzer went on to Edinburgh to compete against Henry Bishop for the chair of music. Failing in that, he made Edinburgh his new headquarters, publishing *Music and Education* in an attempt to persuade the Scottish authorities to support his activities. Finally, leaving his established classes under the direction of his most competent pupils (as he had done in London and elsewhere), he moved to Manchester where, exhausted by overwork, he died in 1851. His system, based upon continental 'fixed' sol-fa, failed to survive him; but his influence on the development of amateur music in Britain was extensive. The paper *Mainzer's Musical Times*, which he established soon after his arrival in London, was taken over by Alfred Novello in 1844 and became the *Musical Times*.

BERNARR RAINBOW

Maio [Mayo, Majo], **Giovan Tomaso di** (*b* Naples, *c*1490; *d* ?Naples, after 1548). Italian composer and organist. His first published works are found in *Fioretti di frottole* (RISM 1519[4]). From 1540 to 1548 he was organist at the SS Annunziata, Naples, and was possibly the *maestro di cappella* whom Nola replaced in 1563, although documentation is lacking. Citing famous Neapolitan musicians in his *Della prattica musica* (1601), Scipione Cerreto described Maio as 'an excellent organist'.

The majority of the 1519 compositions are homophonic settings of popular poems: one *strambotto*, one ode and five frottolas (one with a Spanish text). Two through-composed settings of canzoni by Petrarch anticipate the madrigal in their consistently contrapuntal textures and irregular overlapping phrases. The only published volume entirely devoted to Maio's music is his *Canzon villanesche ... libro primo* for three voices (Venice, 1546). The 30 pieces in it are in dialect, and like those of his compatriots Nola and Cimello are high-pitched vocal trios notable for spirited delivery of the dialectal texts. Unlike the other Neapolitans, Maio favoured short scalar motifs, nervous dotted rhythms, chains of consecutive 5ths and even parallel octaves, unisons and seconds. The consistent use of triadic sonorities in close position and the frequent truncation of words and phrases suggest roots in popular oral traditions.

The majority of Maio's *villanesche* are Petrarchist love lyrics lighty coloured with colloquialisms, but in ten works Maio chained together Neapolitan proverbs, local expressions and literary images in a truly popular manner. A high degree of stylistic consistency in form and content suggests that Maio was an amateur poet: 28 have the metrical form *ABB*/*ABB*/*ABB*/*CCC* (11-syllable lines) or *ABBB*/*ABBB*/*ABBB*/*CCCC* (11:11:7:11), used exclusively by Maio in the 1540s but the most popular scheme between 1560 and 1565. Maio preferred the symmetrical form *ABC* (each repeated) for three-line strophes, but for four-line strophes experimented with various asymmetrical designs.

Maio's *Passan madonna* was reprinted in Rinaldo Burno's *Elletione de canzone alla napoletana* (1546[18]). Interestingly, this piece appears to be a reworking of Vincenzo Fontana's setting of the same text. Einstein suggested that Maio was the anonymous composer of the *Canzone villanesche* (1537[5]), but a comparison of poetic forms and musical styles does not support this hypothesis. Judging from book-fair catalogues, Maio's collection was widely marketed in northern Europe. But his *villanesche* were apparently never well received among northern composers: only one, *Madonna quanto più straccii*, was reworked (by Nasco in 1556), and none was intabulated.

DONNA G. CARDAMONE

Maio, Giuseppe di. *See* MAJO, GIUSEPPE DE.

Maire, Nicolas Remi (*b* Mirecourt, 20 Dec 1800; *d* Paris, 17 July 1878). French bowmaker. He was probably associated in some way with the great Mirecourt bowmaker ETIENNE PAJEOT, his senior by ten years: much of Maire's work, until sometime in the 1840s, was dominated by Pajeot's style. Some Maire bows resemble those of Pajeot very closely, although they rarely approach the level of the latter's craft in the working of the sticks and heads. Maire's company, Maire-Contal, was founded in 1826 and by 1844 employed 15 workers with an output of 4000 bows a year. By the late 1840s, however, Maire had fallen on hard times, no doubt induced by the poor economic climate in Paris, the destination of his produce.

Maire left Mirecourt for Paris in the late 1850s, by which time some of his bows showed the influence of Dominique Peccatte. His brand-stamp of N. MAIRE was shortened to simply MAIRE, and this seems to have coincided with his departure from Mirecourt. Maire meandered greatly in terms of style. A great many bows have therefore been attributed to him which are in truth only stylistically reminiscent of his work.

PAUL CHILDS

Maisch, Ludwig (*b* Nuremberg, *c*1776; *d* Vienna, 18 April 1816). Viennese music publisher. His firm began publishing in 1810, reissuing salable works from Leopold Kozeluch's Musikalisches Magazin publishing house and the music of such composers as Gelinek, Gyrowetz, Hummel and Vanhal. While the production was for the most part of fashionable pieces and dance music, it also included some minor works by Beethoven. After Maisch's death the firm continued to trade under his name until January 1818, then for several months under that of his widow. The firm's accountant Daniel Sprenger (*b* Sülfeld, nr Hanover, *c*1794; *d* 21 Sept 1819) took control for a further year; after his death Mathias Artaria (1793–1835), son of the Mannheim publisher Domenico Artaria (ii), assisted Sprenger's widow in carrying on the business. He married her on 4 November 1821 and the firm bore his name alone from 10 June 1822.

Under Artaria the firm's output improved markedly in quality, as shown by the publication of Beethoven's opp.130, 133 and 134, as well as Schubert's opp.52–4. Other composers represented included Ignaz Assmayer, Jansa, Mayseder and Pecháček. On 26 June 1833 the firm passed to Anton Diabelli. Artaria's widow attempted to start a publishing firm in 1838 in partnership with Gustav Albrecht and Peter Asperl, but its importance was small and in 1850 she ceased publishing.

ALEXANDER WEINMANN

Maisky, Mischa (*b* Riga, 10 Jan 1948). Israeli cellist of Latvian birth. He had his first lessons at the age of eight, attended Children's Music School and Riga Conservatory and in 1965 moved to Leningrad. In 1966 he won a major prize in the International Tchaikovsky Competition in Moscow, after which he studied with Rostropovich at the Moscow Conservatory. In 1970 he was imprisoned for 14 months in a labour camp near Gor'kiy, and in 1972 left the USSR for Israel. From this time he followed an increasingly successful solo career: his US début was at Carnegie Hall in 1973, and his London concerto début with the RPO in 1976, followed in 1977 by a recital début with Lupu at the Queen Elizabeth Hall. Maisky later established a duo with Martha Argerich, with whom he has made many recordings, among them outstanding performances of the complete Beethoven sonatas and the sonatas by Franck and Debussy. His recording of Brahms's Double Concerto with Gidon Kremer and the Vienna PO under Bernstein is also notable, though his recordings of the Dvořák and Shostakovich cello concertos have been criticized for their idiosyncrasy and rhythmic wilfulness. Rostropovich has said of Maisky's playing that it 'combines poetry and exquisite delicacy with great temperament and brilliant technique'. He plays a Domenico Montagnana cello dated *c* 1700, which was presented by an admirer after his Carnegie Hall début.

MARGARET CAMPBELL

Maison, René (*b* Frameries, 24 Nov 1895; *d* Mont d'Or, Haut Doubs, 11 July 1962). Belgian tenor. He studied in Brussels and Paris, and made his début in 1920 at Geneva, as Rodolfo (*La bohème*). His reputation grew with three successive seasons, beginning in 1925, at Monte Carlo, where his roles included Faust, Hoffmann and Huon in *Oberon*. From 1928 to 1931 he was a member of the company at Chicago, undertaking heavier roles such as Lohengrin, Florestan and Parsifal. In Paris he sang at the Opéra-Comique and at the Opéra, where in 1934 he created the role of Eumolpus in Stravinsky's *Perséphone*. From 1934 to 1937 he was principal dramatic tenor at the Colón; he also had a career at the Metropolitan from 1935 to 1943. One of his greatest successes there was as Julien in *Louise*, which he also sang at Covent Garden in 1935. His only other London role was Lohengrin in 1931, when his acting and physical presence (he was 6 feet 4 inches in height) impressed, though his singing was criticized for roughness in the loud passages and 'a rather falsetto character of voice' in the soft (Ernest Newman in the *Sunday Times*). On retirement he taught in New York and Boston, his pupils including Ramón Vinay. Recordings show an expressive style and a strong voice, well heard in 'live' performances from the Metropolitan.

J.B. STEANE

Maistre, Johann Friedrich. *See* MEISTER, JOHANN FRIEDRICH.

Maistre, Matthaeus le. *See* LE MAISTRE, MATTHAEUS.

Maistre Jhan [Jan, Jehan] (*b c*1485; *d* Oct 1538). French composer active in Italy. The earliest unmistakable reference to this musician calls him 'Metre Gian, cantor francexe'. He should be distinguished from other musicians named Jean active at Ferrara during this period; most of them have surnames consistently used, whereas the Jhan in question is never given one but is always called 'Maistre'.

Jhan's name is found on Ferrarese court paylists as early as 1512, and he remained there for the rest of his life. For at least a part of his long tenure he was *maestro di cappella*, as a 1537 record of payment shows. A Ferrarese document of 1538 refers to a will made by a 'magister capellae', the 'nobilis Vir Ma[gis]ter gianus', son of the late 'Paulus del Mistro, gallicus'. Whether or not this indicates noble rank is uncertain.

Two publications carrying his name and appearing after his death may have been intended as memorials to the composer; both identified him as *maestro di cappella* at Ferrara. On the title-page of the first of these, a madrigal volume (RISM 1541[15]), he is called 'Maistre Jhan, maestro di Capella dello ecc. sig. Hercole duca di Ferrara'; a volume of motets (1543[4]) devoted largely to his work refers to him as 'Joannes Gallus *alias* Metre Jehan'. From this Eitner and others assumed that Joannes Gallus and Maistre Jhan were one and the same man. However, the names are not used interchangeably in other contemporary sources.

The *Madrigali* of 1541 contains only five pieces by him along with works by 25 other composers. Most of Jhan's madrigals appeared in volumes issued under Verdelot's name and in collections, beginning with the *Madrigali … de la serena* (1530[2]). Einstein's judgment of his madrigal style as 'extraordinarily archaic' is apt; compared with that of Verdelot or Arcadelt, it seems stiff, almost awkward. Nevertheless he must be reckoned among the 'founders' of the madrigal, since he belonged to the oldest generation of composers to cultivate the new genre.

Jhan's motets, widely distributed in contemporary sources, show him to be a skilful emulator of Josquin. They contain pairs of imitative duos, particularly at the opening of a piece, occasional chordal writing and shifts of metre for contrast or emphasis, and plagal endings under a soprano pedal. A preference for four-voice writing and syllabic declamation is also evident. Free imitation is more common than strict. The texts are most often taken from antiphons and hymns to popular saints, but there are also tributes to noble patrons such as François I of France, Alfonso I, Isabella and Ercole II d'Este and works of political significance. *Mundi Christo* celebrates the meeting of Clement VII and Charles V at Bologna in late 1529. *Te Lutherum damnamus*, a paraphrase of the *Te Deum*, was probably commissioned to express Ercole II's disapproval of his wife Renée's Protestant sympathies.

The theorists Vanneo and Coclico described Jhan as a celebrated musician and expert composer. In a letter of 1532 Cardinal Ercole Gonzaga, one of the great connoisseurs of the age, wrote to his cousin Ercole d'Este of his admiration for one of Jhan's masses and asked for copies of all his compositions.

Several masses and lamentations left in manuscript have been lost. The surviving mass, a large-scale work constructed over a liturgical cantus firmus, commemorates Ercole's succession to the dukedom. The Passion that was attributed to 'M. Jan' in a Bologna source, long regarded as a work by Maistre Jhan, seems on stylistic grounds more likely to be the work of Jan Nasco.

MASSES AND MOTETS

Missa 'Omnes sancti et sanctae Dei', 5vv, *I-MOe* α.N.1.2–3

Benedictus and Agnus Dei, from unidentified mass(es), 2vv, 1543[19]

Abeuntes Pharisei, 4vv, 1543[4]; Accipe quae tibi nunc princeps, 5vv, *I-TVd* 36; Adjutor in tribulationis, inc., 4vv, *GB-Lbl* Add. 19583; Ambulans Jesus iuxta mare, 5vv, *I-Rvat* C.G.XII, 4; Amo Isabellam cuius amore gaudeo (for Isabella d'Este), inc., 4vv, *GB-Lcm* 2037; Angele Dei qui custos es mei, inc., 4vv, *Lcm* 2037; Assumptus hodie Dominus, 5vv, *I-TVd* 36; Ave gloriose beatissime Antoni, 4vv, B, 144; Ave Maria gemma virginum, 5vv, *MOe* α.N.1.2–3; Ave Maria gratia plena, 4vv, 1543[4]; Ave Maria lilii castitatis, 5vv, *TVd* 36

Beata Maria Magdalena, 4vv, *MOe* α.N.1.2–3; Benedicat te Dominus in virtute sua, 6vv, 1545[3]; Cantate hodie, 4vv, 1543[4]; Cerne meos ergo gemitus, 4vv, 1539[13]; Coeli Deus omnipotens benedicat tibi, 6vv, 1545[3]; Confiteor Deo Patri omnipotenti, 6vv, 1549[3]; Continet in gremio, 5vv, *TVd* 36; Cum audissent apostoli, 4vv, 1543[4]; Doce me, Domine, 4vv, Rome, Palazzo Massimo VI.C.6.23–4; Domine non secundum, 5vv, *Rvat* C.G.XI1, 4

Ecce amica mea, 4vv, 1538[5]; Ecce nos reliquimus omnia, 4vv, S viii, 175; Franciscus vir catolicus (for François I of France), inc., 4vv, *GB-Lcm* 2037; Fratres innocentes iam non estis, 5vv, *I-TVd* 36; Funde preces, 4vv, 1538[5]; Gaude chorus, 5vv, 1539[5]; Hodie caelesti sponso, 4vv, 1543[4]; Hodie completi sunt, 4vv, *MOe* α.N.1.2–3; Hodie in Jordane, 6vv, 1549[3]

In die solemnitatis, 4vv, *I-TVd* 8; In die tribulationis meae, inc., 4vv, *GB-Lcm* 2037; In illo tempore dixit Jesus, 4vv, 1543[4]; In illo tempore dixit Jesus discipulis, 4vv, *Lcm* 2037; In illo tempore dixit Jesus Symoni, 4vv, 1543[4]; In illo tempore Judei, 4vv, *I-TVd* 8; In principio erat verbum, inc., 4vv, *GB-Lcm* 2037; In viam pacis et salutis, 4vv, 1549[12]; Joannes Jesu Christo dilecte, 4vv, B, 225

Lauda Jerusalem Dominum, 4vv, ed. in MRM, iii–v (1968); Laudemus fortissimum Christi, 5vv, *TVd* 36; Levita Laurentius, 4vv, 1549[12]; Locuti sunt, 5vv, 1539[5]; Lumen ad revelationem, 4vv, 1543[4]; Memor esto verbi tui, 4vv, *TVd* 7; Miser qui amat, 4vv, 1540[7]; Mundi Christo redemptori laeta canit (for Pope Clement VII and Emperor Charles V), 6vv, *Rv* S. Borr.E.II.55–60; Nunc ego te Euriale aspicio, 5vv, *TVd* 36

O benignissime Domine Jesu, 4vv, 1519[1]; O clarum decus, 5vv, *TVd* 36; O Domine Jesu Christe, 4vv, B, 110; O magnum mysterium, 4vv, R vii, 174; O Maria piissima, 6vv, 1549[3]; Omnia quae fecisti nobis Domine, 5vv, S iii, 131; Omnipotens sempiterne, Deus (for Alfonso I d'Este), 4vv, 1543[4]; O pater optime, 5vv, *TVd* 36; O praeclarae vos puellae, 5vv, *TVd* 36; O Roche beatissime, 4vv, 1543[4]; O sacrium convivium, 5vv, R vi, 126; O sancte Hieronyme, 4vv, 1543[4]; O sidus Hispaniae, 5vv, 1539[7]

Passer invenit, 4vv, *TVd* 8; Pater noster, 5vv, 1539[8], 2p. ed. in AMIi (1897), 91; Paulus apostolus, 4vv, 1545[3]; Postquam consumati sunt dies octo, 4vv, 1543[4]; Praeparate corda, 4vv, 1538[5]; Prandebis tecum, 2vv, 1549[16], ed. D. Degen, *Schöne und liebliche Zwiegesänge* (Kassel, 1951), p.17; Presbyter in laudes Jeronime, 5vv, *TVd* 36; Qui credit in Domino, 6vv, 1542[10], Z iv, 130; Quid mihi crudelis misero, inc., 4vv, *GB-Lcm* 2037; Regnum mundi, inc., 6vv, *I-Fn* Magl. XIX, 125bis

Sancte Jacobe, 5vv, *I-TVd* 36; Sebastiane decus perenne caeli (for Alfonso I d'Este), inc., 4vv, *GB-Lcm*, 2037; Si dereliqui te Domine ignosce mihi, 5vv, 1545[3]; Si quis diligit me, 5vv, *I-TVd* 36; Sola salus mortallium (for Alfonso I d'Este), inc., 4vv, *GB-Lcm* 2037; Sub altare Dei audivi voces, inc., 4vv, *Lcm* 2037; Sufficiebat mihi paupertas, 4vv, *Lcm* 2037; Super cathedram Moysi, 4vv, 1543[4]; Super ripam Jordanis, 4vv, 1543[4]; Te Deum laudamus/Te

Lutherum damnamus, 5vv, K, 11; Thomas unus de duodecim, 4vv, 1539[13]
Unum cole Deum, 4vv, 1543[4]; Virgo caelestum decus et corona (for Alfonso I d'Este), 4vv, *Lcm* 2037; Virgo Dei mater, 5vv, *I-Rvat* C.S.19; Vitas hinnulleo me similis, 4vv, *GB-Lcm*, 2037; Vixi puellis nuper idoneus, inc., 4vv, *Lcm* 2037; Vox de caelis intonuit, 4vv, R vi, 65

SECULAR

J'ay veu le regnart et le loup et le lièvre, inc., 4vv, *GB-Lbl* Add.19583
Altro non è il mio amor, 5vv, 1538[21]; Amor non vedi, 4vv, 1541[15]; Amor perchè tormenti, 4vv, 1541[15]; Amor se tu sei Dio, 5vv, 1538[21]; Amor vorria madonn' humana, 4vv, 1537[11]; Cieco fanciul, 4vv, 1541[15]; Con doglia e con pietà, 5vv, 1563[7]; Deh perchè non è in voi, 6vv, 1541[6]; Deh quant'è dolce amor, 4vv, 1541[15]; Ditemi, o diva mia, 6vv, 1541[16] (attrib. Verdelot in 1546[19]); Ecco signor, 5vv, 1542[16]
Hor vedete madonna, 4vv, 1530[2] (also attrib. Arcadelt); Madonna, io v'amo et taccio, 5vv, 1538[21]; Madonna, i prieghi miei, 6vv, 1541[16]; Madonna, i vostri basci, 4vv, 1541[15]; Miser quel huomo, 5vv, 1540[7]; Non vi lassero mai, 6vv, 1541[16]; Occhi miei vaghi e lieti, 5vv, 1542[16]; Per aspri boschi, 5vv, 1538[21]; Quando nascesti amore, 6vv, 1541[16]; S'amor mi dess'ardire, 4vv, 1550[17] (attrib. Arcadelt in 1544[16]); S'io miro ogni bellezza, 5vv, 1538[21]

DOUBTFUL WORKS

Ave Maria alta stirps, 5vv, *I-TVd* 29 (by Jacquet of Mantua)
Ave regina caelorum, 5vv, *Rvat* C.G.XII, 4; C.S.17 (by Jacquet of Mantua)
Genuit puerpera, 4vv, *TVd* 8 (by Jacquet of Mantua)
Laetatus sum, 4vv, Z viii, 90 (probably by Jan Nasco)
Lamentatio Hieremiae, 4vv, *Bc* Q23 (probably by Jan Nasco)
Nisi Dominus, 4vv, Z viii, 92 (probably by Jan Nasco)
Passio Domini secundum Matthaeum, *Bc* Q24 (probably by Jan Nasco)

GEORGE NUGENT, JAMES HAAR

Maitland, J.A. Fuller. *See* FULLER MAITLAND, J.A.

Maître de chapelle (Fr.). The musician in charge of a CHAPEL.

Maizani, Azucena [La Ñata Gaucha] (*b* Buenos Aires, 17 Nov 1902; *d* Buenos Aires, 15 Jan 1970). Argentine tango singer. She first sang a tango on stage in June 1923, when the audience insisted on five repeats of the number. Her vocal style, with its precise diction, was very much her own – at times she almost recited the lyrics – and she is regarded by many as the outstanding woman tango singer of any generation. Her career embraced theatre, film, radio and nearly 300 recordings. She was a good friend of Carlos Gardel, but they were not romantically linked, as sometimes alleged. Her private life was, in fact, tragic: her two brief marriages were failures; her only child died in infancy; one of her lovers committed suicide; the earnings from her great success were never properly managed, and she died in relative poverty.

SIMON COLLIER

Maizu [maiso]. Single-rank PANPIPES of the Chipaya people of the Department of Oruro, highland Bolivia, known also in the village of Ayparavi as *chirihuana*.

Majer, Joseph Friedrich Bernhard Caspar (*b* Schwäbisch Hall, 16 Oct 1689; *d* Schwäbisch Hall, 22 May 1768). German organist and writer on music. He began organ lessons at the age of nine with Baur, organist of St Katharina; after completing the curriculum of the local Gymnasium, he was a municipal clerk in neighbouring towns, returning later to his native city first as district clerk and then as city clerk, also becoming in 1724 Kantor and organist of St Katharina. Majer wrote two musical instruction manuals, *Hodegus musicus* (Schwäbisch Hall, 1718; lost) and the important *Museum musicum theoretico practicum* (Schwäbisch Hall, 1732/*R*, 2/1741; Majer's annotated copy is in *D-Sl*). It is the latter which establishes him among the significant writers on music in the late Baroque. The *Museum musicum* aims to give students self-instruction in the elementary concepts of musical notation (*musica signatoria*) and in the techniques of playing most instruments, including the recorder, chalumeau, flute, oboe, bassoon, cornett, flageolet, clarinet, clarino, horn, trombone, various keyboard instruments, lute, harp, timpani, violin and the viols. His explicit fingering and position charts for each of these instruments provides an unusually clear picture of German Baroque instrumental practice. A succinct introduction to the thoroughbass practice is also informative. Very little of Majer's short work seems to be original. He said the thoroughbass material was taken from an anonymous work of 1728, undoubtedly the *Kurtze Anführung zum General-Bass* (Leipzig, 1728) usually ascribed to a precocious nine-year-old Fräulein von Freudenberg. He drew much of his material from such contemporary writers as Mattheson, Heinichen, Walther and Ernst Gottlieb Baron; and his manual concludes with an abbreviated dictionary of 260 musical terms, almost entirely excerpts from Walther's *Musicalisches Lexicon* which was published in the same year.

Majestoso. *See* MAESTOSO.

Majo [Maio], **Gian Francesco de** [di] ['Ciccio'] (*b* Naples, 24 March 1732; *d* Naples, 17 Nov 1770). Italian composer. He studied with his father, Giuseppe, who from 1745 was *primo maestro* of the royal chapel in Naples, his uncle Gennaro Manno and his great-uncle Francesco Feo. As a boy he assisted his father in the royal chapel in Naples as *organista soprannumerario* without salary. In 1750, on the death of Pietro Scarlatti, he was

appointed to a salaried position, though still on the same supernumerary basis, at one ducat per month, and by 1758 he was second organist, with a salary of eight ducats. Two settings of *Qui sedes*, both dating from 1749, are his earliest known compositions, two of the many sacred works which he composed for the various services of the royal chapel. His first opera, *Ricimero, re dei goti*, was given in Parma and Rome (1759). Goldoni, in his memoirs, recorded Majo's overwhelming reception in Rome: 'A part of the pit went out at the close of the entertainment to conduct the musician home in triumph, and the remainder of the audience staid in the theatre, calling out without intermission, Viva Majo! till every candle was burnt to the socket'. Early in 1760 an attack of tuberculosis forced him to renounce the commission to set Stampiglia's libretto *Il trionfo di Camilla* for the Teatro S Carlo, Naples. Seemingly restored to health after several months' cure at Torre del Greco, he returned to the court at Naples, where he resumed his duties in the royal chapel. Shortly thereafter he set *Astrea placata*, a *componimento drammatico*, performed at the S Carlo in June 1760 with Raaff, Manzuoli and Spagnuoli. With the enthusiastic reception of *Cajo Fabrizio* at the S Carlo in November his fame was firmly established, and he was called on to compose operas for Livorno, Venice and Turin.

During his stay in northern Italy (April 1761 to February 1763) Majo studied with Padre Martini, although an apologetic letter (in *I-Bc*) to the master implies that his studies were erratic because of amorous distractions. After another brief stay in Naples he left in February 1764 for Vienna, where he was invited to compose an opera to celebrate the coronation of Joseph II as Holy Roman Emperor. From Vienna he proceeded to Mannheim, where his *Ifigenia in Tauride* was presented. By May 1766 he was back in Naples but left shortly after for invitations in Mannheim, Venice and Rome. Beset by his old illness he returned to Naples in August 1767, where he sought to strengthen his position at court so as to succeed his father as *primo maestro*; Piccinni had also returned to Naples and was competing for the post. Discouraged by the king's procrastination and constrained by financial need, Majo was forced to undertake further trips to northern Italy to fulfil commissions for new operas. Again in Naples in January 1770 he resumed his activities as second organist and composer of church music. In that year the Teatro S Carlo's new impresario Tedeschi commissioned him to set *Eumene* to celebrate the queen's birthday on 4 November, but by September he was so weak that the opera had to be postponed until the following January. He rallied long enough only to complete the first act, and the opera was finished by Insanguine (Act 2) and Errichelli (Act 3). He died a year and a day before his father, leaving his family destitute.

Mozart, on hearing Majo's music in a church in Naples, described it, in a letter of 29 May 1770 to his sister, as 'bellissima'. The writer Wilhelm Heinse chose Majo as his favourite composer, preferring his melodies to those of Gluck and Pergolesi. In studies of 18th-century opera Majo is often mentioned together with Jommelli and Traetta as one of the three Italian composers who attempted to infuse into *opera seria* those elements of reform now associated with Gluck. Although he accepted the traditional structure of *opera seria*, he was successful in augmenting its dramatic value through an expressive intensification of the music, and through modifications of the aria form. He frequently shortened the da capo aria by omitting a portion of the *A* section on its return, or by completely writing out an abbreviated *ABA* form. The *B* section thus gains a more important position both in proportion and in dramatic interest, while ritornellos are greatly varied and at times omitted. The arias become more realistic through the use of recitative-type declamation and scrupulous word-setting. Melodies are predominantly lyrical, with long lines made sensuous by a pervading chromaticism – a characteristic that may have influenced Mozart. The second themes in the arias are often instrumentally conceived. Although the orchestral accompaniment never assumes a Jommellian complexity, Majo went a long way towards making it independent of the voice, at times elaborating a motif throughout the aria. Viola and woodwind acquire greater prominence, and there is an increased attention to orchestration that is not evident in the works of most of his contemporaries.

In Vienna and Mannheim Majo had the opportunity to work with librettists whose texts approach the reform ideal of Gluck. In *Alcide negli orti esperidi* by Coltellini (1764, Vienna) and *Ifigenia in Tauride* by Verazi (1764, Mannheim) Majo made liberal use of orchestrally accompanied recitative to heighten dramatic intensity and to make fluid connections between numbers. In contrast with traditional *opera seria*, these operas contain lavish spectacle and many choruses and ensembles, often welded into large composite scenes. In *Ifigenia in Tauride* the movements of the sinfonia are used as introductory scenes, a device later employed in Gluck's *Iphigénie en Tauride* (1779, Paris). Majo's *Motezuma*, to a libretto by Cigna-Santi, is one of the few 18th-century operas with a tragic ending. When Majo returned to Italy his operas again became primarily 'singers' operas', cast in the traditional structure of alternating recitative and aria. This same flexibility of purpose is evident in the operas of Jommelli, Traetta, J.C. Bach and even Gluck, and suggests that the opera reform commonly attributed to Gluck was as much the result of national taste as of the composer's vision.

Majo's sacred works contain a dramatic quality achieved through the use of accompanied recitative and striking harmonic dissonances created by his vivid use of chromaticism. His extant repertory of sacred music includes at least 20 motets, four masses, three settings of *Dixit Dominus* and ten *Salve regina* settings. His use of concertante winds, particularly in his *Salve regina* settings, is perhaps the most striking feature of his sacred music. He often employed a group of soloists as an obbligato complement to the solo vocalist. In his single setting of *Et Jesum benedictum* a trumpet, bassoon and oboe work together with the soprano, so much so that even a cadenza is written out by Majo for the soprano and the three soloists. His most common form of motets contain two aria and recitative settings, followed by a shorter aria on the text *Alleluia*. These cantata-like motets use poetic Latin texts which offer a dramatic flavour at times specifically demonstrated by accompanied recitative. Although he lived only to the age of 38 Majo left over 70 sacred works, many of substantial quality.

WORKS

THEATRICAL

opere serie in three acts unless otherwise indicated

Ricimero, re dei goti (P. Pariati and A. Zeno: *Flavio Anicio Olibrio*), Parma, Ducale, 7 Feb 1759, *D-Dl*, *Hs*, *GB-Lbl*, *I-Rc*, *US-Wc*; Rome, 1759, *D-MÜs*, *P-La*

Majo, Giovan Tomaso di. *See* MAIO, GIOVAN TOMASO DI.

Majo, Giuseppe de [Maio, Giuseppe di] (*b* Naples, 5 Dec 1697; *d* Naples, 18 Nov 1771). Italian composer. From 1706 to 1718 he studied at the Pietà dei Turchini in Naples, where his teachers included Nicola Fago and Andrea Basso. His first stage work, the *opera buffa Lo finto laccheo*, was performed at the Teatro dei Fiorentini in 1725. He was *organista soprannumerario* in the royal chapel from 9 May 1736, promoted to *provicemaestro* in August 1737 and to *vicemaestro* in 1744. After the death of the *primo maestro* Leo in 1744, Majo competed for the post the following year against Porpora, Fago and Durante. Of the four judges (Hasse, Jommelli, Perti and Constanzi), only Hasse supported Majo, but the influence of Queen Maria Amalia prevailed, and on 9 September 1745 he became *primo maestro*.

In this post, which he held until his death, his activities as a composer were devoted primarily to sacred music, while his operatic output was sporadic and not marked by any important successes. Only *Il sogno d'Olimpia*, a serenata celebrating the birth of the heir to the throne, was highly acclaimed, perhaps partly because the cast included the renowned singers Tesi, Caffarelli, Conti ('Gizziello') and Babbi. It was on this particular gala occasion that Majo's son Gian Francesco made his first public appearance, at the second harpsichord.

WORKS

Stage (all first performed in Naples): Lo finto laccheo (commedia, 3), Fiorentini, 1725; Lo vecchio avaro (commedia, 3, F.A. Tullio), Fiorentini, carn. 1727; La milorda (commedia, 3), Nuovo, wint. 1728; Erminia (commedia, B. Suddumene, after T. Tasso: *Gerusalemme liberata*), Nuovo, wint. 1729; La baronessa, ovvero Gli equivoci (commedia, Saddumene), Fiorentini, 10 Dec 1729; Egeria (favoletta, G. Torriani), Palazzo Pignatelli, 1732; Arianna e Teseo (os, 3, P. Pariati), S Carlo, 20 Jan 1747, *I-Nc*; Il sogno d'Olimpia (serenata, R. de' Calzabigi, after L. Ariosto: *Orlando furioso*), Palazzo Reale and Teatro S Carlo, 6 Nov 1747, *F-Pn*; Semiramide riconosciuta (os, 3, P. Metastasio), S Carlo, 20 Jan 1751; Il napolitano nelli fiorentini (farsa), *I-Nc*
Sacred: Audite coeli, 2 choirs, 1732, *I-Nf*; Dixit, 8vv; S Agata (orat), 4vv, chorus, Gallipoli, 1752; Mottetto per l'anime del Purgatorio, 5vv, orch, 1754, *Nf*; Salve regina, S, insts, *D-Dl*; Kyrie–Gloria, 5vv, insts, *GB-Lbl**
Other works: Conc., 2 vn, 1726, *I-Nc*; 6 cants., formerly in Herzogliche-öffentliche Bibliothek, Meiningen

H.-B. Dietz: 'A Chronology of Maestri and Organisti at the Cappella Reale in Naples, 1745–1800', *JAMS*, xxv (1972), 379–406, esp. 379–406

DAVID DICHIERA (with MARITA P. MCCLYMONDS)

Major (i). (1) The name given to a diatonic SCALE whose octave is built of the following ascending sequence, in which T stands for a tone and S for a semitone: T–T–S–T–T–T–S. The note chosen to begin the sequence, called the key note, also becomes part of the name of the scale; a D major scale, for instance, consists of the notes D–E–F♯–G–A–B–C♯–D. The descending major scale uses the same notes as the ascending scale.

(2) Any INTERVAL that can be reckoned between the key note of a major scale and a higher note in that scale, other than those called perfect, is called major. From the scale given above one can derive the following: major 2nd = T; major 3rd = 2T; major 6th = 4T + S; major 7th = 5T + S; major 9th = octave + T; and so on. Every major interval is a semitone larger than its corresponding minor interval.

(3) A major TRIAD is a three-note chord which, reckoned from the lowest note, is built of a major 3rd and a perfect 5th; a D major triad, for instance, consists of the notes D–F♯–A.

(4) The name of the mode of a piece, or a section thereof, having as its melodic basis a major scale, and as its harmonic basis the major triad built on the key note of that scale; if the key note is D, the piece is said to be in D major. A piece said to be 'in D' is normally taken to be in D major, not in D minor. *See also* TONALITY.

WILLIAM DRABKIN

Major (ii). A term used to denote the size (rather than function) of an ORGAN STOP.

WILLIAM DRABKIN

Major, Ervin (*b* Budapest, 26 Jan 1901; *d* Budapest, 10 Oct 1967). Hungarian musicologist and composer, son of Gyula Major. He studied composition with Kodály at the Budapest Academy of Music (1917–21) and philosophy at the Budapest Scientific University (1920–24), taking the doctorate in 1930 at Szeged University with a dissertation on the relationship of popular Hungarian music to folk music. After editing the periodical *Zenei szemle* (1926–8) he became a member of the editorial board of the periodicals *Muzsika* (1929–30) and *Magyar muzsika* (1935–6). Concurrently he taught composition and music theory and history, also serving as librarian, at the Budapest Conservatory and its successor, the Béla Bartók Music School (1928–44, 1945–63). He also lectured on the history of Hungarian music at the Budapest Academy of Music (1935–41, 1945–6), and in 1951 he became a member of the musicological committee of the Hungarian Academy of Sciences.

Major's research concerned the history of Hungarian music in the 18th and 19th centuries. He contributed to the development of modern musicology in Hungary with his studies of various Hungarian composers, of the relationship of popular music to folk music, of the Hungarian connections of Bach, Haydn, Mozart, Beethoven and Brahms, and of the foreign influences on Hungarian composers of the period. He also established highly successful methods of research, drawing on the findings of other disciplines, using public and private archives, periodicals and collected editions of music. His compositions include chamber, piano, organ and choral works and arrangements of old Hungarian melodies.

FERENC BÓNIS

Major [Mayer], **(Jakab) Gyula** [Julius] (*b* Kassa, Hungary [now Košice, Slovakia], 13 Dec 1858; *d* Budapest, 30 Jan 1925). Hungarian composer and pianist. He began his musical training at the Buda Conservatory, and from 1877 to 1881 was a student at the newly founded Academy of Music, where he studied composition with Robert Volkmann and the piano with Ferenc Erkel and Liszt. He was a teacher first at the music school of the Zenekedvelők Egylete (Budapest Music Society), and from 1887 at various teacher-training colleges and at the Magyar Zeneiskola (Hungarian Music School) which he founded with Gyula Káldy and Sándor Nikolits in Budapest in 1889. In 1894 he formed Magyar Női Karének Egyesület (Hungarian Ladies' Choral Society), which he conducted for about ten years; he also founded a periodical, *Magyar zenetudomány* ('Hungarian musicology'), in 1907, but only three issues appeared. He was an accomplished pianist and undertook a number of concert tours, mainly in Germany, where his appearances,

like the performances of his compositions, were considerably more frequent than in his native Hungary.

As a composer, Major belongs to the transition period between the Hungarian revival centred on Liszt and Erkel and the folk music orientation of the 20th century. The influence of the German academic approach which he inherited from Volkmann is the dominant feature in his music, and indications of a more national style occur only in details of composition and in the incorporation of folktunes. In his two prize-winning compositions, the 'Hungarian' Symphony op.17 and the 'Hungarian' Piano Sonata op.35, the dual emphasis of nationalistic elements and Germanic formalism is most successfully resolved. The symphonic poem *Balaton* develops further the orchestral language of Liszt's works in this genre, while in Major's later compositions, including the opera *Mila*, the influence of southern Slavonic folk music is increasingly present.

WORKS

printed works published in Budapest unless otherwise stated

Ops: Dalma (4, Major, after M. Jókai), op.19, not perf.; Erzsike (prol, 1, A. Radó), op.41, Budapest, 24 Sept 1901 (n.d.); Széchy Mária (3, Radó), op.30, Kolozsvár, 1906; Mila (folk op, 3, R. Batka and M. Wassermann), op.78, Bratislava, 1913

JÓZSEF UJFALUSSY

Majorano, Gaetano. *See* CAFFARELLI.

Ma Ke (*b* Xuzhou, Jiangsu province, 27 June 1918; *d* Beijing, 27 July 1976). Chinese composer. After leaving his chemistry studies at Henan University, Ma devoted himself to various musical tasks during the war against Japan (1937–45), travelling to the Chinese Communist headquarters in Yan'an in 1939. His work included the development of new forms of music, at once explicit enough to communicate the political message of the Communists and traditional enough to hold the attention of the masses. After the establishment of the People's Republic in 1949, Ma held a succession of influential posts in Beijing, working at the Central Drama School, the China Conservatory and on the editorial board of the Communist Party's principal mouthpiece on music, the monthly journal *Renmin yinyue*. A prolific composer of more than 500 works, his operas have proved the most influential. A significant musicologist in his later years, he commented on such topics as opera reform and wrote a biography of the composer Xian Xinghai, *Xian Xinghai zhuan* (Beijing, 1980).

WORKS

(selective list)

Nanniwan, mass song, 1943; Fu qi shizi [Husband and Wife Learn to Read] (*yangge* folk op), 1944; Bai mao nü [The White-Haired Girl] (op), 1945, collab. Qu Wei and others; Zanmen gongren you liliang (We the Workers are Powerful), mass song, 1948; Shaanbei Suite, orch, 1949

JONATHAN P.J. STOCK

Makeba, Miriam (*b* Prospect, nr Johannesburg, 4 March 1932). South African folk and popular singer. As a child she learned traditional African tribal music and jazz-influenced popular music. She spent several years as a band singer and actress and first attracted attention when she sang the leading role in the African opera *King Kong* in London in 1959. She then went to the USA, where she achieved a national reputation performing in New York night clubs and on television, introducing contemporary African music to enthusiastic American audiences. Her concerts and albums demonstrated an eclectic taste, including West Indian and Israeli folk music as well as Broadway show tunes. She became best known, however, for her interpretations of such traditional and modern songs of the Xhosa and Zulu peoples as the robust *Click Song*, where her strong, dynamic singing recreated the material in a powerful, sophisticated and Western urban idiom. She was also capable of sensitive interpretation in such gentle songs as the Indonesian lullaby *Suliram*, and she performed anti-apartheid protest songs in her campaign against the South African regime. Among her many albums *The Best of Miriam Makeba* (1968) demonstrates her varied talents to good effect. Makeba married the black American activist Stokeley Carmichael, with whom she moved to Guinea, subsequently acting as that country's delegate to the United Nations. Since that time she has performed mostly in Africa and Europe.

CRAIG A. LOCKARD

Makeblite (*fl* Winchester, mid-13th century). English singer. One of three Englishmen described by the late 13th-century theorist Anonymus 4 as 'good singers' of mensural polyphony, who sang with great refinement ('valde deliciose'; ed. F. Reckow, Wiesbaden, 1967, pp.i, 50, 98). The theorist's remark suggests that Makeblite was associated with Winchester Cathedral; nothing more is known of him.

IAN D. BENT

Mäkinen, Timo (Juhani) (*b* Sortavala, 6 June 1919). Finnish musicologist. After matriculating (1938) he studied at the Sibelius Academy, Helsinki (until 1947), and in Zürich under Czesław Marek (1948–52), and had a career as a pianist, recital accompanist and chamber musician in Finland and Switzerland; from 1956 he was also active as a music critic. Concurrently he studied at the University of Helsinki (MA 1947), where he took the doctorate in 1964 with a dissertation on the melodies of the early *piae cantiones* (medieval Finnish student songs). After teaching music at the Jyväskylä Music Institute (1953–5) and high school (1956–62) and in Helsinki at the Sibelius Academy (1963–9), he was appointed professor of musicology at Jyväskylä University (1969–82). His research has included work on the history of music criticism as well as his particular interest, *piae cantiones*, some of which he has edited with Harald Andersén (1972).

ERKKI SALMENHAARA

Makino, Yutaka (*b* Tokyo, 5 July 1930). Japanese composer. He studied the piano with Leo Sirota, Motonari Iguchi and Noboru Toyomasu, and composition with Kósçak Yamada, from whom he inherited a style based on German Romanticism. At the same time, however, he has always pursued an individual course, using characteristic Japanese idioms. In composing operas, for example, he has taken subjects from nō drama, the *kyōgen* or folktales, and he has strongly favoured Japanese instruments in chamber music. Nevertheless, it was his more European music that first gained him recognition: the First Piano Concerto won him the *grand prix* at the 1953 government-sponsored Art Festival, and the First String Quartet received an Argentine Music Festival Prize in 1955.

MASAKATA KANAZAWA

Maklakiewicz, Jan Adam (*b* Chojnata, Mazuria, 24 Nov 1899; *d* Warsaw, 7 Feb 1954). Polish composer and teacher. After initial studies with his father, a country organist, he went to Warsaw to study at the Chopin Music School with Biernacki (harmony), Szopski (counterpoint) and Leopold Binental (violin), and at the conservatory (1922–5) with Statkowski (composition). Thereafter he was a pupil of Dukas at the Ecole Normale de Musique, Paris. Active as a choral conductor from 1916, he was a professor at the conservatories of Łódź (1927–9) and Warsaw (from 1929). In 1932 he was appointed organist of the Holy Cross, Warsaw, where he also worked as a choirmaster and music critic. He was director of the state philharmonic orchestras of Kraków (1945–7) and Warsaw (1947–8).

As a composer Maklakiewicz showed great accomplishment in all genres; Szymanowski in particular regarded his Cello Concerto and other pieces as among the best new works of the period. It was during this time (1928–32) that his work was most experimental, exploring, for example, quarter-tones in *Pieśni japońskie*. Dissonant and percussive, works from this period – the most outstanding being the Second Symphony – are marked by vigour and vitality. This adventurous phase was followed by a period of more prolific and flexible composition for the theatre and cinema. After World War II his works tended towards extreme simplification of texture. (*SMP*)

BOGUSŁAW SCHÄFFER/R

Maksimović, Rajko (*b* Belgrade, 27 July 1935). Serbian composer. He completed postgraduate studies in composition under Milošević at the Belgrade Academy of Music (1965). He joined the staff at the Academy (now a faculty at the University of Arts in Belgrade) in 1963, and in 1975 he became professor of composition and orchestration.

On a Fulbright scholarship he spent a year at Princeton (1965–6) working mostly on electronic music with James Randall. In his more technically accomplished works Maksimović combines neoclassical elements with colouristic techniques associated with the Polish school. This combination is particularly evident in his dramatic works based on Serbian historical sources, for example *Buna protiv dahija* ('The Uprising against Dakhias', 1978) or *Pasija svetoga kneza Lazara* ('The St Prince Lazarus Passion', 1989). Other works betraying a Polish influence include *Tri haiku* ('Three Haiku', 1967) and *Musique de devenir* (1965). He has received several awards, among them the Stevan Hristić prize (1961), prizes from Yugoslav radio and television, the Mokranjac Prize (1984) and the October Prize of the City of Zagreb (1989).

ROKSANDA PEJOVIĆ

Maksymiuk, Jerzy (*b* Grodno, 9 April 1936). Polish conductor and composer. He studied the piano, the violin, conducting and composition at the Warsaw Conservatory. After winning several composition competitions and the Paderewski Piano Competition, he went on to conduct numerous Polish orchestras, including that of the Wielki Theatre in Warsaw (1970–72) and the Polish National RSO in Katowice (1975–7, as principal conductor). In 1972 he founded the Polish Chamber Orchestra, which quickly rose to international prominence, and made several acclaimed recordings; he made his UK début with the orchestra in 1977 and toured with them around Europe, Scandinavia, Japan, Australia and New Zealand, visiting festivals such as Flanders, Lucerne, Salzburg and the Proms. In 1983 Maksymiuk was appointed principal conductor of the BBC Scottish SO in Glasgow, a post he held for ten years. A year before relinquishing it, he was appointed music director of the Kraków PO. He has appeared as guest conductor with orchestras including the LSO, LPO, Tokyo Metropolitan SO, Indianapolis SO, Sydney SO and the orchestra of the ENO, and has conducted numerous world premières, including Krzysztof Meyer's Symphony no.5 (1979), George Benjamin's *A Mind of Winter* (1981), Paul Patterson's Sinfonia for Strings (1983), Birtwistle's *Still Movement* (1984), James MacMillan's *The Confession of Isobel Gowdie* (1990) and Robin Holloway's Violin Concerto (1992). His own compositions include two ballets and several orchestral, choral and instrumental pieces.

Malagueña (Sp.). A type of instrumental piece, song or dance in the flamenco style. It evolved in the late 18th century and the 19th (along with the *rodeña*, *granadina*, *murciana* and *fandanguilla*) from the fandango. Although it bears many marked similarities to the fandango, the *malagueña* is more deliberate and melancholy. Whereas the fandango is most often a couple-dance, the *malagueña* can also be danced by a foursome, the two pairs switching partners as they pass one another. The *malagueña* belongs to the flamenco class known as *cante intermedio*, a song type denoting Andalusian roots as opposed to the more serious and intense *cante jondo* of gypsy origin or the more lighthearted *cante chico*. Its golden age was during the 19th century, when it became the supreme song in the flamenco houses known as *cafés cantantes*.

As the name suggests, the *malagueña* originated in Málaga, but it spread across Spain and to its colonies in the 19th century and is now found in almost every corner of Iberia. Once exported to the Canary Islands it became extremely popular: on the islands the *malagueñas* are sweeter and smoother than their Iberian counterparts and are often accompanied by the Spanish *laúd*, Canaries *timple* and guitar. It was also exported to Mexico where it developed a life of its own in the New World: Mexican *malagueña* texts usually make reference to a Málaga woman or to the sea.

There is enormous variety in *malagueñas*, but several common features are found. Harmonically the predominant chord progression is Em | A–G–F– | Em. The *malagueña* belongs to the third class of flamenco metres or *compases*, using three beat patterns. (The other fandango derivatives and close relatives of the *malagueña* mentioned above are also in triple metre.) Its structure is nearly always in two parts: the *variaciones* or introduction, which articulates the Phrygian scale, followed by the song portion or *coplas*. The *variaciones* are always multiples of four bars in length, ranging from four to 16 bars. The singing style for the *coplas* is typical of flamenco in general, with long-held notes, improvised turns, florid melodic figures and Phrygian cadences. The *coplas*, usually with six phrases, are repeated three times, allowing

the dancers to finish their steps. The poetic texts can have six lines, corresponding neatly to the six musical lines, but more often they are *cuartetas* (four-line octasyllabic stanzas) or *quintillas* (five-line octasyllabic stanzas). Text and music are made to coincide by repeating the first or second line of verse as needed (see Crivillé i Bargalló, p.223). The texts for *malagueñas* are often clever, offering folkloric wisdom, or lighthearted. Grande's study of the poetic and historic elements of flamenco provides many examples of typical stanzas.

Composers who have drawn on the *malagueña* for inspiration include Chabrier (*España*, 1883), Ravel (*Rapsodie espagnole*, 1907–8) and Albéniz (*Suite Iberia*, 1906–8).

Malankar rite, music of the. *See* SYRIAN CHURCH MUSIC.

Malát, Jan (*b* Starý Bydžov, Bohemia, 16 June 1843; *d* Prague, 2 Dec 1915). Czech folksong arranger, teacher and composer. He studied at the Prague Organ School and from 1876 taught singing at schools in Prague. He made his name arranging folksongs: his *Český národní poklad* ('Treasury of Czech folksongs'; Prague, 1884–96), containing 700 songs with his own piano accompaniment, was the best-loved Czech collection of its time. He also wrote standard school songbooks and tutors for the piano (with Fibich), violin, harmonium and flute; his dictionary of musical terms was in use to the end of the 20th century. Through his many piano arrangements he did much to popularize the operas of Smetana. His own compositions, written in all genres, are eclectic and incline towards an amateur market. They include two comic operas in the spirit of Smetana's, Blodek's and Bendl's operas with folk settings: *Stáňa*, performed six times at the Prague National Theatre (1899–1900), and *Staří blázni* ('The Old Fools', 1899–1903) which under the title *Veselé námluvy* ('A Merry Wooing') was performed over 50 times in Prague at the Vinohrady Theatre (1908–1913) and revived in 1940 at the National Theatre.

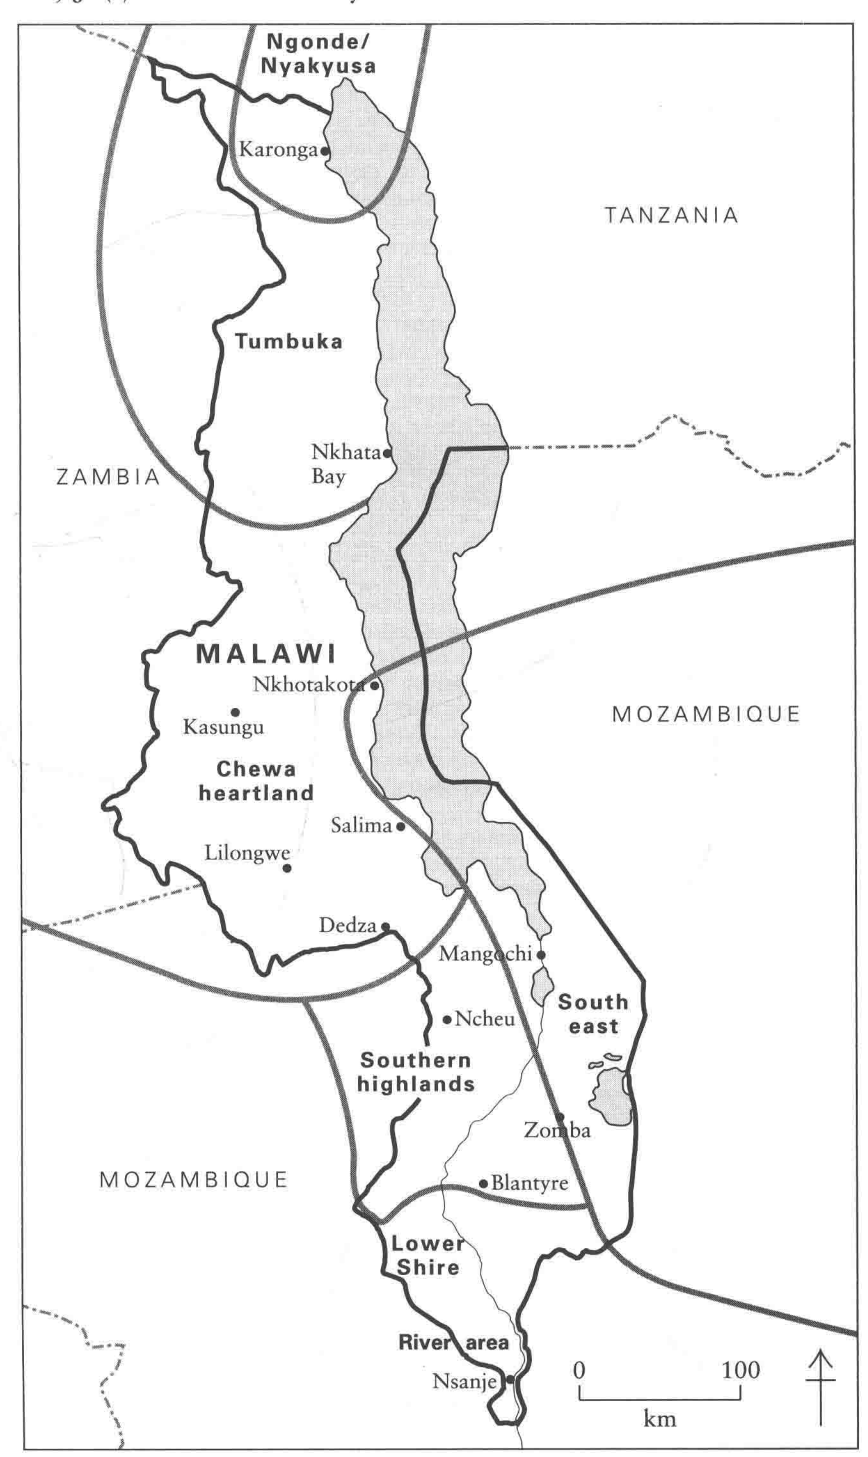
JOHN TYRRELL

Malats, Joaquín (*b* Barcelona, 4 March 1872; *d* Barcelona, ?1912). Catalan pianist. His early studies were undertaken at the Escuela Municipal de Música in Barcelona, where he became a student of J.B. Pujol at the age of 14, winning the first prize for piano two years later. He then spent three years in Paris studying with Charles de Bériot at the Conservatoire, and in 1903 he was awarded the prestigious Prix Diémer, his performances of Beethoven's Appassionata Sonata and Liszt's *La campanella* being singled out as especially remarkable. Tours of Europe and North and South America followed, although he preferred the main focus of his work to remain in Barcelona, where he was active as a teacher and composed a number of salon pieces, of which the Serenata enjoyed considerable popularity.



Malats also appeared in two-piano concerts with Granados and Albéniz, with whom he enjoyed a warm friendship (the vibrant yet controlled virtuosity of his playing helped to inspire the composition of Albéniz's *Iberia*). Malats gave the Spanish premières of all four books of *Iberia*, devoting himself to the mastery of their strenuous complexities despite worsening health. His first performance of the last book took place a short while before his death from tuberculosis.

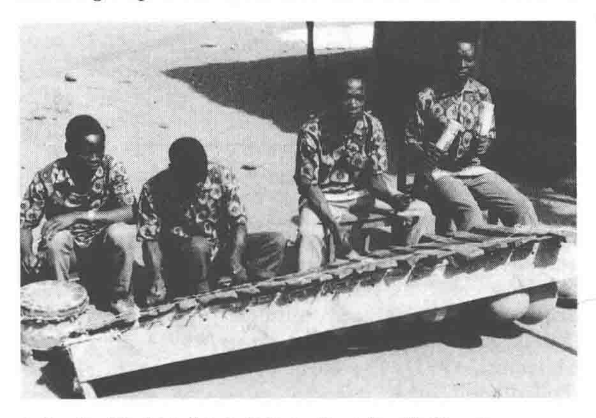
The clarity and colour of Malats's playing, allied to a rare combination of improvisatory flexibility and discipline, represent the Catalan keyboard tradition at its most cultivated, as may be discerned from the few cylinder recordings of him that have survived. Of these, his performances of Liszt's Thirteenth Hungarian Rhapsody and transcription of Wagner's *Liebestod*, in particular, amply justify the legendary status he enjoyed during his brief career.

CHARLES HOPKINS

Malawi, Republic of (Chich. Dziko la Malaŵi). Country in south-central Africa. It has an area of 118,480 km² and a population of 10·98 million (2000 estimate). The official languages are English and Chichewa (Chewa). The name Malawi first appeared on a Portuguese map in 1546, referring to a powerful empire with which Portuguese traders on the Zambezi river had contact. The languages spoken in the former Malawi empire, whose territory covered much of the present central region, part of the southern region and adjacent areas in Zambia and Mozambique, belonged to a dialect continuum now split into Chinyanja (Nyanja), Chichewa and Chimang'anja (Manganja). British influence in the area began in the 1870s. British Protectorate rule over the territory that was to be called Nyasaland was established in 1907. In 1953–63 Nyasaland was part of the Central African Federation of Rhodesia and Nyasaland, ruled from Salisbury (now Harare). The territory gained independence in 1964 under the name Malawi.

1. MAIN MUSICAL STYLE AREAS. Musical traditions in Malawi can be divided into six broad culture-geographical

1. *Map of Malawi showing major culture-geographical areas*



areas (fig.1). Although some musical traits, instruments and dance genres have interregional distribution across the country, six geographic areas demonstrate significant coherence.

(i) Lower Shire river area. Sena music and dance traditions are different from others in Malawi. The following characteristics can be isolated: approximately equiheptatonic tunings of musical instruments; construction of music within tonal-harmonic cycles, usually consisting of four segments; a relationship between Sena and Shona (Zimbabwe) musical cultures, for example in bi-chord sequences, polyphonic singing, *chingolingo* (yodelling) and the use of many different musical instruments (Kubik, 1968; Kubik and Malamusi, 1989; Tracey, 1991; Malamusi, 1995). The music of the Nyungwe, Phodzo (Podzo) and other minority groups in southernmost Malawi also belongs to this style cluster, with some differences.

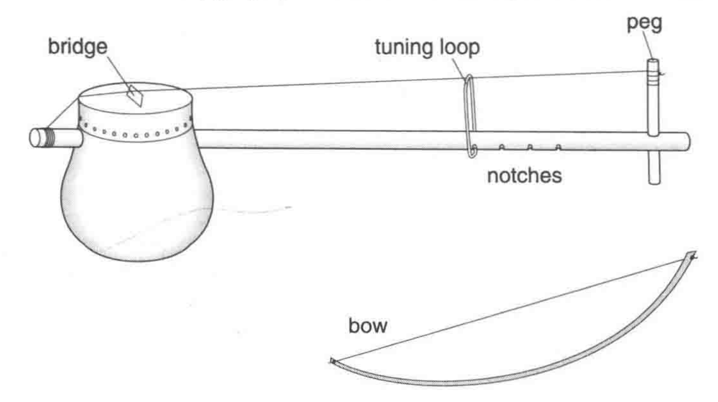
According to regional surveys of Sena music and dance carried out in 1989–95, traditions include dances, solo songs and storytelling and musical instruments. Dances include: *likhuba*, a dance in which everyone participates with drums; *maseseto* and *njore*, women's dances performed at girls' initiation ceremonies, and *mafuwe*, women's dance with hand-clapping. The popularity of dance traditions changes. A popular dance performed by Sena women in 1967 was *utse*, performed by a solo dancer with rapid pelvis movements. Other dance traditions maintain continuous popularity, such as the circle dance performed by men and women around a *valimba* (xylophone). Solo songs and storytelling activities appear in a variety of contexts. Sena women perform pounding songs with elaborate vocal techniques, including *chingolingo*. Some songs contained in stories are organized in a polyphonic style with interlocking texts and syllable phrases (Kubik and Malamusi, 1989). Among the most important musical instruments used by solo performers is the 14- or 16-string *bangwe* (board zither with external resonator). Famous historical performers are the blind *bangwe* minstrel Chamboko Chinamulungu (Kubik and Malamusi, 1989) and Matulo Malulira (*b* 1937) of Tomas village. Two types of mouth-resonated musical bows, *nyakatangali* and *nyakazeze* (friction bow), are used by men for individual music-making. Another individual music-making instrument is a large lamellophone with 26 or more notes laid out in two ranks, usually called *malimba* in Nsanje and Chikwawa districts. Xylophone music has brought Sena musicians international renown.

Valimba (or *ulimba*) is the common name for xylophones heard in the lower Shire river area, usually referring to a large, gourd-resonated xylophone (fig.2). The tuning system is equiheptatonic according to several researchers (Kubik, 1968; van Zanten, 1980; Kubik and Malamusi, 1989, p.29; Tracey, 1991). *Madudu* (gourd resonators) are attached below the keys with rectangular openings cut into the side of each calabash. These openings are closed with a spider's-nest mirliton whose function is to amplify and prolong sound by sympathetic resonance.

Valimba groups also include a *gaka*, a small single-headed drum on three legs and two *nkhocho* (tin rattles) played by one musician. *Valimba* playing is difficult, and many musicians learn at a young age. Famous players have emerged from the lower Shire river area, such as Johnny Zuze (Kubik and Malamusi, 1989). The best-known group of the 1990s is the Kambazithe Makolekole Valimba Band from Lauji village in Chikwawa district. Makolekole and his musicians have already had three concert tours, one to South Africa and two to Germany, and their music has been analysed by Andrew Tracey (1991).

2. *Kambazithe Makolekole Valimba Band, Laujii village in Chikwawa district*

Nyungwe music and dance traditions are related to Sena traditions, but there are important differences. The Nyungwe are known for the *thunga la ngororombe* (panpipe dance) dance tradition (Malamusi, 1992). *Ngororombe* is the name for both the dance and the instruments. The panpipes, made from bamboo, are also called *nyanga*. Several tuned bamboo tubes are joined to make one *nyanga*. They are given individual names according to pitch and compared to members of a family; some names refer to animal sounds such as *kwalila mvuu* (how the hippopotamus roars). The musicians, sometimes 20 to 30 performers, form a circle and move anticlockwise. Each musician holds a *nyanga*, playing complementary patterns based on mnemonic syllables. During dances performers wear *nkhocho* (rattles) wrapped around their right leg. Some of the complex movements have been transcribed by A. Tracey (1992). *Ngororombe* can be played for entertainment, at funerals or for *mizimu* (ancestral spirits).



The music and dance traditions of the Mang'anja represent a different style, in spite of cross-cultural contacts with their neighbours now settled in the lower Shire river area. Mang'anja traditions include: *chitsukulumwe*, women's dance songs accompanied by long gourd rattles filled with grain and struck against the thigh; *alimba*, one-note xylophones played in groups for religious purposes; and *gule wa chimang'anja*, a masked dance in Chimang'anja style. Musical instruments such as the seven-string *bangwe* have a pentatonic tuning.

One-note xylophones have long been established among the Mang'anja; they are associated with demonstrating reverence for ancestors, and are played in groups. Among the Mang'anja one wooden slat is suspended between two curved twigs and mounted on a large calabash. Rubber is glued on to the centre of the slat; its quantity determines the tuning. In groups, *alimba* of different sizes and pitches are used with names such as *thokoso*, *kantiya*, *nkalikali* and *gwagwa*.

Another important Mang'anja tradition is masked performance. Mang'anja secret societies with masks exist in Chief Lundu's home near Matope on the Shire river and downstream as far as Chikwawa, and a Mang'anja group has been established near Chileka in Blantyre district. Mang'anja masked performers wear long, robe-like garments and heads carved of wood, including one woodcarving in the form of a crocodile's mouth. The masked dance is accompanied by a tuned drum-chime without singing.

Mang'anja minstrels are known for playing individual instruments such as the *n'ngoli* (one-string bowed lute) and *bangwe*. In contrast to Sena tradition, the Mang'anja *bangwe* has seven strings. An extraordinary figure among *bangwe* minstrels of the lower Shire was Limited Mfundo (*b* early 1920s) of Namila village. In an interview with Malamusi in 1984, he stated that his musical inspiration came from his maternal uncle who played *n'ngoli*. When his uncle died, he began to play *bangwe* to earn money to pay the poll tax.

(ii) Southern highlands. This area includes roughly present-day Blantyre, Mwanza and Ncheu districts. Hugh

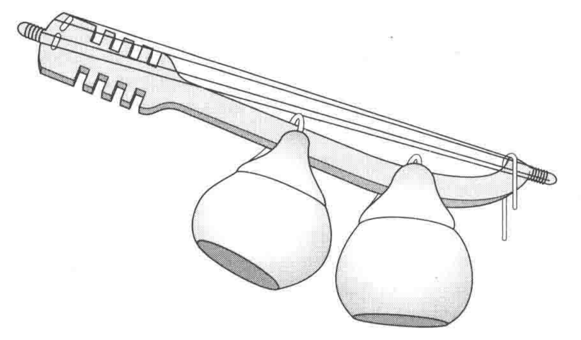
3. *Thakare (one-string bowed lute)*

Tracey recorded Ngoni traditions in 1958 at Njolomole, near Mulangeni, Ncheu district, the residence of the Inkosi ya Makosi Gomani chiefs. He recorded funeral songs, obsequies after funerals and historical fighting songs (Nurse 1966–7; Tracey, 1973).

The *ngoma* warriors' dance is performed with shields and spears by Ngoni descendants and others in many villages (Kubik and others, 1982, p.166; Muyenza and Strumpf, 1983). *Nkhwendo*, a dance performed with long bamboo scrapers (Kubik and others, 1982, p.154), is also attributed to the Ngoni. Another tradition that has been traced back to Ngoni immigration is the performance of the *nkangala* mouth-resonated musical bow; this is played exclusively by women (Kubik and others, 1987, pp.7–13).

Large single-headed wooden *ng'oma* (drums) with tube-shaped extensions were used by the Ambo (also called Antumba) in the 1960s along with a single iron bell for a variety of dances, including *dulila* (Kubik and others, 1982, p.150). By the late 1970s these drums had disappeared. An experienced *bangwe* performer in the same village in 1967 was Murimanthewe (*b* 1940), whose sarcastic songs are still appreciated by audiences who can follow the twists of the language (*Opeka Njimbo*, 1989). Murimanthewe also performed with a small six-note *sansi* lamellophone.

There are several *dzamba* (dance genres) in Blantyre, Mwanza and Ncheu districts. *Kachowe*, a dance performed by men and women at parties with millet beer, can be accompanied by drums or, in their absence, household utensils. *Khunju* is another popular dance genre performed long ago to placate the spirits of those who showed signs of spiritual affliction. Today it is performed on occasions similar to *kachowe*. *Nyimbo za chinamwali* (girls' initiation songs) are still prominent in rural areas. During periods of seclusion and on the occasion of coming-out ceremonies, drums are played by female colleagues and guardians. *Gule wa nkulu* (masked dancing) in the Chipeta style with individual masked characters is widespread. There are many local branches of this secret society in the area (Kubik and Malamusi, 1987; Kubik, 1993, pp.136–60).



A characteristic of southern highlands music-dance traditions in the last 150 years is that most came with massive immigration of people from neighbouring areas. Another characteristic is the strong influence of Christianity and *nyimbo za makwaya* (choir songs). The Christian community has split into rival factions, from established churches such as CCAP (Presbyterian), *Aloma* (Roman Catholic), Seventh Day Adventist etc. to nativistic movements such as *Ziyoni* (Zionists), each with a tradition of *nyimbo za uzimu* (religious songs). *Ziyoni* in particular are known for large military-style drums and vigorous circle-dancing in white gowns. *Ziyoni* and another nativistic religious movement, the Apostolic Church, include spirit possession in their services.

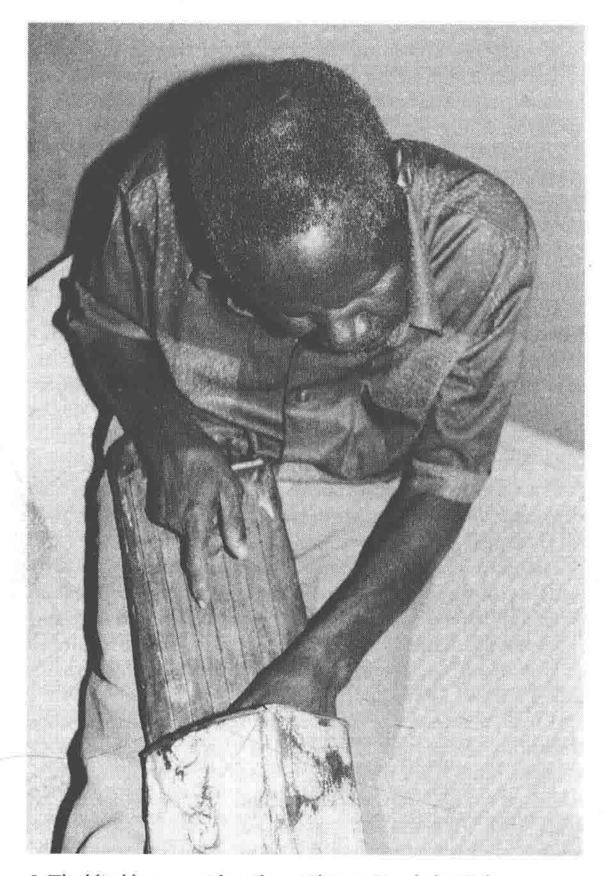
(iii) South-east. This culture area includes the related musical traditions of the Akhokola (Kokola), Alomwe (Lomwe) and Yao. Strong instrumental traditions are a feature of Akhokola culture. A rare type of large, bell-shaped, 15–16 note *sasi* lamellophone was played among musicians of considerable age at the home of chief Kolowiko (Kubik, 1968). The *mambira* is a heptatonic-tuned log xylophone with broad, flat wooden slats attached to banana stems, characteristic of trough-resonated Chuwambo xylophones in Mozambique (Kubik and others, 1982, pp.110–11).

There are several Akhokola traditions common to their neighbours, the Lomwe, such as the *thakare* (one-string bowed lute) in Chikhokhola (Kokhola) and *thangari* in Elomwe, the same instrument known as *n'ngoli* among the Mang'anja and *kaligo* in other places, including Nkhotakota. The one-string bowed lute spread to Malawi and eastern Zambia during long-distance trade in ivory and slaves by the Yao and Bisa in the late 18th and the 19th centuries. It is usually constructed with a long stick pierced through a gourd resonator covered with a lizard skin. Its only string is made of sisal or other material, attached to the stick with a peg and an adjustable tuning loop. The bow often has a string made of palm leaf (fig.3).

Lomwe traditions include a number of popular village dance genres now performed mostly for entertainment, such as *chopa*, *jiri*, *likwata*, *masalimo* and *makhwayara*. *Chipo*, *nantongwe* and *nserebwede* are dances performed to commemorate the deceased, and *lupanda* is associated with boys' initiation. One of the most popular dance genres is *sekere*, performed at beer parties and other social events, accompanied by a set of drums of different sizes, rattles and hoe-blade for striking a time-line.

The Lomwe *shitata*, a seven-note board lamellophone, is now rarely seen. The *mambirira*, a log xylophone usually with seven slats and performed by two boys sitting across from each other, is still common. In the mid-1980s a new music was initiated by Mário Sabuneti, then about 20 years old, at Nnesa village. Inspired by the *sekere* dance, he and his fellow performers constructed a drum-chime of eight tuned drums to be performed by one person. He called his invention *samba ng'oma eight*, with each drum given a distinct name.

4. *Sese (flat-bar zither) of Yona Nnema, near Zomba*



In spite of stylistic affinities, strong Islamic influences on several Yao musical traditions distinguish them from those of the Lomwe, such as Qur'anic recitation by two performers, teacher and student. Other Islamic traditions exist among the Yao, such as *syala*, an annual Islamic meeting and festival and *sikiri*, the local pronunciation of *dhikr*. Among the Yao, *sikiri* has lost some of its original traits such as spirit possession, but it maintains the use of ecstatic guttural sounds produced by the participants, possibly inducing hyperventilation (Thorold, 1993, p.84). Young boys frequent the *madalasa* (Arab: *madrasa*) schools in the mosques, and ancient educational institutions such as *lupanda* for boys and *chiputu* for girls gradually adapted to an Islamic world-view and transformed into *jando* and *nsondo*. The strict gender segregation and the promotion of strong social cohesion among the community of men in Islamic Yao society counterbalances the traditional matrilineal social order.

Trading contacts with the East African coast brought musical instruments such as the *sese* (flat-bar zither) to Malawi. It is now rare, but in 1984 L. Malamusi and Kubik documented a family performance tradition near Zomba, involving a father and his son (Kubik and Malamusi, 1989). A *sese* is constructed of a flat wooden bar with raised frets. Three to four strings are attached along the length of the bar, one passing on top of the frets, the other along the side. One or two composite gourds serve as resonators. By means of a cord these resonators are attached to the bar, but they can be tightened and loosened as required by the musician just by turning the two parts of the gourd diametrically against each other. An additional device serves as a buzzer. On Yona Nnema's instrument the buzzer was a duck quill attached with a fibre cord to the flat bar of the *sese*, just below the fourth string. The quill was bent into the shape of a bridge and brought up from below to within less than half a millimetre from the string. When the musician sounded a string, it vibrated lightly against the quill, resulting in a buzzing timbre (fig.4).

Although log xylophones with banana stem bases were probably known in the Ruvuma river area for centuries, Yao trading contacts contributed further to their dissemination. Among the Yao they are called *mangolongondo*, a representation of the onomatopoeic sound patterns produced by the log xylophone – ngólò-ngòndò. The Yao variety usually has nine or ten wooden slats and is played by two people sitting opposite each other, sometimes joined by a third player who strikes the five-stroke, 12-pulse time-line pattern on the highest-pitched slat. This instrument is often played in the maize fields to scare away baboons (Kubik and others, 1987, pp.31–46). There are two centres of *mangolongondo* playing north of Makanjila in Mangochi district. One centre at Nkopiti village was headed by the virtuoso xylophone player Waisoni Msusa (*b* 1948) who attracted several students, including a musical prodigy, Tawina Mdala, a boy of about eight. The other centre was a compound at Sheik Makonjeni's village headed by Mrs Meriam Amazi, the wife of a xylophone player, who had assembled several young women to play *mangolongondo*. It is not unusual for women to perform on log xylophones in this cultural area.

One of the most important Yao musicians of the late 20th century is the blind *bangwe* player and singer Chitenje Tambala (Malamusi, 1990). Tambala was born around 1922 at Kamwetsa village on the western shore of Lake Malawi. He performs mostly *chantefables*, long narrative texts sung to the accompaniment of his *bangwe* played in the *mokhwacha* technique, in which he strikes all seven strings of his *bangwe* at the same time with the index finger of his right hand, while the fingers of his left hand are placed in between the seven strings in order to dampen strings to produce chords (fig.5). Conforming to Yao tradition, there is a strong tendency in Chitenje's music to use a drone.

One of the oldest pre-Islamic traditions among the Yao is *chindimba*, an entertainment genre in which a percussion beam of the same name strikes a five-stroke, 12-pulse time-line pattern taught with the mnemonic phrase *wankwangu ali koswe* (my husband is a rat). *Chindimba*

5. *The blind bangwe zither player Chitenje Tambala, Makawa village, Mangochi district*

is performed at beer-drinking parties; formerly it was also associated with funerals (Kubik and others, 1987, p.34).

Another important entertainment dance is *m'bwiza*, performed with accordion, rattle, hoe-blade and a large double-headed drum, originating in Mozambique, coming to Mangochi district from Vila Cabral (Luchinga). The most outstanding performer in 1983 was Jonas Chapola (*b* 1933) at Malamya village north of Makanjila (Kubik and Malamusi, 1987). On festive occasions one can also see in Chiyao (Yao) language areas performances of the military-style *beni* dance, imported from Tanzania, and now found primarily in the area of chiefs Mponda and Nankumba.

(iv) Chewa heartland (central region). Essential elements of this population cluster arrived in central Malawi before the 13th century, migrating supposedly from a zone west of Lake Tanganyika, roughly within northern Katanga (Pachai, 1973, p.4; Phillipson, 1977, p.230). The people who founded the historical Maravi empire gradually spread out across the most diverse landscapes. Those who settled along the western shore of Lake Malawi became known as Nyanja (the lake people), and those who populated the high plateau areas are sometimes referred to as Chipeta. The *nyau* or *gule wa nkulu* (the big dance) secret masked society is particularly important among the Chewa. Social scientist Alifeyo B. Chilivumbo (1972) has called this institution the nerve centre of the Chewa people. Numerous researchers have worked on *nyau* since the 1950s, among them John Gwengwe (1965), Antonio Rita Ferreira (1968), J.M. Schoffeleers and I. Linden (1972), Kubik and M. Malamusi (1987) and K.N. Phiri (1982; 1983).

Among the Chewa, *nyau* is also referred to in some parts of Malawi, especially in the south, as *gule wa Achipeta* to distinguish it from the stylistically different *gule wa Chimang'anja*. A masked dance performance in this area often takes place on the occasion of *chizangala*, a last commemorative performance with masks for a deceased member of the secret society (fig.6) *Chizangala* corresponds with *bona* or *chikumbutso* (commemoration) in areas further south.

In this cultural area the term *nyau* is semi-secret and not normally used in public by the members of the society. One particular *chizangala* documented in 1987 took place to commemorate Chief (Mfumu) Miyani a year after his death, and the election of a new Miyani chief. The former chief was an important member of the association. The masked performance began at night, with a period of rest in the early morning, then continuing through the next day. Large quantities of millet beer were brewed for the occasion and brought to the *bwalo* (dance place) to be received by Chief Malili. Different masks appeared in the late afternoon. The onlookers formed a large circle, with the women, in symbolic Chewa fashion, standing in the east, and the group of men in the west.

6. Masked performers at a commemoration feast for a deceased member of the gule wa nkulu secret society among the Chichewa, Mbingwa I village, Central region

The drums accompanying the dance were up against a stand, and included *tete* (with tuning wax in the middle of its skin), *mbalule* (a drum characterized by its cut-out sections along the sides of the body), two *mipanje* and one *gunda* (large, low-sounding drum). Drums were played by initiated men, and both men and women sang. This masked dance accompanied a coming-out ceremony of initiated girls called *chingondo*, in characteristic body paint and head decoration. This performance at Mbingwa I village concluded before sunset with the appearance of a 4 m long, 2 m high animal mask, called *chilembwe*, operated by two men hiding inside, demonstrating masterful coordination during their actions.

(v) Tumbuka. The Ngoni introduced two musical bow traditions to northern Malawi. The *mtyangala* (mouth bow), the more common of the two, is played exclusively by women. It has also spread across Lake Malawi, where it is known among the Wakisi and other peoples in the south-west. Very rare, if not extinct, is the other type of musical bow introduced by the Jere Ngoni, the *ugubu* (also *gubu* and *gubo*). The instrument, a gourd-resonated, unbraced musical bow, up to 1·4 m long, is identical to Zulu and Swazi models, except that the stave of the northern Malawi *ugubu* is made of bamboo. It is played in a vertical position.

Many older traditions among the Tumbuka have survived, such as *mitungu*, female initiation music performed with pots and other percussion instruments, and *vimbuza*, a healing dance. Some of these have been modified under the influence of the Christian missions or revived in new contexts. Considerable research has been carried out on *vimbuza* by Chilivumbo (1972) and Boston Soko (1984). *Vimbuza* is a generic term for both psychosomatic disorders and the dance performed to cure them. It is directed by a *ng'anga ya vimbuza* (doctor of the *vimbuza*). *Vimbuza* can afflict a person suddenly without apparent cause. If *vimbuza* is suspected, then the patient is advised to perform the *vimbuza* dance to obtain relief. The patient wears a particular dance costume, usually a skirt of fibre bound around the hips, and an additional cloth bound around the waist up to the stomach. Iron pellet bells are attached to the patient's left leg. Men often wear a special headdress made of bird feathers and animal skin. The dance is accompanied by *ng'oma* and *mohambo* drums (Kubik and others, 1987, pp.79–83). Under the guidance of the *ng'anga ya vimbuza*, the patient may dance all night without speaking to anyone, finally falling into a deep sleep. The ceremony may be repeated. *Vimbuza* is also known under several other names, such as *virombo*, *mphanda*, *kachekuru* and *fumuzapasi* (Kubik and others, 1982, p.146).

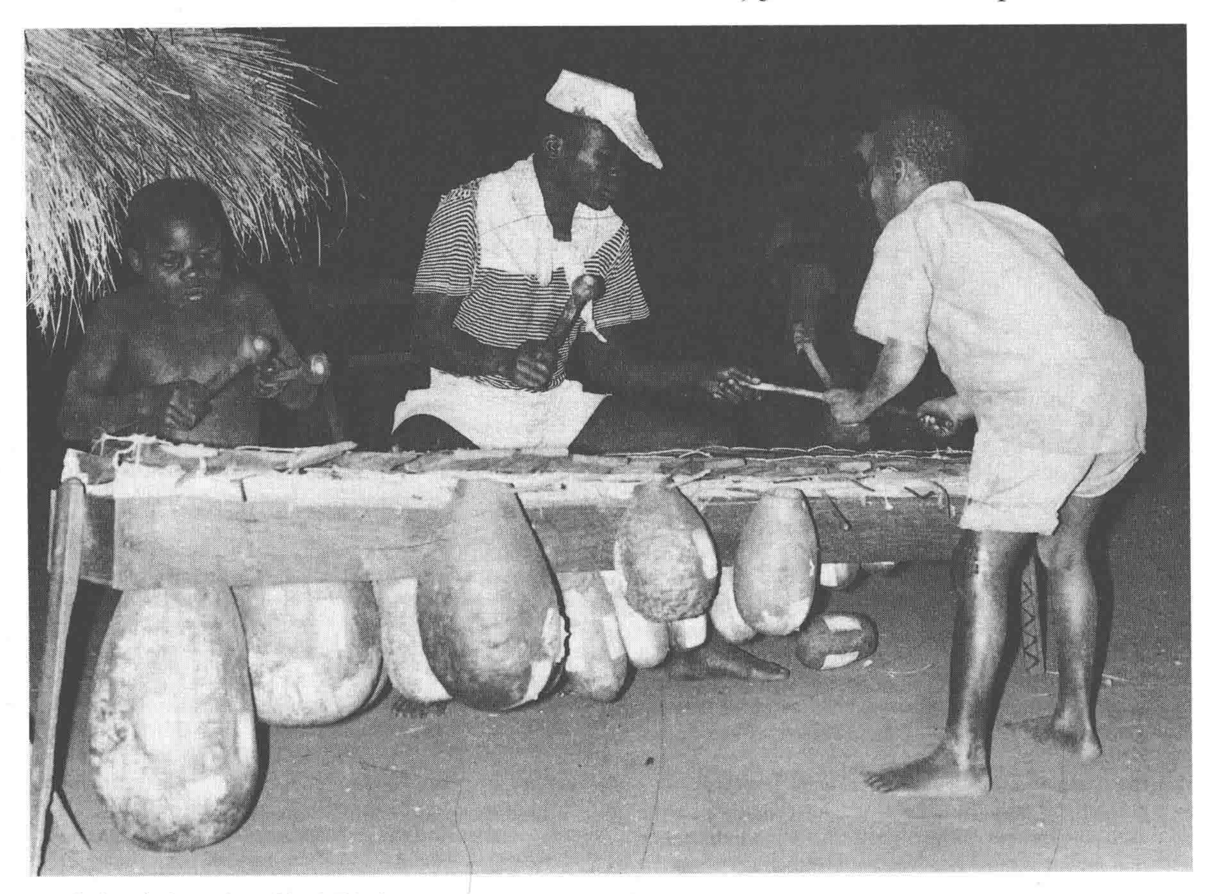
Vimbuza and other dance genres have been used in the therapeutic activities of contemporary Tumbuka prophets who emerged as a nativistic reaction to Christian teachings, incorporating Christian-inspired practices and ideas in to their world-view. The most famous *nchimi* (healer, prophet) also known as *nchimi ya zinchimi* (prophet of

all prophets) was B. Chikanga Chunda who originally operated out of Thete village in Rumphi district. In the early 1960s Chikanga, still a young man, was assisted by a well-organized team, and thousands of people were attracted, particularly from Tanzania, to his domicile. Most visitors had been accused by their home communities of witchcraft practice and forced to see Chikanga for verification. In addition, people suffering from physical and psychological problems flocked to Chikanga, seeking a cure. Chikanga and his assistants created a vast repertory of songs rooted in Tumbuka harmonic patterns (with a clear Christian influence) for use during his healing sessions. Chikanga received his clients individually, always with uninterrupted singing in the background. His personnel included a choir leader who coordinated the visitors' participation. Chikanga's activities, suppressed by both Christian missions and government administration, were restudied by M. Malamusi, L. Malamusi and Kubik in 1987.

The Tonga were an important resource for migrant labour from the earliest stages of European penetration into Nyasaland. Since 1982, approximately 4000 Tonga labourers were employed annually by European farmers in the Shire highlands; others were among the earliest migrant labourers to southern Africa and the Copperbelt in Zambia. In World War I a considerable number of Tonga were recruited as soldiers. The style and form of British military parades, called *malipenga* (bugles), inspired the imagination of youths in Tongaland soon after World War I, originating in the area of Nkhata Bay. When members of the King's African Rifles returned from the war, young boys who saw military parades imitated the brass bands with home-made instruments. They made bugles from long gourds with a spider's-nest mirliton attached to the end hole, thus producing a type of kazoo. Military-type drums were adopted from a parallel development of military burlesques known in many areas of Malawi and Zambia as *mganda*. *Malipenga* soon spread from Tongaland to the neighbouring Chitumbuka (Tumbuka)-speaking areas. There it became a tradition with membership rules and prescribed internal hierarchy. Up to 50 men participate in a *malipenga* parade. The dancers dress in shorts and stockings, and most are equipped with walking sticks as they dance with calculated mannerisms.

Malipenga, *mganda* and related men's activities also reflect the culture of women. *Chiwoda*, a women's dance of the northern Lake Malawi area, is another example of the Africanization of Western military music. Another military-related performance genre by Tumbuka women is *visekese*, drawing on similar sources during World War I. Sociologically, it is a creative response by females to men's parade dancing. *Visekese*'s social function is analogous to *chiwoda*, although its form, style and instrumentation are different.

Visekese is performed with raft rattles also referred to as *visekese*. These rattles are made by women from the stalks of a strong grass called *sekera*. For the construction of a raft rattle, many stalks are tightly joined and plaited around three cross-sticks, each about 1 cm in diameter. The flat, hollow space that is created is then filled with small red grains from the *katumbwe* shrub; *visekese* are filled with maize grains. The rattles are played by rocking them from one hand to the other; both hands hold it firmly, and the left and right thumb tap the rattle's surface. The women form a circle, each holding a rattle; in the centre are two dancers. The music is organized in alternation between two lead singers and chorus responding in two-part pentatonic harmony. The sound pattern produced by the rattles represents the use of cymbals in military-style marching bands, reinterpreted to such an extent, however, that a shuffling swing rhythm results. Raft rattles were probably known in northern Malawi long before the rise of this dance. They are widely distributed throughout East Africa. New to *visekese* dance was the use of an indigenous instrument to portray a foreign, fashionable instrument beyond the purchasing power of the rural communities. Thus, the sound of cymbals of military parades was recreated.



7. The ingoma warrior dance of the Ngoni people Blantyre District

(vi) Ngonde/Nyakyusa. The Songwe river is only a nominal border between Malawi and Tanzania. The Ngonde who settled between the North Rukuru and Songwe rivers are closely related to the Nyakyusa in Tanzania. Culturally different from the Tumbuka, Ngonde use musical instruments such as the trough zither and cylindro-conical drums with cord lacing that are prominent in areas further north, in western Tanzania up to Lake Victoria.

When a Swahili Arab named Mlozi set up a trading base at Karonga about 1880, the relative isolation of the Ngonde and Nyakyusa was broken. The presence of *mangolongondo* (log xylophones) among the Nyakyusa and Ngonde, absent among all neighbours, is an indication of a late 19th-century import through trading contacts.

The tradition of *indingala* has made Ngonde musical culture widely known in Malawi. Historically, this music was played with drums and without singing on the occasion of the death of a very important chief. *Indingala* was the name of the biggest drum used for transmitting news of the death. Nowadays, *indingala* is played on

8. *Valimba xylophone players Nsanje District*

various occasions, with three cylindro-conical drums carried by young men while dancers form two front rows, boys and girls on opposite sides. This modern version of *indingala* became widely known after Malawi's independence in 1964; it was promoted in this form at festivals and political rallies by Dr H. Kamuzu Banda's government which reacted to the dance's prohibition under previous colonial regimes. In its older form, it often instigated violence, according to Chief Kyungu's testimony (Kubik and others, 1982, pp.148–9).

2. MODERN DEVELOPMENTS. After World War II a wave of musical innovations occurred in schools and churches and in popular dance. Staged performances became popular under names such as *makwaya* (choirs) and *konseti* or *kamsoloti* (concerts), the latter sometimes involving tap dancing. The radio, cinema and gramophone introduced popular American, South African and other musical styles to Malawi. The ease in communication and increased labour migration to the south and to the Copperbelt were now major factors that contributed to the rapid spread of distinct guitar-based styles throughout southern Africa: *sabasaba*, *sinjonjo*, *vula matambo* and other dance genres characterized the 1950s. The acoustic guitar, the banjo (Kubik, 1989) and the accordion became the basis of new dance musics. Ballroom dancing became a fashion during the 1940s (Malamusi, 1994, p.57) and is remembered as the *jore* dance, described as *dansi yogwilana-gwilana* (dance with men and women holding each other).

War veterans returning from Burma, including James Kachamba, father of the eminent Kachamba brothers (*see* KACHAMBA, DANIEL), had a share in the rise of the new traditions. Among the first Malawian guitarists and banjoists to be recorded and popularized on gramophone records were labour migrants such as Banti Chapola who was recorded by Tracey in Harare in 1948. By the mid-1940s distinctive guitar styles arose in several parts of the country. Chileka near Blantyre was one focal point researched in great detail by M. Malamusi (1994); interviews were conducted with guitar veterans such as Mofolo Chilim'bwalo, Soza Molesi, Deko Sato and others. Another focal point was Zomba, where the Paseli Brothers Band gained momentum in the late 1940s. Like other early groups, the Paseli Brothers were first recorded by Tracey in Harare for the Gallotone Company. Their song texts commented on topical social concerns. Like other early dance bands, the instrumentation of the Paseli Brothers was guitar, banjo, drum, rattles and a hoe-blade used to strike a time-line pattern.

Popular dance musics of the late 1940s spread rapidly even to remote areas due to the impact of rising mass media: 78 r.p.m. gramophone records and radio broadcasting. During the 1950s the Federal Broadcasting Corporation, based in Salisbury, Rhodesia, made recordings in Nyasaland, and broadcast from Lusaka. Only in 1959 did the FBC establish a transmitter in Zomba that was later transferred to Blantyre. This new branch of the FBC carried out its own local recording programme, recording mostly school choirs. These recordings are

preserved on 78 r.p.m. shellac discs at the Malawi Broadcasting Corporation Archives in Blantyre-Chichiri.

In contrast to the radio station, Indian-owned business enterprises in Blantyre-Limbe began to record popular music that they knew would sell. Most of these shellac discs have not survived; only a few exist in private collections. One of the most famous groups recorded during the 1950s was the Ndiche Brothers Band. Ndiche Mwarare (*d* 1991), born in Ntcheu, began playing guitar in 1953. By 1958 he was nationally known for his *hauyani* (Hawaiian) style of guitar playing, using a glass bottle 'slider' in his left hand and finger-picks on the thumb and index finger of his right hand. During the time of struggle for independence of Malawi, he often accompanied Banda, the future president, to political rallies. He was employed by the Malawi Broadcasting Corporation from 1965 until his death.

In the 1970s and 80s popular urban dance music was dominated by night-club bands using electrically amplified instrumentation, mostly emulating current African popular styles from South Africa, Zimbabwe, East Africa and the Democratic Republic of the Congo, and adaptations of reggae. In rural areas travelling bands of young musicians with home-made banjos or guitars countered the decline of live musical performance in the 1990s with public bars dominated by commercial cassettes played from powerful loudspeakers and juke boxes. One remarkable group of adolescents in the 1980s was the Fumbi Jazz Band.

In the 1980s and early 1990s, there were four composers and performers of popular music who transcended the imitation of foreign models and developed distinctly personal styles: Daniel Kachamba, blind singer-guitarist Allan Namoko (Mmeya, 1983; Kubik and others, 1987, p.29), blind banjoist Michael Yekha and multi-instrumentalist Donald Kachamba.

3. Research. Malawi is among the most thoroughly documented countries of Africa with regard to music and dance. Early cylinder recordings of Ngoni songs are kept at the Smithsonian Institution, Washington, DC, and accounts by travellers and colonial administrators go back to the second half of the 19th century. Systematic ethnomusicological research, however, began only after World War II.

Hugh Tracey undertook three recording tours into Nyasaland (1949, 1950 and 1958), recording extensively among the Chewa in the central region, the Mang'anja in the southern region, Chitumbuka-speaking people of northern Malawi and among the Yao of the western lake shore. These recordings were published in the AMA *Sound of Africa* series (Tracey, 1973). He also documented historical traditions such as praise-songs for chiefs and military and funeral songs of the Ngoni. In 1967 Maurice Djenda and Gerhard Kubik undertook a survey of musical traditions, and the collection of their audio and video materials is archived at the Musikethnologische Abteilung, Museum für Völkerkunde, Berlin, and at the Learning Resources Centre, University of Malawi, Zomba. The research team of Kubik, Moya A. Malamusi, Lidiya Malamusi and Donald Kachamba carried out an intensive study of initiation (*jando*, *lupanda*, *chinamwali cha akazi*) in the *nyau* masked secret society, children's games, *nthano* (storytelling), *dzidapi* (riddling) and music-dance education in rural areas of the southern region (1982–4).

The establishment of the Oral Literature Research Programme at Chileka, Blantyre District, by M.A. Malamusi (1989) included a systematic, continuous field research programme covering music and oral literature in Blantyre, Mwanza, Chikwawa, Mulanje, Mangochi, Thyolo, Machinga, Chiradzulu, Ntcheu and Nsanje districts. A collection of tape recordings, photographic documentation and objects is preserved in the programme's ethnographic museum. Several publications have resulted from this programme.

GERHARD KUBIK, MOYA ALIYA MALAMUSI

Malawski, Artur (*b* Przemyśl, 4 July 1904; *d* Kraków, 26 Dec 1957). Polish composer, conductor and teacher. He studied the violin with Chmielewski at the Kraków Conservatory, where from 1928 to 1936 he gave violin classes and lectured on theory. In 1936 he entered the Warsaw Conservatory to study composition with Sikorski and conducting with Bierdiajew. He taught composition and conducting in Kraków (1945–57), where his pupils included Penderecki and Schäffer, and conducting in Katowice (1950–54). In addition, he was president of the Polish section of the ISCM (1948–51, late 1957). His conducting activities were restricted largely to his own works; he gave his greatest energies to composition.

Though he was in no way a remarkable personality, Malawski's fate was an unusual one. He had already reached a mature age when, after a period of self-tuition, he began formal studies in composition. Then the war broke out, and he was eventually left with only a few years of intensive creative activity. This brought him certain fame, but, as a radical at a time when Polish music was at its most conservative, he was also subject to hostility and neglect. When the attacks subsided, Malawski was ill and completely discouraged: he could produce only incoherent works. Thus, despite his quite exceptional talents, his achievement was regarded as no more than mediocre.

In an independent and expressive style he synthesized many of the current streams in European music, achieving perhaps the most organized union of these tendencies with the tradition of Szymanowski. Among the invariable features of his music are a distinctive lyricism, an architectural conception of form, an original rhythmic motivic style and an element of the grotesque. These characteristics are already present in the *Allegro capriccioso* for small orchestra (1929). In other and more numerous ways, however, Malawski's style developed, accumulating, in particular, polylinearity, a polymetric ostinato technique, a non-functional harmonic approach, complexity on a grand scale and a technique of attaining formal continuity by motivic development.

Malawski's output may be divided into four periods. In works of the first (e.g. the *Allegro capriccioso*, the Sinfonietta, the orchestral Variations and the cantata *Wyspa gorgon*, 'Gorgon's Island') he was influenced by composers of the two preceding generations, and in particular by Debussy. But at the same time he was crystallizing an individual world of formal and expressive interests, exposed to greatest advantage in the colourful and disciplined Variations (1937). A gradual retreat from the influence of others came in the second-period compositions (the First Symphony, the first version of the ballet *Wierchy*, 'The Peaks', and, above all, the Second String Quartet); indebtednesses to predecessors (notably Szymanowski) remain but are now less patent. In the third period Malawski wrote his finest, most effective and most audacious pieces, including the Toccata for small orchestra, the *Etiudy symfoniczne* for piano and orchestra, the Overture, the *Toccata i fuga w formie wariacji* for piano and orchestra and the new version of *The Peaks*. These represented a total retreat from the late Romanticism which had survived in Polish music, even under the direct influence of Szymanowski, until after World War II. In his fourth period, however, with such works as the Piano Trio, the Symphony no.2 and *Hungaria*, Malawski renounced his earlier line for an intense, dramatic, Romantic expressiveness. There is a distinct analogy with the late syntheses achieved by Szymanowski, Bartók or Martin (whose music Malawski rated very highly); and, as in the case of these composers, the period of synthesis saw a decline in radicalism.

WORKS
(*selective list*)

STAGE AND ORCHESTRAL

Stage: Wierchy [The Peaks] (ballet-pantomime, J. Mazur), S, T, Bar, chorus, orch, *c*1942, rev. 1950–52, concert version, Kraków, 10 Jan 1952; A Midsummer Night's Dream (incid music), fl, ob, eng hn, cl, bn, hn, perc, hp, 1954; other incid music
Orch: Allegro capriccioso, small orch, 1929; Wierchy, sym. sketch, 1934, destroyed; Sinfonietta, 1935; Fuga w starym stylu [Fugue in the Old Style], 1936; Wariacje symfoniczne i fuga [Sym. variations], 1938; Fantazja ukraińska, 1941; Sym. no.1, 1938–43; Etiudy symfoniczne, pf, orch, 1947; Toccata, small orch, 1947; Ov., 1948–9; Toccata i fuga w formie wariacji, pf, orch, 1949; Tryptyk góralski [Highland Triptych], 1950 [arr. of pf piece, 1949]; Suita popularna, 1952; Sym. no.2 'Dramatyczna', 1953–6; Hungaria, 1956

VOCAL

Choral: Wyspa gorgon [Gorgon's Island] (cant., T. Miciński), S, Bar, chorus, orch, 1939; Stara baśń [Old Tale] (cant., I.I. Kraszewski), 1950; Mała suita [Little Suite] (A. Zelenay, J. Brzechwa, J. Porazińska, J. Tuwim), male chorus, 1952
Songs: Słopiewnie (Zielone słowa [Green Words]) (Tuwim), 1935; Nike z Cheronei (S. Magierski), Mez, pf, 1943; 3 pieśni dziecięce [3 Children's Songs] (J. Korczakowska, J. Osińska, Brzechwa), 1949; Do matki [To mother] (J. Słowacki), Mez, pf, 1950
Melodramas: Czarcia huśtawa, Ziabia ballada, spkr, fl, ob, eng hn, cl, b cl, bn, 1934

CHAMBER AND SOLO INSTRUMENTAL

For 3–6 insts: Str Qt no.1, 1926, destroyed; Sextet, 2 vn, 2 va, 2 vc, 1932, destroyed; Żywioły Tatr [Elements of the Tatras], wind qnt, 1934, partly destroyed; Str Qt no.2, 1941–3; Pf Trio, 1951–3
For vn, pf: Andante, Recitativo misterioso, 1928, destroyed; Bajka [Fairy Tale], 1928, arr. vn, orch; Burleska, 1940; Andante i allegro, 1949; Mazurek, 1950; Sonata na temat Janiewicza, 1951; Siciliana i rondo na temat Janiewicza, 1952
Pf: Mazurek, 1946; 5 miniatur, 1947; Tryptyk góralski [Highland Triptych], 1949, orchd 1950

Principal publisher: Polskie Wydawnictwo Muzyczne

BOGUSŁAW SCHÄFFER/R

Malayev, Ilyas (*b* Mary, Turkmenistan, 12 Jan 1936). Bukharan musician, oral traditional composer and poet. Growing up in Kattakurgan, a small city near Bukhara, now in the republic of Uzbekistan, he played the *ṭanbūr* from an early age and learnt the *shash makom*, the orally transmitted court music tradition of the later Bukharan feudal nobility, from local teachers as well as from phonograph records. In 1951 Malayev moved to Tashkent, the capital of Soviet Uzbekistan, where he performed in a succession of state musical ensembles including the Uzbek Song and Dance Ensemble (1952–60), the Ensemble of Singers and Dancers of the Peoples of the World under the direction of Tamara Khanum (1953–6), the Folk and Variety (*Estrada*) Orchestras of Uzbekistan Radio (1956–62), and from 1962 to 1992, the Symphonic Variety (*Estrada*) Orchestra of Uzbekistan Radio. Malayev became popular in Uzbekistan as a vaudeville performer and wedding entertainer, combining comedic routines, poetic recitation, excerpts from the *shash makom* and songs, many with his own texts and melodies. In 1992 Malayev emigrated to Queens, New York, where he quickly established himself as a leading cultural figure in the Bukharan Jewish émigré community. As the music featured at weddings and other social events in the émigré community has moved towards hybrid forms of popular music performed by a younger generation of musicians, Malayev's focus has turned to the classical *shash makom*. Leading a group of fellow Bukharan Jewish singers and instrumentalists known variously as Maqam-i Nawa and the Ilyas Malayev Ensemble, Malayev has become well known among 'world music' audiences in the USA and Europe for his interpretations of Bukharan classical music.

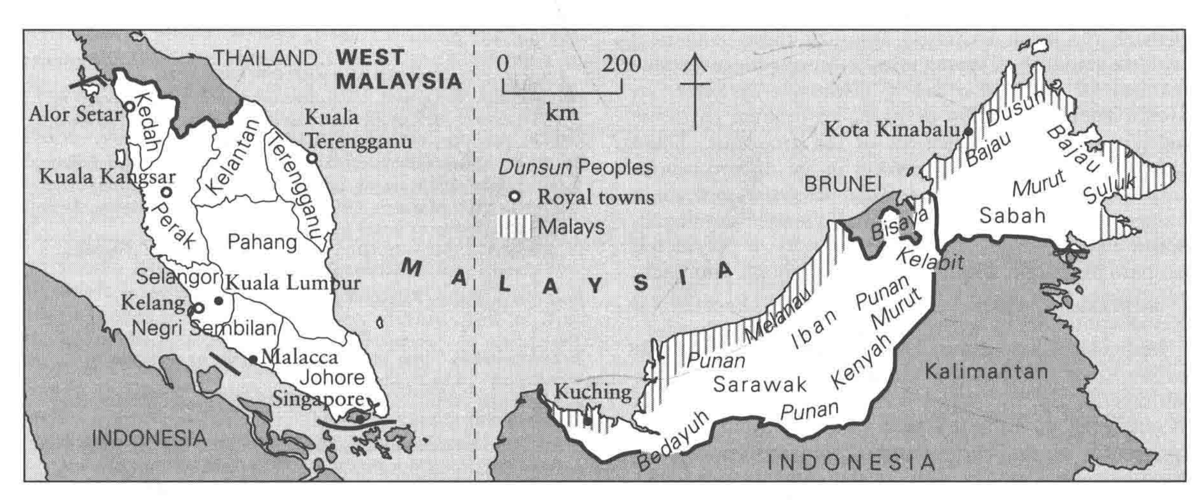
THEODORE LEVIN

Malaysia, Federation of (Malay Persekutuan Tanah Malaysia). Country in South-east Asia. The federation consists of 11 states of Peninsular (or West) Malaysia and the two states of Sabah and Sarawak on the island of Borneo to the east.

The transliterations used here largely follow the system in M. C. Ricklefs and P. Voorhoeve, *Indonesian Manuscripts in Great Britain* (Oxford, 1977). This is based on the official orthography for Indonesian and Malay adopted in 1972, and that proposed for Javanese in 1973, with the following exceptions: in Javanese ḍ and ṭ (in Sudanese and Malay *d* and *t*) are used rather than *dh* and *th*; *ĕ* is used for the vowel sound as in the second syllable of 'fallen' and unmarked e for the vocal sound in 'set' or 'fate'; *c*, consistent with the new orthography, represents English *ch* as in 'chair'.



I. West Malaysia. II. Sabah. III. Sarawak.

I. West Malaysia

West Malaysia is the peninsula stretching from Thailand to Singapore. Since its development as the crossroads of an important trading route between India and China, it has been the home of several peoples and now has a multiracial population, with groups (in descending order of numbers) of Malays, Chinese, Indians (with Pakistanis), Thais, *orang asli* (aborigines) and Eurasians (for map, see fig.1).

1. The Malays: (i) Instruments (ii) Ceremonial music (iii) Theatre music (iv) Dance music (v) Social popular music (vi) Vocal genres. 2. The *orang asli*. 3. Chinese, Indian and Thai communities. 4. Art music.

1. THE MALAYS. Types of indigenous Malay music are many and varied and reflect the character of the various regions on the Malay peninsula from which they come. The northern states of Kelantan, Kedah and Trengganu maintain rich musical, dance and theatrical traditions, while the southern states and particularly those on the west coast of peninsular Malaysia show a strong bias towards Western European performing arts. Traditional music consists of folk, classical (or court) and syncretic types. Much of the traditional music is associated with

1. *Map of Malaysia*

2. *Drummers from Kelantan playing rebana ubi (single-headed drum)*

drama and dance, and there is also a largely undocumented tradition of vocal music.

(i) Instruments. Drums and gongs in particular play a central role. Membranophones are numerous and varied. Tubular drums appear in cylindrical and elongated barrel shapes. The *gendang* double-headed barrel drum, especially important in many ensembles, appears in two sizes, the larger called *ibu* ('mother') and the smaller *anak* ('child'), tuned by rattan laces and held horizontally in the player's lap (or sometimes on a wooden stand) and hit with the hands, or with rattan or stick beaters.

The REBANA is a single-headed frame drum, with the drum head laced to the body, related to the *duff* of the Middle East. It appears in many forms and sizes: *rebana berarak* (with a deep wooden frame and large head), *redap* (shallow frame and large head), *rebana kercing* and *tar* (shallow frame with metal discs or jingles inserted into the frame and a small head); all are struck with the hands. The *kompang* is a shallow frame drum without jingles in small to medium sizes, with a single head tacked to the body, while the *hadrah* frame drum has the same basic construction as the *kompang* but with brass jingles.

Also called *rebana* but with a cone-shaped body, the *rebana besar* and *rebana ubi* (fig.2) are massive in size and originate from the state of Kelantan; between the circular brace at the base of the body and the lower rim of the body are inserted 15 or more large tuning wedges. The *rebana besar* is always hung vertically and accompanies the singing of *zikir* (religious texts; *see* §1(vi) below) or, in sets of three or more, is beaten with the hands to play interlocking rhythmic patterns for entertainment. The *rebana ubi* is slightly smaller; it may be hung or set on the ground, usually with the head in a vertical position, and is played with the hands or a padded beater. Two men often beat a single drum in interlocking rhythmic patterns, and ensembles of four or more drums play in an interlocking style.

The *gedumbak*, a wooden goblet drum with an open base, is placed horizontally in the player's lap; the head is struck by the hand and fingers while the other hand closes and opens the base to produce specific timbres. Like the *gendang*, this drum appears in large and small sizes.

The *geduk*, a short barrel drum (also in two sizes) with its heads glued and pegged to the body, is placed vertically and supported by two wooden or rattan struts so that one drum head, which is struck with a pair of wooden beaters, faces the player.

The most common idiophones are gongs, which function as time-marking instruments in most Malay ensembles. The largest is the *tawak* (also *tetawak*), usually made of bronze with thick walls, a central boss and deep rim; these are hung vertically in pairs and produce a low and a high pitch when struck on the boss with a padded beater. There is also a slightly smaller hanging gong with thin walls, called *mong*, in north Malaysia and south Thailand.

The gong-chime with two to six (or more) gong kettles placed horizontally in a wooden rack is called *canang* in Malay theatrical ensembles and *caklempong* in the Minangkabau musical traditions of Malaysia and Sumatra. A slightly larger pot-shaped gong, also suspended horizontally in a frame, called *mong*, is used in the *wayang kulit Melayu* of north Malaysia and in ensembles of southern Thailand.

The *kesi* and *cerek* (*krek*) are concussion idiophones. The *kesi* is a set of hand cymbals with a central boss and flat rim. One pair of *kesi* is held in the hands and struck against another pair attached to a piece of wooden board, producing ringing and damped timbres. The *cerek*, used by the Thai in the theatre genre *menora*, consists of two thin pieces of bamboo that are struck together. These instruments also function as markers of time in their respective music ensembles.

The *kertuk kelapa*, a single-bar xylophone with a large coconut resonator (fig.3), appears in ensembles of four or more that play a repertory of interlocking rhythmic patterns, often in competitions between rival teams. The idiophone known as *kertuk kayu*, *kertuk buluh* or *gambang tali* is also a xylophone with horizontally suspended wooden or bamboo tubes, played with a wooden beater. Another idiophone, ANGKLUNG, formerly used only in the ensemble for the *kuda kepang* horse trance dance of Johore and Selangor, is now a popular instrument in schools, appearing in large sets tuned to diatonic scales.

Another percussion-dominated ensemble, the gamelan, brought to the Pahang court from the Riau Islands of Indonesia, was used to accompany dances known as *joget* in the early 19th century. By the early 20th century *joget gamelan* was established at the neighbouring court of Trengganu, where it continued to flourish until World War II. It was revived in 1969 and today is used to play newly composed repertory by Malaysian composers and to accompany modern dance dramas.

In the southern state of Negeri Sembilan the Minangkabau peoples perform *tambuk kalang*. Originating from the pounding of rice with a mortar and pestle, *tambuk kalang* is folk entertainment that sometimes includes dramatic sketches told through the singing of *pantun* (four-line verses). The mortar, supported in a frame, is struck in different places with at least four different sizes of pestles to produce specific timbres in an interlocking style, purely for entertainment or to accompany the singing. Sometimes the *seruling* (duct flute), *rebana* and *caklempong* gong-chime are added to the ensemble.

The chordophone used in Malaysian folk music ensembles is the *rebab tiga tali* (fig.4), a three-string spike fiddle that is greatly respected because of its supernatural associations. Its heart-shaped soundbox is usually made of hardwood, and its sound-table is made with skin from a cow's stomach or a buffalo's bladder. The neck consists of the upper section of a wooden shaft that runs through the soundbox; the head often resembles a Khmer or Thai crown. The three strings, passing over a small bridge to the lateral tuning pegs, are played with a gracefully arched bow strung with coconut fibre or plastic fishing-line. The *rebab* is used in ensembles for the dance-drama known as *ma'yong*, for the healing ceremony called *main puteri*, and in former times by the narrator of *tarik selampit*, a form of story-telling partly in rhythmic spoken prose and partly in song. The two-string *rebab* (*rebab dua tali*) is shorter and much plainer and is used in the ensemble for *wayang kulit Melayu* (see below).

A popular chordophone found in ensembles playing syncretic genres is the GAMBUS, a lute with lateral tuning pegs believed to be derived from the Middle Eastern *'ūd*; it is the main melody instrument in many syncretic music ensembles such as the *ghazal* and *zapin*.

3. Kertuk kelapa (single-bar xylophone) played by two musicians, Kelantan

Aerophones include end-blown flutes and oboes. End-blown bamboo flutes, generally known as *seruling*, are of the duct or notched flute types. The finger-holes are usually equidistant. This type of bamboo flute is sometimes found in folk percussion ensembles such as *tambuk kalang*, while a wooden duct flute is found in the *caklempong* ensemble.

The *serunai* (oboe) is found in *nobat* and *silat* theatrical ensembles. It is normally the only melodic instrument in

4. Rebab tiga tali (three-string spike fiddle)

otherwise percussion-dominated ensembles. Featuring a quadruple free-beating reed, it is sounded using a circular breathing technique (*see* SARUNAI).

(ii) Ceremonial music. Each of the royal courts of Kedah, Perak, Selangor and Trengganu has its own *nobat* ensemble – a mark of the ruler's sovereignty and an essential part of his regalia. This classical ensemble plays at his installation and at weddings, funerals, birthdays and other celebrations of the royal family, and marks specific times such as the breaking of the Muslim fast. In function and composition it is related to the *ṭablkhāna* of the Middle East: both have the same basic instruments, and in both a drum (in Malaysia, *negara*, *nahara* or *nengkara*, from Arabic *naqqāra*) is accorded special respect.

The ruler of Malacca is thought to have adopted the tradition of possessing a drum of sovereignty in the early 15th century, and since then peninsular Malay rulers have been invested to the sound of drumming. The first mention of the *nobat* on the peninsula, in the *Sejarah Melayu* ('Malay annals'), indicates that it was used in Malacca during the reign of Sultan Muhammed Shah (1424–41). The rulers who paid homage to his successors and asked for the drum of sovereignty included the Rajah of Kedah. The Kedah *nobat* now has six instruments: a *negara* (a metal kettledrum), two *gendang*, one *nafiri* (a long silver trumpet), one *serunai* and one suspended gong (fig.5). After the Portuguese capture of Malacca, its ruler Raja Muzaffar migrated to Perak, taking a *nobat* with him for his installation. The Perak *nobat* now comprises one *negara*, one *gendang nobat*, one *gendang kecil* (small *gendang*), one *nafiri* and one *serunai*. In Kedah and Perak only *orang kalur* ('hereditary families') may play the instruments: spirits are said to inhabit them, and illnesses have been reported when they were maltreated. In both states the instrumental pieces are called *man*. Selangor acquired its *nobat* when its first ruler travelled to Perak to seek recognition and to be installed to the sound of its *nobat*. The Selangor *nobat* instruments are one *negara*, two *gendang besar*, two *gendang kecil*, one *nafiri* and one *serunai*. When Sultan Abdul Rahman Muazam Shah II abdicated from Riau-Lingga in 1911 he gave his *nobat* to Trengganu. The Trengganu *nobat* now consists of one *negara* and two *gendang nobat* (all three drums are encased in silver), one *nafiri*, one *serunai* and a pair of *kopok-kopok* (small cymbals, also of silver).

Music and dance are also an integral part of a folk ritual healing ceremony called *main puteri*. The ceremony is based on the belief that certain illnesses result from possession of an individual by spirits. The *bomoh* (shaman), known as *Tok Puteri*, performs the ceremony so that spirits may enter his body and enable him to communicate with the spirits inhabiting the sick person and thereby discover the root of the problem and how to solve it. This process is accomplished by the use of music, sung monologue and dialogue, trance dance and the chanting of special prayers. The *bomoh* is assisted by a *rebab* player, the *Tok Minduk*, who sings in dialogue

5. Nobat ensemble from Alor Setar, Kedah state, with (left to right) nafiri (long trumpet), gendang nobat (barrel drum), suspended gong, serunai (oboe), gendang (barrel drum) and negara (kettledrum; foreground)

with the *bomoh* as he plays. Once the *bomoh* has been possessed by spirits, the *Tok Minduk* is able to speak with those spirits through the physical being of the *bomoh*. *Tok Minduk*, then, is the only direct link the *bomoh* has for communication between the spirit and the human world. Five other musicians accompany the *rebab* player: they play two *gendang* (*anak* and *ibu*), one pair of *canang*, one pair of *kesi* and two *tetawak*. In earlier times the ensemble consisted of one *redap* (frame drum), one *rebab* and one *batil* (an upturned brass bowl hit with sticks). The music of both the *rebab* and percussion instruments helps to maintain contact with the spirit world through the *bomoh*, who remains in trance throughout much of the ceremony. The trance dance is characterized by extreme body movements: they include swaying of the hips, quick arm and leg movements, and whirling of the head. A performance may last several days.

Several other performances are associated with possession rituals. In *olek mayang*, from Pahang, a circle of men chant continuously as one of them, gripping an areca-nut shoot, goes into a trance. In another Pahang dance, *tari labi-labi*, the turtle spirit enters the dancer. In *kuda kepang*, a possession dance particularly popular in Johore, the male dancers carry wooden replicas of horses. Its accompanying instruments include an *angklung* (bamboo idiophone), to which are usually added two *gendang*, two *mong* and two suspended gongs. For *silat medan* (a stylized imitation of fighting) and *bergayong ota-ota* (a dance involving elements of self-defence), the accompanying instruments are a *serunai*, *gendang* and *tawak-tawak*.

(iii) Theatre music. *Ma'yong* is a folk theatre genre that includes stylized dance, solo and choral singing and drama. In the village areas of Kelantan, on peninsular Malaysia's east coast, it is still performed as part of the ritual healing ceremony known as *main puteri*. Around 1910 the *ma'yong* was taken into the court of the Kelantanese Sultanate, where it flourished for 10 to 15 years. When it lost its royal patronage, performers returned to their village homes and only occasionally gathered together for a performance. By the middle of the 20th century there were few performers active. Fortunately, a revival has proved possible, and today performances are given by a troupe known as Seri Temenggong (named after one of the devoted court patrons of the earlier part of the century) and other organized groups on the east coast. Several actresses, usually two male comedians and four male musicians are required. The instrumental ensemble consists of one *rebab* (*tiga tali* – 'three strings'), two *gendang* (*anak* and *ibu*) and *tetawak*. A performance, which usually lasts for several consecutive nights, begins with a special ritual ceremony called *Buka panggung* ('opening of the stage'). This ceremony is followed by the entrance of the actresses to the musical accompaniment of a tune (*lagu*) known as *lagu Pa'yong turum* (the entry tune for the leading character, *Pa'yong*). The first major piece of each performance is the *Menghadap rebab* ('salutation to the *rebab*'), which opens with a solo passage played on the *rebab*. The singing and dancing are executed in a squatting or sitting position as the actresses face the *rebab*. The *Menghadap rebab* is the most elaborate and perhaps the most beautiful of pieces in the *ma'yong* repertory. Several other dance pieces precede the actual story. The audience is told of the setting and situation. Although the basic plot is known by all performers, and certain spoken passages known as *ucap* are fixed, the dialogue is for the most part improvised. From the musical repertory, which numbers some 30 tunes, the performers can draw on certain pieces that can be classified as tunes for specific role-types, for walking or travelling situations, for conveying messages, for lullabies, for lamenting and for other activities. Musical pieces are performed within the framework of a cyclical unit (gong-unit, or *gongan*), which is marked by the gongs. Within the cycle the two *gendang* provide interlocking rhythmic patterns, while the *rebab* and singer perform a melody in a highly ornamented, melismatic style that suggests a strong relationship to Middle Eastern vocal practice. The chorus adds to the generally heterophonic style. Dances are performed for important events in the story, and in one of these, the *tari ragam*, a *serunai* replaces the *rebab*, and a pair of *canang* are added.

The shadow-puppet theatre, *wayang kulit*, is a form of entertainment particularly popular in the northern states. The *dalang* (puppeteer) uses conversational and dramatic tones of voice and song joining with the instrumental music as an integral part of the action. *Wayang kulit* in Malaysia is found in four distinct forms: *wayang kulit Kelantan* (also known as *wayang Siam*), *wayang kulit Melayu* (also known as *wayang Jawa*), *wayang gedek* and the Javanese *wayang kulit purwa*. *Wayang kulit Kerantan* is the indigenous Malay form and is the most popular. The root stories are based on the Rāmāyaṇa epic, but more popular are Malay folk tales and stories of current and local interest, in local dialects mixed with standard Malay.

The musical ensemble consists of two *serunai*, three pairs of drums (*geduk*, *gendang* and *gedumbak*, each in large and small sizes), one pair of *canang*, one set of *kesi* and two *tetawak* hanging gongs (fig.6). The entries and exits of characters must be accompanied by music, but the instruments remain silent when the *dalang* is speaking, except to emphasize a comment, quick action or punch-line of a joke. The musical repertory numbers some 30 pieces, including pieces for specific character-types and actions.

Like the music for *ma'yong*, *wayang kulit* music is also cast within the framework of cyclical gong units that define the musical form, played by the *tetawak*, *canang* and *kesi*. The drum's rhythmic patterns normally define a specific piece and are played by a particular combination of *gedumbak*, *gendang* and *geduk*. The highly ornamented melodies are sung by the *dalang* or are played on the *serunai*.

Wayang kulit Melayu (which is almost extinct) is performed by Malay peoples but carries strong Javanese influence. At one time it was performed mainly in the Kelantan court. The stories are based on the Mahābhārata and Panji tales. The musical ensemble consists of *rebab dua tali*, a gong-chime of six *canang*, one pair of *kesi*, one *mong*, two large, hanging, bossed gongs and two *gendang*.

Wayang gedek, with strong influence from the *nang talung* of south Thailand, is performed by Thai and Malay peoples in Kedah and Perlis using the local dialect, sometimes mixed with the southern Thai dialect (*see* THAILAND, §II, 4). The Javanese *wayang kulit purwa* is performed only in the southern state of Johore by peoples of Javanese descent (for further discussion *see* INDONESIA, §IV and SOUTH-EAST ASIA, §6(ii)).

6. Wayang kulit (shadow-puppet theatre) of Kelantan showing dalang (puppeteer) and part of the accompanying ensemble: (left to right) serunai (oboe), gedumbak (goblet drum), two gendang (barrel drums) and gedumbak (goblet drum)

The folk theatre known as *mek mulung*, found only in the northern state of Kedah, features a repertory of Malay folk tales (some similar to those of the *ma'yong*) told through dialogue, song, dance and instrumental music. A troupe consists entirely of male actors who take on male and female roles. The musical ensemble features *rebana* in various sizes: two *rebana ibu* (*gendang ibu*), one *rebana penganak* and one *rebana peningkah* (small size). There is also one medium-size hanging, bossed gong, one *serunai* and several pairs of bamboo clappers (*cerek*). The gong and *cerek* serve as markers of specific colotomic units in the music, while the four *rebana* are played in an interlocking style. The *serunai* provides moderately ornamented melodies. A repertory of standard musical pieces accompanies actions such as travelling and giving news. Many pieces are sung in responsorial style with instrumental accompaniment; the musicians also serve as the chorus when needed.

Randai was originally the folk dance-theatre of Minangkabau peoples living in the southern state of Negeri Sembilan, but it is known throughout Malaysia. The stories are folk tales, originally from the *kaba* storytelling tradition, which relate the adventures of local heroes. Stories are enacted in dialogue and song in a circle formation with the use of the stylized dance movements of *silat* (martial arts). Both men and women take part in a performance.

The opening and closing procession of the actors and musicians is accompanied by a maximum of five musicians: three play the *caklempong pacik* (set of five small, hand-held knobbed gongs struck on the knob with a stick), one drummer plays the *katindiek* (double-headed barrel drum) or *adok* (single-headed frame drum), and one musician plays the *serunai* or the *pupuik* aerophones. One set of two *caklempong pacik* gongs, called *dasar* ('fundamental'), plays the main melodic motif that is repeated throughout a given piece, while the second set of two gongs, called *peningkah* ('time beater'), and a single gong are played in an interlocking style to produce harmonic and rhythmic accompaniment. All *caklempong pacik* pieces begin with staggered entrances. The drum repeats a rhythmic pattern while the *serunai* duplicates and ornaments the main melody. There are two types of repertory: melodies for happy and peaceful occasions and melodies for melancholy or sad situations.

Between the acts of a *randai*, a larger *caklempong* (also called *taklempong*, *celempong* or *telempong*) ensemble plays music for general entertainment. This ensemble consists of three or four gong-chimes: one or two *gereteh* (a set of 15 small knobbed gongs), one *saua* (a set of eight gongs) and one *tingkah* (another set of eight gongs). The *gereteh* plays the main melody and the *saua* plays the counter melody, while the *tingkah* provides the harmonic and rhythmic accompaniment. The gongs are now tuned diatonically. In a traditional *caklempong* ensemble a double-headed barrel drum (*gendang*), *serunai* and *pupuik gadang* (reed aerophone with cone-shaped bell) or *bangsi* (duct flute) are added. In modern ensembles the gong-chimes may be accompanied by guitars, electric bass, Western drums, accordion, mandolin, synthesizer and other instruments.

Some musical genres combine elements from indigenous folk and classical traditions with Western, Arabic, Indian and Chinese elements. One of the most famous of the syncretic music-theatre forms is *bangsawan* (also known as Malay opera), which first appeared in the 19th century

as large cities with multi-ethnic communities began to develop throughout peninsular Malaysia. Believed to have originated in Persia and carried by Indian sources to the Malay peninsula by the 1880s, it was adapted to suit local tastes and called *bangsawan* ('nobility'), after its stories and characters that focussed on the Malay nobility. As commercial theatre supported by entrepreneurs, *bangsawan* was found in Malaysia, Singapore, Sumatra, Java and Borneo by the early 20th century. Performed on a proscenium stage with elaborate sets and backdrops, each production consisted of one or more stories enacted with dialogue, song and dance, and supplemented by additional song-and-dance routines ('extra turns') performed in front of the closed stage curtain during scene changes.

The *bangsawan* orchestra, music, dance and stories were highly eclectic, featuring elements of local Malay and various foreign art forms. Throughout the first half of the 20th century, stories and music of Malay, Arabic, Chinese, Indian and Western origin were adapted and performed with stage sets and costumes to reflect the specific national origin of the story. The 'extra turns' featured soloists and a chorus performing waltzes, foxtrots and rumbas, along with Malay *lagu asli* ('original songs') and local *inang*, *joget* and *zapin* dances.

Three kinds of ensemble were used in early 20th-century *bangsawan*: a Western ensemble of violin, trumpet, trombone, saxophone, flute, clarinet, piano, guitars, drum kit, maracas and other Western percussion, which accompanied Western and Middle Eastern stories; a local *ronggeng* dance ensemble of violin (*biola*), accordion, *rebana* and gong, which accompanied Malay and Javanese stories; and an ensemble of harmonium and *tablā* that accompanied Hindustani stories. Theme songs were composed for particular stories, and new stories required new repertory; both Western and local musical forms were used.

Bangsawan performances now tend to feature mainly Malay stories, with emphasis on regional musical forms such as *lagu asli* and *keroncong*. A standard repertory of pieces is drawn upon to reflect the mood of an episode in a given story. In general the characteristic rhythmic pattern of a piece is repeated, while the melody is most often cast in a major or minor key or in a tonal pattern evoking Middle Eastern modes. Strophic forms are common in most *bangsawan* pieces together with local poetic forms (*pantun* and *syair*), while major and minor harmonies support the melodic line. Although *bangsawan* was the first type of popular music in the Malay peninsula, it is now considered as a traditional music-theatre form.

Early in the 20th century the music-theatre form *boria* was found throughout the state of Penang, but it is now limited to specific localities and is usually performed during the annual Penang Festival, for state-held expositions and national-day celebrations. Since the 1950s both men and women have performed, with the men enacting a story or comic episode of local interest, using improvised dialogue, and the women serving as the chorus and dancers. A given performance usually consists of two stories that are thematically related. Each story takes the form of a comic sketch followed by a number of song-and-dance selections. The actors and chorus can consist of 30 to 40 performers. Formerly the band consisted of violin, *gambus*, *marwas* (small double-headed drum), *tablā*, accordion, *gendang*, cymbals and harmonica. Other Western instruments are now added, including electric guitars, drum kit, tambourines and electric keyboard. The music can range from the cha cha cha or rumba to soul, styles of rock and other forms of popular music.

The folk forms *rodat* and *hadrah*, performed at weddings and other celebrations, have their origins in the singing of *zikir* (texts in praise of the Prophet Muhammad), although secular verses and popular Malay and Hindustani songs are usually added. *Rodat* occurs mainly in Trengganu (east coast), while *hadrah* is found in Perlis and Kedah (west coast). In *rodat* a group of drummers (*pengadi*), seated on the floor of the performing area, play rhythmic patterns on the *tar* (frame drum with jingles), while a line of male singers (*pelenggok*) sit in front of the drummers and sing verses of *zikir* or pop songs, moving their arms and bodies in dance-like gestures. Simultaneously, a line of female dancer-singers (*inang*) dance in between the rows of drummers and male singers. The singing is responsorial between the two choruses or between solo and chorus. A similar all-male form, found in Kelantan, is called *rebana kercing*, after the frame drum of the same name.

Hadrah was originally very similar to *rodat* but is now performed by an all-male group. Recently, local historical dramas have been enacted with popular Malay and Hindustani songs performed between the dramatic episodes. *Hadrah* is accompanied by a small ensemble of *rebana* drums and a violin.

(iv) Dance music. There are court dances, solo and group dances, dances associated with rice cultivation, dances showing Arab and Portuguese influence and dances that are still evolving. The *tari asyik*, a dance formerly performed for entertainment and ceremonial events at the Kelantan court, was accompanied by some 12 to 16 musicians. The music ensemble, at its largest, consisted of one *canang* (gong-chime of seven or eight small knobbed gongs), *mong*, two *tetawak* (hanging knobbed gongs), three sets of *gendang asyik* (small single-headed drums), two *gendang* (*anak* and *ibu*), two *geduk*, *gambang buluh* (bamboo xylophone), *gambang besi* (metallophone with iron keys), *gendang besar* (single-headed cylindrical drum), *kesi* cymbals, *rebab tiga tali* and *serunai ibu*. Sometimes the *kertuk kelapa* was added. Although dancers and musicians still remember some of the repertory, it is rarely performed today.

Based on the Panji tales, *joget gamelan*, formerly a court dance genre, is now performed at universities and by groups under government sponsorship (see also §1(i) above).

The *tarinai* (*terinai*) folk dance of Kedah and Perlis is performed in villages and for special occasions in the courts of the sultanates. In its village setting, *tarinai* is performed at weddings, especially during the *inai* ceremony (henna-staining of the hands and feet of the bride), but it is also performed at state and other festive occasions for entertainment. Both men and women may dance, but only men play the musical instruments. The small ensemble, formerly called *gendang keling* ('Indian drums') but now referred to as *gendang tarinai*, consists of one *serunai*, two *gendang keling* (double-headed barrel drums), struck with the hands and a rattan beater, and two hanging bossed gongs of high and low pitch. The gongs mark the colotomic units that basically follow the rhythmic patterns played on the two *gendang*. The *serunai* provides a moderately ornamented melodic line.

Zapin is of Arabic origin. Formerly danced by groups of men, it is now danced by both sexes. Both Arabic and Malay styles of this folkdance are found in the villages of Johore, while a somewhat different national style is known throughout the country. The traditional ensemble for the Arabic style is violin or *gambus* and several *marwas* drums. The Malay style is accompanied by *gambus* or violin and *marwas* with the addition of *dok* (single-headed, cone-shaped drum) and the accordion. At the national level a flute may be added, with *rebana* replacing the other drums and a bossed hanging gong. A typical *zapin* rhythmic pattern (ex.1) identifies this musical

Ex.1 Zapin rhythmic pattern

genre, while the musical form follows the sections of the dance with an opening *taksim* (improvised introduction), followed by the main piece (a two- or three-part structure) and *wainab* ('closing'), featuring a loud, contrasting rhythmic pattern called *kopak*.

The *ronggeng* is a mixed social dance involving the singing of *pantun* (four-line verses), traditionally accompanied by violin (*biola*), accordion, *rebana* and gong. In pre-World War II Malaya and Singapore, *ronggeng* was featured in the urban dance halls, and it is still performed in Malaysia for weddings and other social occasions. Possibly evolving in the 17th century through Portuguese influence, the music for *ronggeng* mixes Western harmony and instruments with Chinese scales and melodies and Malay- and Middle Eastern-derived rhythmic patterns, modal structures and instruments. Several types of pieces are used to accompany the *ronggeng* dance, including *lagu asli*, *inang* and *joget*, which feature strophic forms and the singing of a melodic line with great use of tremolo, portamento and rubato. Each type is distinguished by particular melodic and rhythmic patterns. The use of the melodic and cadential pattern known as *patahan lagu*, duple metre, slow tempo and a specific rhythmic pattern (ex.2), identifies *lagu asli*. *Inang* requires a fast tempo,

Ex.2 Asli rhythmic pattern

quadruple metre and the rhythmic pattern featured in ex.3. *Joget* also features a fast tempo and a four-beat

Ex.3 Inang rhythmic pattern

tak
drum sounds:
dung

rhythmic pattern incorporating a triplet figure (ex.4). A feature of *joget* melodies is the shift in the internal stress,

Ex.4 Joget rhythmic pattern

producing an alternation of 2/4 and 6/8 metres. This highly syncretic music is performed by pop bands and symphony orchestras with the melody accompanied by homophonic texture and functional harmony.

(v) Social popular music. Various music ensembles for formal and informal social occasions are found in both rural and urban areas, performing music genres that combine Malay, Chinese, Indian, Arabic and Western elements. The traditional genres such as *keroncong*, *ghazal*, *dondang sayang*, *dikir barat* and the dance pieces for *ronggeng* are widely heard on radio, television and through the sale of cassettes and CDs.

Keroncong is popular throughout the country. Originating from Betawi (Jakarta, Indonesia) in the 16th century, by the 1920s *keroncong* was found in the Malay peninsula and performed as an 'extra turn' in *bangsawan*. The current style developed in the 1930s. A typical ensemble from this period consisted of a singer, violin and flute playing the main melody, with the accompaniment of steel-string guitar, ukelele (*cuk*), banjo (*cak*), three-string cello and four-string double bass; an accordion might also be added. Throughout its history the particular style of *keroncong* has dictated the instrumentation: Hawaiian *keroncong* requires Hawaiian guitar, while rumba or tango *keroncong* uses the instrumentation of a jazz band. Today, synthesizer often replaces the violin or one of the rhythm instruments. The traditional repertory consists of three main styles: *keroncong asli* (the original Javanese *keroncong*), *keroncong stambul* (formerly played in Indonesian *stambul* comedy and in *bangsawan*) and the *keroncong langgam* (all *keroncong* not in the other two idioms). The Malaysian *keroncong* is basically in the *langgam* style with song texts on Malaysian themes and newly composed melodies by Malaysian composers. *Keroncong* are diatonic and in strophic form. The main melody is sung with portamento, ornamentation and rubato and creates heterophonic texture with the flute and violin parts. The *cak* and *cuk* are played in an interlocking style and provide specific chords in a given sequence for the three main *keroncong* types. The pizzicato rhythm of the cello supports the harmonies of the *cak* and *cuk*, while the double bass provides the root pitches of the chords (*see also* INDONESIA, §VIII, 1(ii)).

In the *dondang sayang* ('song of love or affection') one performer sings a four-line *pantun* and a second singer answers with another *pantun*. The *pantuns* are created spontaneously; the subject-matter may focus on love, wisdom, courtesy, jokes, advice, food etc. An entertaining and convivial atmosphere is created in the performance through the cajoling and teasing repartee. *Dondang sayang* is performed at weddings and other social occasions by Malays and by Chinese of Straits descent in Malaysia and Singapore. In Malacca it is always performed at the *Pesta Mandi Safar* (festival in the second month of the Muslim calendar) and in Penang during *Chap Goh Meh* (the 15th day after the Chinese New Year). The traditional instrumental accompaniment is violin, two *rebana* and one hanging bossed gong. Accordion or harmonium, guitar and tambourine may also be added. A single melody undergoes variation and ornamentation by individual singers and the violin or other melody instruments. Strophic form is used, and diatonic harmony supports the melodic line while the singer and melody instrument maintain a heterophonic relationship. One *rebana* repeats the basic eight-beat *lagu asli* rhythmic pattern (see ex.2 above) while the second *rebana* provides an interlocking part.

Another type of social popular music is *ghazal*, found especially in the southern state of Johore. The *ghazal* is a love poem, originating in the Middle East and also prevalent in north India; it is thought to have been

brought to Malaya via Riau-Lingga (Indonesia) by Indian traders in the 19th century. The ensemble that accompanies the singing of the *pantun* that comprise *ghazal* consists of harmonium, *gambus*, violin, guitar, *tablā*, maracas and tambourine. Combining elements from Malay, Indian, Arabic and Western music styles, this syncretic genre features a melodic line performed heterophonically by a singer and one or more melody instruments, to which a Western harmonic base is added. The rhythmic patterns are from Hindustani music or from Malay *lagu asli* and *joget* traditions (*see also* INDIA, §IV; SINGAPORE, §2).

Dikir barat is a favourite form of entertainment, possibly derived from the chanting of *zikir* (religious texts). It originated among the Malays of the northern state of Kelantan and southern Thailand and is usually sung by two competing teams of vocalists (formerly all male, but now both male and female), who sing newly composed secular texts of topical interest, often comic in nature. *Dikir barat* is also broadcast on television to increase public awareness of social issues. A given team consists of the *awok-awok*, a chorus of 10 to 15 singers singing in unison; *tok juara*, the lead singer who also rehearses the group; and the *tukang karut*, the second solo singer, who spontaneously composes and sings song texts. The *tok juara* begins the performance by chanting a *pantun* in free rhythm (like *zikir*), while the chorus repeats the verse and melody in metre, interjecting syncopated shouts and making dance-like movements of the hands, arms and upper torso while sitting on the floor. The *tok juara* and chorus alternate, singing new or repeated song texts. After the final chorus the *tukang karut* takes the lead, spontaneously creating several lines of text and singing in a responsorial style with the chorus. The vocal parts are accompanied by a small ensemble consisting of two *rebana* (large and small), *tetawak*, a pair of *canang* and a set of maracas. The *rebana* and maracas establish a rhythmic pattern repeated throughout a piece, while the *canang* and *tetawak* mark short colotomic units (usually two or four beats long). Handclapping by the chorus reinforces the final beat of the colotomic unit.

(vi) Vocal genres. A major type of vocal music among the Malays is *zikir*, the singing of religious texts, which may take the form of a prayer to invoke God's blessing, a request for pardon, an expression of obedience to the will of God, or devotion and greetings to the various prophets. *Zikir* is performed unaccompanied by a solo singer or a chorus in unison. Sometimes simple rhythmic accompaniment may be provided by a number of frame drums, including the *kompang* and *hadrah*, or a form of *rebana*. The singing style is mainly syllabic with only moderate melisma and ornamentation of the melodic line. Some *zikir* are through-composed, whereas others are in two- or three-part forms. Regional styles are known by various names, including *kompang* in the south of the peninsula and elsewhere *hadrah*, *marhaban* (always unaccompanied) and *zikir rebana*. In Kelantan the singing of *zikir* accompanied by rhythmic patterns on large, hanging *rebana* is called *rebana besar*, while the singing of *zikir* by a group of men in a responsorial style and without instrumental accompaniment as they wave small fans in rhythmical motion is called *dikir laba*. Other types of vocal music in the Malay community include a repertory of folk songs, including songs to accompany the planting of rice and other work events and children's songs. These repertories as well as the regional styles of *zikir* remain largely undocumented.

2. THE 'ORANG ASLI'. Three main groups of *orang asli* live in the peninsula: the Senoi, subdivided into Semai, Temiar and three smaller groups; the Negritos; and the aboriginal Malays. Dancing is common among all of them, and they play a variety of musical instruments, many made from bamboo. They have songs about their environment, their daily activities and their ancestors, some traditional, others improvised for the occasion.

Senoi music derives much of its inspiration from the Senoi belief in the existence of a world of spirits behind the material form of the jungle surroundings. These spirits give them their songs during dreams and may possess a singer during a special trance-dance ceremony. Music is played on a variety of occasions, including healing ceremonies, during mourning, to mark events in the agricultural cycle, to welcome guests or to send someone on a long journey, to celebrate the building of a new house or other important event in the community, or simply for entertainment purposes. The community gathers together for a singing session or trance-dance during the night hours. At one end of the dancing floor the women play tuned bamboo stamping tubes (*goh*, *ding galung*) consisting of a bamboo segment with one end closed by the node. Played in pairs, these produce intervals often of a 4th or 5th when their closed ends are struck on a wooden board, pole or on the bamboo floor. As the women beat a rhythmic pattern a solo singer begins, and gradually the chorus (who are also often the instrumental performers) joins in, the overlapping solo and chorus phrases producing a rudimentary type of polyphony. Often the singers are joined by circling dancers whose movements may lead to a trance. The bamboo stamping tubes are sometimes supplemented by a drum and gong, usually obtained from Malays. An indigenous drum is made from a hollow tree-trunk with the skin of a small animal for its head. Other Senoi instruments include the *genggong* (metal jew's harp), *ranggong* (jew's harp made of the rib of a palm leaf), *pergam*, *keranting* or *kereb* (bamboo tube zither), *siloy* and *pensol* (flutes). Both the *genggong* and *ranggong*, played by men, consist of a frame and tongue in one piece and are played by jerking a string attached to the frame or by plucking the end of the frame itself. In its simplest form, the tube zither, played by women, consists of a bamboo segment with three to four narrow parallel strips or 'strings' cut lengthwise from the cortex of the bamboo and attached at both ends, but raised from the tube by two tuning wedges that act as bridges for each 'string'. A more sophisticated version, called *krem*, has rattan, fibre or wire strings attached to the tube. Both transverse flutes and end-blown nose flutes are played; the nose flute (*pensol*) usually has three stops, the mouth flutes more. The Senoi also play a bamboo duct flute and a small side-blown flute (*tuol*) with a single fingerhole.

The Negritos also have traditional and improvised songs, dances accompanied by songs and a variety of instruments. Their manner of communal singing is similar to that of the Senoi, and their dances resemble those of the Temiar; the more distinctive ones described by earlier writers seem now to be obsolete. The dancing is accompanied by stamping tubes to which are sometimes added

percussion sticks and the nose flute. Negritos also play the zither, jew's harp and mouth flute.

Music is less integrated into the lives of the aboriginal Malay tribes, although this used not to be the case. An interesting song of the Besisi, the *Besisi Trumba*, records the tribe's history and old tribal boundaries, and may suggest a reason for the strings of place names in the songs of other tribes such as the Perak Senoi and Negritos. The Besisi formerly danced and sang all night to celebrate the rice harvest; another group, the Mantra, devoted themselves to singing, dancing and instrumental music during the month of January. Their most important instrument was the drum, which was found only in the homes of tribal chiefs and was to some extent regarded as their insignia of office. The drums now differ little from those of the Malays, though formerly they were made from a tree-trunk with mouse-deer skins and with tuning wedges to tighten the strings. Like the other groups, aboriginal Malays play bamboo stamping tubes, jew's harps, mouth and nose flutes and bamboo duct flutes. Some also play violins acquired on bartering expeditions or skilfully carved with a *parang* (knife).

The Semelai, a small tribe for whom music is important, sing unaccompanied songs usually consisting of a solo section followed by a chorus. In one men's song, frog sounds establish the rhythm. The Semelai play a simple type of oboe, an end-blown bamboo tube with grass wedged into the tube as a reed.

3. Chinese, Indian and Thai communities. The Chinese immigrants built schools and formed societies to preserve their own culture, and music continues to play an important part in their religious rites and for social occasions. Traditional percussion instruments are used in funeral processions, for which a Western-style band may also play marches. In the temples, chants, slit-drums, gongs and bells are all part of the general mosaic of sound. The practice of performing operas and puppet theatre during important religious festivals on stages erected near the temples is still found, and some associations and other private organizations sponsor troupes performing opera and puppet theatre.

The Chinese opera and glove-puppet theatre (*po-te-hi*) have been very popular in the Malaysian Chinese community since the late 19th century. By the early 20th century the Chinese had their own troupes and ensembles in Malaysia, performing opera in Teochew (Chaozhou), Cantonese and Hokkien dialects and the glove-puppet theatre in Hokkien. Several types of stories are enacted. The performance of a single story takes several nights to complete. In both opera and puppet theatre a prologue is performed, featuring special dramatic episodes and ritual events to honour the gods who, it is hoped, will bestow clever sons, long life and prosperity upon those attending the performance. After the prologue the main story is performed with instrumental music and singing. The orchestra accompanying these performances is of a 'military' and a 'civil' type: the military ensemble features barrel drums of various sizes (struck with wooden sticks), wood blocks, clappers, cymbals and flat gongs, while the civil ensemble includes bowed lutes (*yehu* and *erhu*), plucked lutes (*yueqin*) and the *suona* oboe, which is used to announce the arrival of the gods or the emperor or to signify danger in a given scene. In the Cantonese opera the *suona* also appears in the military ensemble. In the Teochew opera the *yangqin* dulcimer is found. Specific types of vocal and instrumental melodies and percussion music carry specific dramatic functions in a performance. Special times of the year, particularly the seventh month of the Chinese lunar calendar (*Phor Tor*), see a great number of performances of opera and puppet theatre; to meet this demand, especially in the large cities throughout the west coast of the country, performers come from south Thailand, Singapore and Hong Kong. To attract young people to the opera, the Hokkien troupes in particular include popular Chinese and Western songs accompanied by bands of electric guitars before the main performance, and the duration of the opera performance itself is shortened. The Cantonese troupes in Kuala Lumpur also perform operas in English and in Malay.

Chinese itinerant minstrels, once common, have almost disappeared. Mandarin light music has been popularized by Chinese films, but the popularity of Western art music also owes much to the Chinese community. Of the many young Chinese who learn European instruments, a number retain interest in their own culture, and there are modern Chinese orchestras (*huayuetuan*) in many schools and private organizations throughout the country, supported by various Chinese associations and Buddhist societies. The *huayuetuan* dates from the 1930s in China and was firmly established in the Malaysian Chinese community by the 1960s. These orchestras can encompass 50 or more players and include Chinese instruments that are modified in size and construction and use equal-tempered tuning. In Malaysia the repertory consists of pieces derived from China that mix the melodies, scales and heterophonic texture of Chinese music with Western harmony, arrangements of Malay folk melodies, and newly composed pieces by Malaysian Chinese composers.

Before World War II much of the Indian population was transient, but this situation has changed. The larger towns have instrumental and dance teachers and are regularly visited by Indian performers, Karnatak music being particularly popular. There is little instrumental music in the temples; during festivals the music heard in their grounds is frequently taken from Tamil films, either recorded or played by small ensembles.

Music is also heard near Thai temples during festivals, if only as part of a *nang talung* (shadow-puppet performance) or a *rambong* dance. Dances performed on such occasions are accompanied by a small instrumental ensemble of mixed Malay and Thai instruments. The most interesting performance of the Thai community is *menora*. This theatrical genre, a combination of instrumental music, dancing, singing, mime and slapstick comedy, is performed by men and women near Buddhist shrines and temples and at important celebrations in the states of Kedah, Penang and Kelantan. Performances occur for general entertainment or for specific ritual purposes, each type characterized by specific traits and performance structure, but with musical pieces and ensembles in common. In Kedah and Penang the repertory consists of instrumental music as well as melodies set to texts based on Thai poetry and poetic forms. The basic *menora* ensemble found on the west coast of Malaysia includes two *klong* (the Malay *geduk* barrel drum), two *tab* (the Malay *gedumbak* goblet drum), *mong* (two small bossed gongs set horizontally in a box), *cing* (a pair of finger cymbals), *krek* (bamboo clappers, also called *khrap* or *trek*) and the *pi* oboe, which uses a reed made of four to eight layers of dried palm leaf. In Kedah and Penang

the *pi* is sometimes replaced by the *saw u* or *saw duang* bowed lutes or by an electric keyboard; a set of bongo drums is also sometimes added. In Kelantan, so many elements from *ma'yong* and *wayang kulit* have been absorbed into *menora* that the genre is often referred to as *menora-ma'yong*. Here Malay *rebab*, *serunai* and a set of double-headed *gendang* drums are added to the Thai ensemble, while vocal pieces from *ma'yong* as well as instrumental music from *wayang kulit* are added to the traditional *menora* repertory.

4. ART MUSIC. In the search for a national Malaysian identity, composers have attempted to create music that reflects the aesthetic ideals of a multi-cultural society in a South-east Asian setting. In the two decades following independence in 1957, art music was created by Malaysian composers trained in Western music theory and composition techniques. Composers such as Gus Steyn, Alfonso Soliano and Johari Salleh combined elements of Malay, Chinese and Indian music, at the same time using Western harmony and the instruments of the symphony orchestra in a style called *muzik serioso* ('serious music').

At the end of the 20th century the situation had reversed: local genres, forms and tonalities had become the foundation of new composition, with influences from Western and from other South-east Asian sources. There appear to be several approaches to the creation of new music. Among these is an exploration of sounds familiar to Malaysia and more generally South-east Asia, through the combining of instruments from Western and several Eastern traditions in a single ensemble. Local instruments are often used in non-traditional ways, as in the composition *Karma* (1991) by Valerie Ross.

Another approach involves the use of Asian, and especially South-east Asian, aesthetics and philosophy as a basis for the structure and performance of a piece. The concept of cyclical gong units as the basis of musical form governs several passages in the music drama *Maria Zaiton* (1996–7) by Razak Abdul Aziz, although the instrumentation does not include gongs. While compositions are usually notated by composers, elements of indeterminacy are often introduced (particularly in the works of Ross and Aziz), where the performer is allowed to make choices or to extemporize within given parameters set by the composer.

Some composers have held closely to Western forms as the basis of their compositions. The Sarawak composer John Yong Lah Boh has used the language of atonality and the form of the symphonic poem, for example *Mystery of the South China Sea*; Julia Chong, also from Sarawak, has combined local musical elements within Western forms such as the concerto, symphony and ballet suite (e.g. *Concerto Kuching for Piano and Orchestra* (1992), *Symphony Bergambina* (1975) and the ballet suite *Manora* (1982)). A few composers have remained within the realm of traditional music, working within an existing South-east Asian musical genre. The size of the small Malay gamelan has been increased by doubling some of the existing instruments. New compositions for Malay gamelan utilize large formal structures, encompass vocal music and can include adaptations of other Javanese and Balinese gamelan styles.

II. Sabah

Formerly called North Borneo, Sabah has been a state of Malaysia since 1963. Its principal coastal populations include Malays, many of whom stem from nearby Brunei, as well as various peoples of Philippine descent (e.g. Bajau, Suluk, Ilanun, Obian) who are often designated collectively as 'Bajau'. Most of these coastal peoples are Muslim. A substantial number of Chinese, constituting more than 20% of the total population, also tend to live in cities and areas closer to the coast. The inland plains, hilly hinterlands and mountainous interior of the state are inhabited by many distinct but linguistically-related peoples, who are grouped broadly into the Dusun/Kadazan of the north and east and the Murut of the southern highlands (see fig.1 above). The term 'Murut' embraces two groups: the Kelabitic Murut, whose dialects are nearly mutually intelligible, and the Idahan or Sabah Murut, who speak a different language. These inland peoples until relatively recently maintained indigenous belief systems involving the propitiation of an array of local spirits, though many of these communities have adopted Christianity or (to a lesser extent) Islam. Due to the virtual absence of material addressing the musical practices of Sabah's Chinese communities, emphasis in the following sections will be given to Malay, Bajau, Dusun/Kadazan and Murut populations.

While Qur'anic recitation has exerted some influence on scales and musical practices, especially in the coastal regions, the musical styles of the peoples of Sabah nevertheless share some general similarities. Many groups have instruments and songs in common, and, as is the case elsewhere in the South-east Asian archipelago, basic tonal patterns are usually founded on a pentatonic scale with nearly equal intervals, or on a heptatonic scale with unequal intervals from which other pentatonic scales derive. Both non-equidistant and nearly-equidistant scales may be present on different sets of instruments in the same ensemble. The range used in the non-equidistant scales may exceed an octave, with the pitches of the upper register often differing slightly from those of the lower one. Similar tuning tendencies are evident in various traditions of nearby Sarawak (see §III below) and east Kalimantan (*see* INDONESIA, §VII, 1).

Archival recordings are housed in the British Library National Sound Archives and the Archives of Traditional Music at Indiana University, Bloomington.

1. Instrumental traditions. 2. Vocal performance.

1. INSTRUMENTAL TRADITIONS. Most instruments produced by the Dusun/Kadazan and Murut peoples of the interior are made of wood, bamboo or palm; metal instruments are imported from the coast. An idiophone commonly known among both Dusun/Kadazan and Murut populations as *bungkau*, *turiding*, *uriding* or other variants is a jew's harp carved from a type of palm stem. Its lamella, weighted with beeswax, is vibrated by tapping or plucking the base plate. The *bungkau* is generally played for personal enjoyment, but it also serves other purposes, which vary from community to community. In certain Dusun/Kadazan regions, for instance, the *bungkau* might be used as part of post-harvest activities, as an imitation of gong music for dancing, as a means by which to call edible lizards, or (in the past) as a marker of warriors' departure to or return from battle. Some groups also use the *bungkau* to simulate song or verse.

Other non-metal idiophones used by inland populations include the Dusun/Kadazan *togunggak* (Sabah Murut: *tagunggak*) and the Sabah Murut *lansaran*. The *togunggak* consists of a large number of tuned bamboos, each carried and struck by one person. Well-suited to mass participation, this instrument is associated with harvest processions, wedding ceremonies and other festive occasions. *Togunggak* can also be used as dance accompaniment in the absence of gongs. Like the jew's harp, the Murut *tagunggak* was played in conjunction with head-hunting ceremonies in an earlier era. The *lansaran* is a type of Murut dance floor, which springs vertically about 30 cm or more when activated by dancers (who also sing) and produces regular crashes as it hits its base supports. The rhythm of the crashes and the tempo of the song sometimes move slowly out of phase, which is surprising in view of the physical difficulty of breathing in a rhythm different from that produced by the floor.

Large, vertically hanging gongs are imported by coastal peoples for use by both coastal and interior populations of Sabah. Particularly among the inland communities, these instruments can constitute a major category of hereditary wealth. The *tawag* (or *tawak*) is a heavy, bossed gong with a wide, inward sloping rim and a deep tone. A similar gong, called *sanang* by the Dusun/Kadazan or *canang* by the Malays, has a narrower rim and higher pitch. A third type of gong, identified as *tagung* in Dusun/Kadazan regions, is a large, light, knobbed gong, the narrow rim of which turns in only slightly, if at all. In the coastal communities, these gongs usually serve a supporting role in various heterogeneous ensembles. Among inland peoples, however, hanging gongs combine to form the rhythmic, melodic and timbral core of ensembles commonly known as *magaggong* or *sopogan dangan* in Dusun/Kadazan settings. Such hanging gong ensembles vary in size and composition according to performance context and performing community; ensembles closer to the coast are generally smaller than those

toward the interior. A Dusun/Kadazan group of the low-lying plains might combine six or seven gongs, while another community further inland might assemble seven or eight. A Murut ensemble in the mountainous highlands might include a dozen gongs or more. In performance, the higher-pitched gongs sound interlocking melodies, while one or more sonorous *tawag* produce deep, pulsating tones, articulated and damped by grasping the boss of the gong. One player, often (but not always) a man, is charged with rendering a specific pattern on a single gong, which is struck with a padded mallet. Since each gong differs in pitch, sound quality and volume, a composite timbral-melodic line results from the combination of the discrete rhythmic patterns, producing a rich texture. Ensembles of hanging gongs most often accompany dances, such as the *sumazau* of the Dusun/Kadazan. In the past this dance was associated with warfare and agricultural ceremonies, but it has since become a recreational or otherwise celebratory activity. In some villages, however, the sound of a hanging gong ensemble is reserved for special ritual occasions. While all gong music incidentally advertises public gatherings through its resonant sound, the *tawag* is also used specifically as a signalling device in certain situations.

The *kulintangan* (*see* KULINTANG) gong-chime is an instrument common to the coast and coastal plain areas of Sabah, where it is played by Bajau, Brunei Malay and Dusun/Kadazan peoples. This instrument, which was evidently introduced to Sabah via the Philippines and Brunei from the 18th century onwards, consists of a wooden frame containing a row of small, horizontally-suspended, bossed gongs. These gongs (which usually number six or seven on the east coast and eight or nine on the west) rest on two parallel cords for resonance and are struck with sticks made of soft, lightweight wood. Tunings vary, but there is a general tendency towards non-equidistant, anhemitonic pentatonic scales. The *kulintangan* is the focal instrument in ensembles that also commonly include one or more drums and a number of large, vertically-hanging gongs. A single hanging gong typically reiterates one of several standard rhythmic patterns to begin a performance. The *kulintangan* follows, joined by the drums and the pulsating of several *tawag*. As the tempo increases, the *kulintangan* player develops a right-hand melody from the lower to the higher end of the instrument. When the melody approaches the upper register, tension often builds through repeated striking of the highest-pitched gongs. Meanwhile, the left hand embellishes the melody with lower pitches, which also rise gradually to the upper register. In some styles, the higher and lower melodic threads eventually come to resonate in close proximity in the upper range of the instrument, which constitutes the climax of the performance. *Kulintangan* ensembles can be heard at weddings and other celebrations and can also be used on ritual occasions in some communities. Among the Bajau, women are noted players of the *kulintangan*.

The *gabang*, played by both men and women, is a wooden or bamboo xylophone of Philippine origin, used especially by coastal Bajau peoples and (to a lesser degree) Dusun/Kadazan populations. Most of these instruments have nine, ten, or in some regions as many as 17 keys, which rest over an open soundbox and are struck with padded sticks. The *gabang* is played either solo or in ensemble with hanging gongs, or in some Dusun/Kadazan communities, with wooden slit-gongs (*kantung*). It is the principal accompanying instrument both for the popular Bajau song and dance form, *daling-daling*, and for epic singing, where it is sounded mostly in octaves with occasional pitch variation and rhythmic embellishment. Tempo and rhythm differ according to the story, and various forms of both equidistant and non-equidistant scales are featured; there are striking tonal shifts from one scale to another between dramatic episodes. Aside from its role as song and dance accompaniment, the xylophone may be played as a personal pastime. Much of the music for *gabang* is of Philippine, Chinese or Western origin, and the tuning of the instrument resembles the diatonic scale.

Assorted single- and double-headed drums are used by both coastal and inland populations of Sabah. Many of these instruments are called *gendang*, or are known by a similar term. Exceptions here include frame drums such as the *kompang* and the *rebana* with metal jingles, both of which are common in coastal Muslim areas. *Gendang* of the Bajau and Malay communities of the coastal regions are usually double-headed and barrel-shaped. The heads of most of these drums are attached to hoops that encircle the ends of the instrument and are bound to each other with rattan lacings running the length of the drum. These lacings can be tightened or loosened to tune the instrument. Such drums normally constitute part of the coastal *kulintangan* ensembles. Single-headed drums are generally more common in the inland regions. Whether single- or double-headed, the skins of these inland instruments are usually bound to the wooden body of the drum with rattan, with wedges driven between the binding and the drum body to facilitate tuning. Ritual hanging-gong ensembles of inland communities typically include single-headed drums, while double-headed instruments might appear in recreational ensembles such as *kulintangan*. Throughout Sabah, drumheads are usually made of goat skin, deer skin or cowhide, depending on the region and group of people using the instrument. Also depending on the community, as well as the repertory being performed, drums can be played by either men or women.

Chordophones of the interior areas include the Dusun/Kadazan *tongkungon*, the Sabah Murut *gulintan* and the Dusun/Kadazan *sundatang*. The *tongkungon* and *gulintan* are plucked tube zithers, each made from a large segment of bamboo. From the cortex of this bamboo, strips are cut longitudinally, with the ends remaining attached to the tube. These strips are then raised to form 'strings' that are tuned by inserting bridges at each end. The number of strings, typically from five to eight, is usually determined by the number of instruments in the local hanging-gong ensemble. Indeed, several limited melodic lines can be sustained on the *tongkungon*, effecting an imitation of gong music. Some instruments, however, have fewer strings, which are made of steel, attached to pegs and tuned to a non-equidistant scale. The *sundatang*, which in some ways resembles the Kayan *sapé* of Sarawak (see §III, 3 below), is a plucked lute with a heterogeneous neck and two or three fibre or metal strings. Frets, placed under one string only, are affixed with beeswax and are moveable to allow for changes in tonality.

String instruments characteristic of Malay and Bajau coastal regions include the *gambus* and *biola*. The *gambus* is a plucked lute typically associated with Muslim communities throughout the South-east Asian archipelago.

Some of these instruments are clearly of Middle-Eastern origin or descent, while others have been so substantially adjusted to correspond to local aesthetics and availability of materials that they appear only remotely related to Middle-Eastern prototypes. These instruments are bowl lutes, usually with three or four metal strings (or courses) that are plucked with a plectrum. Much of the *gambus* repertory is intended to accompany Malay dances such as *joget* or *zapin* (see §I, 1(iv) above). A chordophone common especially among the Bajau is the *biola*, a bowed three-string box lute, the exact shape of which varies from community to community; one *biola* might resemble a violin, while another might look more like a banjo. The instrument is held upright, with the end of the soundbox on the floor and the neck pointing toward the player. The *biola* is associated with major social events, where it is usually played by women to accompany singing.

Aerophones of Sabah include the *suling*, an end-blown flute played by various groups; the *turali* (*turahi*, *tuahi*), a nose flute most common among Dusun/Kadazan peoples; the Dusun/Kadazan *sompoton* (fig.7), a mouth organ resembling the Kayan *keledi* of Sarawak and Indonesian Borneo and related instruments from the South-east Asian mainland. The *suling* is made from a stopped bamboo pipe with five or six fingerholes, while the Dusun/Kadazan nose flute, *turali*, is blown with one nostril plugged and produces four pitches. Both flutes are played for personal entertainment, although the *turali*, which is generally evocative of sadness, can be played privately as a type of mourning in some communities. In such cases, the melody imitates that of women's funerary wailing. Such links between melodies of flutes and melodies of mourning are not uncommon on the island of Borneo. The *sompoton* consists of a dried, long-necked gourd into which have been inserted eight bamboo pipes arranged in two parallel ranks of four. Into the ends of seven of these tubes (one tube is mute) are inserted small *polod* palm reeds, which vibrate inside the gourd when the player blows into the neck of the instrument. Pitch on the *sompoton* is controlled by fingerholes on the sides of the pipes and by stopping the exposed ends of the shorter pipes with the fingers. This instrument is capable of producing a polyphonic texture with melody and drone-like parts. Most aerophones of Sabah can be played by either men or women.

7. Sompoton (mouth organ) of the Dusun/Kadazan people

Especially in Sabah's interior areas, the practice of most of the instrumental traditions outlined above has diminished considerably over the second half of the 20th century. The only clear exception is the *kulintangan*, but this tradition has also undergone a degree of modification. Indeed, a European snare drum has been known to replace the *gendang* in some *kulintangan* ensembles. Practice of other local instruments has largely been eclipsed by the popularity of the guitar among most younger people, and audio tapes have come to replace live music in many instances.

2. VOCAL PERFORMANCE. The vocal repertories of the Dusun/Kadazan and Murut peoples of Sabah are extensive and varied. Sung and chanted ritual verses and prayers, lullabies, epic narratives and songs about people, places and events are among the principal vocal performance types. On account of the diversity of repertories and traditions, two specific communities will be highlighted here: the Lotud subgroup of the Dusun/Kadazan people and the Lun Dayeh, who are usually grouped as Kelabitic Murut. Within the indigenous belief system of the Lotud, sung and chanted verses of the *monumbui rinait* prayer insure the social and spiritual well-being of the community. These verses are performed by female ritual specialists, while men accompany them on gongs and drums. The *monumbui rinait* is cast in what is understood to be an archaic ritual language, much of which the priestesses themselves can neither translate nor clarify. Other song types of the Lotud include *tinjau*, *binono*, *lingo* and *bandak*. *Tinjau* and *binono* are ritual song genres, known and sung only by old men. *Lingo* are recreational songs such as lullabies, which are recognized for their melodic and textual clarity. The *bandak* repertory, however, is packed with symbolism and allusion, crafted artistically and spontaneously as the singer improvises on a basic descending melodic line. This type of song may be directed toward a particular individual, who sometimes responds with another *bandak*, thus initiating a song exchange that may continue for some time.

The Lun Dayeh use the term '*buek*' to refer to the whole body of sung and chanted repertory. *Buek* can be divided into numerous named subcategories encompassing various types of epic singing, other historic or mythological narratives and shorter songs about people and specific situations, as well as ritual or ceremonial forms. *Mumuh*, *arin* and *dadai Upai Semaring* ('Song of Upai Semaring') are three types of epic tales, the performance of which may span more than eight hours and be spread over several days. These performances can be distinguished by differences in principal characters and melody, as well as by the gender of the singers in some instances. Women are the primary performers of *mumuh* and *arin*, while

men are the typical singers of *dadai Upai Semaring*. Other types of *buek* include an array of shorter forms, some of which may be partly sung and partly narrated. Topics of these smaller-scale songs generally include the exploits or praise of mortal folk heroes, migration stories and serious or humorous accounts of people, places and situations. In the past, singers of the *ukui* variety of *buek* extemporized on the bravery of men who had just returned from a successful headhunt. Lun Dayeh *buek*, like the *monumbui rinait* prayers of the Lotud, are rendered in a specialized language that is laden with rhymes, metaphors and archaic or otherwise unusual vocabulary.

Regarding musical style, much of the Dusun/Kadazan and Murut vocal repertory is performed by a soloist, supported by a chorus that often provides a drone-like melodic anchor with occasional pitch variation, a style reminiscent of that of the Dusun/Kadazan *sompoton* mouth organ. Some forms, such as the songs for *lansaran* dancing in Sabah Murut communities, may be sung in unison by alternating male and female choruses. Cadence points in Dusun/Kadazan and Murut vocal performance are generally marked by a drop in pitch to an implied tonic, often the same pitch as the drone (if present).

Some prominent types of vocal performance among coastal peoples include Qur'anic recitation, songs for Malay *joget* and *zapin* dancing, *pantun* quatrain exchange, epic singing (especially among the Bajau) and songs for the *berunsai* and *daling-daling* dances. Qur'anic recitation is practised by the various Muslim communities in Malaysia. While it shows tonal inflection and timbral variation typical of Middle-Eastern vocal styles, it nevertheless retains indigenous elements, such as the use of a wider pentatonic range at cadence points. *Joget* and *zapin* are dance forms characteristic of most Malay communities throughout the South-east Asian archipelago. *Joget*, while rooted in a relatively fast-paced Malay folk form, has developed into a type of popular dance, likewise accompanied by pop music in Malay and other local languages. *Zapin*, on the other hand, is a dance form remaining strongly associated with the Muslim Malay community. The songs for *zapin* are typically accompanied by a small ensemble, with the *gambus* or sometimes violin or accordion as the lead instrument. Most *zapin* songs are structured as a series of quatrains in question-and-response fashion, interspersed with short instrumental interludes. This song form, generally known as *pantun*, also appears among non-Malay peoples, where it is rendered in other local languages, accompanied by different instruments and may not be associated with dance (e.g. *pantun* singing among the Bajau). In this case, quatrains are exchanged between a male and female vocalist to the accompaniment of the *biola*. Among the Bajau, the words of *pantun* verses are largely improvised and commonly address topics of love, everyday affairs, important events and, more recently, current social issues.

Verse exchanges between men and women, either singly or in groups, are characteristic of a number of Bajau music and dance forms, including *berunsai* and *daling-daling*. In performance of *berunsai*, a group of male dancers stomps rhythmically around a group of female dancers whom they engage in sung dialogue. Each line of song is performed to the same, narrow-range melody and is rendered in a variety of Bajau language that is barely intelligible to members of the younger generation. While *berunsai* singing is unaccompanied, songs for the *daling-daling* couple dance are usually performed together with *gabang*, with verses exchanged in dialogic fashion. The verses of these songs are largely improvised to tunes that are well-known in Bajau communities and often suggest the influence of Western tuning and musical styles. Aside from its role in *daling-daling* dancing, the *gabang* is also used to accompany Bajau epic singing. This repertory, in contrast to the *daling-daling* songs, contains declamatory passages where a rapid flow of words is greatly valued, and slow passages, rich in inflection and ornamentation, showing the influence of Muslim vocal aesthetics.

As is the case with many of the instrumental traditions highlighted earlier, much of the vocal repertory outlined here has become a remnant of a bygone era, existing primarily in the memories of the elderly members of the communities. This is particularly true of the longer narrative forms but also holds for some of the shorter genres. Some Dusun/Kadazan songs are now accompanied by Western instruments, constituting a separate song category: *sinding*. Western or Malay melodies are also borrowed for many Dusun/Kadazan songs, in which instance they are called by the Malay term '*lagu*', even though they might be performed in Dusun/Kadazan languages. It is important to recognize that in addition to the continued cultivation of older village- or group-specific song forms, there exists a significant local market for various styles of rock and pop music in Malay, Dusun/Kadazan, Murut and Bajau languages.

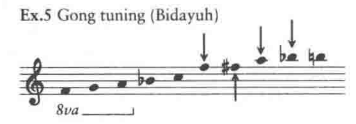
III. Sarawak

Located on the northern coast of Borneo, Sarawak includes many ethnic groups (late 19th- and early 20th-century sources mention an even greater variety than exists now); generalization about the area's music is thus



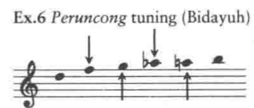
difficult. Although the music of Sarawak shows some connection with the music of Java and Bali (e.g. the use of gong sets) and with the music of mainland South-east Asia (similar chordophones and mouth organs), its origins remain obscure. This article discusses the music of the largest ethnic groups in the region. (*See also* §II, and INDONESIA, §VII, 1.)

1. Bidayuh. 2. Iban. 3. Kayan and Kenyah. 4. Other ethnic groups.

1. BIDAYUH. Bidayuh ('Land Dayak' in early literature) villages each usually have a set of vertically hung gongs that are highly valued for their religious and economic significance. They are played at *gawai* (festivals of any kind, including recurrent religious and occasional healing ceremonies) and at receptions for important visitors. A gong set consists of three *ketawak* (large, thick, bossed gongs), two *puum* (large flat gongs), one *bendai* (small bossed gong) and three *sanang* (smaller bossed gongs); such complete sets, however, are rarely found. Various villagers own the individual gongs and derive their status from this ownership; when a person dies, the gongs belonging to his family may not be played during the mourning period. A local legend has it that Bidayuh gongs were originally obtained from Java; it is known that they were imported from Brunei and China and are now purchased from makers in Kuching, the capital of Sarawak. A complete instrumental ensemble also includes two *kandang* (drums) about 1·8 metres high played by one performer, and a *dumbak* (small drum).

Bidayuh music varies in complexity from simple rhythmic patterns to fairly complex three- and four-strand combinations. Gong music is always in duple time, though syncopation is frequent and sometimes obscures the basic stress. As with almost all instrumental music in Sarawak, there is little dynamic variation. Gong pieces characteristically begin with a rhythmic pattern on *kandang*, then an ostinato (most commonly two alternating notes a 3rd or 4th apart) on two of the *sanang*; the next instrument to enter is a single, bass-range gong; finally, after the rhythm has been established, the most varied melodic line begins in the lower-middle range. Syncopation is not confined to this central melodic line but may occur at any level. Exact imitation of one part by another occurs rarely, if at all. There seems to be no standardization of tuning in gong music. One set of gongs had the pitches shown in ex.5, which may be regarded as

Ex.5 Gong tuning (Bidayuh)



typical, although the same tuning would probably not be duplicated precisely in any other set. Gongs are made and acquired separately rather than as sets.

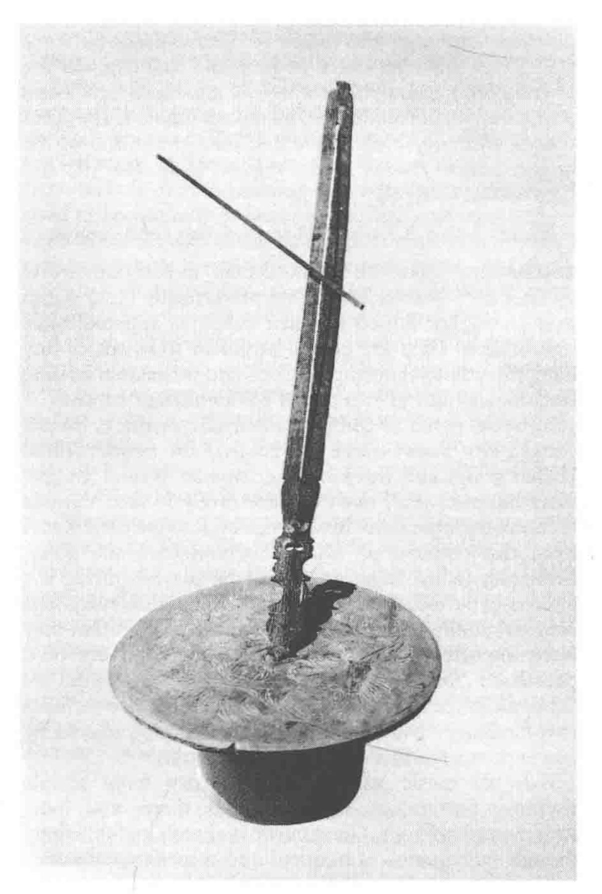
Played principally for entertainment (though not for dancing), Bidayuh five-hole flutes (mouth flutes) are also used in rituals to recall the spirit of a girl who has fainted or been in a trance. The flute used for these purposes is the *banci*, a large flute. A smaller flute, the *encio*, is played by young men as a preliminary to courting: if the girls respond favourably, the *ayun* (traditional dialogue love-song) follows, unaccompanied by the flute, a type of courtship ritual that also occurs elsewhere in South-east Asia, for instance among the hill tribes of northern Thailand. Extemporization is common in Bidayuh flute music, especially in village playing. There is no regular stress in this recitative-like style; the melody wanders throughout the flute's range (one and a half to two octaves depending on the size of the flute and the player's skill) in a slow tempo, with little repetition of motifs or phrases. Bidayuh flute music often lasts for hours; when played for entertainment, it is a kind of background music, but when it is played as part of a religious ceremony, it commands the listeners' full attention. Although solo playing is more common, ensembles of flutes do exist; as no attempt is made to tune the instruments to the same pitch, 'unison' playing, when it occurs, may produce as many pitches as there are players.

Junggotan (jew's harps) are also used both for entertainment and courting. Their range is usually less than a 4th, and no fixed series of notes can be measured. Stepwise progressions, with sliding between the notes, occur the most frequently, as does duple time (though triple time does occur occasionally). Tempos are faster and rhythms more strongly accented than in flute playing. Another Bidayuh idiophone is a set of tuned bamboo rods that are beaten to imitate the music of gongs. The range is more limited than that of the gongs, as bass notes are absent. These *peruncong* (in some areas *keruncong*) are played by groups returning home after planting paddy. As in gong music, an ostinato begins in the higher part of the range, followed by a varied melodic line below. The ostinato is usually metronomically regular; the main melody, though more varied than the ostinato, is never as complex as the main melody in gong music. Ex.6 shows the tuning for a typical set of *peruncong*.

Ex.6 *Peruncong* tuning (Bidayuh)

String instruments are rare among the Bidayuh; fiddles are no longer found, but a plucked chordophone, the *tinten*, does exist.

2. IBAN. Among the Iban ('Sea Dayaks' in early literature), a ceremonial gong set includes the large bossed *setawak*, the *bendai* and an *enkerumong* (gong-chime) of about eight bossed gongs, each less than 30 cm wide, set horizontally in a frame. The *gendang panjai* (entertainment ensemble) includes one *enkerumong*, a *bendai*, a *setawak* and two *dumbak* (drums), while the *gendang raya* (religious ensemble) has two *setawak*, three *bendai* and no drums. Iban customs and taboos are similar to those of the Bidayuh. Compared to the gong music of the Bidayuh, Iban gong music is generally more complex, with more syncopation and more common use of sequences. The upper (ostinato) part in some gong pieces (ex.7) does not remain at the same pitch but creates a

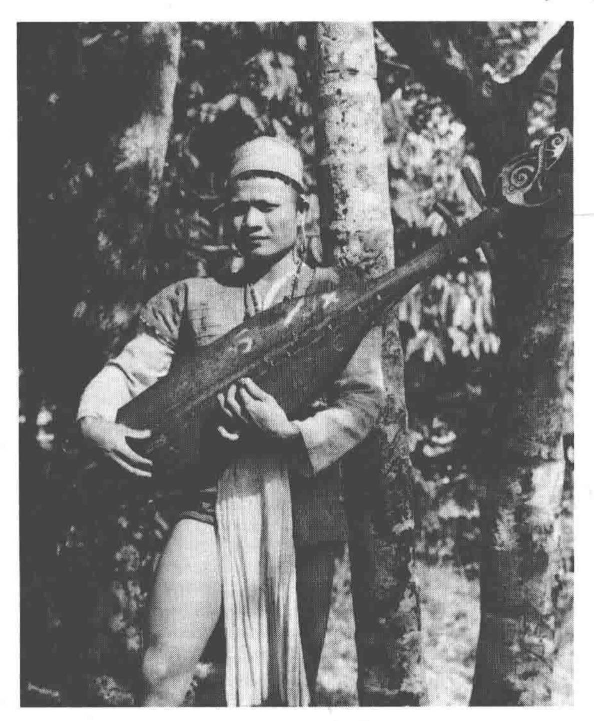


Ex.7 Gong ostinato pattern (Iban)

feeling of tension by rising steadily and gradually, often with rhythmic syncopation. The *engkerurai* (mouth

organ), made of bamboo pipes and a gourd wind chamber (similar instruments occur in China, Laos and among the hill tribes of Thailand and Myanmar), is used among the Iban for men's dance music. It is difficult both to make and to play; it has a reedy tone, produces two- and three-part harmonies and is played in a lively rhythmic style. Iban flutes vary in length from 45 cm to 75 cm; *kesuling* (mouth flutes) are more common than *sangui* (nose flutes) and, along with the *ruding* (jew's harp), are courting instruments. Iban flute and jew's harp music does not differ basically from that of the Bidayuh, though the greater variety of ornamentation and rhythmic structure in Iban music may perhaps indicate a greater degree of technical resource.

Chordophones, many now rare or extinct, include the guitar-like *belikan* with two to four strings, each having a sympathetically resonating string tuned with it. The *engkerabab* (two-string fiddle) has a series of low bridges on the neck. The bowed *merebab* (coconut-shell fiddle) has one string; there are also one- and two-string fiddles with cylindrical soundboxes that closely resemble fiddles in mainland South-east Asia. Bowed string music, much rarer than flute music, resembles it to some extent; metre is not strict, and solo improvisation is common. Plucked chordophones are usually played in strongly marked duple time, with the lower strings providing a drone bass; melodies for these instruments include frequent repetition of motifs and phrases. The Iban have a *satong* (cylindrical bamboo tube zither) and an *engkeratong* (five-string harp); the latter, which is less often found, consists of a wooden rectangle with two vertical, carved rods within the hollow, between which the strings are stretched and pass around a third vertical rod placed in the centre. Another chordophone, the *busui* (fig.8), consists of a bow placed on a wooden disc, which in turn rests on a bowl; sound is produced by tapping the bow-string.



8. *Busui (musical bow on wooden disc)*

Names for song types vary among the area's administrative divisions; the words 'pengap' or 'timang' denote ceremonial or religious songs, *sugi* and *sabak* are songs for curing and mourning respectively; the word 'pantun' is sometimes used as a general word for song; it also means stanza. Typical songs have a narrow range (approximately a major 3rd) with occasional falsetto notes a 5th or 6th above this basic range in men's singing. The singer slides from note to note, and even on long notes the pitch does not remain constant. Ornamentation similar to Western turns and mordents is common. Usually there is no regular beat, and phrase lengths vary considerably, depending on the demands of the text. Words are never drawn out melismatically but are set syllabically; if there are more notes to follow before the next word, humming or the syllable 'er' is employed. This technique is also practised with sustained notes; the word is pronounced completely and quickly, and the note is then sustained on 'm', 'n', 'ng' or 'er'. Tessitura in Iban singing is generally low; in solo singing both men and women use a nasal tone.

3. Kayan and Kenyah. The Kayan and Kenyah have similar musical traditions. Both use gongs in ceremonies; the complete gong set resembles that of the Bidayuh, though the names of the gongs and the customs attached to them are different. They also play a nine-bar xylophone not found among other groups, a practice dating from the mid-20th century. Their bamboo nose flutes (Kayan: *selingut ba*) have one hole beneath and five above and are played by women in some communities. Another women's instrument, the bamboo jew's harp (Kenyah: *uding*), has a more limited range than the Iban jew's harp. One of the most popular instruments of these people is the thumb-plucked lute (Kayan: *sapé*'; fig.9). Usually played by men only, the *sapé*[1] has three or four wire strings and 10 to 13 low frets on the neck and across the face of the instrument, placed under the bottom string only. The two upper strings, commonly tuned to the tonic and dominant or subdominant, provide a pedal or ostinato for the melody. On contemporary instruments, the frets are movable and are usually arranged to produce two to three octaves of an anhemitonic or semitone unit. Sometimes a semitone unit in a lower register will be coupled with an anhemitonic unit in an upper one. Many pieces now employ an entirely anhemitonic tuning, the pitches of which are found in the Western major scale. Missionary influence and the Western guitar's popularity may have caused this tuning to be adopted. *Sapé*' music is strongly accented and is usually in duple metre. New *sapé*' tunes are still being composed, of which ex.8 is typical. The Kayan and

Ex.8

9. *Sapé' (three-string lute) of the Kayan*

Kenyah have only one drum (Kayan: *tuvung*), a cone 3·6 metres high with an opening 90 cm wide at one end, covered with a deer- or goatskin membrane, and an opening 45 cm wide at the other end. These huge drums are apparently no longer made, although they still hang in the longhouses of many villages. They are used primarily for signalling but also figure prominently in the rituals of some non-Christian communities. Tuned bamboo idiophones (Kayan: *tangbut*), similar to the Bidayuh *peruncong*, are played during paddy planting. There are no substantial differences between the Kayan, Kenyah and Bidayuh styles of playing; treble ostinatos are characteristic of all. The Kayan and Kenyah tube zither (Kenyah: *lutung*) is similar to the Iban *satong* and usually has six bamboo strings tuned by bridges placed along the cylinder. The Kayan and Kenyah people also play a mouth organ called KELEDI or *keredi* by the Kayan, and *kediré'* by most Kenyah; an entertainment instrument, it is similar in structure and style of playing to the Iban *engkerurai*. Bamboo percussion, tube zithers and mouth organs are rarely heard today. Singing styles, apart from solo songs, are more varied than those of the Bidayuh and include dialogue songs in which the solo singer has a complex, unaccented melody with a range of a 5th or 6th and many grace notes and ornamented melismatic passages.

4. OTHER ETHNIC GROUPS. The Kelabit and Lun Bawang have flute bands that combine up to 24 flutes with a drum; the flutes all play the same melody in approximate octaves, a type of playing (closely resembling school recorder bands in Western countries) that probably developed in the early 20th century. Bands of this size are not common, and their formation necessarily involves organized class teaching rather than the former one-to-one teaching relationship. In some Kelabit songs, the vocal line breaks briefly into two-part harmony. The Punan are locally famous for their dramatic recital of sung stories; they, too, play the bamboo tube zither but do not have gongs or drums.

Melanau music is similar to Iban music, with gong sets and religious chants. One unusual instrument is the *genang* (large upright drum) used by the Melanau at healing ceremonies. Their most common type of flute, the nose flute, is a courting instrument played in a soft, slow style. Instruments played exclusively by women are the bamboo tube zither (commonly found), and the jew's harp (rare). Bamboo mouth organs similar to the Iban *engkerurai* are used for men's dance music. The Melanau do not, however, make bamboo idiophones like those of other tribes for use at rice-planting time.

In Sarawak, Malay music differs markedly from the music of the indigenous groups because of Muslim influence. The vocal range used by the Malays is considerably greater (one and a half octaves is fairly common), and although sliding between notes is frequent, pitches are held steady more often than in other Sarawak vocal music. A type of simple two-part vocal harmony exists in which the voices show some independence, though in melodic singing they progress for the most part in parallel 4ths. Although many Malay songs are not in any strict metre, phrasing is more regular and definitive than in the music of other local communities. A few songs have 16-beat phrases, but in most cases extra time is allowed during florid melismatic passages. Moreover, even where a four-beat rhythmic pattern is firmly established, rests occurring at the ends of phrases are usually cut short. The Sarawak Malay use *tara* (bossed gongs), 30 cm in diameter, and *mengeris* (single-headed drums), shaped like flattened spheres. Drums are sometimes used to accompany singing. The *bedok*, a mosque drum found also in West Malaysia, was imported into Sarawak in the 20th century; however, the *dumbak*, a drum long associated with certain local Sarawakian ensembles, is also used at mosques. Among Malay instruments in the Sarawak Museum are large war drums, apparently no longer played, and *gambus* (plucked, unfretted lutes) made of hardwood.

A significant portion of Sarawak's population is Chinese. Their music is similar to the music of Chinese groups in other South-east Asian countries, the most common public manifestation being lively popular operas professionally performed at celebrations.

Many of Sarawak's older music traditions are no longer practised or have lost much of their popularity. However, new traditions have emerged in a musical environment that continues to be dynamic. There is thus a great need for ethnomusicological research in the area; this effort has been helped by RTM (Radio Television Malaysia) Sarawak, which broadcasts indigenous music and encourages field recordings. In 1954 W.R. Geddes produced an ethnographic film on the Land Dayaks (Bidayuh), a copy of which is held in the Sarawak Museum at Kuching.

Malbecque [Malbeke], **Guillaume** (**Mediatoris de**) (*b* *c*1400; *d* Soignies, 29 Aug 1465). South Netherlandish composer. He evidently came from the area of Maalbeek, north of Brussels. By November 1431 he had joined the chapel of Pope Eugenius IV where he remained until 1438. From 1440 until his death he served as canon of the collegiate church of St Vincent in Soignies, where his colleagues included Binchois, Johannes Regis and Jacobus de Clibano. In May 1447 he travelled to Cambrai Cathedral to meet Du Fay and exchange ecclesiastical benefices. He was listed as an executor of Binchois' will in 1460.

Five chansons, all in *GB-Ob* Can.Misc.213, are ascribed to Malbecque. The four rondeaux compared with only one ballade may reflect the early 15th-century preference for the rondeau above the other *formes fixes*. In *Quant de la belle me parti* and *Adieu vous di* the text appears in the top voice alone; in *Ma volenté ne changera* it is given to the top voice and tenor; in *Dieu vous doinst bon jour* and *Ouvrés vostre huys*, however, the text appears in all three parts. The degree of rhythmic complexity varies greatly from piece to piece, a typical feature of early 15th-century chansons. Malbecque employed extreme syncopations and cross-rhythms in those songs in which one texted voice is accompanied by two untexted lines, and his least complex rhythms in the two rondeaux in which all parts carry text. His five songs are equal in quality to the best chansons of contemporary composers like Grenon and Fontaine.

CRAIG WRIGHT/SEAN GALLAGHER

Malchair [Malscher], **John** [Johann Baptist] (*b* Cologne, bap. 15 Jan 1730; *d* Oxford, 12 Dec 1812). German violinist, collector of national melodies and watercolour artist. Son of a watchmaker, he sang in the choir of Cologne Cathedral for six years from 1744. By 1751 he was in Nancy and in about 1754 he went to London where he taught drawing at a ladies' school and played the violin in concerts at inns. He then moved to Lewes, where he taught music to officers and came under the influence and patronage of the artist Robert Price of Foxley. In 1758 he was living and working as a musician in Bristol, and in the following year he began an association with the Three Choirs Festival (where he led the second violins) which lasted until about 1776.

In 1759 he was elected to lead the Oxford Music Room band, which held weekly concerts, and he remained in Oxford thereafter. He married Elizabeth Jenner in 1760; she died in 1773. Malchair led the band until 1792, becoming a respected figure there. He resigned when an orange, thrown during a student fracas, broke his violin. Other recorded engagements outside Oxford include a two-day festival of Handel's music at Banbury in October 1766, and a performance of Handel's *Acis and Galatea* at Oakley Wood House, Cirencester, in August 1773. He took an interest in the music collections of Aldrich and Goodson in the library at Christ Church, transcribing a number of extracts from Italian cantatas and writing a catalogue of the music collection in 1787 (*GB-Lcm* 1098 and 2125).

William Crotch, after his arrival in Oxford in 1788, befriended Malchair who was by then losing his sight. Crotch notated his violin tunes into a manuscript now in the Bodleian Library (Mus.Sch.D.32); he added biographical notes throughout and these form an important source of information about his life. Malchair, like Crotch, was a gifted artist and painted numerous scenes of Oxford, the country of the Three Choirs and of North Wales, which he visited in 1789, 1791 and 1795. Crotch aquired all of Malchair's work from these three visits; some 600 of his drawings are extant. As an artist he is of some considerable importance in the history of landscape painting in England; through Crotch, he undoubtedly had an influence on Constable.

Malchair also took an interest in traditional and folk music. In his *Specimens of Various Styles of Music* (*c*1808) Crotch acknowledged the help he had received from Malchair ('who has made National Music his study, and to whom I am … indebted for most of the national and other curious music … in this work'). The English Folk Dance and Song Society possesses a volume of airs noted by Malchair, which is the surviving book of at least three. The tunes are mainly from Playford's *The Dancing Master*, but several were noted from singers and military bands heard on the streets in Oxford. A second book, known as *The Arrangement*, is in the Royal College of Music (MS 2091). Malchair's own violin melodies in Crotch's manuscript are written in a similar folk style. They are his only compositions apart from a glee *Grazie al inganni tuoi* (*GB-Lbl* Add. 31412) and the fourth clock chime, which is still rung at Gloucester Cathedral.

ROBERT J. BRUCE

Malcior de Wormatia. *See* SCHANPPECHER, MELCHIOR.

Malcolm, Alexander (*b* ?Edinburgh, 25 Dec 1685; *d* Queen Anne County, MD, 15 June 1763). Scottish theorist and teacher. His father was a minister in Edinburgh, 1681–7, so he is likely to have spent his childhood there. As a young man, Malcolm devoted much time to teaching mathematics and related disciplines and to compiling various treatises, read both in Europe and America. It was his *Treatise of Musick: Speculative, Practical and Historical* (Edinburgh, 1721, 1779/*R*), that established his musical reputation. Relying on the writings of Descartes, Kircher, Mersenne and others, Malcolm's object was to 'gather together in one system what lay scattered in several treatises'. Included are chapters on the history of music and on equal-temperament tuning, instruction in elements of composition, including melody, harmony, counterpoint, intervals, the musical scale and modulation, as well as directions for tuning a harpsichord. Hawkins considered it 'one of the most valuable treatises on the subject of theoretical and practical music to be found in any of the modern languages', and Stone has given evidence that Malcolm was the first British author to write a history of music in English rather than Latin.

By 1734, Malcolm had emigrated with his two sons to New York where, as master of the grammar school, he advertised, in the *New York Gazette*, his concern for public education. From 1740 he was in Marblehead, Massachusetts, as rector of St Michael's Church. Because of ill-health and insufficient income, he decided to seek a warmer climate and in 1749 accepted the rectorship at St Anne's Parish Church, Annapolis, Maryland. Several

weeks later he joined the Tuesday Club, an organization founded in 1745, whose purpose as expressed in the minutes of the meetings was to 'meet, converse, laugh, talk, smoke, drink, differ, agree, argue, philosophize, herangue, pun, sing, dance & fiddle together'. Malcolm was often asked to play his violin and flute. He probably participated in the first documented performance of an opera, accompanied by an orchestra, in America in 1752 (New Theatre, Upper Marlborough, Maryland). In 1754 he was appointed rector of St Paul's Parish Church in Queen Anne County, Maryland, and later he was also appointed master of the Free School there. He was forced to resign that position in 1759 because of his disputes with the school board about what was to be taught in the school, and about his inability to attract a sufficient number of students.

JAMES R. HEINTZE

Malcolm, Carlos (Edmond) (*b* Guanabacoa, 24 Nov 1945). Cuban composer and pianist. He studied in Havana at the National School of Fine Arts and the Roldán Conservatory with Federico Smith and Margot Rojas. In 1981 he completed his advanced studies in composition with Fariñas and Valera. In 1979 he worked in Ecuador as adviser to a dance group, for which he composed *Eclosión*; he also gave lessons in modern harmony. At present he lives in Italy.

His work is characterized by the free use of 12-tone, serial and aleatory techniques, and also elements of popular music, to which he gives a personal and contemporary colour. Among the most noteworthy of his works are the three piano pieces *Articulaciones* (1970), dedicated to Coltrane, in which contemporary notions of composition are mixed with traditional jazz elements; the Adagio for piano duet (1974); *El remediano* (1978), written in a dance rhythm and dedicated to Caturla; *Benny Moré redivivo* (1975), which combines elements of popular music with serial themes as a homage to this musician; and *Quetzalcoatl*, for flute and piano (1982), in which he describes in a poetic vision the history of Mexico.

He has also composed incidental music for theatre and cinema, and recordings have been made of his compositions. He has been awarded major prizes for his work in various national competitions.

WORKS
(*selective list*)

Dramatic: Eclosión, dance piece, pf, 1979
Vocal: Canción intermezzo, chorus, gui ens, 1965; Tonos de orquesta, S, inst ens, 1968; Contorno, spkr, mixed vv, orch, 1971; Un verso me piden, S, spkr, mixed vv, inst ens, 1971
Orch: Marionetas, 1964; Montaje, band, 1969; Sym. Movt, fl, orch, 1980; Pf Conc., 1981
Songs (1v, pf): 2 canciones, 1976; Balada del guije, 1979; Coplas de Juan el barbero, 1979; Abrazo, 1980; Matábara del hombre malo, 1980; Un son para niños antillanos, 1980; Spring in New Hampshire, 1981; The Tropics in New York, 1981
Chbr: Allegro en son, wind qnt, 1964; Dúo, fl, cl, 1964; Lo que puede ocurrir en dos pulsaciones, fl, vc, pf, 1969; Una flor que se abre, cl, pf, 1972; Sones de guerra, gui, pf, 1973; Benny Moré redivivo, str qt, 1975; Diálogo I, 2 perc, 3 pf, 1975; Canto con interrupciones, vc, pf, 1978; En broma y en serio, pf trio, 1978; Quetzalcoatl (El canto de la serpiente emplumada), fl, pf, 1982; Rondas para un nuevo son, a sax, pf, 1983; Lo uno y lo vario, vn, pf, 1984; Oposiciones-cambios, 3 pf, perc, 1984; Rumores, pf trio, 1984

ALBERTO ALÉN PÉREZ

Malcolm, George (John) (*b* London, 28 Feb 1917; *d* London, 10 Oct 1997). English pianist, harpsichordist, organist and conductor. He began his musical education at the RCM in London in 1924, returning there to complete his training as a concert pianist after taking degrees in classics and music at Balliol College, Oxford. From 1947 to 1959 he was master of the music at Westminster Cathedral, where he insisted on a bright, continental-style choral tone, bringing the choir to a very high standard and adding many early and contemporary works to its repertory. In 1959 he composed a mass for the cathedral, and in the same year Britten wrote a *Missa brevis* for Malcolm and his choir. As a pianist he concentrated on chamber music, in which he played with many renowned vocalists, instrumentalists and ensembles. He conducted all the major London orchestras as well as symphonic and chamber groups throughout Britain and on the Continent. From 1962 to 1966 he was artistic director of the Philomusica of London and he served as associate conductor of the BBC Scottish Orchestra from 1965 to 1967. Malcolm attained considerable renown as a harpsichordist, both as ensemble player and as soloist, with a large repertory of the most famous works of the English virginalists and the 18th-century masters. His performing style was a brilliant one which freely exploited all the resources of the modern harpsichord. Among his many recordings were Handel organ concertos, harpsichord concertos by J.S. and C.P.E. Bach and, as conductor, Handel's Water Music and concerti grossi op.6. He was made a CBE in 1965 and an honorary fellow of Balliol College in 1966.

HOWARD SCHOTT

Malcourt [Malcort] (*fl c*1470–80). Franco-Flemish composer. The important textless rondeau *Malheur me bat* (ed. in Brown and elsewhere) was ascribed in Petrucci's *Odhecaton* (RISM 1501) and dependent sources to Ockeghem, and with greater probability in two other manuscripts (*I-Fn* B.R.229 and *Rvat* C.G.XIII.27) to Johannes Martini; but a further manuscript (*Rc* 2856), copied in Ferrara during Martini's tenure there, attributes the chanson to 'Malcort', and this ascription seems therefore to be the strongest. The most probable candidate for the composer is Abertijne [Albertinus] Malcourt, a singer and music copyist at Ste Gudule, Brussels, from 1475/6 and choirmaster from 1494/5 to 1497/8. He copied a book of Masses and other works for Ste Gudule in 1474 and two books for St Niklaas, Brussels, in 1486/7. He was pensioned from Ste Gudule in 1513 and died before 9 December 1519. Another possibility is Hendrick Malecourt, a tenor in the Guild of Our Lady in Bergen op Zoom from 1480/81 and 1497/8; Obrecht was choir-

master and principal music copyist there between 1480/81 and 1483/4, and he (like Josquin, Agricola and Andreas Sylvanus) composed a Mass on *Malheur me bat*. The Ja(cobus) Malcourt mentioned by Eitner has never been documented.

BARBARA H. HAGGH

Małcużyński, Witold (*b* Warsaw, 10 Aug 1914; *d* Palma de Mallorca, 17 July 1977). Argentine pianist of Polish birth. His first teacher at the Warsaw Conservatory was Jerzy Lefeld, and then from 1932 to 1936 he studied with Turczyński. Małcużyński also received coaching with Paderewski at Morges in Switzerland before entering the 1937 Warsaw Chopin Competition, where he gained third prize. He completed his studies in Paris with Marguerite Long and made a tour of South America in 1940–42; the latter year also marked his US début in Carnegie Hall. Subsequently he made 14 tours of America. Active as a recitalist up to the time of his death, he had made plans to move back to Poland. In many respects Małcużyński resembled an old-school virtuoso, with a magnetic stage presence and a relatively restricted repertory. Effective and stylish in Chopin – he conveyed both the patriotic fervour and the tender poetry of the music – he could be equally convincing in the large-scale works of Liszt, notably the Sonata in B minor and *Vallée d'Obermann*. Małcużyński's recordings are in many ways distinguished, but they fail to recapture the impact of his live performances.

JAMES METHUEN-CAMPBELL

Maldeghem, Robert Julien van. *See* VAN MALDEGHEM, ROBERT JULIEN.

Maldere, Pierre van (*b* Brussels, 16 Oct 1729; *d* Brussels, 1 Nov 1768). Flemish violinist and composer. He may have received his earliest teaching from J.-J. Fiocco, director of music at the royal chapel, and from H.-J. de Croes, first violin. In 1746 he is listed among the chapel musicians, on the back desk of the second violins; in 1749 he was promoted to first violin when De Croes succeeded Fiocco as director of music. In this period the chapel musicians were required to perform whenever Prince Charles of Lorraine, Governor-General of the Netherlands, had music at dinner or held a concert. The prince singled out van Maldere and furthered his career. While maintaining his salary, he authorized his 'first violin' to present himself at Dublin; van Maldere stayed there from 1751 to 1753 and conducted the 'Philarmonick Concerts' over two seasons. On 15 August 1754 he played in the Paris Concert Spirituel, where the precision of his bowing was remarked upon.

By this time, van Maldere had impressed Prince Charles of Lorraine by his talent and charm; the prince appointed him director of his concerts, and never again parted company with him. As the prince's sister-in-law, the Empress Maria Theresia, recognized van Maldere's talents and diplomacy, he became known among the aristocracy. In July 1756 his first *opéra comique, Le déguisement pastoral*, was performed in Vienna, at Schönbrunn. Shortly afterwards the Seven Years War broke out and this kept the prince and van Maldere in Austria and Bohemia until 1758. On 5 November 1758 *Les amours champêtres*, another *opéra comique*, was performed at Schönbrunn. The next day Charles of Lorraine returned to the Netherlands, and he demonstrated his personal attachment to van Maldere by appointing him 'valet de chambre'. Van Maldere resigned his position as 'premier violon' in favour of his elder brother Guillaume, while his younger brother Jean-Baptiste took a post as a second violin. Pierre continued his itinerant career in the prince's entourage, accompanying him on all his travels, in Austria and to Paris, Mariemont and Tervuren. He also continued to compose numerous symphonies. As peace approached, however, he began to think of settling, and in 1762 he obtained a seven-year contract as director of the Brussels Grand Théâtre; there he conducted, and was in charge of choosing the repertory: tragedies and comedies of the French theatre, as well as *opéras comiques* which he had composed (*La bagarre*), arranged (*Les soeurs rivales*) or written in collaboration (*Le soldat par amour*). Overwhelmed by work and by financial worries, he eventually resigned in 1767. The benevolent Charles of Lorraine tried to save him by entrusting to him the education of a young and talented violinist, but van Maldere died the following year.

The most interesting and characteristic compositions of van Maldere are his symphonies; Hiller and Sulzer acknowledged their importance in the evolution of this form. But if he achieved brilliance in this new genre, it was because in his sonatas he had sought an equilibrium among the various trends of his time: the old-fashioned elements typical of Corelli's sonatas, the brilliant virtuosity of the 'decadent' Italian manner, and the austere clarity of the French style. Thus his sonatas do not present a consistent character. The trio sonatas, though still greatly influenced by De Croes, concede little to the Baroque style. The most common succession of movements, slow–quick–slow (the quick movement often a fugue), is in the traditional mould. The carefully constructed bass, however, gradually plays a greater part in the thematic development; the roles of the first and second violins anticipate their function in later trios. The manuscript trio sonatas at the Milan Conservatory show van Maldere beginning to use the formulae of his day. Fugal movements are abandoned and the bass is neglected; the second violin is commonly drawn under the influence of the first; some of the sonatas end with a movement in dance rhythm. Though clearly less polished, these sonatas are notable for the spontaneity of the first violin part. The sonatas for one violin and continuo display van Maldere's greatest blending of styles. Although the succession of movements remains slow–quick–slow, the first movements are in binary form. The *galant* style, typified by trills and mordents (reminiscent of keyboard writing), is abandoned in favour of formulae particularly suited to the violin (e.g. triplets), enhanced by slurs and by a careful phrase structure that gives point to the melodic line.

By contrast his symphonies, from the beginning, show the characteristics by which van Maldere may be recognized as one of the pioneers of this new genre. The succession of movements is Classical: quick–slow–quick. The bass is fully developed, and is not merely a 'filling' part. The refined language and lack of formulae combine to improve the balance between the parts, which remain independent. Each instrument has its own role: the second violin often surrounds the first with a web of semiquavers; the viola plays in parallel with the bass; and the woodwind and brass are freed from their supporting role to demonstrate the richness of their timbre. The melodic writing remains very simple. The themes may be taken from folk traditions, from peasant dances or from the light music of the court, and are occasionally interrupted by fanfare figures, giving scope to the horn. In some cases the symmetrical thematic development anticipates Mozart's methods. Van Maldere's works thus bridge the gap between the 'decadent' Italian style of the mid-18th century and the Classicism which was to develop in Vienna. In language and spirit they are in line with the works which typify the schools of Paris, Mannheim and Vienna, and reach towards the Classical ideal of Haydn and Mozart.

SUZANNE CLERCX-LEJEUNE

Maldïbayev, Abdïlas (*b* Kara-Bulak, 24 June/7 July 1907; *d* 1 June 1978). Kyrgyz composer and singer. He graduated from the Kazakh-Kyrgyz Institute of Education and then attended the Moscow Conservatory (1940–41 and 1947–50) where he studied with Fere and Litinsky. His first compositions date from 1922 when he wrote a song for a dramatic production. He later wrote the opera *Aychurek* in collaboration with Fere and V. Vlasov for the celebration entitled the First Decade of Kyrgyz Art held in 1939, the year in which he became head of the Kyrgyz Composers' Union. It is generally acknowledged that he was the founder of Kyrgyz professional music and created new genres, especially vocal ones, based on Kyrgyz folklore. He became a National Artist of the USSR in 1939, and in 1970 was awarded the State Prize of Kyrgyzstan in recognition of his opera *Toktogul*. His daughter Zhïldïz (*b* 6 July 1946) is also a musician and is considered to be the first Kyrgyz woman composer.

WORKS
(*selective list*)

Aychurek (op), 1939, collab. V. Vlasov and V. Fere; National Anthem of Kyrgyzstan, 1946, collab. Vlasov and Fere; Toktogul (op), 1958, collab. Vlasov and Fere; Manas (op), 1966, collab. Vlasov and Fere; Sïn Kyrgyza [Son of Kyrgyz] (orat), 1966, collab. M. Abdrayev; cants., choral works, songs and romances

RAZIA SULTANOVA

Malec, Ivo (*b* Zagreb, 30 March 1925). French composer of Croatian origin. After studying with Milo Cipra and Friedrich Zaun at the Zagreb Academy of Music and subsequently with Messiaen at the Paris Conservatoire, he was appointed director of the Rijeka Opera (1952–3). On his first visit to Paris in 1955 he met Schaeffer (whom he has described as his 'only true master') and collaborated with the latter's Groupe de Recherches de Musique Concrète. He refounded it with Schaeffer in 1960 as the Groupe de Recherches Musicales (GRM), and has since put on many concerts and musical events with the organization, including the regular 'Cycle acousmatique'. Malec settled in Paris in 1959, subsequently taking French citizenship. From 1972 to 1990 he taught composition at the Paris Conservatoire, numbering many now prominent younger French composers among his students. His teaching activity has frequently taken him abroad. His awards include five Grands Prix du Disque, the SACEM Grand Prix and the Grand Prix National de la Musique (1992). He is a Commandeur of the Ordre des Arts et Lettres.

Malec is one of those rare composers who has proved equally inventive and successful in the fields of both acoustic and electro-acoustic music. While strongly influenced by the new techniques of the 1950s (not altogether to the exclusion of the jazz influence, as in *Mouvement en couleur*), he has always adhered to a highly personal style characterized by an imaginative and engaging use of musical material. Malec's music reveals the sensual possibilities of sound as much as its capacity for formal coherence. His frequent use of aleatory techniques involves not so much openness of form as local indeterminacy (the composer refers to 'nodes of complexity' or 'great improvised mixes') and the combined use of fixed and free durations. That Malec's spontaneity is in no way

incompatible with a critical and self-conscious awareness of the creative process is evident in *Exempla* (1994) which, according to the composer, summarizes the principal elements of his personal compositional vocabulary. In addition to an important body of electro-acoustic works, Malec has shown a predilection for the voice (female especially) and for stringed instruments: *Ottava bassa*, for double bass and orchestra, is a particularly remarkable exploration of extended instumental techniques. Textural variety (what Pierre-Albert Castanet calls his use of 'deforming mirrors') and the sculpting of sound and form are particularly notable features of his large-scale orchestral works.

WORKS
(*selective list*)

Dramatic: Makete (ballet), Zagreb, 4 June 1957; Prije doručka [Before Breakfast] (ballet), Zagreb, 6 Feb 1958; Naučiti hodati [Learning to Walk] (ballet), 1960; Operabus (ballet), 1962; Pum, Pam, Pom (pantomime), 1963; Victor Hugo – Un contre tous (scenic collage, after V. Hugo), actors, chorus, orch, Avignon, 1 Aug 1971; incid music for the theatre and cinema

JEREMY DRAKE

Malengreau [de Maleingreau], **Paul (Constant Eugène)** (*b* Trélon, Nord, France, 23 Nov 1887; *d* Brussels, 9 Jan 1956). Belgian composer and organist. At the Brussels Conservatory his principal teachers were Alfons Desmet and Tinel (1905–12). He returned to teach at the conservatory in 1913, and was professor of organ there from 1929 until 1953. Among his pupils were Pierre Froidebise, Charles Koenig and Robert Kohnen. His outlook was directed to the past; he was particularly devoted to the work of J.S. Bach, being the first to play Bach's complete organ works in Brussels (1921–2). As in the case of Tournemire, plainsong forms the basis of most of Malengreau's compositions, and indeed part of his output is intended for the liturgy. He also wrote programme music, his organ symphonies being inspired by paintings by Rogier van der Weyden and the van Eyck brothers. While the chromaticism and cyclic treatment of themes reveal the influence of Franck, certain harmonic progressions are typical of Impressionist music.

HENRI VANHULST/THERESE MALENGREAU

Maler [Maller, Moller, Muller]. German family of lute makers. Luca [Laux, Lucas] Maler (*b* Thengen nel Baden, Konstanz, *c*1475–85; *d* Bologna, 5 July 1552), son of Conrad and Margherita Maler, was active in Bologna from about 1503. His brother Sigismondo [Sismondo, Simone] (i) Maler is mentioned in Bolognese documents in 1518, but worked mainly in Venice. Sigismondo (ii), son of Luca, was born about 1505 and died before 1542.

Luca Maler is a principal figure in the history of lute making, and is credited with the invention of the long 'Bologna' body shape. The excellence of his lutes was legendary, and they continued to be mentioned and to fetch high prices long after his death. In 1523 Federico II Gonzaga asked his brother Cardinal Ercole Gonzaga to find him a lute by Maler. The 1566 Fugger inventory (see Stockbauer, 1874, and Smith, 1980) includes four lutes by Laux 'Müller'. In 1648 Jacques Gaultier, in correspondence with Constantijn Huygens who wanted to buy a Maler lute, wrote that Maler was the best maker of nine-ribbed Bologna lutes, that probably fewer than 50 survived, and that certainly fewer than six were known to him in London. Gaultier had bought one for Charles I for £100. Thomas Mace wrote in 1676 that he had seen this lute and two others, '(pittiful, Old battered cracked things), valued at 100 l [£] a piece'. Baron (1727) considered Maler 'without doubt one of the oldest and best masters' and wrote of his lutes that 'it is a source of

wonder that he already built them after the modern fashion, namely with the body long in proportion, flat and broad-ribbed', referring to the practice of many 18th-century German luthiers of reviving the classic Bologna shape.

Bolognese documents show that Maler had considerable commercial success in spite of having arrived in Bologna in a time of unrest, when foreigners were being banished from the city. His last address in Bologna was a large house at the corner of via Marescalchi and via San Mamolo; he also owned other properties and considerable holdings of land in the outskirts of the city. At his death his inventory included more than 1100 lutes in at least three sizes and more than 1300 instruments awaiting completion. The inventory mentions only pre-worked timber, evidence of the factory-like nature of the workshop. Among the several predominantly German luthiers mentioned in Maler's workshop were Giovanni (Hans) Pos, who was married to Maler's sister Anna, and Leonardo Sturmer. Sturmer married a daughter of Pos and is listed as both luthier and 'ebanista' (a worker of decorative inlays in wood). Sturmer inherited the bulk of Maler's business and he and his family continued to trade from Maler's premises. He is mentioned in several notarial documents as 'Leonardo Sturmer alias Maler' or simply as 'Leonardo Maler'. Sturmer and his heirs continued the business until at least 1613.

The few Maler lutes that survive have all undergone considerable alterations. They are in the Germanisches Nationalmuseum, Nuremberg (no.MI 54), the Wrocław Museum (no.5515), the Victoria and Albert Museum, London (lute body, no.194–1882) and – an ivory lute – in the private collection of Charles Beare, London. Two were formerly in the Národní Muzeum, Prague (nos.654 and 655). A lute attributed to Maler in the Kunsthistorisch Museum, Vienna) (no.28/C32) is in a different style and is unlikely to be his work.

Sigismondo (i) Maler is recorded in Venice from at least 1514, when he shared a house and workshop in the district of San Salvador with his cousin Vizenzo [Vicenzo] Venier. In 1526 Jacopo Tibaldi, envoy of the Duke of Ferrara, Alfonso I d'Este, was requested to obtain Sigismondo's varnish recipe. Sadly it has not survived, although it is known from the Estensi correspondence that there were two kinds. None of Sigismondo's lutes survive, but the Fugger inventory includes three, and according to Gaultier's correspondence with Huygens, he made many 11-rib lutes.

LYNDA SAYCE

Maler, Wilhelm (*b* Heidelberg, 21 June 1902; *d* Hamburg, 29 April 1976). German composer and teacher. He took lessons in composition with Grabner and in music history with Kroyer in his native city, and later studied with Haas in Munich and with Jarnach in Berlin. After a short time as Grabner's successor at the University of Heidelberg, he joined the staff of the Rheinische Musikschule, Cologne, as a theory teacher in 1925. Concurrently, from 1928, he taught composition at the Staatliche Hochschule für Musik where he was made professor in 1936. In addition to his responsibilities in Cologne, Maler lectured in theory at Bonn University from 1931 until he was called for military service in 1944. After the war he was deputy director of the Schule für Musik und Theater, Hamburg, and in 1946 assisted in the rebuilding of the Nordwestdeutsche Musikakademie, Detmold, later becoming its director. In 1959 he succeeded Jarnach as director of the Hamburg Hochschule für Musik and remained in that post until 1969. From 1967 to 1971 he was president of the Hamburg Freie Akademie der Künste. The influences of Reger and of Busoni were passed on to Maler through his teachers Haas and Jarnach, but his compositions also show Impressionist and folk elements. The instrumental lines are contrapuntally conceived, much like Hindemith's, although the harmonic idiom is more tonally orientated and sometimes shows modal qualities. After the war Maler directed his activities more towards teaching. In this field he earned a wide reputation, and under his leadership Detmold developed into one of Europe's leading music schools. Maler published a *Beitrag zur durmolltonalen Harmonielehre* (Munich and Leipzig, 1931, 4/1957).

GEORGE W. LOOMIS

Malerba [Mal'Herba], **Michele** (*b* Piazza Armerina [now Piazza], Sicily; *fl* 1607–31). Italian composer. He was in the Carmelite convent of Piazza Armerina in 1607 and remained there until at least 1611. His place of birth, vocation of Carmelite friar and position as director of music of Catania Cathedral are known from the title-page of his one surviving work, *Sacrarum cantionum … liber primus* (Venice, 1614, ed. in Musumeci, 1991), for two and three voices and organ continuo. He was *maestro di cappella* and organist in Caltagirone in 1626–7 and in Piazza in 1627–8. From 1629 to 1631 he was prior of the Carmelite convent of Licodia. In the dedication to the 1614 collection he referred to his long musical experience and to his previous works, which apparently were secular; he is known to have published at least two sets of five-part madrigals. The surviving book contains 19 motets,

four for three voices and 15 for two, one of the latter being by his pupil Giuseppe Ferraro; they are scored for various similar or mixed combinations of soprano, alto, tenor and bass. Most of the texts are biblical, mainly from the Song of Songs, but there are also liturgies for specific saints, for example *Hic est Martinus* and *O Catinensis gloria*, a dialogue between St Lucy of Syracuse and St Agatha similar to the one set by Pietro Vinci (1558). The motets are modest pieces, rather stiff and short-breathed, that cannot compare with the analogous *Brevi concerti* (1606) of Antonio Il Verso, also from Piazza Armerina.

Malery. *See* MALLORIE.

Maletty, Jean [Jehan, Jehen] **de** (*b* St Maximin; *d* after 1583). French composer. His Provençal origins are reflected in a dialect piece for four voices, *You siou you que m'apelli Mathiou*, published in Le Roy & Ballard's 23rd book of chansons (RISM 1583[8]). His first book of chansons included a dedicatory poem by R. Montane of Beaumont suggesting that Maletty had worked in Italy before returning to his birthplace. The second book contains a sonnet by J. de Salomon praising the perfection and appeal of Maletty's chansons to both gods and men. In 1578 his *Veu la douleur* won the silver lute prize for the best five-voice chanson at the annual St Cecilia competition at Evreux in Normandy; unlike other prizewinners, Maletty is not mentioned as holding any musical post. He returned to the south before long and by 1583 was living at Lyons where he was described as 'm[aîtr]e musicien'.

Maletty's first chanson book followed the contemporary vogue, especially among provincial musicians, for Ronsard's verse, and its title-page specifies the poet's *Amours* of 1552–3 as the source for the texts; 17 of the 23 pieces are sonnets by Ronsard, eight of which had previously been set by Boni and five by Bertrand. The remaining six poems include the text of the popular song *Mon père si m'y maria* and a more recent sonnet by Desportes. The second book contains seven more sonnets and a chanson by Ronsard, three sonnets by Desportes and one by Du Bellay. Both collections are incomplete: the soprano and contratenor partbooks of the first collection and the contratenor of the second are all that remain; these suggest a polyphonic style typical of the time and similar to that of Lassus, Monte, Guillaume Boni, Antoine de Bertrand and Cornelius Blockland. The metre is predominantly duple and the prevailing homophonic texture is occasionally varied by imitation for verbal effect; chromaticism is rare, and degree inflections and false relations are used as expressive means in only a few pieces (e.g. *Quand je suis tout baissé* and *Du profond des enfers*). Italianate word-painting is achieved mainly by rhythmic means, notably melismas, exceptional use of lively triple metre, silence and repetition.

Seven French psalm translations were attributed to Maletty in a collection of contrafacta by Lassus and others that was made by the Calvinist minister Louis Mongrad for a music society in Antwerp and published in Nuremberg in 1597. Five of them, like the chansons, are divided into two sections, but whereas this division reflects the separation of octave and sestina in the sonnets, Maletty used it in the psalms for a second strophe or group of strophes. While the 'seconde partie' is always freely composed the first sections of five of the psalms are set to the melodies prescribed in the 1562 Calvinist psalter. These melodies are normally presented in one voice, metrically and almost unchanged; in Psalms lxxiv and xciv a second strophe follows with the melody transferred from the tenor to the second soprano and the remaining voices recast. In Psalm lxxiv the melody is transferred from the second soprano to the soprano while the lower voices remain unchanged. The two freely-composed psalms and all the freely-composed second sections contain more word-painting and greater variety of texture. Mongart pointed out that these psalms are suitable for instruments – a suggestion supported by their harmony, rhythm, spacing and sonority.

FRANK DOBBINS

Malfitano, Catherine (*b* New York, 18 April 1948). American soprano. After making her début at the Central City Opera in 1972 as Nannetta, she sang Rosina with the Minnesota Opera Company (1972–3). From 1973 to 1979 she sang regularly with the New York City Opera. She made her European début as Susanna at the 1974 Holland Festival, her Metropolitan Opera début as Gretel (1979) and her Vienna Staatsoper début as Violetta (1982). She has performed with most of the principal American companies and sung the leading roles in the premières of several works. In 1980 she appeared as Servilia in Ponnelle's film of *La clemenza di Tito*. She sang Konstanze at the Paris Opéra (1984), the title roles in *Lulu* (1985) and *Daphne* (1988) at the Munich Festival and Butterfly at Covent Garden (1988). Her first Salome was with the Deutsche Oper, Berlin, under Sinopoli in 1990; she sang the role later at the WNO and Covent Garden, where she was also a notable Lina in Verdi's *Stiffelio* (1993). Malfitano is a singing-actress of exceptional talent, bringing an originality and depth of interpretation to all her roles, as can be gauged from her videos of *Stiffelio* and *Salome*, both recorded at Covent Garden, and *Tosca*, recorded on location in Rome (1992).

MICHAEL WALSH/ALAN BLYTH

Malgoire, Jean-Claude (*b* Avignon, 25 Nov 1940). French conductor. He studied in Avignon and at the Paris Conservatoire, where he won a *premier prix* for oboe playing and another for chamber music. Besides founding

La Grande Ecurie et la Chambre du Roy (1966) for the performance of Baroque music, he formed L'Atelier Lyrique du Tourcoing (in north-east France) as a base for staging and touring Baroque opera by Campra, Lully, Rameau and others. He made several visits to London to direct performances for the English Bach Festival, including Rameau's *Les Indes galantes* at the Banqueting House, Whitehall (1974), *Hippolyte et Aricie* at Covent Garden (1978) and *Platée* at Sadler's Wells (1983). He conducted Campra's *Tancrède* at the Aix-en-Provence festival in 1986 and elsewhere, and recorded it, and in 1988 gave performances of Salieri's five-act *Tarare* at Schwetzingen and Kreutzer's *Paul et Virginie* at Tourcoing. At Saint Etienne in 1989 he revived Elisabeth-Claude Jacquet de La Guerre's *Céphale et Procris*, the first French opera composed by a woman. His recordings also include Lully's *Alceste*, Rameau's *Platée* and *Hippolyte et Aricie*, and Handel's *Rinaldo*, *Serse* and *Giulio Cesare*. Malgoire has played a significant role in the early music and period instrument movement in France, and although his performances have been criticized for instrumental inconsistency and his sometimes erratic delineation and control of rhythm, they have won praise for their vigour, colour and enthusiasm.

NOËL GOODWIN

Mal'Herba, Michele. *See* MALERBA, MICHELE.

Malherbe, Charles (Théodore) (*b* Paris, 21 April 1853; *d* Cormeilles, Eure, 5 Oct 1911). French musicologist and composer. After first studying law, he was later a pupil of A.L. Danhauser and Massenet for composition and in 1880 travelled with Danhauser on an inspection tour of music education in schools in Belgium, Holland and Switzerland. From 1885 to 1893 he contributed to various journals, including *Revue d'art dramatique*, *Le ménestrel* (which he edited for a brief period), *Guide musical*, *Progrès artistique*, *Revue internationale de musique* and *Monde artistique*, and collaborated with Albert Soubies in several books on opera, among which *Histoire de l'Opéra-Comique: la seconde salle Favart* is particularly useful. From 1896 he assisted Charles Nuitter, the archivist-librarian of the Opéra; succeeding him in 1899, he improved the organization of the Opéra library considerably. He bequeathed to the library of the Conservatoire (now part of the Bibliothèque Nationale) a magnificent collection of musical autographs which he had amassed since his adolescence, including thousands of autograph letters, several Bach cantatas, two cantatas of Rameau, the *Symphonie fantastique* and the largest collection of Beethoven sketch fragments in existence.

Malherbe wrote the historical notes for 16 volumes of the collected works of Rameau, beginning in 1895; these notes provide abundant information on Rameau, the history of various genres, performing practice etc. In collaboration with Felix Weingartner he began an edition of the complete works of Berlioz which, though often inaccurate and now superseded by the New Edition, was invaluable in its day. Malherbe's compositions, which are of little importance, include four *opéras comiques*, incidental music for *Les yeux clos* (1896), a ballet pantomime *Cendrillon*, and vocal, chamber, piano and organ works; he also supplied recitatives and an entr'acte for Bizet's *Don Procopio*, and made several piano transcriptions.

ELISABETH LEBEAU

Mali (Fr. République de Mali). Country in West Africa. It has a total area of 1.24 million km² and a population of 12·56 million (2000 estimate), 90% of whom are Muslim. An estimated several million Malians now live in neighbouring countries and Europe, especially in and around Paris. The vast extent of the landlocked country reaches from the woodland savanna of its southern borders with Guinea, Côte d'Ivoire and Burkina Faso, north along the Niger river towns of Bamako (the capital), Segou, Djenne, Mopti and Tombouctou (Timbuktu) at the Niger bend, and then almost 1000 km north into the heart of the Sahara desert, where it is bordered by Mauritania on the west and north-west, and Algeria on the east and north-east (fig.1).

The name Mali derives from the 13th–16th century empire that was one of the most extensive and wealthiest in Africa. A class of people known as *jeli* (Maninka or Malinké) or *jaare* (Soninke) were, and still are, the guardians of certain musical and oral traditions of the Malian nobility. Known as *griots* to early French writers, *jeli*s still practise their professions today, and their presence dominates the national ensembles as well as urban popular music. The combination of gold wealth, vast internal trade networks, a class of nobility that patronized a professional artisan class, including musicians and oral historians, and little European contact until the end of the 19th century has contributed to the far-reaching renown of the musical traditions of Mali as deep-rooted, sophisticated and highly influential in West Africa. The transformation of some of these traditions for consumption on the world popular music market has been a multi-faceted process that has produced some extraordinary music that is remarkable for its reconciliation of the old and new.

1. Languages and ethnic groups. 2. Historical overview. 3. Musical sources. 4. Music and instruments of the Malian Sahel and savanna. 5. Music and society.

1. LANGUAGES AND ETHNIC GROUPS. The predominant languages in Mali are associated with the great kingdoms

1. *Map of Mali showing the distribution of major ethnic groups*

that ruled within its borders, and they belong to the northern subgroup of Mande languages: Soninke of ancient Ghana (north-western Mali); the Mandekan dialects of Maninka of old Mali (straddling the border between Mali and Guinea along the Niger river); and Bamana (Bambara) of Segou and Kaarta. Xasonka (Kassonke) are commonly described as an ethnic mix of Maninka, Soninke and Fulɓe (Fulani, Fula or Peul) peoples whose homeland, Xaso, is located between Kayes and Bafoulabé. The suffix *-nka* or *-ka* ('person from') is usually attached to the name of a homeland to identify its people.

In southern Mali, the predominant groups are the Wasulunka (Wasulu or Wassulunka), Senufo (Sénoufo) and Minianka (Mamara). The Wasulunka, whose homeland, called Wasulu or Wassolon, is just east of the Mande homeland, are considered an ethnic mix of Maninka and FulBe, and the four major FulBe family names – Sangare, Sidibe, Diallo and Diakite (Jakite) – are commonly found among them. The Minianka, farmers who live in southern and south-eastern Mali, are a subgroup of the Senufo, who are found primarily in Côte d'Ivoire.

Much was written by French anthropologists in the mid-20th century about the culture of the Dogon, the cliff-dwellers in the Middle Niger region between Mopti and the Burkina Faso border, whose language belongs to the Gur family predominant further east. Many Dogon masks have been identified, some of which are several metres high, and their associated dances have had an impact on a Malian identity (see DeMott, 1982; *JVC Video*, 1990). Living in proximity to the Dogon are two groups closely associated with fishing, the Boso and Somono, and the Bobo (who refer to themselves as Bwa), who are predominant in Burkina Faso.

Although Mande groups dominate Mali, other peoples have contributed to Mali's cultural identity. The FulB are a widespread pastoralist group whose migrations have taken them from their probable homeland Tekrur (in northern Senegal) eastwards as far as Cameroon. The Tuareg, a desert and Sahelian people also known as Tamashek or Tamasheq (the name of their language), primarily live in the north. The Songhai (Songhay or Sonrai), who eventually established their own great empire, are found along the Niger river bend into Niger. Among desert and Sahelian peoples such as the Tuareg, Songhai and Moors, women play musical instruments.

Information on ethnic groups in Mali who are dominant in neighbouring countries is given in articles on MAURITANIA (Moors), SENEGAL (Fulani), NIGER (Songhai), BURKINA FASO (Bobo), CÔTE D'IVOIRE (Sénoufo) and LIBYA (Tuareg). *See also* FULBE MUSIC, SONGHAI MUSIC and TUAREG MUSIC.

2. HISTORICAL OVERVIEW. The beginning of the Sahara wet period about 12,000 years ago began the repopulation of the formerly hyper-arid desert covering much of Mali. Pastoralism began 7000 years ago, and for at least 3000 years the evidence of agriculture is unequivocal. In present-day Mali pastoral peoples inhabit the Sahel in the north, and agricultural peoples inhabit the savanna in the south. Iron-working, probably brought from North Africa by desert peoples plying Saharan routes, appeared around 2500 years ago at Jenne-Jeno (old Jenne). This may mark the earliest possible period for construction of many of the indigenous instruments that make use of extensive carving, such as wooden drums and frame xylophones. Middle Niger towns such as Jenne-Jeno were commercial centres linking the desert and outside world with the savanna in the 1st millennium CE. By the 9th century CE, the empire of Ghana was noted in Arabic writing; its dominion extended over much of present-day Mali.

Koumbi Sileh, the reputed capital of the Soninke empire of Wagadu (known to Arabic writers as Ghana), lies in Mauritania just across the Malian border (350 km north of Bamako). Early Arabic writing about Ghana rarely noted any musical activity, with two exceptions. Al-Bakrī may have referred to the *dundun* when he wrote in the 11th century: 'The audience [of the king] is announced by the beating of a drum which they call dubaa, made from a long hollow log' (Levtzion and Hopkins, 1981, p.80).

Al-Idriisī wrote in the 12th century that the king of Ghana 'has a corps of army commanders who come on horseback to his palace every morning. Each commander has a drum, which is beaten before him' (Levtzion and Hopkins, 1981, p.110). Few of the published accounts of Soninke oral traditions (see Monteil, 1953; Dieterlen and Sylla, 1992) have been specifically concerned with music, but one early 20th-century source (see Frobenius, 1921) tells of a lute that was played during the time of the Wagadu empire, perhaps the *gambare*, which is played by Soninke *griots* today. The decline of the Ghana empire in the late 11th century and the subsequent southern dispersion of Soninke groups set the stage for the rise of the Mali empire, shifting the political centre of western Africa further south into the heart of the savanna.

The historical era that continues to dominate public consciousness is that of the rise of the Mande or Mali empire in the 13th century. (Mali is a Fulɓe - or Fulfulde-language pronunciation of Mande, Manden or Manding that was standardized in early French writing.) The founding of the Mali empire is attributed to a hero named Sunjata Keita. The Sunjata epic is one of the most widely researched and published in Africa, and its fundamental significance in the development of a Malian national identity cannot be overstated. Many of the prominent persons in the epic have songs dedicated to them (e.g. Sunjata, Fakoli, Sumanguru Kante and Tiramakan Traore), and the complex of pieces associated with the epic is a major part of the repertories of the national ballet and instrumental ensemble. It is the foundation of a widespread praise-singing tradition; the national anthem is drawn from it; the popular group Rail Band has recorded it several times; and references to it are frequently made at public celebrations such as marriages.

Two episodes in the Sunjata epic are particularly significant for music history. One concerns the origin of the Diabate lineage of *jeli*s (*griots*), and the other concerns the Kouyate lineage and the magic primordial 13th-century *bala* xylophone, also known as *balafon*, that they inherited from Sumanguru Kante. That *bala* is believed to have been passed down through the Kouyate lineage and is now kept in a small village in Guinea on the border with Mali (see Kouyate, 1970), perhaps one of the oldest surviving instruments in sub-Saharan Africa.

The victory of Sunjata and the consolidation of Mande territories led to the formalization of three classes in many large-scale Malian societies: *horon* (nobility), including warriors and leaders; *nyamakala* (artisans), including *numu* (blacksmiths), *garanke* (leatherworkers), *jeli* (musical and verbal artisans) and *fune* or *fina* (public speakers specializing in praising and genealogies); and *jon* (slaves). The terminology and specific artisanal professions differ according to the ethnic group (the Maninka terms are given above). With the exception of slaves, this class system still exists today, albeit with some fluidity.

After several centuries of rule over much of the western Sahel and savanna, the Mali empire was eclipsed by the Songhai empire that originated in the region of Gao near the north-eastern border with Niger. In the 18th century two Bamana (Bambara) kingdoms, Segou and Kaarta, came to power north of Mande territory, giving rise to another epic tradition (see Conrad, 1990; Ba Konare, 1987). A series of musical pieces is associated with Bamana kings, including the well-known *Tutu Jara*, one of the most frequently played pieces in Mali. Wars and drought led to further fragmentation until a series of Islamic *jihād*s (holy wars) swept through West Africa led by FulBe clerics. Macina, along the Niger river, became a base of operations for El Hajj Umar Tall, the greatest of the *jihād* leaders and the subject of a well-known piece of music called *Taara* ('He Has Gone'). By the late 19th century most of Mali was Muslim.

European entry into West Africa began in the mid-15th century, motivated in part to find the source of Malian gold. It was not until the mid-19th century that the French made serious progress inland and began the process of colonization in Mali, known alternately as the French Soudan (1890–99, 1920–59), Senegambia and Niger (1902–4) and Upper Senegal-Niger (1904–20). The foreign musical impact was largely limited to the introduction of European-made instruments, such as the guitar and accordion, probably sometime between the two world wars, and the disruption of the traditional patronage system. Members of the noble classes probably absorbed the greatest European influence in terms of language and education in European culture; *griots* remained largely removed from the European sphere until after independence from France.

Mali became an independent republic in 1960, and shortly thereafter regional and national music dance groups were formed after the Guinean model. By the early 1970s popular dance music in Mali reached an international audience in West Africa, and by the late 1980s Malian musical artists, such as Salif Keita (fig.2), ALI FARKA TOURÉ, Toumani Diabate and Oumou Sangare, began making a significant impact on the world popular music scene, achieving some commercial success while maintaining the integrity of a Malian musical identity.

2. Salif Keita (© Adrian Boot, 1998)

3. MUSICAL SOURCES. Archaeological research has dramatically increased since the late 1970s, producing stunning insights into Malian prehistory. Little direct evidence of music-making has been unearthed, but the refining of a time frame for the movements of peoples and the beginnings of certain subsistence strategies (pastoralism and agriculture) and artisan activities (metal-working) has important ramifications for early music history. In general, musical instruments are uniquely associated with certain groups of people defined by their language (e.g. Maninka, Dogon and FulBe) or their activities (e.g. hunting). The diffusion of metal-working in Mali and beyond can help to explain the history of the *jembe*, which is associated with blacksmiths, or frame xylophones, which can be easily crafted with the use of metal tools. Malian harps associated with hunters' societies belong to a wider southern savanna harp culture that may date back to prehistoric times. Tracking the relationships among the limited number of diverse ethnic groups who play hunter's harps, xylophones, plucked and bowed lutes, hourglass squeeze drums or large double-headed bass drums may begin to open up the virtually unexplored territory of early music history in Mali and West Africa.

Historical information begins with Arabic writing on ancient Ghana in the 9th century (conveniently compiled and translated in Levtzion and Hopkins, 1981). (Arabic and European references to the music of Mande peoples can be found in Charry, 1999.) The mid-14th century world traveller Ibn Battūta provided a famous and richly detailed description of royal ceremonies at the seat of the Mali empire, including the use of what is probably the *koni* (lute), which was also noted by Al-'Umarī earlier in the century, and *bala*. The term *jaali* is also documented for the first time.

With the beginning of Portuguese writing on Africa in the mid-15th century, and later French and English writing, musical activity in the extended Mali empire becomes clearer. The most frequent descriptions concern *griots* and drumming and dancing events. Drawings of musical instruments, such as the *bala* and harps, occasionally appear in European sources (see Charry, 'West African Harps', 1994). Perhaps the first photographs of music-making among Mande peoples in Mali and neighbouring Guinea come from Gallieni's expedition of 1887–8 (see Fierro, 1986). Photographs include ensembles of *jembe*s, *bala*s and *koni*s, and people labelled *griot*.

Recordings of Malian music date from at least the 1930s with a series of extraordinary cylinders and an accompanying silent film recorded by Laura Boulton (housed at the Archives of Traditional Music, Indiana University). The great *jelimuso* or *jali muso* (female *jeli*) Sira Mori Diabate was recorded in 1949 by Arthur S. Alberts (also in the Archives of Traditional Music). In the 1950s the *jelimuso* Monkontafe Sacko was recorded by Vogue, and sporadic recordings appeared in the 1960s. In the early 1970s an unprecedented series of 14 LP albums jointly produced by the Ministry of Information of Mali and Bärenreiter Musicaphon was released, excerpts of which have been reissued by Syllart/Melodie. Albums are devoted to the national instrumental ensemble, the singers Fanta Damba and Fanta Sacko, the great *ngoni* player and singer Bazoumana Sissoko, a compilation of the best *kora* players in the country, including Sidiki Diabate and Batrou Sekou Kouyate, music of the Songhay, FulBe and Maninka, the national orchestra, the regional orchestras of Segou, Mopti, Kayes and Sikasso, and the Rail Band featuring a young Salif Keita. French releases of Malian music accelerated through the 1970s, and since the late 1980s CD recordings have attracted an international audience, with the total number of domestic and foreign releases of recordings of Malian music probably surpassing 200 by the late 1990s. Ali Farka Touré, a Songhai guitarist from the region of Tombouctou, is probably the most prolific Malian solo artist, and the groups Rail Band and Les Ambassadeurs have released over a dozen recordings each. A local cassette industry has also released hundreds of recordings (if not more) of local artists. Films documenting Malian popular music began appearing by the early 1990s (*Salif Keita*, 1991; *Bamako Beat*, 1991).

The most extensive documentation project to date has been a collaboration between the International Institute for Traditional Music (Berlin) and the *Musée National du Mali* (Bamako) in 1991–5. Over 100 musical instruments were collected and hundreds of hours of music, speech and video were recorded throughout Mali, all deposited at the Musée National, and summarized in a catalogue (*Musée National*, 1996). Other important archives include the Archives of Traditional Music (Indiana University) and at the Musée de l'Homme (Paris).

4. MUSIC AND INSTRUMENTS OF THE MALIAN SAHEL AND SAVANNA. Table 1 lists many ethnic groups in Mali along with their names for the musical instruments they play. (Spellings are not standardized and often vary among sources.) The most widespread and visible melody instrument type is probably the plucked lute. Closely related plucked lutes with wooden-trough resonators are played by *griots*, primarily in the Sahelian region: Xasonka *koni*, Soninke *gambare*, Bamana *ngoni* (fig.3), Moorish *tidinit* and Maninka *koni* (see Charry, 1996). They have exerted an important influence on guitar-playing styles, which in turn have contributed to defining a Malian identity in popular dance music. Malian market cassettes abound in storytelling accompanied by lutes. There may be a relationship between these lutes and those of ancient Egypt, but the exact nature is not clear. Bowed lutes (also known as spike fiddles) are less frequently found.

An old southern savanna calabash harp tradition includes the three- or four-string warrior's harp called *bolon* (or some similar variant), played by a variety of peoples, including Maninka, FulBe and Senufo, and hunter's harp varieties like the Maninka *simbi* (seven strings, heptatonic) and Wasulu *donso ngoni* (six strings, pentatonic). The KORA, 21-string bridge-harp of the Maninka *jeli*, is an import from the Senegambia region, but a Malian style of playing has developed, thus broadening its repertory. The *ndang* (five or six strings) of Bamana or Wasulu origin is a pluriarc, with a calabash resonator. The LP *Cordes anciennes* (BM 30L 2505) surveys Malian *kora* styles, and Toumani Diabate's recordings brilliantly continue this legacy.

Wind instruments are not as widespread, but flutes include the well-known FulBe *serdu* (three-hole flute), and the Tuareg *sarewa*. Animal horns and whistles are used in the secret Mande Komo societies.

Two basic varieties of frame xylophones are used in Mali: the heptatonic Maninka *bala* (*see* BALO) and the larger pentatonic Bamana *bala*, Minianka/Senufo *kpoye* or *jegele* and Bobo *cooza*. All are perhaps closely related and often referred to indiscriminately as Turuka *bala*.

TABLE 1: Malian peoples and their musical instruments

	Chordophones			Aerophones		Idiophones		Membranophones
Ethnic Group	*plucked lute*	*bowed lute*	*harp*	*flute*	*horn*	*xylophone*	*rattle*	*drum*
Maninka	koni		kora simbi bolon			bala		jembe, tama, dundun jidunun (calabash)
Bamana	ngoni		ndan mpòlòn donzo kòni	fle	buru	bala	sira yabara wasamba	jembe, bari, bara kangaa, flen
Soninke	gambare							dunduge, dange, tabalen kòlè

Wasalu		so ku	donso ngoni kamalen ngoni	so fle				jembe, didadi, jigirin nkulen
Minianka						kpoye		bogbinge (small) dunugbinge (large)
Senufo			bolongboho javirijaangi	wiili tubele		jegele	sicahali	cepinnè, napingè
Bobo (Bwa)			korozo kòni		ba : nsi	cooza		dumanu, i'izo, karanko, kanamun
Boso								fuo
Dogon			koro/ gingiru	sujei kere	kele			bar po, boi na, gom boi kòbe
Fulbe	hoddu molo	nyanyur woogeeru	bolon	serdu				tunbudè
Songhai		njarka/ goojé	kurubu					kolo, hare, gaasu
Tuareg	tehardin	inzad		sarewa takaanipt				tinde assakhalebo tabl
Moor	tidinit							tabl

The most widespread types of instruments in Mali are drums, dozens of which have been identified. The three most commonly visible are the *jembe*, *dundun* and *tama*, which co-exist with each other in the national ballet. The *tama* is part of a broad complex of hourglass drums found throughout the West African Sahel and northern savanna. The *dundun*, a large double-headed bass drum, has a similarly widespread distribution in West Africa. The *jembe* has a more southerly distribution, possibly reflecting the migratory movements of Mande blacksmiths. A fourth kind of drum, made from a large calabash with a single head played with both hands, is also widely distributed.

With such a variety of instruments and tuning systems, it is difficult to generalize, since there is no single Malian style of music-making. Diverse tuning systems abound, much like languages and dialects, with identifiable local preferences. Pentatonic tuning systems are found among the Wasulu, Bamana and Minianka, as well as heptatonic systems among the Maninka and Xasonka. Within a tuning system several pitches may have two varieties (i.e. natural and sharp or natural and flat), especially in vocal

3. Bamana musicians playing plucked lutes, Bamako: (a) Ngoni (four-string lute, left) showing jingling device; (b) Subaga-ngoni shaped to resemble a human figure

performance, although they are not often used in the same piece of music. The National Ensemble combines disparate instruments with different tuning systems with no apparent difficulty.

An equiheptatonic tuning of the Maninka *bala* has been demonstrated by Rouget and Schwarz (1969), although few instruments (if any) conform closely to the theoretical model. The ready willingness to transpose a piece up or down simply by shifting left or right on the instrument supports their findings. Plucked lute tunings are based on an interval of a perfect 4th between the two main playing strings and a shorter string always plucked by the thumb a minor 7th or octave above the lower main string. Some lutes have added open strings that can enhance the variety of tunings. Knight's research on the tuning and modal practices of Gambian Mandinka *jeli*s (1991) is also relevant for Mali. Ex.1 shows tunings for the Wasulu *donso ngoni*, Maninka *simbi* and Xasonka *koni* (lute).

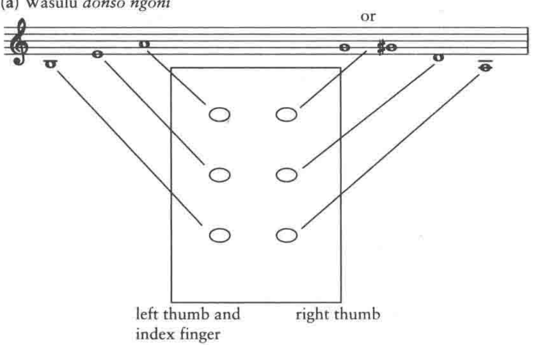
The instrumental music that accompanies singing or dancing is based on rhythmic, harmonic or melodic cycles that can be conceptualized as consisting of a fixed number of beats (usually four, eight or twelve), each of which consists of a particular number of pulses (usually three or four). Musicians have no terminology equivalent to these Western notions, although dance steps usually demarcate the beat level. The *bala* piece *Boloba* (also known as *Kura*), which consists of five pulses per beat, is a rare exception. While the duration of a beat does not usually change within the course of a piece, drummers and hunter's musicians often expand or contract pulse lengths playing between a three-pulse and a four-pulse beat, inflecting the inner structure rather than creating sharp distinctions (see Polak, 1996). Pieces may be distinguished by a continually repeated melodic line on lutes and hunter's harps, a sequence of harmonic areas on xylophones and sometimes the *kora* or a rhythmic pattern on drums.

Ex.2 is a transcription of the renowned Wasulu *donso ngoni* player Seydou Camara playing the hunter's piece *Kambili*. While singing, this accompaniment remains relatively unchanged, but during vocal pauses he creates variations, including the one transcribed in Ex.2*b*, in which he subdivides into three rather than four pulses. Ex.2*c* shows *Kulanjan* played on the *simbi* by Mali's most respected hunter's musician, Bala Jimba Jakite. Ex.2*d*, a transcription of *Tutu Jara* played on the *koni* by Moussa Kouyate, shows the high degree of grace notes and ornamentation that is typical of *koni* playing.

Ex.3 shows transcriptions of the rhythms *dundunba* and *maraka* played by a *jembe* and *dundun* ensemble. Each rhythm has a generic *jembe* accompaniment that can be played with a number of other rhythms, and usually with another *jembe* accompaniment that identifies the specific rhythm. The long *dundun* part unequivocally defines each rhythm. A shorter part played on a smaller *dundun* (*konkoni* or *kenkeni*) is often inserted two or four times within a cycle. The *jembe* accompaniments are typically played twice (*maraka*) or four times (*dundunba*) per *dundun* cycle. Note that the identifying *jembe* parts in *maraka* and *dundunba* are the same, but are lined up differently in relation to the generic *jembe* part.

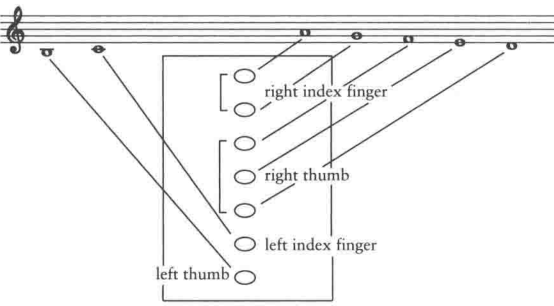
Although ensembles can reach large sizes, the focus is usually on one soloist at a time, such as a master drummer, lead vocalist or instrumentalist. The role of instrumental soloist can shift within an ensemble, with the other members taking on a variety of accompanying parts within each piece. *Griots* recognize two distinct vocal specialities: song (*donkili* in Maninka), consisting of relatively fixed melodies and forceful improvisational commentaries, and speech (*kuma* in Maninka), which can be chantlike and is the common vehicle for performing epics and retelling history. Throughout much of Mali, vocal or instrumental virtuosity is highly prized.

5. Music and society. *Griots* such as the Maninka, Xasonka and Bamana *jeli*, Soninke *jaare* and FulBe *gawlo*, all hereditary professionals who belong to a limited number of lineages, are regarded as élite authorities whose duty it is to guard long-standing musical traditions. Instruments that are reserved exclusively for them include wooden trough-resonator lutes, the *bala* and *kora* (in the case of the Maninka), and the *tama* and *dundun* in north-western Mali. Female *griots* are vocalists *par excellence* and are among the most powerful musical artists with their high visibility as praise-singers. Three of the most renowned *jelimuso*s active in the 1990s are Ami Koita, Kandia Kouyate and Tata Bambo Kouyate (see Durán 1995, 1998). Guitarists are widespread and most come from the ranks of *jeli*s, although there are also significant numbers of non-*jeli* guitarists. There are no hereditary restrictions on most other instruments, a possible indication that these instruments may predate the reification of the institution of the *griot*, which dates back to the origins of the Mali empire, and perhaps earlier. Hunter's musicians may have been the prototype for *griots*, as their epic recitation, singing and instrument playing resemble the functions of the *griot*. The close relationship between the hunter's musician and hunter also resembles the relationship between *griot* and patron. Although there are no hereditary restrictions on *jembe* drumming, it is historically associated with Maninka *numu* (blacksmiths/sculptors).



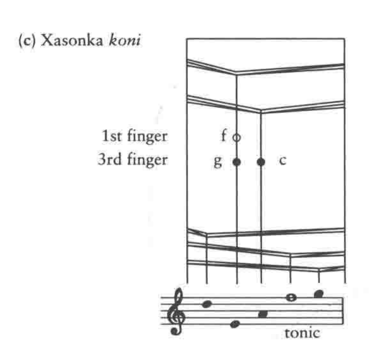
Women in the savanna region in the south play a limited number of instruments, such as the Senufo *cepinne* (drum) and Bamana *jidunun* (calabash water-drum). Among the Bamana they are not considered to have professional status (see Modic, 1993). *Jelimuso*s also play a narrow metal tube called *nganga* or *karignan* to accompany singing or dancing. By contrast, in the Sahelian region in the north among Tuareg, Songhai and Moorish peoples, females play a variety of string instruments and drums.

Three main types of regional and national performance groups exist with little interaction between them. Ensembles consist of traditional instruments and are dominated by *griots*. Ballets are drum and dance troupes that consist primarily of *jembe*s, *dundun*s and *tama*s. Orchestras consist of foreign instruments such as electric guitars, saxophones, trumpets, keyboards and drum sets, and reflect strong influences from Latin American popular music. Regional groups preserve local culture, although there is mixing of ethnic traditions that otherwise would not occur in village traditions.



In the 1960s government-sponsored regional orchestras were established, and they competed in annual regional and national arts festivals, Semaines de la Jeunesse, organized by the Ministry of Culture, and replaced in 1970 with the Biennale Artistique et Culturelle de la Jeunesse. Three major Bamako orchestras sponsored by government ministries dominated popular music in the 1970s, and musicians from those groups went on to forge international careers by the late 1980s: the Rail Band (formed around 1970) based at the buffet attached to the

Ex.1 Tuning of three string instruments

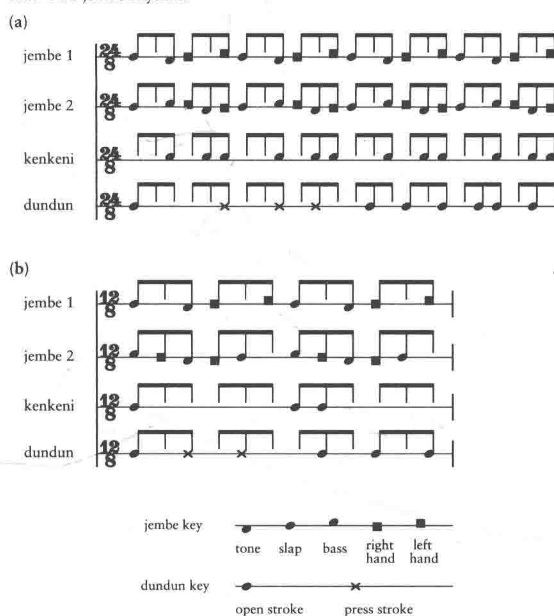


(a) Wasulu *donso ngoni*

(b) Maninka *simbi*

(c) Xasonka *koni*

rail station, featuring guitarist Djeli Mady Tounkara and Guinean singer Mory Kante; Les Ambassadeurs (formed around 1970) based at the Hotel du Bamako, featuring singer Salif Keita and Guinean guitarist and orchestra leader Manfila Kante; and National Badema, the national orchestra, featuring singer Kasse Mady Diabate, from a renowned *jeli* family in Kela, and led by Boncana Maiga from Gao, who spent eight years studying at the conservatory in Havana, Cuba, and is now Mali's most prolific arranger, working in Abidjan, Paris and New York. Beginning in the 1980s female Wasulu singers, such as Oumou Sangare, Nahawa Doumbia and Sali Sidibe, began eclipsing the popularity of the Bamako orchestras within Mali and abroad. Gaining exposure by winning the Biennale singing competitions, and unencumbered by the *griot* praise-singing tradition found among other ethnic groups, their voicing of concerns on contemporary matters, especially regarding women, has found a ready audience in contemporary Mali.



Throughout Mali, most celebratory and ritual events call for specific types of music. For example, string

Ex.2 Three instrumental melodies

instruments are usually absent from drumming events that accompany movement such as dancing or agricultural labour. The division between harp-based and drum-based music is a fundamental one that may reflect historical relationships between hunters, whose music is dominated by harps, and blacksmiths, whose tools are crucial in many of the contexts surrounding drumming and dancing, such as circumcision and excision ceremonies, rites of age grade associations (e.g. Bamana *Ntomo*), secret power associations (e.g. *Komo*), agriculture-related masked dancing (e.g. the celebrated Wasulu *Sogoninkun*), agricultural labour and harvest celebrations. Other common occasions for drumming include marriage celebrations and regional and national ballet performances. Drumming at funerals is performed by non-Muslim peoples such as the Dogon. Marriage ceremonies can be quite elaborate, calling for intimate praise-singing by *griots* in addition to drumming. In the late 1960s an event called Apollo became popular, mixing electric guitars and traditional instruments. Renditions of grand epics can occur in public or intimate private concerts, or in infrequent ritual ceremonies, such as the septennial reroofing of the sacred hut in Kangaba.

Ex.3 Two *jembe* rhythms

While certain ritual events are private and closed to the public, other non-ritual events are public. Bamana, Boso and Somono communities in Segou stage elaborate puppet masquerades that they consider *nyenaje* (entertainment), to be enjoyed by all. A related genre is the *koteba* theatre of the Bamana. National and regional ballets stage performances secularizing village traditions, and night clubs offer live music by local orchestras. Concerts in Bamako's sports stadium and the Palais de la Culture concert hall offer a variety of music from around the country that draws large numbers of people.

Two major kinds of musical repertories that can be contrasted are epic praise-songs and drumming pieces for dancing. The epic pieces emphasize individuality. Delivered by solo singers or speakers, usually accompanied by string instruments or xylophones, they honour heroes from the past, and also praise living patrons and their lineages. Drumming and dance traditions honour groups of people, such as children undergoing ritual circumcisions and excisions, blacksmiths, a class of slaves or entire ethnic groups. The government-sponsored regional and national performing groups have contributed to the establishment of a canon of pieces drawn from diverse traditions, constructing a national Malian music culture. This influence, along with the typical exchange that takes place in cosmopolitan Bamako, has contributed to the appreciation of some dances such as *dansa*, *jelidon* (*lamban*), *maraka* and *didadi*.

Three epic pieces are widely known in Mali because of their association with heroes of the past: *Sunjata*, *Tutu Jara*, also known as *Ba Juru* ('Mother's Tune'), and *Taara* (see §2 above). These three pieces are typically played on one or another *griot* lute, the *kora* or *bala*, and they also are played by urban dance orchestras. Hunter's music, a tradition that is believed to predate that of the *griot* praise-singers, also consists of epic-singing, but mythical rather than historical ancestors are most often the subject. Two Maninka hunter's pieces are widely known: *Janjon*, sung for and danced by those who have accomplished significant feats in life, and *Kulanjan*.

Several major trends continued to develop in the 1990s: drawing on the personae and sounds of the hunters of the southern savanna region; the predominance of female singers; and the use of the guitar. Popular music based on the Wasulu *kamalen ngoni*, a close relative of the *donso ngoni*, has become a signature of a Malian musical identity. Wasulu-based groups sometimes incorporate a guitar, but can also use local instruments exclusively: a Senufo xylophone, *kamalen ngoni* and the metal scraper that accompanies it, a one-string fiddle, and a *bolon* as a bass. Female singers who lead these groups have achieved a marked degree of commercial success, with Oumou Sangare leading the way with a series of remarkable recordings blending traditional and modern sensibilities.

The guitar has been used in Mali by many ethnic groups to play their music, and it has been used as a bridge between traditional and popular genres. *Jeli* guitarists are the most virtuosic, integrating it into their own tradition first and then introducing those traditions to urban orchestras via the electric guitar. The blending of traditional and popular genres has occurred on both fronts: by incorporating a *bala* or *jembe* into a modern, urban dance orchestra, or by incorporating a guitar into a traditional ensemble. The international stardom of Salif Keita and the success of young virtuosos such as Toumani Diabate, deeply grounded in the traditions of their country, yet willing to branch out in new directions, have reaffirmed Mali's reputation as a major producer of serious creative music in Africa.

ERIC CHARRY

Ma Lianliang (*b* Beijing, 1901; *d* Beijing, 26 Dec 1966). Chinese actor of Beijing opera, a specialist in *laosheng* (old male) roles. A Hui, or Chinese Muslim, he entered Beijing's Fuliancheng Training School in 1909. He established his own school of performance in which the singing was noted for its enthusiasm and lack of restraint, but consistent with maintaining perfection and precision of technique. Ma was very innovative in his acting and took on newly created roles readily. Having gone to Hong Kong in the spring of 1948, where he starred in several opera films, he returned to China in 1951, serving the new Communist regime in many capacities. He performed for the Chinese troops in Korea and headed the Beijing Opera Company in Beijing and its Traditional Drama School. In 1964 he supported the move towards the revolutionary Beijing operas and even performed in them. He was, however, an early casualty of the Cultural Revolution, which began in 1966.

COLIN MACKERRAS

Malibran [née García], **Maria(-Felicia)** (*b* Paris, 24 March 1808; *d* Manchester, 23 Sept 1836). Spanish mezzo-soprano. She was the daughter of the composer Manuel García and sister of the mezzo-soprano Pauline Viardot. She studied with her father, a rigorous teacher whose harshness towards her was notorious, and made her London début at the King's Theatre in June 1825 as Rosina (*Il barbiere*); subsequently she sang Felicia in the first British performance of Meyerbeer's *Il crociato in Egitto*. *Il barbiere* opened the García family's season at the Park Theatre, New York, in November 1825. (*Tancredi*, *Otello*, *Il turco in Italia* and *La Cenerentola*, *Don Giovanni* and two pieces by García were also in the repertory.) After the failure of her marriage to Eugène Malibran, Maria Malibran returned to Europe in 1827. She made her Paris début at the Théâtre Italien in *Semiramide* in 1828, reappeared at the King's Theatre in 1829 in *Otello*, and then sang alternately in Paris and London until 1832, when she went to Italy.

She made her Italian début at the Teatro Valle, Rome, on 30 June 1832 as Desdemona; moving to Naples she sang the same role at the Teatro del Fondo on 6 August and Rosina in *Il barbiere di Siviglia* at the S Carlo on 7 September, followed by *La Cenerentola*, *La gazza ladra*, *Semiramide* and *Otello*, scoring a tremendous success at every performance. In Bologna she sang Romeo in *I Capuleti e i Montecchi* on 13 October, substituting the final scene of Vaccai's *Giulietta e Romeo* for that of Bellini. In May 1833 at Drury Lane she sang *La sonnambula* in English; it was so successful that it later transferred to Covent Garden. She returned to the S Carlo, Naples, in November 1833, singing her usual Rossini and Bellini roles, as well as operas by Pacini and Coccia: she sang *Norma* on 23 February 1834 in Naples, and repeated it at La Scala on 15 May. She visited Venice early in 1835, singing Desdemona and Norma at La Fenice. On 8 April she gave one performance of *La sonnambula* at the Teatro Emeronitio, which was in dire financial straits, raising enough money to guarantee the future of the theatre, renamed Teatro Malibran. In May she sang Amina and Leonore in *Fidelio* in English at Covent Garden, then in September returned to La Scala. New roles included Vaccai's Romeo and the title role of his *Giovanna Grey*, which she created on 23 February 1836. She also created the title role in Donizetti's *Maria Stuarda* on 30 December 1835, causing a famous scandal by ignoring some changes that the Milanese censors had insisted upon. Bellini

Maria Malibran: portrait by Luigi Pedrazzi, 1834 (Museo Teatrale alla Scala, Milan)

adapted the role of Elvira in *I puritani* (1835, Paris) for her to sing in Naples, but the opera was turned down by the management and she never sang it.

Her first marriage having eventually been annulled, she married the violinist Charles de Bériot in March 1836, and at Drury Lane in May of that year created the title role in Balfe's *The Maid of Artois*, which he had written for her. A riding accident when she was pregnant resulted in her death during the Manchester Festival. To judge from the parts adapted for her by both Donizetti and Bellini, the compass (*g* to *e'''*), power and flexibility of Malibran's voice were extraordinary. Her early death turned her into something of a legendary figure with writers and poets during the later 19th century.

ELIZABETH FORBES

Malimba. A variant spelling for MARIMBA. The term is used in wide areas of eastern and south-eastern Africa for a lamellophone (*see* LAMELLOPHONE, §2(i)) and a XYLOPHONE.

Malinconico (It.: 'sad', 'melancholy'). As a tempo or expression mark it was probably not used much before Boccherini, though Bernardino Bottazzi (1614) wrote of making 'canti fermi melanconici' sound 'allegri'. Beethoven entitled the final Adagio of his Quartet op.18 no.6 'La malinconia'.

Maline, Nicolas (*b* Mirecourt, 28 Feb 1822; *d* Mirecourt, 28 April 1877). French bowmaker. He was the son of Guillaume, who has long been credited in error as the bowmaker of the family. Nicolas, however, is the only member of the family mentioned in civil and church documents as 'archetier'. His work is distinctive and, though clearly influenced by the style of Dominique Peccatte and Nicolas Maire, shows a striking individuality in the heads; the chamfers have a bolder sweep and the back of the head is more rounded.

Due to the commercial connection with J.-B. Vuillaume much of Maline's output is mounted with Vuillaume-type frogs and buttons. An individual touch is the lengthened lower plate of the ferrule. For less expensive commercial work, mostly nickel-mounted and unbranded, Maline used amourette and ironwood in place of pernambuco for the sticks. His brand, MALINE, is sometimes preceded by the cross of the Légion d'Honneur. On 18 August 1849 Maline was made a Chevalier of the Légion d'Honneur on account of his bravery as a 'voltigeur' (scout). Although he died at the relatively young age of 55 Maline was prolific as a bowmaker. His work appears under his own brand, that of J.-B. Vuillaume and various other Parisian bowmakers.

JAAK LIIVOJA-LORIUS

Malines (Fr.). *See* MECHELEN.

Malinin, Evgeniy (Vasil'yevich) (*b* Moscow, 8 Nov 1930). Russian pianist. His mother was a member of the Bol'shoy Opera chorus, his father a worker with a passionate interest in music. He entered Moscow's Central Music School at the age of four, but his studies there were interrupted by World War II. His teachers were Tamara Bobovich and, from 1949 to 1957, Heinrich Neuhaus at the Moscow Conservatory. He won prizes in competitions in Budapest (1949) and Warsaw, and shared second prize at the Marguerite Long-Jacques Thibaud Competition in Paris in 1953. Malinin has made his performing career mainly in Russia, with occasional appearances and masterclasses in France. His interpretation of Rachmaninoff's Second Concerto is especially noted. He began to teach at the Moscow Conservatory in 1957 and from 1972 to 1978 was dean of the piano faculty, becoming head of school in the mid-1980s. In April 1988 he played a prominent role in Moscow's centenary festival for Neuhaus.

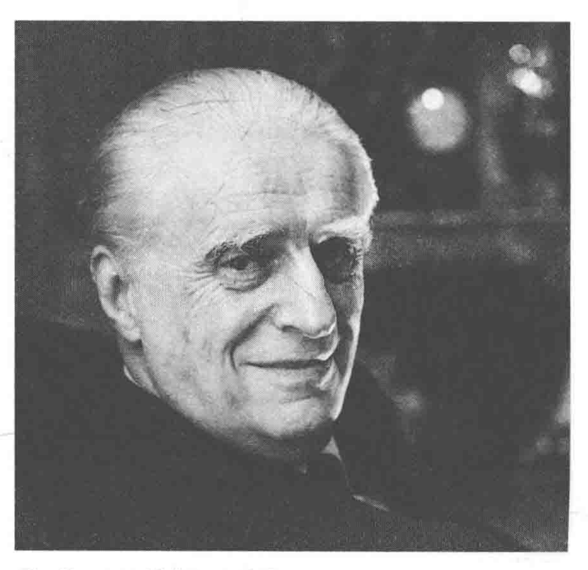
DAVID FANNING

Malipiero, Gian Francesco (*b* Venice, 18 March 1882; *d* Treviso, 1 Aug 1973). Italian composer and musicologist. Although very uneven, and less influential than Casella and Pizzetti, he was the most original and inventive Italian composer of his generation.

1. LIFE. Born into a family of musicians of aristocratic origin, he was the grandson of the opera composer Francesco Malipiero (1824–87) and the uncle of Riccardo Malipiero. His childhood was restless and troubled: after the break-up in 1893 of his parents' marriage, his father Luigi, a pianist and conductor, took him to Trieste, Berlin and eventually Vienna, where the boy studied briefly at the conservatory (1898–9). But in 1899 he returned to his mother's house in Venice, where he entered the Liceo Musicale, learning counterpoint from Marco Enrico Bossi, who at first had a low opinion of him. After Bossi's move to Bologna (1902), Malipiero continued his composition studies on his own. It was then that an important new

experience transformed his musical outlook: in 1902, without any external encouragement, he discovered and began to transcribe the long-forgotten early Italian music (Monteverdi, Frescobaldi, Merulo etc.) in the Biblioteca Marciana. By 1904, when he too moved to Bologna, his composition technique had matured sufficiently to win Bossi's approval and a diploma at that city's Liceo Musicale.



Soon afterwards Malipiero became amanuensis for a while to the blind composer Smareglia, a disciple of Wagner. Later he claimed that he learnt more, especially about orchestration, from this experience than from all his formal studies. He gained nothing significant from the few of Bruch's classes that he attended in Berlin in 1908; more important was his discovery, around that time, of the music of Debussy, and his enthusiasm, albeit short-lived, for Strauss's *Elektra*, the première of which he attended.

A visit to Paris in 1913 came as another landmark in Malapiero's experience: it was there that he formed a lasting friendship with Casella, and the first performance of *The Rite of Spring*, which he attended on Casella's suggestion, woke him, as he later put it, 'from a long and dangerous lethargy'. As a result he soon decided to suppress nearly all his compositions written up to that time, although contrary to what he consistently gave the world to understand, he did not destroy most of the manuscripts. (The surviving juvenilia were deposited after the composer's death at the Fondazione Giorgio Cini, Venice.) Meanwhile, however, he had caused ill-feeling in many quarters, and won sudden notoriety, by entering five works, each under a different pseudonym, for a competition organized in 1912–13 by the Accademia di S Cecilia, Rome, thus winning four of the five prizes.

Though again based in Venice after his return from Bologna in 1905, Malipiero spent more and more time from 1910 onwards in the little Veneto hill town of Asolo. But before he could settle there permanently the Retreat of Caporetto forced him and his family to flee, in November 1917, to Rome, and he arrived there with shattered nerves. He later wrote of this tormented time: 'In 1914 the war disrupted my whole life, which remained, until 1920, a perennial tragedy. The works of these years perhaps reflect my agitation; however, I consider that if I have created something new in my art (formally and stylistically) it happened precisely in this period' (Scarpa, 1952, p.224). He remained in Rome until 1921 (spending the summer months in Capri) and was associated, while there, with Casella's Società Italiana di Musica Moderna. The two again collaborated, in 1923, in founding the Corporazione delle Nuove Musiche; but Malipiero was less practical and extroverted than Casella, and played a less central part in the campaign to modernize Italian music. Even smaller was his role in the fascist regime's reorganization of musical life, though he actively sought, and for a while appears to have enjoyed, the personal favour of Mussolini, with whom he may have had as many as three personal audiences (see Nicolodi, 1984, pp.352–3). That favour was curtailed abruptly in 1934 by the Duce's condemnation of Malipiero's opera *La favola del figlio cambiato*, a condemnation seemingly directed more at Pirandello's libretto than at the music. Malipiero sought to appease Mussolini by dedicating to him his next opera *Giulio Cesare*, but the dictator, now preoccupied with his Abyssinian campaign, refused the composer's next request for an audience.

In 1921 Malipiero was appointed professor of composition at the Parma Conservatory, but he resigned three years later, by which time he had bought (late in 1922) the house in Asolo that remained his home until his death. Having thus stabilized his life as never before, he embarked, in 1926, on his edition of all Monteverdi's works. The fruits of these labours, completed in 1942, have been justly criticized, but their importance as a major step in Monteverdi studies is unquestionable. In 1932 Malipiero again became a professor of composition, this time at the Venice Liceo Musicale (Conservatory from 1940), which he directed from 1939 to 1952. After his retirement from the conservatory, he continued to teach privately and to preside over the Istituto Italiano Antonio Vivaldi, editing many volumes in the series of Vivaldi's complete instrumental works. But these activities, like their equivalents in earlier periods, always remained secondary to his irrepressible urge to compose, which continued unabated right up to 1971.

2. Earlier works. Malipiero's suppression of so many of his pre-World War I works makes his early development hard to trace coherently. It would seem, however, that a disconcerting unevenness, apparent in his output of most periods, was inherent in his nature from the start. His opera *Sogno d'un tramonto d'autunno* shows signs of immaturity, though the rich, turbulent orchestral part, at first hovering uncertainly between various post-Wagnerian and Franco-Russian idioms, gains in confidence towards the end of the work. But the *Poemetti lunari* for piano and the first set of orchestral *Impressioni dal vero* are undoubtedly the most consistently inventive of his early works, revealing that even before his visit to Paris he was capable, at least when working on a small scale, of a refined, luminous expressiveness of striking individuality. The picturesque orchestration of the *Impressioni*, as well as some aspects of their harmony, suggest the influence of Debussy and possibly also that of Grieg. The second set of *Impressioni* lacks the economy and inevitability of the first set, though its richness of texture and imagery surpasses anything Malipiero had previously

Gian Francesco Malipiero, 1960

achieved, the lessons of *The Rite of Spring* being evident in the superimposed triads and the fierce rhythmic impulse of the final piece. A fuller but more controlledly personal response to Stravinsky's influence – as well as to Debussy's, which was to remain fundamental, however transformed, in his music of all periods – can be seen in *Pause del silenzio I*. This remains one of the most powerful of his purely orchestral compositions, in which the free, improvisatory interplay of images, characteristic of all his mature works, is kept firmly within bounds by the simple device of introducing each section with a variant of the same fanfare. This kind of construction in clearly defined, boldly contrasted 'panels' was to recur in several subsequent works, providing a suitable framework for the stark expressive antitheses typical of this most turbulent period of his career.

The violence which erupts in parts of *Pause del silenzio I*, notably the last section, is more fully expressed in *Pantea* – the first and still perhaps the clearest of Malipiero's frankly symbolic theatre works, in which he made as decisive a break with traditional operatic methods as he did with orthodox thematic processes in his instrumental music. The only figures on the stage are the protagonist, represented by a mute dancer, and, briefly near the end, an apparition of Death; the only voices are those of a hidden, largely wordless chorus with baritone soloist, symbolizing the unattainable freedom and beauty for which Pantea yearns. The work's conception as a monodrama, in which a woman is haunted by hallucinations and false hopes before being confronted with the brutal finality of death, led Piero Santi (*L'approdo musicale*, 1960) to make interesting comparisons with *Erwartung*. But there is nothing Schoenbergian about the music, for all its quasi-Expressionist turbulence. Indeed, the anticipations, in more abstract terms, of the basic idea of *Il prigioniero* are just as noteworthy, especially as Dallapiccola revered Malipiero greatly.

Sette canzoni, too, rebels against established operatic traditions, but in a totally different manner, recalling the 'panel' construction of *Pause del silenzio I*. Seven miniature operas, without any unifying plot and lasting about 45 minutes in all, are threaded together like beads on a string. Each presents (like *Pantea*, but in ostensibly more realistic terms) a head-on collision between incompatible forces, uncomplicated by dramatic elaboration. Each has a song as its musical nucleus (hence the title) but is otherwise largely mimed. The total result, for all its eccentricity, is still regarded in Italy as a supreme example of 20th-century experimental music theatre.

In the early 1920s the restless, tormented vision of his works of 1917–19 tended to give place to more serene, even joyful expressions. The string quartet *Rispetti e strambotti*, probably Malipiero's best-known chamber work, adapts the 'panel' structure of *Pause del silenzio I* in ebullient kaleidoscopic terms, showing a winsomely fresh feeling for string sonorities. The two extraordinary little operas that Malipiero composed during 1919–22 as companion pieces to *Sette canzoni*, in the oddly heterogeneous triptych *L'Orfeide*, show his iconoclastic approach to music theatre in a particularly extreme form. Perhaps the richest expression of the comic-grotesque side of his genius is to be found, however, in the *Tre commedie goldoniane*, in which the composer's idiosyncratic, extremely compressed treatment of events and characters taken from well-known Goldoni plays is only marginally more 'traditional' in effect than *L'Orfeide*. An apparently more drastic departure from his own preceding methods can be seen in *San Francesco d'Assisi*, in which his longstanding interest in early music, from plainsong to Monteverdi, is reflected in a much more thoroughgoing manner than it had been in parts of *Sette canzoni*. Yet the resultant antique, Giottoesque calm does not preclude violent episodes: there are echoes of *Pantea* in the 'fire' scene. Moreover, the colourful post-Debussian qualities of Malipiero's orchestration are not noticeably inhibited, however much they may be redirected, by the new austerity in his basic approach.

Malipiero's music of the later 1920s could be said to follow on from *San Francesco* in that, while not rejecting his pre-1920 style outright, it is marked by an ever closer interaction between archaic and early 20th-century idioms. Ostinato devices are now less frequent; contrapuntal textures become more expansive and elaborate, though almost never strictly organized for more than a few seconds at a time; but modal archaisms still rub shoulders with acrid false relations, sudden outcrops of convulsive dissonance and the like. The process is clearly seen in a further series of highly unconventional operas, whose symbolism as such, however, lacks the lucidity of that of *Pantea*, having instead the perplexing irrationality of dreams. It is perhaps understandable, though unjust, that *Filomela e l'infatuato* (1925) and *Merlino mastro d'organi* (1926–7) had to wait until 1972 before being staged in Italy. *Merlino*, for instance, features a huge magic organ which kills all men who hear it, until a deaf mute kills the organist and then becomes articulate in the 'purifying fire' of the stake, revealing himself as his victim's reincarnation. To add to the confusion, the librettos of both operas (like those of *Sette canzoni* and several other works) include many quotations, with or without modification, from old Italian texts, sometimes introduced in situations which would have startled the original authors. *Filomela* and *Merlino*, for all their musical qualities, are best regarded as transitional, preparing the way for the hauntingly enigmatic *Torneo notturno* (1929), another of Malipiero's supreme achievements, in which the obsessively recurring 'canzone del tempo' evokes the inexorable destructiveness of time.

3. Later works. After Malipiero's 'vintage years' from 1917 to 1929, when his inspiration was more often at its height than in any other period, his subsequent career may disappoint. Nevertheless, his best music of the 1930s and 40s has notable qualities of its own, some of them foreshadowed before 1930 in, for example, *La cena* and *Le aquile di Aquileia*. The former, though not conceived for the theatre, is in many respects a successor to *San Francesco* in that it returns to the austere neo-Monteverdian arioso and simple imitative choral counterpoint used in that earlier work. It led, in turn, to *La Passione* and *S Eufrosina*, works whose calm, spacious yet sometimes very poignant musical understatements serve imagery whose free-ranging interplay now seems more concerned with continuity than with contrast. *Le aquile di Aquileia*, on the other hand, conceived as the first panel of the stage triptych *Il mistero di Venezia*, is resplendent in its pageant-like celebration of the founding of Venice, with quasi-oriental phrases mingling with the archaisms in a way which may recall the architecture of St Mark's. Its music at times foreshadows the faster, more dynamic and festive

movements in the sinfonias, from the second movement of the First to the first of the Seventh.

Malipiero's symphonies, the first seven of which (excluding juvenilia) are his most important single group of compositions of the years 1930–50, have little connection with the Austro-German symphonic tradition. He himself once declared, sweepingly but self-revealingly, that 'the Italian symphony is a free kind of poem in several parts which follow one another capriciously, obeying only those mysterious laws that instinct recognizes'. This improvisatory, nondevelopmental approach naturally has its dangers, here as in his other works: so much more depends on the power of the musical images themselves than is the case when purposeful tonal and thematic processes carry the argument forwards. Nevertheless, the best fruits of these almost 'anti-symphonic' methods derive an important part of their fascination from their many unpredictable incidents and juxtapositions, their wilfully 'undirected' recapitulations of motifs according to no set patterns, and so on. Nor are the seven works as alike as has sometimes been claimed: there is a great difference, for example, between the Fifth, with its jaggedly dissonant carillon effects on two pianos, and the eupeptically soaring diatonic lines of the Sixth, in the outer movements especially, alludes to the Baroque concerto grosso in the way it plays groupings of solo strings off against the full string body. Perhaps the best symphony of the series is the Third, a war-inspired work which lacks the hectic intensity of some of Malipiero's music of the World War I years but is no less moving for its comparative restraint.

Among Malipiero's other instrumental works of the 1930s and 40s, the First Violin Concerto is the earliest, and perhaps the finest, full expression of that ecstatically burgeoning lyricism which burst forth in some of his best music of the 1930s, after the more tormented utterances of the previous decade and a half; and the jubilant Fourth String Quartet, though less richly imaginative than the First, is the most perfectly constructed of the eight. His stage works of the 1930s, however, are undeniably disappointing compared with those of the previous 13 years, and this seems, significantly, to have been a direct result of his temporary abandonment of idiosyncratic librettos in favour of straightforward adaptations of plays by other writers. *La favola del figlio cambiato* (most of whose text was written specifically for Malipiero) is a partial exception, in that the 'paradoxical' aspects of Pirandello's art clearly struck a sympathetic chord in Malipiero's imagination; at its best, and above all in the magnificent opening scene, it shows Malipiero at the height of his powers. But *Ecuba*, *Giulio Cesare* and *Antonio e Cleopatra* reveal all too clearly that he had relatively little flair for either orthodox characterization or varied naturalistic dialogue. Each of the operas contains striking scenes (some of them incorporated, many years later, into the surprisingly effective anthology opera *Gli eroi di Bonaventura*); but on the whole the details of the dramas too easily become absorbed into a generalized, austerely poignant contemplation, with an excess of neo-Monteverdian arioso. Not until *I capricci di Callot*, whose libretto is derived (with typical Malipieran freedom) from parts of E.T.A. Hoffmann's *Prinzessin Brambilla* and, beyond it, from the bizarre world of Callot's engravings, did Malipiero return to the kind of quirkily anarchic subject matter that naturally suited him. The musical idiom, as already in *La favola del figlio cambiato*, is now the expansively lyrical, basically diatonic one which had reached maturity in the First Violin Concerto and the First Symphony, an idiom less conducive to forceful dramatic contrasts and tensions than were those of his best earlier stage works. Nevertheless, the purely orchestral preludes and ballet scenes in particular have a colourful verve which makes this musically his finest opera of the years 1934–50, although *Vergilii Aeneis*, a concert work that may also be staged, reaches perhaps greater heights in its superb first part, 'La morte di Didone'.

If the music of *I capricci di Callot* is wholly characteristic of this long, relatively stable middle period of Malipiero's career (as is that of *L'allegra brigata*, despite a partial reversion to the anthology-like 'panel' construction of *Sette canzoni*), *Mondi celesti e infernali* marks the moment of transition to his last period. After many years in which his music had been predominantly diatonic (with chromatic excursions whose extent varied from work to work), he now took a major step towards a more complex, pervasively chromatic idiom, culminating, as early as the end of Act 1, in a complete 12-note chord. The opera's transitional nature is revealed in its inconsistent approach, both musically and dramatically, albeit within a large-scale 'panel' structure; and it is decidedly uneven in quality. But it remains an important link in the chain leading towards the intense world of the best parts of *Venere prigioniera*: here Malipiero's new chromatic language, in which modal and whole-tone outlines often interact so closely that they are barely identifiable as such, reached full maturity.

After *Venere prigioniera* – indeed even before it to some extent, as the *Sinfonia in un tempo* shows all too clearly – Malipiero entered a final phase, many of whose products suggest that he continued composing more to satisfy a private urge than because of a constant need to give public utterance to fresh ideas. Right to the end his individuality is rarely in doubt: his new, more pervasive chromaticism has a way of endowing every note, even in fast passages, with a certain inwardness and poignancy, as *Ave Phoebe, dum queror* illustrates in an especially intense and persuasive manner. Yet D'Amico's description of Malipiero's later output as 'a subdued soliloquy, continuing uninterrupted for years and years, passing from one work to another, apparently always the same' is in certain respects apt. Polite but usually rather unconvinced performances of these copious fruits of his extreme old age have done much to block more widespread appreciation of his best works.

Nevertheless, to dismiss all Malipiero's post-1955 music as a mere postlude to his previous work would be unjust; for there were still several pieces to come, after that date, in which his imagination was sufficiently focussed by some element in the composition's make-up to produce results which are vital and distinctive. Sometimes the special stimulus came from the text, as in the plaintively beautiful *Dialogo con Jacopone da Todi*; sometimes from an aspect of the instrumentation, as in the garrulously chattering *Dialogo per cinque strumenti a perdifiato* or the strangely poetic use of the celesta in the last section of the *Serenata mattutina*. At other times the vitalizing factor is an extra-musical idea, as in the percussive machine-imagery of the Sixth Piano Concerto; or it may be inherent in the work's dramatic conception,

as in *Magister Josephus* (much the best of the *rappresentazioni da concerto*), in the pungently festive *Rappresentazione e festa di Carnasciale e della Quaresima*, whose stark juxtaposition of Carnival and Lent recalls the final 'panel' of *Sette canzoni*, or in the covertly autobiographical *Uno dei dieci*, which shows that even at the age of 88 Malipiero could still create a strangely moving operatic miniature, pervaded by a characteristic mixture of self-deprecating satire and nostalgia for the Venetian past. *Magister Josephus* is particularly interesting, in that its 'plot' – about Zarlino at war with those new trends that were to invalidate his theories at the end of his life and after his death – gave the composer an ingenious pretext for referring explicitly, though always within the framework of his own style, to various pre-Classical idioms which had at one time or another influenced him. The result is perhaps the most engaging of all his late pieces, as fresh and alive as any of his earlier compositions, though obviously slighter and less ambitious than the supreme achievements of his prime. It is those achievements – now receiving increased recognition thanks to the large number of commercial recordings of his music issued since the early 1990s – which give at least some credibility to Dallapiccola's oft-repeated claim that Malipiero, not he, was the greatest Italian composer of his day.

WORKS

OPERAS

Elen e Fuldano (3, S. Benco), 1907–9, unperf., unpubd

Canossa (La notte dei penitenti) (1, Benco), 1911–12, Rome, Costanzi, 24 Jan 1914; unpubd

Schiavona, early, unperf., unpubd, ?destroyed

JOHN C.G. WATERHOUSE

Malipiero, Riccardo (*b* Milan, 24 July 1914). Italian composer. Son of the cellist Riccardo Malipiero, he obtained his diploma in the piano at Milan Conservatory (1932) and in composition at Turin Conservatory (1937). He then took postgraduate courses with his uncle, Gian Francesco Malipiero, in Venice, between 1937 and 1939. After embarking on a career as a pianist he devoted himself entirely to composition and music criticism, which appeared in the daily newspapers *Il popolo* (1945–56) and the *Corriere lombardo* (1956–66). In 1949 he helped organize in Milan the first International Congress of Dodecaphonic Music. He gave postgraduate courses in composition at the Centro de Altos Estudios Musicales in Buenos Aires (1963) and was visiting professor at the University of Maryland (1969). In 1969 he represented Italy at the UNESCO conference in Moscow and was also appointed director of the Liceo Musicale in Varese, a post he held until 1984.

Malipiero disowned all that he wrote up until 1938 and saved only a small amount of that written before 1945 (particularly the series of chamber and piano works entitled *Musica*). These early pieces show the influence of his uncle's teaching and the neo-classicism of Casella and Stravinsky. From the opera *Minnie la candida* on – with its non-*verismo* vocal style, atonal language and formal schemes derived from instrumental music – Dallapiccola became the model. Malipiero's dodecaphonic works (e.g. *Piccolo concerto* and the *Cantata sacra*) retain an expressive lyricism closer to Berg than to Schoenberg; and with *La donna è mobile*, he created a 12-note comic, often parodic, opera, with a supple, textually comprehensible, use of Sprechgesang.

In subsequent chamber works (e.g. *Musica da camera*, String Quartet no.3 and *Mosaico*), he moved towards an exploration of timbre, an aspect which had already appeared in the orchestral *Studi*. This was taken to an extreme in the avant garde influenced works of the 1960s – such as *Nykteghersia* and *Mirages*, which reveal subtle blurring effects and a sort of nocturnal Impressionism – and the early 1970s, for example the Concerto for piano trio and orchestra and *Capriccio*, which introduce extensive block-like textures. After this point Malipiero re-embraced a fullness of expression: the Requiem for orchestra, for example, written in memory of Dallapiccola exhibits a profound sense of subjective human involvement, while employing a variety of sound material (including some by Dallapiccola himself). His work of the late 1980s on has seen the return of the voice in intense, cantabile music, exemplified by *Loneliness* and *Dalla prigione in suono*.

WORKS

Stage: Minnie la candida (op, 2, M. Bontempelli), Parma, Regio, 19 Nov 1942; La donna è mobile (comic op, 1, G. VIRGILIO BERNARDONI

Maliszewski, Witold (*b* Mohylew, Podolia, 20 July 1873; *d* Zalesie, nr Warsaw, 18 July 1939). Polish composer and teacher. He took a degree in medicine at St Petersburg University (1897) and then studied composition at the conservatory with Rimsky-Korsakov (1898–1902). From 1908 to 1921 he directed the Imperial Conservatory, Odessa, and taught composition, harmony and counterpoint there, also conducting the local symphony orchestra. In 1921 he moved to Warsaw where he was director of the Chopin School (1925–7), head of the music department at the Ministry of Culture (1927–34) and professor at the conservatory (1931–9), his pupils including Lutosławski. Maliszewski was one of the founders of the Chopin Institute, Warsaw, in 1934. In 1928 he was a prizewinner in the Geneva competition for a finale to Schubert's Symphony no.8. His greatest original achievement was in the fields of sacred and orchestral music. Moderate in his attitude to novel technical means, he moved away, in 1921, from a style greatly influenced by Rimsky-Korsakov and Glazunov towards a use of Polish folk music.

WORKS

TERESA CHYLIŃSKA

Malko, Nikolay (Andreyevich) (*b* Brailov, 4 May 1883; *d* Sydney, 23 June 1961). American conductor of Russian birth. A pupil of Rimsky-Korsakov, Lyadov, Glazunov and Nikolay Tcherepnin at the St Petersburg Conservatory, he also studied with Felix Mottl in Munich. Beginning as a conductor of ballet and opera at St Petersburg in 1908, he became a leading musical figure of the early Soviet regime, conducting extensively and holding a professorship at the Moscow Conservatory (1918–25) and at the Leningrad Conservatory (1925–9). While in Moscow he gave the first performance of Myaskovsky's Fifth Symphony in 1920; in Leningrad, where he became chief conductor of the Leningrad PO (1926–9), he gave the first performance of Shostakovich's First Symphony in 1926. But with the diminution of artistic freedom in the USSR he left the country, from 1929 making frequent appearances as guest conductor in Vienna, Prague, Buenos Aires and, with particular success, in Copenhagen, where he was permanent guest conductor of the Danish State RO from 1928 to 1932. He established a reputation in London (Royal Philharmonic Society, 1933) and introduced Shostakovich's First Symphony (with the LSO) in 1935.

In 1940 he settled in Chicago, conducting many American orchestras though not achieving any major musical directorships, and lectured at Mills College, California, and De Paul University. He resumed his international career after World War II but not in major posts. With Norman Del Mar he took over the declining Yorkshire SO in 1954 (it closed the following year) and from 1957 was conductor of the Sydney SO. In 1959 he revisited the USSR. His recordings, chiefly with the

Philharmonia or Danish State Radio orchestras, are mainly of Russian composers, including such lesser-known ones as Glier and Ippolitov-Ivanov. Though he lacked warmth and magnetism on the platform he was a lively interpreter and an acknowledged expert in the technique of conducting and its instruction – he wrote a textbook on the subject in English, *The Conductor and his Baton* (Copenhagen, 1950), and a volume of memoirs, *A Certain Art* (New York, 1966).

ARTHUR JACOBS

Mallagaray, Juan de. *See* CASTRO Y MALAGARAY, JUAN DE.

Mallapert, Robin (*fl* 1538–53). French musician active in Italy. From at least 13 June 1538 until 24 April 1539 he was director of the Cappella Liberiana at S Maria Maggiore in Rome. Among the singers in his charge was the young Palestrina, whom he probably taught. On 25 April 1539 Mallapert is listed as *maestro di cappella* at S Luigi dei Francesi, a post that he held for only seven months. On 1 December 1539 he assumed the directorship of the Cappella Giulia at S Pietro, a position he retained until 31 January 1545. From 1 October 1548 to late November 1549 he was *maestro di cappella* at S Giovanni in Laterano, and on 1 January 1550 he once again assumed directorship of the Cappella Giulia. Palestrina succeeded him on 1 September 1551. In August 1553 he was invited to take over the directorship of the choir at S Maria Maggiore. However, since the *maestro di cappella* then in residence, Adrien Valent, continued in this position until 1561, apparently Mallapert either declined the offer or was in some way prevented from accepting it. He is probably the composer of six *Magnificat* settings ascribed to 'Rubino' in a Roman manuscript (*I-Rvat* C.G.XV.36).

ALLAN W. ATLAS/MITCHELL P. BRAUNER

Mallarie. *See* MALLORIE.

Mallarmé, Stéphane (*b* Paris, 18 March 1842; *d* Valvins, nr Fontainebleau, 9 Sept 1898). French poet. His small and very difficult poetic output was the product of vast, unrealized ambitions for poetry as the supreme art which could, by extreme refinement and precision of language, make contact between man and the world of the ideal. In this context Mallarmé wrote of music as the abstract model of the ideal, but he regarded actual music as fixed, by the necessity of instruments and players, on a physical level that poetry could transcend. He therefore despised poetic retreat into pseudo-musical imprecision and regarded the phenomenon of Wagner with a mixture of envy and alarm (*Richard Wagner, rêverie d'un poète français*, 1885). More recently, his agonized conclusions on the struggle between art and chance, producing the apparent randomness of his late poems, have influenced the theory of aleatory music.

His poem *L'après-midi d'un faune* inspired Debussy's orchestral piece, and his verse play *Hérodiade* Hindemith's chamber piece. Ravel, Milhaud and Sauguet were among other composers who set his poems to music. Boulez has been deeply influenced by the complexities and disintegrations of Mallarmé's work, and his major composition, *Pli selon pli*, sub-titled 'Portrait de Mallarmé', uses both the words and the elusive atmosphere of various poems.

LUCY BECKETT/JEAN-MICHEL NECTOUX

Maller. *See* MALER.

Mallery. *See* MALLORIE.

Mallet [beater, stick]. Term used in percussion playing for any stick, beater or hammer that has a head, whether it be the small felt ball for the timpani stick, or the large weighted head needed to bring out the tone of a tam-tam. Keyboard percussion instruments such as the vibraphone, marimba and xylophone are today normally spoken of collectively as 'mallet instruments'. Snare drumsticks are referred to as 'sticks', since they are fashioned from wood alone.

JAMES HOLLAND

Mallet, Francis (*d* Boston, 3 Aug 1834). American organist, singer, publisher and composer. He was probably of French origin, and may have emigrated to America from London. His first public concert appearances in the USA were in Philadelphia and Newport, Rhode Island, in 1793. In the same year he settled in Boston, where he served as church organist and sang and played in concerts. His reputation as a performer rested mainly on his singing of oratorios. In 1801, with Gottlieb Graupner and Filippo Trajetta, he established the first conservatory of music in the USA. The 'Conservatorio' or 'musical academy' in Rowe's Lane operated only from 1801 to 1802; during this time Graupner and Mallet were publishing partners, issuing around 20 items. From 1803 to 1807 Mallet published music independently and was a distributor in Boston for the Philadelphia publishers Carr and Schetky; he also sold American and English pianos (1805–7).

Mallet's few known compositions are settings of sentimental or patriotic texts. While not a distinguished performer and of little importance as a composer, his contributions to musical instruction, performance and publishing in Boston are significant; he was one of the few professional musicians who sustained the musical life of the city in the late 18th century and the early 19th.

ANNE DHU SHAPIRO

Malling, Otto (Valdemar) (*b* Copenhagen, 1 June 1848; *d* Copenhagen, 5 Oct 1915). Danish composer and organist. He studied from 1869 to 1871 with Gade, J.P.E. Hartmann and Gottfred Matthison-Hansen at Copenhagen Conservatory. From 1875 to 1884 he conducted the Studenter-Sangforening; he was co-founder in 1874 of the Koncertforening (which he conducted until 1893) and in 1902 of the Dansk Koncertforening. For a number of years he was on the board of the Samfund til Udgivelse af Dansk Musik. From 1885 he taught harmony, counterpoint, composition and orchestration at the conservatory, where he was director from 1899 until his death. He was also an organist in several Copenhagen churches: from 1878 at St Petri, from 1891 at the Helligåndskirke and from 1900 as J.P.E. Hartmann's successor at Vor Frue Kirke. Among his publications is the first Danish textbook on orchestration (1894). As a composer, his most important works are the long series of Romantic character-pieces for organ (opp.48, 54, 63, 70, 75, 78, 81, 84, 89), partly on biblical subjects, which he composed in his later years (1892–1910). He also wrote a Symphony in D minor op.17 (1884), a Piano Concerto in C minor op.43 (1890), the ballet *Askepot* (1908, produced at Copenhagen in 1911), other orchestral works, chamber music including the Piano Trio op.36 (1889), the Piano Quintet op.40 (1889), the String Octet op.50 (1893), the Violin Sonata op.57 (1894) and the Piano Quartet op.80 (1903), several works for solo voices, chorus and orchestra, unaccompanied choruses, songs and piano pieces. The manuscripts are in the Royal Library, Copenhagen. Malling's brother Jørgen (Henrik) (*b* Copenhagen, 31 Oct 1836; *d* Copenhagen, 12 July 1905) was a composer, organist and teacher.

NIELS MARTIN JENSEN

Mallinger [née Lichtenegger], **Mathilde** (*b* Zagreb, 17 Feb 1847; *d* Berlin, 19 April 1920). Croatian soprano. After studying at the Prague Conservatory with Gordigiani and in Vienna with Richard Loewy, she was engaged at the Hofoper, Munich, where she made her début in 1866 as Norma. While at Munich she sang Elsa in *Lohengrin*, Elisabeth in *Tannhäuser* and Eva at the first performance of *Die Meistersinger* (21 June 1868). She was then engaged at Berlin, making her début as Elsa in 1869, and remained there until her retirement in 1882. She took part in the first Berlin performances of *Die Meistersinger* (1870) and of *Aida* (1874), and her repertory also included Leonore in *Fidelio*, Agathe in *Der Freischütz*, Sieglinde in *Die Walküre*, Valentine in *Les Huguenots* and the Mozart roles of Pamina, Donna Anna and Countess Almaviva. Her voice, essentially a lyric soprano, was not large but so well schooled that she could sing heavier, dramatic roles without strain. After her retirement she taught singing in Prague and later in Berlin, where Lotte Lehmann was among her pupils.

ELIZABETH FORBES

Mallorie [Malery, Mallarie, Mallery, Malorie, Malory] (bur. Peterborough, 28 Jan 1572). English composer. Although his first name is never mentioned in musical sources, he is probably identifiable with 'Robert Malory of the Citye of Peterborow', gentleman, whose will was made on 25 January 1572 and proved three days later. Two early choristers, John and William 'Mallarie', who appear in the 1541–2 Treasurer's Account but are not referred to again, may be musical members of the same Peterborough family, but Robert Malory is the strongest candidate for the composer. He was one of the Peterborough Dean and Chapter's manorial assessors in the early 1560s and appears for the first time in the cathedral musical establishment at the episcopal visitation of 20 April 1570, when he is listed among the lay clerks under the supervision of the organist, Anthony Cheyney. The composer's consort music is adjacent to music by Clement Woodcock (a chorister at Ely Cathedral in 1546–7) in some sources of possible East Anglian provenance, further strengthening a connection with the Peterborough area.

Although Mallorie also wrote church music, he is best known today for his consort music. A five-part *Miserere* (ed. in MB, xliv, 1979, p.74) is a contrapuntal exercise of the type popular in Elizabethan England: the plainsong cantus firmus is curiously syncopated throughout and the counterpoint is skilfully worked out. Another five-part piece, an In nomine (ed. in MB, xliv, 1979, p.92) is more

conventional in its treatment of the semibreve cantus firmus. Equally fluent is the six-part polyphony of *Sol re sol mi sol* (ed. in MB, xliv, 1979, p.134). Mallorie also wrote a six-part piece, *Yf man in care* (*GB-Lbl*) and another In nomine, which survives only in fragments (*GB-Ckc, US-Ws*). Three fragmentary anthems also survive: *Praise the Lord O my soul* (five parts, *GB-Y* and untexted in *Lbl*), *Consider mine adversity* (*Lbl*) and *The King shall rejoice* (*Y*).

IAN PAYNE

Malm, Krister Olof (*b* Stockholm, 27 Nov 1941). Swedish musicologist. He studied musicology, social anthropology and literature at Uppsala University, gaining the doctorate in 1969 with a dissertation on methods for studying chronometrical values in monophonic music. After undertaking fieldwork in the West Indies, Latin America, Europe, Sri Lanka and North and East Africa, he became director of the Musikmuseet, Stockholm (the Swedish national music archives), in 1983 and was appointed associate professor of musicology at Göteburg University in 1985. He has co-written two books and many articles that investigate the relationship between local musical activity, music industries, technology, and media and government policy, seeking to empower localities and nations to assert sovereignty over culture in the face of transnational corporate intervention. This project is notable for its international scope, detailed statistics and analytical systems approach to the flow of money and power in music production and consumption. Malm has served the ICTM in many capacities, including being director of its Commission on Copyright and Ownership (1988–93), president of its Swedish National Committee from 1988, vice-president of the council from 1995 and its president from 1999. He has advised UNESCO as a member of the International Executive Board of its institute for media and culture from 1980, and various government bodies on cultural policy. In 1996 he became a member of the Swedish Royal Academy of Music.

GAGE AVERILL

Malm, William P(aul) (*b* La Grange, IL, 6 March 1928). American ethnomusicologist. He studied composition at Northwestern University, where he received the BM in 1949 and the MM the following year. He began his teaching career at the University of Illinois in 1950. After serving as an instructor at the US Naval School of Music (1951–3), he resumed graduate studies at UCLA where he received the PhD in musicology in 1959 and taught from 1958 to 1960. From 1960 until 1994, Malm was on the faculty of the University of Michigan, where he began an ethnomusicology programme and worked with the Stearns Collection of Musical Instruments.

Malm specializes in Asian ethnomusicology, particularly music for the dance and Japanese music; his research area is shamisen music, particularly that of the Japanese kabuki and bunraku theatre. His monograph *Japanese Music and Musical Instruments* (1959) is the first scholarly and comprehensive survey of its subject in English; his book on *nagauta*, which grew out of his doctoral dissertation, is one of the first detailed English-language studies of a particular genre of Japanese music. In 1993 he was awarded the Koizumu Fumio prize for his work on Japanese music.

PAULA MORGAN

Malmlöf-Forssling, Carin (*b* Gävle, 6 March 1916). Swedish composer. She studied counterpoint (1938–40) and composition (1941–3) at the Swedish Royal Academy of Music, Stockholm, graduating as a music teacher in 1942. In 1957 she studied composition with Nadia Boulanger in Paris. From 1952 she worked in Falun and was elected to the Society of Swedish Composers in 1970; for many years she was its only woman member. Her music has a strongly personal, expressive touch. Her song settings, brief and intense, are thoroughly sensitive to their texts; for this reason in particular she is often called 'the master of the miniature', but even her large-scale works are notable for their idiomatic instrumental sonorities.

WORKS

EVA ÖHRSTRÖM

Malmö. Town in Sweden. On the southern coast, it is recorded as early as 1170 and was founded as a city in 1275. Part of Denmark during the Middle Ages, it grew during the 16th century to be the second Danish city, with a royal mint and a castle where the Danish court chapel may have followed the king. Malmö became an early centre of the Reformation through the publication there of Claus Mortensen's hymnal (1529). In 1658 the town was ceded to Sweden, and its musical life declined to a provincial level. At its centre were the two main churches (including St Petri, similar to the Marienkirche in Lübeck, the organ of which dates from *c*1500 and is in the Malmö museum), the grammar school and the secular regimental pipers and town musicians, the last of whom, H.J. Tengvall, retired in 1811.

In the 19th century a normal pattern of bourgeois musical activity developed. In 1809 a theatre was opened for performances by touring companies, including troupes performing comic opera. A Musiksällskap (Music Society) was founded in 1825 by Tengvall; it consisted mostly of amateurs, who performed in operas (e.g. Cherubini's *Anacréon*, 1832) and gave concerts, the first of which (1826) was given in aid of the Greeks' struggle for independence and was probably the first public concert in Malmö. In the 1860s the society was revitalized by J.A. Cyrén, who increased the size of the choir to 80 members, and under whom 20 concerts were given by the year 1885, when the society was dissolved.

At the end of the 19th century Malmö's rise to its position as the third city of Sweden resulted in further musical activity. In 1900 Andreas Hallén, the renowned Wagnerian, gave a series of oratorio concerts which led to the foundation in 1902 of the Sydsvenska Filharmoniska Förening (South Swedish Philharmonic Society). It had a choir of 150 and an orchestra of about 40 members, drawn from military bands, restaurant orchestras and amateurs. Mendelssohn's *Elijah* was a typical item of the society's repertory. In 1911 Giovanni Tronchi, director from 1907 of the private Malmö Conservatory, founded the city's first symphony orchestra, consisting of about 40 restaurant and theatre orchestra musicians. Richard Henneberg reorganized the Sydsvenska Filharmoniska Förening in 1912 to include more amateurs and gave some 30 concerts annually. In 1914 Tronchi again instituted a rival orchestra; both, however, ceased activity in 1915. The following year Henneberg took over the Malmö Orkesterförening, which was active until 1921, when it was dissolved as a result of trade union opposition.

In 1925 Tor Mann introduced a professional orchestra of 51 players organized by the Stiftelsen Malmö Konserthus, a foundation which from 1919 attempted to provide Malmö with a concert hall. Until 1985, when the new hall (cap. 1300) was inaugurated, concerts were given in the poor acoustics of the Stadsteater (1944, cap. 1650). The orchestra's successive conductors have been W. Meyer-Radon (1926–30), Georg Schnéevoigt (1930–47), S.-Å. Axelson (1947–61), Elyakum Shapirra (1969–73), Janos Fürst (1973–7), Stig Westerberg (1978–85), Vernon Handley (1985–8), James DePriest (1990–94) and Paavo

Järvi (from 1994). The orchestra, eventually numbering 80 musicians, also played for opera and operetta until the Malmö Musikteaters Orkester was founded in 1991. Operettas were performed at the Hippodromteater between 1922 and 1950 and again from 1994.

Chamber music has been promoted since 1910 by Salomon Smith's Kammarmusikförening, which gives five concerts annually in both Malmö and Lund. Ars Nova, founded in 1960, has supported contemporary music and has given many first performances. The Malmö Simfoniorkesters Kör (1975) has replaced the Sydsvenska Filharmoniska Förening as the leading choir (under Dan-Olof Stenlund), and the symphony orchestra of the YMCA is an outstanding amateur ensemble. Musical training is given at the Musikhögskola i Malmö which took over the conservatory in 1971.

The small town of Lund, 16 km north-east of Malmö, was a bishopric as early as 1060 and in 1103 became the first Scandinavian archbishopric. Its Romanesque cathedral had a choir in the early 12th century and an organ by 1331. In 1668 Sweden's second university was founded there, as was an 'Akademiska Kapell', a centre of secular music, in 1745. In 1929 its *director musices*, Gerhard Lundqvist, organized the Lunds Orkesterförening, now the Stadsorkester, formed of professionals and students; Lundqvist's successor Johan Åkesson established the chamber orchestra Capella Lundensis in 1966. A Scandinavian youth orchestra founded in 1951 by John Fernström gives numerous concerts each summer. A male-voice choir, the Lunds Studentsångförening, was founded in 1831 by Otto Lindblad; among later conductors was Folke Bohlin, professor of musicology at the university (1986–95). Folke Alm founded the cathedral's Oratorieförening in 1964, and Lundqvist's Kammarmusikförening (1944) long gave musicians in the region opportunities for chamber music.

HANS ÅSTRAND

Malmogiensis, Trudo Haggaei. *See* AAGESEN, TRUID.

Malorie [Malory]. *See* MALLORIE.

Malovec, Jozef (*b* Hurbanovo, 24 March 1933). Slovak composer. After taking private lessons with Zimmer, he studied composition with Alexander Moyzes at the Bratislava Academy of Music and Dramatic Art (1952–4) and then with Řídký and Sommer (1954–7) at the Prague Academy of Musical Arts; in 1965 he attended the Darmstadt summer course. Appointments followed as music editor at Czechoslovak radio in Bratislava (1957) and as editor at the radio's Experimental Studio from 1977 to 1981.

In the 1960s Malovec was one of the leading figures of Slovak new music, and collaborated with the ensemble Music of Today, who specialized in performing works by the avant garde at large. Malovec's own works from this time are characterized by a synthesis of dodecaphony and tonality, while their musical processes depend upon motoric rhythms, rotation of rhythmic phrases and a tendency towards sonorous effects, particularly percussion sounds, as in *Malá komorná hudba* ('Little Chamber Music', 1964, rev. 1979) and *Koncertná hudba* ('Concert Music', 1967). His orientation in the 1960s towards new technology yielded several electro-acoustic works which form the mainstay not only of his own output but of Slovak electro-acoustic music as a whole; most of these peices have won critical acclaim abroad. In the 1970s Malovec drew inspiration from folklore. His interest in other media has encouraged him to compose film and stage music, and music to poetry including that by his wife, Helena Malovcová.

WORKS
(*selective list*)

INSTRUMENTAL

Orch: Scherzo, 1956; Predohra [Ov.], 1957; Bagately, 1961; Koncertná hudba [Concert Music], 1967; Divertimento, str, 1980; Komorná symfónia [Chbr Sym.], 1980; Sym. no.1, 1988; Sym. no.2, 1989

7 Str qts: no.1, 1976; no.2, 1980; no.3, 1985; no.4, 1986; no.5 'Symetrická hudba' [Symmetrical Music], 1987; no.6, 1996; no.7, 1997

KATARÍNA LAKOTOVÁ

Malovec, Pavol (*b* Prague, 16 April 1957). Slovak composer, son of the composer Jozef Malovec. In 1961 the family moved to Bratislava, where he studied composition with Pospíšil, and the guitar at the conservatory (1976–81). He continued his composition studies under Hrušovský and Bokes at the Bratislava College of Performing Arts (1988–91). While still a student he worked as an editor with various institutions, including the music publishers OPUS.

His music emphasizes introvert, meditative and lyrical elements of musical expression. Rejecting the achievements of the postwar avant garde, he has given preference to working with the musical repertory and traditions of individual instruments. His compositional technique is based upon mode, often with allusions to Gregorian chant. Most of his later, mature works have a sacred bias: *Cum angelis*, for example, is in fact an instrumental setting of the mass, while several works draw upon biblical texts.

WORKS

VLADIMÍR GODÁR

Malsch, William (*b* ?London, 1855; *d* London, 1924). English oboist. Possessed of great technical ability and endurance, he was in his time the most influential teacher of the older school in England. For some seven years he had the unique distinction of holding, in title at least, professorships in all four major London music schools simultaneously. These appointments were at the GSM from its foundation in 1880 (with George Forman from 1889, both retiring in 1910); Trinity College from 1880 (later assisted by A.J.B. Dubrucq until about 1890); RCM from 1892; RAM from 1893. In the two latter positions he was succeeded by Leon Goossens, who had studied with him at the RCM. Malsch was greatly esteemed both personally and as a teacher, though his broad, powerful tone was not universally admired. At first, following his less distinguished father Henry Malsch, he used a German-style oboe, but about 1897 he started playing a French instrument, possibly because of the pressure of changing taste in England.

PHILIP BATE

Malscher, John. *See* MALCHAIR, JOHN.

Malta. Country in Europe. It is the biggest of five small Mediterranean islands and also their collective name, with a population of around 374,000 (1997). Malta has a long history of contact with both southern Europe and North Africa, both of which have influenced its musics. St Paul was shipwrecked there in 60 CE and he started the conversion of the Maltese to Christianity. The Knights of St John gained control of the territory from the Normans in 1530, who had taken it from Arab rulers in 1090. The Knights of St John built the modern capital, Valletta, which gradually took over from Mdina as the centre of government and as a focal point of the islands' cultural activities. Malta was annexed by the British in 1814 and gained full independence in 1964, becoming a republic in 1974.

I. Art music. II. Traditional music.

I. Art music

Malta's musical development closely mirrors that of Italy. The presence of plainchant in Mdina Cathedral since medieval times is attested by several documents; one dated 1274 speaks of 'Alexander Malte ecclesie cantor'. Besides some beautifully illuminated, locally produced psalters, the Cathedral Museum possesses two antiphonaries of unknown provenance from the 11th and 12th centuries in Aquitanian neumes.

Polyphony was introduced in the mid-16th century, when two *cappelle* were created. That of Mdina Cathedral was established in October 1573 under the Siennese Giulio Scala; subsequent important *maestri* included the Venetian Francesco Fontana (in office 1618–23), the Sicilians Antonio Campochiaro (in office 1626–7 and 1635–8) and Andrea Rinaldi (in office 1627–31), and the Maltese Giuseppe Balzano (1616–1700), whose intricate motet *Beatus vir* (1652) is the oldest extant work by an identified Maltese composer. After 1711 the cathedral employed only Maltese *maestri*, encouraging promising candidates to advance their musical proficiency in Neapolitan conservatories, a course subsequently followed for two centuries by leading Maltese musicians. Outstanding *maestri* of this later era were Benigno Zerafa (1726–1804), Francesco Azopardi (1784–1809) and Pietro Paolo Bugeja (1772–1828). Compositions by the cathedral's *maestri* form the backbone of the Mdina Cathedral Museum music archives, a rich and little known collection of manuscripts (including the compositions of Zerafa and Azopardi) and printed scores (among them unique 17th-century publications).

The other *cappella* was that formed by the Knights of St John for their conventual church in Valletta. Authorized by the order's chapter general of 1574, it employed the best foreign and local talent, its *maestri* including the long-serving Giuseppe Sammartini (in office 1724–65) and his nephew Melchior (in office 1765–98), whose relationship to the more famous Sammartini brothers has yet to be investigated. Regrettably, with the exception of Nicolò Isouard's sacred works, preserved in the Bibliothèque Nationale in Paris, the order's music archives remain untraced. The French-engineered expulsion of the order from Malta in June 1798 brought about the disbandment of the *cappella* and St John's was later nominated co-cathedral with that of Mdina, whose *maestro di cappella* consequently began to serve both establishments.

Music for churches that could not afford their own *cappella* was provided by that of an independent *maestro*, who might, if his music were popular enough, serve several churches. Some of these *cappelle* were thus able to evolve into ongoing family concerns, the outstanding

examples being the Nani (five generations) and the Bugeja (four generations) families. Though no longer in family hands, these and other *cappelle* still function, though on a diminished scale since the Second Vatican Council.

The Knights of St John were outstanding patrons of music. A typical initiative was the Calendimaggio series of cantatas performed annually on the eve of May Day throughout most of the 18th century; the finest composers (e.g. the Italians Gianpaolo di Dominici, G.A. Giai, Matteo Capranica and G.B. Lampugnani, and the Maltese Filippo Pizzuto and Michelangelo Vella) were commissioned to set Arcadian texts written for the occasion. The Knights also built, in 1732, the enchanting Manoel Theatre, the oldest European theatre still functioning in its original structure. Together with liturgical music, opera became Malta's cultural focus during the 19th century, to the almost total exclusion of other musical forms. The Royal Opera House, designed by Edward Barry (the architect of Covent Garden) and built to satisfy the need for a larger theatre, was inaugurated on 9 October 1866 with *I puritani*. Many celebrated singers appeared there, among them Emma Albani, Giovanni Zenatello, Mattia Battistini and Antonio Scotti. Italian opera was preferred, and Maltese pieces were rarely performed. With the destruction of the Royal Opera House in 1942, activity shifted back to the Manoel Theatre which, following major refurbishments, reopened as the National Theatre on 27 December 1960 with the Ballet Rambert's *Coppélia*. The Manoel Theatre Orchestra was formed in 1968 and continued to function until 1997, when it was replaced by the National Orchestra. The emphasis shifted towards orchestral concerts, with works by contemporary Maltese composers, especially Carmelo Pace (1906–93), Charles Camilleri (*b* 1931) and Joseph Vella (*b* 1942), frequently included.

Of special significance is Pace. Owing to the religio-cultural milieu and a Mediterranean-ingrained predisposition, the national school of composition, up to the 20th century, developed mainly and splendidly in vocal genres – particularly sacred music and opera – through the work of such composers as Balzano, Zerafa, Azopardi, the Bugejas, the Nanis (especially noteworthy is Antonio Nani's 1879 Requiem), Paolino Vassallo (1856–1923) and Carlo Diacono (1876–1942). Even Maltese composers who worked overseas, such as Girolamo Abos (1715–60), Nicolò Isouard (1773–1818), Alessandro Curmi (1801–57) and Francesco Schira (1809–83), were principally composers of vocal music. Pace was the first to explore comprehensively, and in various styles, a wide range of orchestral and instrumental forms, thereby considerably extending Maltese musical development.

The post-1964 tourist expansion boosted popular music; here the annual highlight is the Malta Song Festival, which selects the Maltese entry for the Eurovision Song Contest. Jazz, first played in the bars of Valletta's narrow Strait Street during World War II, has developed a typical Maltese sound, with a Mediterranean warmth. The open-air International Jazz Festival annually draws large audiences to hear jazz created by international stars (Chick Corea, Dee Dee Bridgewater, Toots Thielemans, Michel Petrucciani) and leading Maltese jazzmen (Charles Gatt, Sammy Murgo, Paul Abela, Antoine Bonnici Soler).

Music education has a long, noble and ongoing tradition, initially fostered ecclesiastically, but later mainly through private initiatives. The Augustinian Pietro Callus (*fl* 1510–50) was a gifted teacher; later Michelangelo Vella introduced teaching methods from the Naples Conservatory, where he had been trained. An important contribution to theory was Azopardi's *Il musico prattico* (*c*1783) on the art of counterpoint, which was published in French translation and highly admired by Grétry and by Cherubini, who quoted from it in his *Cours de contrepoint*. Later charismatic teachers were Giuseppe Burlon (1772–1856), Giuseppe Spiteri Fremond (1804–78), Vassallo and Pace. Band clubs provide free tuition, and the well-attended government School of Music, inaugurated in 1975, offers practical education. The music studies programme of the University of Malta's Mediterranean Institute was established in 1988, the first students graduating in 1991.

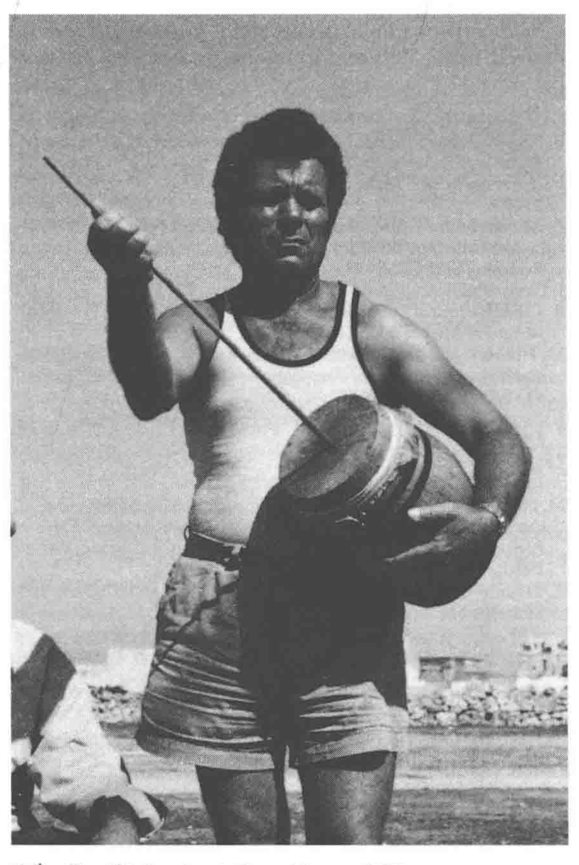
II. Traditional music

Maltese traditional music has been influenced by both southern European and North African traditions. *Għana* singing is the most popular form of traditional Maltese music. Other traditional singing includes lullabies and Christmas carols. The term *għana* is a general term for three styles of singing: *għana spirtu pront* ('improvised singing'), *għana tal-fatt* (ballads and topical songs) and *għana fil-għoli* ('singing in high register'). The latter style is also known as *għana la bormlisa* (after the city of Bormla) and *għana bil-ksur* ('singing with inflections'). Għana is mainly performed by urban working-class men. In the three styles the singers (known as *għannejja*) are accompanied by two to three guitarists, one leading while the others strum a steady rhythm of triadic chords. All three styles consist of three sections. During the first section, the prelude, the lead guitarist improvises, drawing on a basic *għana* motif which is always recognizable and establishes the tonality and the tempo for the singers. The second section consists of a series of alternations between the vocal stanzas of the singers and the instrumental interludes (known as the *prejjem*) of the lead guitarist; these interludes are variants on the motif established in the prelude. The third section is an instrumental coda, always played by the lead guitarist; it brings the performance to an end. Octosyllabic verse is the most common form in *għana* singing. The basic stanzaic form is that of a quatrain following a rhyming scheme of *ABCB* (the *għana la bormlisa* presents a deviation from this form).



1. *Żaqq (bagpipe) player, Naxxar, 1976*

The *għana spirtu pront* is the most popular style of *għana*. *Spirtu pront* sessions are held in some village wine-bars scattered around Malta, mostly on Sunday mornings. In the *għana spirtu pront*, four or six singers improvise rhymes on a particular topic and answer each other's comments with wit and alacrity. The worst mistake a singer can make is not to rhyme his quatrain for this is immediately noticed. The singer ornaments his quatrains with elaborate melismas, glissandos, tremolandos, vibratos, rasps and accents. The second section of a *spirtu pront* session lasts for an hour, irrespective of the number of singers taking part, when the last volley on the part of each singer consists of two quatrains known as the *kadenza* ('cadence'). A *spirtu pront* singer may extend his *kadenza* to three or four quatrains either to finish off his argument or to show bravura.

The *għana tal-fatt* is normally a story narrated by one singer, usually the composer of the text. The narration may be either true or fictional. Nowadays a *għana tal-fatt* perfomance may also treat subjects of a social and moral nature. The tonality and tempo established in the prelude depend on the gist of the narration or subject. In the second section the singer may pass from one stanza to another without allowing a guitar interlude; this may attract the audience's attention. A *għana tal-fatt* session lasts between five and 20 minutes. On the last verse of the final stanza the singer is expected to include the *telgħa* ('ascension'), which indicates the end of the session and is normally approached by an upward interval of a 5th followed by a descending melismatic movement. When the *telgħa* is left out, the singer will treat his last verse as the other verses. One can listen to *għana tal-fatt* on local radios, on cassettes or by attending Maltese *festa* nights occasionally organized by various social and cultural village groups.

The *għana la bormlisa* is on the verge of extinction. *La bormlisa* singers sing in the high tenor range and only a few *għana* singers can sing in the high vocal register required by this style. The *la bormlisa* is a highly melismatic style of singing. It is normally meant for two singers although it can also be performed by a solo singer. When sung by two singers it may take one of two forms: *ABABCD* or *AAAABC*. In both cases the singers sing alternate lines. When sung by one singer, the form employed may be either of the two mentioned above. One can occasionally hear *spirtu pront* singers attempting to include melismatic features normally found in the *la bormlisa* style. A *la bormlisa* session lasts between five and ten minutes and it is usually performed before a *spirtu pront* session.

Traditional instruments include bagpipes, tambourines, friction drums, flutes, lutes, fiddles, guitars, mandolins and accordions. The Maltese bagpipe (*żaqq*; fig.1) is played at Christmas, Carnival and Imnarja (the feast day of St Peter and St Paul when an agricultural festival celebrating the end of harvest is held). The *żaqq* player uses a series of motifs and variations, which he repeats in various combinations. Rhythmic accompaniment is always provided by the *rabbâba* or *żavżâva* (friction drums; fig.2) and the *tambur* (tambourine). The *żaqq* bag is made from animal skin; the blowpipe (*mserka*), made of cane or rubber, is tied into one of the forelegs; the chanter (*saqqafa*) is inserted into the neck. It has two downcut

2. *Żavżâva (friction drum) player, Naxxar, 1976*

single reeds with cane pipes, one with five and the other with two holes. The bell of the chanter is usually a decorated ox horn with a serrated edge. The *rabbâba* is made from a Sicilian wine cask about 30 cm high, or from a pitcher covered with goat or cat skin; a cane is inserted through the centre and rubbed with a moistened hand. The *tambur* usually has a frame about 30 cm in diameter and 8 cm deep, covered with cat skin. Bells and cymbals are attached to the frame.

Guitar playing is popular. Apart from accompanying *ghana* singers, guitarists perform in small ensembles accompanying a melody with triadic chords. Their playing derives from *ghana* motifs which they elaborate on throughout the session. Such ensemble playing takes place before a *spirtu pront* session. During carnival days in some Gozitan villages, in particular that of Nadur, similar ensembles include rhythmic accompaniment provided on *rabbâba*, *żavżâva* and *tambur*.

Wind band music, however, is the most popular genre in the islands. Wind bands were introduced from southern Italy in the mid-19th century to perform outdoors during the feast (*festa*) for the village patron saint. The climax of the *festa* is a procession through the village, led by the band and bearers carrying the saint's statue. In the late 1990s some 84 wind band clubs were active on Malta. It is in these band clubs that most instrumental teaching takes place. Bands usually play light Italian opera selections, hymns, marches and the latest popular songs. In contrast to band music, performance on traditional instruments has been dying out. But increasing interest in Maltese culture has led to a revival, not only of traditional music, but also of dances such as *il-parata* (sword dance), *il-maltija* (the national dance) and *il-komitava*. These are derived from 18th-century court dances and are now performed by various groups.

Maltby, Richard, jr. American lyricist and regular collaborator with DAVID (LEE) SHIRE.

Malten [Müller], **Therese** (*b* Insterburg [now Chernyakhovsk], East Prussia, 21 June 1855; *d* Neuzschieren, nr Dresden, 2 Jan 1930). German soprano. After studying with Gustav Engel in Berlin, she made her début in 1873 as Pamina in *Die Zauberflöte* at Dresden, where she was engaged for the next 30 years. Wagner heard her as Senta in a performance of *Der fliegende Holländer* at Dresden in September 1881 and invited her to Bayreuth the following summer to share the role of Kundry in *Parsifal* with Materna and Brandt. She also sang Kundry at Munich in the private performance of *Parsifal* given for King Ludwig (3 May 1884) and at the Royal Albert Hall, in the first concert performance in London (10 November 1884). She had previously made her London début at Drury Lane as Leonore in *Fidelio* (24 May 1882), a role she repeated in Munich (15 August 1884). At Dresden she sang Isolde (1884), Brünnhilde in *Die Walküre* and *Siegfried* (1885) and many other roles in French, Italian and German operas, ranging from Gluck's *Armide* to Mascagni's *Cavalleria rusticana* (1891). Returning to Bayreuth she sang Isolde (1886), Eva in *Die Meistersinger* (1888) and Kundry for the last time in 1894. She also took part in the *Ring* cycles presented by Angelo Neumann in St Petersburg and Moscow (1889). Her voice was notable for its extensive compass; its middle register was described as rich and powerful and the higher and lower notes as equally strong and pleasing.

ELIZABETH FORBES

Maltero Thuringi, Ugolinus de. *See* ANONYMOUS THEORETICAL WRITINGS, §2 (Cat. no.107).

Mal'tsev, Sergey Mikhaylovich (*b* Orsk, 14 March 1944). Russian pianist, teacher and musicologist. He studied the piano with M.Ya. Khal'fin at the Leningrad Conservatory (1961–7) and completed postgraduate studies in the history of pianism with L.A. Barenboym (1967–9). At the conservatory he took the *Kandidat* degree (1981) with a dissertation on the semantics of musical signs, and the doctorate (1995) with a dissertation on musical improvisation. He started working at the conservatory in 1969, becoming senior lecturer in 1988 and professor in 1995. He ran piano classes at the Leningrad Special School for Gifted Children (1982–90) and the Rimsky-Korsakov Music College (1985–9). During this time he also ran seminars on methodology and conferences for piano teachers throughout the Soviet Union. He has performed and recorded widely, both as a soloist and a chamber player, and has held piano masterclasses in St Petersburg, Weimar, Krems and Seoul. In 1997 he was involved with Sviatoslav Richter's 'December Evenings' series of concerts at the Pushkin Museum. Mal'tsev's writings include a five-volume methodology (1990). He has also written the educational television and video series for young pianists and teachers 'Tvorcheskoye razvitiye yunogo pianista' (The creative development of the young pianist, 1991) and 'Masterskaya muzïki' (Music workshop, 1992). His writings are characterized by their originality, solid approach, and by his controversial views.

LYUDMILA KOVNATSKAYA

Mältzel, Jiří. *See* MELCELIUS, JIŘÍ.

Malvezzi, Alberigo (*b* Florence, 24 May 1554; *d* Florence, 29 Dec 1615). Italian organist and composer. He was the brother of Cristofano Malvezzi, who mentioned him among the musicians who performed in the Florentine *intermedi* of 1589. Alberigo was organist of S Lorenzo, Florence, from about 1570 until his death, and in 1590 was also appointed organist of Florence Cathedral. He was granted Florentine citizenship on 28 April 1604. The title-page of his *Primo libro de madrigali a cinque voci* (RISM/1591[20]) describes him as 'organista della chiesa del serenissimo Gran Duca di Toscana'. The work contains a six-voice setting of *Godi flora gentil*, celebrating the birth of the grand duke's son, and the only two known pieces by his father Nicolao Malvezzi.

For bibliography *see* MALVEZZI, CRISTOFANO.

FRANK A. D'ACCONE

Malvezzi, Cristofano [Cristoforo] (*b* Lucca, bap. 28 June 1547; *d* Florence, 22 Jan 1599). Italian composer, organist and singer. Brother of Alberigo Malvezzi, he probably received his earliest musical education from his father Niccolò (Nicolao) – successively organist of Lucca Cathedral and of the Medici church of S Lorenzo, Florence – and from 1551, when his father moved to the latter post, he spent his whole life in Florence. He possibly studied later with Corteccia or Alessandro Striggio (i). From an early age he came under the patronage of Isabella de' Medici, for on 23 June 1562 she obtained for him, 'un suo servitore virtuoso', an appointment as supernumerary canon at S Lorenzo, which inaugurated his long connection with the Medici chapel. From 20 May 1565 until 1570 he was organist of Santa Trìnita, and in 1573 he succeeded to the double post of *maestro di cappella* of the cathedral and the baptistry, the most important musical position in Florence. On 21 April 1572 he was appointed a regular canon at S Lorenzo, and on 26 October 1574 he succeeded his father as organist there. He also cultivated connections with prominent Florentine families and patrons: in 1579 he was giving keyboard lessons to the young Jacopo Corsi. He was listed on Medici court rolls beginning in 1586 at a monthly salary of 5 scudi, which included an allowance for his pupil Jacopo Peri. This was raised to 9 scudi in 1588, when he was described as 'teacher to the princesses'. It was doubtless on account of his positions as *maestro* of the Florentine chapel and organist at S Lorenzo that he styled himself 'maestro di cappella del serenissimo Gran Duca di Toscana' on the title-pages of several of his publications.

Malvezzi's ricercares (1577) are dedicated to Giovanni de' Bardi (the main music patron in Florence at the time), with whom he later collaborated, and although only three of the four printed partbooks survive, the pieces are also in a late 16th-century Florentine manuscript score (*I-Fn* Magl.XIX.107). The partbooks indicate ensemble performance, but the music lies easily under the fingers, suggesting keyboard performance (as does the score). Several of the ricercares are conceived on a grand scale, affording Malvezzi ample opportunity to display his contrapuntal skill. Subjects and countersubjects are generally stated in imitation and often developed by inversion, augmentation, diminution and stretto. In the fourth ricercare the entry of the main subject, the familiar *la sol fa re mi* motto, is preceded by a countersubject derived from it. Throughout the first section in duple metre the motto appears in a variety of rhythms in combination with itself or with the countersubject, and at the end of the piece the same material is reworked into a brief, spirited triple-time passage.

Three collections of Malvezzi's madrigals are known to have been printed during his lifetime: two books for five voices, of which the second, according to Einstein, was dedicated to Cavalieri, and one book for six voices. All three contain settings of occasional topical texts such as *Al Gran Duce de Toschi* and *Vago dolce e bell'Arno* as well as the poetry of Petrarch, Sannazaro and Guarini. The most popular pieces in these collections also appeared in anthologies published both during and after his lifetime, as did some otherwise unknown works. Malvezzi used chromaticism sparingly though effectively and often composed within a clear tonal framework; he set texts clearly and made good use of contrasting textures. Although his madrigals are characterized by spontaneity

and charm they are hardly innovatory. Surprisingly for a musician so occupied with the church, only two sacred pieces by him, both motets, are known; these too appeared in anthologies after his death.

In 1583 Malvezzi provided some of the music for the *intermedi* of Giovanni Fedini's *Le due Persilie*. In 1586 he collaborated with Alessandro Striggio (i) and Giovanni de' Bardi in musical *intermedi* for Bardi's own play *L'amico fido*, performed for the wedding of Virginia de' Medici and Cesare d'Este. He also wrote music for the third *intermedio* of Giovanni Cecchi's *Il Sammaritano* (date unknown; see Hill, 1982). But all his surviving entertainment music is contained in the publication of the music for the sumptuous *intermedi* that formed the major part of the celebrations of the marriage of Grand Duke Ferdinando I and Christine of Lorraine. Other contributors to the festivities included Bardi, Caccini, Cavalieri, Marenzio and Peri, who was a pupil of Malvezzi. The music was assembled and edited by Malvezzi himself in 1591 (RISM 1591[7]). He wrote most of the music for four of the six *intermedi*, including 13 madrigals for varying numbers of voices, three sinfonias and three grandiose works for multiple choirs of which the most notable, *O fortunato giorno*, is for 30 voices divided into seven choruses.

A good deal of information about the performance of the 1589 *intermedi* is provided by Malvezzi in the 'nono' partbook of the printed edition of the music, from which it is clear that several of the polyphonic madrigals were sung by a solo voice with instrumental accompaniment. Indeed some of them also survive in manuscript in monodic form (e.g., in *I-Fn* Magl.xx.66), but they do not show any progressive tendencies and are simply reductions of a multi-voice texture in a manner common throughout the century. Malvezzi seems to have been too much of a traditionalist to adopt any of the styles of his younger contemporaries at Florence.

From the early 1590s until his death Malvezzi was beset by illness, and he seems to have been increasingly weighed down by the burden of his numerous duties. His faithful service, however, did not go unrecognized, and in September 1594 he was given the post of third organist at the cathedral, apparently a position created specially for him, which lapsed after his death. Moreover, on the specific orders of the grand duke he retained the salaries of all his official appointments until his death, even though he was less and less able to carry out his duties. Illness and overwork presumably also explain the fact that he apparently produced no new works after 1589. His nephew Pietropaolo was also an organist in Florence.

FRANK A. D'ACCONE (with TIM CARTER)

Malzat [Malzahn, Malzard, Maltzath, Maltzbach]. Austrian family of musicians of Moravian origin.

(1) Josef Malzat (*b* Pirnitz [now Brtnice], 1723; *d* Vienna, 25 Nov 1760). Composer and violinist. He is believed to have gone to Vienna in 1745, possibly in the service of Count Haugwitz; in 1747 he was *musicus primarius* at the Dominikanerkirche and in 1757 *musicus* at the Stephansdom. He was probably the Malzat listed as a violinist in the Burgtheater orchestra. Works attributed to him include a partita (*D-KA*, ed. J. Trojan, Prague, *c*1981), a sinfonia (*A-Gd*) and a quartet, a flute concerto and three symphonies listed in the Breitkopf catalogues.

(2) Johann Michael Malzat (*b* Vienna, 21 April 1749; *d* Innsbruck, 13 May 1787). Composer and choirmaster, son of (1) Josef Malzat. He attended the grammar school in Kremsmünster, where he was a chorister and possibly also a cellist (see Weiss). He was subsequently a teacher in the abbeys of Stams in the Tyrol (1778–80) and Lambach in Upper Austria (1781), a member of the church choir in Bozen (now Bolzano) (1780–81), household musician in Schwaz (1784) and finally choirmaster in the university church in Innsbruck (1786–7). His instrumental works in particular enjoyed wide distribution and were advertised by Traeg in Vienna as late as 1799. His extant works include three masses, a Requiem, 13 shorter sacred pieces, an oratorio, a Singspiel, a cantata, three lieder, five symphonies, a Sinfonia concertante with solo violin and oboe, a cello concerto, six

string quintets (one ed. W. Senn, Vienna, 1949), four quartets for oboe, flute and strings, three string trios, four sonatas for violin and cello, and a sonata for cello and bass (in *A-FK*, *HE*, *Imf*, *CH-E*, *EN*, *FF*, *SGs*, *D-Bs*, *HR* and elsewhere). Among works advertised by Traeg, but now no longer extant, are two concertos for english horn, presumably written for his brother (3) Ignace Malzat, and four sinfonias concertantes. (Other instrumental works attributed by Traeg simply to 'Malzat', and now lost, cannot be identified with any specific member of the family; they include quintets for flute or oboe and strings and sextets for oboe, two horns and strings.)

(3) **Ignace** [Adamus Ignatius Franciscus de Paula Josephus] **Malzat** (*b* Vienna, 4 March 1757; *d* Passau, 20 March 1804). Composer and oboist, son of (1) Josef Malzat. As early as 1774 he was a court musician in Salzburg and is supposed to have been a pupil of Michael Haydn. After travelling in France, Italy and Switzerland he became oboist in the parish church at Bozen (1778) and in May 1788 entered the service of the Prince-Bishop of Passau. He was known primarily for his instrumental works, a few of which are listed in the Traeg catalogue of 1799. His extant works include concertos for cello (two, *A-KR*, *SEI*), oboe (two, *A-Ssp*, *D-Dl*), two oboes (*A-KR*) and oboe and bassoon (*KR*), a sextet (*US-AAu*), a quintet (*A-Ssp*), a cassation (*H-KE*) and three wind partitas (*A-KR*, *Sca*). The cello concertos may have been composed for his brother (2) Johann Michael Malzat. His pieces have an attractive charm with many felicitous touches, and avoid contrapuntal complexity or harmonic experimentation. The works lie well for the instruments chosen but there is little virtuoso display; his orchestral accompaniments are full, though he seems to have favoured quiet openings. Four notated cadenzas, entirely metrical, survive in the two duo concertos.

WALTER SENN/T. HERMAN KEAHEY

Mamangakis, Nikos (*b* Rethymnon, Crete, 3 March 1929). Greek composer. He studied at the Hellenic Conservatory, Athens (1947–53), and was a composition pupil of Orff and Genzmer at the Munich Musikhochschule (1957–64), also attending Darmstadt summer courses during this period and studying with Riedl at the Siemens electronic studios (1961–2). In 1965 he settled in Athens as a freelance composer, although he spent the year 1970–71 in Berlin on a scholarship from the Deutscher akademischer Austauschdienst.

Mamangakis's prolific output falls into two essentially separate categories: on the one hand, a naive kind of popular music in the mould of Theodorakis, drawing occasionally on Cretan folk music and often containing an element of social or political critique; on the other hand, concert works in the avant-garde tradition of the 1960s and 70s, which use integer relationships to organize pitch, rhythm, density, dynamics and timbre into richly textured blocks, these blocks frequently alternating with monodies incorporating wide intervals and even microtones. These contrasted sides of his musical personality are brought into conflict in the multimedia opera *Odyssey*, staged in 1984. Among his most successful works are *Konstruktionen* (1960), *Monologos* (1962) and Music for Piano and Small Orchestra (1977). His scores for the acclaimed German television series *Heimat I* (1982) and *Heimat II* (1992) brought his music to an international audience.

GEORGE LEOTSAKOS (work-list with KOSTAS MOSCHOS)

Mamas and the Papas, the. American pop vocal group. Formed in New York City in 1965, they moved to Los Angeles where they quickly became one of the most

important groups in the California-based folk-rock style of the mid-1960s. Each member had worked previously in vocally oriented pop or folk acts. Led by the singer-songwriter and arranger John Phillips (*b* Parris Island, SC, 30 Aug 1935) and including Michelle Phillips (*b* Long Beach, CA, 6 April 1945), Denny Doherty (*b* Halifax, NS, 29 Nov 1941) and Cass Elliot (*b* 19 Sept 1943; *d* London, 29 July 1974), the group featured Phillips's sophisticated four-part vocal arrangements, influenced by the close harmony singing found in much late 1950s and early 60s folk and doo-wop but now often accompanied by a rock rhythm section of drums, electric bass, guitars and keyboards. A series of nine hit singles, most written by Phillips and including *California Dreamin'* (1966), *Monday, Monday* (1966), *I Saw Her Again* (1966) and the autobiographical *Creeque Alley* (1967), made the quartet one of the most successful of their era. The group's internal romantic and domestic struggles led to a break up in 1968, though they reunited briefly in 1971. Cass Elliot went on to pursue a successful solo career until her death by choking. The Mamas and the Papas were inducted to the Rock and Roll Hall of Fame in 1998.

JOHN COVACH

Mambo. A ballroom dance derived from the Cuban rumba. In the mid-1940s it appeared in Cuban ballrooms and acquired elements of 'swing' and other jazz styles. It was known in the USA particularly through the band of PÉREZ PRADO, who toured the Americas in the late 1940s; his records were popular first among Spanish speakers in the USA, and his songs (e.g. *Qué rico el mambo*) were performed all over the country by the early 1950s. The mambo spread throughout western Europe after 1955. It is danced by couples, either completely apart or in a ballroom embrace but held slightly apart, with a hip-rocking motion similar to the rumba but using forward and backward steps. Unlike most dances the steps begin on the fourth beat (of a 4/4 bar), against polyrhythms in the accompaniment accentuated with maracas and claves. The mambo has given rise to other 'Latin American' dances, notably the cha cha cha.

In salsa, the term also refers to the brass choruses featured in the *montuno* section.

□

Mamili, Mihammad (*b* Mahabad [Sawj Bulaq], Iran, 1925/6; *d* Mahabad, 23 Jan 1999). Kurdish singer. He was the last prominent member of a family of singers and began singing at the age of 13. His singing was limited to live performances at weddings and other occasions during much of the rule of the Pahlavi shahs (1925–79), who repeatedly suppressed Kurdish music and culture. The launching of a state-run local radio station in Mahabad in 1955 and the proliferation of cassette recording in the 1960s created a listening public for Mamili and other singers both in Iran and across the border in Iraqi Kurdistan.

Mamili's repertory of about 700 pieces consists predominantly of *goranî*, popular songs performed at weddings, in various entertainment settings and on the radio. Like most contemporary urban singers, he drew on rural music as well as on non-Kurdish (especially Azerbaijani) melodies, using lyrics from earlier and contemporary Kurdish poets. Although only a few of his songs are overtly patriotic, he was jailed for six months in 1968 on suspicion of involvement in a Kurdish armed uprising. In the 1990s he suffered from memory loss and the execution of one of his sons by the Islamic government. His death was followed by events throughout Europe commemorating his life and work.

AMIR HASSANPOUR, STEPHEN BLUM

Mamisashvili, Nodar (*b* Tbilisi, 15 Dec 1930). Georgian composer, musical theoretician and teacher. In 1956 he graduated from the Tbilisi Conservatory where he studied composition with Andria Balanchivadze. From 1955 to 1969 he taught theory and composition in Tbilisi music colleges, from 1962 ran a course in harmony and analysis in the music theory department at the Conservatory of Tbilisi, and from 1965 to the present time he has taught orchestration, polyphony and composition in the department of composition. An authoritative teacher (assistant professor since 1972), Mamisashvili advocates an original understanding of the content and aims of contemporary musical art. During the 1960s he began to take an active part in the work of the Georgian Composers' Union and was elected secretary of the board (1973) and then chairman (1990). In 1989 he was invited to the Tbilisi Spiritual Academy where he ran a lecture course on the History of Orthodox Church Music. He is an Honoured Representative of the Arts of Georgia (1967).

Mamisashvili's music is characterized by breadth of thought and intellectual outlook; he actively aspires to interpret processes occurring in new music in his own work. His development has taken him from the miniature to the symphony and from technical mastery to conceptualised form. In the first period (1955–73) his music was saturated by impressionism, and then was gradually schematized during the course of its subsequent evolution. The worth of the early works resides in the impressionist interpretation of Georgian folklore with the resultant creation of new forms of national musical art. The instrumental miniature – with its capacity to embrace so much – proved extremely close to the composer's lyrical nature and was a form in which he expressed his attraction towards psychological investigation and intellectualism. The *24 prelyudia* for piano (1958), the *Sami piesa* ('Three Pieces') for chamber orchestra (1958), and the *Shvidi miniatura* ('Seven Miniatures') for string quartet (1967) all testify to an economy of expression, an elegance of form, a feeling for sound perspective, refinement of harmonic language and also subtlety and colour in his thinking about timbre. In the finest pieces improvisatory sense combines with polyphonic mastery and with an ability to create structures through rhythmic variation. Typical of Mamisashvili is his capacity to re-interpret the concerto genre in a chamber version for a small number

of instrumental players; here, he splits the form into miniatures and employs various contemporary means of ensemble performance. Alongside this, in the Concertino for piano quintet (1972) constructivist tendencies can be found alongside the characteristically dissonant modal formations and aleatory elements; all of this testifies to the change of style.

In his search for new avenues of development, Mamisashvili spent a number of years creating an independent system of composition which he set forth in the book *O muzïkal'noy sisteme tryokhfazovoy kompozitsii* ('On the musical system of three-phase composition') (1978). The system is based on the horizontal and vertical joining of three phases which bear contrasting types of musical thinking belonging to different epochs. This was clearly demonstrated in his piano cycle *Lirikuli dgiuris purtslebidan* ('Pages from a Lyrical Diary') of 1979 which inaugurated a new period of creative work. The genuine newness of the cycle resides in the reflective analysis of the romantic emotions inherent in contemporary humanity; here these emotions find their expression in a collage of quotations from the works of Schumann, Schubert and Liszt which have passed through the prism of contemporary techniques. The contrast of styles governs the arrangement of the various semantic and dramatic schemes within the work and creates a new aesthetic notable for its breadth and for a polyphonic dimension in the perception of time. In later years Mamisashvili successfully used this method on a large scale with symphonies which have a spatial breadth and are conceptually complex. The kaleidoscopic quality of his early style gives way to montage and the use of large, one-piece sound blocks in the style of the 1960s Polish avant garde; these are further enriched by layers of recorded sounds and noise effects. These experiments in sound technique are guided by the analytical tendencies of the three-phase structural organisation. All this together serves to convey the composer's philosophical and poetical outlook which is concentrated on contemporary humanity and its thirst to understand the world and its place in it.

LEAH DOLIDZE

Mamiya, Michio (*b* Asahikawa, 29 June 1929). Japanese composer. He began to compose at the age of six but had to wait until the end of World War II for the beginning of his formal training. In 1947 he became a private pupil of Hiroshi Tamura (piano) and Tomojirō Ikenouchi (composition), with whom he continued to study while at the Tokyo National University of Fine Arts and Music (1948–52). He won a prize at the 1950 Mainichi Music Contest with his Cello Sonata. Around 1952 he began to take a particular interest in Japanese folk music, notating tunes and using some of them in compositions, such as the Three Movements for two pianos (1952) and the Violin Sonata (1953). He organized the group Yagi no Kai with Hikaru Hayashi and Yūzō Toyama in 1953, and two years later started his more thorough field studies of folksongs in collaboration with the singer Ruriko Uchida, completing his first vocal arrangements at that time. In 1957 he produced his first compositions using traditional instruments: Music for Four Koto and the Concerto for eight koto and chamber orchestra. A further development, beginning in the next year, was the series Composition for Chorus, in which he freely quoted fragments from vocal and instrumental folk music; the first piece of the series scored an immediate success and was awarded both the government-sponsored Art Festival Prize and the Mainichi Music Prize. Mamiya made official visits to the USSR in 1961 and 1962. In 1963 he began to involve himself with African music and jazz, whose influences

may be found in the First String Quartet (1963) and the *Deux tableaux pour orchestre '65*. He began teaching at the Tokyo National University of Fine Arts and Music in 1972 and at the Tōhō Gakuen College of Music in 1980; he has also taught at the University of Western Ontario (1977, 1981) and Takasaki Junior College (1981–4).

Mamiya received an excellent technical grounding from Ikenouchi, the representative of French academicism in Japan. His compositions are usually well constructed in detail, while accommodating a highly Expressionist content. The instrumental pieces often require an extraordinarily virtuoso technique; this is the case, for example, in many of the works for Japanese instruments and the Second Piano Concerto, which won an Otaka Prize. However, the more important aspects of his music result from two special concerns: rhythmic complexity and the dramatic effects obtainable with texts. These are particularly well demonstrated in the Composition for Chorus series, which includes his most successful and characteristic works; some of them are composed exclusively of numerous brief melodic quotations from folksongs, workers' shouts or phrases imitative of instruments. Mamiya has also worked for the cinema and with experimental theatre groups in Tokyo.

MASAKATA KANAZAWA/TATSUHIKO ITOH

Mamlok, Ursula (*b* Berlin, 1 Feb 1928). American composer and teacher of German birth. She studied the piano and composition as a child in Berlin; when her family moved to Ecuador for a year she continued her studies there. After emigrating to the USA in 1941, she finished her schooling in New York, where she continued to live. She became an American citizen in 1945. At the Mannes College (1942–6) she was a pupil of Szell and at the Manhattan School of Music (BM 1957, MM 1958) she studied with Giannini; she also studied privately with Wolpe, Sessions, Steuermann and Shapey. She has taught at New York University (1967–76), Kingsborough Community College (1972–5) and the Manhattan School (from 1974). Her awards include two NEA grants (1974, 1981), a Fromm Foundation grant (1994), and commissions from organizations including the Koussevitzky Foundation and the San Francisco SO. *When Summer Sang* was chosen to represent the USA at the 1984 International Rostrum of Composers.

Mamlok has always shown an affinity for chamber music and piano works, and has written many teaching pieces in these media. As a young composer she was greatly influenced by Hindemith, and later by Schoenberg, Webern and Berg. The difficult and uncompromising String Quartet (1962) in particular invites comparison with the works of Carter. Elegantly crafted, her music has considerable nuance and delicacy as well as dramatic intensity. In her own words, she has consolidated 'old and new techniques which best serve to express the work at hand'. Examining the interplay of sonorities and silence, she writes eloquent music, more often gentle and reflective than harsh or aggressive. A 1987 retrospective concert at Merkin Hall, New York, drew attention to her works written between 1956 and 1986. Among her most frequently performed scores are *Panta rhei*, the Violin Sonata (1989), Five Intermezzi, *Girasol* and *Der Andreas Garten*, the last with texts by her husband, Gerard Mamlok. In addition, her thoughtful, deftly constructed, challenging pieces for students are important additions to the genre.

BARBARA A. PETERSEN

Manalt, Francisco (*b* Barcelona, *c*1720; *d* Madrid, 16 Jan 1759). Spanish violinist and composer. A nephew of Gabriel Terry, violinist in the royal chapel of Madrid, he was nominated to the same position on 19 June 1737, replacing Mateo Bayer. He also played in the orchestra of the Teatro del Buen Retiro in Madrid and was in the service of the Osuna family: he was the protégé of Pedro Téllez Girón, the Duke of Osuna, and he dedicated to the duke his *Obra harmónica en seis sonatas de cámara de violín y bajo solo* (1st part) of 1757 (ed. J.A. de Donostia, Barcelona, 1955–66). It was another Manalt who was *maestro de capilla* of S María del Mar, Barcelona, in 1685.

GUY BOURLIGUEUX

Manara [Manari], **Francesco** (*fl* 1548–91). Italian composer. Fétis's suggestion that he was a singer at S Antonio in Padua was not confirmed by Tebaldini. His earliest known works appeared in the *Madrigali de la fama* (RISM 1548[7]), and the dedication of his *Primo libro di madrigali* (1555), for four voices, implies that he was perhaps then in the service of Duke Alfonso II d'Este. Later in his career he contributed to two important Ferrarese printed madrigal collections, *Il lauro secco* (1582[5]), compiled in honour of the singer Laura Peverara, and *Giardino di musici ferraresi* (1591[9]), dedicated to Duke Alfonso; pieces by him also appear in a manuscript anthology of about 1580 (*I-MOe* 1358) undoubtedly compiled for the Ferrarese *concerto di donne*. According to Guarini, he was Isnardi's teacher, and Superbi claims that he was a ducal musician. Although the overwhelming evidence suggests that he was employed during his entire documented career at Ferrara, his name has not been found on the court salary rolls which are numerous for this period; it is conceivable that he was principally employed at Ferrara Cathedral. In spite of this probable long association with Ferrara, one of the centres of Italian avant-garde composition in the second half of the 16th century, his music displays little stylistic development between 1548 and 1591. His madrigals mostly rely heavily on the fusion of short imitative passages and homophony, a typical feature of the mid-century madrigal, and generally avoid chromatic experiments and other fashionable devices. But in the madrigals in manuscript and some of those in the *Madrigali* of 1580 for four higher and two lower voices, he confidently and skilfully adopted the virtuoso passage-work and sense of polarization between upper and lower voices that is characteristic of music associated with the Ferrarese court.

IAIN FENLON

Mana Zucca [Zuckermann, Augusta; Zuckermann, Gussie] (*b* New York, 25 Dec 1885; *d* Miami, 8 March 1981). American composer and pianist. She changed her name to Mana Zucca in her teens and became a protégée of the pianist and teacher Alexander Lambert; according to her unpublished memoirs she performed with major orchestras in New York before the age of ten (although this and other claims in her memoirs have not been verified). In 1902 she played an arrangement of Liszt's 14th Hungarian Rhapsody with Frank Damrosch as part of his concert series for young people at Carnegie Hall. In about 1907 she went to Europe, where she met several prominent musicians and gave successful concert tours with the Spanish violinist Juan Manon. Her lively descriptions of Teresa Carreño, Busoni, Godowsky and the composition teacher Max Vogrich were published in American music magazines. She also performed as a singer, notably in Lehár's *Der Graf von Luxemburg* in London (1919). After her marriage in 1921, and especially after 1941, Mana Zucca's musical activities were concentrated in her home town of Miami.

On her return to the USA in 1915, she began to publish her compositions. Her privately issued catalogue of published works lists approximately 390 titles (all undated), though she claimed to have published around 1100 works and to have written 1000 more. Included in the catalogue are the operas *Hypatia* and *Queue of Ki-Lu* (both *c*1920), the Piano Concerto op.49 (1919) and Violin Concerto op.224 (1955), 172 songs, three choral works, more than 20 chamber works and numerous educational pieces. She was a gifted melodist. Many of her songs were performed by leading singers in the 1920s and 30s: Gadski favoured the *Kinder-Lieder*; Amelita Galli-Curci often sang *Le petit papillon*; and the most famous, *I Love Life* (1923), was performed by Tibbett, John Charles Thomas and Nelson Eddy. *Honey Lamb*, *There's Joy in my Heart*, *Time and Time Again* and *The Big Brown Bear* were also well known. Many of her songs with Yiddish texts, among them *Rachem* (1919) and *Nichevo* (1921), were dramatic set-pieces. Mana Zucca's

more serious ambitions as a composer met limited yet noteworthy recognition: the Cincinnati SO performed *Novelette* and *Fugato humoresque* in 1917; the New York PO also played the latter piece in 1917; Mana Zucca herself gave the first performance of her Piano Concerto on 20 August 1919 with the Los Angeles SO; and in 1955 the American SO gave the première of the Violin Concerto. Her manuscripts and papers are at the University of Miami; her principal publishers are Boston Music, Congress Music and G. Schirmer.

Mancando (It., from *mancare*: 'to lose', 'to lack'). A performance instruction meaning almost the same as DIMINUENDO. *See also* TEMPO AND EXPRESSION MARKS.

Manche (Fr.). *See* NECK.

Manchester. City in England. A commercial and industrial centre, its musical importance lies chiefly in the concerts of the Hallé Orchestra, which was founded in 1858 by the émigré German pianist and conductor Charles Hallé. Since his death in 1895 the most eminent of the orchestra's permanent conductors have been Hans Richter, Hamilton Harty and John Barbirolli. Hallé also founded the Royal Manchester College of Music, of which he was the first principal.

1. Cathedral. 2. Concert-giving organizations. 3. Opera. 4. Educational institutions and libraries.

1. CATHEDRAL. It would be misleading to suggest that Manchester's musical tradition dates only from the 19th century. Provision for 'singing-men' was made in the charter granted to the collegiate church (now the cathedral) in 1421 and in its renewal by Elizabeth I in 1578 and Charles I in 1638. Manchester Cathedral in modern times has played an encouraging role in helping to promote musical activities in the city. While Allan Wicks was organist (1954–61) the Cantata Choir was formed and took part in performances of several ambitious works. This policy was continued by his successors, Derrick Cantrell (1961–77), Robert Vincent (1977–9), Stuart Beer (1979–96) and Christopher Stokes (1996–); many famous instrumentalists have given concerts at arts festivals organized by the cathedral. The cathedral's organ was destroyed when the building was bombed in 1940. A new instrument, designed by Norman Cocker, the cathedral organist at that time, was built by Harrison & Harrison of Durham. It was inaugurated in the spring of 1957 by Allan Wicks. Another magnificent organ in Manchester is the 5000-pipe Cavaillé-Coll installed in the town hall in 1877. Restoration work on this instrument was completed in 1970 by Jardine & Co. and involved complete renewal of the internal mechanism, restoration and cleaning of the pipes and the replacement of the console's pneumatic action by an electro-pneumatic system.

2. CONCERT-GIVING ORGANIZATIONS. The first report of public concerts in Manchester was in 1744 (they served, it is thought, as a cloak for meetings of Jacobites, and Prince Charles Edward Stuart almost certainly attended one of them). The subscribers came mostly from the landed gentry, whose homes were close to what was then a small country town. The 'orchestra' comprised about three or four players and a harpsichordist. Works by Handel, Geminiani, Vivaldi, Tessarini and Arne were performed. Concertos for the German flute were favourite items. Evidently the flute was the most popular domestic instrument in 18th-century Manchester: 24 flautists began regular gatherings in 1770 at a tavern in Market Street. These activities came to be known as the 'Gentlemen's Concerts' and gradually developed until in 1777 a concert hall was built to hold about 1000 people. A season of 12 concerts was given each winter, six miscellaneous and six choral. The subscription was four guineas; subscribers could invite guests; full evening dress was obligatory for the 'public concerts', but the 'private concerts', despite their name, were less formal. At the turn of the century the symphonies of Haydn and Mozart were regularly performed. A 'Grand sinfonia' by Beethoven was played in 1806. At this period Manchester was expanding rapidly as the textile trade grew under the impetus of the Industrial Revolution, and among the increased population were many German families who had settled there because of their business connections. Their support for cultural activities was immediately forthcoming, but the oft-repeated statement that Manchester's musical life was founded by the German immigrants needs qualification.

The Gentlemen's Concerts played their part in four major musical festivals held in Manchester in 1777 (initiated by Sir Thomas Egerton), 1828, 1836 and 1844. At one of the concerts of the 1836 festival, on 14 September, the celebrated mezzo-soprano Maria Malibran sang for the last time in public. She died aged 28 at the Mosley Arms Hotel nine days later, and her body was temporarily interred in the south aisle of the collegiate church before removal to Brussels. It was a member of the committee of the Gentlemen's Concerts, a calico printer named Hermann Leo, who in 1848 was to bring about the most significant single event for Manchester's musical future. His brother August was a banker in Paris, and while visiting him earlier in the 1840s he had heard the young Westphalian pianist Carl Halle, who since 1836 had been well known in Parisian musical circles both as a solo player and as the organizer of chamber concerts. Among Halle's friends were Berlioz, Liszt, Heller, Chopin, Mendelssohn and Wagner. After the Revolution of 1848 he took his wife and family to London; and it was there in June of that year that Leo called on him to propose that he settle in Manchester and 'take it in hand'. Hallé – who had added the accent to his name, so it is said, to ensure closer approximation to its correct pronunciation – agreed, provided that a certain number of pupils was guaranteed. He paid his first visit to Manchester in the summer of 1848, attending the Gentlemen's Concert at which Chopin played. On 13 September he himself played Beethoven's Fifth Piano Concerto. In his memoirs he described that occasion:

> The orchestra, oh, the orchestra! I was fresh from the Concerts du Conservatoire, from Hector Berlioz's orchestra, and I seriously thought of packing up and leaving Manchester .... But when I hinted at this my friends gave me to understand that I was expected to change all this.

Hallé's first winter in Manchester was spent mainly in establishing a series of chamber concerts. It was not until November 1849 that he was appointed conductor of the

Gentlemen's Concerts with wide powers to call more rehearsals, make changes in personnel and place the concerts on a broader basis. His efforts were rewarded by a renewal of interest in the concerts. The orchestra numbered about 40. How long Hallé might have remained in Manchester in this capacity is a matter for speculation. But in 1857 Manchester organized a vast exhibition of art treasures lasting from May to October. Hallé was engaged to provide daily concerts with an enlarged orchestra in the exhibition hall, though the inaugural concert on the evening of 5 May was given in Edward Walters's new Free Trade Hall, which had been opened seven months earlier. When the exhibition closed, Hallé was distressed to think that the enlarged orchestra would be disbanded and

> to prevent it I determined to give weekly concerts during the autumn and winter at my own risk and peril, and to engage the whole band ... I felt that the whole musical education of the public had to be undertaken.

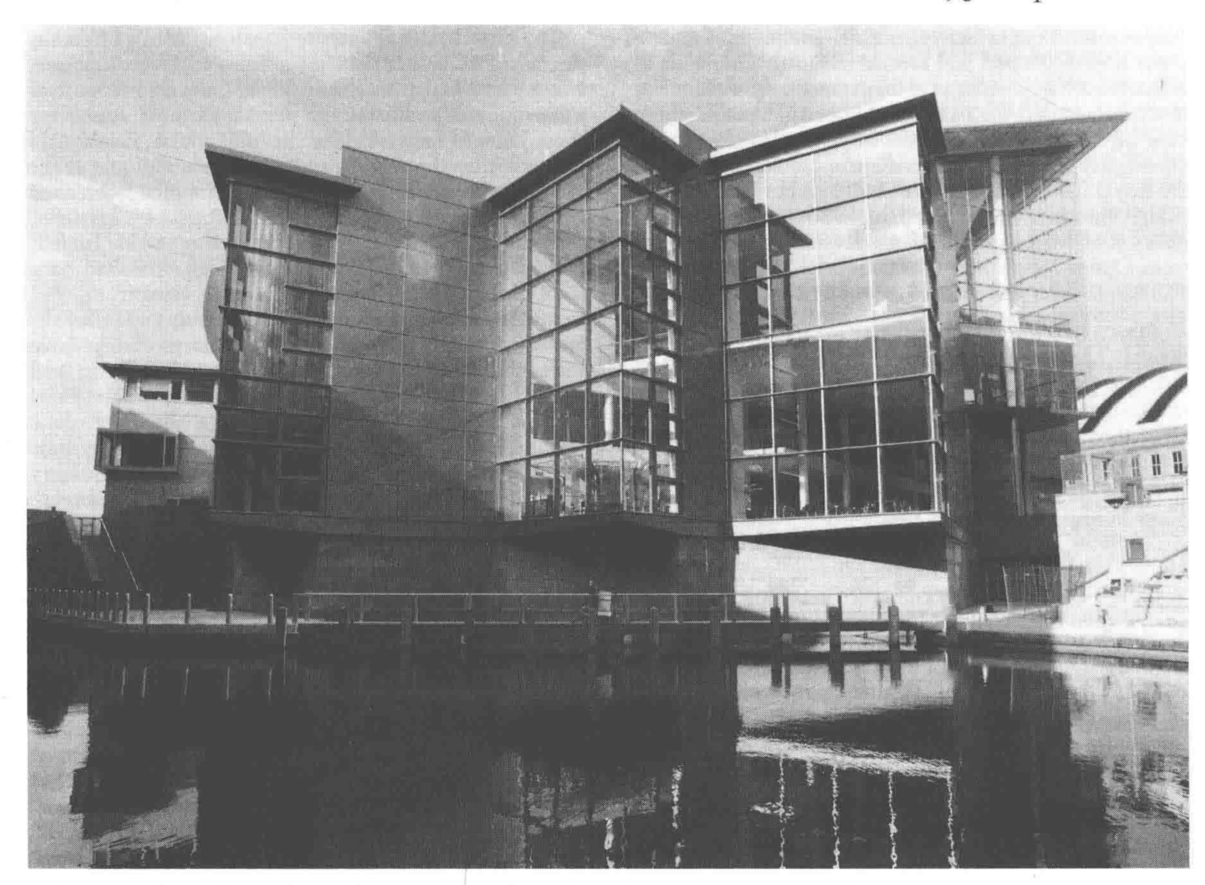
So began the Hallé Concerts, on the wet Saturday night of 30 January 1858. His profit on his first season of 30 concerts was 2s. 6d. Within eight years it was over £2000. He also continued to direct the Gentlemen's Concerts, but with the success and growing importance of the Hallé Concerts these declined in interest over the years and were wound up in 1920. Hallé directed his Manchester concerts for 37 years. He conducted almost every one and also played the solo part in a piano concerto and/or short solo pieces at almost every concert. Each season comprised about 30 concerts in the Free Trade Hall. The orchestra also played regularly in Liverpool, Bradford and Edinburgh; it visited other northern towns and, in the 1880s and 1890s, London. Three outstanding features marked Hallé's work: his insistence on the provision of a large number of cheap seats, his gradual but steady education of the public, and his willingness to perform contemporary music. Nearly every famous executant of the 19th century appeared at his concerts. Within his first five seasons he had conducted concert performances of *Die Zauberflöte*, Gluck's *Iphigénie en Tauride* and *Orfeo*, *Fidelio* and *Der Freischütz*. On 12 February 1874 Hallé and Hans von Bülow gave the first performance in England of the two-piano version of Brahms's St Antony Variations. Verdi's Requiem was performed in Manchester within two years of its first performance. Berlioz's *Symphonie fantastique* had its first British performance at Hallé's concert on 9 January 1879, his *La damnation de Faust* on 5 February 1880 and *L'enfance du Christ* on 30 December 1880. When Hallé was 63 he played the solo part in Brahms's Second Piano Concerto (23 November 1882) and in 1889 played Grieg's Concerto with the composer conducting. The works of Brahms and Dvořák were rapidly absorbed into the orchestra's repertory and Hallé conducted the first British performance of Tchaikovsky's Fifth Symphony (2 February 1893).

To ensure that the concerts continued after Hallé's death three Manchester businessmen – Gustav Behrens, Henry Simon and James Forsyth – guaranteed them for the ensuing three seasons. An invitation to become conductor of the orchestra was extended to Hans Richter, then principal conductor of the Vienna Opera and the Vienna PO. He accepted, but because of his fear of losing his Vienna pension the matter hung fire for a few years. In the meantime Frederic Cowen was appointed conductor on the clear understanding that he would eventually make way for Richter. This situation led to considerable acrimony when eventually Richter let it be known that he could take up his post in October 1899. There was much public sympathy for Cowen (whose musical contribution had included a concert performance of Berlioz's *Les Troyens à Carthage* on 2 December 1897), but a meeting of the newly formed Hallé Concerts Society in October 1898 endorsed Richter's appointment.

Richter was conductor from 1899 to 1911. Although in retrospect the Edwardian era in Manchester music appears as a golden age, the reality was less luminous and was marked by controversy. On only four of Richter's 12 seasons was there a financial profit. Complaints soon began to be made that he was not enterprising enough in his choice of programmes. This agitation stemmed from a feeling that, as was to be expected, there was too much stress on Wagner, Brahms and Beethoven and very little on composers such as Debussy, Delius and Franck. Nevertheless, Richter introduced the most important works of Richard Strauss and Elgar to Hallé audiences. He particularly championed Elgar, who rewarded him with the dedication of his First Symphony and its first performance on 3 December 1908 in the Free Trade Hall. Richter conducted the first performance in Britain of a Sibelius symphony (no.2; 2 March 1905) and of Bartók's symphonic poem *Kossuth* (18 February 1904). He founded the orchestra's pension fund and constantly encouraged young soloists.

Not only was a minority of the public dissatisfied with Richter's regime; the Hallé Committee was disturbed by his association (from 1904) with the London SO and Covent Garden Opera. In addition there was a steadily growing section of opinion that considered that the orchestra should be conducted by one of the leading British conductors – Henry Wood, Beecham or Landon Ronald. But when Richter resigned in 1911 because of failing health the committee's first thought was to try to persuade Richard Strauss to succeed him. Eventually the post went to Michael Balling, a German and another Wagnerian, who had conducted performances of the *Ring* in English for the Denhof Opera Company. He was 46 when he began his duties in the 1912–13 season. He showed every sign that he would attempt to accomplish some revolutions in Manchester's cultural life: he was the first to advocate municipal aid for the concerts, he suggested that the orchestra should be on a weekly salary instead of a fee per concert (this was put into effect), and he advocated the building of an opera house. In the two seasons for which he was responsible he introduced several new works into the programmes and conducted the first Manchester performance of a Mahler symphony (no.1).

The outbreak of war ended Balling's tenure. Several guest conductors were engaged during the wartime seasons, of whom the most active and popular was Beecham. He was unable to continue his association after the war and the years 1918–20 were black ones for the Hallé, which was now feeling the effect of rival popular concerts promoted by the impresario Brand Lane and conducted by Wood. Matters were resolved by the appointment of Hamilton Harty as permanent conductor in 1920. This brilliant musician and attractive personality revivified the concerts and trained the orchestra to become a responsive and versatile instrument. He continued the de-Teutonization of the programmes that Beecham had



begun. Music by Bax, Sibelius, Holst, Vaughan Williams, Debussy, Ravel and Stravinsky entered the repertory. But Harty will be best remembered for his marvellous Berlioz performances, notably a historic one of the Requiem on 12 November 1925, also for the first public performance of Constant Lambert's *Rio Grande* on 12 December 1929 and for the first performance in Britain of Mahler's Ninth Symphony on 27 February 1930 and of Shostakovich's First Symphony on 21 January 1932. Under Harty's guidance the Hallé was engaged for municipal concerts, and it made its first gramophone records with him. In 1933 he resigned after a quarrel over his guest engagements elsewhere and was not immediately replaced.

For the next few years the committee engaged only guest conductors, chief among them Beecham and Malcolm Sargent. The number of concerts given outside Manchester dwindled and finances suffered accordingly. In 1934 an agreement was reached with the BBC whereby a number of the best Hallé players were also employed in the BBC Northern Orchestra, thus guaranteeing their income. In 1939 Sargent was appointed conductor-in-chief, but the outbreak of war and his association with other orchestras meant that he never took up the post in much more than a nominal capacity. The enormous extra demand for concerts stimulated by the war exposed the limitations of the Hallé-BBC agreement. Engagements could not be accepted without prior consultation with the BBC for the release of 35 players. This became even more irksome when in 1942 the Liverpool Philharmonic Society, which for nearly a century had used Hallé players in its orchestra, formed an autonomous orchestra with Sargent as conductor. Its hall, moreover, was intact, whereas the Free Trade Hall was destroyed in an air raid, thus condemning the Hallé to a peripatetic existence in suburban cinemas. If the Hallé was to survive it had to make a bold gesture. Under a new chairman, Philip Godlee, it was decided to sever the connection with the BBC, offer the players a yearly contract, give more than 200 concerts a year throughout the country and engage a major conductor. A cable was sent to New York inviting John Barbirolli to take over this position. He accepted and arrived in Manchester in June 1943 to discover that, of the 35 players shared with the BBC, only four had elected to throw in their lot with the Hallé. Within a month he engaged over 30 new players – at a time when talent was extremely scarce because of the war – and trained the orchestra to a standard it had not reached since Harty's day.

Thus began Barbirolli's 27-year association with the orchestra. Under his tireless and devoted guidance the Hallé won increasing, but at first grudgingly given, financial support from Manchester Corporation; it toured regularly in Britain and made several overseas tours. The scope of the concerts was vastly extended, and although Barbirolli's tastes were regarded by some as conservative he conducted an extremely wide range of music, excelling in the symphonies of Mahler, Elgar, Vaughan Williams, Sibelius, Nielsen and Bruckner and in works by Ravel, Debussy and Strauss. Barbirolli's identification with the orchestra was wholehearted, and he became the life and soul of the Hallé, building for it a reputation for versatility and ardour. In 1951 the Free Trade Hall was opened after reconstruction with a capacity of 2500, and in 1958 the Hallé reached its centenary, an occasion marked by the conferment on Barbirolli of the honorary freedom of Manchester. At the same time he slightly reduced his commitments with the orchestra, becoming conductor-in-chief instead of permanent conductor. From 1952 to 1963 the orchestra's associate conductor was George Weldon; on his death his duties were shared for three years by Lawrence Leonard and Maurice Handford, the latter becoming associate conductor from 1966 to 1971. After completing 25 years as Hallé conductor in 1968, Barbirolli became conductor laureate for life. He died on 29 July 1970. His successor as principal conductor, James Loughran, took up his post in September 1971. Under his guidance the concerts continued to prosper and the orchestra maintained high playing standards. While preserving the Barbirollian tradition of Mahler, Elgar and Brahms performances, Loughran introduced new works by Ligeti, Thea Musgrave, Gordon Crosse and John McCabe, and provided more opportunities to hear music by Ives, Schoenberg, Goehr, Shostakovich and others. Loughran left in 1983 and was succeeded by the Polish-born American conductor Stanisław Skrowaczewski, in whose appointment the vote of the orchestral players was taken into account for the first time. He continued to promote contemporary works and was responsible for appearances as guest conductor of the Hallé of his friend Lutosławski. He was also an exceptional interpreter of Bruckner. He was replaced in 1991 by another American, Kent Nagano, whose title was music director and principal conductor. From 1993 to 1995 Thomas Adès, who wrote *These Premises Are Alarmed* for the opening of the Bridgewater Hall, was composer-in-association. Nagano brought the music of Stockhausen into Hallé programmes in addition to works by his compatriot John Adams. Nagano's appointment coincided with a decline in Hallé audiences which was partly attributable to disenchantment with the Free Trade Hall where facilities for performers and public were deemed to be poor compared with those offered elsewhere. Spurred by an unsuccessful bid to stage the Olympic Games, Manchester embarked on the construction of a £42 millon concert hall, the Bridgewater, to be home of the Hallé, BBC PO and Manchester Camerata (see illustration). The hall, seating 2395, was opened on 11 September 1996 with a Hallé programme conducted by Nagano. The Chicago SO conducted by Barenboim was the first overseas visitor. The hall contains a four-manual mechanical pipe organ with 75 stops and two consoles, one of them movable. This was built by the Danish firm of Marcussen.

The Hallé toured Europe and North and South America under Barbirolli. With Loughran it visited Australia and Hong Kong and with Nagano it went to Los Angeles, Japan and Salzburg. The BBC Philharmonic has also toured Europe and America. Financial support for the Hallé Concerts today comes not only from members of the society but also, more substantially, from the Arts Council of England, Manchester City Council and the Cheshire and Lancashire County Councils.

Manchester's other professional symphony orchestra is the BBC Philharmonic. This was formed in 1934 from Hallé players as an augmentation of the earlier Northern Studio Orchestra. It was originally known as the BBC Northern Orchestra, and then the BBC Northern SO. Its conductors have included Stanford Robinson, Charles Groves, John Hopkins, George Hurst, Bryden Thomson, Raymond Leppard, Edward Downes and Yan Pascal Tortelier. Since the 1950s it has given an increasing

Bridgewater Hall, Manchester, designed by Renton Howard Wood Levin with Arup Acoustics, opened 1996

number of public concerts in addition to its regular broadcasts and has made a special feature of awarding apprenticeships to promising young conductors. In 1973–4 it launched an annual series of public concerts in the Free Trade Hall which quickly attained a very high artistic standard, but its base is Studio 7 in New Broadcasting House, Manchester. Its main public concerts are now given in the Bridgewater Hall.

The principal chamber music society in Manchester is the Manchester Chamber Concerts Society, founded in 1936. It promotes an annual winter series of six concerts by international string quartets and similar combinations. Also well established is the Manchester Mid-day Concerts Society, formerly the Tuesday Mid-day Concerts, founded in 1915, at which young singers and instrumentalists often make their professional débuts. The director of these concerts from 1923 to 1953 was the pianist and composer Edward Isaacs. In 1976 they moved their venue to the Royal Exchange Theatre, and in 1996 moved into the Bridgewater Hall. In 1972 BBC Radio Manchester formed a chamber orchestra, the Manchester Camerata, which rapidly attracted a regular following to its winter series in the RNCM concert hall. This later became an independent body and extended its operations outside Manchester, as well as giving concerts in the Free Trade Hall and the Bridgewater Hall. Its first conductor was Frank Cliff. After him came Szymon Goldberg, Manoug Parikian, Nicholas Braithwaite, Nicholas Kraemer and Sachio Fujioka. Since 1979 the orchestra has frequently played for opera performances at the Buxton Festival. Also in 1992 the Forum Music Society was formed to promote concerts and recitals at the Forum Centre, Wythenshawe, on the outskirts of the city. International artists feature in its programmes, which are now given in Stockport.

3. Opera. Opera in Manchester has never had a permanent home, despite the existence of a theatre called the Opera House. Various attempts have been made to establish permanent companies, but all have failed. Charles Hallé took part in one of these ill-fated attempts in 1854–5. Thereafter touring companies included Manchester on their regular schedule, and it is worth recording that Puccini's *La bohème* had its English première at the Comedy Theatre in 1897. The city's brief operatic heyday was in 1916 and 1917, when Beecham's company gave two memorable seasons, the success of which prompted him to offer to build Manchester an opera house on certain conditions, but the matter was not pursued because Beecham's personal financial situation enforced his temporary retirement from the musical scene. Since then, except during World War II, all the leading British opera companies have visited the city. In the 1960s an ambitious scheme was presented to the city council which included a large opera house as part of an arts centre. But this was abandoned in 1975 and Greater Manchester Council opened negotiations during 1976 to purchase the Opera House theatre and to enlarge it so that major London operatic productions could be accommodated. Nothing came of this proposal, however, and in 1978 a Manchester

businessman bought the other chief commercial theatre in the city, the Palace, and formed a trust to administer it. It was closed in the same year for extensive refurbishment. It was hoped that the Palace would become the northern base of the Royal Opera and Royal Ballet. The Royal Opera gave a month's season there in 1981 and 1983 and the Royal Ballet in 1982. The ENO also performed at the Palace. But the London companies adopted a no-touring policy and Manchester had to rely for opera on visits from Opera North and Glyndebourne Touring Opera. The Palace reverted to its old role as a home for musicals.

4. EDUCATIONAL INSTITUTIONS AND LIBRARIES. The (Royal) Manchester College of Music was opened in October 1893. Sir Charles Hallé was the first principal and professor of piano. Successful students were entitled after three full years to a performer's diploma that designated them Associates of the college. The main study courses were piano, singing, string and wind instruments, organ and composition. When Willy Hess, the first professor of the violin, resigned in 1895, Hallé engaged Adolph Brodsky to take his place. No sooner had Brodsky arrived in Manchester than Hallé died. Brodsky became principal in his stead and held the post until 1929. Despite the inadequacy of the college buildings the college maintained high standards; it was granted a royal charter in 1923. A succession of its gifted pupils became well known, among them the violinist Arthur Catterall, the bassoonist Archie Camden, the composers Alan Rawsthorne, John McCabe, Harrison Birtwistle, Alexander Goehr and Peter Maxwell Davies, the pianist John Ogdon and the singers Elizabeth Harwood, Richard Lewis, Anne Howells and Ryland Davies. Brodsky and his successor R.J. Forbes (principal from 1929 to 1953) were able to attract distinguished teachers, among them Egon Petri and Wilhelm Backhaus. From 1953 to 1970 the principal was Frederic R. Cox, who laid much emphasis on operatic work and gave the RMCM's operatic productions a distinction that spread their fame far beyond Manchester.

The Northern School of Music became a public institution in 1942, having developed from the Matthay School of Music founded in 1920 by Hilda Collens. It accepted many more part-time students than the RMCM, and its remarkable success can be attributed largely to the spirit of loyalty and enterprise engendered by Ida Carroll, who succeeded Hilda Collens as principal in 1957.

After several years of delicate negotiations which involved the RMCM in surrender of its royal charter, the decision was taken in 1962 to amalgamate the RMCM and the Northern School into a new Northern College of Music financed by Lancashire and Cheshire County Councils and Manchester and Salford City Councils. Formal approval of the scheme was given in 1966, and the building of the new college, which includes an opera theatre, concert hall, organ and 90 tutorial rooms, was begun in 1969. John Manduell was appointed principal, and the college opened in September 1972. The following year permission was granted for the prefix 'Royal' to be added to the college's name. The operatic traditions of the new college's predecessors were maintained, and because of the excellence of the college's facilities it rapidly became an integral part of Manchester's musical life, with several organizations using it as a venue. Manduell was succeeded as principal in 1996 by Edward Gregson. In the same year the college added new undergraduate degree courses to its range of diplomas.

The Manchester University Faculty of Music offers the degrees of Bachelor of Music (ordinary and with honours), Master of Music, Master of Philosophy and Doctor of Philosophy. Candidates for the MusB must attend for three years or may enrol for the joint course, resulting in a MusB after three years and a graduate diploma at the RNCM after four. A MusM in performance, accredited by the university, can be taken at the RNCM.

The Chair of Music was instituted in 1954. Its first occupant was Humphrey Procter-Gregg, who had been head of the faculty since 1936. His successor from 1962 to 1968 was Hans F. Redlich, who greatly expanded the faculty's concert-giving activities. Later professors have included Philip Cranmer, Basil Deane, Ian Kemp and John Casken. The university library houses a substantial music collection, and the faculty has a library of music and recordings and an electronic studio. A one-time lecturer at the RMCM gave his name to the Henry Watson Music Library, one of the finest music reference libraries in Britain, including a number of valuable holdings; it is now administered by Manchester Corporation (*see* LIBRARIES, §II, 1(xi) and COLLECTIONS, PRIVATE). A valuable collection of keyboard and other instruments is held at the RNCM.

Mention should also be made of Chetham's Hospital School, one of Manchester's oldest establishments, founded in 1653, which became an independent grammar school in 1952. In 1969 the school decided to admit girls and to select pupils, on a fee-paying basis, solely on grounds of musical accomplishment and potential. It thus became Britain's first large-scale junior school of music, accepting up to 375 students from the ages of 7 to 17.

MICHAEL KENNEDY

Manchester School. Term used to refer to a group of English composers and performers who studied at the Royal Manchester College of Music (now the RNCM) and Manchester University in the 1950s. The 'School' is

principally identified with the composers Harrison Birtwistle, Peter Maxwell Davies and Alexander Goehr, as well as the pianist John Ogdon and the conductor and trumpeter Elgar Howarth. Its members have played a significant role in reshaping the landscape of British music in the later 20th century. The three composers were all in Richard Hall's composition class. Goehr was their intellectual leader and, in many senses, their teacher too. He has written of his 'didactic streak trying to move the others towards some sort of an artistic movement. I was trying to state what was and what was not real modern music'. They shared a dissatisfaction with a provincial musical culture and a burning curiosity about the new, as well as a devotion to the ideas and techniques of Viennese modernism. Unlike London's music colleges, Manchester had, according to Goehr, 'a certain central European feeling' about it.

In 1953, together with Ogdon, Howarth and the cellist John Dow, they formed the New Music Manchester group to play their own compositions alongside works of the continental avant garde. Though all three had left Manchester by 1957, they came back together in 1964 to found the first of two Wardour Castle summer schools. In 1967, Birtwistle, Maxwell Davies, the clarinettist Alan Hacker, and the pianist Stephen Pruslin established the Pierrot Players (later reconstituted as The Fires of London) to provide an opportunity for experiment with small-scale music theatre. It is perhaps through a common exploration of such theatre during the 1960s that the 'Manchester School' made its most powerful collective contribution to the development of postwar British music. Since the mid-1970s, the three composers have moved in separate directions. Birtwistle continues to plough his own characteristic modernist furrow, Maxwell Davies has effected a rich accommodation with tonal forms and genres, while Goehr has engaged in a uniquely subtle way with a postmodern aesthetic. Whether it is still possible to talk meaningfully of a 'Manchester School', with shared techniques and outlook, is doubtful. But the term has a currency and, whatever the composers have now become, their thinking owes much to their early shared experiences of modernism in Manchester.

JONATHAN CROSS

Manchicourt [Mancicourt, Manchicurti], **Pierre de** (*b* Béthune, *c*1510; *d* Madrid, 5 Oct 1564). Franco-Flemish composer. Vannes stated that he was a choirboy at Arras Cathedral in 1525; most other facts about his early life are drawn from the title-pages of his five important publications: he was director of the choir at Tours Cathedral in 1539, master of the choirboys at Tournai Cathedral in 1545 and *maître de chapelle* there later that year. By 1556 he was a canon of Arras Cathedral. Dedications in three of his publications indicate his connections with Sermisy, Susato and Archbishop Granvelle, a great patron of the arts. Manchicourt succeeded Nicolas Payen as master of Philip II's Flemish chapel in Madrid shortly after Payen's death on 24 April 1559. It is possible that he was also master of Philip's Spanish chapel, holding both positions for the rest of his life.

The masses fall into two (probably chronological) groups: the first consists of those printed in 1532 and those in the manuscript Montserrat 768 (copied 1546), which are primarily parody masses; the second consists of those found in Montserrat 772 (copied 1560), which paraphrase plainsong melodies and reflect the conservatism of Philip II and his court. In the *The Missa de domina virgine Maria*, based on mass IX of the *Liber Usualis*, the Gloria is enhanced by the addition of troped phrases relating to the Holy Spirit and the Virgin Mary. *Missa de requiem*, a paraphrase of the introit *Requiem aeternam* and not a Requiem mass, is conspicuous for the numerous long notes which slow its pace.

Manchicourt's motets represent three different stages in motet composition from the early decades of the 16th century to the 1550s. His early works, such as the six-voice *O virgo virginum*, have the attenuated lines and full textures of Ockeghem; Josquin's influence is clearly shown in *Ne reminiscaris* and *Probe me Deus*, with their shorter phrases and voice-pairings. Manchicourt's mature style is reflected in such works as *Ave virgo gloriosa* and *O intemerata*, which are closer in style to the works of Gombert and Clemens non Papa, combining eloquent and finely wrought melodies with constantly varying imitative techniques. Many of his motet texts are liturgical but three are secular and relate to political figures: *O decus* praises Granvelle; *Nil pace est melius* hails a treaty restoring possessions to Duke Moritz of Saxony; and *Nunc enim si centum* exalts Charles V. Most of the sacred texts are responsories or antiphons, so that many motets have two parts with a refrain, in the form *aBcB*. He varied his material in these refrains with intricate patterns of voice-exchange. Nine motet texts concern the Virgin and seven are from the Song of Solomon; one important feature of these 16 is the emphasis on full textures for five and six voices. In his late motets for five, six and eight voices, high and low groups are occasionally contrasted antiphonally, an expansion of the earlier duet technique. His pairing technique in his mature works differs from Josquin's in that all parts are usually active after the first pair's entrance. Often a *prima pars* begins with the pairing of a single motif between two voices and the *secunda pars* with imitative pairing of two different motifs in four voices. Manchicourt sometimes treated the cantus firmus canonically and sometimes as an ostinato. Skilful expressive devices characterize many motets, particularly *Congratulamini omnes* and *Si bona suscepimus*.

Many of Manchicourt's chansons show the complex textures and motivic structure of the Flemish tradition (e.g. *Par trop aymer* and *L'homme qui est*), but a few, such as *Mon seul espoir* and *J'ay veu le cerf*, are Parisian in style with transparent polyphony and often chordal openings.

For part of a motet by Manchicourt *see* ATTAINGNANT, PIERRE, fig.2.

JOHN D. WICKS (with LAVERN J. WAGNER)

Mancia [Manza], **Luigi** (*b* Brescia, ?1665; *d* after May 1708). Italian composer and singer. Quadrio (1744) termed him Brescian, and the last revival of his setting of *Partenope* was at Brescia in 1710. In 1687 he travelled with the singer Ferdinando Chiaravalle to the court of the Elector Ernst August at Hanover, where he wrote his first dated composition, *Paride in Ida*. He may have performed in January 1689 at the opening of the elector's new opera house (where the new Kapellmeister Agostino Steffani made his début). In 1695–6 he was in Rome for his first three operas produced in Italy. He was back in Hanover in 1697 for the summer production of a new opera, and in Berlin by October, where he sang with Chiaravalle, Ariosti, Pistocchi and Valentino Urbani at a concert for the Electress (later Queen) Sophie Charlotte.

Mancia returned to Italy to compose operas for the Spanish viceregal theatre at Naples in 1698–9. Beginning in 1701 he worked in Düsseldorf. He served Johann Wilhelm, Palatine elector, as a *consigliere della camera*, according to the inscription on the score of the serenata he wrote when Karl III, the Austrian claimant to the Spanish throne, travelled through Düsseldorf. He wrote the text as well as the music for his work and for several of his cantatas. He has sometimes been identified with 'signor Mancini, formerly Servant to the late King of Spain', who sang at Drury Lane in London on 31 January 1701. He cannot, however, be that Mancini, because on 15 January 1702 he wrote to the violinist Nicola Cosimi, who was then in London, asking him for news of the reception given to Italian music in England, for 'I have not yet seen that fine land, but hope to greet you there shortly, because before returning to Italy I hope to see the realm that I'm told is *il Paradiso terrestre*'.

In 1707 he accompanied the Venetian ambassador to London, but stayed only briefly. In 1708 his only opera written for Venice and his only serenata written for Brescia were produced, and they are his last known works. The latter was produced in honour of Karl III's wife as she passed through Brescia, and Mancia might have been hoping for an appointment from Karl III. In 1708 he did seek to serve Queen Anne as a musician, according to a letter of 16 March, written to Sarah, Duchess of Marlborough, by Charles Montagu, Duke of Manchester and ambassador extraordinary in Venice. The duke reported that Mancia 'plays on all instruments, bassoon, guitar, hautboy, and harpsichord in perfection', and 'speaks French and German'. He may indeed have been well educated, for one entry in the Estense catalogue terms him 'dottore' (Chiarelli, 112).

Mancia's opera of 1687 has very brief arias that are not in da capo form. While his later works contain da capo arias, even in these the *A* sections are unusually brief, because syllabic text-setting with little word repetition predominates. Their texture can be rich, in five or six parts with two viola parts, as in *Partenope* (1699). His cantatas include one group of seven, in which the aria-like structure of each is indicated by the titles aria, canzona and canzonetta. Such traits ally his style more closely to that of his elders (Legrenzi and Stradella) rather than to that of his contemporaries (Ariosti, Gasparini and Alessandro Scarlatti).

WORKS

OPERAS

Paride in Ida (trattenimento pastorale per musica, 3, N. Nicolini), Hanover, Hof, 1687; rev. as Gl'amori di Paride ed Ennone in Ida, Salzdahlum, Schloss, *c*1697, *GB-Lbl*; with text rev. F. Mazzari and addl music by A.B. Colletti, Parma, Ducale, 1696, and Venice, S Angelo, aut. 1706 (see G.C. Bonlini, *Le glorie della poesia e della musica* (Venice, 1731), 149); Lugo, 16 Aug 1716
Giustino (melodramma, 3, ?S. Stampiglia, after N. Beregan), Rome, Tordinona, 8 Jan 1695, arias in *D-MÜs*, *I-Bc*, *Msartori*, *Rc*, *Rli*, *Rmalvezzi*, *US-NYlibin*
Flavio Cuniberto (dramma per musica, 3, after M. Noris), Rome, Capranica, *c*25 Jan 1696, arias in *F-Pc*, *Pn*, *GB-Ob*, *I-Rc*, *Rvat*
Il re infante (dramma per musica, 3, after Noris), Rome, Capranica, Feb 1696, *Fc*, arias in *F-Pn*, *GB-Ob*, *I-Rvat*
La costanza nelle selve (favola pastorale, 3, O. Mauro), Hanover, Hof, sum. 1697, *GB-Lbl*; as La costanza trionfante, Wolfenbüttel, Schloss, 1715, and Salzdahlum, Schloss, 12 Sept 1715
Tito Manlio (dramma per musica, 3, after Noris), Naples, S Bartolomeo, carn. 1698, comic scenes in *D-Dl*, arias in *I-Nc*
Partenope (dramma per musica, 3, Stampiglia), Naples, S Bartolomeo, carn. 1699, *F-Pn*, *I-Nc*, comic scenes in *D-Dl*; Rovigo, 16 Oct 1699; Mantua, 12 May 1701; Florence, Cocomero, Nov 1701; Brescia, 1710

Alessandro in Susa (tragicommedia, 5, G. Frigimelica Roberti), Venice, S Giovanni Grisostomo, 28 Jan 1708, *D-W*

Aria in: Arione (pasticcio, 3, O. d'Arles), Milan, 9 June 1694

SERENATAS

Componimento per musica, in occasione del passaggio per Düsseldorf di Carlo III, re delle Spagne (L. Mancia), 4vv, insts, Düsseldorf, Oct 1703, *A-Wn*

Serenata (G.B. Bottalicio), Brescia, 28 May 1708, lost

CANTATAS

for soprano and continuo unless otherwise stated

Ardo ahi lasso e non oso palesar, *I-MOe*; Augelletti al vostro canto, A, bc, *GB-Lbl*; Con fosco dente di veleno infetto, *I-MOe*; Da fantastico umor, canzona, *MOe*; Donna più non amerò (Amante che rinonzia alle donne), *MOe*; Dove trascorri incauto piede? (Partenza) (L. Mancia), B, bc, *MOe*; E dove mi traete, A, bc, *MOe*; E possibile o luci adorate, *MOe*; E quando o luci amate (Mancia), A, bc, *MOe*; Il più fedele amante (Mancia), *MOe*; Il tempo c'ha l'ali (Chi ha tempo non aspetti tempo), aria, *MOe*; In amor non ho fortuna (Amante sfortunato), aria, *MOe*; La vince chi dura (Sopra il proverbio, chi la dura la vince, la vince chi dura), canzonetta, *MOe*; Luci belle oh Dio che fate, SS, bc, *F-Pn*

Non cominci ad amar chi non ha scherma (Il gioco di scherma), canzonetta, *I-MOe*; Non vel pensate no, *MOe*; O Dio d'amor consola questo cor (Mancia), *MOe*; Perché mai sì crude siete, SS, bc, *F-Pn*; Quando d'amor le leggi, *I-MOe*; Quanto più mi consigliate (Amante bizzarro), aria, Bar, bc *MOe*; Qui dove il fato rio, A, 2 vn, va, ob, 2 bn, bc, *D-Bsb*, *S-Uu*; Sedea su l'erbe ove più densa l'ombra, *I-MOe*; Se dirai d'essere amante, *MOe*; Se non mi vuoi amar, A, bc, *MOe*; Se stringo lo scettro, SS, gui, *Nc* (doubtful); Toglietemi pietosi (Medea tradita), A, bc, *MOe*; Tuffata in grembo all'acque, B, bc, *MOe*; Un bacio Lilla? Ohimé!, 2vv, bc, *B-Bc*; Un bel guardo di vaga beltà, *I-MOe*; Vasta mole fondar su l'arene, B, bc, *MOe*; Versatevi ai torrenti, A, bc, *GB-Lbl*

SACRED

Mass, 16vv, lost (formerly *I-MOe*)

Ad arma volate o furie superbe, T, 2 vn, bc, *D-Bsb*, *I-MOe*

Expugnate debellate, A, 2 vn, bc, *MOe*

INSTRUMENTAL

Concerto (arr. org by J.G. Walther), ed. in DDT, xxvi–xxvii (1906/*R*), 309–13

Sassolea, o siano Sonate, vn, *I-MOe*

Sinfonia, 2 vn, va, bc, *S-Uu*

LOWELL LINDGREN

Mancinelli, Domenico (*b* Italy, 1721/1724; *d* Bologna, 16 Oct 1804). Italian oboist and composer. He was employed as an oboist at S Petronio, Bologna, from 1760 until his death, although many sources (e.g. Fétis) claim he had lived in London, probably on the basis that most of his compositions were published there. He wrote a large amount of technically undemanding music almost exclusively in the form of flute duets for the 'gentleman players' whom he taught. He composed with facility in an elegant *galant* style, only rarely hazarding longer movements, as in his op.1 *Eight Duets*, finding for the great majority of his pieces the minuet to be the most appropriate vehicle for incorporating some simple melodic imitation with general tunefulness, predictable harmonic progressions and a certain rhythmic vitality.

WORKS

all printed works published in London unless otherwise stated

24 Duetto's in an Easy Pleasing Stile, 2 fl/vn (?1770)

8 Duets, 2 fl/vn or fl, vn, op.1 (*c*1775), also as op.2

12 duetti, 2 fl/bn, op.2 (Paris, *c*1775)

OWAIN EDWARDS/ALFREDO BERNARDINI

Mancinelli, Luigi (*b* Orvieto, 6 Feb 1848; *d* Rome, 2 Feb 1921). Italian conductor and composer. He had music lessons from his brother, MARINO MANCINELLI, and later studied in Florence with Mabellini. He was a cellist in the Orvieto *cappella* (1862) and later in the Pergola theatre orchestra, Florence, then (1874) at the Teatro Francesco Morlacchi in Perugia, where he was also assistant *maestro concertatore*; he made his conducting début in *Aida*, taking over at short notice from Usiglio. The impresario Jacovacci was present and engaged him for the Teatro Apollo, Rome, where he appeared until 1881.

A success from the beginning, Mancinelli soon attained great authority as a conductor; in 1877 Boito called him the ideal interpreter of *Mefistofele*, and the publisher Giovannina Lucca, holder of the Wagner copyrights in Italian, saw him as Mariani's successor as a Wagner conductor. He also began to be known as a composer through his incidental music for Cossa's tragedies *Messalina* (1876) and *Cleopatra* (1877). In 1878 he conducted concerts in Paris, Milan and in Bologna, where he was a founder and director of the Società del Quartetto and initiated the popular concerts at the Teatro Brunetti; he also conducted the opera season at the Comunale. From 1881 he taught at Bologna Conservatory and was *maestro di cappella* at S Petronio. In January 1883 he conducted at a concert in honour of Liszt and Wagner in Venice. Wagner wanted him to conduct a performance there of his youthful Symphony in C; only when Mancinelli proved unavailable did he agree to conduct it in person.

His first opera, *Isora di Provenza*, was successful in Bologna in 1884, but failed in Naples in 1886. On returning from that production, Mancinelli resigned his posts in Bologna and left the city. Gui stated that 'under the threat of a disgraceful lawsuit … he had to leave Italy

and live an exile for many years'. However, Mancinelli conducted in Bologna in 1887 and elsewhere in Italy in 1892. Augustus Harris engaged him as sole conductor of a season of Italian opera at Drury Lane in spring 1887 and as chief conductor at Covent Garden in 1888, a post he held until 1905. In 1888 he went with Harris to Bayreuth in preparation for *Die Meistersinger* with Jean de Reszke. He was chief conductor at the Madrid opera, 1887–93, and at the new Metropolitan, New York, 1893–1903, taking leave when he was composing his operas *Ero e Leandro* (1895–6) and *Paolo e Francesca* (1901–2). He conducted opera in Italy until 1911 and seasons at the S Carlos, Lisbon, from 1901 to 1919–20. In 1905 he was at the Rio de Janeiro opera and in 1908 inaugurated the Teatro Colón, Buenos Aires, returning there in 1909, 1910 and 1913. He often conducted in Spain.

Mancinelli was probably the most important Italian conductor of the generation between Faccio and Toscanini, of whom in many ways he was a forerunner: both were authoritarian, charismatic figures, put great emphasis on fidelity to the score, which they often conducted from memory, and had little patience with singers' whims and conceits. In London and New York Mancinelli conducted a wide range of operas, seldom with adequate rehearsal. In Italy and Spain he was celebrated as a champion of Wagner and Beethoven, but in London and New York his authority in this area was not undisputed. Shaw wrote of his *Lohengrin* (1889) that his

> Italian temperament came repeatedly into conflict with the German temperament of the composer. Where the music should have risen to its noblest and broadest sweep he hurried on in the impetuous self-assertive Southern way that is less compatible than any other manner on earth with the grand calm of the ideal Germany.

Weingartner, on the other hand, found Mancinelli's *Meistersinger*

> astonishingly good ... I could never have thought that an Italian could so thoroughly master so German a score. He conducted with so much temperament and energy ... and such subtle understanding of where the orchestra should dominate and where it should be subordinate, and yet without neurotics or the petty tricks of the fatal *tempo rubato*, that I could wish many a German conductor could take a lesson from him.

In his early years in London and New York Mancinelli conducted much Wagner, tailored to an Italian pattern (parts of the Trial and Prize Songs and the first part of 'Wahn, wahn', were cut for the 1889 *Meistersinger*). During his time, however, Wagner began to be sung in the original language, with Germans engaged to conduct it, and by 1900 Mancinelli was shut out of the German repertory.

Mancinelli had been judged a composer of great promise on the basis of his early incidental music and his first opera, *Isora di Provenza*, in which he may be said to follow Wagnerian methods – notably in his use of leitmotifs – if at a distance. But in general he saw himself as following the true path for Italian opera marked out by *Otello* and *Falstaff*. After becoming a busy international conductor in the late 1880s he composed little and sporadically. His promise was never realized, nor did his style develop significantly. The enthusiasm for his most important opera, *Ero e Leandro*, at its first performance in Madrid (1897) did not survive the work's transference to Italian theatres (Turin, Venice, Rome, 1898), and it had a lukewarm reception in London and New York in spite of star casts. *Paolo e Francesca* had even less success in 1907. Mancinelli was embittered by this failure, which was probably caused partly by a dramatic temperament strongly at variance with the dominating currents in Italian opera at the time, as manifested in the *verismo* school and Puccini. This is evident also in his rather abstract treatment of his characters, a tendency emphasised by his lack of facility in creating memorable melodies. This failing was often pointed out by critics who from the 1890s usually passed him off as a conductor who dabbled in composition and who, while admirable for his fastidious and elegant craftsmanship, especially his orchestration, lacked the essential gift of individuality. He was at his best in the creation of atmosphere and background. From this derived his success in incidental and descriptive music and the appropriateness of his late ventures into film music (*Frate Sole*, 1918, and *Giuliano l'apostata*, 1920). His operas are full of excellent passages of this sort, but they tend to overwhelm the dramatic core. His greatest success was the orchestral suite *Scene veneziane* (1888); Shaw called it 'a very pretty piece of promenade music', indicating how far Mancinelli's achievements fell below his aspirations. His output also included sacred music and songs.

DENNIS LIBBY/JULIAN BUDDEN

Mancinelli, Marino (*b* Orvieto, 16 June 1842; *d* Rio de Janeiro, 2 Sept 1894). Italian conductor and composer, brother of LUIGI MANCINELLI. He studied first with his father, Raffaele Mancinelli, and later with Teodulo Mabellini in Florence. He was appointed *maestro di cappella* at Orvieto cathedral. He was also a teacher, and his brother was one of his pupils. He began his career as a conductor in Florence, where he lived for a long time. After Angelo Mariani, he was one of the first conductors in Italy to perform Wagner. In Bologna he gave the Italian première of *Der fliegende Holländer* (Teatro Comunale, 14 November 1877); he also conducted *Rienzi* there (Politeama, 1880) and in Rome (Teatro Costanzi, 1884). During the 1881–2 season in Rome he gave the first performances there (Teatro Apollo) of Meyerbeer's *L'étoile du nord* and Goldmark's *Die Königin von Saba*, and the première (22 March) of Donizetti's *Il duca d'Alba*, which had been completed for the occasion by Donizetti's pupil Matteo Salvi and Ponchielli. Mancinelli then began his career as a freelance conductor, working in Paris and Spain, and finally at the Teatro de S Carlos in Lisbon from 1886. He later established an Italian opera company

in Rio de Janeiro, but when it failed, owing money to the company members, he shot himself. The few comments about him that survive reveal a rapid rehearser, particularly skilled as a répétiteur (a characteristic he shared with his brother Luigi), and a vigorous, lively conductor with an infallible memory (characteristics of an Italian tradition from Mariani to Toscanini). The Mancinelli brothers and Franco Faccio were 'for several years the most celebrated conductors in Italy . . . the three favourites of Italian audiences' (Monaldi).

Mancinelli produced his own opera, *I ribelli*, in Lisbon in 1888. He wrote salon songs, as was customary for Italian composers of the time, and a few piano pieces. Not all sources agree in attributing to him the opera *Giorgio Clankerty*, produced in Vienna in spring 1881. At the beginning of the 20th century the Teatro dell'Opera in Rome held some of his autograph scores; others are known to be in the possession of the Orvieto city archives.

ANTONIO ROSTAGNO

Mancini, Curzio (*b* ?Rome, *c*1553; *d* ?Rome, after 1611). Italian composer. He was a boy soprano at S Giovanni Laterano, Rome, until February 1567. He may have entered this apprenticeship early enough to have served under Palestrina, who was *maestro di cappella* there until August 1560. He was apparently at some time a pupil of Palestrina, as is indicated by his inclusion in the group of Palestrina's students who composed the *Missa cantantibus organis Caecilia* on themes by Palestrina. Mancini organized the music for Holy Week for the Oratorio del Gonfalone in Rome in 1576. He did the same for the principal feasts at the Oratory of the SS Trinità dei Pellegrini in Rome from February 1577 through March 1579. The next notice of him is as successor to Soriano as *maestro di cappella* at S Maria Maggiore in 1589–91; he then went to the Santa Casa, Loreto, as *maestro di cappella* from July 1592 to May 1593. In 1596 he was again in Rome, where he organized the music for the feast of Corpus Christi at the Confraternity of S Rocco. In a letter of 1600, written from Rome (printed in Casimiri, 245–6), he called himself *maestro di cappella* of Madonna dei Monti and of S Pietro all'Oratorio del Gonfalone. From June 1601 until October 1603 he was *maestro di cappella* at S Giovanni Laterano, Rome; he returned to the post at Loreto in October, 1603. From September 1608 until June 1611 he was back at his earlier post at S Giovanni Laterano.

The style of Mancini's one published collection of secular music is rather conventional, and characteristic of the Roman style of the 1580s and 90s – imitative, in lengthy lines, within a simple and clear harmonic structure; the dissonance is very mild, the rate of motion is steady, and there is a fair amount of written-out diminution.

ANTHONY NEWCOMB

Mancini, Francesco (*b* Naples, 16 Jan 1672; *d* Naples, 22 Sept 1737). Italian composer. He entered the Conservatorio di S Maria della Pietà dei Turchini in 1688 as a student of organ, where he studied with Provenzale and Ursino; after six years he was employed as an organist. At the beginning of the 18th century he entered the service of the viceroy and in 1704 became the principal organist of the royal chapel. He was appointed *maestro di cappella* there in 1708 but by December of that year the post was returned to Alessandro Scarlatti and Mancini became his deputy (in 1718 he obtained a guarantee that he would succeed Scarlatti). In 1720 he became Director of the Conservatorio di S Maria di Loreto, and so played an important part in the training of a new generation of composers. Mancini succeeded Scarlatti in 1725, remaining in the post until his death. In 1735, however, he suffered a stroke and remained semi-paralysed until his death two years later.

As far as is known, Mancini's first composition was the pastoral opera *Il nodo sciolto e ligato dall'affetto*, written for Rome. From 1702 onwards Mancini worked almost continuously at composing and arranging operas. He was most productive when he was Scarlatti's deputy; his creative output slowed down following his appointments as Director of S Maria di Loreto and then as *maestro* of the royal chapel. While Mancini composed serenades, pieces for special occasions and cantatas throughout his life, his oratorios are concentrated in the period 1698–1708, with several later exceptions, including his last oratorio, *Il zelo animato*, which appears to have been intended as an exercise for his pupils at S Maria di Loreto.

Mancini's contribution to sacred music was considerable, and the wide distribution of his music in libraries throughout Europe is a reflection of its popularity. Instrumental music was not of primary concern to Mancini, and that which remains appears to have been intended for teaching purposes (for example the two toccatas for harpsichord). The peculiarity of his instrumental writing can be seen in his sonatas, for example the rich harmonies accompanying the melodies and the contrapuntalism of the second movements, which are often almost proper fugues (see Giani).

While Mancini did not travel far from Naples, except for the occasional trip to Rome, stylistically his music fits into the transition between Scarlatti's generation and the era of the spread of Neapolitan opera across Europe. His operas, which display a preference for the pathetic style (but he was no stranger to the comic), make simultaneous use of archaic features, such as a thick contrapuntal texture, swift rate of harmonic change and fast-moving bass line, as well as more modern features, such as the precise delimitation and greater extension of the sections of his arias and the use of the harmonic pedal. Mancini's instrumentation is varied and colourful; the many directions for the bass part, which often indicate detailed orchestration and which may vary within a single aria, are also of importance. He was a skilful writer of melodies, able to achieve a perfect balance between words and intonation, even in recitatives, and able to shape the vocal line effectively as well as simply.

ANGELA ROMAGNOLI

Mancini, Giovanni Battista [Giambattista] (*b* Ascoli Piceno, 1 Jan 1714; *d* Vienna, 4 Jan 1800). Italian castrato. He studied at Naples with Leonardo Leo, then at Bologna with Antonio Bernacchi and (for counterpoint and composition) G.B. Martini (with whom he remained in touch, helping him in 1778 to arrange a Bologna performance of Gluck's *Alceste*). He sang in Italy and Germany from about 1730, never, it seems, as more than a second-rank singer, though no doubt a musicianly one (he became a member of the Accademia Filarmonica in Bologna). He also made a name as a singing teacher, and in 1757 was called to Vienna to teach the Empress Maria Theresa's daughters; there he remained for the rest of his life.

Mancini's influential treatise on singing, *Pensieri, e riflessioni pratiche sopra il canto figurato* (Vienna, 1774; enlarged 3/1777), was largely a more systematic version of Pier Francesco Tosi's *Opinioni de' cantori antichi e moderni* (1723); both writers shared a belief in the need for singers to undergo prolonged training and to work out their own ornamentation, since this could not be definitively written down. But Mancini went beyond Tosi in assuming no practical difference between operatic and other singing, and in endorsing without qualms the cult of agility; he was himself soon embroiled in controversy with Vincenzo Manfredini, who preferred the value of utterance 'from the heart' to the artificiality of trills. Mancini's account of Italian schools of singing and their decadence, which he blamed on the modern rush to get pupils on to the stage, was a partial one; lamenting the lost golden age was commonplace among authors of treatises on singing. The *Pensieri* was published in English translation, as *Practical Reflections*, in 1967.

JOHN ROSSELLI

Mancini, Girolamo. *See* DIRUTA, GIROLAMO.

Mancini, Henry [Enrico Nicola] (*b* Cleveland, 16 April 1924; *d* Beverley Hills, CA, 14 June 1994). American arranger, composer, conductor and pianist. Raised in West Aliquippa in Philadelphia, he learnt the flute and piano as a child. In his early teens he developed an interest in jazz, especially music of the big bands; he began to teach himself arranging, then had lessons with the theatre conductor and arranger Max Adkins in Pittsburgh. In 1942 he enrolled at the Julliard Graduate School, but was in the Air Force after less than a year and served until 1946, mostly as a member of military bands. He then became a pianist and arranger for the Glenn Miller-Tex Beneke Orchestra, in whose employ he met the vocalist Virginia O'Connor, with whom he moved to Los Angeles and married in 1947. For the next five years Mancini worked freelance, mostly as an arranger for dance-bands and night-club acts, also composing music for radio programmes. He studied composition privately with Castelnuovo-Tedesco, Krenek and Sendrey.

In 1952 Mancini joined the staff of Universal, under Joseph Gershenson (the studio's music director), and alongside such experienced men as Hans Salter, Frank Skinner, Herman Stein and David Tamkin. He was employed as both an arranger and a composer, and worked on films of many types, including musicals (notably *The Glen Miller Story*) and many routine comedies, mysteries, 'B' westerns, and monster pictures. Gradually he was given increased responsibility, and in 1958 he worked with Orson Welles on *Touch of Evil*, for which he composed an effective and innovative score. In the same year, however, Universal let most of its music staff go. Now on his own, Mancini was quickly hired by Blake Edwards (another budding talent at the studio) as the composer for a new television series, *Peter Gunn*. A recording of Mancini's theme music for the show became a hit, as did his music for Edwards' next series, *Mr. Lucky*. Thereafter, from the early 1960s until the late 80s, Mancini composed an average of three or four film scores per year, including more than two dozen that were written, produced and directed by Edwards.

Simultaneously Mancini developed a successful career as a recording and concert artist, and he reworked many of his film scores into best-selling commercial albums, most of them issued by RCA. However, these albums normally contained commercial arrangements of the main themes and consequently are not reliable indicators of his gifts as a dramatic composer. Often he gave 50 or more concerts each year as a guest pianist and/or conductor of bands and 'pops' orchestras. Some of his later albums (including recordings with James Galway and Luciano Pavarotti) were milestones of the popular/classical 'cross-over' approach. He received four Academy Awards (two for best score, two for best song), 20 Grammy Awards and several career achievement awards. In 1989 he co-wrote an engaging and informative memoir.

Mancini's greatest influence as a Hollywood composer was felt from 1958 to about 1965, the period when he pioneered fundamentally new styles. He made imaginative use of jazz and popular idioms, which he applied not only to detective stories and *film noir* (building upon convention) but also to sophisticated romantic comedy, slapstick and other genres. He became known for well-crafted and dramatically apt theme songs, notably those for *Breakfast at Tiffany's* ('Moon River'), *The Days of Wine and Roses*, *Charade* and *Darling Lili* ('Whistling Away the Dark') – and for witty instrumental pieces, as for *Hatari!*, *The Pink Panther* and *The Great Race*. In general he favoured subtlety and restraint, and liked to score somewhat 'against' the scene. For example in *Breakfast at Tiffany's*

the first kiss between the romantic leads (Audrey Hepburn and George Peppard) is underplayed, with a soft, shimmering *tremolo* that evaporates into silence; and the 'Baby Elephant Walk' in *Hatari!* matches an unexpected variant of a boogie-woogie for the animal's movements. Repeatedly Mancini came up with novel instrumental effects (one trademark being his fondness for alto and/or bass flutes), and he was equally skilled in writing for orchestra, jazz band and small ensembles. In 1962 he wrote and published a guide to orchestration which was widely used by arrangers for years.

After 1965, notwithstanding his celebrity as a 'pop' artist, Mancini continued to compose dramatic music for many serious films that either failed at the box office or enjoyed only moderate success. Some fine examples are *Two for the Road*, *The Molly Maguires*, *The White Dawn*, *That's Life!* and *The Glass Menagerie* (and also Hitchcock's *Frenzy*, for which in 1968 he drafted a score that was rejected as being too serious). His scores for two of the later Edwards films, *'10'* and *Victor/Victoria*, again brought him popular acclaim. The songs for the latter film (lyrics by Leslie Bricusse) included Mancini's most familiar trademarks: a poignantly lyric waltz, 'Crazy World', and a lively band number, 'Le Jazz Hot'. The film's gender-bending ambiguities (a favourite theme of Edwards throughout his career) has made it enduringly topical, and led to its adaptation as a stage musical which opened on Broadway in 1995: Mancini, suffering from cancer, died while the work was still in development; several other musicians thus had a hand in the revised score, but his songs, including several new ones, constitute the heart of the production.

WORKS

(*selective list*)

Collection: *Henry Mancini Songbook*, ed. M. Okun (n.p., 1981)

Film scores as co-composer and/or arranger (director in parentheses): Lost in Alaska, 1952 (J. Yarbrough); Has Anybody Seen my Gal? (D. Sirk), 1952; All I Desire (Sirk), 1953; It Came from Outer Space (J. Arnold), 1953; It Happens Every Thursday (J. Pevney), 1953; Law and Order (N. Juran), 1953; The Lone Hand (G. Sherman), 1953; Walking my Baby Back Home (L. Bacon), 1953; The Creature from the Black Lagoon (Arnold), 1954; The Far Country (A. Mann), 1954; Four Guns to the Border (R. Carlson), 1954; The Glenn Miller Story (Mann), 1954; Johnny Dark (Sherman), 1954; Ma and Pa Kettle at Home (C. Lamont), 1954; So This is Paris (E. Lubitsch), 1954; This Island Earth (J. Newman), 1954; Tanganyika (A. de Toth), 1954; Abbott and Costello Meet the Keystone Kops (Lamont), 1955; Ain't Misbehavin' (E. Buzzell), 1955; The Benny Goodman Story (V. Davies), 1955; The Private War of Major Benson (J. Hopper), 1955; The Spoilers (J. Hibbs), 1955; Tarantula (Arnold), 1955; Behind the High Wall (A. Biberman), 1956; A Day of Fury (H. Jones), 1956; Francis in the Haunted House (Lamont), 1956; The Great Man (J. Ferrer), 1956; Rock, Pretty Baby (R. Bartlett), 1956; Man Afraid (H. Keller), 1957; Mister Cory (B. Edwards), 1957; Flood Tide (Biberman), 1958; Operation Petticoat (Edwards), 1959

Film scores as principal or sole composer (director in parentheses): Touch of Evil (O. Welles), 1958; High Time (Edwards), 1960; Bachelor in Paradise (Arnold), 1961 [incl. title song; lyrics, M. David]; Breakfast at Tiffany's (Edwards), 1961 [incl. Moon River; lyrics, J. Mercer]; The Great Impostor (R. Mulligan), 1961; Days of Wine and Roses (Edwards), 1962 [incl. title song; lyrics, Mercer]; Experiment in Terror (Edwards), 1962; Hatari! (H. Hawks), 1962 [incl. Baby Elephant Walk]; Mr Hobbs Takes a Vacation (H. Koster), 1962; Charade (S. Donen), 1963 [incl. title song; lyrics, J. Livingston and R. Evans]; The Pink Panther (Edwards), 1963; Soldier in the Rain (R. Nelson), 1963; Dear Heart (D. Mann), 1964 [incl. title song; lyrics, J. Livingston and R. Evans]; Man's Favorite Sport? (Hawks), 1964; A Shot in the Dark (Edwards), 1964; The Great Race (Edwards), 1965 [incl. The Sweetheart Tree; lyrics, J. Mercer]; Arabesque (Donen), 1966; Moment to Moment (M. LeRoy), 1966; What Did you Do in the War, Daddy? (Edwards), 1966; Gunn (Edwards), 1967; The Party (Edwards), 1967; Two for the Road (Donen), 1967; Wait Until Dark (T. Young), 1967; Gaily, Gaily (N. Jewison), 1969; Me, Natalie (F. Coe), 1969; Sunflower (V. De Sica), 1969; Darling Lili (Edwards), 1970 [incl. Whistling Away the Dark; lyrics, Mercer]; The Hawaiians (T. Gries), 1970; The Molly Maguires (M. Ritt), 1970; The Night Visitor (L. Benedek), 1971; Sometimes a Great Notion (P. Newman), 1971 [incl. All His Children; lyrics, A. and M. Bergman]; Oklahoma Crude (S. Kramer), 1973; The Thief Who Came to Dinner (B. Yorkin), 1973; The Girl from Petrovka (R.E. Miller), 1974; The White Dawn (P. Kaufman), 1974; The Great Waldo Pepper (G.R. Hill), 1975; The Return of the Pink Panther (Edwards), 1975; Alex and the Gypsy (J. Korty), 1976; The Pink Panther Strikes Again (Edwards), 1976 [incl. Come to Me; lyrics, D. Black]; Silver Streak (A. Hiller), 1976; W.C. Fields and Me (Hiller), 1976; House Calls (H. Zieff), 1978; Revenge of the Pink Panther (Edwards), 1978; Who is Killing the Great Chefs of Europe? (T. Kotcheff); '10' (Edwards), 1979 [incl. It's Easy to Say; lyrics, R. Wells]; A Change of Seasons (R. Lang), 1980; Little Miss Marker (W. Bernstein), 1980

Mommie Dearest (F. Perry), 1981; F.O.B. (Edwards), 1981; Trail of the Pink Panther (Edwards), 1982; Victor/Victoria (Edwards), 1982 [lyrics, L. Bricusse; rev. for stage, 1995]; The Man Who Loved Women (Edwards), 1983; Harry and Son (Newman), 1984; Lifeforce (T. Hooper), 1985; Santa Claus (J. Szwarc), 1985; A Fine Mess (Edwards), 1986; The Great Mouse Detective (J. Musker), 1986; That's Life! (Edwards), 1986 [incl. Life in a Looking Glass; lyrics, Bricusse]; Blind Date (Edwards), 1987; The Glass Menagerie (Newman), 1987; Sunset (Edwards, 1988; Without a Clue (T. Eberhardt), 1988; Skin Deep (Edwards), 1989; Welcome Home (F.J. Schaffner), 1989; Ghost Dad (S. Poitier), 1990; Switch (Edwards), 1991; Son of the Pink Panther, 1993

TV series, mini-series and films incl. Peter Gunn, 1958; Mr. Lucky, 1959; NBC Mystery Movie, 1971; The Shadow Box, 1980; Remington Steele, 1982; The Thorn Birds, 1983; Peter Gunn, 1989; Fear, 1990; Never Forget, 1991

Orch: Beaver Valley '37 Suite, ?1970

Some MSS, notes and sketches in *US-LAuc*

Mancinus [Menckin], **Thomas** (*b* Schwerin, 1550; *d* Schwerin, late in 1611 or early in 1612). German composer. After attending the Schwerin grammar school he enrolled at Rostock University in 1567 with a scholarship from Duke Johann Albrecht von Mecklenburg. On 1 January 1572 he was appointed Kantor at Schwerin. His duties included singing regularly at the Schwerin court at services and at table, as he had done

when a member of the school choir. In 1576 he was appointed Kapellmeister to Duke Ulrich at Güstrow, but after only six months he was obliged to return to Schwerin to replace an incompetent Kantor. From 1579 until 1581 he was a tenor at the court in Berlin, and from 1583 at the latest he was at Gröningen in the service of the Bishop of Halberstadt, who later became Duke Heinrich Julius of Brunswick-Wolfenbüttel; from 1584 he was Kapellmeister in Gröningen. In 1587 Duke Julius, the bishop's father, entrusted Mancinus with the founding of the Wolfenbüttel Hofkantorei, which, from 1589 under the reign of Duke Heinrich Julius, became one of the leading court music colleges in Germany. Mancinus directed the Kantorei until his retirement in 1604. He paved the way there for the influential work of Michael Praetorius, his successor. Two of Mancinus's sons, Thomas (who took part in the Gröningen organ competition in 1596) and Jacob (a lutenist), also served at the Wolfenbüttel court.

The best known of Mancinus's works are the 'dramatic' Passions, composed before 1602, which hark back to the style of Johann Walter (i). In the simple turba choruses the tenor part is not restricted to the choral Passion tone throughout, as in Walter's works. The choruses are, however, simpler than those by Meiland (1570) and less expressive than those by Gesius; the *Benedicamus* movements show the same homophonic style. In 1588 Mancinus requested financial support for the printing of a collection of 67 motets; only 12 can now be traced in print or manuscript, and only six are complete. These give evidence of a solid craftsmanlike training; if he were judged by some sections, Mancinus would rank among the best German composers of the late 16th century, but the quality is uneven and in other sections he achieved harmonic effects only at the expense of the melody. His secular songs of 1588 show a strong Italian influence; six have Italian texts. The songs with German texts are also indebted partly to the canzonetta and partly to the madrigal, but in spite of their Italian style they still have a certain north German heaviness. The song collection ends with an instrumental fantasia. Of the 26 bicinia in the 1597 collection seven have Italian texts, and 16 are instrumental practice pieces without texts.

WORKS

SACRED VOCAL

Quotidiana verae ecclesiae precatio, 5vv (Helmstedt, 1608)
Cantiones sacrae, 5, 8vv ... cum adaptae eius gratiarum actione, 6vv (Helmstedt, 1608)
[2] Passio Domini nostri Iesus Christi, 4vv (Wolfenbüttel, 1620); ed. L. Schöberlein, *Schatz des liturgischen Chor- und Gemeindegesangs*, ii (Göttingen, 1868); ed. K. Knoke, *Die Passionen Christi von Thomas Mancinus* (Göttingen, 1897); 1 ed. K. Ameln and others, *Handbuch der deutschen evangelischen Kirchenmusik* (Göttingen, 1932–), i/3, p.84; i/4, p.53
12 Benedicamus, 4vv; 4 Lat. motets, 5, 6vv; motet, 5vv (org tablature): *D-BS* (see H. Sievers, *GfMKB: Lüneburg 1950*)

SECULAR VOCAL

Das erste Buch newer lustiger und höfflicher weltlicher Lieder, 4, 5vv (Helmstedt, 1588)
Duum vocum cantiuncularum ... liber, 2vv (Helmstedt, 1597)
Madrigalia latina, et una gagliarda, 5vv (Helmstedt, 1605)

OCCASIONAL

5 wedding works, 4, 5vv; 2 funeral works, 5vv; 2 other occasional works, 4, 6vv (printed Helmstedt or Wolfenbüttel, 1585–1609)

MARTIN RUHNKE

Mancuso, Fabio (*fl* 1615). Italian composer. Four pieces by him appear in Innocentio di Paula's *Libro primo delle canzone villanesche* (Naples, 1615[19]), for three voices, which also includes one item by Francesca Mancuso. He also published (according to *PitoniN*) a book of five-part motets, now lost, in Naples in 1615.

Mander, Noel (Percy) (*b* London, 19 May 1912). English organ builder. He began work in London in 1932 in association with Ivor Davies and founded his own firm under the name N.P. Mander Ltd in 1936. After overseas service in World War II he resumed organ building, initially in St Pancras and then in Bethnal Green. Early work during the period of post-war recovery comprised salvage, repair and reconstruction of bomb-damaged organs in the Diocese of London, and the fitting of electric blowers throughout the country. Mander was among the first post-war organ builders to take what was then seen as a radical interest in Britain's organ heritage and in the restoration of historic instruments. Early achievements in this field include the 17th-century instrument at Adlington Hall, Cheshire, and a number of organs by John Snetzler, including Peterhouse, Cambridge. He also established contacts with continental organ builders, particularly Dirk Flentrop and Rudolf von Beckerath. Noel's son John Pike Mander (*b* London, 6 July 1949) was apprenticed to Rudolf von Beckerath from 1969 to 1973, and became managing director of the Mander firm on his father's retirement in 1983. Restoration work since the mid-1980s has reflected research in the fields of organ historiography and historically informed performance practice. Among such restorations are a chamber organ by Donaldson (1790) now in the Holywell Music Room, Oxford, and the Hill organs in Birmingham Town Hall and Eton College Chapel. Other reconstructions and restylings by the firm have paid particular attention to historic casework as at Chichester Cathedral, St Andrew's, Holborn, and St James's, Clerkenwell, London. Between 1972 and 1977 the firm undertook the reconstruction and enlargement of the Willis organ of St Paul's Cathedral, London. New organs by N.P. Mander Ltd are built predominantly with mechanical actions, but they reflect a diversity of historic and contemporary styles in their tonal provisions and casework. The instruments demonstrate the capabilities of a firm in which pipework, actions, casework and console designs reflect the specialisms of the staff. At St Matthew's, Westminster, London, the instrument has a case design reflecting Puginesque architecture of building, while at St Andrew's, Holborn, London, the organ reflects the mid-19th-century tonal style of Gray and Davison. The firm has exported organs to Africa, America (including the Winston Churchill Memorial Organ at Fulton, Missouri), the Middle East and Asia. A four-manual organ of 68 stops for the church of St Ignatius, New York

(1994), which reflects 19th-century French style, is among the largest mechanical action designs to have been exported by a British company. The Festschrift *Fanfare for an Organ Builder: Essays Presented to Noel Mander* (Oxford, 1996) was published to mark the firm's 60th anniversary.

CHRISTOPHER KENT

Mandicevschi, Eusebie. *See* MANDYCZEWSKI, EUSEBIUS.

Mandini. Family of singers.

(1) **Stefano Mandini** (*b* 1750; *d* ?*c*1810). Italian baritone. His first known appearance, in Ferrara in 1774, was followed by a string of engagements throughout Italy. At Parma in 1776 he was described as 'primo buffo mezzo carattere'. In 1783 he and his wife were engaged by Joseph II for his new Italian opera company in Vienna, Stefano making his début on 5 May 1783 as Milord Arespingh in Cimarosa's *L'italiana in Londra*. That season he distinguished himself as Mingone in Sarti's *Fra i due litiganti* and as Count Almaviva in Paisiello's *Il barbiere di Siviglia*; in the last, Zinzendorf noted, he excelled in all four disguises in Almaviva's role. In 1784 he created the title role in Paisiello's *Il re Teodoro in Venezia* and the following season created Artidoro in Storace's *Gli sposi malcontenti* and Plistene in Salieri's *La grotta di Trofonio*. He also sang in Bianchi's *La villanella rapita*, for which Mozart wrote a quartet (K479) and a trio (K480). Mandini as Pippo sang in both these numbers.

Mandini created three roles in 1786: the Poet in Salieri's *Prima la musica e poi le parole*, Count Almaviva in Mozart's *Le nozze di Figaro* and Lubino in Martín y Soler's *Una cosa rara*. He also sang in Sarti's *I finti eredi* and Paisiello's *Le gare generose*. In 1787–8 he appeared as Leandro in Paisiello's *Le due contesse* and created Doristo in Martín y Soler's *L'arbore di Diana* and Biscroma in Salieri's *Axur re d'Ormus*. He was then released to go to Naples. In 1789–91 he and his wife sang at the Théâtre de Monsieur in Paris. The *Annalen des Theaters*, in a report from Paris, described Mandini as an outstandingly good actor and singer. In the summer of 1795 while on his way to St Petersburg, he stopped in Vienna to give six guest performances. He stayed several years in St Petersburg, where the painter Elisabeth-Louise Vigée Le Brun remarked that he was an excellent performer and sang wonderfully. It is uncertain whether he or his younger brother Paolo (3) appeared in Berlin in 1804. An extremely versatile singer, he acquitted himself well both as the comic servant (e.g. Doristo) and as the serious lover (e.g. Lubino). His wide range permitted him to portray Count Almaviva as a tenor for Paisiello and as a baritone for Mozart. Three canzonette, for which he composed both the text and the music, were published in London.

(2) **Maria Mandini** (*fl* 1782–91). French soprano, wife of (1) Stefano Mandini. The daughter of a Versailles court official, she was engaged with her husband in the Italian opera company in Vienna; she made her début there in 1783 as Madama Brillante in Cimarosa's *L'italiana in Londra* and then sang Countess Belfiore in Sarti's *Fra i due litiganti*. She is known to have created three roles, all small parts: Marina in Martín y Soler's *Il burbero di buon cuore* (1786), Marcellina in *Le nozze di Figaro* (1786) and Britomarte in Martín y Soler's *L'arbore di Diana*. The high tessitura of her aria 'Il capro e la capretta', which Mozart wrote for her as Marcellina, belies any claim that she was a mezzo-soprano. She was apparently an attractive but poor singer. Zinzendorf wrote of her performance as Marina: 'La Mandini let us see her beautiful hair'. As Britomarte she was said to sound 'like an enraged cat' and the performing score contains a pencilled comment at the head of her only aria: 'canta male'. All that is known of her later career is that she sang with her husband in Naples and Paris.

(3) **(Alberto) Paolo Mandini** (*b* Arezzo, 1757; *d* Bologna, 25 Jan 1842). Italian tenor and baritone, brother of (1) Stefano Mandini. He is sometimes confused with Stefano because, like him, Paolo had a wide range and sang both tenor and baritone roles. A pupil of Saverio Valente, he made a successful début at Brescia in 1777 and sang widely in Italy before joining Haydn's company at Eszterháza in 1783–4. He appeared as Don Fabio in Cimarosa's *Il falegname*, Gianetto in Anfossi's *I viaggiatori felici*, Armidoro in Cimarosa's *L'amor costante*, the Marquis in Sarti's *Le gelosie villane* and the Count in Bianchi's *La villanella rapita*. Haydn wrote Idreno for him in *Armida*. For the 1785–6 season he joined his brother in Vienna, where he made his début in Anfossi's *I viaggiatori felici* as Gianetto and sang Paulino in Bianchi's *La villanella rapita*. He went on to sing throughout Italy, returning briefly to Eszterháza (March–September 1790). He later joined his brother in St Petersburg.

CHRISTOPHER RAEBURN/DOROTHEA LINK

Mandó. A composite genre of poetry, music and dance, popular among the Catholics of Goa and the neighbouring regions on the west coast of India. The origin of the word is obscure. The lyrics in Konkani, the language of Goa, include words borrowed or derived from Portuguese (Goa was a Portuguese colony from 1510 to 1961). The refrain from a *mandó* written by Torquato de Figueiredo (1876–1948) is below.

Voso vos re rorhum' naka
Deu-u feliz kortol' tuka

(Go, go dear, and do not cry, God will make you happy.)

In its most popular form, the lyric consists of three stanzas with four lines each with a chorus section that may have two to four lines. Love themes, mostly from the point of view of women, dominate the lyrics and the prevailing mood is melancholic. The musical style is predominantly Western. As a rule the melody begins in a minor key and later modulates to its relative major. Parallel singing in two voices is a distinctive feature of *mandó*; the voices move in 3rds and 6ths. The manner of ornamenting notes, called *kongre* (Konkani: 'curved' or 'curled'), and the vocal inflections are indigenous. Most of the melodies are in 6/4, with the primary accent on the fifth beat and a secondary accent on the first beat. The fifth beat is the preferred starting point for the melody. The instrumental accompaniment includes the violin and the *ghumaṭ*, an earthenware pot. The right-hand side of each is covered with lizard-skin, and the left-hand side is left open.

Both men and women dance the *mandó*. Men carry a hat in one hand and a brightly coloured kerchief in the other; women hold fans of sandalwood, with which they cover part of their faces. An equal number of men and women move in parallel rows, facing each other and making flirtatious gestures without physical contact. Very often *mandó* concludes with a stylistically similar dance, called *dulpod*, which is faster in tempo and merrier in mood. *Mandó* is usually performed at wedding celebrations and social gatherings. During a traditional wedding reception of Goan Catholics it is the bride who initiates the singing. Since the 1970s the Goa Cultural and Social Centre has organized a *mandó* festival every year at Panaji, the capital of Goa.

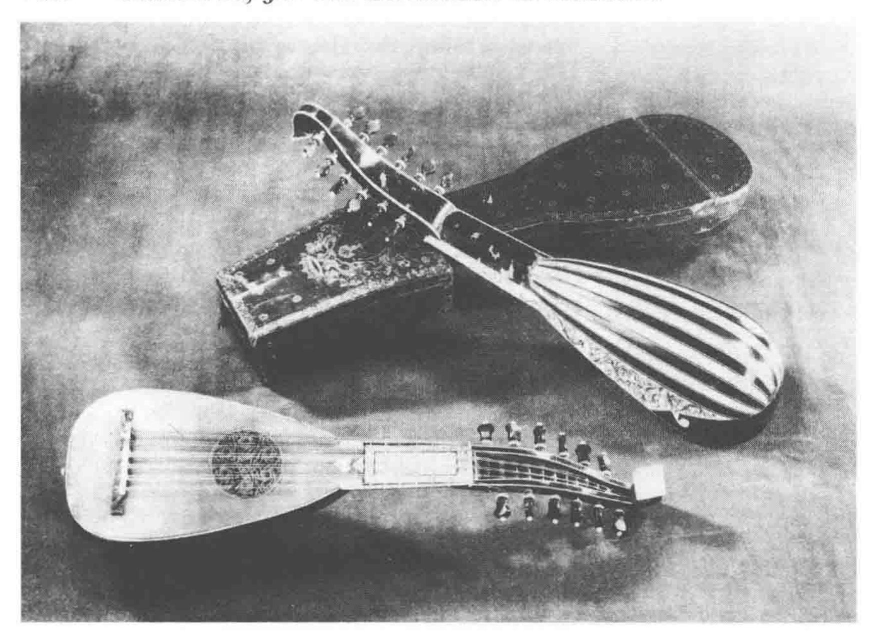
JOSEPH J. PALACKAL

Mandoër [Mandoraen] (Ger.). *See* MANDORE.

Mandola (It.). *See* MANDORE. *See also* MANDOLIN.

Mandolin [mandola, mandoline, mandolino] (Fr. *mandoline*; Ger. *Mandoline*; It. *mandolino*; Port. *bandolim*; Sp. *bandolin*, *mandolina*, *bandola*). Any of several types of small, pear-shaped, fretted string instruments plucked with a plectrum, quill or the fingers. They descended from the medieval GITTERN and the Renaissance MANDORE. Two types of mandolin were predominant by the mid-18th century: the older mandolino or mandola (which was often called the Milanese mandolin from the mid-19th century onwards) and the newly-invented four-course Neapolitan mandolin (which was often simply called the mandolin).



Mandolins have a history stretching back over 400 years and, although they existed on the fringes of the art music world for much of that time, they remained consistently popular for informal music-making. In the classification of Hornbostel and Sachs, mandolins are chordophones.

1. The mandolino or mandola. 2. The Neapolitan mandolin. 3. Other types.

1. THE MANDOLINO OR MANDOLA. Although in modern Italian usage the term 'mandolino' may mean any type of mandolin, it is used in this article for the earlier gut-strung instrument. Terminology is problematic from the mandolino's earliest period: 'mandola' is found in Italian sources beginning in the 1580s and 'mandolino', the diminutive of mandola, appears as early as 1634. To judge from musical and theoretical sources, both terms were used for the same instrument until well into the 18th century, with Antonio Stradivari's precisely labelled instrument patterns from the 1680s onwards among the few sources to relate terminology to instrument size; his patterns for mandolas tend to be slightly larger and imply a lower tuning than his patterns for *mandolini*.

In its classic 17th- and 18th-century form (fig.1), the mandolino or mandola resembles a small lute. It has a rounded back (made of between seven and 23 ribs), a flat soundboard (usually of fir) with a decorative rosette (either carved into the same piece of wood or constructed separately and inserted into the soundhole), and a lute-style bridge (glued onto the soundboard) to which the strings are fixed. It has four, five or six courses of double (occasionally single) gut strings, which are plucked either with the fingers or with a quill, and a wide neck with eight or nine frets tied around it and sometimes several more frets (usually of wood) glued onto the soundboard. The fingerboard lies flush with the soundboard. The pegbox is usually curved or sickle-shaped, with the pegs laterally inserted. During the mid-19th century, the instrument was extensively redesigned (probably by the Monzino family of Milan). Single strings replaced the double courses, and the tension was increased; the fingerboard was slightly raised, fixed metal frets replaced tied gut, the spaces between the frets became slightly concave and the resonating chamber increased in size. This redesigned instrument has become widely known as the Milanese (or Lombardian) mandolin. The standard tuning is *g–b–e′–a′–d″–g″*.

Apparently there were few physical distinctions between the Italian mandola and the French MANDORE throughout the 16th century. Both were small, specialized members of the lute family, but were not treble lutes, which had six or more courses and the same interval pattern as other 16th-century lutes. The mandore and mandola were four-course instruments and the main difference between them may have been their tuning patterns. The mandore retained its distinctive pattern of 5ths and 4ths with a variable first course (usually *g″*, *f″* or *e″*), until its demise at the close of the 17th century. From the 17th century onwards the mandola/mandolino was tuned in 4ths, a pattern which it may have retained from the 16th century. These distinct tuning patterns

1. Mandolino (top) by Giovanni Smorsone, Rome, 1736, and (below) by Domenico Brambilla, Milan, 1768 (both Musikinstrumenten-Museum, Berlin)

were linked with the musical styles associated with each instrument.

The earliest definitive tuning information for the Italian instrument is found in a Florentine manuscript of *c*1650–70 (*I-Fn* Magl. xix 28), which is for a four-course mandola/mandolino tuned *e*′–*a*′–*d*″–*g*″. It cannot be discerned whether single or double courses were intended, but most surviving instruments have double courses. This was the standard tuning of the four-course instrument. For the five-course mandolino a *b* was added below the *e*′, and for the six-course instrument a *g* was added to that.

Until the late 18th century the mandolino was plucked with the fingers of the right hand. Evidence for finger-style technique is overwhelming in the musical sources, some manuscripts even providing specific right-hand fingerings. But with the development of the metal-strung, plectrum-played Neapolitan mandolin in the mid-18th century, players of the gut-strung mandolino began to use a plectrum, perhaps in an attempt to compete with the louder sounds produced by the new instrument. The first solid evidence of plectrum playing on the mandolino is found in Giovanni Fouchetti's *Méthode pour ... la mandoline à 4 et à 6 cordes* (Paris, 1771/*R*). Fouchetti's tutor is for the Neapolitan mandolin, but he applies the plectrum instructions to the six-course mandolino as well. At the end of the 18th century, plectrum playing on the mandolino became the norm; this style continued to be advocated in published tutors from the 19th and 20th centuries.

A surprisingly large number of 17th- and 18th-century *mandolini* survive in their original state, perhaps because their design and small dimensions rendered them unsuitable for conversion to the newer-style instrument. Many of those preserved in museums are erroneously labelled. The terms 'pandurina' (Praetorius' 1619 term for the mandore), 'soprano lute' and MANDORA are often found, perhaps because many reference works (such as those by Curt Sachs from the early 20th century) incorrectly limit the definition of mandolin to the later Neapolitan model. Beneath the mistaken labelling, however, are fine instruments by such excellent makers as Antonio Stradivari, Matteo Sellas, Carlo Bergonzi, Gennaro Fabricatore, Carlo Guadagnini, Antonio Monzino and Giuseppe Presbler (see Tyler and Sparks, 1989, pp.46–7 and Morey, pp.17–79).

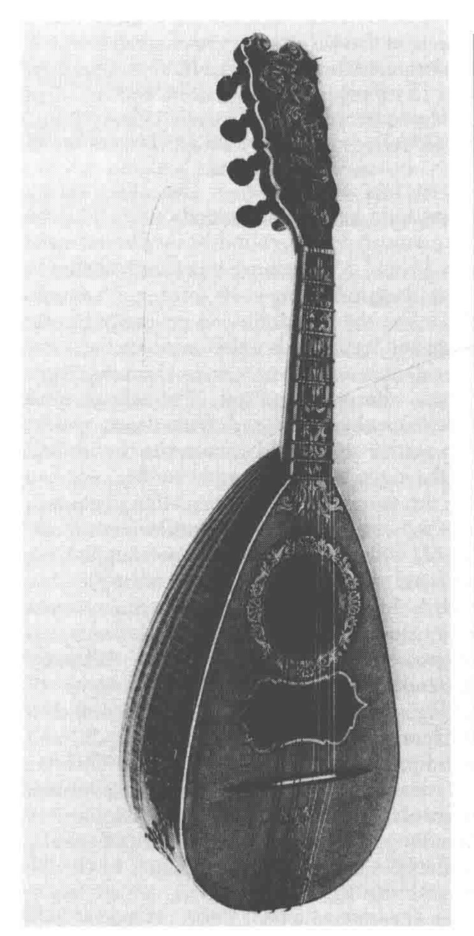
The earliest surviving music specifically for the mandolino/mandola is the Florentine manuscript mentioned above and another in the same hand (*I-Fn* Magl. xix 29). Both contain anonymous dance and popular music

2. Mandolino and cello: detail of 'The Music Party' (Frederick, Prince of Wales, and his sisters) by Philip Mercier, 1733 (National Portrait Gallery, London)

associated with the Medici court. There are several other anonymous manuscripts from centres such as Rome and Bologna, and they, as well as the few printed sources from the 17th century, contain similar musical material. Despite the humble nature of the surviving repertory from this period, records reveal the extensive use of the mandola-/mandolino in large and small ensembles from the mid-16th century, and in chamber music, cantatas, oratorios and operas by the end of the 17th. In the 1660s mandola players such as Gasparo Cantarelli and Domenico Melani della Mandola performed under the direction of Lelio Colista at S Marcello in Rome. And in the 1670s Antonio Quintavale performed in the oratorios there. At the same church in 1695 performances of C.F. Cesarini's oratorio *Ismaele* employed a mandola player. Elsewhere theatrical works by G.P. Franchi included a mandola, as did Alessandro Scarlatti's cantata *A battaglia, pensieri* (1699). There are many more 18th-century musical sources for the mandola/mandolino; these document its use in sonatas, partitas and concertos as well as in opera and oratorio. There are solo sonatas (usually with basso continuo accompaniment) by F.B. Conti, Carlo Arrigoni, Giuseppe Paolucci, Antonio Caldara, Giuseppe Valentini, Johann [Giovanni] Hoffmann and G.B. Sammartini, to name a few, as well as a rich selection of trios and quartets with one or two *mandolini* and varying combinations of string instruments by Hoffmann and Arrigoni. Concertos for solo mandolino and string ensemble include those by Cristoforo Signorelli, Hoffmann, Arrigoni, Hasse and, of course, Vivaldi (RV425), who also composed concertos for two *mandolini* (RV532) and for 'molti stromenti' (RV558), including two *mandolini*. A comprehensive list of repertory sources appears in Tyler and Sparks (1989, pp.54–65). The mandolino was used as an obbligato and colour instrument in operas and oratorios by F.B. Conti (*Il Gioseffo*, 1706; *Il trionfo dell'amicizia*, 1711; *Galatea vendicata*, 1719), Francesco Mancini (*Alessandro il grande in Sidone*, 1706), Vivaldi (*Juditha triumphans*, 1716), Fux (*Diana placata*, 1717), Antonio Lotti (*Teofane*, 1719), Francesco Gasparini (*Lucio vero*, 1719), Leonardo Vinci (*La Contesa de' Numi*, 1729), Handel (*Alexander Balus*, 1748), Hasse (*Achille in Sciro*, 1759) and Rinaldo di Capua (*La donna vendicativa*, 1771).

In sharp contrast to the attention received from some of the leading composers of the 18th century, by the 1820s virtually no music was composed for the mandolino, although it continued to be popular, especially in northern Italy. Around the middle of the century it was redesigned, probably in Milan, by the firm of Monzino. The new instrument was termed 'mandolino lombardo' or 'mandolino milanese'. The body was enlarged, the fingerboard raised and extended over the soundboard and the instrument provided with about 20 inlaid metal or bone frets, rather like contemporary guitars. A 'scratch plate' was set into the soundboard below the soundhole, since plectrum technique was then standard. Occasionally the instrument was given a guitar-like peghead with machine pegs, although viola-like pegs in a curved pegbox remained the norm. Most instruments had six single gut strings (the lower three overspun), although a few had double strings. The tuning remained the same as that of the 17th-century mandolino/mandola. There are many surviving examples of the new-style mandolino, but most are undated and little research has been done.

Journal and newspaper reviews from the second half of the 19th century indicate that the concert repertory of players of the *mandolino milanese* resembled that of contemporary guitarists: they played light salon music and arrangements of popular opera arias. By the 1880s, due in part to touring performers, such as the outstanding mandolino player Giovanni Vailati (*c*1813–90), both the Neapolitan mandolin and, to a lesser extent, the *mandolino milanese*, were becoming increasingly popular in middle- and upper-class society. In Florence a mandolin ensemble was formed in 1881 under the patronage of Queen Margherita; this ensemble featured one of the great virtuosos of the *mandolino milanese*, Luigi Bianchi (*d c*1909). Bianchi published a tutor for the instrument, and others were published by Giuseppe Branzoli, Ferdinando Francia, U. Giachi, Enrico Marucelli, G.B. Marzuttini, G.B. Pirani, O. Rosati and Agostino Pisani, most of whom were also excellent performers. The six-string *mandolino milanese* remained in common use until the end of World War I, when it fell into obscurity everywhere except northern Italy, having been superseded by the Neapolitan instrument. In the late 20th century it was still played by a handful of concert artists, including the Italian Ugo Orlandi (*b* 1958) and the Englishman Hugo d'Alton (1913–94), both of whom performed and recorded on both instruments.



In the second half of the 20th century there was a revival of interest in the Baroque finger-plucked mandolino, with its characteristic sound and its fine repertory; the instrument has been played in concert and recorded performances by such players as Robin Jeffrey, Linda Sayce and James Tyler.

2. THE NEAPOLITAN MANDOLIN. The 18th-century Neapolitan mandolin has a pear-shaped outline like the mandolino, but a much deeper, round-backed body, made up of between 11 and 35 sycamore or rosewood ribs. A distinctive new design feature is its bent, or 'canted', soundboard. Unlike the mandolino, it generally has an open soundhole and its bridge is a thin movable bar, over which run four double courses of strings, the lower three usually of brass, the upper of gut. The strings were invariably plucked with a quill (made from the stem of an ostrich or hen feather and held between the thumb and forefinger of the right hand). Wooden tuning pegs are inserted from the rear into a flat, guitar-like pegboard, and the strings are attached at the base of the instrument. The fingerboard, which lies flush with the soundboard, has ten metal frets, and several wooden frets are glued to the soundboard. In about 1835 the instrument was redesigned by Pasquale Vinaccia of Naples, who deepened the bowl for greater resonance, strengthened the body, raised and extended the fingerboard (fitting it with 17 frets), added high-tension steel strings (plucked with a tortoiseshell plectrum instead of a less robust quill) and replaced the tuning pegs with machine heads. This has remained the standard form of the mandolin, although two variants are also highly regarded: the mandolin with carved back and top, a violin-like design with a flat back (pioneered in the USA in the early 20th century by Orville H. Gibson); and the Roman mandolin, which has a curved, narrow fingerboard with 29 frets, and a scrolled head with tuning barrels (a design perfected by Luigi Embergher; see fig.4 below). These instruments all share the tuning *g–d′–a′–e″*.

The four-course instrument now called simply 'mandolin' or 'mandoline' was developed in Naples during the early 1740s, probably by the Vinaccia family (fig.3*a*). Because it was tuned in 5ths like a violin, the instrument was readily accessible to non-specialist musicians, and it soon became popular throughout Europe, its rise fuelled by the numerous Italian players (Signor Leoné [Leoni] and G.B. Gervasio being the most influential) who travelled widely between 1750 and 1810, teaching and giving concerts. In Paris the mandolin was frequently heard at the Concert Spirituel, and became fashionable among the aristocracy (Leoné, for example, was *maître de mandoline* to the Duc de Chartres). About 85 volumes of original mandolin music were published there during this period, including tutors by Gervasio (1767), Pietro Denis (1768–73), Leoné (1768), Giovanni Fouchetti (1771), and Michel Corrette (1772), all of which provide detailed technical information.

The mandolin was usually played in a seated position (Fouchetti recommended 'supporting the body of the mandolin against the stomach, a little to the right with its neck raised'), but when singers used it to accompany themselves, they often adopted a standing position, in which 'it is necessary to attach a little ribbon . . . to a button which is behind the underside of the neck' to support the instrument (Corrette). Fouchetti recommended gut strings ('the *chanterelles* of the pardessus de viole') for the *e″* course, brass harpsichord strings for the middle courses (plain brass for each *a′* string, and a pair plaited together for each *d′* string) and a pair of violin *g* strings (metal wound onto gut) for the lowest course. Alternatively, the lowest course might be strung in octaves (*g* and *g′*), Corrette observing that 'this tuning is the most common'. A distinctive tremolo technique (rapid down and up strokes on single notes, producing a quasi-sustained melody) was commonly used by Italian street musicians, but this was employed sparingly by 18th-century classical mandolinists; Denis noted that it served primarily 'to fill the value of the long notes which the composer demands . . . the tremolo must always have an unequal number of strokes, that is three, five, seven or more, according to the length of the note'.

As the instrument's popularity increased, the mandolin serenade became a regular feature in operas. Grétry's *Les fausses apparances* (1778), Paisiello's *Il barbiere di Siviglia* (1782) and Salieri's *Axur* (1788) all include such arias, although the most celebrated example is undoubtedly 'Deh, vieni alla finestra' in Mozart's *Don Giovanni* (1787). Well over 1000 mandolin duets, sonatas, trios and quartets survive from this period, as well as about 30 concertos, Hummel's Concerto in G major (composed in 1799 for the Italian virtuoso Bartholomeo Bortolazzi)

3. (a) Neapolitan mandolin by Antonio Vinaccia, Naples, 1772 (Victoria and Albert Museum, London); (b) André-François-Benoit-Elisabeth Leberthon, Vicomte de Virelade, playing a Neapolitan mandolin: portrait by Pierre Lacour (i), late 18th century (Musée des Arts Décoratifs, Bordeaux)

being the most substantial. The Revolution caused many foreigners to flee from France and brought the mandolin's popularity there to an end, but it continued to be widely played in Prague (for example, Beethoven wrote four pieces with keyboard accompaniment there in 1796) and in Vienna, where Bortolazzi lived during the early 19th century. Large collections of mandolin music from this period exist in manuscript in France (*F-Pc*, *F-Pn*), Sweden (*S-Uu*), Austria (*A-Wgm*) and Italy (*I-Gl*, *I-Ls*, *I-Mc*, *I-MTventuri*).

During the first half of the 19th century, the mandolin disappeared almost completely from the concert halls and opera houses of Europe. Pietro Vimercati (1779–1850) was the only internationally acclaimed soloist during this period, and Berlioz noted sadly in 1843 that, even at the Paris Opéra, a pizzicato violin was used for the serenade in *Don Giovanni*, the mandolin having been reduced to a mere stage prop. However, the instrument was still widely played in the south of Italy, above all in Naples, where street musicians habitually used mandolins (generally played tremolo-style) and guitars to accompany their songs. The bright piercing sound of steel strings, used from 1835 onwards, on the redesigned mandolin, suited tremolo-style playing particularly well. After the Reunification of Italy, this quintessentially Italian instrument became fashionable among the middle and upper classes as Queen Margherita's fondness for it helped to rekindle enthusiasm. By the 1880s most Italian towns possessed at least one mandolin orchestra, usually consisting of skilled amateurs led by a professional. Initially, their concerts consisted mostly of operatic transcriptions, waltzes and romances, generally played tremolo-style, but a repertory of original music began to develop in the late 1880s.

In 1892, the first national mandolin competition was held in Genoa. Its success inspired many Italian players to embark on international careers; among the most celebrated were the Roman Silvio Ranieri (1882–1956; fig.4) who settled in Brussels and the Neapolitan Laurent Fantauzzi (1870–1941) who became an influential teacher and player in Marseille. In the period preceding World War I, the mandolin became one of the most widely played instruments in northern Europe and the USA: Britain, France and Germany, for example, each had hundreds of amateur mandolin orchestras, of widely varying artistic standards. Two mandolinists were preeminent in Italy: Carlo Munier (1859–1911) of Florence, whose quartets, concertos and studies were fundamental in raising the instrument's technical and artistic standards; and Raffaele Calace (1863–1934) of Naples, whose mature orchestral and solo works became the cornerstone of the modern repertory. The Calace family were also fine makers of concert mandolins, their instruments being equalled in quality only by those of the Vinaccia family, the Roman luthier Luigi Embergher (1856–1943) and Orville H. Gibson (1856–1918) in the USA.

The performances of these mandolinists (and hundreds of others) encouraged composers to use the instrument in orchestral, operatic and chamber works. Verdi's use of a group of mandolins in *Otello* (1887) was followed by Spinelli (*A basso porto*, 1894) and Massenet (*Chérubin*, 1905), while Mahler's use of the instrument in his Seventh (1904–5) and Eighth (1906–7) symphonies and in *Das Lied von der Erde* (1907–9) was followed by its inclusion in works by Schoenberg, Webern, Hindemith, Krenek and Weill. Schoenberg used the instrument several times,

4. Silvio Ranieri playing an Embergher (Roman) mandolin

most notably in the Serenade op.24 (1920–23) and the *Variations for Orchestra* op.31 (1926–8). These composers used the mandolin primarily in the Italian manner, with melodic passages generally played tremolo-style.

As the international appeal of Italian mandolin music began to decline during the 1920s and 30s, German mandolinist-composers developed a distinct school, composing in a neo-Baroque style that made little or no use of tremolo. The instrument also became popular in Japan, with players initially performing Italian music but soon blending Western and Oriental styles to produce some intriguingly unusual compositions. Morishige Takei (1890–1949) was a pioneer in this respect. By the 1940s mandolinists such as Mario De Pietro (1896–1945), Maria Scivittaro (1891–1981), Hugo d'Alton (1913–94), and Konrad Wölki (1904–83) were enjoying successful careers as performers, teachers or composers. The mandolin was also being widely employed as a folk instrument, in such diverse styles as Bluegrass in the USA, notably by Bill Monroe (1911–96), and *choro* music in Brazil, especially by Jacob do Bandolim (1918–69). Later it began to be used in the Irish folk music revival and jazz. It has continued to be used in chamber and orchestral music, notably in works by Karl Hartmann (Sixth Symphony, 1951–3), Stravinsky (*Agon*, 1957 and the revised *Le Rossignol*, 1962), Gerhard (*Concert for Eight*, 1962), Boulez (*Pli selon pli*, 1957–62 and *Eclat*, 1965), Bernd Zimmermann (Cello Concerto, 1965–6), Ligeti (*Le Grand Macabre*, 1978) and dozens of works by Henze. The last composition by Krenek was a suite for mandolin and guitar, op.242 (1989).

The popularity of the mandolin has generally been underestimated by scholars because most performances have taken place outside the musical mainstream. But the Japan Mandolin Union had 10,367 members in 1995,

and in 1996 there were well over 500 mandolin orchestras in Germany. At the end of the 20th century the large number of contemporary works being written for the instrument as well as the rediscovery of its early repertory was encouraging musicians once again to regard the various forms of mandolin as serious and legitimate musical instruments.

3. Other types. *Bandola.* Flat-backed variant of the six-course mandolino, widely played in Colombia (*see* Bandola).

Bandolim. Flat-backed variant of the Neapolitan mandolin, widely played in Brazil and Portugal.

Bandurria. In 16th-century Spain, a small gittern-like instrument. By the end of the 18th century the bandurria had a flat back and five double courses tuned *c*♯*′–f*♯*′–b′–e″–a″* (i.e. a tone higher than the mandolino). It was played with a plectrum. The bandurria is still used in Cuba and Peru (*see* Bandurria).

Cremonese mandolin [Brescian mandolin]. An instrument with four single gut strings, a fixed bridge and Neapolitan tuning (*g–d′–a′–e″*). It was popularized by Bortolazzi in Vienna around 1800.

Flat-backed mandolin. A general term encompassing various instruments (such as the *bandola* and *bandolin*), encountered primarily in North and South America, where (unlike Europe and Japan) the round-back Neapolitan mandolin is not the standard form. Most important are the A-series and F-series Gibson mandolins, developed in New York by Orville H. Gibson (1856–1918), and perfected by Lloyd Loar (1886–1943) at the Gibson factory in Kalamazoo, Michigan. These instruments have adapted the priniciples of violin manufacture to the mandolin (notably in the use of f-holes, a bass bar, flat carved top and back plates, and an overall body shape loosely approximating to that of a violin), and they produce a guitar-like tone, with fewer harmonics than the traditional Italian design. This instrument (and its many imitations) has become the preferred form of mandolin in the USA, especially among non-classical players.

Genoese mandolin. Six-course mandolin, tuned *e–a–d′–g′–b′–e″* (an octave higher than a modern guitar). It was played during the 18th century, and Paganini composed at least three pieces for it.

Liuto [liuto moderno]. Large Neapolitan mandolin with five pairs of strings (tuned *C–G–d–a–e′*), 20 frets and a rich deep, powerful tone. Its design was perfected by Raffaele Calace.

Mando-bass. Very large bass mandolin with three or four strings tuned *E′–A′–D–*(*G*), usually held upright and supported on a spike. It is used occasionally in mandolin orchestras.

Mandoliola [tenor mandola]. Instrument slightly larger than a Neapolitan mandolin, tuned like a viola (*c–g–d′–a′*).

Mandoloncello [mandocello]. A mandolin tuned like a cello, designed to play in mandolin quartets and orchestras.

Mandolone. (i) Eight-course mandolin, tuned *F–G–A–d–g–b–e′–a′*. It was apparently developed by Gaspar Ferrari in Rome in the mid-18th century. (ii) Four-string bass mandolin (tuned *A′–D–G–c*), developed in the late 19th century by the Vinaccia family.

Octave mandola. Instrument slightly larger than a Neapolitan mandolin, and tuned an octave lower. It is often simply called a 'mandola'.

Quartini. Small Neapolitan mandolin, tuned a 4th higher than the standard instrument. It was intended for use in mandolin orchestras.

Terzini. Small Neapolitan mandolin, tuned a minor 3rd higher. It was intended for use in mandolin orchestras.

Tuscan mandolin [Florentine mandolin]. Instrument constructed like a Milanese mandolin, but with only four gut (and wound silk) strings, tuned like a Neapolitan mandolin.

Vandola. 18th-century Spanish word, derived from 'mandola', used for an instrument with six double courses tuned *d–g–c′–e′–a′–d″* and played finger-style.

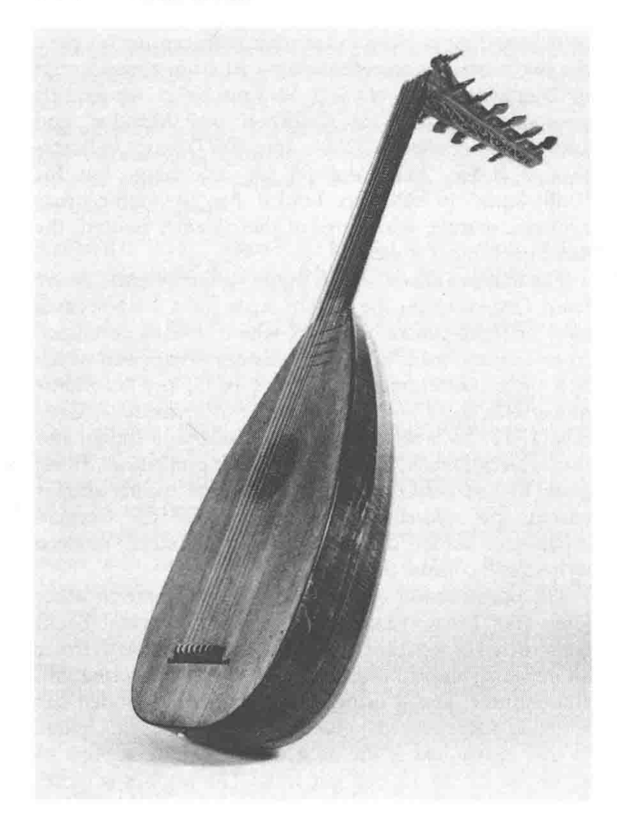
Mandolin harp. A chord zither with melody strings arranged in pairs rather than singly; it is also known as 'mandolin zither' or 'mandolin guitar zither'. *See* HARP ZITHER.

Mandolino. *See* MANDOLIN.

Mandolin piano. A BARREL PIANO with a mechanically driven repeating action.

Mandora [Calichon, Gallichon]. A type of bass lute of the 18th century used for continuo accompaniment and solos, particularly in Germanic regions. Much confusion surrounds the instrument and its repertory as a result of the overly casual use of the term by most 20th-century writers, starting at least as early as Galpin (1910) and Sachs (1913). Adding to the confusion, modern writers frequently apply the French term MANDORE to this instrument without any historical basis, since research shows that the latter term properly pertains to a small 16th- and 17th-century French type of treble lute. In fact, the term mandora is very rare before the late 16th century, when it is used either as a Latin term to refer to lute-type instruments of classical antiquity, or occasionally as an alternative to the Italian term *mandola* (*see* MANDOLIN).



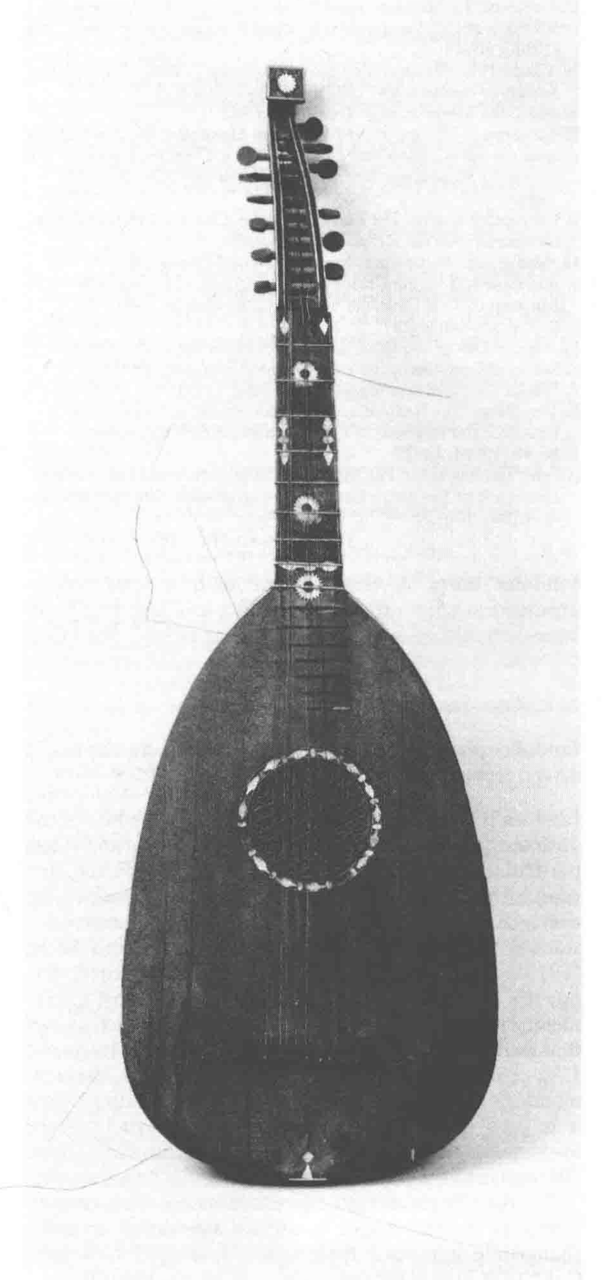
To make matters even more confusing, 18th-century Germanic writers began to use an alternative or interchangeable name for their newly-developed bass lute: CALICHON (the most common spelling used by writers), or one of its many variants (*calchedon*, *colachon*, *colocion*, *galizona*, *gallichon*, *gallishon* etc.). While mandora is the term found most often in German 18th-century sources, the two terms are sometimes equated, as in a manuscript in Donaueschingen (*D-DO* Mus.ms.1272) whose title page states that it is for 'Gallishon: oder Mandor', and another in Dresden (*D-Dl* Mus.ms.2/V/7) which indicates that it is for 'Mandora' on the title page, but for 'Gallichona' in the part books. But as 18th-century evidence reveals, whichever of these names is used, the same instrument is meant.

The name calichon and its many variants clearly derive from COLASCIONE, the Italian term for a long-necked, two- or three-course lute type, which Italians developed from an instrument of Middle Eastern origin, and which Mersenne (*Harmonicorum libri*, i, 1635, and *Harmonie universelle*, ii, 1636–7) and Walther (*Musicalisches Lexicon*, 1732) both referred to as *colascione* in Italian and *colachon* in French, Kircher (*Musurgia universalis*, 1650, plate VII) as *colachon* in Latin. Despite having similar names, the *colascione* is not related to the German instrument under discussion, although some modern writers still confuse the two.

The construction of the mandora is similar to other lutes (*see* LUTE, §2), having a vaulted body (back) constructed of separate ribs, a flat soundboard with either an integrally-carved rosette or one which is inserted into a soundhole, and a bridge consisting of a wooden bar acting as a string-holder glued to the soundboard. Unique to this instrument is the neck, which is long enough to allow for ten to 12 tied gut frets. The pegbox is either straight and set at a sharp angle to the neck (like a lute pegbox), or gently curving and set at a shallow angle, either case being fitted with laterally-inserted tuning pegs (although sometimes a flat pegboard with saggital pegs is found; see Morey, 1993, pp.66–76). The strings are of gut and are either single or, especially on Italian instruments, double courses. However, on German-made instruments, the first course (highest in pitch) is usually single (a *chanterelle*) and often has its own separate raised peg holder attached to the pegbox. The number of courses varies from five to eight, six courses being the most common requirement in music sources. Open string lengths tend to be fairly long (62–72 cm) on German instruments, but shorter (55–65 cm) on late Italian ones, probably because they tended to be tuned to a higher pitch.

At least 50 original instruments survive in collections around the world, however, as a result of the confusion surrounding the instrument, they usually are not recognized as mandoras. Many of these instruments are found in a more or less unaltered state, and therefore could be used as models for modern reconstructions. Examples are found in museums in Berlin, Claremont, California, Copenhagen, Edinburgh, The Hague, Leipzig, Milan, Munich and Paris.

The Germanic-style instruments are represented by such makers as Gregori Ferdinand Wenger in Augsburg (fig.1), Jacob Goldt of Hamburg, Jacob Weiss of Salzburg, David Buchstetter of Regensburg and Mattias Greisser of Innsbruck, all dating from about the first half of the 18th century. Italian-style instruments are represented by Martino Hell of Genoa, Enrico Ebar of Venice, David Tecchler of Rome, Antonio Scoti of Milan and, toward the end of the century, Antonio Monzino and Giuseppe Presbler of Milan (fig.2). (For a partial listing and some



1. Large mandora/calichon by G.F. Wenger, Augsburg, 1742 (Germanisches Nationalmuseum, Nuremberg)

details of instruments, see Morey, 1993, and Pohlmann, 1982.)

T.B. Janovka gave some of the earliest tuning information in his *Clavis ad thesaurum magnae artis musicae* (1701/*R*). Two tunings are reported: a 'galizona' or 'colachon' is tuned *A'*(♮ or ♭)–*B'*(♮ or ♭)–*C*–*D*–*G*–*c*–*e*–*a*, and, under a separate heading, 'mandora' is given as *D*(♮ or ♭)–*E* (♮ or ♭)–*F*–*G*–*c*–*f*–*a*–*d'* (i.e. the same tuning but a 4th higher). Clearly, for Janovka at the beginning of the century, the terms 'galizona' or 'colachon', and 'mandora' denoted similar instruments of different sizes. His galizona, with its deep-pitched tuning, must have had a very long vibrating string length of over 90 cm. Its tuning is the same as for the wire-strung English BANDORA, an instrument well-known in 17th-century north German states.

James Talbot (MS, *c*1690–1700, *GB-Och*) confirms the existence of such large instruments by giving the measurements of a 'colachon' owned by the Moravian composer Gottfried Finger. Its six single strings were tuned *C*–*D*–*G*–*c*–*e*–*a* with the sixth sometimes to *A'*, and with the remarkably long string length of 97–9cm. Curiously, his notes about the 'colachon' merely reiterate the information given by Mersenne and Kircher on the *colascione*, which was clearly for a very different type of instrument than the one which he had lately measured.

There do not seem to be any surviving instruments that fit either Janovka's or Talbot's low-tuned galizona or colachon, however later music sources for 'Gallichon', 'Calichon' etc. use the higher tuning of Janovka's mandora, as do some that actually specify mandora. It should be noted that the first five courses (which are the main fingered ones), have the same interval pattern as the top five strings of the modern guitar. The sixth course was variable and is sometimes tuned to *E*(♮ or ♭) or *D*. J.P. Eisel (*Musicus autodidaktus*, 1738, p.38) says that the 'Calichon' is tuned similarly to a 'Viola di Gamba': *D*–*G*–*c*–*e*–*a*–*d'*, but no known music calls for this arrangement of intervals. Johann Mattheson (*Das neu-eröffnete Orchestre*, 1713, p.277) gives *D*–*G*–*c*–*f*–*a*–*d'*, a pattern which, later in the century, was used at a tone higher by writers such as J.G. Albrechtsberger (*Gründliche Anweisung zur Composition*, 1790), whose tuning for 'Mandora' is *E*–*A*–*d*–*g*–*b*–*e'* (identical to that of the

2. Mandora from the Presbler workshop, Milan, 1783 (Fiske Museum, Claremont, CA)

modern guitar), with *D* and *C′* for seventh and eighth courses, respectively.

Tuning to this pitch is shown as early as 1756 in the A. Mayr tutor for 'mandora' (*I-Tr*; see Prosser, 1991). One source of about 1740 (*D-LEm* Ms.III.12.8) suggests a seven course tuning of *D–G–c–f–a–d′–f′* but, as the manuscript itself does not name a specific instrument and as it contains mainly lute tablature in the so-called D minor tuning (*see* SCORDATURA, §3), it is conceivable that this tuning for the first six courses is actually a variant tuning for the D minor lute. Following a 19th-century annotation on the cover of the manuscript, however, modern bibliographers list it as being for 'mandora' or 'mandore'.

The playing technique for the mandora involves the same right-hand finger style as for all 18th-century lutes and, because of the tuning intervals of the upper five courses, a left-hand technique that is similar to that of the 18th-century guitar (see Tyler, 1980, p.81). Music is notated either in so-called French tablature or in staff notation: bass clef for continuo accompaniments and, towards the later part of the century, treble clef for vocal accompaniments and soloistic passages in chamber music. The treble clef is meant to sound an octave lower than written, as is also customary in modern guitar notation.

Contemporary references to the mandora clearly indicate that it was commonly used for continuo, which makes a great deal of sense considering that its pitch and the flexibility afforded by its tuning made it ideal for playing the bass lines of the new musical styles of the late Baroque and early Classical periods. As well as chordal continuo accompaniments, it was also used to play single-line melodic basses, as a bassoon or cello would. What appears to be the first known music for it is the 'Colachono' obbligato part written in the bass clef to accompany an aria in J.S. Kusser's opera *Erindo* (1694; see Lück, 1960, pp.71–2). In 1709 Johann Kuhnau requested the purchase of a 'Colocion' for the Thomasschule in Leipzig in order to have more effective bass support for the singers (ibid., 73). Mattheson (op.cit., 277) highly recommends the 'calichon' over the normal lute for continuo support in chamber music, and Telemann wrote two concertos for two flutes and strings, for which the bass lines are marked for 'Calchedon' or bassoon.

In addition to normal continuo parts, the repertory contains many examples of fully composed accompaniments to vocal pieces, usually notated in the treble clef. The canzonetta 'Senza costrutto ho cara' (MS, early 19th century, *GB-Lbl* Add.17830) by Domenico Dragonetti is an example, with the accompaniment marked for 'mandora'. Treble clef notation is sometimes used for solos and chamber music, for example, in the 'duett for two mandoras' published in *The Philadelphia Pocket Companion for the guittar or clarinett* (Philadelphia, 1794). The parts for 'liuto' in G.F. Giuliani's six quartets for mandolin, violin, cello (or viola da gamba) and lute (*c*1799, *A-Wgm* and *I-Ls*), as well as in his six sonatas for two mandolins and basso (*GB-Lspencer*), seem to have been intended for the same instrument, since they are notated in the bass clef and, for soloistic passages, in the treble clef, with chordal configurations that are idiomatic for a mandora tuned to *e′* (see Tyler and Sparks, 1989, pp.51–2, 57, 60 and 62).

There are about 55 sources of mandora music in tablature, ranging in size from large collections to fragments, all in manuscript and nearly all of Germanic origin. They contain solos, duets, song accompaniments, and chamber music with a variety of other instruments. Few studies of these manuscript sources have appeared, and very little of the music has been transcribed and published despite its quality. Critical editions are especially rare. Many sources have no composer attributions, but a continuing study of concordances is beginning to uncover music by composers such as S.L. Weiss and Johann Anton Logy. The sources that do carry composers names list Duke Clement of Bavaria, P.C. von Camerloher, Johann Paul Schiffelholz, J.M. Zink, Andrea Mayr, G.A. Brescianello and others. Brescianello, a violinist and composer at the Stuttgart court (1716–55), was a composer of high quality music, whose music for mandora warrants a complete modern edition. Other composers in non-tablature sources include J.F. Daube (*Der musikalische Dilletant … Erste Band*, 1771) and Georg Friedrich Albrechtsberger, at least one of whose three concertinos for 'mandora', 'crembalum' (jew's harp) and strings has been recorded. Although the citations are far from complete or accurate, many sources are listed by Boetticher (1978) and Pohlmann (5/1982).

The mandora is worthy of re-investigation for its distinctive tone colour and general usefulness in German Baroque continuo practice and its solo and chamber music repertory, as well as for the information such a study would yield on the compositional style and technique of vocal accompaniment from the early 18th to the early 19th century. This vocal repertory, as found, for example, in *D-FS* Wey.692, includes the music of Dittersdorf, Süssmayr and Mozart.

JAMES TYLER

Mandore [Mandorre]. A small, treble-ranged member of the lute family with its own distinct tuning and repertory, which was used mainly in France from the middle of the 16th century to the end of the 17th. In some examples the pear-shaped body, short neck and peg box were carved from a single piece of wood. The bodies of most, however, were constructed with separate ribs like a lute. The fingerboard was flush with the flat soundboard, to which the flat bridge was glued. It normally had four single gut strings, but five and six were also found, sometimes with the lower ones in doubled courses like a lute (hence the contemporary term: *Mandore luthée*). The French were quite consistent in their use of the term 'mandore', but writers from the 19th century onwards have often mistakenly used the term 'mandora' to mean not only the instrument under discussion but the Italian *mandolino* and other lute-like instruments as well. (*See* MANDOLIN, §1 and MANDORA; the latter term is properly reserved for the large 18th-century German type of bass lute). Praetorius identifies the instrument using the German terms: *Mandürichen*, *Bandürichen*, *Mandoër*, *Mandurinichen*, *Mandüraen* and, uniquely, *Pandurina*.

The tuning employed was a combination of 4ths and 5ths with alternatives for the first string: *c′–g′–c″–g″*. The first could be tuned down a tone to *f″* (*à chorde avallée*; *see* CORDES AVALLÉES), or a minor third to *e″* (*accord en tierce*). These tunings are given by Mersenne (*Harmonicorum libri*, 1635), but Praetorius, (*Syntagma musicum*, ii, 1618, 2/1619/*R*) gives two five-course tunings: *c–g–c′–g′–c″*, and *c–f–c′–f′–c″*, and another four-course one: *g–d′–g′–d″*, all of which imply the existence of a somewhat larger but still treble instrument. While the characteristic 5th–4th tunings are found in all mandore music sources, an exception is found in the Scottish manuscript of John Skene, in which one group of pieces calls for 'the old tune of the lutt': *c′–f′–a′–d″–g″*. The pitch is unspecified in Skene, but the tuning was documented by James Talbot, whose manuscript (*c*1685–1701, *GB-Och*) shows that it was the same as the standard tuning of the first five courses of a Renaissance lute at the upper octave.

Contemporary descriptions and the music sources reveal that a variety of right-hand plucking techniques were employed: thumb, index and middle finger in lute fashion; index finger alone, with a small quill plectrum fastened to it; a plectrum held between the thumb and index finger, used exclusively or in conjunction with the middle or third finger. Left-hand technique involved fingering similar to that of the violin, or any other small instrument with a short open string length.

1. Four-course mandore, including indications of tuning: woodcut from Mersenne's 'Harmonie universelle' (1636–7) showing built-up mandore and a passage from the second 'Branle de Bocan' in Chancy's 'Tablature de mandore'

The origin of the mandore clearly derives from the small, late-medieval lute known as the GITTERN, which is seen in iconographic sources from all over Europe and England. In Germany it was known as the QUINTERNE, as illustrated by Virdung (*Musica getutscht*, 1511) and Agricola (*Musica instrumentalis*, 1529). We know nothing about the tuning of the gittern in this period. In later Spanish sources, such as Bermudo (*Declaración de instrumentos*, 1555) and Covarrubias (*Tesoro de la lingua castellana*, 1611), we learn that the term BANDURRIA was used for this type of instrument and that its three to five strings were tuned in 5ths and 4ths, though no specific pitches are given (see Tyler, 1981, p.23). The earliest surviving technical information from France is a tablature tuning chart for the 'mandore' in François Merlin and Jacques Cellier's manuscript (*Recherches de plusiers singularités*, *c*1583–7, *F-Pn* fr. 9152), which shows the later four-course instrument tuned in 5ths and 4ths, but gives no specific pitches.

The first known music for the instrument was Brunet's *Tablature de Mandorre* (1578) and Le Roy's *L'instruction pour la mandorre* (1585), both published in Paris, and both unfortunately lost. The earliest surviving music, dating from about 1626, is found in the manuscripts belonging to Anton Schermar. These sources contain a predominantly French repertory of airs and dances associated with the court of Louis XIII, as well as instructions for intabulating music for the mandore and

2. Mandore with six strings: detail from the 'Five Senses' ('Still Life with Chessboard') by Lubin Baugin, c1630 (Musée du Louvre, Paris)

lute. Indeed, all known sources specifically for mandore are in tablature. The beautiful print of Chancy's *Tablature de mandore* (1629), dedicated to Cardinal Richelieu, contains seven suites containing unmeasured preludes ('recherche'), courants, sarabands and branles. The Skene Manuscript (*c*1625–35) is the only surviving source to contain a significant number of items not of French provenance: many of the pieces are well-known Elizabethan and Jacobean items along with Scottish popular songs and dances, in addition to French and Italian items, all arranged for the mandore.

By the end of the 17th century the small mandore, with its distinctive tuning and playing technique, apparently was obsolete. The larger instruments mentioned in Talbot's manuscript, with lute-like tuning intervals more like Praetorius's 'Kleine Octavlaut' or the Spanish *vandola*, are described under the names 'mandore' and 'arch mandore' (although, confusingly, the overall classification is labelled 'mandole'). Talbot also gives a tuning of *c′c″–f′f″–a′a′–d″–g″* (without the measurements of a corresponding instrument), which is close to that of the small Italian *mandolino* of the period. Furetiere's *Essai d'un Dictionnaire* (1685) has no entry for mandore, just a sentence at the end of the entry for 'luth' which mentions the instrument in reference to the term 'luthée'. His *Dictionnaire universel* (1690) does include mandore, but the discussion mainly concerns classical etymology.

In the 18th century, Walther's *Musicalisches Lexicon* (1732) merely repeats information from Praetorius and Furetiere under the entry 'Mandola' and gives no indication that the instrument was in current use. This entry, apparently, was the first to equate the term 'Mandora' with mandore, even though Walther's German contemporaries were using the term mandora to mean a large bass lute. Most subsequent dictionary writers have copied Walther, hence the confusion which still hinders the study of these instruments to this day.

Joseph Carpentier's *1er Recueil de Menuets* (*c*1765) for the wire-strung 'guitthare Allemande' (*see* ENGLISH GUITAR) indicates that the music can also be played on the Spanish guitar and the 'Mandore'. While not enough research has been done to identify the precise nature of Carpentier's mandore, it is clear that it had no relation to the classic French mandore of the 16th and 17th centuries.

JAMES TYLER

Manduell, Sir **John** (*b* Johannesburg, 2 March 1928). English music educationist, composer and administrator. After studying at the University of Strasbourg, at Jesus College, Cambridge, and with Lennox Berkeley at the RAM, he worked in South Africa as conductor, composer and broadcaster (1954–6) and then joined the BBC in London as a producer. In 1961 he became head of music for the Midlands and East Anglia, returning to London in 1964 to coordinate the planning of the new BBC Music Programme. He remained chief planner until 1968, when he left the BBC to become the first director of music at the University of Lancaster and subsequently (1971) the first principal of the RNCM, remaining in the post until 1996. In 1994 he became the first chairman of the European Opera Centre. For 25 years he served as programme director of the Cheltenham Festival (1969–94). Other appointments have included the presidencies of the European Association of Conservatoires (1988–96), the British Arts Festivals Association (from 1988) and the National Association of Youth Orchestras (from 1996). He has served on British Council and Arts Council music panels and on international juries for music competitions, including those of UNESCO, the Prix Italia and various BBC competitions.

His compositions, chiefly for chamber and orchestral forces, include three Cardiff Festival commissions (String Quartet, *Prayers from the Ark* and Double Concerto) and the orchestral *Vistas*, commissioned by the Hallé Orchestra and first performed under Nagano's direction in 1997.

DAVID SCOTT/R

Mandürichen [Mandurinichen] (Ger.). *See* MANDORE.

Mandyczewski, Eusebius [Mandicevschi, Eusebie] (*b* Czernowitz [now Chernovtsy], 18 Aug 1857; *d* Vienna, 13 July 1929). Romanian musicologist active in Austria. The eldest son of a Greek Orthodox priest, he was educated in German schools and began to compose at an early age. After a period of conscription in the Austrian army, he went to Vienna University in 1875 and studied music history with Hanslick and music theory with Nottebohm. In 1879 he met Brahms, who became his lifelong friend and to whom he later became amanuensis. He succeeded Pohl as the director of the archives of the Gesellschaft der Musikfreunde, became director of the orchestra in 1892 and professor of music at the conservatory.

The decade 1887–97 saw the appearance of Mandyczewski's work on the Schubert Gesamtausgabe. His name is particularly associated with the ten volumes of songs, which he edited meticulously, sometimes printing as many as three or four variants of individual songs; in recognition of his editorship he was awarded an honorary doctorate from the University of Leipzig in 1897. A gifted philologist as well as musician, he was widely respected both for his scholarship and for his generosity to inquiring scholars; Grove was indebted to him for his help in the writing of his book on Beethoven's symphonies. Mandyczewski also brought out a second volume of Nottebohm's *Beethoveniana*, a series of pioneering essays in Beethoven scholarship that had been partly published in series in the *Musikalisches Wochenblatt* and partly left in manuscript.

In 1901 Mandyczewski married Albine von Vest, a lieder singer and singing teacher. For many years in the early part of the century he was the Viennese correspondent to the *Musical Times*. He was joint editor of the Brahms Gesamtausgabe with Hans Gál, and organized the Schubert exhibition of 1922 and the International Schubert Congress (1928); this last function greatly overtaxed his strength, and he died before the proceedings of the congress were published.

MAURICE J.E. BROWN

Manelli [Mannelli], **Francesco** (*b* Tivoli, 1595–7; *d* Parma, before 27 Sept 1667). Italian composer, singer, impresario and poet. Together with Benedetto Ferrari he was instrumental in establishing the tradition of public opera at Venice.

1. LIFE. Manelli began his musical career about 1605 as a chorister at Tivoli Cathedral, where he was later employed as a *cantore ordinario* from 1609 until February 1624. His father then sent him to Rome to pursue an ecclesiastical career; instead he married a Roman singer, Maddalena, and returned to Tivoli, where he worked as choirmaster of the cathedral from 1627 until the end of January 1629. Between 1629 and 1630 he and his wife were again living in Rome, where they lodged at the house of his teacher, Stefano Landi. From 18 May 1630 to before September 1631 Manelli was choirmaster of the Arciconfraternita di S Maria della Consolazione there. It is not known how long the Manellis stayed in Rome, but Maddalena's presence there was noted in a letter, dated 3 December 1633, from Fulvio Testi to Francesco I of Modena. In this letter, in which he was concerned to promote the rival claims as a singer of Francesca Campana, Testi mentioned that Maddalena had at one time been in the service of Duke Giovanni Antonio Orsini. By 1636 Maddalena had moved to northern Italy. On 11 April 1636 she sang the roles of Minerva and Cibele in the performance at Padua of *Ermiona*, an 'introduction to a torneo' with libretto by Pio Enea degli Obizzi and music by G.F. Sances. Later in the same year she published at Venice, 'ad istanza d'alcuni cavaglieri', a collection of her husband's music (op.4), which she dedicated to the English ambassador, Viscount Basil Feilding.

By 1637 Manelli had joined his wife at Venice, where he became associated with the composer and librettist Benedetto Ferrari. His setting of Ferrari's *Andromeda* was performed in 1637 for the inauguration of the Teatro S Cassiano, the first of the Venetian public opera houses. In this production he himself took the roles of Neptune and Astarco, while his wife sang the prologue and the title role. The opera was revived at Modena in 1656, presumably at Ferrari's instigation, for the opening of the Teatro della Speltà. Following the success of *Andromeda* Manelli and Ferrari collaborated again in 1638 to produce the opera *La maga fulminata*, and Manelli and his wife again sang in it. On 3 October 1638 he was admitted to the choir of S Marco, Venice, as a bass singer, with a stipend of 60 ducats (raised to 80 on 30 October 1639). His employment there did not, however, curtail his operatic activity. In 1639 he collaborated with Giulio Strozzi to produce *Delia* for the opening of the Teatro SS Giovanni e Paolo, and later in the same year he wrote the music for *Adone*, an opera once attributed to Monteverdi. He subsequently wrote only one further opera for Venice, *Alcate* (1642). In the intervening years, however, he may have been active in a touring company which performed Venetian operas at Bologna. In 1640, according to Osthoff (1958) and Petrobelli (1967), he acted as impresario for performances there of *Delia* and Monteverdi's *Il ritorno d'Ulisse in patria*. These performances were celebrated in a published collection of sonnets which reveals that his wife sang the roles of Venus in *Delia* and Minerva in *Il ritorno d'Ulisse* and that their young son Costantino also appeared in *Delia* in the role of Cupid.

In 1645 the Manelli family took up residence at Parma; Francesco and Costantino were admitted on 23 March to the choir of S Maria della Steccata, and Maddalena became a singer at the ducal court on 1 April. Francesco continued to work at the Steccata, certainly until 1665 and probably until his death. During his years at Parma he wrote a number of dramatic works for performance at the Farnese court theatre, including three for official court celebrations. In a preface to the libretto for *Le vicende del tempo* (1652) and again on the title-page of the libretto for *Licasta* (1664) he was described as choirmaster to the Duke of Parma. Pelicelli stated that he succeeded to this post on 1 March 1653, but, according to Petrobelli (1967), in the sole surviving official document for this date both he and his wife were described simply as 'musicians' in the service of the duke.

2. WORKS. Manelli was a key figure in the early development of Venetian public opera. Since, however, his operatic scores are lost, his achievement here cannot properly be assessed. Of his later court operas, the libretto of *Le vicende del tempo*, with its lavish spectacle and episodic structure, owes much to the tradition of the *intermedio*, and each of its three sections ends with a ballet. *La filo* has a more coherent plot, with well-developed characters, some of whom introduce an element of comedy; its three acts, based on events in the career of Hercules, are framed by four celestial *intermedi* which parallel and explicate the earthly events of the main drama. His surviving vocal music, which consists mainly of strophic arias and dance-songs, is written in a fresh, lively style. It also shows a penchant for the use of ostinato basses, as can be seen in the two-part strophic aria *Che mi potrai tu far*?, in which a five-bar bass is stated four times. Among the strophic ciacconas only *Con lieto balleno* (1636) is not founded on an ostinato; *Ami chi vuol costar*? (1636) is written over the so-called chaconne bass and *Acceso mio core* (1629) over a freely invented four-note ostinato, while *O sfortunata, chi mi consola*? (*La Luciata*) is based on the descending tetrachord ostinato *f–e–d–c*. This piece, published in Manelli's op.4 (1636), is a setting of a strophic dialogue text for two *commedia dell'arte* characters, Cola (Coviello) and Lucia, who are joined by a third voice for the imitative refrain

and final ensemble. In a note to the reader, printed at the end of the 1636 volume, Manelli stated that, using an academic name, he had previously published *La Luciata* under the title *Carro trionfale* and that in this earlier version he had left the third voice to be added by adapting the notes of the continuo part to the words of the refrain and final ensemble. He had now resolved to republish the work as it should be performed – with the figuration of the third voice conforming to those of the other two. An earlier published setting of this unusual dialogue text does indeed survive, under the title *Il carro di Madama Lucia* (Rome, 1628) by 'Il Fasolo'. The idea that this might have been Manelli's earlier setting has, however, been shown to be false, and the 1628 publication has been positively ascribed to G.B. Fasolo (see Luisi).

WORKS

OPERAS

music lost

Andromeda (dramma, B. Ferrari), Venice, S Cassiano, 1637, before 25 Feb, lib ded. 6 May 1637 (Venice, 1637)

JOHN WHENHAM

Manelli, Maddalena. Italian musician, wife of FRANCESCO MANELLI.

Manén, Joan [Juan] (*b* Barcelona, 14 March 1883; *d* Barcelona, 26 June 1971). Catalan violinist and composer. Precociously gifted, he learnt solfège and piano with his father from the age of three, and at seven played Chopin concertos in public. Meanwhile, at five, he had begun to study the violin with Clemente Ibargueren; he rapidly attained astonishing technical mastery and at the age of nine made his début in Latin America. He made his European début as a violinist in 1898, when he was hailed as a virtuoso of the first rank; he later made five world tours.

Almost entirely self-taught as a composer, Manén had begun to write at 13, and in 1900 he conducted a concert of his own works in Barcelona. His first opera, *Juana de Nápoles* (produced when he was 19), was well received at the Barcelona Liceu, and he immediately followed this with *Acté*, for which (as for all his later operas) he wrote his own libretto. He then spent time in Germany, where he acquired an admiration for Wagner and Richard Strauss, which can be observed in his orchestral writing. Strauss's influence on his harmony can also be particularly heard in his songs. He composed prolifically in many genres, but later destroyed, disowned or radically revised everything he had composed before 1907. This led him, for example, almost completely to rewrite *Acté* – increasing the complexity of the texture – as *Neró i Acté*.

Manén made numerous arrangements, both instrumental and vocal, of Spanish and Catalan folk melodies, and traditional dance styles (e.g. the *sardana*) appear in his works. His music is tonal in idiom and predominantly lyrical, and there are often thematic connections between movements. His writings include many articles in Spanish and French periodicals and a treatise on the violin. In 1927 he became a member of the Spanish Academy of Arts; among many other awards and honours, there has been a plan to name a new concert hall in Barcelona after him.

WORKS

(*selective list*)

op. A – *work acknowledged by the composer*

STAGE

librettos by Manén unless otherwise stated

Juana de Nápoles (op, 1, M. Chassang), Barcelona, Liceu, Jan 1903

LIONEL SALTER

Manenti, Giovanni Piero [Giampiero, Giovampiero] (*b* Bologna; *d* Florence, 18 July 1597). Italian composer and organist. On 12 March 1557 he was appointed organist at S Giovanni, Florence. In December 1570 he applied for the post of *maestro di cappella* to the Knights of St Stephen in Pisa, but intervention by the Medici kept him from leaving Florence. On Corteccia's death (7 June 1571) he became *maestro di cappella* at S Giovanni, but he resigned less than six months later to become organist at Florence Cathedral, a post he held from 4 December 1571 until his death. He was also a musician at the Florentine court and composed on at least one occasion for the Compagnia di S Giovanni Evangelista in Florence (his six *intermedi* for Giovanni Maria Cecchi's *Coronazione di Saulo*, performed in 1569, are now lost). He published four books of madrigals, which are typically Florentine in including settings of texts by the best poets, among them Boccaccio, Petrarch, Sannazaro and Tasso; *Per pianto la mia carne si distilla* (words from Sannazaro's *Arcadia*) and *Non di morte sei tu* (Tancredi's lament for Clorinda from Tasso's *Gerusalemme liberata*), in *Madrigali ariosi* and *Li Pratolini* respectively, are notable examples in this respect. Half of *Li Pratolini* is made up of settings of a series of 12 poems by the Florentine Palla Rucellai in honour of the Villa Medici at Pratolino, which Francesco I de' Medici had had built for Bianca Cappello long before she became Grand Duchess of Tuscany. According to Einstein, Manenti's style was much influenced by Marenzio (especially by his more pastoral works) and is somewhat like that of Wert. His granting to the highest voice of his polyphonic ensemble a greater expressiveness and more pointed declamation anticipated to some degree the Florentine monodic style and is thus highly pertinent to the history of music in Florence in the late 16th century. He was evidently much interested in colouristic effects in the madrigal, but any potential excesses in this direction were precluded by the general seriousness and restraint, in the Florentine fashion, which are hallmarks of his work. In his *Madrigali ariosi* he also anticipated the cross-fertilization of vocal polyphony by dance music that was soon to be cultivated so assiduously by Gastoldi and others. He was clearly a composer of standing in his own day: he was praised by Scipione Cerreto in his *Della prattica musica* (1601), and his music was published in Germany and the southern Netherlands, some of it more than 35 years after his death.

EDMOND STRAINCHAMPS

Mánes Music Group [Cz. Hudební skupina Mánesa]. Group of Czech musicians in the interwar years. It took its name from the group of graphic artists (itself named after a prominent 19th-century Czech family of painters) whose aim was to promote progressive trends in Czech art. The music group, comprising the composers Iša Krejčí, Bořkovec, Ježek and František Bartoš (ii) and the pianist and writer Holzknecht, began its activities on 16 December 1933 with a concert of settings of poems by Vítězslav Nezval. Although it drew its inspiration primarily from French music and culture (specifically modelled

on Les Six), the group also promoted neo-classical composers such as Stravinsky and Hindemith, Schoenberg (performing *Pierrot Lunaire* in 1934) and the music of the Russian avant garde. The group broke up in 1939 after the Nazi occupation and Ježek's emigration. Remaining members joined the group *Přítomnost* ('The Present').

JOHN TYRRELL

Manfredi, (Giovanni) Filippo (Tommaso) [Filippino] (*b* Lucca, 8 March 1731; *d* Lucca, 12 July 1777). Italian violinist and composer. He came from a musical family. His father Giovanni Carlo and brother Pietro Luigi were horn players, while another brother, Vincenzo Ferrerio, was a flautist. All were members of the Cappella di Palazzo, the most prestigious musical institution in 18th-century Lucca. He was educated at the seminary school of S Michele in Foro in Lucca before studying the violin in Genoa with Domenico Ferrari (1742) and in Livorno with Pietro Nardini (1745–6). He was a supernumerary violinist in the Cappella Palatina and was appointed first violinist in 1758. His appearances with this Lucca orchestra alternated with busy musical activity in cities such as Siena, Pisa, Livorno, Florence and Venice, but he was frequently in Genoa, where he played in theatres, served as chief instrumentalist for religious functions and taught. After playing in a quartet with Nardini and Cambini in 1765, Manfredi formed a duo with Boccherini and began a concert tour which took him first to Paris in 1768 (he appeared twice at the Concert Spirituel) then Madrid, to the court of the Prince of the Asturias, where he was appointed first violin of the chamber music. He returned to Italy in 1772 and was re-admitted to the Cappella Palatina only in 1773. However, he fell ill in 1775, and his concert appearances became much less frequent. He died two years later.

A violinist of technical and expressive brilliance, he retained his reputation until the middle of the 19th century. His compositions have the characteristics of the *galant* style, using monothematic or bithematic pre-Classical sonata forms, with no development but plenty of appealing interludes. The melodic style is short-breathed, with continual ornamentation and *galant* rhythmic clichés. His sonatas also feature a structure which uses recurring material, but not in the same way as Boccherini's cyclical form. Rather than the themes recurring periodically, entire movements are repeated and reworked over the course of the composition. These forms typically juxtapose parts of a sonata-form movement with sections of a slow or of a dance-form movement. The violin technique is highly advanced, with clear affinities to the music of Nardini and Paganini, such as in the use of bowing techniques like *flautando* and *sul ponticello*.

WORKS

6 Sonatas, vn, b, op.1 (Paris, 1769)
[11] Sonatas, vn, b, *I-Li*, 1 ed. G. Luporini (Milan, 1939); Sonata, E♭, vn, b, *A-Wgm*; Duetto notturno, B♭, 2 vn, *I-Gl*, also *Pca*, *Mc*, attrib. L. Boccherini; Piccolo Trio, vn, va, vc, B♭, *Sac* [modern transcription by Mario Fabbri, orig. lost]

CARLO BELLORA

Manfredi, Lodovico (*b* Guastalla, nr Parma; *fl* 1620–38). Italian composer. He was a Franciscan friar and is known by three volumes of sacred music: *Il primo libro di concerti ecclesiastici a due, tre, quattro e sei voci, con una messa a cinque concertata*, with organ continuo (Venice, 1620; 2/1623); *Dulcisona cantica ad Dei, et suae immaculatae genetricis honorem*, for solo voice and continuo, op.2 (Venice, 1633); and *Concerti ecclesiastici a 1–5 voci . . . libro secondo*, op.3 (Venice, 1638).

Manfredina. *See* MONFERRINA.

Manfredini, Francesco Onofrio (*b* Pistoia, 22 June 1684; *d* Pistoia, 6 Oct 1762). Italian composer. His father, Domenico, was a trombonist at Pistoia Cathedral from 1684. Francesco studied music at Bologna in his youth, taking violin lessons from Torelli and lessons in counterpoint (at that time virtually synonymous with composition) from Perti. Shortly before 1700 he left for Ferrara, probably because of the dissolution of the S Petronio orchestra in 1696. In Ferrara he became first violinist at the church of the Holy Spirit. On returning to Bologna in 1703 he joined the reconstituted orchestra, initially as an occasional violinist and from 1709 to 1711 as a regular member. In 1704 he was admitted as a player (*suonatore*) to the Accademia Filarmonica. His first publication, a set of 12 chamber sonatas entitled 'Concertini', dates from the same year. There is evidence of a visit, or at least a planned visit, to Venice in February 1707, for the accidental death by drowning of his colleague Giuseppe Aldrovandini occurred as he was on his way to join Manfredini before the latter's departure.

In 1711 Manfredini became attached to the court of the music-loving Antoine I Grimaldi, Prince of Monaco, where he was active as a composer and performer of instrumental music. Five children were born to him in the principality between 1712 and 1723. During this period he maintained close contact with, and perhaps sometimes visited, Bologna, where his op.3 concertos were published in 1718 and two oratorios were performed a little later. In 1724 he moved to Pistoia to become *maestro di cappella* at the cathedral. During his tenure of this post, which lasted until his death, he emerged successful from many disputes with the cathedral chapter and with the musicians under him. In Pistoia Manfredini had the opportunity to continue his activity as a composer of oratorios, which were performed at local churches, in addition to writing many sacred works for liturgical use at the cathedral and elsewhere.

Although Manfredini was clearly a prolific composer, only his published instrumental music, together with a handful of other instrumental works in manuscript, survives. The loss of his nine known oratorios is especially unfortunate. His idiom is firmly Bolognese in character and resembles that of Torelli, B.G. Laurenti, Perti and other members of the school associated with S Petronio, though his music lacks the stamp of a forceful personality and in that respect is inferior to Torelli's. Venetian influence has been discerned in his use of unison writing,

and the op.3 concertos did not go unmarked by Vivaldi, despite their greater debt to Torelli. The ending of both the op.2 *Sinfonie da chiesa* and the op.3 concertos with a Christmas pastorale (whose Torellian antecedent is only too patent) deserves mention. These so-called 'sinfonie', with an optional viola part, are ordinary church sonatas; the 'solo' or 'soli' cues in the violin parts merely tell the player that his part is momentarily exposed. The best of Manfredini's instrumental works are the six sonatas published in London in 1764 (but not necessarily composed late in the composer's life). These are worthy examples of the 'mixed' type of sonata juxtaposing church and chamber elements that became normal after 1700.

WORKS

INSTRUMENTAL

[12] Concertini per camera, vn, vc/theorbo, op.1 (Bologna, 1704)
1 trio sonata in Corona di dodici fiori armonici (Bologna, 1706)

MICHAEL TALBOT

Manfredini, Vincenzo (*b* Pistoia, 22 Oct 1737; *d* St Petersburg, 5/16 Aug 1799). Italian composer and writer on music. He studied music first with his father, F.O. Manfredini, and then with Perti in Bologna and Fioroni in Milan. In 1758 his brother Giuseppe, a castrato, went with Locatelli's opera troupe to Moscow, where he stayed until 1766 as a fashionable singing teacher, later living in Bologna. Vincenzo went with him, possibly as one of the troupe. Moving to St Petersburg, he became *maestro di cappella* to Pyotr Fedorovich, who on becoming emperor in 1762 made him *maestro* of the court's Italian opera company. Confirmed in this post by Catherine II, he composed operas and occasional works, but on Galuppi's arrival in 1765 he was relegated to composing the ballets performed with Galuppi's operas and to serving as harpsichord teacher to Paul Petrovich, heir to the throne. His six harpsichord sonatas (St Petersburg, 1765), dedicated to Catherine, were reviewed unfavourably by J.A. Hiller in *Wöchentliche Nachrichten* (21 Oct 1766). In 1769 he returned with a pension to Bologna.

After two further attempts at opera, Manfredini devoted himself mainly to writing and teaching, also publishing a set of symphonies (1776) and string quartets (?1781). From 1785 to 1789 he was a contributor to *Giornale enciclopedico di Bologna*, a publication devoted to cultural renewal. When Paul became emperor in 1796, he summoned his former teacher, who arrived in September 1798, but took up no post and died the next year.

Manfredini's *Regole armoniche, o sieno Precetti ragionati* (Venice, 1775), which is in two parts, an introduction to the elements of music and to keyboard accompaniment, now appears to have been drawn substantially from a 17th-century manuscript. His observations on the proper method of teaching singing aroused vigorous opposition from G.B. Mancini. The second edition (Venice, 1797) was much revised and enlarged with new sections on singing and counterpoint. In April 1785 Manfredini reviewed the first volume of Esteban de Arteaga's *Le rivoluzioni del teatro musicale* (Bologna, 1783) in the *Giornale enciclopedico di Bologna*. In his third volume Arteaga reprinted extracts from this critique with acerbic commentary, leading Manfredini to publish his *Difesa della musica moderna* (Bologna, 1788/*R*), a commentary on Arteaga's commentary. While ostensibly an episode in the *querelle des anciens et des modernes*, with Manfredini defending modern music against Arteaga's charges of decadence and insistence on classical ideals, this often bitter debate is better understood as a response to changing socio-political contexts for music, including a redefinition of the social status of the composer, the emergence of music criticism, and the role of music in public life. Whether he is arguing for nature over artifice, as in his debate with Mancini, or for the progress of modern music, particularly the ascendency of instrumental music, Manfredini reveals a tendency towards Enlightenment modernism that suggests the influence of Rousseau.

While in Russia, Manfredini married the singer Maria Monari, and they had a son, Giovanni (*b* *c*1769), who later wrote a biographical note on his father. Autobiographical material by Vincenzo is held at the Accademia Filarmonica, Bologna. Vincenzo's daughter Antonia Elisabetta (*b* ?1786) had a highly successful career as a prima donna during the Rossinian period.

WORKS

OPERAS

Semiramide riconosciuta (dramma per musica, 3, P. Metastasio), Oranienbaum, sum. 1760
La musica trionfante (pastorale, L. Lazzaroni), St Petersburg, 1761
Olimpiade (Metastasio), Moscow, 13/24 Nov 1762, 6 arias, 1 duet (Nuremberg, n.d.), 2 arias in *Recueil lyrique d'airs choisis* (Paris, 1772)
Carlo Magno (L. Lazzaroni), St Petersburg, 1763; rev. 1764
La finta ammalata (int, ? C. Goldoni), St Petersburg, 1763
La pupilla (int, Goldoni), St Petersburg, 1763
Armida (J. Durandi, after T. Tasso: *Gerusalemme liberata*), Bologna, Comunale, May 1770
Artaserse (Metastasio), Venice, S Benedetto, Jan 1772, *F-Pn*, *P-La*

BALLETS

Amour et Psyché, Moscow, 20/31 Oct 1762
Les amants réchappés du naufrage, St Petersburg, 1766
Le sculpteur de Carthage, St Petersburg, 1766
La constance recompensée, Moscow, 1767

OTHER VOCAL

Cants.: La pace degli eroi (Lazzaroni), St Petersburg, for peace with Prussia, 3/14 June 1762; ? Il consiglio delle muse (serenade, Locatelli), Moscow, 21 April/2 May 1763; Le rivali (Lazzaroni), 28 June/9 July 1765; Cant, for inauguration of building of Academy of Sciences, St Petersburg, 1765
Sacred: Esther (orat), Venice, 1792; Requiem, for Empress Elizabeth, 1762; Messa funebre, 4vv, insts, *I-PS*; Laudate Dominum, S, vv, orch, *Baf**
Other works: canons, 3vv, b, *I-Nc*; duets, *CZ-BER*; arias, *CH-Gc*, *D-Dl*, *DK-Kk*, *I-PS*

INSTRUMENTAL

Concerto, B♭, hpd (The Hague and Amsterdam, ?1769; London, before *c*1786), ed. A. Toni (Milan, 1957)
6 syms. (Venice, 1776) [reviewed in *Efemeridi letterarie di Roma*, v (1776), 404; nos. 1, 2, ?6 extant]
6 str qts (Florence, ?1781); str qt, *I-Rc*; 6 trios, 2 vn, b, *S-HÄ*, *Sk* (1–4)
6 hpd sonatas (St Petersburg, 1765), ed. A.M. Pernafelli (Milan, 1975) [incl. fasc.]
Other hpd: sonata, G, *I-Bsf*; fugue, *D-Bsb*

THEORETICAL WORKS

Regole armoniche, o sieno Precetti ragionati (Venice, 1775, enlarged 2/1797) [incl. 14 hpd preludes]

DENNIS LIBBY/REBECCA GREEN

Manfredini-Guarmani, Elisabetta (*b* Bologna, 1790; *d* after 1817). Italian soprano. After making her début in 1809 at Bologna, she created roles in four operas by Rossini: Amira in *Ciro in Babilonia* (1812) at Ferrara; Amenaide in *Tancredi* (1813) and Aldimira in *Sigismondo* (1814) at La Fenice, Venice; and the title role of *Adelaide di Borgogna* (1817) at the Teatro Argentina, Rome. At La Scala she created Mandane in Paer's *L'eroismo in amore* (1815) and sang the title role of Mayr's *Ginevra di Scozia* (1816). She also sang in Turin. To judge from the music composed for her by Rossini, she had a voice of exceptional flexibility.

ELIZABETH FORBES

Manfred Mann. English pop and rhythm and blues group. Its principal members, Manfred Mann (Manfred Sepse Lubowicz; *b* Johannesburg, 21 Oct 1940; keyboards and vibraphone), Mike Hugg (*b* Andover, 11 Aug 1942; drums), Paul Jones (Pond; *b* Portsmouth, 24 Feb 1942; vocals and harmonica), Mike Vickers (*b* Southampton, 18 April 1941; clarinet and saxophone), Tom McGuinness (*b* London, 2 Dec 1941; bass guitar) and Michael D'Abo (*b* Betchworth, Surrey, 1 March 1944; vocals), were jazz and blues enthusiasts. The group enjoyed considerable commercial success between 1964 and 1969 with a highly derivative yet energetic and appealing series of pop hits. In concert, however, the emphasis was placed on soul jazz and rhythm and blues numbers. They first achieved success with a novelty tune, *5–4–3–2–1* (HMV, 1964) which was written as a television theme; later hits, such as *Pretty Flamingo* and *Oh No Not My Baby*, drew from the soul music repertory. Jones was an enthusiastic rather than precise interpreter of such songs and, after his replacement in 1966 by D'Abo, Manfred Mann's recordings veered towards pop and rock titles such as Bob Dylan's *Mighty Quinn* and *Semi Detached Suburban Mr Jones*.

When the group split up in 1969, Hugg and Vickers went on to compose music for films and television while D'Abo recorded a critically acclaimed album *Down at Rachel's Place* (A & M Hor., 1972). In 1979 Jones and McGuinness formed the Blues Band to re-create nostalgically the sound of 1960s rhythm and blues. Mann himself established Manfred Mann's Earth Band to perform in a progressive rock style, and in 1991 he issued *Plains Music* (Kaz), an album involving traditional South African instruments and themes.

DAVE LAING

Manfroce, Nicola Antonio (*b* Palmi Calabro, 20 Feb 1791; *d* Naples, 9 July 1813). Italian composer. He was a pupil of Giovanni Furno and Tritto at the Conservatorio dei Turchini, Naples, from 1804 and then of Zingarelli in Rome. He was active in Naples (then under French rule), and his first work was a cantata for Napoleon's birthday, *La nascita di Alcide*, performed at the Neapolitan court on 15 August 1809. His first opera, *Alzira* (1810, Rome), was followed by his masterpiece, *Ecuba* (1812, Naples), commissioned by the impresario Barbaia. His librettist was Giovanni Schmidt, whose translation from Sophocles had been used by Sacchini for *Oedipe à Colone*, performed in Naples at the S Carlo in 1808 and one of the most spectacular examples of the new style favoured in Murat's Naples. Manfroce's subject was taken from a tragedy by Milcent, a version of the Achilles and Polyxena episode in the Trojan war, and is explicitly a derivation from the French operatic tradition. It was a courageous choice for the young composer to make, in preference to the Neapolitan tradition represented by his master Zingarelli. According to Florimo, he was perhaps influenced by hearing the Naples performance of Spontini's *La vestale* in 1811. *Ecuba*, in spite of the characteristic unevenness of the first work of a young composer, shows that he would have been capable of great achievement, had he not died so young. Progressive features of his style include the use of recitatives, always with accompaniments including wind instruments, and the bipartite aria, often producing great dramatic concision (in spite of the inferior quality of the libretto). Arias and duets come within the acts, not at the end of them; and choruses are used in such a way as to heighten the tragedy of the individual characters by giving it wider resonance.

WORKS

Alzira (dramma per musica, 2, G. Rossi), Rome, Valle, 10 Sept 1810, *I-Nc*, *Rsc*

Ecuba (tragedia per musica, 3, G. Schmidt), Naples, S Carlo, 13 Dec 1812, *Nc*, *Rsc*

RENATO BOSSA

Mangaréva. *See* POLYNESIA, §II, 3(iv).

Mangean, Etienne (*b* c1710; *d* Paris, ?c1756). French violinist and composer. The first extant reference to him is in a privilege granted in December 1734 for the publication of instrumental pieces, in which he is simply identified as 'maître de musique'. However, on the title-page of his *Concert de simphonie* of 1735 he is described as 'ordinaire de l'Académie de musique de Dijon'. By 1738 he was established in Paris: he is listed in the *Mercure de France* among violinists who 'shine with renown'. He later lived in Paris, as shown by his solo appearances at the Concert Spirituel in 1742, 1743 and 1749 and his membership in several orchestras: the Concert Spirituel (at least 1750–55), the theatre orchestras at the fairs of St Laurent and St Germain (from about 1744) and the Opéra-Comique in 1753. It may be that Mangean had the patronage of Armand-Louis, Duke of Aiguillon, for several of his manuscripts are now in that family's archives in Agen. Titon du Tillet reported that Mangean frequented the salon of Demoiselles Duhallay. Although a privilege issued to Le Clerc in 1765 still mentioned works by Mangean, there are no references to the latter's activities after 1756.

Mangean's works reflect both the movement towards the Classical symphony and the growing foreign influence on French music. His *Concert* consists of French suites whose tutti-solo indications reveal their orchestral origins. The style of his later works, *Simphonies en trio* and *Sonates à deux violons égaux*, however, includes Italian rhythmic devices such as successive duple and triple divisions of the beat. Unpublished documents refer to an unknown concerto by Mangean (see Machard), and if the symphony in manuscript at Agen is his, it would put him among the earliest French symphonists.

WORKS

Concert de simphonie, 2 vn/fl/ob/other insts, bc, suitte 1ère(-2me) (Paris, 1735); 4 other suites announced, not pubd

[6] Sonates, 2 vn, op.3 (Paris, 1744)

PEGGY DAUB

Mangeant, Jacques (*d* ?1633). French printer. His father was probably Simon Mangeant (*d* between 1583 and 1593), who printed only two volumes with music: one of the many editions of Marot and Bèze's psalms published in 1562, and *Cantiques spirituels*, printed for Estienne Martin in 1565. Jacques Mangeant printed from 1593 to 1633 in Caen. In 1593 he printed the *airs* of Guillaume de Chastillon, who had obtained a privilege in 1590, and in 1611 a further volume following Chastillon's death. The only other music to come from Mangeant's press was a small group of anthologies of *airs* and *chansons à dancer* (RISM 1608[7], 1608[8], 1608[9], 1615[8], 1615[9], 1615[10]). His son Eleazar Mangeant does not appear to have printed any music.

STANLEY BOORMAN

Mangelsdorff, Albert (*b* Frankfurt, 5 Sept 1928). German jazz trombonist and bandleader. He learnt the violin as a child and taught himself the guitar; his brother, the alto saxophonist Emil Mangelsdorff, introduced him to jazz. After working as a jazz guitarist, Albert took up the trombone (1948). In the 1950s he played with the bands of Joe Klimm (1950–53), Hans Koller (1953–4), with the radio orchestra of Hessischer Rundfunk in Frankfurt (1955–7) as well as with the Frankfurt All Stars (1955–6). At the same time he led a hard bop quintet together with Joki Freund. In 1958 he became the musical director of the newly-founded Jazz Ensemble des Hessischen Rundfunks and represented Germany in Marshall Brown's International Youth Band. In 1961 he formed a quintet with Heinz Sauer, Günter Kronberg, Günter Lenz and Ralf Hübner which became one of the most celebrated European bands of the 1960s. During this time he also recorded with John Lewis (*Animal Dance*, 1962, Atl.). After touring Asia (1964), he recorded the album *New Jazz Ramwong* (1964, CBS), which made use of Eastern themes. In the late 1960s and early 70s he also toured the USA and South America. He first performed unaccompanied in Munich (1972) and subsequently made many solo tours and recordings. He also recorded with Palle Danielsson and Elvin Jones (1975), Jaco Pastorius and Alphonse Mouson (1976), John Surman, Barre Phillips and Stu Martin (1977) and others, and participated in bands including the Globe Unity Orchestra (1967–80s). In the 1970s Mangelsdorff was a leading figure in the Union Deutscher Jazzmusiker and, with Jean-François Jenny-Clark, led the German-French Jazz Ensemble. In 1955 he became the musical director for the Berlin JazzFest. In 1994 the Union Deutscher Jazzmusiker established a prize in his honour.

Mangelsdorff is one of the finest trombonists in modern jazz. Like most German musicians, he was at first influenced by the cool jazz idiom of Lee Konitz and Lennie Tristano, and then played hard bop. Later he introduced modal means of improvisation, free jazz and jazz rock-elements in his music. He has an imposing technique and is, among trombonists, the most innovative player of multiphonics (a startling example being his playing of the theme of Duke Ellington's *Mood Indigo* in three-part harmony on the album *The Wide Point*, 1975, MPS). He is the author of *Anleitung zur Improvisation für Posaune* (Mainz, 1965).

WOLFRAM KNAUER

Mangeot, André (Louis) (*b* Paris, 25 Aug 1883; *d* London, 11 Sept 1970). British violinist and impresario of French birth. He studied at the Paris Conservatoire with Marsick but settled in London after World War I and took British nationality. Before the war he played at Covent Garden under Richter; and on 29 July 1922 he was the first performer to play in the BBC's experimental transmissions, four months before the service opened. However, his main career was in chamber music. In 1919 he founded the Westminster Music Society, to introduce outstanding foreign instrumentalists and, more especially, to promote contemporary music. The same year he also founded the Music Society (later International) String Quartet, which gave many notable performances for the society, including the British première of Fauré's Quartet op.121 in October 1925. Led alternately by Mangeot and Boris Pecker, the quartet also toured abroad, specializing in British works. In collaboration with Peter Warlock and Philip Wilson, Mangeot edited much little-known string music by 17th-century British composers. In 1937 he founded a series of monthly 'Monday Pops' at the Wigmore Hall which ran for about 18 months, and in 1948 he formed the André Mangeot Quartet, with Antonia Booth, Maxwell Ward and Joan Dickson. He taught the violin and chamber music, coaching the music societies of both Oxford and Cambridge universities.

LYNDA MACGREGOR

Mangeshkar, Lata (*b* Indore, 28 Sept 1929). Indian film playback singer. The best-known and respected female singer in the history of Indian film music, Lata Mangeshkar has recorded more film songs than any other singer. As the eldest daughter of Marathi stage actor-singer and travelling theatre owner Dinanath Mangeshkar, she received no formal schooling and was forced to support her mother and four younger siblings when her father died in 1942. Lata immediately joined the film industry as an actress-singer with a Marathi film company, Prafulla Pictures in Pune. For a short time she also became a disciple of classical singer Aman Ali Khan Bindibazarwala, then after his departure to Pakistan in 1947 she studied with Amanat Ali until his death in 1951. Lata sang her first Marathi film playback song in 1942, and her first playback for a Hindi film in 1947, *Pa lagun kar jori re* for *Aap ki sewa mein*. Lata's high-pitched, thin voice differed from the prevailing full-throated style of Hindi film actress-singers Noorjehan, Suraiya, Zohrabai and others, but after the success of her songs in *Majboor* (1948), composed by director Ghulam Haider, all the leading Hindi film music directors offered her song recordings.

During the 1950s and 60s she recorded an average of five songs per day. With competition only from the few other leading female playback artists – namely Geeta Dutt, Shamshad Begum and her sister ASHA BHOSLE – Lata's songs gained enormous, widespread popularity via film, radio and commercial recordings. She won the annual Filmfare award for Best Female Playback Singer in 1958 (*A ja re pardesi* in *Madhumati*), in 1962 (*Kahin dip jale* in *Bees saal baad*), in 1965 (*Tumhi mere mandir* in *Khandaan*), and in 1969 (for *Ap mujhe acche lagne lage* in *Jeene ki raah*), after which she renounced all Filmfare awards in favour of younger singers, besides a Lifetime award. In addition to singing Lata has composed music for five Marathi films, four under the pseudonym Anandghan, and has produced films in both Marathi and Hindi. Her numerous honours include the Presidential Padma Bhushan award in 1969, honorary citizenship of the USA presented in Houston, Texas, in 1987, the Dada Saheb Phalke award for her lifetime contribution to cinema in 1989, and the 1996 Rajiv Gandhi National Sadbhavana for her outstanding contribution to the nation through her singing. Lata Mangeshkar continues to record film songs and spends several months each year on concert tours around the world.

ALISON ARNOLD

Mangin, Noel (*b* Wellington, 31 Dec 1931; *d* Auckland, 4 March 1995). New Zealand bass. After training initially as a tenor, he made his début as a bass-baritone in Auckland in 1957 as Giorgio Germont. Three years later he made his Australian début as Sarastro, by which time his voice had developed a true bass depth and resonance. After further study in Paris with Dominique Modesti (1961–2), he sang with Sadler's Wells Opera (1963–7) and at the Hamburg Staatsoper from 1967 until he began a freelance career in 1977. In Hamburg he sang Black Will in the première of Goehr's *Arden Must Die* in 1967. From 1979 he regularly sang Fafner, Hunding and Hagen in Seattle Opera's annual bilingual *Ring* productions, and from 1977 he made frequent appearances with Victoria State Opera. Mangin claimed to have 189 roles in his repertory, of which the most notable were Don Pasquale, Ochs and, especially, Osmin, which he recorded twice. He was made a Kammersänger at Hamburg in 1976 and created an OBE in 1981.

PETER DOWNES

Mango, Hieronymus [Gerolamo] (*b* ?Italy, *c*1740; *d* Rome, 1794). Italian composer. On 26 March 1760 he accepted a post at Eichstätt as Hofkapellmeister for Prince Bishop Raimondo Anton von Strassoldo. Meagre pay coupled with poor living conditions encouraged him to abandon his post and return to Rome in 1771. His sudden departure, however, tarnished his reputation to such an extent that he was forced to return to Eichstätt that same year. When conditions did not improve he formally resigned his post and relocated to Rome in 1773. During his tenure as Hofkapellmeister Mango exerted considerable influence throughout Bavaria, as his music was performed at courts and monastaries throughout the region. In keeping with the fashion at Bavarian courts, his secular music consists of serious dramatic works composed in a brilliant Italian style. In Rome, after 1773, he concentrated his efforts on intermezzos and other comic works.

LISA SZEKER-MADDEN

Mangold. German family of musicians, active in Hesse from the 17th century.

(1) **Johann Wilhelm Mangold** (*b* Umstadt, 1735; *d* 1806). Violinist and teacher. He left his native town in 1764 to settle in Darmstadt, where he joined the court orchestra in 1781. Five of his sons became court musicians, among them Georg Mangold (1767–1835), a violinist who became Kapellmeister at the Darmstadt court, and August Daniel Mangold (1775–1842), an outstanding cellist, who wrote music for his instrument. The two most gifted members of the family, (2) Wilhelm Mangold and (3) Carl Amand Mangold, were both sons of Georg. Their sister Charlotte Caroline Eleonore (1794–1876) was a singer and singing teacher in Darmstadt.

(2) **(Johann) Wilhelm Mangold** (*b* Darmstadt, 19 Nov 1796; *d* Darmstadt, 23 May 1875). Violinist and composer, grandson of (1) Johann Wilhelm. He studied with the Abbé Vogler, and in Paris with Kreutzer and at the Conservatoire (1815–18) with Méhul and Cherubini. In 1819 he was appointed leading violinist at the court in Darmstadt, and was Kapellmeister there from 1825 to 1858. He did much to improve orchestral standards and conditions and introduced Beethoven's symphonies to Darmstadt in the early 1830s. He also widened the operatic repertory there, being an early sponsor of the works of Spontini and Gluck, the classical subject matter of which was reflected in his own *opera seria*, *Merope* (1823). He wrote music in many genres, including two comic operas, incidental music, overtures and numerous chamber music and vocal works. His lieder were in a pleasingly light and elegant style.

U. Kramer: 'Zwei unbekannte Fagott-Konzerte von Christian Heinrich Rinck und Wilhelm Mangold in den Beständen der Hessischen Landes- und Hochschulbibliothek Darmstadt', *Tibia*, xxi (1996), 285–7

(3) **Carl (Ludwig) Amand Mangold** (*b* Darmstadt, 8 Oct 1813; *d* Oberstdorf im Allgäu, 4 Aug 1889). Conductor and composer, brother of (2) Wilhelm. From 1836 to 1839 he studied at the Paris Conservatoire and was a critic for the *Neue Zeitschrift für Musik* in 1838–9. He returned to Darmstadt and directed several choral societies there, notably the Dilettantenverein, which he led for 50 years. In the early 1840s he was appointed co-répétiteur at the court theatre, and from 1848 to 1869 was court Kapellmeister. During his many years as a conductor he devoted particular attention to the works of J.S. Bach, and later championed the music of Brahms and Wagner. During the 1840s he wrote five operas, including a *Tanhäuser* (17 May 1846), composed independently of Wagner's *Tannhäuser*, on a libretto that ends happily with the hero's marriage. The existence of Wagner's opera frustrated performances of Mangold's work in Berlin and Leipzig. In 1892 it was revived as *Der getreue Eckart*, with a new libretto by Ernst Pasqué (1892). He also composed orchestral and chamber music, several large-scale choral works, over 250 male-voice choruses and nearly 400 songs, some of which were popularized by Jenny Lind. He played a part in the Bach revival, and helped to establish the Mittelrheinische Musikfeste, which he conducted in 1856 and 1868. His choral works, several

of them on patriotic themes, especially *Die Hermannsschlacht* (1845), enjoyed a considerable vogue in Germany during his lifetime. Mangold was highly regarded as a composer by such contemporaries as Schumann for his 'natural liveliness' and 'power and depth of expression'.

WORKS

all MSS in D-DS

Stage: (all completed works first performed in Darmstadt): Das Köhlermädchen, oder Das Tournier zu Linz (romantic op, Wilke), 1843; Die Fischerin (Spl, J.W. von Goethe), 1845; Tanhäuser (op, E. Duller), 17 May 1846; Dornröschen (fairy tale with ballet, Duller), 1848; Gudrun (op, 4, based on old Ger. heroic saga), 1851, vs (Darmstadt, 1851); inc.: Fiesko, op; Rübezahl, op, begun 1848

Concert dramas: Die Hermannsschlacht (Mainz, 1845); Frithjof, 1856 (Darmstadt, 1857); Hermanns Tod, 1870; Barbarossas Erwachen, 1874; Sawitri, 1882

Orats: Wittekind, 1843; Abraham (Leipzig, 1859); Israel in der Wüste, 1863

Cants., incl. Die Weisheit des Mirza Schaffy (Schleusingen, 1875); motets; masses; *c*260 partsongs, male vv; *c*375 solo songs

8 syms.; concs; chbr music; works for pf solo

PHILIP H. ROBINSON/URSULA KRAMER

Mangolt, Bürk [Burk, Burkart, Burkhard] (*b* before 1380; *d* Bregenz, *c*1430). German song composer. As an employee of the poet Count HUGO VON MONTFORT, he was responsible for setting ten of Hugo's poems, as Hugo stated in an express acknowledgment of the composer in his *Rede* no.31: 'Die weysen zu den lieden/Die han ich nicht gemachen/ich will euch nicht betriegen/ ... die weysen hat gemachen Bürk Mangolt/unser getrewer knecht' ('I will not deceive you; I did not make the tunes for the songs myself. They were made by our faithful servant Bürk Mangolt'). It is most unusual in the history of medieval song for a poet to state explicitly that the settings of his texts were not of his own composition. Moreover, this case is unusual in that it is clear that Mangolt had set poems already in existence, so that text and music were certainly not conceived at the same time.

Mangolt was a citizen of Bregenz, and consequently a relatively large number of civic and church documents are available to help with the reconstruction of his biography. For instance, an entry in a land register of 1380 shows that he was in possession of the so-called 'Fahrlehen' ('ferry fief'), meaning that he had a farm in the immediate vicinity of the landing-place for Bregenz, and the tenure of his fief obligated him to ferry the Count over Lake Constance whenever the Count desired. The last archival mention of Mangolt is another land register entry, this time from 1422. He died before 1435. The only source for Mangolt's melodies is the fine codex of the poems of Hugo von Montfort, *D-HEu* Pal.germ.329, which can be dated between about 1415 and 1420. They are all transmitted in Gothic choral notation with some traces of mensural rhythm. The last two melody transcriptions (lieder nos.39 and 40) are in a different hand, but there is no definite proof that any composer other than Mangolt was involved (Welker, 1988; for a different opinion see Jammers, 1956). A firm conclusion is made more difficult by the fact that all the melodies seem to be assembled from set melodic fragments rather than individually composed, so that by comparison with other late medieval song composers Mangolt appears rather second-rate. Some transitional passages that are notably difficult to sing, on the other hand, need not be blamed on the composer, but may well be the result of scribal errors.

LORENZ WELKER

Mangon, Johannes (*b c*1525; *d* Aachen, 1578). Flemish composer. He was a *duodenus* in the collegiate choir school of St Martin, Liège, from 1535 to 1542. When his voice broke he continued his general education while remaining a member of the collegiate choir. From 1544 he is listed as an *officiatus* and it seems likely that he was then receiving composition lessons from Petit Jean de Latre. In 1562 he became second succentor at St Martin; he was also rector of the altar of St Jean Baptiste there, receiving a regular income from this post until February 1570. A legal document from Aachen dated 4 December 1567 and a copy of Mangon's mass *Ne abscondas me Domine* in a cathedral choirbook dated 31 October 1567 suggest that he was given leave of absence by the St Martin chapter to work at Aachen Cathedral. The Liège chapter ultimately withdrew his benefice on 28 February 1571, because he had been away for over a year. Between 1572 (or even earlier) and 1577 he was succentor at Aachen Cathedral where his music was copied into three manuscripts. Mangon probably died in the plague epidemic of 1578 that ravaged Aachen.

The Aachen choirbooks are the only source of his music. His works show a vigorous spirit allied with a great mastery of contrapuntal technique. His abundant melodic inspiration endowed his motets with a sense of movement which approaches that of the music of the greatest masters of his time. Nearly all his masses are parody masses: his favourite models were Clemens non Papa, Sandrin, Crecquillon and Lassus.

WORKS

all MSS in D-AAm

19 masses, 4, 5vv; 45 motets, 4, 5vv; 14 antiphons, 20 hymns, 5 Magnificat settings, 3 Passion motets, all 4vv

JOSÉ QUITIN/HENRI VANHULST

Manhattan Opera House. New York theatre opened in 1906. *See* NEW YORK, §4.

Manhattan School of Music. New York conservatory founded in 1917. *See* NEW YORK, §§4, 12.

Manhattan String Quartet. American string quartet. It was formed in 1970 by Eric Lewis, John McLeod, Andrew Berdahl and Judith Glyde; all the original players studied at the Manhattan School, where Lewis was a pupil of Rachmael Weinstock, who had led a quartet of the same name in the 1930s. (The other members of this earlier quartet, which made its début at Town Hall, New York, in 1932, were Harris Danziger, violin, Julius Shaier, viola, and Oliver Edel, cello.) McLeod was replaced in 1972 by Mahlon Darlington, who was followed by Roy Lewis in 1975 and then by Kenneth Freed; Berdahl was succeeded by Rosemary Glyde in 1975, then by John Dexter in 1980. Judith Glyde was followed by Chris Finckel. The quartet made its début in San Francisco in 1971, toured internationally throughout the 1970s and 1980s, and in 1986 became the first group to tour the USSR under the terms of a new US-Soviet cultural agreement, making a second Russian tour in 1989. The first American quartet to record the complete Shostakovich quartets, it has performed the cycle for Radio France, on the Great Performers series at Lincoln Center and at other venues. The quartet was in residence at the Music Mountain Festival (1981–8) and in 1986 became quartet-in-residence at Colgate University. It has held similar posts at institutions including the Manhattan School of Music, Cornell University, Town Hall in New York City and at Interlochen National Music Camp. Known for its interest in new music, the group has had works written for it by composers including Howard Boatwright, Ludmilla Ulehla, Benjamin Johnston, Gregory Kosteck, Alice Parker, Michael Colgrass and John Corigliano.

ELLEN HIGHSTEIN

Manhattan Transfer. American jazz and popular vocal group. Its members included Tim Hauser (*b* 1942), Janis Siegel (*b* 1953), Lauren Masse (*b* 1954) and Alan Paul (*b* 1949). Formed in 1969 by Hauser and named after a novel by John Dos Passos, Manhattan Transfer was intended to revive and update the skilful close-harmony vocalizations associated with such groups as the Four Freshmen and Lambert, Hendricks and Ross. The group's four-part harmony arrangements have been applied to a highly eclectic repertory, ranging from teenage pop songs to the classics of vocalese. Among their most successful recordings have been the Glenn Miller swing tune *Tuxedo Junction*, a version of *The Boy from New York City*, and the soul number *Spice Of Life* composed by Michael Jackson's collaborator Rod Temperton. Siegel has perhaps been the group's most jazz-orientated member: she arranged Zawinul's *Birdland* for the group and worked with Jon Hendricks and Bobby McFerrin on Manhattan Transfer's 1985 album *Vocalese* (Atl.) before recording her own jazz album in 1987.

DAVE LAING

Maniates, Maria Rika (*b* Toronto, 30 March 1937). Canadian musicologist. She studied at the Royal Conservatory of Music of Toronto and the University of Toronto (BA 1960) and at Columbia University (MA 1962, PhD 1965). At Columbia she worked with Lang, Wiora and Hertzmann in musicology and Albert Hofstadter in philosophy. In 1965 she joined the faculty of music at the University of Toronto, where she was made assistant professor (1966), associate professor (1970) and full professor (1974); she was also visiting professor of music at Columbia University, 1967–76. At Toronto she served as chairman of the department of music history and literature (1973–9), associate dean of humanities (1990–91) and acting chair of the graduate music department (1992). She was a member of the AMS Council (1972–4; 1976–8), board of directors (1980–81) and committee (1989–93) and she was on the executive board of the IMS (1972–82). She retired from the university in 1995. An interest in the history of philosophy and aesthetics is evident from her studies of Renaissance and 18th-century music and theory. In particular she has concentrated on mannerism in music, concepts of music in ancient Greece and their reception history and the examination of methodologies in musicology.

PAULA MORGAN/R

Manico (It.). *See* NECK.

Manicorde [manicordion] (Fr.; It. *manicordo*; Sp. *manicordio*). *See* CLAVICHORD.

Manic Street Preachers. Welsh rock group. It was founded by James Dean Bradfield (*b* Pontllanfraith, nr Blackwood, 21 Feb 1969; guitar and vocals), Nicky Wire (Nicholas Allen Jones; *b* Blackwood, 20 Jan 1969; bass), Sean Moore (*b* Pontllanfraith, nr Blackwood, 30 July 1970; drums), and Richard 'Richey' James Edwards (*b* Blackwood, 22 Dec 1967; ?*d* 1995; rhythm guitar). They released their début album, *Generation Terrorists* (Col., 1992), four years after forming. They drew heavily on the political thrust of punk and the glam-era proto-punk of the New York Dolls, originally playing aggressive, guitar-based rock on such early singles as *Slash and Burn*, and *Repeat*, with the melodicism of *Motorcycle Emptiness* hinting at craftsmanship.

Their reputation was first secured with *The Holy Bible* (Col., 1994), a pulsing and brutal rock album that catalogued the mental torment of their emotionally unstable lyricist, Edwards. It contained the singles 'Faster', 'Revol' and a song about the trauma of anorexia, '4st, 7lb', arguably the band's most disquieting moment. In early 1995, Edwards went missing and is now presumed dead, but the band subsequently made the unexpectedly successful *Everything Must Go* (Epic, 1996). One of the landmark albums of the 1990s, it mixed soaring orchestral arrangements with pulsating hard rock melodies, as on 'A Design for Life'. 'Small Black Flowers that Grow in the Sky', with its delicate arrangement for harp, also displayed an increasing musical bravery. *This is My Truth Tell Me Yours* (Sony, 1998), with Wire as the sole lyricist, was their first album without any input from Edwards, and provided the band's first UK number one single, 'If You Tolerate This then Your Children will be Next'.

As a power-rock trio the band have influenced groups of the 1990s such as the Stereophonics and Supergrass, but were distinguished by a desire to infuse their music with socio-political ideas. They reinvented the aspirational politics of punk and new wave groups such as Elvis Costello and the Clash, and also articulated the contradictory impulses behind late 20th-century Welsh nationalism. Mythogenic and iconoclastic with a strong sense of their own importance, their overt political correctness has attracted criticism; their championing of big ideas, however, places them as one of the most important bands of their era. See also S. Price: *Everything: a Book about Manic Street Preachers* (London, 1999).

DAVID BUCKLEY

Manieren (Ger.: 'manners'). Embellishment, including both free ornamentation and specific ORNAMENTS, but perhaps more characteristically the latter. However, F.W. Marpurg appears to have had largely the former in mind when distinguishing in his *Anleitung zum Clavierspielen* (Berlin, 1755) between *Setz-Manieren*, notated by the composer, and *Spiel-Manieren*, improvised by the performer.

ROBERT DONINGTON

Manifesto de Música Nova. Group of composers formed in 1963 in SÃO PAULO.

Manifold, John Streeter (*b* Melbourne, 21 April 1915; *d* Brisbane, 19 April 1985). Australian folksong collector and poet. After graduating in modern languages from Cambridge University, Manifold became active in Baroque music circles in London. He served with the intelligence corps during World War II. His first book of poems was published in New York in 1946 and soon afterwards he wrote a handbook on the history and repertory of the recorder, *The Amorous Flute* (London, 1948). On his return to Australia he completed the innovative study, *The Music in English Drama, from Shakespeare to Purcell* (London, 1956), which for many years was the standard reference book used by English theatre companies. His major musical contribution began in the 1950s when he started to collect Australian folksongs. These songs were published in broadsheet editions as *Bandicoot Ballads* (Lower Fern Tree Gulley, Victoria, 1955) and *The Penguin Australian Song Book* (Harmondsworth, 1964). He also wrote two studies on Australian folk music entitled *The Violin, the Banjo & the Bones* (Melbourne, 1957) and *Who Wrote the Ballads?* (Sydney, 1964), a fine partly speculative investigation of the origins of the tradition. Further information on his career can be found in R. Hall: *J.S. Manifold: an Introduction to the Man and his Work* (St Lucia, Queensland, 1978).

RODNEY HALL

Manila. Capital city of the Philippines. It was established as a Spanish Royal City by Miguel López de Legazpi in 1571 at the mouth of the Pasig river. With a population of approximately 12 million, it is the second largest metropolitan area in all of South-east Asia.

1. The Spanish period, 1571–1898. 2. 1898–1940. 3. Since 1941.

1. THE SPANISH PERIOD, 1571–1898. Legazpi established a grid-plan city to the south-east of the Pasig river, which became completely fortified with defensive walls by 1590. Accompanying Legazpi's garrison was Andres de Urdaneta, an Augustinian priest, who established the first church in the city. This transfer of the capital of the Philippines from the city of Cebu of the island of the same name to the principal island of Luzon was the single most important strategic step taken by the Spanish during their long presence in the archipelago. The archipelago began to function as a suffragan diocese of Mexico City in 1581 when the first bishop, Domingo de Salazar, a Dominican, arrived in Manila to establish a cathedral church and chapter. He brought with him from Mexico the first *chantre* of the cathedral, Francisco de Morales, as well as music books (some containing polyphonic music), flutes, *chirimías* and a pipe organ. By 1582 Morales had established a choir of men and boys in the cathedral.

Franciscan missionaries established themselves in Manila in 1577, and were followed by the Jesuits and Dominicans in 1581 and the Augustinian Recollects in 1606. By 1615 all of these orders had constructed one or more impressive stone Baroque churches. Each was equipped with at least one pipe organ and all had choirs and orchestras, for instance the orchestra of nine slave musicians who played flutes and *chirimías*, given to the Jesuit church of S Ignacio in 1596, the first musical ensemble in Manila for which archival evidence is known.

Music played a part in the curricula of schools run by the various religious orders and in the academic life of the two universities, the Jesuit College of S Ignacio (1595) and the Dominican University of S Tomás (1611). Music was also the central ingredient in the elaborate celebrations undertaken on major feast days and on important

religious occasions in the city such as the formal installation of 150 holy relics in the Jesuit college Church of S Anna in 1597, the announcement of the canonization of St Ignactius of Loyola in 1611 and that of S Francis Borgia in 1671.

Notable Manila musicians from the 17th century were Luis de la Cruz, *ministro superior de la capilla y musica* of the cathedral, and his successor (in 1657) Don Baltazar Gat Dobali. Composers of note were Marcelo de San Agustin and the Franciscans Juan de Santa María (*d* 1618) and Francisco Péres de la Conceptión, all of whom produced multiple volumes of polyphonic music. The musical life of the city was further enriched by the ritual life of the numerous confraternities. For instance the Esclavos de Santo Cristo, of the suburban S Juan del Monte church, commissioned the composition of a set of canciónes and villancicos from a local composer with texts in Latin, Spanish and Tagalog. Music, dance and dramatic presentation were regularly made by performing troupes from the Chinese and Japanese residents of the city and by native Tagalog speakers.

Notable musicians from the 18th century were Simon Ambrosio, cathedral organist (1737), succeeded by Faustino Magsaisay in 1740, and *maestro de musica* Pascual de Resurecció, succeeded by Nicolas Patricio in 1738. Others who held this post were Esteban Gamero y Rueda and Pablo Mariano. The Franciscan José de la Virgen wrote an *Arte de canto gregoriano* in the Bicol language, which was published in Manila in 1727. Juan de Ballesteros was a prominent Jesuit musician. The Colegio de Niños Tiples (School of Boy Sopranos), founded in 1743, evolved in the next century into what may have been the first conservatory-style music school in the city.

In the southern subrurb of Las Piñas the Recollect priest, Diego Cera, who arrived in Manila in 1792, established a factory that produced organs and fortepianos. One of his finest pianos was sent to the Queen of Spain in 1793. He produced notable large pipe organs in Manila for the Recollect church of St Nicholas Tolentino, the Dominican church of S Domingo, the cathedral, and the Recollect church of S Sebastian. All of the organs in the historic centre of Manila were severely damaged or destroyed in 1945. Organs that Cera or his workshop produced for parishes on other islands survive, including Baclayon Church on Bohol. His most famous instrument, the unique bamboo organ of Las Piñas Church, still survives, and is the focus of an annual organ festival. His largest surviving organ, in the Augustinian church of S Agustin, was restored to its historic design and rededicated in 1998.

Musical composition flourished in the city during the 18th century, especially the production of polyphonic villancios, masses and devotional music. The composers who are known to have produced significant books of polyphonic music are the Augustinians Lorenzo Casteló (*d* 1743), Ignacio de Jesus and Juan Jadraque (*d* 1743) who, with Nicolas Medina, also wrote *Arte de canto llano y de canto de organo*.

With the liberalizations made in the governance of the Spanish Empire by King Carlos III (1716–88), Manila gradually evolved into an open port. This and other changes also brought about the creation of a number of large and permanent public theatres which encouraged the cultivation of opera, symphonic music, more popular kinds of music, dramatic events in Spanish, Tagalog, Japanese and Chinese, and most especially, the regular productions of zarzuelas in Spanish and Tagalog. The first permanent theatre appears to have been the Teatro Cómico (1791), while the most important new theatres were the Teatro Binondo (also known as the Teatro Castellano, 1846), the Teatro del Príncipe Alfonso (1862), the Teatro Filipino (1881) and the Teatro Zorilla (1893).

French and Italian opera companies appeared in Manila from 1839, when the French troupe of M. Maugard produced *Lucia di Lammermoor* at the Teatro Lirico de Quiapo. A Filipino troupe, the Jean Barbero company, appeared in the opening year (1862) of the Teatro Principal. Several Italian troupes held successful seasons in Manila, for example the Pompei company in 1868, the Steffani and Zappa company in 1871 and the Assi-Panades company in 1874. One of the most memorable moments in the theatrical life before the revolution was the first performance of the zarzuela *El diablo mundo* (by the Filipino composer José Estella and the Spanish dramatist Rafael del Val) given at the Teatro Zorilla on 25 October 1893. Musical societies of the time included the Union Artistico Musical (1885), the Sociedad Musical Filipina de S Cecilia (1888) and the Circulo Musical (1893).

The University of S Tomás and schools such as the colleges of S Juan Letran, S Isabela, S Rosa, S José and of the Colegiode Niños Tiples all employed a number of important composers and performers. These included Blas Echegoyen, Hilarion Angeles, the priests Manuel Arostegui, Eustaquio Uriate, Pedro Para and Cipriano Gonzales, the singer Andres Ciria Cruz, the organist and composer Natalio Mata, the opera impresario, conductor and double bass player Ladislao Bonus, Antonio Garcia, the conductor José Sabas Libornio, the orchestral impresario Juan Molina, the organist, composer and conductor Marcel Adonya, José Canseco, the tenor Balbino Carrion, the guitarist and bandmaster Leonardo Silos, and Primo Calza and Faustino Villacorta, both *maestri* of the Dominican Church.

The most notable orchestras in the Spanish period were the Orquestra Feminina de Pandacan, founded in 1800 by Raymundo Fermin, the Gruet Orchestra, directed by Ramon Vales, the San Juan del Monte orchestra, directed by Joaquin Aragon, the Oriental Orchestra, directed by Bonifacio Abdon, the Marikina Orchestra, directed by Ladislao Bonus, the Zabat Orchestra, and the Molina Orchestra, founded in 1898 by Juan Molina, which continued until 1935. Marcelo Adonay founded and conducted the orchestra and choir of the Augustinian convent of S Agustin in 1870, which continued to perform well into the US period of occupation. Adonay was also a founding member in 1885 of the Union Artistica Musical, the first musicians' union. Concert bands also featured prominently in the musical life of Manila at this time, especially the Arevalo Band, organized by Bonifacio Arevalo. This ensemble made appearances in other southeastern Asian countries.

2. 1898–1940. The movement towards independence from Spain, which emerged in the last third of the 19th century, culminated in the revolt by Filipino forces against Spain in 1898 and led to the invasion of the Philippines by the USA. The US regime aimed at de-Hispanifying and de-Catholicizing the Philippines, and began dismantling the education system of the country and replacing it with a secular one. The US government also sought to eradicate

the power of the religious orders: the Franciscans, Jesuits, Dominicans, Augustinians and Augustinian Recollects.

Nevertheless, many cultural institutions survived into the 20th century, and important new musical and cultural institutions were created, such as the Asociación Musical de Filipinas, founded by Jovita Fuentes in 1919, which underwrote the production of concerts and opera, and provided support for young Filipino musicians to study abroad. Foremost among the composers of the new generation were Nicanor Abelado, Francisco Santiago, Antonio Molina and Antonino Buenaventura. Abelardo, Molina and Santiago were the leaders in the first nationalist movement in Philippine composition. Performers active in the city were the violinist Ernesto Vallejo Arreola and the opera singers Bonifacio Abdon, Dalisay Julian Aldaba, Galia Arellano and Jovita Fuentes.

New theatres of the period include the Old Manila Grand Opera House. Teaching institutions include S Rosa College's Academia de Musica (1921), the Conservatory of Music of the Centro Escolar University (1907) and the Lyric Music Academy (1923). The State Conservatory of Music at the University of the Philippines opened in 1916. Wallace W. George of the New England Conservatory was the first director; the first Filipino director of the conservatory was Francisco Santiago. The conservatory was closed during World War II, but opened again in 1945 after liberation and is now a leading school of music in Asia.

Other music education institutions founded in Manila during the American period were the Manila Conservatory of Music (1934), the Academy of Music of Manila (1930), the School of Music of the Union College of Manila, and St Theresa's Conservatory of Music (1919). The Cosmopolitan College Academy of Music was founded in 1945, and the S Tomás University Conservatory was founded in 1947. The first of four principal performing ensembles to emerge was the Manila SO (1911–14), founded by the Monday Musical Club and directed by Vincenzo Gambardella. The name was used again by a new symphony orchestra founded by Alexander Lippay in 1926. Lippay also founded the Constabulary Civic Orchestra in 1932. Upon his death in 1939 Lippay was succeeded by Herbert Zipper, who also created the Manila Concert Choir. After liberation, the Manila SO was conducted by Bernadino Custodio and Antonino Buenaventura. Another prominent organization was the Philippine Cultural Concerts Society SO, founded by Ramón Tapales in 1935. The fourth orchestra, the Philippine Constabulary SO, was founded in 1903, and was directed by Antonino Buenaventura.

Band music remained a major undertaking in the musical life in Manila after the invasion. The Philippine Constabulary Band was organized by Walter H. Loving in 1902. The direction of this band, which toured internationally before the outbreak of World War II, fell to Pedro B. Navarro in 1915.

3. SINCE 1941. The invasion of Manila by the Japanese in 1941 halted artistic activity in the city. It was not until 1942–3 that theatres opened again and performances were given. The recapture of the city by US and Philippine forces in 1945 caused widespread destruction to the city, including many of the buildings previously used for public performance.

From the ashes of war, the second half of the 20th century saw the recovery to prominence of some of the principal performing ensembles, including the Manila SO and the Philippine PO. The restoration of the colleges of music at the University of the Philippines, the University of S Tomás and St Scholastica's College have produced dramatic growth in the size and the quality of the musical community. In addition, new musical organizations have appeared, such as the League of Filipino Composers. A number of important new concert halls have been constructed, including the Cultural Center of the Philippines (1969), the Philam Life Auditorium and the Molina Hall. The Cultural Center of the Philippines has expanded its activities into film, dance, theatre and music, presenting traditional and western-style ensembles and companies. The centre also commissions a number of new works each year by Philippine composers in a variety of media and is host to international festivals and national student competitions in music, theatre and dance. In addition, the centre has undertaken the production of music periodicals, books, recordings and video recordings relating to the performing arts, and has produced the first major encyclopedia on the arts in the Philippines, a milestone in Philippine lexicography.

Leading composers from the second half of the 20th century, including Felipe Padilla de Leon, Lucrecia Kasilag, Anonio Molina, Lucio San Pedro and José Maceda, have had their works widely performed both in the Philippines and abroad. Each of these individuals has been named a National Artist in Music, the nation's highest award in the performing arts. Experimentation in multimedia composition has been undertaken by Ramon Santos, 'Chino' Toledo and Verna de la Peña. Outstanding Filipino performers, such as the pianists Rowena Sanchez Arrieta, José Bermejo Contreras, Regalado José and Nena del Rosario-Villanueva, the cellist Ramon Corpus Bolipata and the singer Ontoniel Aurelio Gonzaga have active careers in the Philippines and abroad. Ensembles utilizing the instruments and performing genres of Filipino traditional music have been founded, most notably the Philippine Music Ensemble founded by Lucrecia Kasilag.

WILLIAM J. SUMMERS

Manilius, Gislain (*b* Ghent; *d* Ghent, 1573). Flemish printer. He was active in Ghent from 1558, when he obtained his licence to print, until his death in 1573. His

publications include official proclamations and ordinances for the Ghent diocese; pamphlets and other literature, mostly Flemish, but some in French; and two Flemish psalters (1565, 1566), the first books with music to be printed in Ghent. The first, *Psalmen Davids*, whose texts were translated by Lucas d'Heere from Clément Marot's version, was later placed on the Index, although Manilius had obtained a three-year privilege to print it. The following year Manilius published another version, that of Petrus Dathenus, who had visited Ghent in July 1566; this was published without place of imprint. One other book with music is known from this press: Mathias de Casteleyn's *Diversche liedekens*, published by Manilius's widow in 1574.

SUSAN BAIN

Manilow, Barry [Pinkus, Barry Alan] (*b* New York City, 17 June 1946). American popular songwriter, singer and pianist. After studying at the New York College of Music and the Juilliard School, he became a composer of advertising jingles and musical director for Bette Midler. In 1975 he emerged as a popular vocalist with an emotive recording of Richard Kerr's *Mandy*. His penchant for melodramatic, middle-of-the-road ballads, smooth tenor and engaging stage presence made him one of the singers most idolized by audiences and most castigated by critics during the late 1970s and early 80s. His repertory includes such songs as Kerr's *Looks like we made it* and Bruce Johnston's *I write the songs*. His own hit song *Copacabana* became the basis of a television musical by Manilow, and was subsequently staged in London (1994).

His recordings include lush orchestral settings using strings, horns and piano, which were retained when he recorded Japanese, Spanish, Italian, French and German translations of his hits. Manilow has also collaborated on jazz recordings with a variety of mainstream jazz artists including Sarah Vaughan, Mel Tormé and the Glenn Miller orchestra. In 1990 he played on Broadway in a one-man show which surveyed his career and best-known songs. He has published the autobiography *Sweet Life: Adventures on the Way to Paradise* (New York, 1987).

DAVE LAING

Manina [Fletcher, Seedo], **Maria** (*fl* 1712–36). Italian soprano. She played Eucharis in Galliard's *Calypso and Telemachus* at the Queen's Theatre, London, in 1712 and Almirena in Handel's *Rinaldo* in 1713, a part she may have taken the previous year. She probably sang Celia in Handel's *Silla* (1713). In 1714 she sang in the pasticcios *Ernelinda* and *Arminio* at the Queen's. About 1715 she married one Fletcher, and from October that year sang frequently at Lincoln's Inn Fields. She was in the revivals of Giovanni Bononcini's *Camilla* and the pasticcio *Thomyris* in 1717 (and later) and made occasional concert appearances at Hickford's Room and York Buildings. She was at the Lincoln's Inn Fields theatre in 1726 in *Camilla* and was employed there until 1732. In 1727 she married the German violinist and composer Seedo and thenceforward used his name, the third under which she had sung. During this period she appeared in Rich's pantomime afterpieces, generally with music by Galliard; she also took the male lead in revivals of Pepusch's *Venus and Adonis* and *Myrtillo* (1730), and sang in Purcell's *Dioclesian* (1731) and a one-act *Telemachus* with music by Alessandro Scarlatti (1732). Manina sang in the first performances of Lampe's *Britannia* (New Haymarket, 1732) and Seedo's masque *Venus, Cupid and Hymen* (Drury Lane, 1733). She then seems to have retired, and left for Potsdam in 1736, deep in debt.

WINTON DEAN

Manjīrā. *See* TĀL.

Mankell. Swedish family of musicians of German origin.

(1) **Johan Hermann Mankell** (*b* Niederasphe, 19 Sept 1763; *d* Karlskrona,4 Nov 1835). Church musician. A son of Johann Hermann Mankel, he moved to Sweden in 1823 and settled in Karlskrona in 1832, founding the Swedish branch of the family. All but one of his seven sons by his two marriages became musicians, among them Carl Abraham Mankell (*b* Christiansfeld, 16 April 1802; *d* Stockholm, 27 Oct 1868), singer, organist, teacher and writer on music; Wilhelm August Mankell, a piano manufacturer in Göteborg, who emigrated to the USA; and (2) Gustaf Adolf Mankell.

(2) **Gustaf Adolf Mankell** (*b* Christiansfeld, 20 May 1812; *d* Stockholm, 23 March 1880). Organist and composer, son of (1) Johan Hermann Mankell. Originally a piano teacher, he became organist at the Jakobskyrka in Stockholm, and was promoted to cantor of the church's school. He became a member of the Swedish Royal Academy of Music in 1841, and taught the organ at the conservatory from 1853 until his retirement.

(3) **(Ivar) Henning Mankell** (*b* Härnösand, 3 June 1868; *d* Stockholm, 8 May 1930). Composer, grandson of (1) Johan Hermann Mankell. He was the most celebrated member of the family. His father, Emil Theodor Mankell (*b* Karlskrona, 31 July 1834; *d* Härnösand, Jan 1899), was a painter and enthusiastic amateur violinist, and as a boy Henning heard a great deal of chamber music at home. After studying at the conservatory in Stockholm (1887–95) as well as the piano with Lennart Lundberg, he became a music critic for the *Svenska morgonbladet* and the *Stockholms-tidningen*, both in Stockholm, and also taught the piano and harmony privately. He wrote chiefly solo piano music and chamber music with piano, in a style which was thought to be advanced for its time. He was influenced by Impressionism and by Skryabin, as well as Liszt, Debussy, Grieg and Sjögren, and he created a highly personal style of piano writing. He was elected a member of the Swedish Royal Academy of Music in 1917.

WORKS

Andante (H. Rode), 1v, pf, orch, op.17, vs (Stockholm, 1912); Florez och Blanzeflor (S. Agrell), Bar, orch, op.12, 1912; songs, 1v, pf
Pf Conc.; pf qnt; 3 str qts; Pf Trio; 2 sonatas, vn, pf; Sonata, va, pf
Pf solo: 3 sonatas, fantasias, ballades, impromptus, preludes, variation sets, other works

ROBERT LAYTON/LENNART RABES

Mann, Alfred (*b* Hamburg, 28 April 1917). American musicologist, son of the German pianist and writer Edith Weiss-Mann (1885–1951). He studied at Milan Conservatory and received a diploma from the Berlin Hochschule für Musik, where his teachers were Kurt Thomas and Max Seiffert. After working as an instructor at the Berlin Hochschule (1937) and at the Scuola di Musica in Milan (1938), he taught at the Curtis Institute, Philadelphia, where he also took a diploma. He studied with Lang, W.S. Mitchell and Hertzmann at Columbia University (MA 1950; PhD 1955) and was appointed professor of music at Rutgers University in 1947, where he taught until he was made professor emeritus in 1980; that same year he was appointed professor of musicology at the Eastman School of Music, where he taught until 1987. He was also the editor of *American Choral Review* from 1961.

Mann specializes in the history of music theory, particularly in the writings of J.J. Fux. His translation of the discussion of counterpoint in Fux's *Gradus ad Parnassum* (1938; Eng. trans., 1943) includes an appraisal both of contemporary views on counterpoint and the influence of Fux's work; in *The Study of Fugue* (1958) Mann outlines the history of teaching fugue, providing quotes from, and explanations about, relevant theorists (Fux, Marpurg, Albrechtsberger and Martini). Through his writings, Mann has also introduced performance students to Handel's lesser-known works; he has prepared volumes of writings for the collected editions of Fux, Handel, Mozart and Schubert, and a number of volumes in the series Documents of the Musical Past.

PAULA MORGAN

Mann, Arthur Henry (*b* Norwich, 16 May 1850; *d* Cambridge, 19 Nov 1929). English organist and choir trainer. A chorister at Norwich Cathedral under Zechariah Buck, he took the FRCO diploma in 1871, the BMus degree at Oxford in 1874 and the DMus in 1882. After several organist's posts he became in 1876 organist and choirmaster at King's College, Cambridge, where he remained for the rest of his life; he was elected a Fellow of the college in 1921. When he went to King's the chapel choir was the worst of the three in Cambridge that maintained daily choral services. 50 years later it had become, and has since remained, the most famous Anglican choir in the world. Mann accomplished this revolution, first by persuading the college to establish a choir school and to replace the lay clerks gradually with choral scholars, and then by a winning combination of personal qualities – ruthlessness, tact, personal kindliness and singleness of purpose. His taste in church music was unrepentantly Victorian, but towards the end of his life, without changing his own opinions, he bowed to the general trend towards revival of Elizabethan and Jacobean music.

Mann was also a composer of sacred choral music and hymn tunes, and devoted himself to a wide range of scholarly activities, especially concerning Handel, hymnbooks and East Anglian music and musicians. His research notebooks, most of which are now in the Norfolk and Norwich Record Office, are a rich fund of information in these and related areas. His tunebooks, now largely at King's and at the British Library, often contain valuable scholarly notes in his hand, showing him to be one of the first to appreciate English country church music of the 'gallery' period.

NICHOLAS TEMPERLEY

Mann, Elias (*b* Stoughton [now Canton], MA, 8 May 1750; *d* Northampton, MA, 12 May 1825). American composer, tune book compiler and singing master. A carpenter by trade, Mann taught singing schools in Massachusetts and composed sacred music as well as a few secular songs. He probably helped Isaiah Thomas compile early editions of *The Worcester Collection* (1786–1794), and he published two tune books of his own: *The Northampton Collection* (Northampton, 1797, 2/1802) and *The Massachusetts Collection* (Boston, 1807). An undistinguished melodist, Mann allied himself with the movement to reform New England's psalmody in the 1800s, condemning fuging tunes and favouring European compositions in his second tune book. His complete works have been edited by D.C.L. Jones (New York and London, 1996).

RICHARD CRAWFORD/NYM COOKE

Mann, Johann. *See* MONN, MATTHIAS GEORG.

Mann, Johann Christoph. *See* MONN, JOHANN CHRISTOPH.

Mann, Matthias Georg. *See* MONN, MATTHIAS GEORG.

Mann, Robert (Wheeler) (*b* Sandwich, IL, 11 Sept 1925). American composer. He studied in Boston at the New England Conservatory of Music (1947), in the University of Michigan (1948), in Salzburg at the Mozarteum with Frank Martin (1948), and then in Rome with Petrassi (1948–52). In the 1950s he wrote music criticism for *Musical America*, the *Oslo Dagbladet* and *London Music Events*. He was also secretary-general of the ISCM (1955–59). Mann's early output shows the influence of Hindemith, Berg and Webern, arriving at an aphoristic atonal language rich in contrapuntal interest and canonic forms. The *Cantata* for soprano, harp, keyboard instruments and percussion (1960) exemplifies these traits and displays also the mark of Boulez's *Improvisations sur Mallarmé*; *Anaglyphs* for instruments and percussion (1961) is similar in representation. After a period of silence, broken only by some incidental theatre music, a new creative period began with *ludes* for harpsichord and string quintet (1974), in which serialism, canon and aphorisms continued to be primary. In addition Mann has come to employ rhythmic 'graphs' as part of the composition process to aid in the realization of his complexities of counterpoint. Examples in which this technique has been used include *Quincunx* (1984) and *Hexapla I* for viola and orchestra (1985), dedicated to Aldo Clementi.

WORKS
(*selective list*)

Stage: The Little Prince (op, 1, Mann, after A. de Saint-Exupéry), 1952; The Scarlet Letter (op, 4, Mann, after N. Hawthorne), 1955–8; Agamennone (incid music, V. Alfieri), 1964; Edipo Re (incid music, Sophocles)

Vocal: Night Songs (W. Blake, G.M.Hopkins, D.H. Lawrence, P.B. Shelley), 1v, orch, 1955; Cant. (after Shelley), S, hp, kbds, perc, 1960; Ballade (F. Villon), S, crotales, brass, 1977; Ingyte (after Shelley), S, orch, 1982; 4 Songs (H. Morley), S, fl, ob, cl, bn, untuned metal perc, 1995

LICIA MARI

Mann, Thomas (*b* Lübeck, 6 June 1875; *d* Zürich, 12 Aug 1955). German writer. A Nobel prize winner, his novels, stories and essays often included musical characters or examined musical topics. His importance as a commentator on the position of music in German culture during the 19th and early 20th centuries was reinforced by his personal friendships with many contemporary composers, conductors and musical scholars.

Mann came from a well-to-do family. Music was an inevitable part of his upbringing at a time when Wagner's influence was at its height, something celebrated and mocked in many of his works; an excess of Wagnerian enthusiasm is the undoing of more than one of his ailing aesthete characters. He was equally fascinated by contemporary, post-Wagnerian music. His attendance at the 1910 première of Mahler's Eighth Symphony in Munich fuelled some of the cultural speculation underlying his novella *Der Tod in Venedig* (Berlin, 1913; set as *Death in Venice* by Britten in 1973), in which he transposed elements of Mahler's appearance on to the central character, the writer Gustav von Aschenbach. Aschenbach's career and latent homosexuality also reveal elements of an ironic self-portrait which Mann honed in more ambitious subsequent works like *Der Zauberberg* (Berlin, 1924).

One of Mann's key musical associations was with Pfitzner, whose world-weary opera *Palestrina* inspired his admiration during World War I; he wrote about the work in his anti-democratic German-nationalist treatise *Betrachtungen eines Unpolitischen* (Berlin, 1918) and was a founding member of a Pfitzner Society in Munich. Mann's political views and affiliations were irrevocably affected, however, by the rise of German Fascism. By 1930 he was already the object of Nazi hatred and his February 1933 Munich lecture, 'Leiden und Grösse Richard Wagners', effectively sealed his fate in its deliberately ambivalent celebration of Wagner and its explicit contemporary references ('let no spirit of pious or brutal regression claim him for his own'). His subsequent European tour became a journey into exile.

During World War II, Mann was prominent in the emigré community in Los Angeles that also included Arnold Schoenberg, Alma Mahler, Bruno Walter, Erich Wolfgang Korngold and others. *Doktor Faustus* (Berlin, 1947), conceived as an examination of the recent history of German irrationalism (a 'dramatization of our tragedy'), represents the climax of his literary treatment of music. Written as a life of the fictional composer Adrian Leverkühn told by an admiring but conventional friend, the novel includes detailed descriptions of invented musical works. Assisted by Adorno, who was working in Los Angeles on *Philosophie der neuen Musik* (Tübingen, 1949), a treatise which Mann read in manuscript, he advanced a central theme partly inspired by Schoenberg's

development of the system of 12-note composition. Although Leverkühn was modelled on a variety of musicians and writers (among them Nietzsche, Mahler and Stravinsky), Schoenberg's misplaced sense of outrage at what he perceived as plagiarism of his intellectual property led to a celebrated public controversy. Its outcome was an apologetic disclaimer (not without ironic implication) in all subsequent copies of Mann's novel.

In later life, Mann spent part of each day at the piano, playing favourite works such as Wagner's *Tristan und Isolde*. An unrivalled witness to, critic of and participant in the German cultural adventure with Wagner's music and ideas, he echoed and explored the implications of Nietzsche's critique, while admitting that he had himself spent 'hours of deep and solitary happiness amidst the theatre throng' at Wagner performances. His location of that musical experience at the heart of what he, too, regarded as the German cultural malaise gives his literary works a peculiar importance for the historical understanding of music in early 20th-century European culture.

PETER FRANKLIN

Mann, William S(omervell) (*b* Madras, 14 Feb 1924; *d* Bath, 5 Sept 1989). English music critic. He was educated at Winchester, and then studied privately in London under Ilona Kabos (piano) and Mátyás Seiber (composition); from 1946 to 1948 he studied at Magdalene College, Cambridge, where his teachers included Patrick Hadley, Hubert Middleton and Robin Orr. In 1948 he joined the music staff of *The Times*, succeeding Frank Howes as chief music critic in 1960; he retired in 1982. The establishment role of 'Our Music Critic' (anonymous until 1966) was enigmatic for a writer markedly progressive, even iconoclastic, in outlook, but Mann's fluent and direct style, his vitality and his mission to enlarge his readers' enjoyment of music were always evident. He had firm, clear-cut views on many topics, such as the human voice and opera production, and his professional grasp of different aspects of music-making was an essential part of his equipment as a critic. His most famous pronouncement was that the Beatles were the greatest songwriters since Schubert.

Mann was a prolific writer of programme and record sleeve notes, record criticism (in *Gramophone* and elsewhere) and book reviews, and a regular broadcaster on musical topics; he also prepared reading translations of *Der Ring des Nibelungen* (1964) and *Tristan und Isolde* (1968). His interests were wide, but his strongest sympathies lay in opera (particularly German Romantic opera), song, piano music and the 20th century in general. He was active in the propagation of contemporary music and was twice chairman of the Society for the Promotion of New Music (1955–6, 1957–8). His *Richard Strauss: a Critical Study of the Operas* (London, 1964) is a survey of the composer's development in those works, based on a close analysis of their music in relation to drama and character; *The Operas of Mozart* (London, 1977), although criticized for some want of refinement in expression and judgment, is equally invigorated by his enthusiasm and love for the music.

STANLEY SADIE

Manna. Italian family of musicians, active throughout the 18th century.

(1) Cristoforo Manna (*b* Naples, 1704; *d* Naples). Composer, son of Vitagliano Manna or La Manna. After attending the Conservatorio di S Maria di Loreto he became a musician in the household of the Marchese di Fuscaldo, where his father was a servant. In spring 1729 his only known major composition, the lost comic opera *Lo trionfo d'ammore o pure chi dura vence* (to a text by C. Di Palma), was performed at the Teatro dei Fiorentini in Naples.

(2) Gennaro Manna (*b* Naples, 12 Dec 1715; *d* Naples, 28 Dec 1779). Composer, son of Giuseppe Manna and Caterina Feo (sister of the composer Francesco Feo), and cousin of (1) Cristoforo Manna. He studied at the Neapolitan Conservatorio di S Onofrio a Capuana where his uncle Francesco Feo was *primo maestro* and Ignazio Prota *secondo maestro*. His first *opera seria*, *Tito Manlio*, was performed on 21 January 1742 in Rome. Its immediate success led to a commission from the Teatro S Giovanni Grisostomo in Venice for the carnival season 1743, for which he wrote *Siroe re di Persia*. After his return to Naples he collaborated with Nicola Logroscino in composing a *festa teatrale*. An outbreak of the plague caused the festivities planned for July 1743 to be cancelled,

and the work was never performed. Manna then revised Leonardo Vinci's *Artaserse*, and in 1744 succeeded Domenico Sarro as *maestro di cappella* to the city of Naples. In January 1745 Manna presented a new work of his own at the Teatro S Carlo, the *opera seria Achille in Sciro*. Its enthusiastic public reception instantly made him the most sought-after composer in Naples, resulting in commissions from the French ambassador, the Saxon court, the Teatro S Carlo and theatres in other Italian cities. On 1 October 1755, after the death of Francesco Durante, the *primo maestro* of the Conservatorio di S Maria di Loreto, Manna was appointed interim teacher to assist the *secondo maestro* Pietro-Antonio Gallo. From 13 February 1756 he served with Gallo as co-*maestro*, and then also with the aging Nicola Porpora. Manna's last theatrical works were *Enea in Cuma*, a serenata written for a fête given by the ambassador of the Maltese Knights on 4 September 1760, and (according to some sources) the *opera seria Temistocle*. He then retired from the operatic scene and composed only sacred music. After the death of Francesco Feo in January 1761, he succeeded him as *maestro* of the SS Annunziata church, and on 9 May of the same year resigned from the Loreto conservatory citing his many duties, which included that of *maestro* of the cathedral of S Gennaro. On his nameday, 19 September 1762, Gennaro Manna was celebrated with the performance of a cantata written in his honour by Vincenzo Bidognietti (score *GB-Lbl*). He remained active and revered as a composer of sacred music, and during the last decade of his life produced his major oratorios.

Unlike Jommelli, Latilla, Abos and other Neapolitan opera composers of his generation, Manna never ventured into the field of *commedia per musica*, but concentrated exclusively on *opera seria*. Although his contributions to opera belong primarily to the first 12 years of his career, they established his contemporary fame as one of the most important composers of his time. He expanded the *galant* stylistic tendencies of Francesco Feo and solidified pre-Classical characteristics. Many of his arias are guided by the sonata principle and exhibit diversified textures, crescendo patterns, discriminate scoring for wind instruments, and forceful drives to cadences with strong confirmations. Arias in major keys often expressively articulate the beginning of the secondary tonal area with contrasting phrases in the minor key. Contemporaries praised the suavity, vivaciousness and delicate beauty of his arias: Burney, who heard one of Manna's sacred works performed under the composer's direction in Naples (October 1770), noted the ingenious instrumental accompaniment of the vocal solos, and lauded the music for its 'fancy and contrivance'.

Gennaro's older brother Giacinto (*b* Naples, 13 Sept 1706; *d* Naples, 11 March 1768) was a harpsichordist at the Neapolitan opera houses S Bartolomeo and Fiorentini as well as S Carlo (1761–5). His sister Teresa married the composer Giuseppe de Majo in 1728; their gifted son Gian Francesco de Majo received some of his musical training from Gennaro.

WORKS

STAGE

music lost unless otherwise indicated

Tito Manlio (os, 3, G. Roccaforte), Rome, Argentina, 21 Jan 1742; arias in *A-KR* and *D-SWl*, Acts 2 and 3, *I-Nf**

Siroe re di Persia (os, 3, P. Metastasio), Venice, S Giovanni Grisostomo, carn. 1743; Act 3, *Nf**

Festa teatrale per la nascita dell'Infante (serenata), Naples, June 1743, not perf.; pt 1 only, pt 2 by N. Logroscino

Artaserse (os, 3, Metastasio), Naples, S Carlo, 4 Nov 1743, aria *GB-Lbl* [rev. of L. Vinci]

Achille in Sciro (os, 3, Metastasio), Naples, S Carlo, 20 Jan 1745; *D-Hs, MÜs*

L'Impero dell' universo con Give (componimento drammatico, R. Calzabigi) per Festiggiase gli sponsali del real Defino colla reale infanta di Spagna D. Maria Teresa, Naples, 3 Aug 1745; *I-Nf** (dated 26 July 1745)

Lucio Vero, ossia Il Vologeso (os, 3, A. Zeno), Naples, S Carlo, 19 Dec 1745; *Nf**, *Rsc*

Arsace (os, 3), Naples, S Carlo, carn. 1746; Act 3, *Nf*, 'Ombra che pallida', aria, *A-Wn*

La clemenza di Tito, Messina, carn. 1747 [according to *StiegerO*]

Adriano placata (os), Ferrara, Bonarossi, carn. 1748; aria *I-Nc*

Lucio Papirio dittatore (op, 3, Zeno), Rome, Dame, carn. 1748; *D-Bsb*, Acts 1 and 2, *I-Nf**

Il Lucio Papirio (os, 3), Palermo, S Cecilia, carn. 1749 (incl. arias by other comps.), lib *Bc, PLn*

Eumene (os, 3, Zeno), Turin, Regio, carn. 1750

Didone abbandonata (os, 3, Metastasio), Venice, S Giovanni Grisostomo, carn. 1751; *D-Hs, MÜs*

Demofoonte (os, 3, Metastasio), Turin, Regio, carn. 1754; *Nf**

Enea in Cuma (serenata), 4vv, Naples, 4 Sept 1760; 1 pt, *Nf*

Temistocle (os, Metastasio), Piacenza, Ducale, carn. 1761

Il Sacrificio di Melchisedec (componimento drammatico, M. Tarzia), Naples 1776; lib *Ma*

Arias in *I-MAav, Mc, Nc*

OTHER SECULAR VOCAL

Addio di Nice à Tirsi (cant, M.A. Walpurgis, Electoral Princess of Saxony), 2vv, str, *D-Dl*

20 arias, 1v, with various insts, *Dl*; several other arias *I-Nc*

SACRED

MSS in I-Nf unless otherwise stated

Orats: Gios, re di Giuda, 6vv, Naples, 17 July 1747; Sepultra Sarae sive Pietas in mortuos, 4vv, 1748; Davide, in Nove, Palermo, 1751, lib *PLcom*; Rubri maris trajectus, 4vv, Monte Reale, 1761; Debora, 4vv, per i morti, 1769, perf. 1780; Assuero, 4vv, per i morti, 1770; Esther, 4vv, per i morti, 1770; Il Seraficio Alverna, Naples, S Chiara (n.d.), lib *Nn, Rsc*; Israelis liberato sive Esther, Monte reale (n.d.), lib *Fc, Nc*

Over 150 works with insts, many in dated autograph scores or parts: 12 Masses (1 dated 11 Sept 1755; 2 for double chorus; 2 Breve with Cr, San, Ag; 2 Masses *I-Nc*: 1769, 1773); Gl; 7 Gl movements (arias); Domine ad adiuvantum, 5vv; 2 Cr, 2 Mag: 5vv, 16vv; 3 TeD, incl. 1 for 2vv, 1 Feb 1764; 2 Lits; 14 Lessons (Lamentations) for Holy Week Nocturns, incl. 1 dated 1738; Christus, Responses for Holy Week; 2 Lessons per la notte del SS Natale (*I-Nc*); 3 Jube Domine benedicere, 1v, 2 dated 1746, 1751; 3 Lessons for Office of the Dead; 3 Benedictus Dominus, incl. 1 dated 1777; Confitebor, 1v; 12 Dixit, incl. 7 dated 1740, 28 May 1746, May 1748, 20 Oct 1750, 31 July 1752, July 1754, May 1767; 2 Laudate pueri, 1v, incl. 1 dated 1740; Salmi brevi; Gloria patri, 1v; 2 Veni sponsa; Lauda Sion, 5vv, Jan 1755; Pange lingua; 4 hymns, incl. 1 dated April 1789, possibly by Gaetano Manna; Tantum ergo, 1v, Jan 1752; Cori di anime penanti, 5vv; 35 motets with chorus; 1 motet, *Nc*; 14 solo motets and arias; several sacred cants and arias; Passio secundum Joannem

Some works attributed to Giuseppe de Majo, Gianfrancesco de Majo, and Gaetano Manna in *I-Nf*, particularly MSS initialled 'G.M.', are possibly by Gennaro Manna.

(3) Gaetano Manna (*b* Naples, 12 May 1751; *d* Naples, 1804). Composer, son of Giacinto Manna and Antonia Giuda, and nephew of (2) Gennaro Manna, who fostered his musical career. He studied at S Maria di Loreto under the *primo maestro* P.A. Gallo and the *secondo maestro* F. Fenaroli. In 1778 he became *maestro di cappella* of the SS Annunziata, Naples, when his uncle Gennaro retired from the position in his favour. He also served as *secondo maestro* of Naples Cathedral and as *maestro di cappella* of the Oratorio di S Filippo (1793) and various other local churches. In his sacred compositions he followed Gennaro Manna's trend towards an

individualized treatment of instruments, particularly in solo parts. Together with Paisiello and Zingarelli he represents the final phase of the 18th-century Neapolitan tradition in church music.

WORKS

all for voices and instruments; all in I-Nf

Il trionfo di Maria Vergine (orat), Naples, 15 Aug 1783; Fesstegiandosi la traslazione del sangue del glorioso vescoro e martire S Gennaro (cant., G. di Silva), Naples, 3 May 1788; lib *Mb, Nn*

Ky–Gl masses, 25 Nov 1781, 30 March 1789; several mass movts; Lamentazione; Lezione terza del Venerdi Santo; lit, 2 Dec 1776, per S. Nicola la Carità; motetto a più voci, 10 April 1780; Tota pulchra, 1v, insts, per la Maddelena, 1773

There were several other Neapolitan musicians named Manna whose relationship to this family has not been established: Giovanni Manna, listed as a student at the Conservatorio di S Onofrio in 1689; the bass Don Antonio Manna (*d* Naples, 1727), called 'Abbate Camerino', who served with the royal chapel (1697), at the Vienna Hofkapelle (1700–05), and again at the royal chapel (from 1708); and Nicola Manna (*d* 1721), Antonio's brother and a violinist in the royal chapel.

HANNS-BERTOLD DIETZ

Manneke, Daniël [Daan] (*b* Kruiningen, Zeeland, 7 Nov 1939). Dutch composer, conductor and organist. At the Brabant Conservatory of Music in Tilburg he studied the organ with Hub Houët and Louis Toebosch and composition with Jan van Dijk (1963–7). Later on he studied the organ with Kamiel d'Hooghe in Brussels and composition with Ton de Leeuw in Amsterdam. In 1972 he began teaching (improvisation and analysis of 20th-century music) at the Sweelinck Conservatory in Amsterdam, where he is now a highly regarded teacher of composition. He is founder and conductor of the chamber choir Cappella Breda. His prizes and awards include the Prize for Young Artists from the Province of Zeeland (1967), the Fonteyn Tuynhout Prize (*Three Times*, 1977), the Hilvarenbeekse Muziekprijs in 1980 for *Pneoo* and the City of Tilburg's composition prize in 1985 for *Er vallen stukken* for carillon. In 1999 he was awarded the Cultuurprize of the province of Noord Brabant.

His compositions vary in character from the aggressive quality of *Diaphony for Geoffrey*, a testimony to his affinity with Varèse and Xenakis, to the diatonic, gentler sound of *Messe de Notre Dame* in which he seeks a mood of consolation. A celebrator of live performance, he stresses the fact that the spatial effects incorporated in his music cannot be experienced through a commercial recording. His important *Archipel* series is inspired by the difference in identity of the people of the various islands of Zeeland.

HUIB RAMAER

Mannelli, Carlo [Carluccio di Pamfilio] (*b* Rome, 4 Nov 1640; *d* Rome, 6 Jan 1697). Italian composer, violinist and singer. Through his mother he was related to Lelio Colista. He spent virtually his entire career in Rome. While still a boy he entered the service of Prince Camillo Pamphili, training as a soprano castrato and violinist. On 25 August 1650 and 1651 he sang soprano under the name Carluccio in the patronal festivities at S Luigi dei Francesi. After a stay in Venice, where in 1657 he sang the role of Lerino in P.A. Ziani's opera *Le fortune di Rodope e Damira* at the Teatro S Apollinare, he is recorded from 1660 as a salaried soprano at S Luigi dei Francesi, Rome. He took part as a singer from at least 1659 until 1664 in the processions on Maundy Thursday and in the oratorio performances in Lent of the Arciconfraternita del SS Crocifisso at S Marcello. He is also listed as a violinist in these performances under the name Carluccio (sometimes Carlino) di Pamfilio, together with CARLO CAPROLI, who is easily confused with him. In 1668 he took over Caproli's position as first violinist, and not until 1690 did Corelli, who played alongside him in

the *primo coro* of instrumentalists from 1676, succeed him in this position. Mannelli first performed with Caproli as a violinist on 21 June 1665 in a ceremonial mass at S Luigi dei Francesi. He took over Caproli's place there in 1676 but in this capacity was succeeded by Corelli as early as 1682 and from then until shortly before his death performed at S Luigi only as a soprano. He is recorded as first concertino violinist at S Giovanni dei Fiorentini on 3 February 1675 (Corelli was in the ripieno) and at S Maria del Portico in 1682.

Mannelli belonged to an academy founded by G.B. Giansetti. In his capacity as a violinist, he was from 15 November 1663 a member of the Congregazione di S Cecilia and was *guardiano* of its instrumentalists' section in 1684 and 1696. In his will he made this congregation the sole heir of his property, published compositions and violin, and bound it to create from the proceeds of his considerable bequest an endowment for those of its members who were in need. This endowment and also a chaplaincy that he had founded at S Carlo ai Catinari did not expire until the late 18th century. He bequeathed the manuscript and copies of his *Studio del violino* to Martino Bitti. The Accademia di S Cecilia, Rome, possesses an unsigned oil portrait of him at the age of 52 (it is reproduced in *MGG1*, viii, pl.85/1).

Mannelli's teachers are not known by name, but he was probably influenced by some of the leading Roman musicians of the day: Caproli, G.A. Leoni (in the field of violin music) and Lelio Colista; three *maestri di cappella* of S Luigi dei Francesi, Stefano Fabri (ii), A.M. Abbatini and Ercole Bernabei; and also Carissimi, who directed an oratorio at S Marcello in 1660. As a singer he did not achieve the fame of other Roman castratos, such as Siface and the Fede brothers, but his importance as a violinist is incontestable. Together with C.A. Lonati he provides a hitherto overlooked link in the tradition of violin playing between Caproli and Corelli and was without doubt one of the 'più valorosi professori musici di Roma' whom Corelli referred to in a letter to Matteo Zani (1685) and whose example he followed.

Mannelli's trio sonatas, opp.2–3, most of which are in five movements, present considerable technical demands and are notable for the specially cantabile nature of their slow movements and for their fugal allegros, which are designated canzonas. Such features also inform the trio sonatas of Purcell. Mannelli's only surviving piece for solo violin and continuo uses double stopping extensively. His lost *Studio del violino*, the first Italian violin tutor since Gasparo Zanetti's of 1645, was no doubt a product of his teaching. A number of vocal works ascribed in several different sources to 'Carlo del Violino' have previously been attributed to Mannelli, but, there is ample evidence to indicate that they are, in fact by Carlo Caproli.

Mannelli, Francesco. *See* MANELLI, FRANCESCO.

Manners, Charles [Mansergh, Southcote] (*b* London, 27 Dec 1857; *d* Dundrum, Co. Dublin, 3 May 1935). Irish bass and impresario. He studied in Dublin, at the RAM and in Italy. He joined the chorus of the D'Oyly Carte company in 1881 and made his solo début in 1882 at the Savoy Theatre, London, creating the role of Private Willis in *Iolanthe*. In 1887 he joined the Carl Rosa company and in 1890 was engaged by Lago for his autumn season at Covent Garden, where he sang Bertram in Meyerbeer's *Robert le diable*. Two years later, he sang Prince Gremin in the first performance in England of *Yevgeny Onegin* at the Olympic Theatre, London. In 1893 he sang in New York, and in 1896–7 he toured South Africa with the soprano FANNY MOODY; on their return to England in 1898 they formed the Moody-Manners Company, which lasted until 1916. At the height of its popularity there were two companies touring under their management, numbering 175 and 95. The company gave seasons at Covent Garden in 1902 and 1903, and a longer one at Drury Lane in 1904. Manners was instrumental in the creation of the Glasgow Grand Opera Society, and the Moody-Manners collection of musical items was donated to the Mitchell Library, Glasgow. He was a strong advocate of a national operatic enterprise, and his writings include 'The Financial Problem of National Opera by the People for the People' (*ML*, vii, 1926).

HAROLD ROSENTHAL/GEORGE BIDDLECOMBE

Manners, Fanny. *See* MOODY, FANNY.

Mannes, David (*b* New York, 16 Feb 1866; *d* New York, 25 April 1959). American music educator, violinist and conductor. He studied the violin in New York with August Zeiss and Carl Richter Nicolai, in Berlin with Heinrich de Ahna and Carl Halíř and in Brussels with Eugène Ysaÿe. After several years as a freelance player in theatre orchestras in New York, he was invited by Walter Damrosch in 1891 to join the New York Symphony Society, of which he subsequently became concertmaster (1903–12). His lifelong concern with the provision of music education for the young, the underprivileged and the informed amateur inspired him to join the faculty of the Music School Settlement (later the Third Street Music School Settlement at East 3rd Street, New York) in 1901, one of the first schools of its kind (1894) in the USA, and the Music School Settlement for Colored Children in Harlem (1912). In 1911 he assumed directorship of the Music School Settlement. In the same year he helped to establish the National Association of Music School Societies. He also founded and conducted a series of free concerts at the Metropolitan Museum of Art (1918–47).

In 1916 Mannes and his wife, Clara Mannes (née Damrosch) (*b* Breslau, Germany [now Wrocław, Poland], 12 Dec 1869; *d* New York, 16 March 1948), founded the David Mannes Music School (from 1953 the Mannes College of Music) in New York. Several notable European

composers were engaged as teachers of theory and composition, including Ernest Bloch (1917–20), Rosario Scalero (1919–28) and Hans Weisse (1931–9). Weisse had been a student of Heinrich Schenker and, as a result of his appointment, the school became the first American educational institution to offer instruction in Schenkerian analysis; in 1933 it sponsored the publication of Schenker's *Five Graphic Analyses* for use in Weisse's classes.

Clara Mannes, who had studied the piano with her father Leopold Damrosch and in Berlin with Busoni, taught privately in New York and also coached chamber music ensembles at the Mannes School. She gave recitals in London and throughout the USA with her husband, often performing in cities where no such concerts had ever been presented.

CHANNAN WILLNER/DEBORAH GRIFFITH DAVIS

Mannes, Leopold Damrosch (*b* New York, 26 Dec 1899; *d* Martha's Vineyard, MA, 11 Aug 1964). American music educator, pianist and composer. The son of David and Clara Mannes, he studied the piano with Elizabeth Quaile, Guy Maier, Berthe Bert and Alfred Cortot, and composition with Johannes Schreyer, Percy Goetschius and Rosario Scalero. At Harvard College, where he graduated in 1920, he studied music and science. He made his début as a pianist on 29 October 1922 at Aeolian Hall, New York, in a performance of Saint-Säens's *Le carnaval des animaux*. He taught theory and composition at the Mannes School (1927–31, 1946–8), of which he was director (1940–48), co-director (1948–52) and president (1950–64). Under his leadership the school's curriculum became the first in the USA to incorporate Schenker's approach to music analysis.

Mannes's compositions are mostly small-scale pieces for piano or organ, works for vocal ensembles and solo songs. Exceptions to this include his orchestral Suite, which won a Pulitzer travel Scholarship for composition in 1925, his String Quartet in C Minor (1927), for which he received a Guggenheim Fellowship, and a Suite for two pianos (1925). In 1948 he formed the Mannes Trio with the violinist Vittorio Brero and the cellist Luigi Silva. After two seasons Brero was replaced by Bronislav Gimpel and the group became known as the Mannes-Gimpel-Silva Trio. Gimpel withdrew in 1955, after which Mannes ceased to perform in public. In 1962 Mannes became president of the Walter W. Naumburg Foundation.

Mannes was also a scientist with a strong interest in photography; with Leopold Godowsky jr he conducted experiments that led to the invention of the Kodachrome Color Process (1935).

For bibliography *see* MANNES, DAVID.

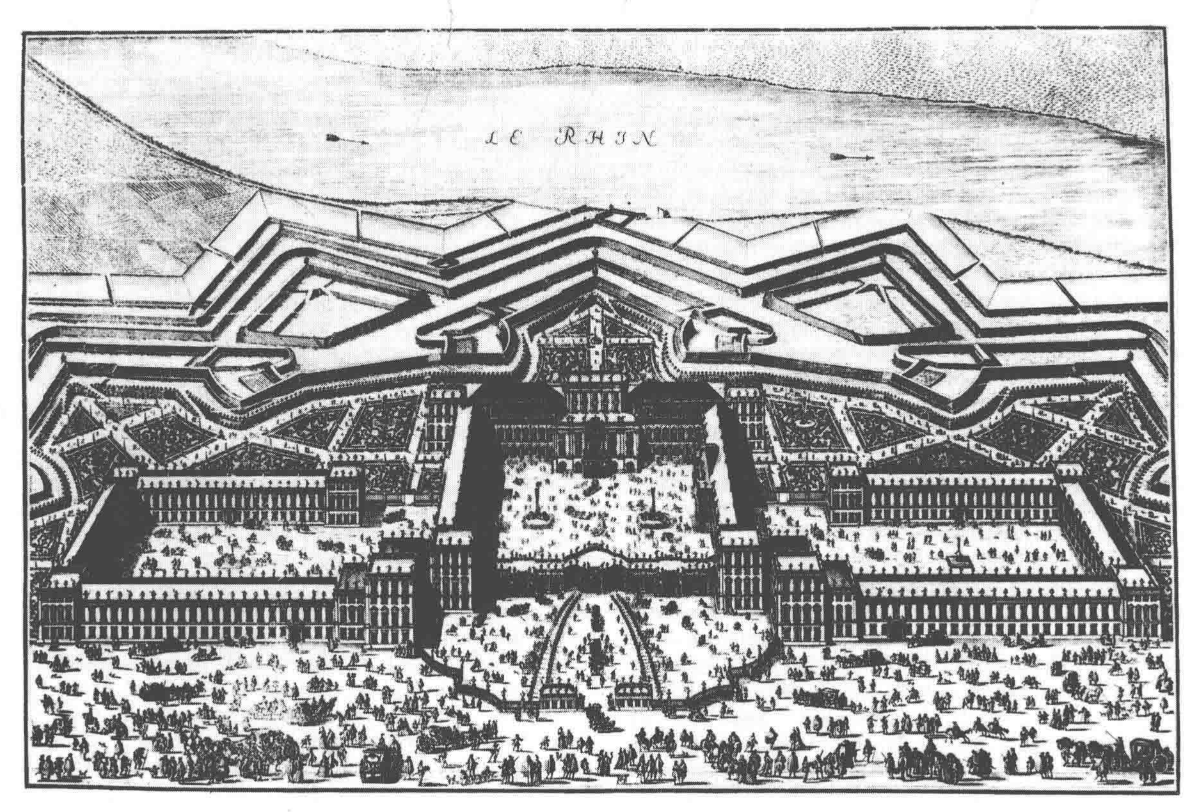
MSS in *US-NYma*

CHANNAN WILLNER/DEBORAH GRIFFITH DAVIS

Mannheim. City in Germany. It is situated at the confluence of the Rhine and Neckar rivers, in the south-west.

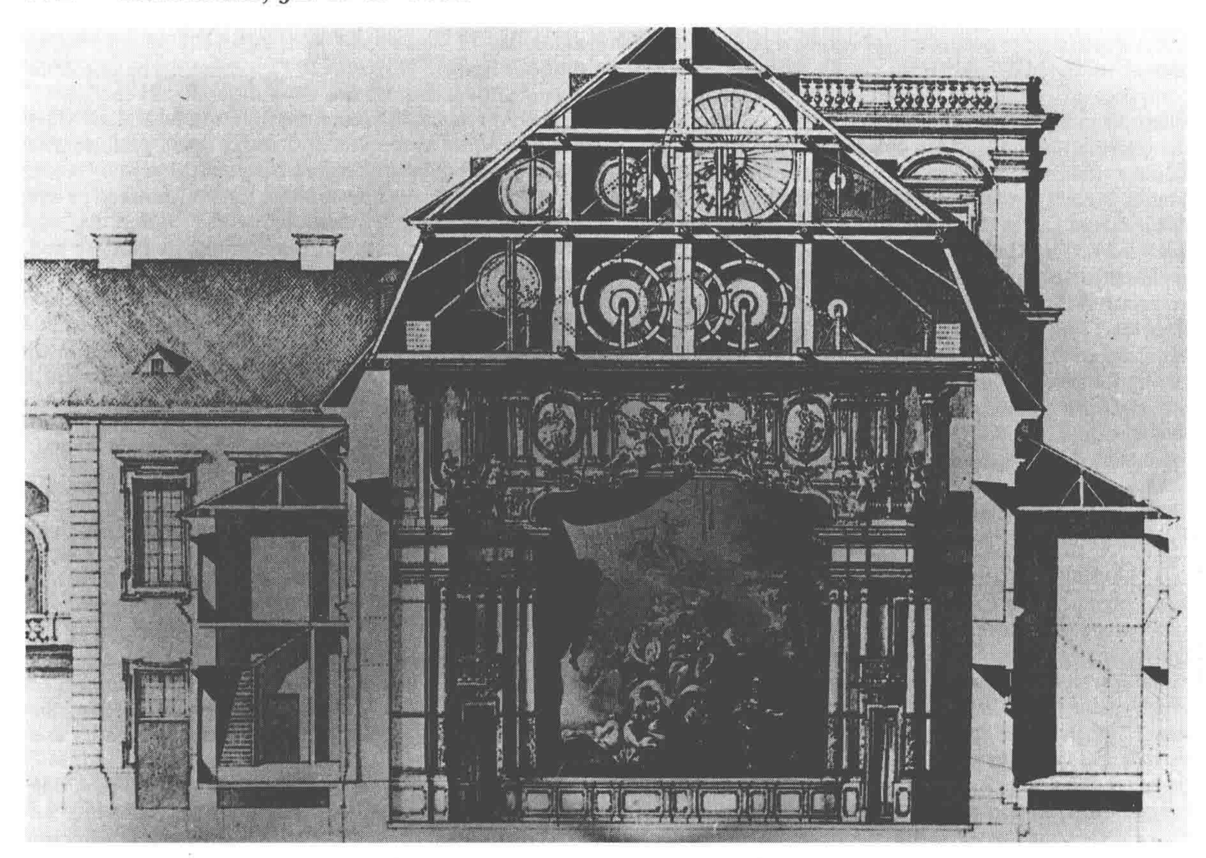
1. 1720–42. 2. 1743–1800. 3. 19th century. 4. Since 1900.

1. 1720–42. Elector Friedrich IV of the Palatinate founded Mannheim in 1606 as a fortress; it was destroyed several times during the 17th century, so there was little musical life until 1720, when the town was unexpectedly chosen as the new electoral seat. In 1716 Duke Carl Philipp, governor of the Tyrol, Upper Austria and the Austrian provinces in Swabia, became Elector Palatine in succession to his brother Johann Wilhelm, who had ruled from Düsseldorf. Carl Philipp remained in Innsbruck as governor until May 1717 and then, after a sojourn at his family seat in Neuburg an der Donau, established his residence in Heidelberg in September 1718. There the approximately 20 musicians he had brought with him from Innsbruck, some of whom had already served him at his first court in Breslau, were combined with more than 30 Düsseldorf musicians who had been employed by Johann Wilhelm. However, the severe damage done to Heidelberg castle during the War of the Spanish Succession, and conflicts between the arch-Catholic elector and the Protestants there, led Carl Philipp to move his court from the confines of Heidelberg to the expanses of the Rhine plain. The entire court entered Mannheim in November 1720.



Carl Philipp initially hoped to help the impoverished Palatinate by economizing at court, and the number of musicians was reduced; but the restrictive measures did not last long. The elector mounted an extensive building programme, especially for the palace, the largest Baroque complex in Germany (fig.1). The Palatine court was soon one of the most brilliant in Europe. The earliest extant roster of the musical establishment, dated 1723, contains the names of 53 singers and instrumentalists, plus 12 trumpeters and two timpanists. Noteworthy is the cosmopolitan make-up of the Kapelle, reflecting its origins in Breslau, Innsbruck and Düsseldorf: it included musicians from Germany, Austria, Silesia, Bohemia and even the Low Countries, in addition to the expected Italians, most of whom were singers. Names of French and Alsatian origin appear mainly on later lists: Mannheim benefited from close familial connections with Duke Christian IV of Zweibrücken,who acceded in 1735 and had extensive Alsatian holdings.

In 1723 the two Kapellmeister were Jacob Greber and Johann Hugo Wilderer; the Konzertmeister was Gottfried Finger. There were also members of the famous Weiss family of lutenists and theorbo players, notably Johann Sigismund Weiss, the vice-Konzertmeister. In the next surviving roster of the Palatine court (1734) the number of musicians had fallen to 42. Carlo Grua is listed as Kapellmeister, an appointment that reflects the preference for church music in Carl Philipp's reign, the result of deaths in his family and of the strong influence of the Jesuits. Five oratorios, as well as masses and other sacred works by Grua, were performed before 1742; oratorios by Wilderer and others had been heard previously. Otherwise, music at the court between 1720 and 1742 took the form of concerts and secular vocal performances. There was no suitable theatre, so the elector had to be content, as in Heidelberg from 1718 to 1720, with pastorals, serenatas, cantatas and less ambitious dramatic works such as comedies and intermezzos.



Grua's name also occurs in connection with the musical apogee of Carl Philipp's reign on 18 January 1742, as composer of the opera *Meride* (to a libretto by the Viennese court poet Pasquini), performed to inaugurate the opera house built in the palace by Alessandro Galli-Bibiena (fig.2). The performers included the famous singers Rosa Pasquali from Munich, Rosa Gabrieli from Bologna and (in the title role) the castrato Mariano Lena, who worked in Mannheim from at least 1734 to 1778, eventually as court musical director. Contemporary accounts of the opera house, which was destroyed in the siege of 1795, praise it as one of the largest and most beautiful of its day. *Meride* was part of the festivities, lasting for several days, which celebrated the marriage of the elector's granddaughter Elisabeth Auguste to his nephew and heir, Carl Theodor. Though there is no explicit record of performances by Johann Stamitz on this occasion, he is likely to have met the young Carl Theodor either then or at the imperial coronation in Frankfurt the following month.

2. 1743–1800. The old elector died on the last day of 1742. His successor Carl Theodor has become well known as a patron of science, commerce and above all the arts. During the early years of his reign musical activities seem to have been restricted, owing among other things to his involvement in the War of the Austrian Succession. The year 1748, however, marked the start of an extraordinarily rich and vigorous period in court life, which spanned the next 30 years. Beginning the seasonal schedule of events, announced in pocket almanacs issued yearly, were the so-called 'gala days' in celebration of Carl Theodor's name day (4 November) and, especially in later years, that of Elisabeth Auguste (19 November). The festivities extended over four or five days and typically included a 'grand Apartement' (reception) followed by a High Mass and a banquet at the palace, a major opera performance (often a première) with ballets between the acts, a French comedy and/or an *opera buffa*, and a concert in the Rittersaal in the central tower of the palace. Equally splendid were the carnival celebrations in January and February, with the electress's birthday on 17 January as the focus of the celebrations; here the types of event just enumerated were supplemented by masked balls in the ball house of the palace, normally two per week. Such magnificence did not go unremarked by visitors to Mannheim, who were generally admitted without charge to the various performances. When, for example, Voltaire visited for the first time, in 1753, his secretary Collini described Mannheim as 'probably the most brilliant court in Germany' and listed its attractions as 'hunts, operas, French plays and musical performances by the first virtuosos of Europe'.

Carl Theodor's reign also brought substantial increases in the quality and size of the Mannheim Kapelle. During the 1740s he was able to attract such musicians as the composer Franz Xaver Richter, the flautist Johann Baptist Wendling, the oboist Alexander Lebrun and a number of fine Bohemian horn players, while the 1750s saw the arrival of the new co-Kapellmeister Ignaz Holzbauer and the cellists Innocenz Danzi and Anton Fils. In addition, the elector carefully groomed the more talented offspring of musicians already at court, often by financing an extended period of study in Italy; such was the case, for

1. Project for the electoral palace, Mannheim: engraving by Heinrich-Jonas Ostertag and Bartol Anton Coentgen after a drawing by the architect Jean Clémens de Froimont, 1725; the palace as actually built shows several important later changes in design

2. Cross-section of the opera house built in the electoral palace, Mannheim, by Alessandro Galli-Bibiena, opened 1742 (ex-Städtisches Reiss-Museum, Mannheim, destroyed World War II)

example, for the violinist Christian Cannabich, who succeeded Johann Stamitz as Konzertmeister after the latter's death. At the same time, the Kapelle grew from a total of 52 singers and instrumentalists in 1748 to 78 by 1778, when the court left for Munich. However, such figures must always be treated with caution, as they come from almanacs, payroll lists and other documents which are often inconsistent in their inclusion of retirees, supernumeraries and the like. For this and other reasons, the number of instrumentalists given for the Kapelle as a whole should never be treated as synonymous with the actual size of the orchestra on a specific occasion (see Wolf, 1993).

While the stately buildings at Mannheim, including the palace and the most noteworthy Baroque church in south-west Germany, were appropriate to a seat of government, at the elector's summer residence of Schwetzingen the gardens held pride of place. Since the palace there had a Rococo theatre, built in 1752 (now restored and used for the Schwetzingen Festival), even in summer the elector did not have to go without opera or the more frequent intermezzos and comedies. A full complement of court musicians followed him to Schwetzingen. The higher-ranking were allowed to take their families; the town's parish registers thus provide important source material for the biographies of Mannheim musicians (see Mossemann, 1969). The electress normally spent the summer at Oggersheim.

Johann Stamitz was already known as a virtuoso violinist before his Mannheim period (*c*1741–1757), and he subjected the string players of the Hofkapelle to a very thorough training. Although Stamitz was still listed among the violinists in 1744 and 1745, his salary of 900 gulden, higher than that of either of the two Konzertmeister, Carl Offhuis and Alexander Toeschi, shows the elector's unusually high esteem of him. He had probably already begun to lead the orchestra by September 1744, when Offhuis retired, and in 1750 he received the title of director of instrumental music. From this string-playing hothouse came a succession of performers of such exceptional virtuosity that Burney wrote in 1772: 'There are more solo players and good composers in this, than perhaps in any other orchestra in Europe; it is an army of generals, equally fit to plan a battle, as to fight it'.

Such were the violinists Christian Cannabich, Ignaz Fränzl, Carl Joseph and Johann Baptist Toeschi, Georg Zardt, Wilhelm Cramer, the Eck brothers and Stamitz's sons, most of whom proved their outstanding technique at the Concert Spirituel in Paris. This technique lay at the root of the Mannheimers' famous orchestral discipline. The precision of attack, the ability to reflect the smallest dynamic nuance, the uniform bowing, and the fact of every player's having been trained, or having had his technique polished, by Stamitz and subsequently by Cannabich, produced unprecedented results. Cannabich was a first-rate teacher and orchestral trainer, and as a conductor was admired by Mozart. Schubart wrote of him:

He has invented a totally new bowing technique and possesses the gift of holding the largest orchestra together by nothing more than the

nod of his head and the flick of his elbow. *He* is really the creator of the coordinated execution characteristic of the Palatine orchestra. He is the inventor of all those magical devices that are now admired by the whole of Europe.

The wind players at Mannheim were also exceptional artists. Mozart admired and wrote music for the flautist Wendling, the oboist Ramm and the bassoonist Ritter. The Dimmler, Lang, Lebrun and Tausch families all supplied able wind players. Clarinettists were first engaged in 1758–9, and their use at Mannheim was later an acknowledged influence on Mozart. Finally, as noted by Burney, the electoral orchestra included a large number of composers who wrote for themselves and exploited the unusual technical abilities of their colleagues: hence the instrumental effects associated with Mannheim. The result was an orchestra that Leopold Mozart labelled 'undeniably the best in Germany'. Schubart went even further, claiming that 'no orchestra in the world has ever excelled that of Mannheim in performance'.

The notion of a 'Mannheim School' appears before the end of the 18th century, but referred then principally to the uniformity of the players' technique and the concomitant orchestral discipline. Early in the 20th century Hugo Riemann extended the concept to encompass a 'Mannheim School' of composers at Carl Theodor's court (and in fact many others with only tenuous connections to Mannheim). In so far as this term implies a uniform compositional approach deriving from Johann Stamitz, rather than merely serving as a handy geographical label, it is clearly inappropriate for the first generation of composers at Mannheim; this group includes figures of such disparate backgrounds and styles as Richter and Holzbauer, both of whom were already mature, established composers when they arrived there. By contrast, the next generation, born around 1730 (including Cannabich, the Toeschi brothers and Fils), were all students of Stamitz, and consequently their musical style is more unified and consistent than that of the older composers (*see* MANNHEIM STYLE). It is also important to note that the compositional principles characteristic of Mannheim were being developed simultaneously throughout Europe, though perhaps not with the same concentration on effect and orchestral brilliance. The relative ease of travel to Paris and the unusual degree of encouragement from Carl Theodor created excellent conditions for the propagation of musical developments. The elector was glad to allow his artists frequent leave to travel, rightly believing that they were among his most effective ambassadors. The exclusiveness of Riemann's claim that the 'Mannheim School' was the direct precursor of Viennese Classicism is no longer tenable, but Mozart was undeniably influenced by the musical culture of Mannheim, and Beethoven was familiar with it through the repertory of the Bonn Kapelle.

Chamber music, with the elector frequently playing the flute or cello, was regularly performed, and once or twice a week the whole court assembled for the 'Académie de Musique' in the palace Rittersaal, at which they drank tea, played cards and listened to varied programmes featuring symphonies, concertos and vocal music. It was at one of these concerts that Mozart appeared on 6 November 1777, playing a concerto and a sonata and also improvising.

The court opera flowered under the direction of Holzbauer, Kapellmeister from 1753 to 1778. The electoral court poet Mattia Verazi was the favourite librettist. *Opera seria* was represented by works of Holzbauer as well as such non-residents as Galuppi, Traetta, Jommelli, Hasse, Majo, Piccinni, Salieri and others. J.C. Bach enjoyed especial favour in the 1770s: he visited Mannheim in 1772–3 and wrote his *Temistocle* (1772) and *Lucio Silla* (1775) for the court opera. In the title roles of both operas he was able to exploit the abilities of the tenor Anton Raaff, for whom Mozart also composed. Opera design was taken over from Galli-Bibiena by Stefan Schenk, and later by Lorenzo Quaglio.

Aside from an isolated instance of intermezzos known to have been performed in 1726, Italian comic opera does not seem to have been cultivated until the 1750s, and then chiefly when the court was at Schwetzingen. Among the works presented then were Hasse's *Porsugnacco* for the opening of the Schwetzingen theatre in 1752 and two *dramme giocose* by Galuppi in 1756–7. From 1769, and particularly after the dismissal of the French comedians in 1770, *opera buffa* was presented regularly in the main opera house. Composers included Piccinni, Galuppi, Sacchini, Gassmann, Salieri, Anfossi and Paisiello. French *opéra comique* was evidently represented at court mainly by performances of Gluck's *Cythère assiégée* at Schwetzingen in 1759, by German adaptations of several works as Singspiele and by Italian adaptations, with recitatives, of Grétry's *Zémire et Azor* and *La rosière de Salency* in 1775–6. However, since 1770 the troupe of Theobald Marchand had visited Mannheim each summer (while the court was in Schwetzingen), giving public performances of operas in German in a temporary theatre on the Fruchtmarkt; most of these works consisted of German adaptations of *opéras comiques*, an exception being Vogler's Singspiel *Der Kaufmann von Smyrna* (1771). These productions were influential in the burgeoning efforts at court during the 1770s to promote serious German opera. The first successful attempt in this direction was a production of Wieland's *Alceste*, with music by Anton Schweitzer (1775), followed by Holzbauer's *Günther von Schwarzburg* (1777). Notable singers in the Mannheim company were the castratos Lena, Pietro Sasselli and Lorenzo Tonarelli, the tenors Raaff (probably the best of his day) and Franz Hartig and the basses Giovanni Battista Zonca and Ludwig Fischer (for whom Mozart later wrote the role of Osmin in *Die Entführung aus dem Serail*). Prima donnas included Rosa Gabrieli-Bleckmann, Dorothea and Elisabeth Wendling, Maddalena Allegranti and Franziska Danzi-Lebrun. The ballet and ballet-pantomime owed much to the ballet masters François André Bouqueton and Etienne Lauchery. Ballet music was composed by the Toeschis, Fränzl and, with particular success, Cannabich.

Standards were no less high in church music at court. A letter Wieland wrote after Matins in the palace church on Christmas Day 1777 illustrates this: 'I would rather lose some of my fingers than forgo Christmas Day Matins in the court church at Mannheim; to me it is a fête that surpasses all other fêtes and operas'. The oratorios performed regularly on the evening of Good Friday in the court chapel included works by Hasse and Wagenseil as well as local productions. The most important composers of sacred music among the Mannheimers were Grua, Holzbauer, Richter, Johannes Ritschel and Georg Joseph Vogler. After studying in Italy at the elector's expense, Vogler dominated church music in Mannheim from about 1776; he was made court chaplain and (by 1777) second Kapellmeister. His influence was so great that in 1777 he

was able to break off a performance (the second in Germany) of Handel's *Messiah* because, as he wrote, 'the whole audience was yawning'. From 1776 he ran a private conservatory, the Mannheimer Tonschule, many of whose pupils became well known (Bernhard Anselm Weber, Franz Danzi, Peter Ritter and others). Mozart expressed an unfavourable opinion of him when he was in Mannheim in 1777–8.

Mozart visited Mannheim on four occasions: as a child prodigy at a Schwetzingen concert in 1763, with his mother in 1777–8, on his way back from Paris in 1778, and to attend a performance of his *Le nozze di Figaro* at the Nationaltheater in 1790. His hope of gaining a court appointment in 1777–8 was not realized. His visit was ill-timed, since the elector was waiting for news of developments at the Bavarian court; the Elector of Bavaria died on 30 December 1777 and the inheritance fell to Carl Theodor, who was then obliged to move his court to Munich. After the merger of the Mannheim and Munich musical establishments in August and September 1778 about one third of the musicians remained on the Rhine, to provide the orchestra of the newly founded Nationaltheater and of the Liebhaberkonzerte (concerts for music lovers), initiated by Fränzl. Under Baron Wolfgang Heribert von Dalberg, the Intendant appointed by Carl Theodor, the Nationaltheater was the scene of early triumphs in the nascent German Classical theatre, employing such actors as Iffland, Beck and Beil, and giving the first performances of Schiller's early plays. Mozart's mature operas were all staged there relatively early. The music publisher J.M. Götz promoted the works of Haydn and Mozart and had the distinction of issuing, in about 1782, Beethoven's first printed work, the Piano Variations on a march by Dressler (WOO 63).

3. 19TH CENTURY. In Napoleon's reorganization of the German states Mannheim fell to the Grand Duchy of Baden (1802). The existence of the city's principal cultural institution, the theatre, was threatened by the general economic weakness, especially as Dalberg's successor was unable to maintain its artistic standards. The Liebhaberkonzerte were renamed Hofmusikakademien in 1807 and their costs defrayed by the theatre orchestra alone; the city's symphony concerts are still called the Musikalische Akademien and are organized by the theatre orchestra at its own risk. The middle classes for the first time formed societies with names reflecting their interest in music or song: Musikalisches Conservatorium (1806) and its successor Museum (1808), Harmonie (1814, incorporating the two previous societies), Rheinischer Musikverein (1816), Musikverein (1829), Liedertafel (1840), Liederkranz (1842), Dilettanten-Verein (1859, later Philharmonischer Verein) and Verein für Klassische Kirchenmusik (1879). The lawyer and composer Gottfried Weber did much for middle-class musical life, particularly as chairman of the Museum society and as a writer on music. Carl Maria von Weber (no relation) was his guest while in Mannheim (1810–11), and it was with him, Meyerbeer and Alexander von Dusch that Weber founded the private Harmonischer Verein in 1810. The Mannheim première of *Der Freischütz* was given in 1822, and the subsequent great popularity of his namesake's music there owed much to Gottfried Weber's advance publicity; but even with the support of Grand Duchess Stephanie he failed to procure a post at the Nationaltheater for the composer.

Between 1816 and 1822 the Rheinischer Musikverein organized seven Rhenish music festivals, at which the oratorios of Handel and Haydn were performed. The Nationaltheater contributed opera and the activities of its orchestra, and also briefly maintained a conservatory of music (founded 1819, director Peter Ritter). During the 1820s Karl Ferdinand Heckel (1800–70) revived music publishing in Mannheim; he opened his music shop on 20 October 1821, and added a music publishing house to it the same year. In 1822 he bought up the Worms publishing firm of Kreitner, and procured the services of his brother, the painter and lithographer Christoph Heckel. Thereafter the Heckels published numerous portraits of musicians as well as a 'cheap edition of all Mozart's operas in complete piano reduction' (1827–30) and the first miniature scores of the Viennese Classics (from 1847). After Karl Ferdinand Heckel's death his sons Karl and Emil carried on both sides of the business.

In the early days of the travelling virtuoso Mannheim was visited by Spohr and J.B. Cramer (both in 1817), Paganini (1829), Schröder-Devrient (1830), the young Vieuxtemps (1833), Liszt (1840 and 1843) and Jenny Lind (1846). Their concerts were held in the Redoutensaal, the theatre or the ballrooms of various hotels. Lortzing appeared as a singer in 1830, but his visit in 1844 was a more memorable occasion, when his *Zar und Zimmermann*, which he conducted in the Nationaltheater, was rapturously received. Berlioz was less successful; his music was largely misunderstood when he gave a concert in Mannheim in 1843. Though public chamber concerts had been given in 1823 in the Mühlau-Saal, it was not until 1839 that the section leaders of the Nationaltheater orchestra began to give regular string quartet recitals.

The building of docks on the Rhine laid the foundation for Mannheim's modern prosperity as a centre of trade and industry. Music and the stage both benefited to an unexpected degree from generous patronage. The second Badisches Sängerfest in 1845 brought numerous choirs to the city. The seventh Mittelrheinisches Musikfest in 1870 and (particularly) the 33rd Tonkünstlerversammlung of the Allgemeiner Deutscher Musikverein in 1897 were events of more than regional significance, testifying to the musical reputation the city had been able to re-establish.

That musical renaissance had begun with the appointment in 1834 of Franz Lachner as first Kapellmeister. His brother Vincenz succeeded him in 1836 and remained until 1872, during which period the orchestra became one of the best in Germany and the opera repertory is believed to have been the largest of any German theatre. Lachner's only blind spot seems to have been for Wagner. It was the publisher Emil Heckel (1831–1908) who established Mannheim's reputation as a stronghold of Wagnerism; he founded the first Wagner-Verein in 1871, and it was in Mannheim that the idea of the Bayreuth festivals began to be realized. Wagner himself conducted a well-received concert on 30 December 1871, and in 1879 the Nationaltheater celebrated its centenary, using only its permanent company, with its first performance of the entire *Ring* cycle. The first German Wagner memorial was unveiled at Heckel's house in 1887. Musical life, which had been rather conservative and bourgeois under Vincenz Lachner, grew increasingly progressive from the 1870s onwards: world premières were given of Hermann Goetz's *Der Widerspenstigen Zähmung* (1874) and *Francesca von Rimini* (1877), Wolf's *Der Corregidor* (1896), Felix

Weingartner's *Genesius* (1897) and Eugen d'Albert's *Gernot* (1897). Conductors at the theatre and of the Musikalische Akademien included Weingartner, Paur and Reznicek. In 1895 the critic Willi Bopp mourned the lack of a public for chamber music, which was cultivated by only one of the city's many music clubs – the Conzertverein für Kammermusik. Bopp deliberately promoted Brahms as a counterpoise to the city's Wagnerism, and in 1893 invited him to Mannheim, where he had already played and conducted in 1886. A conservatory had existed since 1868; it was incorporated in the Hochschule für Musik founded under Bopp's direction in 1899. In 1933 this became the Städtische Hochschule für Musik und Theater, and in 1971 the Staatliche Hochschule für Musik und Darstellende Kunst Heidelberg-Mannheim.

4. SINCE 1900. The Nationaltheater achieved new distinction during the intendancies of Carl Hagemann (1905–10, 1915–20) with pioneering expressionist productions. Artur Bodanzky (Kapellmeister 1909–15) was succeeded by Furtwängler (1915–20), Erich Kleiber (1922–3) and others. The theatre building, the centre of the city's cultural life, was destroyed in 1943, and the new building opened in 1957. Since the war the musical directors of the Nationaltheater and of the Musikalische Akademien have been Richard Laugs, Fritz Rieger, Eugen Szenkar, Herbert Albert, Horst Stein, Hans Wallat, Wolfgang Rennert, Peter Schneider, Friedemann Layer, Miguel A. Gomez-Martínez and Jun Märkl.

Under Eugen Bodart (conductor 1951–9), Wolfgang Hofmann (from 1959) and Jiři Malát, the Kurpfälzisches Kammerorchester, founded in 1951, has devoted itself to the Mannheim School and has also given many first performances of modern works in radio broadcasts. Popular concert venues include the rooms of the Rosengarten, and the Rittersaal and University Great Hall in the palace, which was rebuilt after its destruction in World War II and now serves as the seat of the University of Mannheim. Oratorio societies, four amateur orchestras, the Mozart Gesellschaft founded in 1931, the municipal Musikschule and the Hochschule, and one of the largest music libraries in southern Germany all make valuable contributions to the musical life of the modern city.

Mannheim School. *See* MANNHEIM, §2.

Mannheim style. A style found in instrumental works, primarily symphonies, by composers active at the electoral court of Mannheim from about 1740 to 1778. A principal feature of the style is its tendency to exploit dynamic effects. On the small scale, this may take the form of either an abrupt or a graduated change in dynamic level within a short span of time, adding to the expressive and dramatic character of the work (exx.1 and 3). On a larger scale, Mannheim symphonies often incorporate an extended, thematically independent crescendo passage or *Walze* ('roller', sometimes anachronistically translated as 'steamroller'; ex.2). Such passages, most of which contain a rising melodic line over a pedal point or oscillating bass pattern, typically reappear at important junctures within the movement, contributing a sense of profile to the form. The predilection at Mannheim for striking dynamic effects doubtless finds its best explanation in the superlative quality of the Mannheim orchestra; the renowned precision of execution of this orchestra, as well as its large size, served to foster such a compositional approach. This approach did not, however, originate with Mannheim (as claimed by Riemann, who published the first detailed description of the Mannheim style). Rather, it originated to a substantial degree in Italy, most notably in opera of the early Classical period and its associated instrumental music; Italian opera formed the core of the Mannheim

Ex.1 Johann Stamitz: Symphony in E♭, DTB/Wolf E♭-5a, first movement

operatic repertory and was thus familiar to the composers there. For example, crescendo passages comparable in virtually every respect with those of Johann Stamitz occur at an earlier date in overtures to operas by Nicolò Jommelli.

Riemann also devoted considerable attention to the Mannheim melodic style, delineating a large number of what he termed 'Mannheimer Manieren' or Mannheim figures. (The idea of a 'mannered Mannheim style' was not new; Leopold Mozart remarked on the '*vermanierierten* Manheimmer goût' in a letter to his son, 11 December 1777, probably referring to the Piano Sonata K309/284*b*.) The figures discussed by Riemann are primarily orchestral and include the 'sigh' (see ex.1), the *Bebung* (see ex.3), and the 'rocket' (a rising triadic theme in equal note values). While Riemann was correct in pointing out the existence of these and other melodic clichés in the Mannheim symphony, he again erred in assigning priority to Mannheim: all can be found earlier in Italy, not only in vocal but in instrumental music, especially opera overtures. It is true that many symphonies from Stamitz's late period, and particularly those of Anton Fils and the later Mannheim symphonists, make more extensive and more stylized use of these melodic conventions than do contemporaneous Italian opera overtures; but their origin was Italy, and by mid-century they were in use all over Europe.

The same may be said of various other characteristics often associated with the Mannheim style, for instance homophonic texture, slow harmonic rhythm, and thematic differentiation within expositions of fast movements

Ex.2 Johann Stamitz: Symphony in D, DTB/Wolf D-3, first movement

(e.g. the use of a contrasting secondary theme). In the realm of orchestration, though, the Mannheim symphony goes well beyond its Italian models, especially in the idiomatic quality of its scoring and the frequent introduction of solo passages for woodwind and horns. Here again the excellence of the electoral orchestra played an obvious role, although the soloistic use of the wind in particular may also betray French influence (e.g. that of Rameau).

Riemann's conception of the Mannheim style, which has formed the basis of many more recent accounts, can

Ex.3 Johann Stamitz: Symphony in D, DTB/Wolf D-2, first movement

also be criticized for its tendency to view that style as monolithic, cutting across boundaries of both genre and personal idiom. In the case of genre, his description actually applies only to selected symphonies and a few orchestral trios and quartets: the chamber style at Mannheim differs markedly from the orchestral, the concerto style is generally conservative, and the operatic and church styles lean heavily on Italian vocal models, to mention the most notable exceptions to the common stereotype. Even within the symphony, the variety of styles remains great, conspicuously so in the works of those composers active at Mannheim before 1760 (Stamitz, F.X. Richter, Ignaz Holzbauer and Fils). In sum, musical style at Mannheim encompasses a wide range of stylistic types, evident not only between composers, but also within the work of each composer.

EUGENE K. WOLF

Manning [Payne], **Jane** (**Marian**) (*b* Norwich, 20 Sept 1938). English soprano. She studied with Greene at the RAM (1956–60), with Husler at the Scuola di Canto, Cureglia, Switzerland (1964), and in London with Frederick Jackson and Yvonne Rodd-Marling. She made her professional début in London in 1964 singing Webern, Dallapiccola and Messiaen, and has continued to specialize in 20th-century music, to which her gifts – clear tone, precise pitching and an enthusiastic aptitude for new 'effects' – are well suited. Some of the problems, and joys, of performing modern works are discussed in her essay 'Contemporary Vocal Technique', *Composer*, no.38 (1971), 13–15. She has also published *New Vocal*

Repertory (London, 1986–98), and contributed a chapter on the interpretation of Messiaen vocal music to *The Messiaen Companion* (London, 1995). Particularly associated with new British music, she has given the first performances of works by Bennett, Birtwistle, Davies, Hopkins, Le Fanu, Lumsdaine, Maconchy, Payne (whom she married in 1966) and others; in 1973 she received a special award from the Composers' Guild of Great Britain and in 1988 she founded the group Jane's Minstrels. Her recordings, with them and as a soloist, include works by Schoenberg, Lutyens and Payne, the complete song cycles of Messiaen and the complete vocal works of Satie. Extensive work for the BBC has taken her from light music to *Pierrot lunaire*, Lumsdaine's *Aria for Edward John Eyre* and Babbitt's *Philomel*, as a member of The Matrix she has performed Perotinus and Cage, and she has also appeared in oratorio and Classical opera. She teaches in the USA (since 1982) and in England, where she became a visiting professor at the RCM in 1995.

PAUL GRIFFITHS

Mannino, Franco (*b* Palermo, 25 April 1924). Italian composer and pianist. He took diplomas in the piano with Renzo Silvestri (1940) and in composition with Mortari (1947) at the Rome Conservatory. Composition prizes he has won include the Diaghilev award in France in 1956 for the best new work of the year, his *azione coreografica Mario e il mago* (his first work for the theatre). In 1969-70 he was artistic director at the S Carlo in Naples; in 1990 he was appointed head of the Accademia Filarmonica in Bologna.

In *Mario e il mago* the libretto was by Luchino Visconti, the story based on Thomas Mann. Mannino subsequently returned to Mann for the subjects of the *dramma Luisella* (1963) and for the Indian legend *Le teste scambiate* (1988). His desire to bring to the stage a huge variety of different dramatic situations led him towards realism in the opera *Vivì* (1955), comedy in the intermezzo *Il quadro delle meraviglie* (1963), based on Cervantes, magical fantasy in the fairytale *Il principe felice* (1981), based on Wilde, and Biblical and historical tragedy in, respectively, *La stirpe di Davide* (1958) and *Il diavolo in giardino* (1962).

Mannino has been equally productive and shown similar facility in his chamber, vocal and orchestral music, including 12 symphonies. Compositions for solo instrument and orchestra have often been for himself as pianist or in collaboration with performers, such as the Kogan family. These include the Piano Concerto op.17 (1954), and the Concerto for three violins and orchestra op.40 (1965). A taste for traditional, grand choral and orchestral canvases has led to such pieces as the cantata on short poems by Soviet women poets *Supreme Love* op.174 (1977) and the *Missa pro defunctis* op.233 (1983), dedicated to Leonid Kogan. Mannino has also written over 100 film soundtracks, working with such directors as Huston, Leonide Moguy, Mario Soldati and Visconti.

Such a diverse output is accompanied by facility of invention and an eclectic style, partly the result of his study of works of the past and his conservative concern not to alienate the public. Operatically, stylistic innovations are used within a conception that affirms Italian post-*verismo* and, in a wider context, late Romantic musical tradition.

RAFFAELE POZZI

Mannis, José Augusto (*b* São Paulo, 23 June 1958). Brazilian composer. He studied electronics at the São Paulo Industrial Engineering School (FEI) (1976–8), at

the same time studying composition at São Paulo State University with Conrado Silva and Michel Philippot. A scholarship from the French government took him to Paris, where he continued his composition studies with Manoury and Reibel. In 1983 he completed with distinction his studies in electro-acoustic music and research at the Paris Conservatoire, and in 1987 he earned a Master's degree at the University of Paris VIII under the supervision of Daniel Charles. From 1983 to 1989 he was active in the French groups L'Itinéraire, Espace Musical, La Grande Fabrique, Groupe de Recherches Musicales, and in other ensemble groups of new music in Germany, Italy and Spain. Since 1989 he has been the coordinator of CDMC-Brasil (the Brazilian branch of the French Centre of Documentation of Contemporary Music) at the University of Campinas, where he teaches. From 1990 to 1997 he devised programmes of contemporary music on Radio Cultura FM, São Paulo, sponsored by the Padre Anchieta Foundation.

Mannis has received numerous commissions from such bodies as the French Ministry of Culture, Radio France and the São Paulo International Biennal. His works are written in a wide range of genres: traditional instrumental music, electro-acoustic compositions, combinations of electronic media and traditional instruments, soundtracks for films and pieces for theatre or radio. Within this diversity priority is constantly given to sound experimentation and research, and to the relationship of sound to musical gesture. He has also collaborated with the experimental group *.* of Campinas in multimedia installations and in events on the internet, such as the *Carnival eletrônico* (1994). In the 1990s he published *MUSICON*, a guide to contemporary Brazilian music.

GERARD BÉHAGUE

Manns, Sir **August** (*b* Stolzenberg, 12 March 1825; *d* Norwood, London, 1 March 1907). German conductor. Born of poor but musically sympathetic parents, Manns acquired extensive youthful experience as a string and woodwind player. At the age of 20 he played in the Danzig regimental band and theatre orchestra; in 1848 he was a member of Gungl's orchestra in Berlin, and appeared as solo violinist and subsequently conductor at Kroll's Gardens. In 1851, during three years with the 33rd Prussian Regiment, he arranged the classical repertory for military band and conducted concerts 'à la Strauss' with the strings. These eight years in the Prussian army were followed by a brief appointment in London in May 1854 as assistant conductor at the Crystal Palace under Schallehn, who took unfair advantage of Manns's junior position. Work in the provinces and a summer season conducting in Amsterdam led to his appointment, at the invitation of the secretary, George Grove, as conductor at the Crystal Palace on 14 October 1855.

Together, Grove and Manns made the Saturday Concerts (1855–1901) for many years the principal source of classical music at popular prices. Manns immediately reconstituted the excellent Crystal Palace Band of wind instruments as a symphony orchestra, and vigorously and enthusiastically directed the music during the October to April Saturday afternoon season. Most of his players were engaged on a permanent basis and rehearsals were thorough. He included many leading European soloists and press criticism was generally favourable. Seldom-played works frequently appeared in Manns's programmes, which included chronological cycles of Schubert and Schumann symphonies, works by Berlioz and Wagner and many first London performances, as well as a generous proportion of English composers.

August Manns: caricature by 'Spy' (Leslie Ward) from 'Vanity Fair' (13 June 1895)

As director of music at the Crystal Palace, Manns also arranged music for the daily round-the-year concerts and festivals there, constantly challenging the public with his programming. At the time of his death, the *Musical Times* estimated that Manns had conducted 12,000 orchestral concerts during his 42 years at the Crystal Palace. He succeeded Costa as conductor of the triennial Handel Festival from 1883 to 1900. Apart from appearances as a veteran conductor, his outside engagements were few, the most notable being his concerts with the Glasgow Choral Union Orchestra (1879 to 1887) and an 1859 promenade season at Drury Lane. There were festivals at Sheffield in 1896 and 1899 and Cardiff in 1896. Manns received many decorations and awards; he was naturalized in 1894 and knighted in 1903.

Manolov, Emanuil (*b* Gabrovo, 7 Jan 1860; *d* Kazanlak, 2 Feb 1902). Bulgarian composer, conductor and teacher. After the liberation of Bulgaria from Turkish domination in 1878 he studied for about two years at the Moscow Conservatory and composed instrumental music in the currently fashionable salon style. In 1885 he returned to Bulgaria. He composed the first Bulgarian opera, *Siromakhkinya* ('The Poor Woman'), to his own libretto based on a poem by Ivan Vasov. Although unfinished, the opera was performed by an amateur company in Kazanlak in December 1900; the score was later completed by others. Manolov wrote two orchestral works and arranged a number of folksongs for brass band. He also composed chamber music, choral works and songs, and 87 children's songs collected in the series Slaveyevi Gori ('Nightingale Woods').

LADA BRASHOVANOVA

Manoury, Philippe (*b* Tulle, 19 June 1952). French composer. He studied composition first with Gérard Condé and Max Deutsch at the Ecole Normale de Musique, and subsequently with Michel Philippot, Ivo Malec and Claude Ballif at the Paris Conservatoire (1974–8). Parallel to his studies at the Conservatoire, he explored computer-assisted composition under the guidance of Pierre Barbaud. Following a two-year stay in Brazil (1978–80), he worked from 1981 as a guest researcher at IRCAM. In 1987, he was appointed professor of composition and electronic music at the Lyons Conservatoire.

Manoury's captivating work confirms him as one of the most gifted composers of his generation, and above all one who has successfully assimilated the teachings of his elders in a highly personal way. The relationship between composition and perception is at the heart of his preoccupations: strongly influenced from the start by Stockhausen and Boulez, he initially attempted a synthesis between serial 'pointillism' and the control of sound masses characteristic of Xenakis. Manoury came to public attention with the première at the 1974 Metz festival of *Cryptophonos* for piano, the first of his works involving the accumulation of microscopic details to form a globally perceptible whole. This experiment was followed up in *Numéro cinq* for piano and 13 instruments (1976), in the String Quartet, and above all in *Numéro huit* for large orchestra (1976). When referring to the works of this period, Manoury draws comparisons with the density of Jackson Pollock's paintings.

From 1982 to 1986 Manoury worked on *Zeitlauf* and *Aleph*, important vocal-orchestral works, each lasting more than an hour, which are as far removed from serial techniques as from Xenakis's probability theory. In an attempt to provide memorable features to orientate the listener's perception, these scores privilege harmonic polarizations and a new approach to repetition. *Zeitlauf* explores a polyphonic conception of time, subsequently developed in *Aleph*, in which four types of temporal process – fragmented, unfolding, static and circular – are presented successively then simultaneously. If Manoury's elaboration of the same material, seen constantly under different angles, is indirectly reminiscent of Stockhausen's works (*Momente*, for example), the idea of a labyrinthine path, particularly in *Aleph*, is drawn from the writings of Borges.

Between 1987 and 1991 Manoury used digital technology for the first time to effect real-time transformations of sound. The cycle *Sonus ex machina* is made up of four scores which exploit the relationship between instrument and computer. Working closely with the American mathematician Miller Puckette (creator of the program 'Max'), Manoury introduced an interactive element into the performance of this cycle. With *Jupiter* for flute, and above all with *Pluton* for MIDI piano and live electronics, Manoury exploited the enormous flexibility afforded by computer technology: pre-recorded passages in the solo instrumental parts are subsequently recognized by the computer which in turn activates a complementary response. The enrichment provided by this technique allows for a new distribution of sound in space, parallel to the numerous transformations which take place in the solo part, and stimulated the development of Manoury's concept of 'virtual scores'. *La partition du ciel et de l'enfer* marked an important step, confronting as it did the flute from *Jupiter* and the MIDI piano of *Pluton* with an instrumental ensemble (which includes a second piano). Though not part of the cycle, *En echo* for soprano and live electronics explores these characteristics still further.

Like the formal trajectory of *Aleph*, in which each new stage integrates the preceding ones, the phases of Manoury's output proceed by accumulation. The valuable experience acquired in *Sonus ex machina* was put to use in his first opera project, *Sorwell*. Influenced by flashback techniques, and in particular Orson Welles's film *Citizen Kane*, Manoury worked for several years on this score. He eventually abandoned the opera, but salvaged from it *Chronophonies* for voice and large orchestra. Sumptuously orchestrated, the *Prélude de la nuit du sortilège*, which also draws on *Sorwell* material, constitutes the prelude to the second, successfully completed opera project, the fruit of a collaboration with the writer Michel Deutsch and the producer Pierre Strosser. Using *Prélude*'s basic material, the opera *60e parallèle* suggests a constant renewal through the linking of different temporal segments, some of great density, some static, as in the earlier interlude *Wait* from *Chronophonies*. Integrating techniques from preceding pieces, *60e parallèle* is the work which reunites Manoury's principal preoccupations: the confrontation between text, orchestra and live electronics in a score based on different conceptions of time.

ALAIN POIRIER

Manowarda, Josef von (*b* Kraków, 3 July 1890; *d* Vienna, 24 Dec 1942). Austrian bass of Polish birth. He studied in Graz, where he sang from 1911 to 1915. After three years at the Vienna Volksoper and a further period of study, he made his début at the Staatsoper as the Spirit Messenger in the première of *Die Frau ohne Schatten* (1919). He continued to sing regularly in Vienna even after 1934, when he moved to Berlin. At Salzburg he was heard first in 1922 and at Bayreuth in 1931; he became closely associated with both festivals, his Mozart roles including Osmin in *Die Entführung*, while at Bayreuth he sang most of the Wagnerian bass parts. Elsewhere he also took the bass-baritone roles of Wotan and Hans Sachs. Recordings, some of actual performances, capture the authority and power of his stage performances but also expose unevenness in his vocal production.

J.B. STEANE

Manrique de Lara (y Berry), Manuel (*b* Cartagena, 24 Oct 1863; *d* St Blasien, Baden, 27 Feb 1929). Spanish composer, folklorist and music critic. His father was a captain of a marine infantry battalion, and he began his musical training under a military bandsman in his father's regiment. In the early 1880s, while stationed in Madrid as a second lieutenant, he began to study harmony, counterpoint, fugue and composition with Ruperto Chapí, remaining his sole disciple until Chapí's death in 1909. During these years he devoted most of his spare time to composition. He was a member of the Sociedad Filarmónica Madrileña (1901–11) and a founder-member of La Asociación Wagneriana Madrileña (inaugurated 4 May 1911). He was music critic for the periodical *El mundo* (1907–15) and also contributed articles to *ABC*. He also conducted numerous concerts of the Sociedad de Conciertos, Madrid, and the S Cecilia choral society. In 1914, when he became a member of the Real Academia de Bellas Artes de San Fernando, he chose as his inaugural address 'Orígenes literários de la trilogía wagneriana' (*Arte musical: revista iberoamericana*, iii, Madrid, 1917, pp.64–72); as a critic he was a staunch supporter of Wagnerian opera in Spain. During the 1920s he fought in the Moroccan war, as colonel of a marine infantry batallion, and later (1927) published memoirs of his campaigns there.

Manrique de Lara's interest in folklore was prompted by his association with the renowned Spanish scholar R. Menéndez Pidal, who introduced him to the living oral tradition of Hispanic balladry (Romancero) during a field trip to Navas de Marqués, north-west of Madrid (1905). Their collaboration continued at the Centro de Estudios Históricos, for which Manrique de Lara was commissioned in 1911 to collect ballads among the Sephardi communities of the Near East (Sarajevo, Belgrade, Sofia, Salonica, Lárisa, Istanbul, Izmir, Rhodes, Beirut, Damascus and Jerusalem). Later he continued his fieldwork while stationed in Spanish Morocco (1915–16), working mainly in Larache and Tetuán. During the summer months of 1914, 1916, 1917 and 1918 he carried out research in Spanish provinces. Some of his findings were published in 'Romances españoles en los Balkanes' (*Blanco y negro*, xxvi, Madrid, 1916, p.1285) and 'Romances castellanos' (*Eco de Tetuán*, 17 Oct 1915). In 1923, as brigadier-general, he returned to the Balkans, now as chairman of the Mixed Commission for the Exchange of Greek and Turkish Populations. His compositions include a symphonic trilogy *La Orestiada* (1890), a symphony (1890; in *E-Mn*), a string quartet (1895), the zarzuela *El ciudadano Simon* (1900) and an opera, *Rodrigo de Vivar* (*El Cid*) (1906).

Mansurov, Bakhram (Suleyman oglu) (*b* Baku, 12 Feb 1911; *d* Baku, 15 May 1985). Azerbaijani *tar* player. His family numbered several generations of musicians. His teachers were his father, Meshadi Suleyman Mansurov (1872–1955) and his uncle Mirza Mansur Mansurov (1887–1967). His grandfather, B.M. Meshadi Melik Mansurov (1833–1909), was director of the Baku Mugam School.

In 1929 Bakhram Mansurov finished his musical education. From 1932 to 1985 he worked at the Opera Theatre of Baku as a soloist and chorus master and accompanied arias in *mugam* operas by Uzeir Hajibekov (1885–1948), Muslim Magomayev (1885–1937) and Zul'figar Hajibekov (1884–1950). He also accompanied such celebrated *khanende* (*mugam* singers) as Dzhabbar Kargyagdï (1861–1944), Seid Shushinsky (1889–1965), Zul'fi Adïgezalov (1898–1963) and Khan Shushinsky (1901–79).

From 1941 until his death Mansurov taught a class in *mugam* at the A. Zeynalla Training College of Music in Baku. He had many pupils and founded his own school. Researchers from several countries including Russia, Uzbekistan and France consulted him on the subject of *mugam*. He also founded and directed a society of *mugam* connoisseurs and players, the Mugam Medzhlis, among whose members were musicians from Baku, the rest of Azerbaijan and Iran. His house was the forum for discussions of the art of *mugam*, a venue for study and events, and a meeting-place for musical figures from all parts of the former Soviet Union and several European countries; he also kept an extensive collection of sound recordings there.

FAIK CHELEBI

Mansuryan, Tigran Yeghiayi (*b* Beirut, Lebanon, 27 Jan 1939). Armenian composer. He has lived in Armenia since 1947, settling at first in Artik and moving in 1956 to Yerevan, where he attended the conservatory studying composition with Sar'yan before completing postgraduate work (1960–67). He then taught contemporary music there (1967–76) and composition from 1986, subsequently being appointed professor. He was later rector of the conservatory (1992–5). He became a member of the Armenian Composers' Union in 1967, was made an Honoured Artist of Armenia in 1984 and a People's Artist of Armenia in 1990. His work has been frequently heard in festivals across Europe.

The work of Tigran Mansuryan represents the avant garde of 20th-century Armenian music. Its novelty arises not from technological innovation but from the composer's discovery of the potential of tradition – that of both the present and the past, national and European. His music is characterized by a rational meditativeness typical of the Armenian mentality and which finds its natural expression in chamber music, its natural medium; it expresses a range of intense spiritual conditions from ephemerality to exaltation.

From as early as the mid-1960s, Mansuryan's work has fallen into three distinct categories: neo-classicism of the Bartókian variety (Concerto for organ and chamber orchestra, Partita for orchestra), serial structuralism and dodecaphony (Second Violin Sonata, Arabesques I and II), and stylized pastiche (*Notebook of Laments*, *Four Hayrens from Nahapet Kuchak*). The classicism of the Partita, in which the model of the Baroque suite is united with national thematic matter, is also found – transformed – in later works such as *Orator* for four instruments, the two cello and violin concertos, and the Third String Quartet. The second category, serial structuralism, which came into being in the 1970s, is notable for its pointilliste abstraction in the manner of Webern and Boulez (Piano pieces) and even neo-Impressionistic pastoralism (*Preludes* for orchestra, the vocal and instrumental *Madrigals*).

No less varied is Mansuryan's success in pastiche, in which he has developed principles of spatial organization of monody that are traceable to Komitas. This can be observed particularly in the projection of Armenian modes on to a harmonic vertical and the functions of individual parts within a texture, and also in the creation of heterophonic structures based on the variation of short melodic formulas. Beginning with *Tovem* and the slow movement of the Second Cello Concerto (marked by the composer *quasi parlando*), a specific national character is produced at the meeting-point between vocal and instrumental music: in the musical lexis of Mansuryan's output, the declamatory and rhetorical properties of Armenian Orthodox monody are adapted and transformed by the dynamics of rhythm and intonation (*Postlude* and the Viola Concerto).

WORKS

SVETLANA SARKISYAN

Manṣūr Zalzal al-Ḍārib. *See* ZALZAL.

Mantegazza. Italian family of violin makers and restorers. The family was active in Milan from about 1760 to 1824. The best-known violin maker of the family was Pietro Giovanni Mantegazza (*b c*1730; *d* Milan, 1 March 1803); a pupil of Carlo Ferdinando Landolfi, he made a good number of violins of comparable quality in the 1760s and 1770s. Early in his career he may have been in business with his brother Domenico. There was a long family association with the collector count Cozio di Salabue, beginning in 1776. Towards 1790 the Mantegazzas began a series of fine contralto violas, modelled in the Amati style and more classical in appearance than the earlier instruments. Although usually bearing the label of Pietro, they may have been made with the help of other members of the family. After Pietro's death the workshop passed into the hands of his sons, Francesco (*b* Milan, 29 July 1762; *d* Milan, 9 Nov 1824) and Carlo (*b* Milan, 16 August 1772; *d* Milan, 29 Jan 1814). They were more active as dealers and repairers than in making new instruments. An account of their activities is given in: C. Chiesa: 'Milanese Violin Makers', *Violin Conference: Dartington 1995*, 21–8.

CHARLES BEARE/CARLO CHIESA

Mantel, John Christian [Scheidemantel, Johann Christian] (*b* Erfurt-Gispersleben, 13 May 1706; *d* Great Yarmouth, 28 Dec 1761). English organist and composer of German birth. The son and grandson of Lutheran pastor-musicians, he entered Erfurt University in 1725 to study theology, and left in 1732 after the death of his mother, his father having died in 1729. His earliest mention in England is as a subscriber to Handel's opera *Faramondo* in 1738, around which time he became organist of South Benfleet, Essex. The parish church was acquiring a new organ, and Handel himself may have recommended Mantel for the vacant post (at £30 p.a.). In 1748 Mantel progressed to the more prestigious church of St Nicholas, Great Yarmouth, and a salary of £40. Here he directed church music and civic entertainments – including his own annual benefit concert – until he died.

The buoyant style of Mantel's music is typical of the Italian-influenced English late Baroque, despite his upbringing in the more solid Thuringian tradition of Pachelbel and the Bachs. The movements of his organ concertos and of his violin solos are imaginatively varied: *galant* elegance, sparkling soloistic passage-work, warm Corellian gravity, Vivaldian energy, and even a peasant dance with a drone bass. His solo chamber cantatas set the customary Arcadian texts (four Italian, one English) to melodies of gentle melancholy, the cello ritornellos containing passages of real eloquence.

WORKS

6 Setts of Lessons, hpd/org, op.1 (London, 1743)

6 Solos, vn/hpd, bc, op.2 (London, before 1748)

6 Concertos, org/hpd, op.3 (London, 1752), kbd pt only

5 chamber cantatas, S, bc, *GB-Cfm*

Lost MSS, listed in Mantel's will: trio sonatas, 2 fl, bc; voluntaries, org

DAVID GALBRAITH

Mantova (It.). *See* MANTUA.

Mantovani, (Annuncio Paolo) (*b* Venice, 15 Nov 1905; *d* Tunbridge Wells, 30 March 1980). British orchestra leader and violinist of Italian birth. He was taught the violin by his father Benedetto Paolo Mantovani, a violinist at La Scala (who later led the Covent Garden orchestra) and a professor of music at the Milan and Venice conservatories. Brought to England in 1912, Mantovani made his début at the age of 16 with the Bruch Violin Concerto no.1 and, after study at Trinity College of Music, in the 1920s he led a light orchestra and began to make radio broadcasts (1927). In the 1930s he formed his Tipica orchestra, playing in hotels, for West End musical shows and on radio. He was musical director for Noël Coward's *Pacific 1860* (1946) and *Ace of Clubs* (1950), both of which he co-orchestrated with RONALD BINGE, and for Vivian Ellis's *And So To Bed* (1951). In 1951 he achieved real celebrity, particularly in the USA, with a recording of *Charmaine*, using the 'cascading strings' effect devised with Binge, and with which Mantovani is especially associated. He toured widely internationally with his orchestra, with regular visits to the USA, and between 1953 and 1972 released 51 albums of light orchestral music. Although better known as an orchestral arranger, he also composed such light works as the *Toyshop Ballet*, *Serenata d'amore* and, with Bunny Lewis, the song *Cara mia*. For further reference, see J. Lanza: *Elevator Music* (New York, 1994), esp. 79–85.

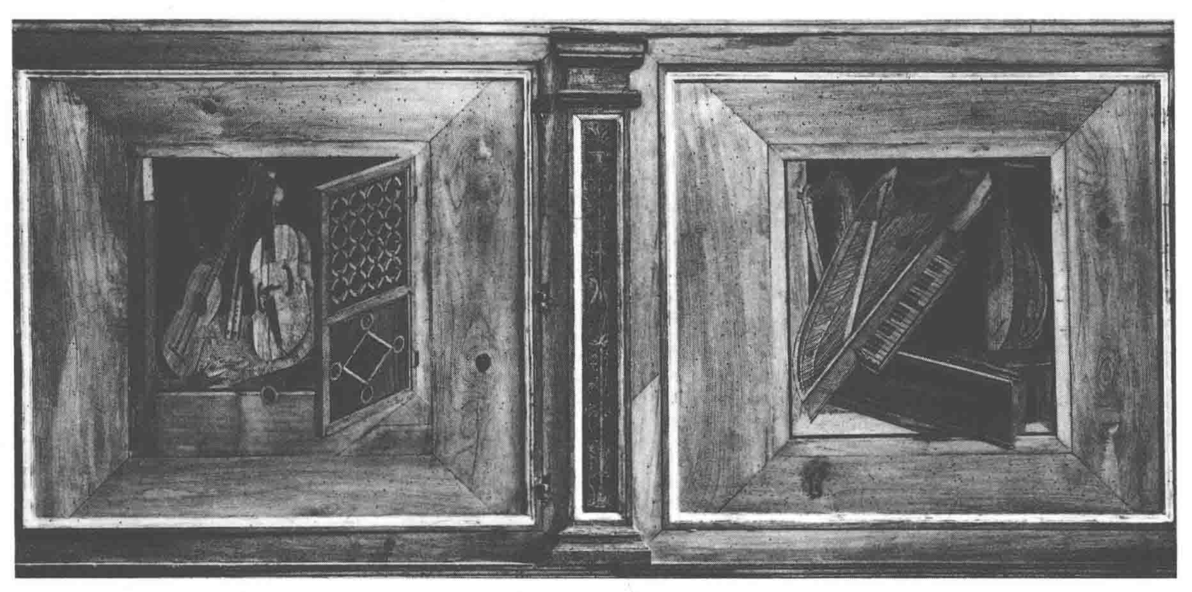
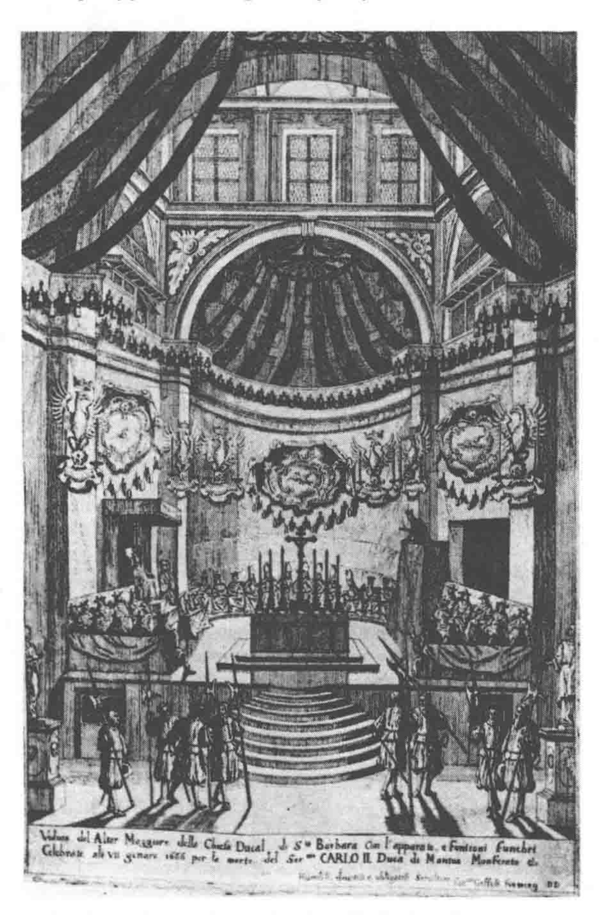
Mantua (It. Mantova). City in northern Italy. It was one of the most important musical centres of the Renaissance. Documents relating to music date from the late Middle Ages: Sordello da Goito, a 'bons chantaire e bons trobaire' from the province of Mantua, was active early in the 13th century. Music derived great benefit from the Gonzaga family, who established their supremacy at Mantua in 1328; as early as the 14th century Mantuan *piffari* and *trombetti* were famous throughout Italy. Instrumentalists, organists, singers and dancers were later attracted to the court from all parts of Italy and abroad, and music theory was taught by the humanist Vittorino da Feltre, who was at Mantua from 1425. Johannes Legrense worked in this environment, and Gaffurius was educated there in 1473–4. Well-known theatrical spectacles were supplied with new music, such as that by G.P. della Viola for *La representatione di Phebo e Phetonte* (1486) and that by the lyre player Atlante Migliorotti for the revival of Poliziano's *Orfeo* (1491).



At the end of the 15th century music was cultivated much more assiduously under the enthusiastic patronage of Isabella d'Este, daughter of Ercole, Duke of Ferrara, and a pupil of Johannes Martini (sometime composer at her father's court). The frottola, *strambotto*, ode, *capitolo* and sonnet all flourished, together with other similar poetico-musical forms. The pre-eminent musicians who worked at Mantua were Bartolomeo Tromboncino, a native of Verona who served the court intermittently from 1487 to 1513 and perhaps later, and Marchetto Cara, who was at Mantua from 1495 to 1525. In addition many major figures of the period had contact with the Gonzaga court: the Italians Michele Pesenti, Antonio Caprioli, Filippo da Laurana and the other frottolists, and such illustrious *oltremontani* as Josquin, Martini, Compère and Carpentras.

Much chamber music, both vocal and instrumental, was produced (figs.1 and 2), and there are also references to songs being performed during theatrical performances: Serafino Aquilano sang on stage, personifying Pleasure in a performance at court in 1495 of his own allegorical dialogue, and music and songs by Tromboncino were heard during Galeotto del Carretto's *Beatrice* (1499) and *Nozze de Psiche e Cupidine* (1502) and during the magnificent productions of comedies by Plautus (*Asinaria* and *Casina*) at Ferrara in 1502. The practice of preparing elegant and elaborate musical *intermedi* was established in this period and was subsequently maintained without interruption.



In 1510 Francesco II established a permanent *cappella*, something that had already been attempted by the Marquis Federico. The new choir, with singers mainly from Ferrara, was heard for the first time on 12 January 1511 in the churches of S Pietro (the cathedral) and S Francesco. The music master from 1513 to 1515 was

1. Studiolo (possibly used as a music room) of Isabella d'Este, after 1522, in the Palazzo Ducale, Mantua

2. *Marquetry panels showing contemporary musical instruments, in the Studiolo of Isabella d'Este, after 1522 (Palazzo Ducale, Mantua)*

3. *S Barbara, Mantua, during the obsequies for Carlo II Gonzaga, 7 January 1666: engraving by Frans Geffels*

G.M. da Crema; the singing teacher in 1515 was P. Domenichino. In 1534 Jacquet of Mantua was appointed *magister puerorum*; from 1539 he was *maestro di cappella* at the cathedral, which he himself had entered as a singer in 1527, the organist there from 1521 to 1556 being Girolamo Mantovano (de Adaldis).

The construction of the Palatine basilica of S Barbara (1562–5; fig.3) and the formation of its own *cappella* was the most important musical event of Duke Guglielmo Gonzaga's reign (1550–87). The liturgy of S Barbara, granted by the pope at Guglielmo's request, differed from that of Rome and gave rise to an unusual repertory of music. Various parchment choirbooks survive (in *I-MAc*), as does nearly all the original repertory of polyphonic music (in *I-Mc*). Wert was *maestro di cappella* at S Barbara from its foundation until 1582, after which, for reasons of health, he confined his activities to the private ducal chapel; his successor was G.G. Gastoldi. The organists were Cavazzoni (from 1565) and Rovigo (1590–97), and the organ was built by G. Antegnati.

Guglielmo Gonzaga, who was himself a composer, favoured many famous artists with his patronage. Alessandro Striggio (i) served the court from 1574. Between 1568 and 1587 there were dealings with Palestrina, who composed masses for S Barbara but did not accept the offer of a permanent post there. Soriano was active in the duke's private chapel from 1581 to 1586. Unsuccessful attempts were made in 1586–7 to engage Luca Marenzio.

Under Duke Vincenzo Gonzaga (1587–1612) music in Mantua again flourished on a magnificent scale. Among those who succeeded Wert as *maestro di cappella* in the ducal chapel were Benedetto Pallavicino (1596) and Monteverdi (1601). Monteverdi arrived in Mantua, followed by his brother Giulio Cesare, in 1589; he worked his way up from viola player to *maestro* and finally left the city in 1612. The eminent Mantuan Salomone Rossi, who effected a reform of Hebrew religious chant, also worked at the court, as director of instrumental music. The *maestro di cappella* at the cathedral from 1593 to 1597 was Lodovico Viadana, whose *Concerti ecclesiastici* (1602) were of great importance in the development of Baroque church music. G.G. Gastoldi was succeeded as *maestro di cappella* at S Barbara by Antonio Taroni and Stefano Nascimbeni.

Alongside this imposing amount of church music and chamber music (every Friday evening Duke Vincenzo gave a concert in the ducal palace), there were also theatrical entertainments: Monteverdi's *Orfeo* (libretto by Striggio, 1607); his *Arianna* and *Il ballo delle ingrate* and Marco da Gagliano's *Dafne* (all to librettos by Rinuccini and all performed at the festivities celebrating the wedding of Francesco Gonzaga and Margherita of Savoy in 1608; *L'Idropica* (Guarini, 1608), with Chiabrera's *intermedi* set to music; and *La Maddalena* (Andreini, 1617), with music by Monteverdi, Rossi, Muzio Effrem and A. Guivizzani. The court singers included Lucrezia Urbana, Caterina Martinelli and Adriana Basile. The Teatro Castello or Cavallerizza functioned from 1549; the ducal theatre (later called the Vecchio), opened in 1608 with Monteverdi's *Arianna*.

With Vincenzo's death the greatest period in Mantuan musical history closed. Musical activity tended increasingly to reflect that of other major centres, particularly Venice. Musicians working in Mantua during the 17th century included Frescobaldi (for a few months in 1615) and Effrem (1616–20); Sante Orlandi followed Monteverdi as *maestro di cappella* at court (1612–19) and was succeeded by Francesco Dognazzi (1619–43); Amante Franzoni was *maestro di cappella* at S Barbara (1613–20) and Marco Antonio Ziani later worked in the same church (from 1686). Ottavio Bargnani was organist at S Barbara (1607–27), Cazzati was *maestro di cappella* and organist at the church of S Andrea (1641), and Domenico da Bologna occupied the same post at the cathedral (from 1678). Opera continued to flourish: the *maestro di cappella* to the last duke of Mantua, Ferdinando Carlo, was the renowned Caldara (1701–7), whose earliest venture at Mantua had been a performance of *L'oracolo in sogno* (1699) in collaboration with Antonio Quintavalle and Carlo Francesco Pollarolo.

The end of the Gonzaga dynasty and the start of Austrian domination in 1708 meant that Mantua became subject to the cultural hegemony of Vienna. The theatres for the most part gave revivals of Viennese and Milanese productions, sung by artists recommended by Vienna. The Regio Ducale Teatro Nuovo opened in 1732 but was burnt down in 1781; it was reopened in 1783 with Sarti's *Il trionfo della pace*. Among the memorable first nights at the theatre were *La Candace o siano Li veri amici* (1720) and *Semiramide* (1732), both by Vivaldi, and *L'Alessandro nelle Indie* (1784) by the young Cherubini.

In the predominantly Arcadian climate of the mid-18th century, academies flourished again. The Accademia dei Timidi (a descendant of the Accademia degli Invaghiti of the Gonzaga) became the Real Accademia di Scienze ed Lettere (1767), which assimilated the Accademia Filarmonica and other similar institutions. The Teatro Accademico (known as the 'Scientifico'), designed by A. Galli-Bibiena, was opened on the same site in 1769; Mozart appeared there the following year during his first visit to Italy. The theatre has been restored and was reopened in 1972 (fig.4). When it opened in 1770 the music class at the academy comprised 18 artists, directed by the Mantuan *maestri* G.B. Pattoni and L. Gatti. The academy survives in a modified form and is known as the Accademia Nazionale Virgiliana. In 1777 permission was granted for a public music school headed by Mattia Milani. A municipal school dedicated to the Mantuan *maestro* Lucio Campiani (1822–1914), a pupil of Rossini, was opened in 1864 and in 1972 became the Conservatorio Statale.

4. Interior of the Teatro Accademico ('Scientifico'), Mantua, designed by Antonio Galli-Bibiena, completed 1769

There were two main music theatres in 19th-century Mantua: the Sociale, which opened in 1822 with Mercadante's *Alfonso ed Elisa*, and the Andreani, which opened in 1862 with Verdi's *I masnadieri*. The Teatro Olimpico of Sabbioneta in the province of Mantua (built 1588–90) has been restored and is used for opera.

CLAUDIO GALLICO

Mantua, Jacquet de. *See* JACQUET OF MANTUA.

Mantuani, Josef [Josip] (*b* Ljubljana, 28 March 1860; *d* Ljubljana, 18 March 1933). Slovene musicologist and art historian. He studied law (1884–9), philosophy, history and art history (1889–92) at the University of Vienna (PhD in art history 1894). Concurrently he studied composition with Josef Böhm and Anton Bruckner and took private lessons with Guido Adler. In 1893 he became librarian at the Hofbibliothek in Vienna, and was director of its music collection (1898–1909). In 1909 he returned to Ljubljana to become the director of the regional museum of Carniola (later National Museum of Slovenia); he retired in 1924. He taught music history at the Conservatory in Ljubljana (1920–33) and art history, archaeology and epigraphy at the University of Ljubljana (1920–24). He was chief editor of the periodicals *Carniola* (1910–19) and *Glasnik Muzejskega društva za Slovenijo* (1919–25).

Mantuani was the first Slovenian musicologist of international stature. He published extensively on the history of music, cultural history, art history, archaeology and ethnology. His most important musicological contributions are a catalogue of the collection of manuscripts in the Hofbibliothek (later Nationalbibliothek) and his monograph *Geschichte der Musik in Wien*. Mantuani carried out fundamental research on the life and works of Jacobus Handl, whose *Opus musicum* he edited. He also systematically collected materials for the history of music in Slovenia and laid the foundations of Slovenian musicology.

METODA KOKOLE

Mantuanus, Johannes. *See* GALLICUS, JOHANNES.

Mantzaros, Nikolaos Halikiopoulos (*b* Corfu, 8 Nov 1795; *d* Corfu, 12 April 1872). Greek composer, theorist and teacher. Of noble descent, his father was a prominent magistrate and he was initiated into music by his mother. He was taught the piano (1807) and violin (1809) by the brothers Hieronymos and Stephanos Poyagos (or Pogiago), harmony and counterpoint (apparently inadequately, see Alvanas, 1874, p.5) by the Italian S.M. Marchigiana and finally harmony and counterpoint and orchestration by the Italian theorist Cavalier Barbatti (1810–12/13). From 1815 Mantzaros composed an opera and various arias and cantatas (the earliest extant Greek orchestral scores) for the S Giacomo Theatre, Corfu, and must have been active as a teacher from about 1820. He became acquainted with Zingarelli, his life-long friend and mentor, in Corfu probably in August 1821; in 1835 Zingarelli offered him the succession of the directorship of the Conservatorio di S Pietro a Majella in Naples, which he declined. From 1823 until at least August 1826 Mantzaros toured Italy, and later often revisited Naples. In 1828 he began his friendship with Dionissios Solomos, the foremost contemporary poetical genius. His house became, and for almost 50 years remained, a conservatory, where he gave free tuition in piano, harmony and counterpoint, composition and instrumentation to both rich and poor. His many students included the most prominent composers of the Ionian school, such as Xyndas, Padovanis, Iossif Liveralis, Edouardos Lambelet, Carrer and Rhodotheatos as well as Giuseppe Persiani and Raffaele Parisini. In 1840, when the Corfu Philharmonic Society, the earliest Greek conservatory, was founded, Mantzaros was elected honorary life president.

Until recently Mantzaros was regarded as a prominent theorist but a dry, academic and unimaginative composer,

known only for the Greek national anthem (the opening 24 bars of his 1829–30 setting of Solomos's *Hymn to Freedom*). His compositions have received more favourable attention, however, since a reappraisal of his works by Leotsakos in 1988. Mantzaros's output can be divided into two periods. His earlier works, up to about 1840, comprise mostly purely instrumental, or instrumentally-accompanied vocal pieces. An Italianate influence can be heard in his arias and sinfonias, which have a melodic conception akin to the writing of Bellini and Donizetti. His opera *Don Crepuscolo* (1815), however, apart from containing *buffo* passages of a kind normally associated with Rossini, is Mozartian in style. His later works are almost exclusively for voice (sometimes with piano accompaniment). This move towards vocal music may have been influenced by the Greek Orthodox Church's rejection of instrumental music. During this period Mantzaros was concerned mainly with setting poetry, particularly by Petrarch and Solomos, but was also preoccupied with counterpoint. The 1829–30 (so-called 'popular') and 1842–3 versions of the *Hymn to Freedom*, apart from being perhaps the longest settings of any poetical texts, juxtapose a spontaneous homophonic style, echoing Ionian folklore, with climaxes of masterly polyphonic and fugal writing. Mantzaros was also an exquisitely unpretentious melodist, as is revealed in the one-voice settings of Solomos's short masterpieces, such as *I xanthoula* and *I avgoula*.

WORKS

MSS in Benakis Museum, Athens, unless otherwise stated

STAGE

all performed at S Giacomo

Don Crepuscolo (azione comica, 1), 1815
Sono inquieto ed agitato, scena and aria, carn. 1815
Bella speme lusinghera, recit and aria, mid 1815
Come augellin che canta, aria, S, orch, 1815
L'aurora (cant.), Mez, orch, 1818
Si, ti credo amato bene, duet, S, T, orch, 1818
Ulisse agli Elisi (cant.), 2 solo vv, orch, 1820
La Gratitudine (cant., F. Chiappini), by 1821, lost
Aria greca, A, orch, perf. 27 Jan 1827
Minerva nell'isola di Corfu (cant.), perf. 27 Jan 1827, lost
Festa delle fontane (P. da Costa), 1831/2, lost
La clemenza di Tito (incid music, P. Metastasio), 1832, only a march transcr. band extant
I afixis tou Odysseos is tin nisson ton Faeakon [The Arrival of Ulysses on the Island of the Phaecians] (D. Arliotis), 1832, lost
Aria cantata dall'ombra di Patroclo nell sogno d'Achille, 1v, orch, n.d.
Aeas mastigoforos [Ajax furiens] (? incid music), referred to in *Ellinikos paratiritis*, xxxiii (18 Sept 1842), lost

SACRED

Psalmi tou David, SATB, ?orch, *c*1813–18, lost; Threnoi tou Ieremiou [Lamentations of Jeremiah], SATB, ?orch, *c*1813–18, lost; Catholic Mass, no.1, vv, ?orch, perf. Naples, S Ferdinando Cathedral, ?1825, lost; TeD, SATB, 1830, lost; Orthodox Liturgy, male chorus (4 vv), 1834; Troparion of Kassiani, male chorus (4 vv), n.d., pubd in *Moussiki*, no.3 (March 1912), 79–82; Hymn (P. Quartanos), vv, ?orch, for the marriage of Edward, Prince of Wales to Princess Alexandra of Denmark, reportedly performed at the British Court, 1863, lost; Catholic Mass, no.2, vv, ?orch, lost

OTHER VOCAL

O skopos [The Sentinel] (A. Paraschos), marcia e passo doppio, STTB, military band, 1861
4 vv, pf, unless otherwise stated (most texts by D. Solomos): 12 fughe (Naples, 1826); To oneiro [The Dream], after 1818, lost; Eurycome, ? after 1822; I xanthoula [The Blond Maiden], ? after 1822 or 1828; Is to thanato tou Lord Byron [On the Death of Lord Byron], ? after 1824–5; Anthia, thymoumai peftane (after Petrach: *Chiare, fresche e dolci acqui*), hp acc., ? after 1824; Levommi il mio pensier (Petrach: Sonnet xxxiv), ?*c*1826; O Lambros, 3 frags., ? after 1824–5 or 1833; I Farmakomeni [The Poisoned Maid], 2 settings, after 1826; Is monahin [To a Nun], after 1829; Hymnos is tin eleftherian [Hymn to Freedom], 6 settings, 1st, 1829–30, ed. Clayton (London, 1873), 1 setting acc. hp; Is Frangiskan Fraser [To Francesca Frazer], epigram, 6vv, after 1849; Vassilikos hymnos [Royal Hymn], *Gr-An*; Anthi [Flowers] (G. Kandianos-Romas), i–xxxiii, after 1853; As haroume! Tis fysis ta dhora [Let us enjoy the Gifts of Nature], S, T, B, pf, Solomos Museum, Corfu; Scherzo musicale
2vv, pf, unless otherwise stated: Canone all'undecima sopra, ?1823–6; I Farmakomeni, 2 settings; Stin koryfi tis thalassas patondas [Stepping on the Crest of the Waves] (Solomos: O *Lambros*); Alla bionda Arabella, unacc.; Levommi il mio pensier (Petrach: Sonnet xxxiv); 5 scherzi musicali, 3 unacc.; Aveva due canestri di fiori; Kalos ivramen allelous [Welcome to each other] (E. Tantalidis), pubd in *Moussiki*, no.9 (Sept 1912), in Byzantine notation
54 songs, 1v, mostly acc. pf

INSTRUMENTAL

Sinfonias (all 1 movement and in pf score): C, ed. L. Bertuzzi (Milan, 1823); Grande sinfonia militaire, B♭, ed. Bertuzzi (Milan, 1823); no.1, a, di genere orientale, no.2, E♭, both ed. G. Venturini (Florence and Rome, 1873), orchd J. Thornley, 1975; 16 sinfonias, *GR-An* [incl. Grande sinfonia militaire and no.1, di genere orientale]
16 pieces, pf, waltzes except no.5, ?1844; no.5, redowa mazurka, Ophélia, ed. G. Venturini (Florence and Rome, 1873)
5 marches, military band, 1861; 12 4-pt fugues; Prelude, A, pf, also B♭, hp; Romanza, A, tpt, pf; Prelude, A♭, pf, inc.

THEORETICAL

Opera sulle cadenze, ossia Dizionario delle modulazioni, 4 vols.
Studio pratico dell'armonia, 4 vols.
Supplemento allo Studio dell'armonia
Studio pratico di contrappunto sulle fughe reali e tuonali . . . a 2, 3, 4, 5 e 8 voci
Partimenti, 5 or more vols; lost except Basso no.12 from 5th book, org/pf, ed. F. Lucca (Milan, 1857)

GEORGE LEOTSAKOS

Manual. A Keyboard played by the hands in contrast to a Pedal played by the feet.

Manualiter. A quasi-Latin term derived from *manualis* ('hand keyboard') to indicate that a piece of organ music so labelled is played on manuals only, as distinct from Pedaliter. As a term it may be older than *pedaliter* (Schlick, 1511), but it was chiefly used by German

composers (and copyists) in the 17th and 18th centuries to help organists, otherwise accustomed to playing pedals, where the musical notation was ambiguous; for example, where it was written on two staves (as in most organ music except strict trios until the 1730s) or in tablature (as in the sources of Buxtehude's music, etc.). Scheidt (1624), however, implied that in organ chorales the pedal could be used to bring out the theme whether or not it was specified, much as some organists today play with a pedal cantus firmus the indicated *manualiter* preludes in the third section of Bach's *Clavier-Übung*.

PETER WILLIAMS

Manuel, Peter (Lamarche) (*b* Cleveland, 17 June 1952). American ethnomusicologist. He studied at UCLA, where he took the BA (1976), the MA (1979) and the PhD, the last with Jairazbhoy (1983). After working as assistant professor at Columbia University (1986–92), he was appointed associate professor at John Jay College and the Graduate Center, CUNY. Manuel was one of the first ethnomusicologists to work on popular music. He has specialized in the popular and light classical genres of North India and in various Caribbean music cultures, but his writings cover a wide range of topics and include an influential world survey (1988). His work has been equally important to popular music scholars, whose geographical horizons he has helped broaden, and to ethnomusicologists, whom he has helped to persuade that contemporary mass-mediated genres are as legitimate a study as traditional musical practices. In particular, he has stressed that neither technologically sophisticated production and dissemination, nor the power of the international record companies precludes musical creativity, variety and the emergence of locally rooted stylistic hybrids. He has also performed extensively as a sitar player in the USA, India and Pakistan.

RICHARD MIDDLETON

Manuguerra, Matteo (*b* Tunis, 5 Oct 1924). French baritone of Tunisian birth. He settled in Argentina after World War II and at 35 entered the Buenos Aires Conservatory. In 1963 he returned to France to accept a three-year contract as first baritone in Lyons. He moved to the Paris Opéra in 1966, singing in *Faust*, *Rigoletto*, *La traviata*, *Carmen* and *Lucia di Lammermoor*. Engagements throughout Europe followed. His American début was in Seattle in 1968 (*Andrea Chénier*), and he joined the Metropolitan Opera as Enrico Ashton in *Lucia* in 1971. He attracted special attention the next year in a concert performance of *L'Africaine* in New York, and became known for Verdi roles such as Renato, Don Carlo (*La forza del destino*) and Macbeth. He sang Rigoletto at Chicago (1977), Buenos Aires (1986) and Covent Garden (1991), and Renato at Naples in 1989. A baritone of uncommon fervour, taste and versatility, Manuguerra brought equal authority to the French and Italian repertories, as several recordings, particularly of Verdi operas, confirm.

MARTIN BERNHEIMER/R

Manuscript. *See* AUTOGRAPH; SOURCES, MS; SOURCES OF INSTRUMENTAL ENSEMBLE MUSIC TO 1630; SOURCES OF KEYBOARD MUSIC TO 1660 and SOURCES OF LUTE MUSIC.

Manwaring, William (*b* ?Dublin; *d* Dublin, 1763). Irish music publisher, music seller, instrument dealer and violinist. He worked from about 1738 in the business established by his brother Bartholemew (*d* July 1758) about a year previously at Corelli's Head, opposite Anglesea Street in College Green, Dublin. In April 1740 he advertised a proposal for printing Geminiani's *Guida armonica* by subscription; it was finally issued in about 1752. Notable publications by him include collections of songs from Arne's *Comus*, Dubourg's variations on the Irish melody 'Ellen a Roon' and in December 1752 'six Trios for 2 Fiddles and thorough Bass composed by Sieur Van Maldere'. From 1741 a number of publications were issued in conjunction with William Neale, including the *Monthly Musical Masque* consisting of a collection of contemporary popular songs; the first issue was advertised in January 1744. Manwaring also imported Peter Wamsley's best violins, Roman fiddle strings and 'all the newest music published in London'. In addition to his business he took a prominent part in Dublin musical life during the 1740s as a violinist, often appearing with his brother who was also a violinist. He acted as treasurer of various charitable musical societies. After his death his wife carried on the business until 1788.

BRIAN BOYDELL

Manza, Luigi. *See* MANCIA, LUIGI.

Manze, Andrew (Mark) (*b* Beckenham, 14 Jan 1965). English violinist and conductor. He graduated in classics at Cambridge University (where his longstanding duo partnership with Richard Egarr was founded) and afterwards studied the violin at the RAM; however his most important influence was Marie Leonhardt, in Amsterdam.

Between 1987 and 1998, with the group Romanesca, Manze championed 17th-century violin music; his wonderfully fresh and fantastical performances underpinned by his understanding of the period's rhetoric won him great acclaim, and his CD of Biber's 1681 sonatas (recorded in 1994) received several international awards. From 1989 to 1993 he led the Amsterdam Baroque Orchestra, with which his recording of the violin solo in the aria 'Erbarme dich' from the *St Matthew Passion* is outstanding. Manze has appeared as guest director with numerous European and North American orchestras, notably La Stravaganza (Cologne), the Philharmonia Baroque Orchestra (San Francisco) and the Orchestra of the Age of Enlightenment. In 1996 he became an associate director of the Academy of Ancient Music. In 1998 he made his concerto début at the Proms, and the same year his reconstruction of Tartini's works for unaccompanied violin won him an Edison award. His other acclaimed recordings include Handel's op.6 concerti grossi and Bach's violin concertos. While as a player his repertory extends to about 1830, as a conductor he has been applying the same 'historical' principles to later music, including that of the Second Viennese School. Manze is also a frequent broadcaster, and has devised many programmes for BBC Radio 3.

LUCY ROBINSON

Manziarly, Marcelle de (*b* Kharkov [now Kharkiv], 1/13 Oct 1899; *d* Ojai, CA, 21 May 1989). French composer, of mixed Russian and American parentage. She started composing at the age of 12 and was one of Nadia Boulanger's first composition pupils in Paris, remaining her lifelong friend. Later, she studied conducting with Weingartner in Basle (1930–31) and the piano with Vengerova in New York (1943). Boulanger promoted Manziarly's music in Paris, conducting the *Triptyque pour une madone de Lorenzo d'Alessandro* (1934) in her first appearance on the podium in the French capital; Boulanger also introduced her to Princesse Edmond de Polignac, who commissioned several works. Manziarly's career was divided between France and the USA. She taught privately in both countries, and appeared as a pianist and conductor in New York.

Her works of the 1920s, including *Impressions de mer* for piano (1922) reveal Debussy's influence, though Stravinsky's neo-classical manner marked her music more. In the *Sonate pour Notre-Dame de Paris* for orchestra (1944–5), a set of variations inspired by the Liberation of Paris, her harmonic language is firmly rooted in tonality, coloured by dissonances and modal melodic lines. Later works demonstrate an interest in pre-compositional structuring (her piano piece *Stances* (1964) is based on a magic square) and occasionally reveal the imprint of serialism or free atonality. A visit to India stimulated an interest in Hindu rhythms and scales. Most of Manziarly's works from the 1950s onwards were published by the composer.

WORKS
(*selective list*)

Stage: La femme en flèche (chbr op), 1954

Orch: Pf Conc., 1932; Sonate pour Notre-Dame de Paris, 1944–5; Musique pour orchestre, small orch, 1950; Incidences, pf, orch, 1964

Chbr: Str Qt, 1943; Trio, fl, vc, pf, 1952; Trilogue, a fl, va da gamba, hpd, 1957; Dialogue, vc, pf, 1970; Périple, ob, pf, 1972

Vocal: Triptyque pour une madone de Lorenzo d'Alessandro, S, chorus, ens, 1934; 3 fables de La Fontaine, 1935; Choeurs pour enfants, 1938; Poèmes en trio (L. de Vilmorin), 3 female vv, pf, 1940; Duos, 2 S/T, pf, 1952; Duos, S, cl, 1953; 3 chants, S, pf, 1954; 2 odes de Grégoire de Narek, A, pf, 1955; 3 sonnets de Pétrarque, Bar, pf, 1958; Le cygne et le cuisinier, 4 solo vv, pf, 1959

Pf: Impressions de mer, 1922; Mouvement, 1935; Arabesque, 1937; Toccata, 1939; Bagatelle, 1940; Sonata, 2 pf, 1946; 6 études, 1949; Stances, 1967

CAROLINE POTTER

Manzolo, Domenico (*fl* 1623–39). Italian composer and singer. In 1623 he was a musician – apparently a singer – in the service of the city of Bologna, and in 1639 he was listed as a singer in the employ of the Anziani and Confaloniero families in Bologna, presumably in addition to his civic position. As a composer he is known only by *Canzonette . . . con alcune spirituali*, for one and two voices and continuo (Venice, 1623). It contains 41 pieces, all but two for solo voice and all but four others secular (6 solo songs – 5 secular and 1 sacred – ed. in G. Benvenuti: *35 arie di vari autori del secolo XVII*, Milan, 1922). All are undistinguished, with pedestrian melodies and jog-trot rhythms. (G. Gaspari: 'Dei musicisti bolognesi al XVII secolo e delle loro opere a stampa', *Atti e memorie delle RR. Deputazioni di storia patria per le provincie dell'Emilia*, new ser., v/2, 1880, pp.15–44, esp. 31–2)

NIGEL FORTUNE

Manzoni, Alessandro (*b* Milan, 7 March 1785; *d* Milan, 22 May 1873). Italian novelist, poet and dramatist. An admirer of Walter Scott, he was one of the founders of Italian Romanticism; a prevalent theme of his works is victimization, accepted with resignation and surmounted by faith. His poetic drama *Adelchi* (1822), set by Apolloni in 1852, deals with the tragic figure of Adelchi at the time of the defeat of the Longobards by Charlemagne's Frankish forces. Manzoni is best known, however, for his historical novel *I promessi sposi* (1828), set in 17th-century Lombardy, which was the subject of at least six operas; its plot, when simplified, was particularly apt for melodramatic treatment. The best-known setting is Ponchielli's (1856); the first performance of Petrella's opera, at Lecco (the original setting for the novel), was attended by Manzoni. Verdi wrote his Requiem Mass in memory of Manzoni.

BARBARA REYNOLDS

Manzoni, Giacomo (*b* Milan, 26 Sept 1932). Italian composer. He taught himself music until, at the age of 16, he moved with his family to Messina, Sicily. There he studied composition with Contilli, a tutor sufficiently broad-minded to licence his enthusiastic encounter with Schoenberg's *Pierrot lunaire* at the ISCM festival in Palermo the following year. In 1950 he returned to Milan, enrolling both at the Conservatory and, in modern languages and literature, at the Università Bocconi. These parallel studies, pursued for the next five years, were in effect to mark out the twin polarities of his earlier career. He took the university degree in 1955, in which year he also completed his first stage work, *La legge*. Although rejected by the Conservatory, and never subsequently

performed, this work mapped out two fundamental affiliations: a neo-Schoenbergian musical idiom and, with its narrative of Sicilian peasantry ground down by authority, a strong sense of art's political obligations. Despite this set-back, he completed his composition diploma the following year.

In addition to his work as a pianist (for, among other projects, Giorgio Strehler's noted 1955 production of *Die Dreigröschenoper*, conducted by Maderna) Manzoni's activities proliferated. He became editor of the new music review *Il Diapason* in 1956, and the music critic of the left-wing newspaper *L'Unita*, from 1958 to 1966. His influential Italian translations of Adorno began to appear in 1959, and continued for the next decade, soon to be joined by a series of translations of Schoenberg's major texts. Meanwhile he began to make his mark as a composer with the production, for the 1960 Teatro delle Novità festival in Bergamo, of his opera *La sentenza*. In 1962 he began a long teaching career with courses in harmony and counterpoint at the Milan Conservatory, to be followed, from 1969 to 1974, by composition courses at the Bologna Conservatory, and thereafter at the Milan Conservatory. Many of the more talented composers of the next generation gravitated to him. His compositions from the mid-1960s on became more openly confrontational. *Atomtod*, whose production at the Piccola Scala in 1965 came about despite attempted prevention from civil and ecclesiastical authorities, was followed by other celebrations of political commitment such as *Ombre (alla memoria di Che Guevara)* (1968).

Such works as *Ombre* and *Hölderlin (frammento)* (1972) consolidated Manzoni's concern to project challenging texts into large-scale choral and orchestral statements. Words were no longer an occasion for lyrical expansion, but rather brought into play the full range of human vocalization. This technique reached its most telling realization in *Parole da Beckett* (1970–71), which won him a UNESCO prize in 1973. As this work demonstrated, at no stage in his career was Manzoni exclusively preoccupied with the obligation to bear political witness. But even so, his most adventurous experiment with a theatre of ideological debate was put together over the next few years. *Per Massimiliano Robespierre* (1974–5) mobilized the experiences of at least a decade to create not a political parable, but an examination of liberal ambivalences in the face of radicalism.

For a decade therafter, Manzoni confined himself to the concert hall, and primarily to instrumental music. A series of chamber *Percorsi* echoed, in title and in some instances musically, the five debating sections of *Per Massimiliano Robespierre*, and his well-established interest in juxtaposing blocks of sound in quasi-architectural fashion culminated in a tribute to its source: *Masse: omaggio a Edgar Varèse* (1977) for piano and orchestra, followed by *Modulor* (1979) for four orchestras. However, questions of musical time and its articulation returned to preoccupy him once more, first in the orchestral *Ode* of 1982, and then dramaturgically as he began to draft the libretto of his opera *Doktor Faustus*, based on elements from Thomas Mann's novel. Two years later he took a first step towards establishing his musical materials when he completed the *Scene sinfoniche per il Doktor Faustus* (1984), and the work achieved final form in 1988. In many respects his richest and most sophisticated musico-dramatic conception, it made an immediate impact both through Robert Wilson's striking production at La Scala, and through its unexpectedly abundant lyricism. Indeed, this remarkably fresh and inventive sense of melodic line became central to a number of his subsequent works, such as *Dieci versi di Emily Dickinson* (1988) for soprano, harp and strings.

The complex balance achieved by Manzoni between his passion for words, and his inextricable (and only partially complementary) immersion in musical sound, his willingness to respond to the pressures of the society around him, and his love for poets of *innigkeit* and solitude, has set an attractive example. He has consistently shown how a composer's appetite for creation need not condemn him to solipsism or marginalization. But maintaining that balance has entailed a focussing of musical priorities. The temptations of quasi-functional harmony were eschewed from the first, so that concerted voices or instruments increasingly tended to produce blocks of 'material' whose inner warp and weft was governed by considerations of density, of aggregate timbre and texture. This steely exploration of terrain offering no shelter to musical ghosts was, however, not long able to resist infiltration by his perennial fascination with the projection of text into musical time. Early engagement with neo-Schoenbergian models may have become subsumed into a polyphony of vocal possibilities in the works of the early 1970s. But after the abstentions dictated by severely 'abstract' work at the end of that decade, this central focus has been reconstituted in the unaccustomed lyric abundance of *Doktor Faust* and its successors.

WORKS

Stage: La legge (1), 1955; La sentenza (1, E. Jona), Bergamo, Donizetti, 13 Oct 1960; Atomtod (op, 2 parts, Jona), Milan, Piccola Scala, 27 March 1965; Per Massimiliano Robespierre (prol., 2, int, Manzoni and V. Puecher, after M. Robespierre and others) 1974–5 Bologna, Comunale, 12 April 1975; Doktor Faustus (3, Manzoni, after T. Mann), Milan, Scala 16 May 1988; Inferno di Dante (Sanguineti, after Dante), Ravenna, 1995; Musiche per l'Oreste di Vittorio Alfieri, tape, Rome, 1993

Vocal-orch: 5 vicariote, chorus, orch, 1961; Don Chisciotte, S, small chorus, chbr orch, 1961; Ombre (alla memoria de Che Guevara), chorus, orch, 1968; Hölderlin (frammento), chorus, orch, 1972; Suite Robespierre, 2 S, Mez, Bar, B, 2 spkr, chorus, orch, 1976; Studio per il finale del Doktor Faust (Manzoni, after Mann), chorus, orch, 1985; Dedica (B. Maderna), B, fl, orch, 1985–6; Weheklang Doctor Fausti, 6-part chorus, orch, 1989; Poesie dell assenza (Caproni), male spkr, chbr orch, 1990; Finale e aria (Bachmann), S, str qt, orch, 1991; Il deserto cresce (3 metafore da F. Nietzsche), chorus, orch, 1992; Allen (A. Ginsberg), spkr, chbr orch, 1996; Moi, Antonin A., S, spkr, orch, 1997

Orch: Studio per 24, chbr orch, 1962; Studio no.2, 1962–3; Insiemi, 1967; Multipli, chbr orch, 1972; Variabili, 1973; Masse 'Omaggio a Edgar Varèse', pf, orch, 1977; Lessico, double str orch, 1978; Modulor, 4 orch, 1979; Ode, 1982; Scene sinfoniche per il Doktor Faustus, SATB ad lib, orch, 1984; Adagio e solenne, 1990; Malinamusik, 1990: see El-ac [Parole da Beckett; Una . . .voce . . . chiama; Les hommes, la terre, les pierres; Quanto oscura selva trovai]

DAVID OSMOND-SMITH

Manzuoli, Giovanni (*b* Florence, *c*1720; *d* Florence, 1782). Italian soprano castrato, later contralto. After appearances in operas in Florence (1731) and Verona (1735) he settled in Naples until late 1748, occasionally performing in Rome and Venice. By the mid-1740s he was singing leading parts at the Teatro S Carlo. After Carnival 1749 at Milan he was called by Farinelli to Madrid where he performed in ten productions between 1749 and 1752. There he exhibited an arrogant temperament, and after leaving abruptly in 1753 he sang in Parma during Carnival 1754. Later that year, however, he returned to the Iberian peninsula. He was at Lisbon for the opening of the Teatro dos Paços da Ribeira in 1755 and then briefly back in Madrid. He returned to Italy and remained there until 1764 except for a trip to Vienna, where his performance in Hasse's *Alcide al bivio* (1760) made him the idol of the city, according to Metastasio. At rehearsals in Bologna for Gluck's *Il trionfo di Clelia* (1763) his behaviour was censured.

In the 1764–5 season Manzuoli, whose voice was 'the most powerful and voluminous soprano that had been heard . . . since the time of Farinelli' (Burney), drew 'a universal thunder' of applause at the King's Theatre, London; there he became acquainted with the Mozart family and sang in the première of J.C Bach's *Adriano in Siria*. In 1770 Wolfgang met him again in Florence, where Manzuoli had retired and become chamber singer to the Grand Duke of Tuscany in 1768 after three successful seasons in Italy (Verona, Turin, Venice, Milan). He twice came out of retirement: in January 1770 he unwillingly sang in Rome for the first time since his youth; and with a display of arrogance 'like a true castrato' (Mozart); in October 1771, he closed his public career in Milan with Hasse's *Ruggiero* and Mozart's *Ascanio in Alba*. Never a singer whose voice permitted feats of virtuosity, Manzuoli,

by then a contralto, retained most of his 'native strength and sweetness' (Burney) and fine acting ability.

Maphon, Franciszek [Giovanni Francesco]. *See* MAFFON, GIOVANNI FRANCESCO.

Mapleson, James Henry (*b* London, 4 May 1830; *d* London, 14 Nov 1901). English impresario. He studied in London at the RAM and joined the orchestra of the Royal Italian Opera at Her Majesty's Theatre as a violinist (1848–9). After three years of vocal study under Mazzucato in Milan he sang briefly at Lodi and Verona under the name of Enrico Mariani. In 1856 he opened a musical agency, and in 1858 managed E.T. Smith's season at Drury Lane. In 1861 he began his own career as impresario at the Lyceum, and in his opening season produced *Un ballo in maschera* for the first time in England. He managed Her Majesty's, 1862–7, and in 1868 was at Drury Lane. He joined Gye at Convent Garden for the famous 'coalition seasons' of 1869 and 1870, and was again at Drury Lane, 1871–6. He reopened Her Majesty's in 1877 and continued to give seasons there until 1881. His last London seasons were in 1887 and 1889.

In 1878 Mapleson's company offered simultaneous seasons in London and New York, and the American group went on tour in the East and Midwest. Its success brought Mapleson a three-year contract with the Academy of Music in New York, where from 1879 to 1883 he presented opera in an unprecedentedly glamorous style. The company also went on tour to Detroit, Cleveland, Buffalo, Pittsburgh, Indianapolis, Chicago and St Louis, and gave an annual opera festival in Cincinnati. When Henry Abbey opened the Metropolitan Opera in New York in 1883, he and Mapleson battled for singers and patrons. Mapleson abandoned his New York season early, barely managing to survive an ambitious tour that ranged as far west as San Francisco. In 1884–5 the 'opera war' drained Mapleson's resources further; the 1885–6 season and tour were a fiasco, with Mapleson being hounded by sheriffs and lawyers from San Francisco to London. His American career was effectively ended, although he returned briefly to the Academy of Music in 1896.

Besides being a flamboyant and resourceful promoter in the USA, Mapleson produced many operas for the first time in England, including *Faust*, *Carmen*, *La forza del destino*, *Les vêpres siciliennes*, *Mefistofele* and *Médée*, and brought to London many famous artists, including Christine Nilsson, Lillian Nordica and Jean de Reszke. He was popularly known as 'the Colonel'; his memoirs give an entertaining, if not altogether accurate, account of his activities.

Maqām (Arab.: 'place'). Arabic term often translated as 'mode', 'scale', or 'melody'. *See* ARAB MUSIC, §§I, 5(ii), 6(ii)(a); II, 3(ii); ISLAMIC RELIGIOUS MUSIC, §I, 3; KASHMIR; MODE, §V, 1–2; and TURKMENISTAN, §2.

Maqbāli, Yūsif (bin Khamīs) al- (*b* Afifah, near Sohar, Oman, *c*1953). Omani musician. He was born in an area populated by Belushis and sedentary Bedouins. As a curious and imaginative child he was interested in the traditional Omani arts. He learnt traditional dances by imitation even before he was taken to Kuwait at the age of seven to live with a family of diplomats. During his school years he continued to involve himself with Omani traditions among the many emigrants in Kuwait and formed a group which performed Omani dances, plays and songs. Upon his return to Sohar in 1988 he obtained an administrative position in the Directorate of Education and also went into business as the owner of several food stores. His social prominence derived from his exceptional blend of artistic, administrative and diplomatic skills. He was known for his outstanding talent as a performer of the *razīf*, the complex of poetry and dances such as *wahhābīyah* and *ayyālah* associated with the settled Bedouins. In 1987 the provincial governor appointed him leader of the performance group which represented the province of Sohar on national occasions. By interpreting and implementing national policies in the domain of cultural performances for the entire province of Sohar, Yūsif assumed a position of power unlike that of any other artist in Sohar.

DIETER CHRISTENSEN

Mara [née Schmeling], **Gertrud Elisabeth** (*b* Kassel, 23 Feb 1749; *d* Reval [now Tallinn], 20 Jan 1833). German soprano. She was neglected in infancy and suffered from rickets, from which she never fully recovered; this marred her stage appearance later. She showed musical talent at an early age, first on the violin, and from 1755 her father, a violinist, exhibited her as a prodigy in Vienna. In 1759 she was taken to London, where she played before the queen and was urged to take up singing in preference to the violin, and took singing lessons under Paradisi. She returned to Germany in 1765 and the next year was engaged as principal singer in J.A. Hiller's concerts in Leipzig. In her memoirs she denied the often repeated assertion that she had also been his pupil, but no doubt she learnt much from him. In 1767 she made a successful opera début in Dresden, then returning to Leipzig. In 1771 Frederick the Great, prejudiced against German singers, was converted by her performance of arias by Graun and others and took her into his service. The king opposed her marriage to the cellist Johann Baptist Mara (1746–1808), 'an idle drunken man, and bad player on the violoncello' (Edgcumbe), with whom she had become involved, and arrested the couple when they attempted to escape; but he later consented to the marriage on condition that she remain permanently in the Berlin opera. In Berlin she studied harmony with Kirnberger. Finding the

Gertrud Elisabeth Mara accompanied by Venanzio Rauzzini at a concert in Bath: caricature by John Nixon, pen and ink and wash, 1796 (private collection)

restrictions of the royal service intolerable, she attempted unsuccessfully to escape; in 1779 she succeeded and the king released her.

In 1780–81 Mara sang in Germany, the Low Countries and Vienna; in Munich she encountered Mozart, who was not favourably impressed by her, either musically or personally (see his letter of 24 November 1780). In 1782 she sang at the Concert Spirituel in Paris, and in 1783 engaged in a celebrated rivalry there with the mezzo-soprano Todi. In spring 1784 she arrived in London, where she was to have her greatest successes, which began with her appearance at the Handel Commemoration of that year. In February 1786 she made her début at the King's Theatre, where she sang sporadically until 1791, notably as Cleopatra in Handel's *Giulio Cesare*. In Carnival 1788 she sang in Turin, and in autumn and Carnival 1789–90 and Carnival 1792 in Venice. Thereafter she appeared occasionally on the London stage, even in English ballad operas, but was more frequently heard in concerts and oratorios (see illustration); by this time her voice was losing strength. She finally left London in 1802, taking her lover, the flautist and composer Charles Florio (she had separated from Mara several years before). The pair toured France and Germany, passing through Berlin in 1803 and later Vienna, and settled in Moscow, where they eventually separated. Reduced to poverty, she supported herself by teaching, but lost her possessions in the destruction of Moscow in 1812. She next settled at Reval, again as a teacher. In 1819 she reappeared in London and sang at the King's Theatre, but none of her voice remained. She later returned to Reval.

Mara's voice was remarkable for its beauty of tone and its wide range (g to e'''). She was by nature a bravura singer, but through application and art was also admired in the cantabile style; her technique was based on classical principles. Mara was not considered a good actress, and at the height of her career displayed a high-handedness typical of prima donnas.

JULIAN MARSHALL/R

Mara, La. Pen name of MARIE LIPSIUS.

Marabi. A pan-ethnic city music, developed in South Africa's urban slums (principally those of Johannesburg) during the second and third decades of the 20th century. A rhythmically propulsive dance music, *marabi* was forged principally by unschooled keyboard players who were a notorious part of the culture and economy of illegal slumyard liquor dens. Harmonically, it rested upon a cyclical pattern stretched over four measures, with one measure per chord: I–IV–I$^6_4$–V. The cyclical nature of this style clearly derived from indigenous sources, repetitive harmonic patterns being typical of traditional African musics.

The melodies superimposed on these endlessly repeating patterns sometimes became legendary; sometimes lyrics were invented, in some instances containing political commentary or protest. A significant proportion of these melodies are traceable to local traditional origins. But often the tunes were drawn from other sources, such as

the familiar stock of African Christian hymns, the commercially popular tunes of the day or Afrikaans dance music.

In performance, cyclical repetitions of a melody or melodic fragment would eventually yield, perhaps, to a similar treatment of another melody or fragment, and perhaps then still others. In this manner, performers would play for long periods without stopping. A simple rhythmic accompaniment would be provided throughout by a player shaking a tin filled with small stones.

The most famous of *marabi*'s venues were the shebeens, and the weekend-long slumyard parties. For almost everyone outside ghetto life, however, *marabi* and its subculture were shunned. Associated with illegality, police raids, sex and a desperately impoverished working class, *marabi* was vilified as a corrupting menace. It is no surprise, then, that no early *marabi* musicians were recorded.

Marabi in its classic form had a short life. In the wake of the Urban Areas Act of 1923, officials began to lay claim to inner-city suburbs as 'white'; as the relocation of black residents began, so too did the destruction of *marabi* culture. Gradually stripped of the small, informal domestic space which had nurtured it, *marabi* musicians realized that their art had no future in the new sterile dormitory suburbs. By the early 1930s, those who could were already developing a new genre, rooted in part in *marabi*: SOUTH AFRICAN JAZZ.

CHRISTOPHER BALLANTINE

Maracas. A pair of gourd rattles, most commonly oval (in the Hornbostel and Sachs system they are classified as indirectly struck idiophones: vessel/rattles). The gourd contains the naturally dried seeds of the fruit. Imitations in wood, wickerwork, plastic or metal contain beads, small shot, or similar rattling pieces. The name maraca is thought to be of pre-Columbian Araucanian origin. It is applied universally to gourd rattles of the above description. Like all seed-pods and similar rattles the instrument is widespread and of ancient origin. A Guinea legend tells of a goddess forming a maraca by enclosing some white stones in a calabash.

Maracas are widespread particularly in Colombia, Venezuela and Brazil. In Colombia, they appear in the *conjunto de cumbia* and *conjunto de gaitas* ensembles; smaller maracas known as *gapachos*, as the seeds used are those of the *gapacho* plant, are played in the *chirimía* ensemble of the Andean region. The *clavellinas*, played in the Llanos region of Colombia, are similar to the *gapachos*. Maracas provide the basic rhythmic accompaniment in many ensembles in Venezuela, where they are usually played by the singers. A variety of rattles of the maraca type is used by the Amerindian peoples of Brazil. The pre-Columbian Indian maraca (*mbaracá*) is made of a calabash filled with dry seeds. The Paraguayan maraca is made from a *porrongo* or other type of gourd in which seeds or pebbles are placed; it is played only by men.

Two pairs of maracas

Maracas formed an integral part of the rhythm section of Latin American dance bands. They have been adopted by western pop bands and percussion ensembles and are also important instruments in primary school education. In the 20th century maracas have been used by many composers: Varèse used them in *Ionisation* (1929–31); Prokofiev in *Romeo and Juliet* (1935–6); and Malcolm Arnold in his Fourth Symphony (1960). As with many unpitched percussion instruments, the sound of one instrument may be recognizably higher or lower than that of another, and composers and conductors may request different sizes or pitches: Pierre Boulez, for example, called for large, medium and small maracas in *Rituel* (1974–5). Occasionally maracas are used as 'drumsticks'. This effect is requested in Leonard Bernstein's *Jeremiah Symphony* (1942), Harold Farbermann's Concerto for Timpani and Orchestra (1958) and Marius Constant's ballet *Paradis perdu* (1967). The *caxixi*, a Brazilian instrument consisting of a small wicker basket containing seeds or shot, produces a very similar sound.

Marāghī, 'Abd al-Qādir al-. *See* 'ABD AL-QĀDIR.

Marais, Marin (*b* Paris, bap. 31 May 1656; *d* Paris, 15 Aug 1728). French composer and viol player. He is one of the outstanding figures in French music of the Baroque period.

1. LIFE. The son of Vincent Marais, a shoemaker of humble origins, Marin entered the choir school of St Germain-l'Auxerrois in 1667, helped by his uncle Louis Marais, vicar of that church which was under royal patronage. He remained there until 1672 and received an excellent musical education under François Chaperon; the young Michel-Richard de Lalande was a fellow pupil. It was probably there that Marais began to learn the viol before completing his studies with the famous bass viol player Sainte-Colombe. He is said to have surpassed his teacher after six months, so that soon (by about 1675) he was playing in the Opéra orchestra in Paris. Thanks to Lully, director of the Opéra, he took part in the first performance of *Atys* at court in 1676, the year of his marriage to Catherine Damicourt, and pursued his instrumental career there from 1679 as an *ordinaire* of the *musique de la chambre du roi*. Having received an excellent training from Lully, he soon became a composer. In 1686 he published his first collection of pieces for viol, and had an *Idylle dramatique* performed at Versailles 'in the presence of the whole court'. It was well received. Later he also wrote motets, but it was in instrumental and dramatic music that he excelled. From the end of the 17th century his fame spread beyond the frontiers of France, and he attained the peak of his career in 1706 with the first performance of his *tragédie en musique Alcyone*. At this time he had just replaced Campra as *batteur de mesure* (conductor) of the Opéra orchestra and was a close friend of Nicolas Bernier, who married his daughter Marie-Catherine in 1712. After the failure of *Sémélé* in 1709, and facing serious competition as a viol virtuoso from Antoine Forqueray, Marais progressively withdrew from public life.

2. WORKS. The four operas composed by Marais for the Paris stage are *tragédies en musique* in the tradition of Lully, and several pages are directly inspired by the Florentine composer's masterpieces. Unlike Campra and others among his contemporaries, Marais did not write *opéras-ballets* and was never a supporter of the new italianate trend which became fashionable at the end of the 17th century. He preferred to develop the expressive possibilities of the model bequeathed him by his 'benefactor', Lully. Like Collasse, Desmarets and Charpentier, he liked to illustrate the words of the librettos he set to music, and to this end would exploit tessituras and major–minor contrasts, and use the most evocative harmonies, including some bold dissonances. As an orchestral musician he was anxious to introduce greater instrumental refinement into French opera. He excelled in great frescoes of sound, such as the famous tempest in *Alcyone*, to which the double bass makes a clearly audible contribution, and also the impressive earthquake in the last act of *Sémélé*. With Collasse and Campra, he was one of the first to use soloists for variety of timbre, demanding great virtuosity from the players, particularly the strings. Although sometimes falling back on simple popular melodies, as in the sailors' march in *Alcyone*, his music employs an increasingly complex style, with choruses of great contrapuntal skill. However, this exceptional mastery, anticipating that of Rameau, did not affect Marais' sensitivity, notably in the fine airs and accompanied recitatives of *Alcyone*.

A viol virtuoso, Marais was one of the first French instrumentalists to make his mark as a soloist (see illustration). Gifted with a remarkable technique he

Marin Marais: portrait by André Bouys, c1704 (Musée du Louvre, Paris)

developed it, adding new complexities. His pleasing tone had a rare power, thanks to an 'airy' style of playing which made full use of open strings and their harmonics. However, his virtuosity always took second place to his musicality. His performances, full of charm and 'fire', captivated his contemporaries, who said that he played 'like an angel'. Composer and performer were closely linked, for at this time soloists concentrated almost exclusively on playing their own works at concerts. Between 1686 and 1725 Marais published five books of pieces for viol and continuo, and several suites for two and three viols – a total of 596 pieces grouped into 39 suites, two of them for three viols. In addition there are 45 unpublished pieces in the Panmure Collection in Edinburgh (*c*1680) and the *Pièces en trio pour les flûtes, violons et dessus de viole* (1692), one of the first examples of trios in France, as well as *La gamme et autres morceaux de symphonie pour violon, viole et clavecin* (1723).

These suites, of varying length, represent a complete repertory of the dances of polite society at the time. They contain from 7 to 41 short, simple movements, framed by more elaborate items: preludes, chaconnes or passacaglias with brilliant variations. There are also 'character-pieces' of diverse kinds. Some aim for instrumental difficulty: fantasias, *bourrasques*, caprices and the *Couplets de folie*, 32 variations on Corelli's famous theme; others are descriptive, featuring bells, blacksmiths and Turkish or Persian marches. Others, finally, are autobiographical: *tombeaux* dedicated to Marais's masters, Lully and Sainte-Colombe, and to one of his sons, and there is also the *Tableau de l'opération de la taille*, describing the removal of a kidney-stone. They are interesting for their freedom of inspiration, harmonic effects, rapid modulations and discreet but genuine sensitivity.

Book 4 contains some very different works. The long *Suitte dans le goût étranger*, consisting of 36 pieces, includes some special features: technical complexity in *La bizarre*, heavy ornamentation in *L'arabesque*, surprising modulations and dissonances in *Le labyrinthe*. The book concludes with two suites for three viols in which the composer displays superb contrapuntal mastery. These are experimental pieces which seem to anticipate *La gamme* in the next collection, a work which visits all the keys of the scale and calls for an interpreter of transcendent virtuosity. Marais has supplied the necessary directions for performance.

Marais was also a teacher. Although he never wrote a treatise on the viol, his prefaces form a collection of precepts dealing with the playing of ornaments, continuo realization and the notation of fingering and bowing, innovations which were adopted by his successors. At a time when confrontation between French and Italian styles was coming to the fore, Marais was on the French side. Grandeur without ostentation, virtuosity without vanity and sensitivity without exaggeration were the ideals of this *musicien du roi* under Louis XIV.

Several of Marais' descendants were professional bass viol players. Of his 19 children the best known is ROLAND MARAIS. Vincent (1677–1737), Marin's eldest son and his successor in the *chambre du roi* from 1725, excelled his father in technique but was judged 'not very musical'; his irregular way of life prevented his making a career as a virtuoso. Nestor-Marin (*c*1715–1753), Marin's grandson, received a position at court in 1747; his contemporaries compared him to J.B. Forqueray, son of the celebrated Antoine Forqueray.

JÉRÔME DE LA GORCE, SYLVETTE MILLIOT

Marais, Roland(-Pierre) (*b* Paris, *c*1685; *d* ?Paris, *c*1750). French viol player and composer, son of Marin Marais. He was probably born just before his father published his first set of viol pieces (1686), when the family lived in the rue du Jour in the parish of St Eustache. Roland studied the viol with his father and in 1709 he played to Louis XIV alongside his father and two of his brothers. Titon du Tillet recounts how 'the King heard each of the three sons separately and said [to Marin]: I am extremely happy with your children, but you are always Marais and their father'. In 1711 Roland published in Paris his *Nouvelle méthode de musique pour servir d'introduction aux auteurs modernes* (now lost) and the following year he contributed some *airs sérieux et à boire* to a collection of Ballard. When, on 3 March 1715, he married Marie-Catherine Godelard, he lived in the rue Mazarine; the same year his portrait (also lost) was painted by the court painter, Oudry. On 12 September 1722 the Maraises had a son, Alexandre-Félix, and by 1725 they lived in the rue des Grands Augustins, in the St Germain district. In 1726 Quantz particularly noted the excellence of Roland's playing (and that of Jean-Baptiste Forqueray) in the *petit choeur* at the Académie Royale de Musique. However, in 1728 Marais lost within three months both his father and his wife, and the following year his son too.

Marais moved to the rue Dauphin, where he published two books of *pièces de viole* in 1735 and 1738. In the 'Avertissement' to his second book he wrote: 'I have observed once again the example of my father'; nonetheless there is a distinct move towards the tuneful rondeaux and simplified bass parts that typify French viol music of that date. Marais carefully marked up the solo viol part with playing instructions, using the same symbols as his father. His pieces have much charm and grace, and take some adventurous harmonic turns. His manuscript *Regles*

d'accompagnement pour la basse de viole (*NL-DHa*; ed. in Bol; ed. and Eng. trans in Kinney) provides numerous insights into his playing style. He was highly regarded as an executant, and in the 1730s performed with J.-B. Forqueray and the violinist Joseph Marchand at the residence of the wealthy *fermier-général* Ferrand, who described him as an 'astonishing viol player'. Marpurg also praised his playing in similar terms.

LUCY ROBINSON

Mařák, Otakar (*b* Esztergom, Hungary, 5 Jan 1872; *d* Prague, 2 July 1939). Czech tenor. He studied at the Prague Conservatory with Paršova-Zikešová. In 1899 he made his début at Brno as Faust and from 1900 he appeared at the New German Theatre, Prague. He sang under Mahler at the Vienna Hofoper, created Gennaro in Wolf-Ferrari's *I gioielli della Madonna* (1911, Berlin) and sang in the première of Busoni's *Die Brautwahl* (1912, Hamburg). In 1913 he was the first London Bacchus (*Ariadne auf Naxos*), and the following year he sang in Chicago as Parsifal in the local première of Wagner's opera. He was principal tenor at the Prague National Theatre from 1914 and retired from the stage in 1934. His recordings, including a complete *Pagliacci*, give a fair indication of his vocal and dramatic strengths.

DAVID CUMMINGS/R

Marangopoulos, Dimitris (*b* Athens, 24 June 1949). Greek composer and administrator. After learning the piano and the accordion privately, he took lessons in harmony, counterpoint and composition with Yannis Andréou Papaïoannou (1969–72), and political science courses at Athens University, graduating from there in 1977. He also studied composition at the Berlin Hochschule der Künste with Frank Michael Beyer (1972–6). After returning to Greece, he worked with Hadjidakis at Hellenic Radio, and taught music at Athens College (1981–4), the Marasleios Pedagogical Academy (1983–5) and Athens University (1984–5). He also served as head of music for the second channel (ET2) of Hellenic TV (1984–5). In 1988 he became head of music in the Vólos Municipal Arts Department and director of the Vólos Municipal Conservatory; his efforts led to the founding of the Vólos SO in 1992. In 1994 he was appointed director of Yéfyres (Bridges), a central section of the Athens Concert Hall organization.

With his ballet *I eklogi* ('The Choice', 1979), Marangopoulos emerged as a composer able successfully to combine Eastern traditions of instrumental improvisation with Western compositional techniques. Later works, such as *Anatolikos ke dhytikos anemos* ('Eastern and Western Wind', 1985) and *Therino heliostassio* ('Summer Solstice', 1990–91), skilfully blend traditional instruments, such as the ud and the saz, with Western classical instruments and live electronic procedures, often to highly atmospheric effect. Later works, such as the lyrical orchestral elegy *I anássa tis yis* ('The Breath of the Earth', 1992–3) and the operatic black comedy *To tango ton skoupidhion* ('The Tango of Litter', 1996), demonstrate the composer's concern with social and ecological issues.

WORKS
(*selective list*)

Dramatic: Atreides (ballet, 1, A. Rikakis), 1975; I ekloghi [The Choice] (Kassiani ke Theofilos) [Kassiani and Theofilos] (ballet, 1, Rikakis), 1979; Himonas [Winter] (radio score, M. Kriezi), 1979, for projected children's op I tésseris epochés [The 4 Seasons], collab. L. Platonos, N. Christodoulou, N. Kypourgos; O yalinos kyklos [A Circle of Glass] (op, M. Kriezi, after Gk. folk tales), 1985; To taxidi [The Voyage] (op, 9 scenes, textless), 1986; Bolivar (audiovisual spectacle, N. Engonopoulos), 1989; Tragoudi tou aeona [The Song of the Century] (op, 9 scenes, S. Hatzakis), 1989; To tango ton skoupidhion [The Tango of Litter] (op, 1, Arkas), 1996; Johnny o tyherakias [Lucky Johnny] (after B. Brecht: *Vier Männer und ein Pockerspiel*), nar, dancer, video, tape, 1998, Athens, Concert Hall, 21 Nov 1998; incid music, film scores, TV scores

Vocal: Graganda (Y. Ritsos), Bar, 11 insts, 1975; Agamemnon (Aeschylus), chorus, small ens, 1976; Anatolikos ke dhytikos anemos [Eastern and Western Wind] (textless), vv, trad. insts, elec gui, elec insts, 1985; Melita Gabes (cycle of vocal and inst improvisations, textless), vv, ud, saz, fl, sax, gui, elec insts, 1985–8; Andávghies apo to Asma asmaton [Glints from the Canticle of Canticles] (Song of Songs, trans. Y. Seféris, Plato: *Symposium*), 1 male v, 1 female v, vv, 15 insts, 1986; Odhi ston Kalvo [Ode to Andréas Kalvos], mixed chorus, live elecs, 1987; Eeros anghelos [Eros Messenger] (Sappho), S, fl, cl, hn, vn, va, vc, db, hp, cel, perc, 1988; Maria Dolores, parelthon [Maria Dolores, Past] (11 songs, C. Valavanidis, S. Yannatou, O. Elytis, Y. Palamidas, Oméga), male v/female v/(male v, female v), small orch, 1990; Ikones himerias narkis [Images of Hibernation] (Lucian, Homer, J.L. Borges and others), Bar, trad. perc, live elecs, 1991; I anemoi tis oekouménis [The Winds of the Universe] (A. Kalvos), S, chbr ens, 1992; Tragoudhia tou kabare [Cabaret Songs] (anon.), female v, pf, 1996–

Inst and tape: Mikro paechnidi ya mikro synolo [A Short Play for a Small Ens], fl, cl, bn, 2 tpt, perc, pf, 2 vn, vc, db, 1976; Electronic Music Trilogy, tape, 1985; Ephesus, orch, 1990–91 [after poem by Y. Seféris]; Therino heliostassio [Summer Solstice], chbr orch, hp, glock, 1991; Nychta sto mayiko vuono [A Night on the Magic Mountain], large orch, 1992; I anàssa tis yis [The Breath of the Earth], large orch, 1992–3; Samothrace, str, 1994; Suite, 3 movts, 22 insts, 1999–

GEORGE LEOTSAKOS

Marastone [Marastoni], **Antonio** (*b* Verona; *d* after 10 Sept 1628). Italian composer and organist. Between 1619 and 1628 he worked as an organist in various small towns near Verona: Peschiera (1619), Illasi (1624–5) and San Bonifacio (1628). His surviving publications are secular in nature, though Vincenti and Walther cite a volume of motets (now lost) published in 1625. His *Concerti* op.2 for two to four voices and continuo (Venice, 1624) is among the earliest publications of secular music to employ the term 'concerto' on its title-page. The volume is largely given over to chamber duets but also includes four canzonas in two and three parts for strings. His other surviving publications are *Madrigali concertati*, for two to five voices and continuo (Venice, 1619) and *Madrigali concertati* op.6, for two and three voices and continuo (Venice, 1628). His works show some knowledge of contemporary trends in Venetian music: the attractive duet *Armato il cor* (1624; ed. in Whenham), for example, employs a 'walking' bass.

JOHN WHENHAM

Maratius, Silvius. *See* MARAZZI, SILVIO.

Marazzi [Maratius], **Silvio** [Silvius] (*b* Cremona; *fl* 1577–*c*1598). Italian composer. He was a priest. He was presumably resident in Parma in 1577 since his *Primo libro de' madrigali a tre voci* (Parma, 1577) is dedicated from there to the Marchese di Soragna, a member of the local nobility, and is printed by the Parmesan printer Seth Viotti. Two pieces in the collection, *Ben scopr'il bel* and *Lucente sol*, have personal dedications, and the volume is prefaced with a laudatory poem addressed to Marazzi by Crisippo Selva, a poet whose *Rime* Viotti had published in 1574. The book, which according to the dedication was Marazzi's first publication, mostly consists of pieces in a lighter style spiced with the more obvious rhetorical gestures of the serious madrigal. His only other extant printed collection is the *Motecta quinque vocum liber primus* (Venice, 1581, inc.). A book of three-voice masses with a *Magnificat* (now lost) was advertised in a printed broadside catalogue (see *MischiatiI*) issued by the heirs of the Milanese printers Francesco et Simone Tini. Although the catalogue is undated it can be assigned to about 1596; Marazzi's volume is a handwritten addition, along with a volume of masses and motets by Valerio Bonà published in 1594, and was presumably published around the same time. It certainly appeared before 1598, when the Tini shop was reorganized and renamed. Six motets by Marazzi appeared in German collections, three for five voices in Lindner's *Sacrae cantiones* (RISM 1585[1]) and three for three voices and continuo in *Promptuarii musici* (1622[1], 1623[2]); three more motets survive in manuscript (in *D-Rp*).

IAIN FENLON

Marazzoli, Marco [Marco dell'Arpa] (*b* Parma, *c*1602–5; *d* Rome, 26 Jan 1662). Italian composer, singer and harpist.

1. LIFE. Marazzoli was one of at least four children born to Dionisio and Flora de' Marazzoli. He took holy orders and was presumably ordained priest about 1625. At that time he received a benefice from Parma Cathedral, but he had to forgo this on 27 February 1637 because of new permanent duties at Rome. According to his autograph will, Marazzoli moved to Rome in 1626. Perhaps he was taken there, in the company of Domenico Mazzocchi, by Cardinal Ippolito Aldobrandini, who returned to Rome from Parma on 7 November 1626. Some time afterwards Marazzoli entered the service of Cardinal Antonio Barberini the younger. In 1631 Marazzoli, together with such well-known musicians as Landi and Filippo Vitali, accompanied the cardinal when he went as papal legate to Urbino. Probably Marazzoli made other travels with Antonio Barberini, to Bologna and Pinerolo between 1629 and 1630 and perhaps also to Avignon in 1633. Minor legations made by Antonio Barberini from 1634 to 1637 were directed to central Italy, and it is therefore possible that Marazzoli paid a short visit to Parma at this time.

Early in 1637 Antonio Barberini became protector of French affairs at Rome, where he remained until the Barberinis engaged in the War of Castro in 1641. Marazzoli entered the cardinal's new household as *aiutante di camera* in 1637, and the Barberini family secured for him a post as tenor in the papal chapel on 23 May. He was later made a *bussolante* by Pope Urban VIII. He had already, since 1634, held a benefice at Antonio Barberini's basilica, S Maria Maggiore, which continued until his death.

Not until 1639 did Marazzoli gain the position of a *musico* in the household of Antonio Barberini, and it is therefore somewhat difficult to trace his activities as a composer before this date. He did, however, write the music for the comedy-ballet *La pazzia d'Orlando* for Carnival 1638 and the *intermedi* to *Chi soffre speri* for Carnival 1639, both performed in the Barberini palace. From 1640 his compositional activities moved from Rome to Ferrara (a bridgehead of the papal dominions) and Venice. His opera *L'Amore trionfante dello Sdegno* (*L'Armida*) was written to celebrate a wedding in February 1641 in Ferrara, where Marazzoli is said to have stayed from July 1640 to March 1641. He apparently made a second trip to Ferrara in November 1641, when he perhaps composed *Le pretensioni del Tebro e del Po*, in which he aimed to represent the military campaign of Taddeo Barberini and Luigi Mattei at Castro in October 1641.

In order to defend the papal territories against Parma, *Generalissimo* Taddeo Barberini, after the victorious Castro battle, moved with the papal army to Ferrara, arriving on 5 January 1642. To celebrate the event *L'Armida* was given in a second version on 11 January, directed, it seems, by a colleague or pupil of Marazzoli, who had himself just gone to Venice. According to Capponi (*ES*), Marazzoli was invited there to revise Vitali's *Narciso et Ecco* for Carnival 1642. During the same carnival Marazzoli's own opera *Gli amori di Giasone e d'Isifile* was given at the Teatro SS Giovanni e Paolo. He then returned speedily to Ferrara to direct *Le pretensioni* in honour of the second arrival of Taddeo Barberini on 4 March 1642.

Back in Rome by mid-1642, Marazzoli composed his allegorical opera *Il giuditio della ragione tra la Beltà e l'Affetto* (*Il Capriccio*) on a text by Francesco Buti, probably suggested by Cardinal Mazarin. The performance, supervised by the Count of Marciano, took place in the Palazzo Roberti during Carnival 1643. In November Marazzoli succeeded, through the intervention of Antonio Barberini with the pope, in securing leave of absence to travel to Paris, at Cardinal Mazarin's invitation, with a company of Italian musicians including the singers Leonora Baroni and Atto Melani. At the court of Anne of Austria in Paris he composed chamber cantatas with which he delighted the queen, sometimes moving her to tears. *Il Capriccio* was probably performed at the French court in February 1645 with new ballets. When he returned to Rome in April 1645 Marazzoli found himself deprived of opportunities for opera because of the Barberini family's exile in France (1645–53). He therefore took to writing oratorios, including five Latin works almost certainly composed for the Arciconfraternita del SS Crocifisso. Three extant Italian oratorios may have been written for the Roman Filippini about 1650. Possibly Marazzoli travelled to Genoa in 1649; his cantata *A*

Autograph MS of the opening of Marazzoli's cantata 'Le dite pur grosse', probably composed 1655–6 (I-Rvat Chigi Q V 68, f.114r)

valicar di Teti, 'fatta per il passaggio della Regina di Spagna da Genova', refers to the Habsburg Princess Maria Anna, who sojourned in Genoa in mid-1649 on the way to her wedding with Philip IV of Spain.

1653 saw the return of Antonio Barberini to Rome and the reconciliation of the Barberini and Pamphili families. For the marriage of Taddeo Barberini's son Maffeo with Olimpia Giustiniani (a niece of Innocent X) a new opera was commissioned from Marazzoli by Antonio Barberini. Probably because he was short of time, Marazzoli invited Antonio Maria Abbatini, with whom he had been on friendly terms ever since they had served together at S Maria Maggiore, to collaborate with him, and their opera *Dal male il bene* was given during Carnival 1654 at the Teatro Barberini. Marazzoli assumed the role of principal composer for the new Barberini opera series. For Carnival 1655 he composed *Le armi e gli amori*, but the conclave to elect a new pope after the death of Innocent X caused the production to be postponed. At Christmas 1655 Queen Christina of Sweden arrived in Rome, and in her honour the Barberini family presented Marazzoli's allegorical opera *La Vita humana* during Carnival 1656 (*Le armi e gli amori* and *Dal male il bene* were also performed during carnival). Marazzoli used the title of *virtuoso da camera* to the queen, and it may be that he attended her during her singing lessons with Loreto Vittori. Marazzoli was well known also as a harp player. He possessed the famous gilded 'Barberini harp', now in the Museo degli Strumenti Musicali, Rome, which was represented in a painting by Giovanni Lanfranco.

According to Capponi (*ES*), Marazzoli wrote the prologue (to a libretto by Francesco Buti) for a ballet by Lully, *L'Amour malade*, performed in January 1657 in the Grande Salle of the Palais du Louvre, Paris. This hypothesis has some probability, since in 1660 Marazzoli received from the French ambassador in Rome a gift of 1000 livres for former services not specified. Marazzoli remained at Rome and must have sent the score to Paris, but it is also possible that some other composer, perhaps Caproli or Cavalli, was entrusted with the commission. From April 1655 Marazzoli worked also for the new pope Alexander VII Chigi, who commissioned festive cantatas for the Vatican, the Quirinal and Castel Gandolfo (see illustration). In 1656 Marazzoli was appointed *cameriere extra* by the pope, but the plague of 1656–7 and the years of poverty that followed interrupted Roman musical activities until about 1660. Antonio Barberini experienced a new surge of religious faith about this time, and may have influenced the composer, who began to celebrate mass personally. It is interesting that Marazzoli's will, drawn up about 1660, names Anna Giustiniani, his adoptive niece since 1650, several members of the Barberini family, Cardinal Giulio Rospigliosi and some other friends, but neither Queen Christina of Sweden nor the Chigi family. We know that the queen admired Carissimi and Abbatini (and, later, musicians of a new generation), perhaps more than Marazzoli, and this may have been true of the pope as well, after an initial period of admiration.

During Mass in the Cappella Sistina on 25 January 1662 Marazzoli was wounded in a serious accident; he died the next day.

2. Works. Marazzoli's first important work for the theatre was *La fiera di Farfa*, an intermedio to *Chi soffre*

speri by Virgilio Mazzocchi, with a libretto by Giulio Rospigliosi and sets by Lorenzo Bernini. This includes a realistic market scene in which Marazzoli introduced street cries, folksongs and dances. The writing for double chorus is on the whole rather dense and heavily polyphonic in texture. Important also are Marazzoli's last two operas, the allegorical *La Vita humana, ovvero Il trionfo della pietà* and *Le armi e gli amori* (based on a Spanish play). Recitative tends towards a secco character, but declamation is relatively slow; cadences too often employ a descending three-note cliché, and soliloquies tend to remain within the bounds of stylistic convention, seldom containing moments of surprise. More expressive are the brief sorrowful outbursts in recitative, broken up by rests and enhanced by the harmonies. The arias show a wide variety of affects; there are airy 4/4 canzonettas, highly virtuoso arias characterized by long and difficult passages of *fioritura*, and slow arias in 3/2 metre. This last type shows Marazzoli's talent for expressing feelings of lamentation and sorrow, a talent justly acknowledged by his contemporaries. Choruses (in *La Vita humana*) are characterized by homophony and lively rhythms.

The five Latin oratorios show a considerable advance over *La fiera di Farfa* in the technique of choral writing. Marazzoli's use of multiple choirs (and instrumental groups) reveals the influence of north Italian composers, including Monteverdi. The choruses in the oratorios are built on the principle of structural contrast – much more than those of Domenico Mazzocchi, for example, who still used older Venetian and Roman techniques of polychorality. The choruses of Marazzoli are notable less for their expression of affects than for their dramatic impact. The recitatives show a slow and sometimes monotonous type of declamation without word-repetition. In this they differ, for example, from the expressive monody of Mazzocchi, but they do include occasional passages of arioso. Of the three full-scale Italian oratorios, probably written for the Roman Filippini about 1650, *La Resurrezione* is reflective in tone, *S Tomaso* of the narrative-dramatic type. Recitative is more extensive than in the Latin oratorios, and closed aria and ensemble structures are introduced. Emphasis is placed on vocal virtuosity, even (in the role of the apostle Peter) for the bass voice.

The 380 or so extant cantatas form the third important group of Marazzoli's works. The generic term 'cantata' here embraces a wide variety of vocal forms: recitative, lament, dialogue, canzone, aria, *sonetto* and others. The 'classical' cantata structure of two arias each preceded by recitative is also present. As well as the typical amorous texts there are moralistic and sacred ones. Among Marazzoli's preferred structures is the two-strophe aria with *intercalare* (vocal refrain), also called *couplet-refrain* or rondo form. STROPHIC VARIATIONS play an important part in general. Recitative is mostly rather sober, sometimes with diminutions at cadences. The cantatas written after about 1650 are simpler in structure and *fioritura*. Some of them may have served a didactic purpose, perhaps for the singing lessons of noblewomen such as the Queen of Sweden or the Princess of Palestrina.

Marazzoli's instrumental music consists mainly of sinfonias for operas and ballets. They are important in the *intermedi* of *Chi soffre speri*, in *Il Capriccio* and in *La Vita humana* (although they do not appear in the print of 1658). The dances are still much in the Renaissance manner of, for example, Gastoldi. Interesting is a short instrumental sinfonia (in A minor) to *Erat quidem languidus*, the first oratorio in a Lenten series. Here the type of structural contrast found in the choral writing is adapted to the possibilities of the available instruments.

WORKS

STAGE

La pazzia d'Orlando, ovvero L'acquisto di Durindana (comedy-ballet, G. Rospigliosi), Rome, Palazzo Barberini, carn. 1638, music lost

La fiera di Farfa (intermedio to Act 2 of Chi soffre speri by V. Mazzocchi, lib Rospigliosi), Rome, Teatro Barberini, 27 Feb 1639, *I-Rvat* (facs. in IOB, lxi, 1982)

L'Amore trionfante dello Sdegno [L'Armida] (opera drammatica, prol, 5, A. Pio di Savoia, after T. Tasso: *Gerusalemme liberata*), Ferrara, Sala Grande, ? Feb 1641, *Rvat* (mostly autograph); Ferrara, 11 Jan 1642

Gli amori di Giasone e d'Isifile (festa teatrale, prol, 3, O. Persiani), Venice, SS Giovanni e Paolo, 22 Feb 1642, lost, lib (Venice, 1642)

Le pretensioni del Tebro e del Po (equestrian ballet, Pio di Savoia), Ferrara, 4 March 1642, *Rvat**

Il giuditio della ragione tra la Beltà e l'Affetto [Il Capriccio] (dramma in musica, prol, 3, F. Buti), Rome, Palazzo Roberti, carn. 1643; Paris, royal court, 1645, music lost, MS lib *Rvat*

Dal male il bene (dramma musicale, 3, Rospigliosi, after A. Sigler de Huerta: *No ay bien sin ageno daño*), Rome, Teatro Barberini, 12 Feb 1654, *D-MÜs* (Act 1), *I-Bc*, *IBborromeo*, *Rsc* (Acts 2–3), *Rvat*; collab. A.M. Abbatini

La Vita humana, ovvero Il trionfo della pietà (dramma musicale, prol, 3, Rospigliosi), Rome, Teatro Barberini, 31 Jan 1656, *IBborromeo*, *Rvat* (Rome, 1658)

Le armi e gli amori (dramma per musica, prol, 3, Rospigliosi, after J. Pérez de Montalbán), Rome, Teatro Barberini, 20 Feb 1656, *Rvat*

Doubtful: intermedio for Troades (spoken drama, Seneca), Rome, Teatro Barberini, carn. 1640; prol to J.-B. Lully, L'Amour malade (comédie-ballet), Paris, Louvre, 17 Jan 1657

LATIN ORATORIOS

all probably performed at Rome, Oratorio del Crocifisso

all in I-Rvat Chigi Q VIII 188

Erat fames in terra Canaan, S, S, A, T, B, 2 vn, bc

Erat quidam languens Lazarus, S, S, A, T, T, B, SATB, 3 vn, lyra viol, theorbo, org (for 4th Friday in Lent)

Erat quidem languidus, S, S, A, T, B, SATB, 3 vn, lyra viol, 2 theorbo, org (with sinfonia, for 1st Friday in Lent)

Homo erat pater familias, S, S, A, T, B, SATB, org (for 2nd Friday in Lent)

Venit Jesus in civitatem Samarie, S, S, S, A, T, T, B, ATB, 3 vn, lyra viol, theorbo, org (for 3rd Friday in Lent)

O mestissime Jesu, S, S, A, T, B, SSATTB, 3 vn, lyra viol, theorbo, org (probably for 1st Passion Friday)

ITALIAN ORATORIOS

all probably performed at Rome and/or Bologna, Oratorio dei Filippini

Per il giorno della resurrezione, S, S, S, A, T, B, bc, *I-Bc* Q 43, 110–20

S Tomaso, S, S, A, T, B, bc, *Bc* Q 43, 122–33; excerpts ed. in Mw, xxxvii (1970; Eng. trans., 1970), 36ff

S Caterina, S, S, A, T, B, 2 vn, bc, *Rvat* Barb.lat.4209 (anon., attrib. L. Rossi by A. Ghislanzoni, *Luigi Rossi*, Milan and Rome, 1954; attrib. Marazzoli in 1682 inventory of *Bof*)

Natale di N.S., overo P^{o} giorno dell'anno, lost, cited in 1682 inventory of *Bof*

Per ogni tempo, lost, cited in 1682 inventory of *Bof*

S Giustina di Padova, lost, cited in 1682 inventory of *Bof*

ITALIAN ORATORIO-DIALOGUES

all in I-Rvat Chigi Q VIII 188

Ecco il gran rè de regi, S, S, S, A, T, B, bc

Poichè Maria dal suo virgineo seno, S, S, A, T, T, B, bc

Qual nume omnipotente che diè leggi, S, S, A, T, T, B, bc

Udito habbiam Giesù, S, S, S, A, T, B, bc

OTHER SACRED VOCAL

Alma Redemptoris mater, motet, S, S, A, T, T, B, SATB, bc, *I-Rvat* Chigi Q VIII 188

Ave regina caelorum, motet, S, S, S, T, B, bc, *Rvat* Chigi Q VIII 178

WOLFGANG WITZENMANN

Marbe, Myriam (Lucia) (*b* Bucharest, 9 April 1931; *d* Bucharest, 25 Dec 1997). Romanian composer. After studying privately with Mihail Jora, she attended the Bucharest Conservatory, where her teachers included Leon Klepper. She became acquainted with trends in Western European contemporary music through Mihail Andricu. She taught at the Bucharest Academy of Music from 1954 to 1989, becoming professor of composition in 1972. A number of travel permits enabled her to participate in the Darmstadt summer courses (1968, 1969, 1972) and the Gaudeamus Week at Bilthoven (1969, 1972). Her honours include prizes from the GEDOK (Mannheim) and the Romanian Composers' Union, the Women Artists' Prize of the city of Heidelberg (1987) and a stipend from the city of Mannheim (1989). Also active as a musicologist, in 1972 she won the Bernier Prize as co-editor of the monograph *George Enescu* (Bucharest, 1971).

Marbe's early work includes many vocal compositions and a piano sonata (1956) in which she employs serial techniques for the first time, interlocking them with modal systems; rigorous polyphonic structures are softened by rubato. Her tendency to combine abstraction with elements of traditional Romanian musics is exemplified by the speech-song of *Ritual pentru setea pămîntului* ('Ritual for the Thirst of the Earth', 1968) and the reduction of the vocal line in *Jocus secundus* (1969) to rhythms matching the semantics of the words. In *Cyclus* (1974) and *Eine kleine Sonnenmusik* (1974) a radical change in style is evident, marked by a spontaneous pleasure in music-making and a freer treatment of musical material.

Marbe described *Les oiseaux artificiels* (1979) as her testament of the 1970s. Works such as the first and second string quartets (1981, 1985), *Trommelbass* (1985) and *E-Y-Thé* (1990) react to dramatic circumstances in her country, while the third and fourth string quartets and the requiem *Fra Angelico – Chagall – Voronet* (1990) reflect on events in her personal life. Archetypal elements in her first symphony 'Ur Ariadne' (1988) and in *Passages in the Wind* (1994) indicate her movement towards a purified style in such works as *d'a Cantare-Cantarellare* (1995) and *Arc-en-ciel* (1997).

WORKS

Vocal: Noapte taraneasca [Rustic Night] (cant., C. Theodorescu), chorus, orch, 1958; Madrigale din lirica japoneză (Jap. haiku), women's vv, 1964; Clime [Atmospheres] (I. Negoitescu), Mez, women's vv, children's vv, chbr orch, 1966; Ritual pentru setea pămîntului [Ritual for the thirst of the earth] (Rom. folk texts), 7/14 solo vv, chorus, perc, prep pf ad lib, 1968; Vocabulaire I – chanson, S, cl, pf, prep bells, 1974; Les oiseaux artificiels (after W. Shakespeare), spkr, cl, vn, va, vc, hpd + cel, 1979; Timpul regăsit [Time Rediscovered], S/T, ens, 1982; An die Musik (R.M. BETTINA BRAND (work-list and bibliography with THOMAS BEIMEL)

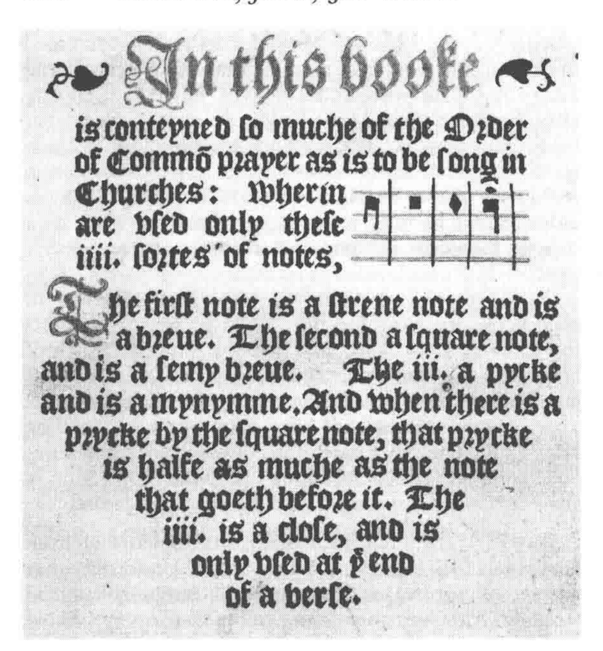
Marbeck [Merbecke], **John** (*b* ?Windsor, *c*1505; *d* ?Windsor, *c*1585). English organist, composer and writer. He is chiefly remembered as the composer of *The Booke of Common Praier Noted* (1550/*R*1979 and 1982).

1. Life. The date and place of Marbeck's birth are unknown. However, on the basis of his son Roger's birth in 1535 and the inclusion of his mass in the Forrest-Heyther partbooks that date from about 1530 (*GB-Ob* Mus.Sch.E.376–81), it is generally estimated that he was born in about 1505 (Bergsagel, 1963). In the preface to his biblical *Concordance* (1550), dedicated to Edward VI, Marbeck states that he was 'altogether brought up in your highness' college at Windsor, in the study of music and playing of organs'. His name appears in an inventory at St George's Chapel, Windsor dated May 1531. The earliest extant reference to him as organist is found in the accounts for 1541–2. Similar account books indicate that he was also paid as a lay clerk. Marbeck remained at Windsor for the whole of his professional life.

On 16 March 1543 he was arrested, along with three others, for heresy. The four men were imprisoned in the Marshalsea, London and were interrogated. Marbeck was accused of authoring a document that was highly critical of the Mass. A manuscript concordance of the English Bible that he had compiled was confiscated and destroyed. All the accused were sentenced to death at the stake and shortly afterwards this sentence was carried out on the others. Marbeck, however, was reprieved by a royal pardon that was ratified on 4 October 1543. After his release he returned to his position at St George's Chapel, Windsor. He may have been responsible for the setting of Archbishop Cranmer's English Litany published in 1544. However, there is no evidence other than the simple syllabic style that is also found in his settings of *The Book of Common Praier Noted* (1550) to link him with the litany.

With the accession of Edward VI in 1547 Protestantism was openly pursued. Marbeck began work on compiling another concordance to replace the one confiscated on his arrest. He was unable to find a publisher willing to accept it, however, owing to its great length and consequent expense. As a result Marbeck produced a third, abridged version which nevertheless consists of nearly 1000 pages and this version, the first complete concordance of the English Bible to be published, appeared in 1550. In 1549 Marbeck supplicated for the degree of BMus at Oxford but it is not known whether the degree was awarded. In the following year, royal injunctions for St George's Chapel reduced the choral foundation and discontinued the use of the organ although organists Marbeck and Thaxton still received their fees. In July 1553, shortly after the accession of Mary Tudor, the organs were either repaired or newly constructed and the full range of Latin services with music was reintroduced. Marbeck's function within the chapel during these years is unclear. Records indicate that he only received payments for work as a copyist. However, the extant sources are too fragmentary to allow firm conclusions to be drawn.



During the Elizabethan years Marbeck returned to playing the organ for Prayer Book services as the accounts for 1558–9, 1564, 1567 and 1568–9 indicate. Much of his time in his final years was devoted to the writing of lay theological books of a pronounced Calvinist nature. There is no evidence that Marbeck composed anything after 1550. The exact date of his death is not known but must have occurred before June 1585 when John Mundy and Nathaniel Giles jointly held the post of organist.

2. Works. The publication of the first Book of Common Prayer in 1549, together with the Act of Uniformity that ordered its universal use, necessitated a change in liturgical monody. Although some more radical reformers wanted to eliminate plainchant, the Prayer Book appeared to endorse its continued use in the rubric at Matins that allowed the use of chanting the lessons at Matins and Evensong, and the epistle and gospel at Communion, but in English rather than Latin. Manuscript adaptations of traditional chant to the new English liturgical texts such as the *Te Deum* (Aplin, 1979) and *Sursum corda* (Milsom, 1992) are known. However, Marbeck's *The Books of Common Praier Noted* (1550) was the first published musical setting of services in the 1549 Prayer Book.

Towards the end of 1548 the committee that compiled the final form of the first English Prayer Book met in Windsor Castle under the chairmanship of Archbishop Cranmer. It seems likely that the origins of *The Booke of Common Praier Noted* can be traced to the deliberations of this committee. It is significant that Marbeck, the leading musician at Windsor, produced the book and that Grafton, one of the royal publishers that issued the 1549 Prayer Book, published it, suggesting that it had a quasi-official status.

The music comprises severely simplified adaptations of Sarum monodic chant together with Marbeck's newly-composed settings in a similar style. Earlier scholarship stressed the medieval plainchant origins of Marbeck's settings. However, more recent studies have drawn attention to close affinities with Lutheran adaptations of traditional chant and interpret Marbeck's book as a significant Reformation document (Leaver, 1982; Carleton, 1992). Settings are given for the daily Offices, Matins and Evensong, Communion, Burial, and Burial Communion, but not the litany which had been published with simplified chant in 1544. The notation is mensural rather than free plainchant and the rhythmic patterns of the English text are carefully reproduced by four note shapes: 'strene' (breve), 'square' (semibreve), 'pycke' (minim) and 'close' (extended breve for cadences). Marbeck also used dotted rhythms where the dot, as in modern notation, lengthened the note by half its value (see illustration).

Several misunderstandings persist with regard to Marbeck's book. Firstly, there is the suggestion that there was more than one imprint issued in 1550. However, the variants discovered when extant copies are compared are

In this booke

is conteyned so muche of the Order of Commō prayer as is to be song in Churches: wherin are vsed only these iiii. sortes of notes,

The first note is a strene note and is a breue. The second a square note, and is a semy breue. The iii. a pycke and is a mynymme. And when there is a prycke by the square note, that prycke is halfe as muche as the note that goeth before it. The iiii. is a close, and is only vsed at yͤ end of a verse.

Explanation of the four note shapes in the preface to Marbeck's 'The Booke of Common Praier Noted' (London: Grafton, 1550)

due not to different editions but to the two-stage printing process in which the notation did not always appear in the correct location on the stave. Secondly, it is frequently asserted that Marbeck's music is congregational. However, this reflects later usage rather than the original intent. The rubrics of both the 1549 Prayer Book and Marbeck's book indicate that these settings were to be sung by the clerks/choir rather than the congregation. Thirdly, it has been suggested that Marbeck's settings were intended for parish churches rather than cathedral and collegiate churches. However, given the Edwardian climate in which the music of the cathedral tradition was being severely simplified and that these settings originated in one such institution, the implication is that they were intended for all churches, including cathedrals, where there were singing clerks.

The publication of the revised, second Prayer Book in 1552 rendered Marbeck's book obsolete and the reversion to Roman Catholicism under Mary Tudor that began the following year eliminated any need to issue a new edition. Elizabethan composers appear to have used Marbeck's Preces and responses as the basis for their own multi-voiced settings and Marbeck's book was known to interested antiquarians, such as Samuel Pepys, in later generations. Apart from such settings, Marbeck's work remained forgotten until the mid-19th century. Since then numerous editions and arrangements of sections of *The Book of Common Praier Noted* have been published. Marbeck's music (in particular his Communion setting) is still sung in Anglican churches throughout the world, as well as in Methodist, Presbyterian and other Protestant churches. It has even been adopted by the Roman Catholic Church as a setting for the Mass in English.

Only four polyphonic works by Marbeck survive: three Latin works – a mass and two motets – and an English anthem. The Latin works are typical of much pre-Reformation church music. They use contrasting groups of voices, extensive melismas, wide-ranging vocal lines, and occasional use of chordal passages to emphasize important words in the text. The unique source of the Mass *Per arma justicae* dates from about 1530 and contains masses by Fayrfax, Taverner, Tye and Sheppard. Marbeck's mass is based on the antiphon at None on Mondays during Lent (melodically identical with the first antiphon at Lauds and Vespers for the Feast of the Trinity). Like other English masses of the time, it comprises four movements: the Kyrie is not set and the text of the Credo is abbreviated. Cantus-firmus and paraphrase techniques are employed, with some passages of imitation. The cantus firmus is mostly in the tenor, but also appears from time to time in the other voices. The motets *Ave Dei patris filia* and *Domine Jesu Christe* share features in common with the mass with occasional word-painting of a striking harmonic character. They were possibly written as post-Compline anthems and were composed at about the same time as the mass. The simpler, three-part anthem was probably composed during the last years of the reign of Henry VIII. Its simple imitative style is mostly syllabic and to a large extent epitomizes Cranmer's ideal of one note per syllable, expressed in his letter to Henry VIII in 1544.

WORKS

The Booke of Common Praier Noted (London, 1550/R 1982): Matins: Preces and responses, Ven, TeD, Bs (2 settings), vcles and responses; Evensong: Preces and responses, Mag (2 settings), Nunc; Benedicite; Quicunque vult; Communion: Ky, Gl, Cr, offs, San, Bs, Ag, post-communion; Burial: 3 responds; Burial Communion: Ky, San, Bs, Ag

Mass 'Per arma justiciae', 5vv, *GB-Ob*; ed. in TCM, x (1929); facs. in Milsom, 1986

Ave Dei patris filia, 5vv, *Cu* (T missing); ed. in TCM, x (1929)

Domine Jesu Christe, 5vv, *Ob*; ed. in TCM, x (1929)

A virgin and mother (anthem), 3vv, *Lbl*; ed. in TCM, x (1929)

ROBIN A. LEAVER

Marc, Alessandra (*b* Berlin, 29 July 1957). American soprano. She trained with Marilyn Cotlow in the USA and in 1983 made her début as Mariana in a concert performance of Wagner's *Das Liebesverbot* at the Waterloo Festival. The quality and power of her voice attracted

immediate attention, and she was soon singing major roles such as Tosca, Ariadne and Aida. Particularly admired were her Maria in Strauss's *Friedenstag*, which she later recorded, at Santa Fe and Lisabetta in Giordano's *La cena delle beffe* at the Wexford Festival of 1987. Aida was the role of her début in Chicago, San Francisco and at the Metropolitan; it also introduced her to Vienna in 1992. Marc made her Covent Garden début in 1994 as Turandot, a role she has since sung widely in Italy, France and Israel. In song recitals her voice has been found almost overpowering, as it was by some when she made her concert début at the Wigmore Hall, London, in 1990. Large-scale choral works such as Beethoven's *Missa solemnis* and Verdi's *Requiem* (which she has recorded with Barenboim) have suited her well. Although she has been somewhat neglected by the major recording companies, her magnificent voice, with its mezzo-tinted timbre, is impressively heard as Strauss's Elektra and Chrysothemis and in an operatic recital on the Delos label.

J.B. STEANE

Marc, Thomas (*fl* Paris, ? 1720–35). French viol player. He taught the pardessus de viole to Mlle de la Roche-sur-Yon, to whom he dedicated a book of pieces entitled *Suitte de pièces de dessus et de pardessus de viole et trois sonates avec les basses continües* (Paris, 1724), the first collection of music specifically for the six-string pardessus de viole. In his suite of 21 pieces, quick movements take precedence, particularly the minuet, gavotte and rondeau, several of which have brilliant *doubles*. The melodic and rhythmic style of the three sonatas is italianate (especially the Vivement of no.3, and the courantes and gigues), but the movements retain a French character in ornamentation and title. His privilege to publish the collection of 1724 was renewed ten years later.

MARY CYR

Marcabru [Marcabrun, Marchabrun, Panperdut] (*fl* *c*1129–*c*1150). Troubadour. He was probably from Gascony. He is the most distinctive and prolific of the so-called second generation of troubadours. The two short *vidas* claim that he was the son of a poor woman called Marcabruna, that he was a foundling and that he was originally known as Panperdut (Lost Bread); but these details are derived from remarks in his songs which are probably not to be taken seriously. It is not known whether Marcabru was his given name or a professional sobriquet.

The chronology of Marcabru's career is controversial, but his first identifiable patron is Guillaume X, Duke of Aquitaine (ruled 1126–37), the son of the earliest known troubadour, GUILLAUME IX. Either before or after Guillaume X's death, on 7 April 1137, Marcabru sought patronage at various Iberian courts, before turning to the young Peire de Gabaret, Viscount of Béarn (ruled 1134–53). Subsequent patrons were Alfons Jordan, Count of Toulouse (1104–48) and Alfonso VII of León, self-styled Emperor of Spain from 1135. It was in Alfonso's service that he composed his two crusading songs in support of the Christian reconquest of Spain; the famous *lavador* song *Pax in nomine Domini!*, in which he likened the Spanish crusade to a 'washing-place', cleansing the sins of those who fought for the Christian cause, appears to date from shortly before the recapture of Lérida in October 1149.

Marcabru's speciality was the moralizing type of song that later became known as the sirventes. He castigated the indolent and lascivious behaviour of the nobility, condemning adultery and advocating a pure, ennobling form of love which is not without religious overtones. He lamented the declining generosity of courtly patrons, and seems to have identified with the *soudadiers* – the young men, perhaps sons of the lesser nobility, who depended on patronage for their livelihood. His poetry shows familiarity with a fairly wide range of moralizing literature. His didactic purpose is evident throughout his work; even his *pastorela*, *L'autrier jost'una sebissa*, the earliest known example of the genre, makes a moral point as the shepherdess repulses the knight's advances by articulately reminding him of his knightly obligations. Marcabru frequently named himself in his poems, drawing attention to his role as the self-appointed *chastiaire* (castigator) of folly and loose morals. Richness of allusion, irony and nonce-words make his poetry difficult to understand, and he has been seen as a forerunner of the *trobar clus*, though he did not use this term himself.

He addressed his song *Cortesamen* (pc 293.15) to JAUFRE RUDEL, and probably also knew Cercamon, who is named as his mentor in one of the *vidas*. Six later troubadours mention Marcabru by name, either to praise his forthright style or to criticize his almost proverbial misogyny. He is the only troubadour mentioned in the famous description of the wedding festivities in the 13th-century romance of *Flamenca*, and a French romance of the late 13th century, *Joufroi de Poitiers*, depicts 'Marchabrun' as an outspoken *jongleur* pursuing the errant count of Poitiers. A scribal note in *I-Rvat* lat.5232 instructs the miniaturist to depict Marcabru as 'a jongleur without instrument' (Avalle, 180), perhaps to indicate that he was not associated with the more frivolous, dance-based genres in which instruments were considered appropriate.

Of his 42 lyrics only four survive with music: the *pastorela*, the *lavador* song and two diatribes against false love. The notation of *L'autrier* shows an almost regular alternation of long and short notes – one of the few indications of mensural rhythm in the troubadour repertory – which may have been a characteristic of the *pastorela* genre.

For a miniature of Marcabru *see* TROUBADOURS, TROUVÈRES, fig.2.

STEPHEN HAYNES

Marcantonio Romano. *See* ROMANO, MARCANTONIO.

Marcato (It.: 'marked', 'stressed', 'accented'). A performance instruction which seems to have been rare before the 19th century: it is not specifically mentioned in Koch's *Musikalisches Lexikon* (1802) though J.G. Walther did include an entry 'Marqué' in his *Musicalisches Lexicon* of 1732. Its principal use is to draw the attention to the melody or subject when it is in such a position that it might be overlooked, as, for instance, *il basso ben marcato* in Chopin's *Krakowiak* op.14; or when there are two subjects both of which are to be brought prominently forward, as in the finale of Beethoven's Ninth Symphony, where the two subjects come together in 6/4 time with the words 'Freude, schöner Götterfunken' and 'Seid umschlungen'. In his *Etudes symphoniques* no.2 Schumann has *marcato il canto* below the top line and *marcato il tema* below the bass. In the slow movement of his Quartet op.18 no.6 Beethoven used *queste note ben marcate*. *Marcato* and *ben marcato* are predictably common in Stravinsky, who also used *p ma ben articulato* (Symphonies of Wind Instruments).

The superlative form *marcatissimo* is rarely used but is found, for instance, at the end of Chopin's Etude op.25 no.11 and in the finale of Schumann's F♯ minor sonata. Bartók used it in his Second and Sixth Quartets. Schumann used *sempre marcatissimo* for no.8 of his *Etudes symphoniques*.

For bibliography *see* TEMPO AND EXPRESSION MARKS.

J.A. FULLER MAITLAND/DAVID FALLOWS

Marcel-Dubois, Claudie (*b* Tours, 19 Jan 1913; *d* Paris, 1 Feb 1989). French ethnomusicologist. In addition to piano studies at the Conservatoire (1926–8), she took courses in history, philology and ethnology in Paris, at the Institut d'Art et d'Archéologie (1931–3), at the Institut d'Ethnologie (1934–5), and at the Ecole Pratique des Hautes Etudes (1937–9, diploma 1939). She studied ethnology and anthropology with Marcel Mauss (1934–7), the piano with Marguerite Long (1929–32, diploma 1932) and organology and ethnomusicology with Sachs (1934–8). After making her début as a pianist she concentrated on ethnomusicology. She worked with Sachs and Schaeffner at the department of ethnomusicology of the Musée de l'Homme (1934–40) and in 1941 became Chargée de Mission des Musées de France. She was founder and director of the department of ethnomusicology (1945) and its library of tape recordings (1960) at the Musée National des Arts et Traditions Populaires; she also worked at the CNRS, where she was appointed maître de recherche (1957) and director (1966). From 1961 she taught ethnomusicology at the Ecole des Hautes Etudes en Sciences Sociales, Paris; in the same year she received the honorary doctorate from Laval University, Quebec.

Though her first book dealt with the music of ancient India, Marcel-Dubois' work centred on the ethnomusicology of Europe and in particular that of France and the francophone countries. Her field and laboratory studies dealt chiefly with the evolution of folk instruments and the systematic classification of the oral tradition of folk music, especially French ethnic music. Her publications include several books, articles in encyclopedias and journals, and numerous records of folk music.

CHRISTIANE SPIETH-WEISSENBACHER

Marcello, Alessandro [Stinfalico, Eterio] (*b* Venice, 24 Aug 1669; *d* Venice, 19 June 1747). Italian composer. The son of a Venetian nobleman, he excelled in many fields and led a rich and varied life; his greatest contributions to the history of music came through his role as a Venetian academician. He was admitted to the Maggior Consiglio of the Republic on 2 December 1690 and long played an active role in the Venetian judiciary system. From 1690 to 1704 he was mainly occupied with completing his

education in the Collegio di S Antonio, in gaining admittance to the Accademia degli Animosi (1698) and in serving in diplomatic posts in the Levant and the Peloponnese (1700–01).

The years 1705–8 were critical in the advancement of his interests, relationships and career. He briefly indulged in painting and drawing, apparently with the aim of ennobling premises he inhabited, with pastoral and allegorical paintings for the family palaces at Strà and Venice respectively and a religious painting for the ceiling of the Marcello parish church, S Marcuola. In literary circles, he was admitted to the Florentine Accademia della Crusca on 18 September 1706; his eight books of couplets (*Ozii giovanili*, 1719) seem at first to have been better known in Paris than in Venice.

Alessandro's most conspicuous activities as a composer seem often to have coincided with his advances in government service. For example, in 1708 he was appointed to the Quarantìa (which dealt with criminal matters), published a volume of cantatas dedicated to the Roman noblewoman Livia Spinola Borghese, and began a lawsuit against his brothers Benedetto and Gerolamo over the ownership of some boxes in the Teatro S Angelo. In his government career he was a judge of the waterways authority (1713–15), a sentencing officer for the Quarantìa (1722–3), a counsel to merchants (1731) and a council member of the Comun (1741–2). In 1728 he seems to have had business involvements with a trading enterprise in Antwerp.

By 1719 Alessandro had become *principe* of the Accademia degli Animosi, a long-established Arcadian colony in Venice. Although he still indulged in painting, drawing, the writing of poetry and other creative activities, his particular interest as an academician seems to have been in collecting musical instruments for the *galleria di strumenti* which he maintained. Although a violinist, he seems to have favoured keyboard instruments of recent manufacture and wind instruments from the 16th century; many specimens, including an undecorated Cristofori fortepiano (1724), a vertical fortepiano, and a consort of 16th-century crumhorns with the mark of the rabbit (suggesting manufacture by the Bassanos) are in the Museo Nazionale degli Strumenti Musicali, Rome.

His cantatas, character pieces which assume the roles of well-worn pastoral figures, and include personal and local allusions in their texts, are more exceptional for having been lavishly published than for their inherent musical qualities. He used black notation to express the irrationality of love. In 1712 Alessandro spent some time in Rome with the Borghese family. Some of the cantatas that survive in manuscript may have been given there, for they carry cues for Farinelli (not in Venice until 1729) and Checchino (Francesco de Grandis). Alessandro had access to very gifted female singers, including Benedetto's pupil Faustina Bordoni in Venice (towards whom Alessandro was rumoured to have had amorous intentions) and Laura and Virginia Predieri in Rome.

Alessandro's instrumental works reflect differences in orchestral practice and instrumental figuration in different venues, particularly about instrument selection (the use and choice of woodwind) and continuo practice (which instruments to use, when to omit it altogether). Using all the available options stipulated in the concertos preserved in manuscript in Venice, the result would have been more characteristic of French scoring early in the century, or of Saxon taste in the 1720s, than of Venetian or Roman practice. The concerto for seven recorders is to be unaccompanied. His oboe concerto (sometimes falsely attributed to Benedetto) was transcribed by Bach; it was published in an anthology of about 1717. The six concertos published under the title *La cetra*, which offer the optional reinforcement of violins with two oboes or two transverse flutes, may have been revised from earlier compositions to suit a German audience (transverse flutes were particularly popular north of the Alps in the 1730s). Also more characteristically German than Italian is the figuration of the three published violin sonatas which have variants preserved in Dresden. The published works are more heavily ornamented and more generously supplied with double stops and written arpeggios than the manuscript ones, which appear to be earlier.

Alessandro's personal fortunes were ultimately less rewarding than his professional, intellectual and artistic ones. Besides the long saga of the opera boxes at the Teatro S Angelo, which had begun when he was a child, his inheritance of various properties from family members was far from straightforward. Of his six children, Lorenzo (1712–80), his only surviving male heir, also enjoyed a long career in Venetian government. Alessandro was buried at the family estate at Paviola.

WORKS

Gli amanti fedeli (pastorale), lost

[12] Cantate di Eterio Stinfalico, 1v, bc (Venice, 1708); 6 ed. H. Derégis (Florence, 1969)

6 cants., *GB-CDp*, *I-BRc*, *Vnm*

Ob conc., strings, bc in Concerti a cinque (Amsterdam, *c*1717); variant in *D-SWwa*; transcr. J.S. Bach

La cetra di Eterio Stinfalico, 6 concs., 2 ob/fl, strings, bc (Augsburg, *c*1738)

Conc., 7 rec, strings, *I-Vnm*; 3 concs., 2 ob, strings, bc, *Vnm*; Conc., hpd, double orch, bc, *S-L*

[12] Suonate a violino solo di Eterio Stinfalico, bc (Augsburg, *c*1738); 3 with variants in *D-Dl*

2 sonatas, 2 vc, bc (?1757), lost; Sonata, ob, bc, lost, formerly in *Bsb*

ELEANOR SELFRIDGE-FIELD

Marcello, Benedetto Giacomo (*b* Venice, 24 June or 24 July 1686; *d* Brescia, 24 July 1739). Italian composer and writer. The son of a Venetian nobleman, he followed the career path of all Venetian nobles of his time: he was admitted to the Maggior Consiglio of the Republic on 4 December 1706 and, after completing studies in literature and law, served in various magistracies over the next two decades. The last decade of his life is riddled with mysteries: he married the commoner Rosanna Scalfi, his singing pupil, in May 1728; had a religious experience in August of the same year; was exiled to the Istrian city of Pula (then part of the Venetian Republic) for three years (1730–33) as provincial governor; was absent from civic records for the next five years; and received his final appointment in Brescia as chief financial officer.

It is not easy to segment the musical continuum of Marcello's life, since he held no regular appointments of a musical nature and the majority of his musical works

are undated. This demonstrates how severely separated in social experience dilettante composers were from the common ranks of musical *maestri*. Nonetheless, Marcello's cultivated intellect exerted, particularly through his psalm settings and cantatas, a major influence on Italian musical thought and performance throughout the 18th century and, to various degrees, on the musical practices of many other European countries until the end of the 19th century. After a perfunctory involvement with instrumental music, his main interests as a composer, particularly between 1710 and 1720, were the cantata and the chamber duet. Thereafter, his attention turned to works on a larger scale: the 50 Psalms of David, the serenata and the oratorio. The claim that Marcello forwent composition after 1728 cannot be entirely true since two of his oratorios neatly circumscribed his years in Pula.

Marcello's intent in his *Salmi*, which were published with etchings by Sebastiano Ricci, was to restore dignity to devotional music by reviving musical practices of antiquity (see illustration). They are set in texturally differentiated sections and are for the most part through-composed. Numerous testimonials (by Gasparini, Antonio and Giovanni Bononcini, Sarri, Mattheson and Telemann) were included in each of the eight volumes. Caldara, who found the music 'eccentric', was one of Marcello's few detractors. Later Italians, in particular Padre Martini and Giovenale Sacchi, revered Marcello's *Salmi* as models of contrapuntal writing. Still more accomplished examples are the six-voice canon *In omnem*

Opening of the first psalm from Benedetto Marcello's 'Estro poetico-armonico', i (Venice, 1724)

terram, published with the psalms, and the four-voice Missa Clementina, which Marcello composed for his admission to the Accademia Filarmonica, Bologna, in 1711. Being impressed with the fact that women were not permitted to sing in the ancient temple, Marcello favoured low, mainly male, voices in his psalms. Some 16 of the works incorporate sections based on quotations from Greek and Hebrew psalmody; the original sources are interpolated at the appropriate points. Like his secular vocal music of the 1720s, which is inspired by Roman and Greek epics, the melodic content varies from an ambitus which is very restricted to one which is almost impossibly broad, expressing emotional peaks and depths.

In the 1710s, when Marcello was coaching the young Faustina Bordoni and writing music for Roman nobles, such as the Borghese family, he led, in parallel with Apostolo Zeno's attempted reform of the opera libretto, a movement to reform singing style. Here his goal was to remove 'tasteless' ornamentation and to focus more on actual sound. In this phase of his life, his vocal music was much more lyrical and formally structured. Several of his chamber duets were composed for Laura and Virginia Predieri. The vast majority of his lyrical cantatas seem to have been written for performances at weekly academies (social gatherings of the nobility that featured poetry, music, oratory and debate). The texts, many of which were written by the composer, were usually pastoral. Mattheson praised the rhetorical detail of Marcello's approach to the setting of (lyrical) aria texts. More original are Marcello's intensely dramatic cantatas on tragic and heroic subjects from antiquity, which feature such figures as Andromeda, Arianna, Cleopatra, Dido, Medea and Timothy (probably mediated through the dramas of Corneille and Racine). Some of these works lack arias: others use abberations of musical notation to express a heroine's (or hero's) mental frenzy or anguish. Although the subject matter is again usually from antiquity, Marcello's serenatas are somewhat more conventional and use obbligato instruments and instrumental figuration to reinforce images and to convey elements of the drama.

The lighter side of Marcello's nature was expressed in his several satires. Of prime importance among these is the treatise *Il teatro alla moda*, first published anonymously in 1720, which is concerned especially with the decline of careful composition and well-rehearsed performance, as well as the invasion of Bolognese singers, at the Teatro S Angelo, Venice. It was especially popular in Italy in the 18th century, in France in the 19th, and in Germany in the early 20th, and it appears never to have been out of print from the time of its writing to the present. Comic musical works include the letter cantata *Carissima figlia* (1718), in which the singing styles of such opera figures as Vittoria Tesi, Faustina Bordoni and Gaetano Berenstadt are imitated; the castrato madrigals, in which it is debated whether the divinity of the singing of (adult) male sopranos and altos can save them from eternal damnation (1715); and the comic intermezzos *Spago e Filetta* (?1719). Although Marcello's two late oratorios are not satirical works, a playful mood prevails.

The impetus for the keyboard and recorder sonatas is likely to have come from academies. While the Marcello family had one of its own on the Fondamenta Nuove in Venice, Benedetto seems to have maintained a network of contacts in Rome, Florence, Bologna and various rural

retreats in the Veneto. Only the motivation for composing the *Concerti* op.1, remains unaccounted for. These works now lack the principal violin part and so accurate evaluation is impossible. Within this opus was the one piece by Marcello known to, and transcribed by, Bach. Of Marcello's keyboard works, the sonatas are the most important, for they seem to have played a role in the establishment of the genre as it was later developed by Platti, Pescetti, Galuppi and J.C. Bach. His cello sonatas, which are among his most widely performed works today, were probably composed much earlier than their date of publication suggests and, in fact, their authenticity is not beyond question.

Marcello's legacy was greatest for those who lived between 1750 and 1875, when recognition of his *Salmi* led to their translation into many other languages (French, German, Swedish, English, Russian) and their performance, as liturgically generic sacred works, in a host of different liturgical contexts. It was during this period that a great number of the manuscripts in which Marcello's secular works are now preserved seem to have been copied. In the 19th century the *Salmi* were sometimes divided into short 'motets' or 'songs', or stripped of their texts and offered as instrumental works, or retexted and offered as 'new' works. Such varieties of psalm progeny seem to number well beyond 10,000 (arrangers included Paer, Mayr, Rossini and Bizet; Verdi was a great enthusiast). Another work of the same period, the oratorio *Joaz*, is reckoned to have anticipated the reforms of Gluck many years later. Marcello's call to restore the classical virtue of 'noble simplicity' in music, found in the preface to his *Salmi*, anticipates the analogous invitation of the German archaeologist Winkelmann (who spoke of sculpture) by 30 years. Although little noted today, Marcello's role in formulating the values of classicism and promoting their musical implementation was his most significant contribution to cultural history. His influence was enormously, if subtly, pervasive.

Differing national values coloured perceptions of Marcello's music: the English revered its 'harmony', the Germans its 'melody' and the Italians its 'counterpoint'. It was only in the 20th century that Marcello's name started to fall from grace in lists of important composers in the past. Even as this change occurred, however, the influence of his *Salmi* was regenerated in ethnomusicology: the materials Marcello quoted from Judaic and Hellenic traditions in the 1720s are frequently requoted (often without attribution) in studies of ancient and oriental music. He undoubtedly would have been amused by the reflexive nature of the esteem that accrued to his work after his death.

WORKS

ORATORIOS

La Giuditta, ?Venice, Nov 1709, *B-Bc*, *I-OS*

Joaz, Venice, ?1727, *E-Mn*, *I-Vnm*, facs. (1986); Florence, 1729, ed. in I classici musicali italiani, viii (Milan, 1942)

Il pianto e il riso delle quattro stagioni dell'anno per la morte, esultazione e coronazione di Maria Assunta in Cielo, Macerata, 1731, *GB-Lbl*, *I-Rsc*, *US-Wlc*

Il trionfo della poesia e della musica nel celebrarsi la morte, e la esultazione, e la incoronazione di Maria sempre Vergine Assunta in Cielo, 1733 (no documented perf.), *B-Br*, *I-VEc*; excerpts in *B-Br*, *F-Pn*, *GB-Ckc*, *Lcm*, *US-Wlc*

Spurious attrib.: Il sepolcro, 1705, by Marc'Antonio Ziani

OTHER SACRED VOCAL

Estro poetico-armonico: parafrasi sopra li primi [e secondi] venticinque salmi (vernacular texts by G.A. Giustiniani), 8 vols. (Venice, 1724–6/ *R*); MS copies of works and excerpts, with texts in Italian, Latin, French, English, German and Swedish, in inst transcrs. and arrs., and in retexted versions may surpass 10,000 items

9 masses, 3–8vv, incl. Requiem, g, and lost mass for investiture of niece, *A-Wn*; *D-Bsb*, *Bld*, *MÜs*; *F-Pn*; *GB-Lbl*, *Ob*; *I-Bc*, *Fa*, *Gl*, *Ls*, *Vc*, *Vnm*; *US-NYp*, *Wlc*

30 miscellaneous sacred works, many lost, incl. 4 ants, 3 grads, 1 hymn, 1 Lamentation of Jeremiah, lost, 1 Lesson for Holy Week, lost, 2 Mag, 3–4vv, 5 Miserere, 8 motets, 3 offs, 2 vesper pss

STAGE

La morte d'Adone (serenata), ?Venice, ?1710 or 1729, possibly both, *A-Wn*, *I-Bc*

La gara amorosa (serenata), ?*c*1710–12, *D-Mbs*, *I-Vc*, *Vnm*

Psiché (intreccio scenico musicale, V. Cassani), *GB-Ckc*, frags.; lib (Venice, ?1711, ?2/*c*1720–25)

Spago e Filetta (ints and lost choruses) in Lucio Commodo (tragedia), ?Venice, ?1719, *F-Pn*, *I-Vc*, *Vnm*; excerpt in Mamczarz, 284–6

Le nozze di Giove e Giunone (serenata) in two versions: Nasce per viver, Vienna, Imperial Palace, for the name day of Charles VI, 1 Oct 1725, *A-Wgm*, *Wn*; Questo é 'l giorno (shorter version), *Wn* [may be the work performed in 1716 for the birth of a son to the Emperor]

Calisto in orsa (pastorale, ?Carminati), ?1725, *I-BGc*, *Vc*, *Vnm*, all inc.

Arianna (intreccio scenico musicale, Cassani), Venice, *c*1727, *Fn*; ed. Nielsen (Bologna, *c*1948); facs. (Bologna, *c*1969)

OTHER SECULAR VOCAL

[12] Canzoni madrigalesche et [6] arie per camera, 2–4vv, op.4 (Bologna, 1717)

380 cants. (many texts by Marcello), 1v, bc, 22 with str, 372 in MSS, some works survive in up to 25 copies, 8 lost, 7 spurious; notable items include Carissima figlia, Didone, Gran tiranno è l'amore, Percorelle che pascete, Senza gran pena; *c*100 known in variant versions; 24 arias [377 listed with sources in Selfridge-Field, 1990]

81 chamber duets, 2vv, bc, 2 with str, incl. 12 from op.4, 73 in mss, Timoteo occurs in 26 sources; Clori e Daliso and Clori e Tirsi survive in numerous copies; 15 spurious, 12 of which actually by Martini (Bologna, 1763)

7 chamber trios, 3vv, bc, incl. 4 from op.4; 2 spurious, actually by Clari and Stradella

5 madrigals, 4–5vv, incl. 2 from op.4, No' che lassù occurs in 31 sources; 2 spurious, actually by Rore and Wert

CONCERTOS AND SINFONIAS

[12] Concerti a 5, with vn, vc, obbl, op.1 (Venice, 1708), ed. *Concerti grossi* (Padua, 1960–79)

5 concs., 3 in D, E♭, F, vn, str, bc, *D-Dl*, *GB-Lbl*, *I-Vc*, *Vnm*, *S-Uu*; conc., F, 2 vn, str, cembalo (1716/17), *D-Dl*; conc., D, fl, str, cembalo, *S-Skma*

7 sinfonias, D, F, 2 in G, 2 in A, B♭, *D-Bsb*, *GB-Lbl*, *I-Vc*

SONATAS

Sei s[u]onat[e], 2 vc/2 va da gamba, vc/bc, as op.2 (Amsterdam, *c*1734)

[12] Suonate, fl, bc/vc, op.2 (Venice, 1712/*R*, inc. *R* as op.1 (London, 1732))

Sei s[u]onat[e], vc, bc, as op.1 (Amsterdam, *c*1732/*R* as op.2 (London, 1732))

Sonata, g, vn, bc, *D-Bsb*; sonata, B♭, vc, bc, *I-Vnm*; 4 sonatas, C, 2 in G, g, S rec (flautino), bc, *D-FH*, doubtful

KEYBOARD

[12] Suonate, cembalo, ?op.3 (Venice, *c*1712–17), ?related to 12 kbd sonatas in *I-Vnm*, ed. in Le pupitre, xxviii (Paris, 1971)

35 sonatas and miscellaneous sonata movts, incl. ?op.3, La Ciacona (110 variations on the chaconne bass and kbd Laberinto), *B-Bc*, *Br*; *CZ-Pnm*; *D-Bsb*, *Da*; *F-Pn*; *GB-Lbl*; *I-Nc*, *Vnm*, *Vqs*, *Vc*; *S-Lf*, *Skma*; some incorrectly attrib. are by Hasse, Platti and J.S. Bach

4 minuets; suite of 30 minuets: *F-Pn*, *GB-Lbl*, *I-Vc*, *Vnm*

WRITINGS

Fantasia ditirambiva eroicomica (or *Volo Pindarico*), 1708, *I-Vmn*, *Rn*

Lettera famigliare d'un accademico filarmonico et arcade, *I-Bc*, with letter of acknowledgment by P.P. Laurenti dated 7 May 1716; permission for private printing granted on 12 Nov 1716 (printed copy, *Vnm*) [discusses and criticizes Lotti's Madrigali, 2–4vv (Venice, 1705)]

1 item in Lodovico Flangini: *Corona poetica in morte* (Venice, 1717)
Sonetti: pianger cercai non già dal pianto onore (Venice, 1718)
Il teatro alla moda (Venice, 1720/R; Eng. trans., ed. R.G. Pauly: 'Benedetto Marcello's Satire on Early 18th-century Opera', *MQ*, xxxiv (1948), 222–33), lib for Berlioz's Benvenuto Cellini (Paris, 1838)
A. Dio: Sonetti ... con altre rime, d'argomento sacro e morale (Venice, 1731)
Il divino Verbo fatto Uomo, o sia L'universale redenzione, at least 21 cantos, inc. at Marcello's death, now lost
Undated writings include various *avvertimenti* and satirical sonnets, *Vmc*
Spurious attrib.: *Delle consananze armoniche*, 1707, frag. in *Vnm*, actually pt 3 of Angleria: *La Regole del contrapunto* (Milan, 1622)

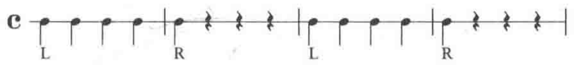
Marcello da Capua. *See* BERNARDINI, MARCELLO.

March (Fr. *marche*; Ger. *Marsch*; It. *marcia*). Music with strong repetitive rhythms and an uncomplicated style usually used to accompany orderly military movements and processions. Since the 16th century, functional march music has existed alongside stylized representations of the march, which were often incorporated for programmatic purposes into art music. The distinction between the functional and the stylized march is often blurred, however: in the 18th century, functional marches were frequently imported virtually unchanged into wind-band music, often forming integral movements of serenades or divertimentos. During the 19th century, the functional military march declined, and the stylized march became popular in its own right, reaching its height in the works of the later Romantic composers. After World War I, the idea of using an orchestral or choral march as a vehicle for paying homage to rulers and celebrating nations and ideals, which had prevailed since the time of Lully, fell into decline, and the march came to be seen principally as an art-music genre.

1. The military march to the 1820s. 2. 19th- and 20th-century military and popular marches. 3. The march in art music.



1. THE MILITARY MARCH TO THE 1820s. As early as Virgil's *Aeneid* the sound of instruments was acknowledged as a means of exciting ardour in advancing armies. In the early 16th century European nations had their peculiar drum-calls (*see* SIGNAL (i)), which were held to be insignia as significant as the blazonry on their standards. The Swabian infantry of the Emperor Maximilian was recognized by the sound of its characteristic marching rhythm (ex.1), while both the French and

Ex.1 Swabian drum-call

English infantry used a longer pattern (ex.2); Arbeau

Ex.2 French drum-call (T. Arbeau: *Orchésographie*, 1588)

(*Orchésographie*, 1588) credited the Swiss with yet another characteristic rhythm (ex.3). A warrant of 1632

Ex.3 Swiss drum-call (Arbeau)

by Charles I of England confirmed the earlier registration (1610) of the English national drum march:

Whereas the ancient custome of nations hath ever bene to use one certaine and constant forme of March in the warres, whereby to be distinguished one from another ... It pleased our late deare brother Prince Henry to revive and rectifie the same by ordayning an establishment of one certaine measure, which was beaten in his presence at Greenwich, anno 1610. In confirmation whereof wee are graciously pleased ... to set down and ordaine ... Willing and commanding all drummers within our kingdome of England and principalitie of Wales exactly and precisely to observe the same, as

well in this our kingdome, as abroad in the service of any forraigne prince or state.

Arbeau's detailed account of French drum rhythms includes a description of marches in triple metre (ex.4),

Ex.4 Triple drum-call (Arbeau)

examples of possible variants of the basic duple-metre cell, and suggestions for improvising fife tunes to accompany the marches. He made the point, however, that the rests in a given drum-call must be observed no matter how much the beaten part of the unit is modified, lest the army's orderly progression fall into disarray from soldiers tripping over one another.

March music is essentially an ornamentation of a fixed, regular and repeated drum rhythm. Stylistic traits of the march that seem to be present throughout its history include rhythmic patterns with regularly recurring accents built into phrases or periods, straightforward harmonies and textures, and unpretentious but often memorable melodies. The usually triadic melodic style and apparent preference for major keys of most march music may reflect to some extent the technical limitations of the wind instruments for which marches were written, many of which were confined to the notes of the harmonic series until well into the 19th century (*see* MILITARY CALLS). As Arbeau's description shows, duple and triple metres were both common, though the most frequent time signatures were C, ¢, 2/4 and 6/8. In the 17th and 18th centuries 3/4, 6/4 and 3/2 were often used as well.

Throughout its history the tempo of the military march has depended on its particular function. The slow march (Fr. *pas ordinaire*; Ger. *Parademarsch*) is the ordinary march, the standard against which the tempos of the others are measured. Used for exercises, reviews and parades, its tempo has varied from crotchet = 60 to crotchet = 80 at different times and places. The quick march (Fr. *pas redoublé*; Ger. *Geschwindmarsch*), used for manoeuvring, is approximately twice as fast as the slow march, with a tempo ranging from crotchet = 100 to crotchet = 140 (116–20 is considered the norm), depending usually on regimental demands. The double-quick march (Fr. *pas de charge*; Ger. *Sturmmarsch*) is an attack march, still more rapid in tempo.

The earliest extant marches composed expressly for military use are those of Lully and André Philidor *l'aîné*; they include a large selection of pieces entitled *marche*, *batterie* and *sonnerie* composed for and used by the various bands of Louis XIV. As first collected by Philidor in 1705, the march repertory of 17th-century France included marches for drums alone, timpani alone and trumpet alone, and for Louis' fife-and-drum band and oboe-and-drum band, written in a variety of time signatures (¢, 2, 3/2 and 3). A typical march for the oboe band is Philidor's *La retraite* (ex.5), which consists of two eight-bar strains. The *batterie*, which is written out separately, uses a great variety of note values, and introduces many variations within each two-bar rhythmic cell. Not all French military marches were so regular, however. *La générale*, composed by Lully for the oboe-and-drum band and later used by the Garde Française, is in triple metre and consists of two seven-bar strains (ex.6).

Military marches of the 17th and 18th centuries were generally ephemeral, functional pieces composed by

Ex.5 Philidor *l'aîné*: March *La retraite*, Air for the oboes

bandmasters when required or adapted for military use from popular tunes, operas and oratorios. By the mid-18th century Rousseau complained that French marches were 'tres malfaites'; he thought contemporary German marches like *Der alte Dessauer* (composed *c*1705), *Hohenfriedberger* (1745) and *Coburger* (*c*1750) much superior and more likely to encourage military efficiency. The practice of adapting popular tunes to military purposes seems to have been particularly common in Britain, where most of the military music in such printed collections as *Sprightly Companion* (1695, ed. Playford), *Musica bellicosa* (1733), *Musica curiosa* (*c*1745) and *Warlike Musick* (*c*1760) seems to have come from the popular operas and oratorios of composers from elsewhere, such as Handel, Jommelli, Graun, Traetta and Monsigny. British regimental commanders were responsible for providing music for their troops from their own private 'band funds', and it seems that the principal requirement of an 18th-century regimental march was the favour of the commander.

The French Revolution and, in particular, the Napoleonic wars that soon followed lent new impetus to the composition of marches specifically for particular regiments and armies, allowing composers to express partisan sentiments while earning some financial rewards for their efforts. In France certain composers specialized in the composition of patriotic marches, such men as J.-P.-G. Martini, François Devienne, Joseph Lefebvre, C.-S. Catel, and M.J. and F.R. Gebauer, and many more wide-ranging composers, like Gossec, Grétry, Le Sueur, Méhul and Cherubini, contributed marches used by the French

Ex.6 Lully: March *La générale*, Air for the oboes

armies. C.J. Rouget de Lisle's *Marseillaise* is probably the most famous surviving march of this period, first written under the title *Chant de guerre pour l'armée du Rhin*. British troops marched to music composed for them by such native composers as Thomas Busby, John Callcott, William Crotch, James Hook, John Mahon and Alexander Reinagle, as well as to marches by Handel and Haydn; various Austrian regiments had marches composed for them by F.X. Süssmayr, Ferdinando Paer, Hummel and Beethoven. Haydn's marches (H VIII:1–4 and 6–7), most of which are in E♭, are scored for pairs of clarinets, bassoons and horns, with trumpet, serpent and improvised percussion parts. Only one has a trio, and all are concise, scarcely exceeding 30 bars in length. Like marches generally they consist of two strains, and most begin with an upbeat, frequently a dotted-note figure. Beethoven wrote many pieces for military band (*Harmoniemusik*, *Militärmusik*), often intended for specific regiments (e.g. WoO19 and 24), and including a polonaise, an écossaise and several examples of the TATTOO, as well as pieces entitled *Marsch* or *marcia*. All are scored for various wind instruments and percussion, some of them including the characteristic 'Turkish music' instruments: bass drum, side drum, cymbals and triangle (*see* JANISSARY MUSIC). All Beethoven's functional marches are written in a simple homophonic style, usually in phrases two or four bars long, and many of them emphasize repeated notes and double-dotted figures. Two (WoO20 and 24) have trios in contrasting keys, a structure that became the norm for 19th-century marches.

2. 19TH- AND 20TH-CENTURY MILITARY AND POPULAR MARCHES. Most of the military marches that have survived from the early 19th century or earlier have not done so directly. The Rakoczi March, for example, owes its continued familiarity as much to the attentions of Berlioz (*La damnation de Faust*) and Liszt (Hungarian Rhapsody no.15) as to those of successive military bandmasters (see §3 below), while Beethoven's *Yorck'scher Marsch* (WOO18, 1809) has survived more because of its composer's wider fame than for its intrinsic appeal. The tremendous explosion of activity in popular music during the 19th century, however, affected military band music and gave marches greater durability. Technical innovations in the construction and fingering of most wind instruments, especially the brass, and the invention of the saxophone increased both the flexibility and the range of timbres available in a military band. Band concerts became popular with the general public, and military schools of music were founded to provide a regular supply of trained musicians. By the end of the 19th century the size of a standard military band had grown from a mere handful of musicians at the beginning of the century to a full complement of 40 to 50 musicians for a typical infantry band. Thus the opportunities for composers were increased, and marches began to have more inherent musical interest. Many popular dance conductors and composers worked as military bandmasters at some point in their careers, and marches took their place alongside waltzes, galops and polkas in their output. As in the decades immediately after the French Revolution, many musicians (not always military bandmasters) concentrated almost exclusively on composing marches, so that a vast body of them was written in the late 19th century for ceremonial and military occasions, their titles commemorating regiments, generals, princes and battles.

The marches that have survived in the repertory of military bands and light orchestras date back as far as the middle of the 19th century. The Austrian Revolution of 1848 was the immediate inspiration for the *Radetzky March* of Johann Strauss (i), as the American Civil War was for the *Washington Grays* by Claudio S. Grafulla (1810–80). Most of the marches that now form the basis of the military band repertory were written between 1880 and the beginning of World War I. Among the continental marches that have remained popular are *Unter dem Doppeladler* by J.F. Wagner (1856–1908), *Marche lorraine* and *Le père la victoire* by Louis Ganne (1862–1923), *Alte Kameraden* by Carl Teike (1864–1922), and the triumphal march *Einzug der Gladiatoren* and *Regimentskinder* by Julius Fučík (1872–1916). These marches

epitomized the form into which the military march had evolved: typically, a march was about four minutes long and was written in common time; the introductory fanfare was followed by an opening section played by the whole band, usually with a second theme given to trombones, and a trio featuring a broad lyrical melody.

Above all, the late 19th century saw the emergence of two march composers who lent much vitality and originality to the form, the American John Philip Sousa and the Briton Kenneth J. Alford. Sousa's *Semper fidelis* (1888), *The Liberty Bell* (1891), *King Cotton* (1895) and *The Stars and Stripes Forever* (1897) are probably the most famous marches he composed for the US Marine Band and for his own touring band. Their lively, shifting rhythms and the opportunities they presented for instrumental display made Sousa's marches appreciated round the world. Several of them became popular dances as well; *The Washington Post* (1889) in particular was associated with the TWO-STEP, and it may have led to the fashion for two-step marches, which were often used to accompany the CAKEWALK. The affinity of march and dance music led to a sharing of repertories; thus *El Abanico*, a *paso doble* by Alfredo Javaloyes, entered the international band repertory as a quick march.

By contrast with the ebullient style of Sousa's marches, those of the leading British composer, Kenneth J. Alford, were notable for their clipped melodic phrases, economy of instrumentation and an unusually wide range of moods. His *Colonel Bogey* (1914), *On the Quarter Deck* (1917) and *The Voice of the Guns* (1917) are among the most frequently played of all British marches. While the consistently high quality of all the marches by Sousa and Alford set them apart from their contemporaries, many individual marches by otherwise undistinguished composers attained national or international popularity. Some of the composers of well-known marches from the late 19th or early 20th century include E.E. Bagley (1857–1922, *National Emblem*), Thomas Bidgood (1858–1925, *Sons of the Brave*), H.L. Blankenburg (1878–1956, *Auszug der Gladiatoren*), Franz von Blon (1861–1945, *Unter dem Siegesbanner*), Isaac Dunayevsky (1900–55, *Tsirk*), E.F. Goldman (1878–1956, *On the Mall*), Richard Henrion (1854–1940, *Fehrbelliner Reitermarsch*), Abe Holzmann (1874–1939, *Blaze Away!*), Karl L. King (1891–1971, *Barnum and Bailey's Favorite*), J.N. Klohr (1869–1956, *The Billboard*), František Kmoch (1848–1912, *Česká muzika*), Karl Komzák (1850–1905, *Vindobona Marsch*), Gabriel Parès (1860–1934, *Le voltigeur*), Gottfried Piefke (1815–84, *Preussens Gloria*), the Swedish composer S.H. Rydberg (1885–1956), Wilhelm Zehle (1876–1956, *Viscount Nelson*) and C.M. Ziehrer (1843–1922, *Freiherr von Schönfeld-Marsch*).

After World War I the role of the infantry regiment declined. Although bandmasters continued to compose marches that remain in the military band repertory, new forms of entertainment reduced both the importance of military bands and the impact of these new marches on the public. Often marches have been adapted from current popular song, as in Rauski's *Le régiment de Sambre et Meuse*, based on a song by Robert Planquette, or from themes from operettas, as in Sousa's *El capitán* (1896) and Paul Lincke's *Berliner Luft* (1899), much as 18th-century marches were adapted from popular operas. Many other marches have entered the military band repertory from successful film and television scores, such as Richard Rodgers's *Guadalcanal* (from *Victory at Sea*), Eric Coates's *The Dam Busters* and Ron Goodwin's *633 Squadron*.

3. THE MARCH IN ART MUSIC. Marches in art music range widely from true functional marches to stylized representations. As functional pieces, especially in stage or programmatic works, they may serve to accompany dramatic entrances, parades, coronations, victories, rejoicing, festivities, triumphs, acts of homage, weddings, religious acts, funerals or military events. As an integral section of a larger work, a march may greatly contribute to the total effect. Many functional marches were composed to stand alone as independent pieces; others were later extracted from their original contexts.

The march seems to have entered the mainstream of art music through the opera and ballet of 17th-century France. Lully introduced marches as entrance music for single characters accompanied by their 'troops', and as accompaniments to processions, so that marches came to have heroic, sacrificial or nuptial connotations as well as military ones. Processional music was part of Western drama from the time of the Greek tragedies, when the *parodos* and *exodus* of the chorus were accompanied by singing and playing on the aulos, and the theatrical march owes as much to that tradition as to military ones. 17th-century theatrical march music allowed considerably more freedom in structure, phrasing and tempo than did military marches; because such music was likely to be carefully choreographed, a certain irregularity of phrase length was permissible, as in ex.7, where flutes consistently add a flourish to the regular eight-beat phrases. Many of Lully's theatrical marches use the characteristic rhythms of the minuet, gavotte, bourrée and other court dances.

Processions accompanied by march-like music remained a common feature of both opera and oratorio into the 20th century. The origin of the processional march in stage music can be seen in examples of 'exotic' (Turkish and janissary) marches, beginning with Lully's 'Marche des turcs' from *Le bourgeois gentilhomme* (1670) and continuing in the works of Destouches, Campra and Rameau. Pieces such as these, notably by Lully and Rameau (e.g. *Les Indes galantes*, 1735), are often characterized by the key of G minor, triple and compound duple metre, frequent repeated notes and simple sequential phrases. Handel's *Scipione* (1726), *Saul* (1738), *Deidamia* (1741) and *Judas Maccabaeus* (1747) all include marches that have become more widely known than the works in which they appeared; indeed, the march that opens *Scipione* (after the overture) was originally written as a parade slow march for the Grenadier Guards, and is still used under the title 'Royal Guards March'. Processional marches also appear in operas by Gluck (*Alceste*, 1767; *Iphigénie en Aulide*, 1774) and Mozart (priests' march in

Ex.7 Lully: *Acis et Galatée*, Entrée de Poliphème et de sa suite, Act 2 scene vi

MARCHE

fl

fl

Die Zauberflöte, 1791). The use of percussion instruments (large drums, cymbals, triangles) in examples such as the Janissaries' march and chorus in Mozart's *Die Entführung aus dem Serail* (1782) and in Beethoven's incidental music for *Die Ruinen von Athen* (1811) stems from the Viennese *alla turca* tradition, itself influenced by military music.

The development of processional music in stage works in the early 19th century was influenced by the style of wind music composed during the period of the French Revolution. Revolutionary fervour led directly to military bands performing on stage, in works such as Simon Mayr's *Zamori* (1804) and Meyerbeer's *Il crociato in Egitto* (1824), and notably in operas by Spontini and Rossini. Other stage works with processional marches include operas by Bellini (druids' march in *Norma*, 1831), Meyerbeer (*Le prophète*, 1849), Wagner (Wedding March in *Lohengrin*, 1850), Stravinsky ('Chinese March' in *The Nightingale*, 1914) and Prokofiev (*Love for Three Oranges*, 1921). Processional marches outnumber those intended to accompany military movements on stage or to emphasize military references in the drama, such as Mozart's *Idomeneo* (1781), *Le nozze di Figaro* (1786) and *Così fan tutte* (1790), Wagner's *Tannhäuser* (1845) and *Parsifal* (1882), and Berg's *Wozzeck* (1925). The march also appears in stage music as a duet, often for tenor and bass; pieces of this type appear in Salieri's *Tarare* (1787), Spontini's *Fernand Cortez* (1809), Rossini's *Guillaume Tell* (1829), Donizetti's *Lucia di Lammermoor* (1835) and Verdi's *Don Carlos* (1867). Theatrical marches, again usually processionals quite divorced from military connotations, are also prominent in incidental music for spoken plays: there are examples by Mendelssohn (March of the War Priests from *Athalie*, 1845; Wedding March from *A Midsummer Night's Dream*, 1843) and Beethoven (numbers in *König Stephan*, 1811, and *Tarpeja*, 1813).

At least from the early 16th century, military music inspired the composition of BATTLE MUSIC imitating both musical and non-musical sounds of warfare. Janequin's chanson *Escoutez tous gentilz*, thought to have been written about the battle of Marignan in 1515 and including vocal imitations of French trumpet- and drum-calls, is probably the best-known early example. Byrd's *Battell* for harpsichord (in *My Ladye Nevells Booke*, 1591) imitates drums, trumpets, fifes, tabors and timpani in its descriptive sections 'Marche of Footemen', 'Marche of Horsmen' and 'Marche before the Battell', incorporating examples of both duple- and triple-metre marches. A vast quantity of programmatic pieces describing battles was composed up to the end of the 19th century, most of it written during or just after major wars. Thus, Beethoven's *Wellingtons Sieg* (1813) evoked memories of the Napoleonic campaigns, with sections intended to depict an English march, a French march (in 6/8) and a *Sturmmarsch* or charge; František Kočzwara's notorious *The Battle of Prague: a Favourite Sonata* (*c*1788) includes a slow march as its introduction and a quick march labelled 'Turkish music' in its description of the siege of Prague during the Seven Years War.

March movements, especially in duple metre, were included in much Baroque keyboard music (e.g. by Purcell and François Couperin) and in ensemble suites, usually with military connotations, so that there was a contrast with the use of the march in the theatre simply to accompany processions. Mattheson (1717) stressed that the march ought always to convey a sense of grandeur and fearlessness, also adding (1739) that marches should always be played evenly, as though to facilitate physical marching by soldiers. The musical style of the march apparently remained simple and straightforward, for many of the miscellaneous collections of music for amateurs issued in the 18th century included marches, and marches were almost invariably among the more elementary exercises in 18th-century tutors for harpsichord, violin, flute and so on (e.g. *The Lady's Banquet . . . together with Several Opera Airs, Minuets and Marches*, London, *c*1730; *Pas redoublés et de marches arrangées en duo*, Paris, *c*1780; *Preston's Pocket Companion for the German Flute*, London, *c*1785). In some cases, military marches that had originally been adapted from opera and oratorio thus returned to the realm of art music, an interesting example of the circular transfer of repertory.

Fux, Michael and Joseph Haydn, Dittersdorf and the Mozarts included march movements in cassations, divertimentos and serenades. Mozart's Serenade in D K239, for example, begins with a 'marcia maestoso' that, like his other march movements, is written in an abbreviated sonata form. His father's *Divertimento militare* is scored for pairs of 'Swegglpfeiffen', horns, clarino trumpets, a prominent solo drum and strings; its first movement is a march in which the military group alternates with the strings. The march also served as a topos in many kinds of music in the Classical and Romantic eras, as in the first movement of Mozart's 'Jupiter' Symphony, the slow movement of Schubert's 'Great' C major Symphony and the first movement of Dvořák's Serenade in D minor.

March movements in 19th-century music were usually fairly stylized, but they continued to be used programmatically. Schubert's marches for piano (four hands, D602, 819 and 733) deliberately adhered to the style of military marches. Schumann introduced marches in several of his collections of short piano pieces, evoking both the military ('Soldatenmarsch' in *Album für die Jugend*, 1848) and the processional styles ('Marche des Davidsbündler contre les Philistins' in *Carnaval*, 1833–5). Although the march was not a common movement in keyboard sonatas, it was often included in sets of variations (Beethoven, Diabelli Variations op.120). The Rákóczi March, which evolved during the 19th century in Hungary from a popular march into a nationalist symbol, was the subject of several sets of piano variations by Liszt (e.g. Hungarian Rhapsody no.15). Liszt also made piano arrangements of a number of Schubert's orchestral marches, extending the form beyond Classical conventions and incorporating material from other marches. Other keyboard marches, some now better known as military marches for wind instruments, include two by Smetana (for the Prague student legion and for the National Guard, 1848), Tchaikovsky's Military March for the Yurevskiy Regiment (1893), Debussy's *Marche écossaise sur un thème populaire* (1891), several by Richard Strauss, notably the two entitled *Parade-Marsch* (1905), and Hindemith's in the *Suite '1922'* (1922). March-like music accompanied military imagery in some of Schumann's songs (e.g. *Die beiden Grenadiere*, *Freisinn*, both 1840), as it did in the later songs of Wolf (e.g. *Fussreise*, *Der Tambour*, 1888–9) and Mahler (e.g. *Revelge*, *Der Tambourgesell*, 1889–1901).

Specifically military connotations for the march were even more easily incorporated into orchestral movements, where the orchestration could be manipulated to imitate the exact sound as well as the style of a military band. In Haydn's 'Military' Symphony, for example, woodwind, brass and percussion are unusually prominent; the slow movement of his 'Drumroll' Symphony is more explicitly programmatic in its use of the march, with its alternation of Turkish and Viennese marches, thought to be a description of a Turkish invasion of Vienna. The fourth movement of Berlioz's *Symphonie fantastique*, the 'Marche au supplice', inserts the instruments of a typical 19th-century military band and the usual march-and-trio form into the context of a traditional symphonic movement to create colouristic, brilliant and often terrifying effects. Berlioz arranged the Rákóczi March for orchestra in 1846, with an extended coda (probably inspired by a battle-painting), and incorporated it into *La damnation de Faust* with a dedication to Liszt. Liszt's own brilliant arrangement (with two trios) appeared in 1871. Independent marches for orchestra gained great popularity from the 19th century onwards, notable among them Spontini's *Grosser Sieges-und Festmarsch* (arranged from his Prussian choral folksongs of 1818), Meyerbeer's *Krönungsmarsch* for two orchestras (1861, for the coronation of Wilhelm I of Prussia), Saint-Saëns's *Marche héroïque* (1871), Gounod's *Marche religieuse* (1876), Tchaikovsky's *Slavonic March* (1876), Wagner's *Kaisermarsch* (1871, with male chorus) and *Grosser Festmarsch* (1876, for the centenary celebrations in Philadelphia of American independence), Richard Strauss's two *Militärmarsche* (1906) and several brilliant occasional display pieces by Elgar (*Imperial March*, 1897; five *Pomp and Circumstance Marches*, 1901–30; *Coronation March*, 1911) and Walton (*Crown Imperial*, 1937).

During the 20th century the march in art music escaped from its formal military trappings and evolved into a more flexible, less stereotyped genre, as exemplified in Berg's march in the Three Orchestral Pieces (op.6, 1914–15). Orchestration became even more colourful: in the 'Putnam's Camp' movement of *Three Places in New England* (1912) and the 'Fourth of July' movement of *Holidays* (1911–13), Ives skilfully manipulated the scoring to depict marching bands, heard within a larger orchestral texture. Elements of parody and caricature also became common (e.g. Stravinsky, *The Soldier's Tale*, 1918; Hindemith, *Konzertmusik*, 1926; Shostakovich's seventh, eighth and tenth symphonies, 1941, 1943, 1953).

Of the many possible non-military uses of march music, the most important category is probably the funeral march. Early examples of such marches can be found in Purcell's funeral music for Queen Mary (1694) and in the TOMBEAU tradition of 18th-century France, as well as in opera and oratorio, from Lully's 'Pompe funèbre' (*Alceste*, 1674) onwards. Handel's Dead March in *Saul* (1738) became a favourite funeral processional, as have, more recently, the 'Marche funèbre' from Chopin's Sonata in B♭ minor (1839) and the 'Marcia funebre sulla morte d'un eroe' from Beethoven's Piano Sonata in A♭ op.26 (1800–01). Funeral marches stand as slow movements in Beethoven's Third Symphony and Mahler's First. Beethoven's march imitates the muffled drums of a funeral cortège, and includes a recurring trio, a fugal development and an expressive coda that greatly expand the usual march form. Mahler's parody of a funeral march, based on a minor-mode version of the folktune *Frère Jacques*, was suggested by the nursery picture *The Hunter's Funeral*. The tune lends itself well to such treatment and, as each bar is immediately repeated, the quality of the movement is lugubrious, despite its inclusion of a grotesquely mocking trio. The funeral march in his Fifth Symphony emulates the sound of a military band. This use of wind instruments for funeral music was also taken up by Kodály (*Háry Janos*, 1927, no.18) and much later by Kagel (*Märsche um den Sieg zu verfehlen*, 1978). Other well-known funeral marches were written by Wagner (for Siegfried in *Götterdämmerung*), Puccini (for Liù in *Turandot*), Mendelssohn, Gounod, Bizet, Pfitzner, Bartók, Stravinsky, Honegger and Webern.

ERICH SCHWANDT (1, 3), ANDREW LAMB (2)

Marchal, André(-Louis) (*b* Paris, 6 Feb 1894; *d* Saint-Jean-de-Luz, 27 Aug 1980). French organist. Blind from birth, he studied first at the Institution Nationale des Jeunes Aveugles, then in Gigout's class at the Paris Conservatoire. He won numerous prizes and became Gigout's assistant at the Conservatoire and at St Augustin. He was organist at St Germain-des-Prés from 1915 to 1945 and at St Eustache from 1945 to 1963. His career began with a series of four recitals at the Conservatoire in 1923, after which he toured extensively in Europe and the USA, visiting Australia for the ABC in 1953. In 1930 he played most of Bach's organ works in ten recitals at the Cleveland Museum of Art. In 1935, at the first of many recitals for the Organ Music Society in London, he improvised a four-movement symphony on themes composed for the event by four of the society's honorary members: Roussel, Sibelius, Jongen and Vaughan Williams. Themes for a similar improvisation were provided the following year by Walton, Britten, Alan Bush and Constant Lambert. In 1954, taking part in the concert inaugurating the organ in the Royal Festival Hall, Marchal improvised a symphonic allegro on a theme submitted by George Dyson. Marchal commanded a vast repertory, from Landini to Alain, Langlais and Messiaen. Having rejected an untraditional Romantic approach to Bach early in his career, his later resistance to the equally false aesthetic of metronomic intransigence and excessive staccato made him a sometimes wayward but always sensitive Bach player. His fame as a colourist stemmed from his painstaking investigation of every stop in an organ and his consequent ability to extract registration appropriate to the music he played from notoriously intransigent instruments. Among his numerous recordings the most significant have been those of the complete organ works of Couperin and Franck.

Marchal's influence as a teacher was paramount in interpretation rather than technique. In France, at the Institution Nationale and American Academy at Fontainebleau, and in masterclasses in England and the USA, he contributed greatly to the formation of many distinguished players. With his pupil, the musicologist Norbert Dufourcq, and the organ builder Gonzales, Marchal took a leading part in the revival of French classical organ building. He was an inaugural member of the Beaux-Arts Commission des Monuments Historiques pour la Restoration des Orgues, and contributed various articles to *L'orgue*.

FELIX APRAHAMIAN

Marchand (i). A great many musicians of this name were active in France in the 17th and 18th centuries. Since references often mention only the patronym, and since even first names were sometimes the same (there were no fewer than four Jean-Noël Marchands at Versailles during the first half of the 18th century), it is not always possible to know which Marchand, or even which family of Marchands, is meant. A genealogical table established by Benoit shows 42 direct descendants of (1) Jean Marchand, eight of them musicians. There seem to have been three further, independent Marchand families, one of which produced Bach's famous rival (*see* LOUIS MARCHAND) and another which merits a separate entry (*see* MARCHAND (ii)).

(1) **Jean Marchand** (*b* 1636; *d* Versailles, 20 July 1691). He was in the employ of both the king and the queen as a violinist; no music can be attributed to him.

(2) **Jean-Noël Marchand (i)** (*b* Paris, bap. 14 Aug 1666; *d* Paris, 31 May 1710). Son of (1) Jean. He received the reversion of his father's post as *Ordinaire de la musique de la chambre* at the age of nine and was accepted by 1686 into the royal chapel as a symphonist. In 1689 he obtained the additional post of organist of Notre Dame de Versailles and, a month before his death, that of lutenist to the royal chamber. When he was not occupied with music he busied himself with property speculation. Two motets, *In convertendo Dominus* (three voices, two violins and continuo) and *Benedicite Deum coeli* (1698; for three solo voices, five-part chorus, flutes, violins and continuo), and settings of four of Racine's *Cantiques spirituelles*, formerly attributed to Louis Marchand, are by Jean-Noël (i).

(3) **Jean-Baptiste Marchand** (*b* Paris, 1670; *d* Versailles, 8 Jan 1751). Third son of (1) Jean. He entered the royal service as a violinist in 1691, probably replacing his father. He inherited his brother's post of lutenist and in one document he is mentioned as organist. He was married to Cécile Laubier (*d* before 1743). His brother Pierre-Nicolas (*b* 1682) was also styled organist of the royal chapel, but the cases of both Jean-Baptiste and Pierre-Nicolas are puzzling, since at the time all the known royal organ posts were occupied by other incumbents.

(4) **Jean-Noël Marchand (ii)** (*b* Paris, 1689; *d* Paris, 1756). The eldest son of (2) Jean-Noël (i), he is usually called simply *musicien*, but one document gives the title *officier de la Reine d'Espagne*. It may have been this Jean-Noël Marchand who, in 1737, collaborated with NICOLAS CHÉDEVILLE in a publishing venture. He seems to have lived on the income from the property that his father had accumulated.

(5) **Guillaume Marchand (i)** (*b* Paris, 1 April 1694; *d* Paris, 1738). Half-brother of (4) Jean-Noël (ii), he followed his father at Notre Dame in Versailles. The records show Guillaume's steady rise in the estimation of

his employers, and in 1730 he succeeded François Couperin as one of the four organists of the royal chapel.

(2) Jean-Noël (i) and his second wife had a third son, Claude (*b* 1695), an oboist with three royal or military charges, and the last of the brothers to become a musician again bore the father's name, Jean-Noël (iii) (*b* 15 Dec 1700). The only member of the family to become *Ordinaire de l'Académie royale de musique*, he was perhaps the composer of *Six suites d'airs en duo pour le tambourin* (Paris, *c* 1753–8) by a 'Mr Marchand' qualified with that title, which meant that he played in the opera orchestra, perhaps as an oboist. He may also have composed a similar *Nouvelle suite d'airs*, which appears to have been published a quarter of a century earlier.

(6) **(Simon-)Luc Marchand** (*b* Versailles, 31 May 1709; *d* Versailles, 27 April 1799). He was the only one of the 12 children of (3) Jean-Baptiste to take up music. In 1727 he received the reversion of his father's post of lutenist to the royal chamber (although it is unlikely that either actually played, the title brought in a useful stipend), but before the latter's death he passed on (perhaps sold) the right to Joseph Francoeur. Nevertheless the post seems to have reverted to Luc after his father's death. Like his father he was also a violinist, but his principal activity seems to have been as an organist. In a manuscript book of plainchant accompaniments for the liturgical year dated 1772 (*F-V*), he calls himself *Ordinaire de la musique de la chapelle et de la chambre du Roy et organiste ordinaire de la chapelle de Sa Majesté*. Here again, however, it is not clear where he played as there was no vacant organist's post in the royal chapel.

Luc Marchand was one of the early experimenters with accompanied keyboard music. He published six suites for harpsichord: the first with violin accompaniment; the second with violin or oboe; the third and fourth with cello or viol; and the last two for harpsichord solo, *Pièces de clavecin avec accompagnement de violon, hautbois, violoncelle ou viole* (Paris, 1747). Three of the suites are divertissements in the manner of Dandrieu; the others consist of character-pieces not linked by a programme. Relentless mechanical figuration and thick harpsichord textures disfigure what were intended to be charming new instrumental effects.

In 1761 the royal chamber and chapel were merged for economy's sake and Luc was a victim. He had to wait 30 years to be reimbursed for the capital value of his post, set at 4000 livres; it is a tribute to French bureaucratic stability that this could occur in the middle of the Revolution. He was married twice but had no children.

The last of the musical descendants of (1) Jean Marchand seems to have been Guillaume-Martin, son of Guillaume (ii) (*b* 9 Dec 1728; *d* 28 April 1769). He is called *Organiste et maître de clavecin à Versailles*, but no royal or official position is known for him.

Other musicians named Marchand may have some connection with this family. Benoit mentioned Jean-Baptiste Marchand, choirboy then serpent player at the Sainte-Chapelle, 1697–8; Jean-Antoine Marchand, oboist at the Hofkapelle in Munich in 1715; and Pierre-François Marchand (1751–92), a musician with the Swiss guards in 1768. La Laurencie mentioned a Robert Marchand, musician to the king and queen in 1670.

There is no connection between the family of Jean and a smaller family of Marchands, all members of the *vingt-quatre violons*: Pierre, who is mentioned in accounts from 1695 to 1727; his son, Joseph (*b* 1673; *d* 9 Jan 1747); and Joseph's son, Charles-Philippe (*b* 28 Dec 1703). A collection of *Suites de pièces mêlées de sonates pour le violon et la basse* (1707) by Joseph shows the composer hesitating between the old and the new forms, mixing a variety of movement types under one designation or the other. Charles-Philippe is probably the Marchand who composed a cantata performed at court in 1732. Another Joseph Marchand (*d* 28 Jan 1746) was a serpent player in the royal chapel from 1717 to 1733. Unrelated to any of these Marchands was Louis-Joseph (*b* Troyes, 1 Jan 1692; *d* Troyes, 29 Nov 1774), a priest who published a *Traîté de contrepoint* (Bar-le Duc, 1739) and a four-part *Missa quis, ut Deus* (Paris, 1743).

DAVID FULLER (with BRUCE GUSTAFSON)

Marchand (ii). German family of musicians.

(1) **Theobald Hilarius Marchand** (*b* Strasbourg, 1741; *d* Munich, 22 Nov 1800). Actor, singer and theatre manager. He went to Paris as a 17-year-old to study medicine, but the *opéras comiques* of Duni, and later of Grétry and Monsigny, excited him to such an extent that he abandoned his intended career and became a singer and actor. He was a member of Sebastiani's troupe in the Rhineland in 1764; the repertory included many Italian and French operas as well as plays. By 1771 Marchand was manager of the company, which performed mainly in Mainz, but also in Strasbourg, Mannheim and Frankfurt. In 1772 Gotter translated Poinsinet's *Tom Jones* for Marchand, and André and Faber also provided him with versions of mainly French works. In 1774 he staged the Wieland-Schweitzer *Alceste*. In 1775 he went to Mannheim, with such success that the Elector Carl Theodor decided to open a German National Theatre, with Marchand as its first director. When the elector removed to Munich in 1778 he took Marchand's company with him. Marchand retired in 1793 but continued to take the roles of comic fathers until shortly before his death.

Marchand was a pioneer in the performance of French light operas in German translation; three volumes of librettos were published under the title *Sammlung der komischen Operetten ... unter der Direktion des Herrn Marchand aufgeführt* (Frankfurt, 1772). His company had fine actor-singers, including Magdalena Brochard (later Marchand's wife), Huck and Brandl; Maria Henriette Wilhelmine Stierle (née Mierk) and Johann Nouseul, later to create the role of Monostatos in *Die Zauberflöte*, were also members for a time. Not the least of Marchand's claims to attention is the fact that Goethe owed his introduction to and his love of French opera to the many performances he heard that company give, at Frankfurt and probably at Strasbourg, during his most impressionable years; he wrote warmly of Marchand in his autobiography *Dichtung und Wahrheit* (pt iv, bk 17).

(2) **(Maria) Margarethe Marchand.** Singer and composer, daughter of (1) Theobald Hilarius Marchand. *See* DANZI family, (5).

(3) **Heinrich (Wilhelm Philipp) Marchand** (*b* Mainz, 4 May 1769; *d* after 1812). Violinist, keyboard player and composer, son of (1) Theobald Hilarius Marchand.

In 1781, at the age of 12, he became a protégé of Leopold Mozart, from whom he learnt the violin, the piano and composition. Later joined by his sister (2) (Maria) Margarethe and their younger cousin, Maria Johanna (1775–1824), he remained in Salzburg, lodging with Leopold and Nannerl Mozart, until September 1784, when (following Nannerl's marriage) he returned with them to the family home in Munich. Leopold wrote to friends of his pleasure in teaching Marchand and he clearly had high hopes for the boy. Leopold continued to take a paternal interest in his musical career. Only months later, he visited the Marchands in Munich, and in February 1785 he and the 15-year-old Heinrich travelled in the Marchand carriage from Munich to Vienna for Wolfgang's Carnival subscription concerts at the Mehlgrube casino in the Neuer Markt. Marchand played a violin concerto (it may have been by Viotti, and Wolfgang may have composed the K470 Andante specially for it) at the second concert, on the 18th. While in Vienna, he also performed in his own concerts on 2 and 14 March at the Burgtheater – both poorly attended – and in a concert of the Tonkünstler-Societät on the 15th. He accompanied the Mozarts socially and would surely have joined in evenings of *Hausmusik*.

Wolfgang and Leopold each made efforts to help Marchand secure a post, and at the beginning of 1786 he was offered a contract as pianist and violinist at the Salzburg court, lodging again with Leopold. He appeared as a soloist in four of the public subscription concerts held at the Town Hall in March 1786, performing violin concertos on the 8th and 30th and Mozart piano concertos K451 on the 15th and K466 on the 22nd. He played K466 from score, with Michael Haydn turning the pages. However, from his correspondence it seems that Leopold grew impatient with his protégé's apparent laziness, unfastidiousness and inclination to show off. After three years in Salzburg, Marchand took up a piano post at Regensburg with the Prince Thurn und Taxis. He remained at Regensburg from 1789 until June 1806; during that time he undertook occasional concert tours (in 1798 the *Allgemeine musikalische Zeitung* pronounced him 'a brilliant pianist') and in 1805 he visited Paris.

His brother Daniel (Ernst Heinrich Lambert) Marchand (*b* Mainz, bap. 15 Dec 1770) was a cellist who, in Leopold Mozart's opinion, had completely mastered his instrument by the age of 16; nothing further is known of him.

Marchand, Daniel. German cellist. *See* MARCHAND (ii), (3).

Marchand, Louis (*b* Lyons, 2 Feb 1669; *d* Paris, 17 Feb 1732). French harpsichordist, organist and composer. According to Titon du Tillet, who gave his forename as Jean-Louis, his father Jean Marchand was 'un organiste mediocre'. Not so Louis: by the same authority, he was so gifted that he obtained the post of organist at Nevers Cathedral when he was 14 and at Auxerre when he was 24; he later moved to Paris where he was offered almost all the posts then vacant. Titon exaggerated; and his assertion that Marchand was appointed to Auxerre at the age of 24 is disproved by documentary evidence showing that by the age of 20 he was in Paris – in 1689 he married a Parisian, Marie Angélique Denis, and by 1691 he was organist of the Jesuit church in rue St Jacques (from this early association with the Jesuits sprang Fontenay's colourful account of Marchand's being taken in, literally off the streets, by members of that order). Some years later the *Mercure de France* (August 1699) reveals that he had also acquired posts at St Benoît and the Cordeliers; the title-pages of his two harpsichord books, published in 1702, provide confirmation. In 1703 he occupied the tribune at St Honoré, only to retire from the position in 1707. About this time he entered royal service, replacing Nivers officially as one of the *organistes du roi* in 1708. Such was Marchand's reputation that he was not required to compete for the vacancy (or so d'Aquin de Château-Lyon stated). In 1713 he undertook an extensive tour of Germany, where he played before the emperor and various electors. In September 1717 the Dresden court was to have been the scene of a contest between Marchand and J.S. Bach. Only German sources describe this unflattering episode in Marchand's career (principally F.W. Marpurg, J.A. Birnbaum and Jacob Adlung); all agree that Marchand slipped away before the arrival of the celebrated Weimar organist. Titon, either through tact or ignorance, was of the opinion that Marchand's return to Paris shortly after the Dresden débâcle was due to homesickness. On his return he was taken in by the Cordeliers, whose organist he remained until the end of his days. During these final years he was much sought after in society as a teacher; d'Aquin was the most eminent of his pupils.

Marchand acquired a reputation in his lifetime that was not founded on his musical abilities alone. More than once he indulged in base intrigue to obtain preferment, the most notable instance being his attempt in 1691 to defame Pierre Dandrieu, organist of St Barthélemy. He also contested with François Couperin the authorship of *Les bergeries*; worst of all, he beat his wife. Marpurg said that Marchand was an unfaithful husband; from other accounts we have of his generally erratic, headstrong and dissipated behaviour, that is not improbable. But after

separating from his wife in 1701, Marchand was the victim of her relentless demands for financial settlement; so implacably did she pursue him through the courts that he may eventually have left France in 1713 simply in order to escape from the whole sordid business. Marpurg reported this exile to have been imposed upon Marchand by Louis XIV for impertinence; Marchand himself may have put this story around in Germany to maintain his prestige, for it does not appear in French sources.

No source, however, fails either to praise Marchand's virtuosity at the keyboard or to mention his fame as a virtuoso. Admiring crowds followed him from church to church in Paris. Early in the century, Rameau could be counted among his admirers. Titon called him 'le plus grand Organiste qu'il y ait jamais eu pour le toucher'. He was undoubtedly possessed of a remarkable talent. D'Aquin de Château-Lyon, in an interesting but not altogether unbiased comparison, observed that, while François Couperin had more art and application, Marchand displayed a more naturally brilliant and spontaneous musicianship.

All too little of this natural talent has survived. When it came to publishing, Marchand did not exert himself. He managed to produce two books of harpsichord pieces, each containing only a single suite. Another piece, *La vénitienne*, appeared in Ballard's *Pièces choisies pour le clavecin* (1707). A small collection of organ pieces was published, but only posthumously. The rest of his extant organ pieces are in two manuscripts at Versailles. His extant vocal music includes the inevitable smattering of *airs* in the popular anthologies of the time, principally those published by Ballard, and a cantata, *Alcione*, which remains in manuscript. An opera mentioned by Titon, *Pyrame et Thisbé*, has not come to light, nor has the trunk full of manuscripts inherited by Marchand's only daughter, Françoise Angéline. Marchand was the author of a *Règles de la composition* (*F-Pn*), which de Brossard considered excellent, although short.

Marchand's importance as a composer rests on his extant keyboard music. All of it dates from early in his career. Of his organ music, the *Grand Dialogue* in C from the Versailles manuscripts is dated 1696; probably the collection as a whole was assembled in the last two or three years of the 17th century. It seems equally likely that the music in the posthumous collection was composed about 1700. Indeed, the *Mercure* of January 1700, which advertises the appearance of a suite of organ pieces by Marchand, may well refer to an earlier (but now lost) edition of the posthumous collection. Stylistically the organ music looks back rather than forward. There is little of Couperin's impeccably turned melodic lines, or of his *galant* sensibility. In some places one senses Marchand's evident impatience with notating music. Yet the large-scale *Dialogue* referred to above is a finished work, fully the match of the offertories of Couperin and de Grigny; and the extraordinary *Fond d'orgue* in E minor (in the same Versailles manuscript), with its mysteriously shifting tonality and rich dissolving harmonies, is both unique and beautiful. The Quatuor from the posthumous collection (for three manuals and pedals) is another type of composition of which there are few enough examples in the extant repertory; however, its degree of contrapuntal skill shows that Marchand would not have escaped a humiliating defeat at the hands of Bach had he remained to contest the palm.

In his two harpsichord suites, Marchand followed the pattern of dances established first in France by Lebègue: prelude, allemande, courante, sarabande, gigue and optional movements. The prelude to the second suite is unmeasured, in the French tradition. These works are characterized by melodic lines more sinuously graceful than those in the organ pieces, displaying in their engaging asymmetries and freshness all the charms of the French style at its best, though little of its potential depth. On this evidence, Marchand's lack of interest in publishing his music is to be regretted.

EDWARD HIGGINBOTTOM

Marchand, Louis-Joseph (*b* Troyes, 1 Jan 1692; *d* Troyes, 20 Nov 1774). French theorist and composer. A priest in the diocese of Troyes, he studied singing in Bourges and Auxerre, and was *maître de musique* in the *maîtrise* of Châlons-sur-Marne and then at the metropolitan church of Besançon (where he received 338 livres, 6 sols and 8 deniers for his services in 1735). In August 1735 he succeeded François Chomprez as head of the *maîtrise* of the collegiate church of St Maxe at Bar-le-Duc, a post he seems to have held until 1767. A document in his hand, dating from 1764–5, shows that he was still a canon of Notre Dame, Troyes; perhaps he held both posts simultaneously before retiring to the city of his birth. His *Traité du contrepoint simple, ou Chant sur le livre*, published in Bar-le-Duc by Richard Briflot in 1739, is the first work on counterpoint printed in France in the 18th century, and inspired Henri Madin's *Traité de contrepoint simple*

(Paris, 1742). Writing as a conservative who ignored Rameau's theories, he set out in this work the rules for improvising on plainchant. His only known composition is a *Missa quatuor vocibus, cui titulus, Quis, ut Deus?* (Paris, 1743), in which an old-fashioned style (exemplified in the Sanctus) co-exists with a more modern manner of writing ('et vitam venturi seculi' in the Credo).

JEAN-PAUL MONTAGNIER

Marchant [Merchant] (*fl* 1588–1611). English composer or composers. A 'John Marchant' was admitted Gentleman in Ordinary of the Chapel Royal on 14 April 1593, but is not mentioned in chapel records thereafter. A letter endorsed 8 December 1611 from William Frost to Robert Cecil, Earl of Salisbury, states that 'Mr Marchant is latelie deceased who taught the princes [Elizabeth] to play uppon the virginalles'.

ROBERT SPENCER

Marchant, Sir **Stanley (Robert)** (*b* London, 15 May 1883; *d* London, 28 Feb 1949). English church musician, teacher and composer. He won a Goss Scholarship to the RAM, where he took prizes in composition and organ playing. In 1899 he was appointed organist of Kemsing Parish Church. He moved to Christ Church, Newgate Street (1903), and then to St Peter's, Eaton Square (1913). He was made an FRCO (1902) and took the DMus at Oxford (1914). An association with St Paul's Cathedral had begun in 1903 with his appointment as second assistant, and in 1927 he was made organist at a time when the building was partially closed for restoration. He conducted the reopening ceremony (June 1930) and the thanksgiving service for the silver jubilee of King George V (6 May 1935), composing for each occasion a *Te Deum*. In 1914 he was appointed a professor at the RAM, where he became warden in 1934 and principal in 1936, relinquishing his post at St Paul's. He was then elected King Edward VII Professor of Music at London University (1937), knighted (1943) and made chairman of the council of the Royal School of Church Music (1947). In addition to anthems, canticles and other liturgical music he composed secular choral pieces, organ works and songs. Marchant's music, the finest of which was inspired by ceremonial occasions at St Paul's, is well crafted, though conservative in idiom, and shows the influence of Stanford and Parry. The choir library at St Paul's holds his complete choral works.

Marche (Fr.). *See* MARCH.

Marche aux flambeaux. *See* FACKELTANZ.

Märchenoper (Ger.: 'fairy-tale opera'). The origins of *Märchenoper* were traced by Schmidt back to such works as Baldassare Galuppi's *Il paese della Cuccagna* (1750), Laruette's *Cendrillon* (1759) and F.-A.D. Philidor's *Le soldat magicien* (1760). But the term, and variants such as 'Feenmärchen', 'Märchenspiel', 'Volksmärchen' and 'Feerie', more strictly refer to a genre which acquired considerable popularity among German composers of the 19th and early 20th centuries, typical examples being written by Drechsler, Schnyder von Wartensee, Riotte, August Conradi, Sommer, Humperdinck and Siegfried Wagner. Fairy-tale operas were written in other languages too (*see* OPÉRA FÉERIE), though the appeal to the German Romantic imagination was uniquely powerful.

Fairies as such are not an obligatory feature of the *Märchenoper*: an element of the supernatural, the oriental or the irrational may suffice. Simplicity and naivety of treatment, in the manner of a children's story, are characteristic, though the works are not necessarily intended for a young audience; indeed, the content of the tales is often symbolic and bears a moral message. Occasionally the borderline between fairy-tale and myth or legend is blurred: a work such as Wagner's *Siegfried*, which contains fairy-tale elements, is clearly close to *Märchenoper*, as are Weber's *Oberon* and Marschner's *Hans Heiling*, though they are not so designated by their composers. There is also an affinity with such genres as *Zauberspiel* and ZAUBEROPER.

BARRY MILLINGTON

Marchesi. Italian family of singers.

(1) **Salvatore Marchesi,** Cavaliere de Castrone, Marchese della Rajata (*b* Palermo, 15 Jan 1822; *d* Paris, 20 Feb 1908). Italian baritone and singing teacher. He

studied in Palermo and in Milan with Lamperti. Forced to leave Italy because of his liberal political ideas, he made his début in New York in 1848 as Carlo in *Ernani*. On returning to Europe he studied further with Manuel Garcia in London and sang there in concert in 1850, when he met the German mezzo-soprano Mathilde Graumann. After their marriage in 1852 he appeared at the Berlin Opera in *Ernani*, *Il barbiere di Siviglia* and Donizetti's *Lucrezia Borgia*. Further engagements in Germany followed, and in December 1853 he sang at Ferrara, again in *Ernani*. After a period spent teaching at the Vienna Conservatory, in 1863 he returned briefly to the stage. He sang Leporello and Gounod's Mephistopheles (in Italian) at Her Majesty's Theatre, where in 1864 he again sang Mephistopheles, this time in the first performance of *Faust* in English. He translated several French and German opera librettos into Italian, including those for Wagner's *Der fliegende Holländer*, *Tannhäuser* and *Lohengrin*. The composer of a number of songs, he also wrote a book on singing and vocal exercises.

(2) **Mathilde (de Castrone) Marchesi** [née Graumann] (*b* Frankfurt, 24 March 1821; *d* London, 17 Nov 1913). German mezzo-soprano and singing teacher, wife of (1) Salvatore Marchesi. She studied with Felice Ronconi in Frankfurt and with Otto Nicolai in Vienna, making her concert début in 1844 at Frankfurt and taking part in the Lower Rhine Festival at Düsseldorf in May 1845. In October of that year she went to Paris for two years of study with Manuel Garcia. When he moved to London, she followed and sang very successfully in concerts there during 1849, and then sang in Germany and the Netherlands. In 1852 she married Salvatore Marchesi, with whom she had often appeared on the concert platform. She made her only stage appearance, as Rosina in *Il barbiere di Siviglia* in Bremen in 1853.

In 1854 Marchesi became professor of singing at the Vienna Conservatory, a post she held for seven years; during this period her pupils included Caroline Dory, Antoinetta Fricci, Gabrielle Krauss and Ilma di Murska. In 1861 she moved to Paris and gave lessons privately while continuing her concert and recital appearances. In 1864 she and her husband made a long tour of the British Isles; the following year she went to Cologne and remained there for three years. In 1868 she returned to the Vienna Conservatory and taught there for a decade; she resigned in 1878 but continued to teach privately in Vienna. Her pupils came from all over Europe and the USA, and included Anna d'Angeri, Etelka Gerster, Katherina Klafsky, Emma Nevada, Rosa Papier, Caroline Salla, Caroline Smeroschi, Amalia Stahl and Wilhelmina Tremelli.

In 1881 she opened her own school of singing in Paris, which continued to attract pupils from many parts of the world for over 25 years. She taught, among others, Suzanne Adams, Emma Calvé, Emma Eames, Mary Garden, Nellie Melba, Sybil Sanderson and Blanche Marchesi, her daughter. Her vocal method, based on that of her teacher Garcia, was published in Paris in 1886 and she also wrote a practical guide for students and a volume of autobiography.

(3) **Blanche Marchesi** (*b* Paris, 4 April 1863; *d* London, 15 Dec 1940). French soprano, daughter of (1) Salvatore and (2) Mathilde Marchesi. She studied with her mother in Paris, singing at many private and charity concerts there, and made her professional concert début in London in 1896. Her first operatic appearance was in 1900 at Prague, as Brünnhilde in *Die Walküre*. She sang with the Moody-Manners Opera Company for several seasons, appearing at Covent Garden in 1902 as Elisabeth in *Tannhäuser*, Elsa in *Lohengrin*, Isolde, Leonora in *Il trovatore* and Santuzza in *Cavalleria rusticana*. She taught singing for many years in London and wrote her memoirs and a book on singing.

ELIZABETH FORBES

Marchesi, Giulio (*b* Verona; *fl* 1586–96). Italian composer. The title page of his *Cento, e dodeci falsi bordoni figurati* (Milan, 1596) identifies him as *maestro di cappella* at S Maria della Passione in Milan and a member of the canons regular of the Lateran. His only other surviving publication, the *Canzonette a tre voci . . . libro primo* (Venice, 1586), described in the preface as 'queste mie prime fatiche', comprises 15 short Italian songs for two active upper parts and an equally active bass line, with all parts texted. The texture is remarkably thin and mostly homophonic. His *Cento, e dodeci falsi bordoni* actually contains 110 *falsobordoni* for 4–8 parts. Some are scored for alternating choirs, and in a few the scoring changes in the middle. The publication concludes with a four-part canon ('a 7 si placet'), along with two brief comments on performing the *falsobordoni*.

MURRAY C. BRADSHAW

Marchesi [Marchesini], **Luigi** (*b* Milan, 8 Aug 1755; *d* Milan, 14/15/18 Dec 1829). Italian castrato and composer. He studied with the tenor Albuzzi and the castrato Caironi, either in Modena (Schmidl) or in Milan (Gerber), where he had entered the cathedral choir in 1765 and later studied composition with its director Fioroni. He made his theatrical début in Rome's Teatro delle Dame, singing female roles in three comic operas (1773–4); he never again appeared in either female or comic roles. During Carnival 1775 he took minor roles at the Regio Ducal Teatro, Milan, and later sang in Venice and Treviso; in Carnival 1776 he began a six-year contract with the Munich court, but sang there for two seasons only. On 31 January 1778 he was dismissed because of retrenchments following the death of the elector (30 December 1777).

Marchesi's emergence as one of the foremost singers in Italy dates from his engagement at the Teatro S Carlo, Naples (1778–9), where he appeared in five operas by Mysliveček, Platania and Martín y Soler. He sang other works by Mysliveček (1779, Venice; 1780, Milan) and in autumn 1779 at Florence began an important association with the composers Bianchi and Sarti. The *Gazzetta di Milano* reports his performance of a new solo motet by Cherubini at S Antonio Abate on 17 January 1780.

Marchesi appeared in works by Martín y Soler, Jommelli, Schuster and Bianchi at S Carlo, then, after appearances in Genoa and Florence (1781), made a triumphant return to Milan at Carnival 1782. Following a sensational performance of Bianchi's *Il trionfo della pace* in Turin, he was appointed singer to the court, remaining there until 1798. With leave to travel nine months of the year, he sang in premières in Turin, Rome, Lucca, Padua, Sinigaglia, Florence and Mantua between 1782–4. In August 1785 he appeared in Sarti's *Giulio Sabino* in Vienna and Warsaw, then went to St Petersburg, where he sang Sarti's *Armida e Rinaldo* to inaugurate the Hermitage Theatre (1786). After the autumn season he left Russia, appearing in Berlin on 9 March 1787 and reaching Milan before 11 July to give a benefit concert for the poor. In 1783 he founded the Pio Istituto Filarmonico in Milan, which sponsored four benefit concerts annually at La Scala for widows and orphans of musicians.

From 1788 to 1790 Marchesi divided his time between Italy and London (see illustration), where his greatest success was his début in Sarti's *Giulio Sabino* on 5 April 1788 (see Mount Edgcumbe). After his last London performance (17 July 1790) he returned to Italy, where he remained for the rest of his career apart from short trips to Vienna in 1798 and 1801 (for Mayr's *Ginevra di Scozia*). He spent four Carnival seasons in Venice between 1791 and 1798 and appeared at Carnivals in Turin and Milan, where he last sang publicly in Mayr's *Lodoiska* (May 1805). In 1816 Stendhal reported that he was still giving occasional private concerts in Milan.

'A Bravura at the Hanover Square Concert' (Luigi Marchesi accompanied by James Cervetto): drawing by John Nixon, pen and ink with brown wash, 1789 (National Portrait Gallery, London)

Marchesi was indisputably one of the greatest castratos of his age. Medals with his image were struck on three occasions, and at his death the *Allgemeine musikalische Zeitung* estimated that he had earned over 1,500,000 francs during his career, much of which he had given to needy musicians. Burney found him 'not only elegant and refined to an uncommon degree, but often grand and full of dignity' though he later criticized his excessive embellishment of recitative. Pietro Verri's appraisal (19 February 1780) is illuminating:

> His voice is most beautiful, sonorous, the same in every part of his range ... his intonation is faultless and he controls his voice as one would a violin. It can produce a clear trill rising up six or seven tones in succession without interruption. ... He supports his voice and it fills the theatre ... is passionate, tender .... He has everything except, I believe, that feeling which knows how to touch one's soul.

With his range of *g* to *d‴*, Marchesi was known as the most celebrated castrato of *opera seria*. Among his students, B.R. Pisaroni and G. Pacini gained the greatest fame. Marchesi also published three sets of airs, an arrangement of Sarti's 'Lungi dal caro bene' and several songs in anthologies, in addition to leaving arias and duets in manuscript (*B-Bc*, *CH-N*, *D-Bsb*, *HVs*, *I-Pca*).

SVEN HANSELL

Marchesi, Tommaso (*b* Lisbon, 7 March 1773; *d* Bologna, 6 June 1852). Italian composer, conductor and organist. He studied with Stanislao Mattei at Bologna, where he became a member of the Accademia Filarmonica. In 1808 he founded the Accademia dei Concordi, which, in the first two years of its existence, performed Haydn's oratorios *The Creation* and *The Seasons*. Rossini became the society's harpsichordist and coach in 1811, when *The Seasons* was repeated. Marchesi's chief works are a symphony for wind instruments, concertos for piano and for organ and a great deal of sacred music: settings of the Kyrie (11), Gloria (18), Credo (12), 17 psalms, 20 hymns and four canticles. He also wrote cantatas and other choral works, many arias and songs. Most of his compositions remained unpublished, and many manuscripts are in the Archivio di S Petronio, Bologna. (*MGG1*; S. Paganelli [incl. complete list of works])

ELIZABETH FORBES

Marchesini, Maria Antonia ['La Lucchesina'] (*fl* 1736–9). Italian mezzo-soprano. She sang in three operas at the Teatro Nuovo, Naples, in 1736 and was engaged for

London by the Opera of the Nobility, making her début at the King's Theatre in the pasticcio *Sabrina* in 1737. She next appeared in Duni's *Demofoonte*, and Heidegger re-engaged her for the autumn season when she sang in the pasticcios *Arsace* and *Alessandro Severo*, Handel's *Faramondo* and *Serse*, Pescetti's *La conquista del vello d'oro* and Veracini's *Partenio*. Still in London in 1739, she sang in Pescetti's *Angelica e Medoro* at Covent Garden and may have appeared in Handel's *Il trionfo del tempo* and *Jupiter in Argo*. She probably created the Witch of Endor in Handel's oratorio *Saul*. In May 1738 she married the portrait and scene painter Jacopo Amiconi in London. Her parts in *Faramondo* (Rosimonda) and *Serse* (Arsamenes) suggest a singer of limited accomplishments; the compass is *a* to *g″*, with a low tessitura. She took male roles in *Demofoonte*, *Serse* and several other operas.

WINTON DEAN

Marchesini, Santa (*b* Bologna, *fl* 1706–39). Italian contralto. She was probably trained in Bologna, but nothing is known of her career before 1706, when she sang as an intermezzo performer – a genre in which she specialized – for the first time at the Teatro S Cassiano, Venice, in Lotti's *Grimora e Erbosco*, with the famous *buffo* Giovanni Battista Cavana. In 1709 she moved with Cavana to Naples, where she also worked with Gioacchino Corrado; between 1711 and 1716 she sang alternately with both of them, acting as an important intermediary between the expertise and repertories of the two principal *bassi buffi* in successive generations and contributing to the development of the independent intermezzo. In 1725 she and Corrado took to Venice Sarri's *L'impresario delle Canarie* which they had created in Naples in 1724. After Venice Marchesini began a new career as an itinerant performer with other basses including Antonio Lottini and Pellegrino Gaggiotti; she ended her career at the Spanish court.

FRANCO PIPERNO

Marchetti, Filippo (*b* Bolognola, Macerata, 26 Feb 1831; *d* Rome, 18 Jan 1902). Italian composer. At the age of 12 he began to study music privately with Bindi and in 1850 entered the Naples Conservatory, then directed by Mercadante. His teachers there included Lillo (figured bass and harmony) and Conti (counterpoint and composition). Returning in 1854 to his native region, he began to compose his first opera, *Gentile da Varano*, to a libretto by his brother Raffaele. Its highly successful performance in February 1856 at the Teatro Nazionale in Turin led the impresario of the theatre to secure the performing rights of his next opera, *La demente*. Staged at the Teatro Carignano in Turin on 27 November 1856 and repeated the following year at the Argentina in Rome and elsewhere, this opera was a failure. Marchetti was consequently unsuccessful in finding an impresario willing to accept his third opera, *Il paria*, which remained unpublished and unperformed. One cause of his difficulties was probably Verdi's growing domination of the Italian opera scene. Discouraged, he withdrew to Rome, where he taught singing and song composition.

In 1862, encouraged by his brother, Marchetti moved from Rome to Milan, which was then the centre of Italian musical life. There the young poet Marcelliano Marcello persuaded him to compose *Romeo e Giulietta*, which he had adapted from Shakespeare. Although extremely hesitant to confront the public with a subject which many Italian and foreign composers had already treated, he at last produced the opera at the Teatro Comunale in Trieste on 25 October 1865. In spite of the presence of Tiberini in the leading role, the reception was lukewarm, but two years later, when it was revived at the Teatro Carcano in Milan, the opera achieved complete success, despite competing with Gounod's *Roméo et Juliette*, given at La Scala in the same season.

With *Ruy Blas* Marchetti reached the apogee of his career. Having aroused little interest at La Scala (3 April 1869), where Verdi's *Forza del destino* had monopolized attention for the entire season, the opera was acquired by the publisher Lucca (the rival of Ricordi) and performed at the Teatro Pagliano in Florence with sensational result. Within a few years it had been staged in over 50 Italian theatres and many foreign ones (New York, 1874; London, 1877; Dresden, 1879; Zagreb, Lwów, Prague, Liverpool, 1878–86; Warsaw, 1901, with the baritone Battistini, one of its most celebrated interpreters). In 1915 it was performed at the Teatro Adriano in Rome and in 1921 in Monte Carlo. The love duet of Act 3 ('O dolce voluttà') long remained one of the favourite pieces in the Italian repertory. One of the few Italian operas to win real fame during the period of Verdi's domination, the work has points of merit, especially its melodic delicacy, exciting harmony and orchestration, despite its lack of variety and the weakness of its dramaturgy.

By contrast, the next opera, *Gustavo Wasa* (La Scala, 1875), had a cold reception, and only token applause greeted *Don Giovanni d'Austria* (Turin, 1880) in spite of its return to the Spanish local colouring that had made the fortune of *Ruy Blas* and a certain effort towards updating in the light of Meyerbeer and Verdi. Because of its lack of characterization and dramatic tension, this work, which ended Marchetti's short operatic career, appears exiguous and nerveless. When it was repeated in Rome, Verdi pointed out the 'lungaggini' in a letter to Giorgio Arrivabene (11 December 1885).

Marchetti, who in 1873 had been nominated a corresponding member of the Accademia Cherubini in Florence, was president of the Accademia di S Cecilia in Rome from 1881 to 1886, and from 1886 to 1901 was director of the affiliated Liceo Musicale, whose educational organization made remarkable progress under his guidance. With Sgambati and others he was tutor to Margherita of Savoy, who entrusted him with the direction of the court quintet. In 1889 he was a member of the selection committee of the competition promoted by the publisher Sonzogno for a one-act opera and insisted on awarding the first prize to Mascagni's *Cavalleria rusticana*. A tumour on his tongue forced him to retire from the direction of the Liceo Musicale and quickly led to his death.

Marchetti is now virtually forgotten. His operas reflect an assimilation of the Verdian models (the subjects based on strong psychological and ethical oppositions, the complex structure of scenes and arias) but without Verdi's energetic sense of drama. In spite of his conservative style, his skill in creating atmosphere and local colour and his tendencies to the elegiac and melodic over-sweetness mark a point of transition on the line that was to lead to Catalani and the *verismo*.

ANDREA LANZA

Marchetti, Tomasso (*b* probably Rome; *fl* 1660). Italian composer and ?guitarist. He published two guitar books in the *battute* style. The first, *Il primo libro d'intavolatura della chitarra spagnola* (Rome, 1660; 1 ed. in Hudson), includes a preface on *alfabeto* which replicates prefaces found in Millioni's books of the 1620s. Marchetti's work is similar to Millioni's in style and content, with a wide variety of dances and grounds. The second book, which is missing almost all of its first eight pages in the only surviving copy (*I-Rsc*), is almost an exact replica of an earlier book by Millioni, which now survives only in its reprint of 1661. The contents of Millioni's book also appear to have been plagiarized by Foriano Pico (see Boye, 1995, appx).

GARY R. BOYE

Marchetti Fantozzi [née Marchetti], **Maria (?Vincenza)** (*b* ?1760; *d* ? after 1800). Italian soprano. She was one of the leading singers of *opera seria* during the 1780s and 90s. Around 1783 she married the tenor Angelo Fantozzi and thereafter usually identified herself as Maria Marchetti Fantozzi. She was praised throughout Italy for her acting as well as her singing, particularly in Naples, where she performed in at least nine different operas in 1785–6. Marchetti was a specialist in the portrayal of passionate, tragic heroines like Semiramide and Cleopatra; she was thus ideally suited to create the role of Vitellia in Mozart's *La clemenza di Tito*. Music written for her by Cherubini, Tritto and Zingarelli, as well as Mozart, shows her to have been an extraordinary virtuoso, with a large range and a capacity for difficult coloratura.

JOHN A. RICE

Marchetto da Padova [Marchetus de Padua] (*fl* 1305–19). Italian music theorist and composer. In his *Lucidarium in arte musice plane* he developed the theory of 'permutation'

to account for the chromatic progressions common in music of his time, proposed a division of the whole tone into five equal parts that proved a milestone in the history of tuning, and developed a comprehensive theory of mode that accommodated melodies irregular in range or construction. His *Pomerium in arte musice mensurate*, the earliest major treatise dealing systematically with a mensural system that permitted a duple as well as a triple division of the breve, became the foundation of the mensural theory of the Italian Trecento.

1. LIFE. There is documentary evidence that a 'Marchetus' was appointed teacher of the boys at Padua Cathedral early in 1305, held that office still in July 1306, and donated the income from a benefice to the cathedral in the summer of 1307. According to colophons of the treatises, he began the *Lucidarium* in Cesena and completed it in Verona; he completed the *Pomerium* in Cesena. On the basis of circumstances and persons mentioned in the dedications of the treatises, Strunk determined that Marchetto wrote the *Lucidarium* in 1317 or 1318 and the *Pomerium* shortly thereafter but no later than 1319; these dates stand despite alternate proposals by Vecchi and Gallo. The date of the *Brevis compilatio*, an abridgement of the *Pomerium*, is not known. Gallo attributed the motet *Ave regina celorum/Mater innocencie/[Ite missa est]* (ed. in PMFC, xii, 1976) to Marchetto on the basis of the acrostic MARCVM PADVANVM in its duplum; attributions of other compositions to him on the basis of stylistic similarity to this motet or correspondences with theories expounded in his treatises are conjectural.

2. THE TREATISES. The *Lucidarium* and the *Pomerium* are cast in a scholastic mould, with their statements qualified and elaborated through *dubitationes*, *responsiones*, *contradictiones*, *solutiones* and *dilatationes*. The *Lucidarium* surveys the theory of *musica plana* taken in the broadest sense of the term: the gamut and its registers, the fundamentals of non-mensural notation, mutation, permutation and chromatic signs, intervals and their ratios, counterpoint, tuning, the modes, and philosophy of music. Although conventional in many ways, it is boldly innovative in others. Marchetto was the first medieval theorist to discuss chromaticism, introducing the term 'permutation' to account for the chromatic progressions that flourished in Italian polyphony of the early Trecento and could not be accommodated by the conventional system of mutation between hexachords. Marchetto proposed dividing the Pythagorean whole tone (represented by the ratio 9:8) into five equal parts (comprising the *diesis*, $\frac{1}{5}$ tone; *semitonium enarmonicum*, $\frac{2}{5}$ tone; *semitonium diatonicum*, $\frac{3}{5}$ tone; *semitonium cromaticum*, $\frac{4}{5}$ tone). This procedure was impossible within the scope of Pythagorean arithmetic, which did not allow for the geometric division of any superparticular ratio. Marchetto's proposal avoided the complex ratios of the Pythagorean major and minor semitones and provided a conceptual representation of a pair of semitones more markedly different in size from these. Marchetto claimed his division could be used where *musica ficta* rules demanded the closest approach to a perfect consonance; he indicated its use by a special chromatic sign called *falsa musica*.

Marchetto developed a doctrine of mode flexible enough to encompass chant melodies irregular in range or construction. He regarded pentachord and tetrachord species, and their intermediations (*interruptiones*), as of greater importance in determining mode than final or range. A mode, he claimed, is either perfect, imperfect, pluperfect, or mixed depending on whether its range is respectively normal, narrow, wide in the direction away from the mode's authentic or plagal partner, or wide in the direction of that of the partner. A fifth category, 'mingled' (*commixtus*), applied where the mode in question showed qualities of a mode other than its authentic or plagal partner. Marchetto described a mode as either regular, irregular, or 'acquired' according to whether its pentachord and tetrachord species were orientated respectively towards the final, the cofinal (the note a 5th above the final), or some other note; the species could be orientated towards any note so long as they were constructed using the regular notes of the gamut (the naturals plus the B♭s below and above middle C). The occurrence of notes other than these rendered a mode artificial. Marchetto cited specific melodies to illustrate all these types.

The *Pomerium* is significant as the earliest major treatise dealing systematically with a mensural system which permitted a duple as well as a triple division of the breve. After discussing the qualities of downward and upward tails, rests, the dot, and the chromatic sign he called *falsa musica*, Marchetto showed how a breve could be divided into two to twelve semibreves in *tempus perfectum*, downward and upward tails being attached to the semibreves where necessary to differentiate them in length. In *tempus imperfectum* a breve could be divided into two to eight semibreves, their lengths again differentiated by tails where necessary. Though Marchetto cited Franco frequently throughout the treatise, the Franconian background of the *Pomerium* is especially evident in the closing discussions of discant, ligatures, the plica and the rhythmic modes. Marchetto, however, expanded on Franco by describing modes of imperfect time alongside those of perfect time (even allowing for the alternation of perfect and imperfect longs); his description of what has come to be called the 'same-pitch' ligature (see Long's emendation of Vecchi's *Pomerium* text; see also Nádas) demonstrated the possibility in Italian Trecento notation of syncopation not only within but across breve units. Marchetto's discussion in the *Pomerium* of the differences between French and Italian practice provides crucial information for deciphering the rhythm not only of Italian music of the early 14th century but of contemporaneous French music as well. The *Brevis compilatio* covers the same material as the *Pomerium*, but more succinctly and without its scholastic refinements.

3. INFLUENCE ON LATER THEORY. The *Pomerium* became the foundation of Italian Trecento mensural theory, which over the next 100 years developed along the lines set down by Marchetto. Although Italian mensuration was moribund by the early Quattrocento, at least four of the seven surviving copies of the *Pomerium* date from that century, one of them copied by Gaffurius as late as 1473, another owned by Giovanni Del Lago.

The *Lucidarium*, on the other hand, survives complete or nearly so in 15 manuscripts (truncated in three more), the latest dating from 1509. These include the manuscript copied by Gaffurius and that owned by Del Lago; the latter made corrections in his, and quoted from it in letters of the 1520s, 30s and 40s. The wider distribution of the

Lucidarium was certainly due in part to theorists' interest in Marchetto's epochal division of the Pythagorean whole tone into five equal parts: the division showed that Marchetto had ceased to regard the whole tone as a ratio (and one impossible of geometric division) and had begun to regard it as a quantity, divisible in several ways. Had this departure from the strictures of Pythagorean arithmetic not been made, the manifold experiments in tuning and temperament that flourished over the next centuries would not have been possible. Indeed, the conservative Prosdocimus de Beldemandis (*Tractatus musice speculative*, 1425) complained that Marchetto's doctrine of tuning had spread throughout Italy and beyond its borders; Italian theory manuscripts of the 14th and 15th centuries include many references to *dieses* of ⅕ tone and enharmonic, diatonic and chromatic semitones; Tinctoris defined these intervals in his *Terminorum musicae diffinitorium*; 14th-, 15th- and 16th-century theorists followed Marchetto's lead, proposing other fractional divisions of the whole tone (e.g. the Berkeley Anonymous, Ciconia, Gaffurius, Burzio, Aaron, Vicentino). But by far the most influential of Marchetto's theories was that of mode. The *Lucidarium* had spawned two digests of its modal doctrine by the end of the 15th century, each of which developed its own manuscript tradition; Marchetto's complex of perfect, imperfect, pluperfect, mixed and mingled modes surfaced in dozens of later treatises (e.g. those of Prosdocimus, Ugolino, Tinctoris, Burzio, Gaffurius, Bonaventura da Brescia, Wollick and Lanfranco); the doctrine of mixed and mingled modes proved particularly useful to those theorists who attempted to explain polyphonic music in terms of mode. On the basis of his doctrines of tuning and especially of mode, Marchetto must be considered the most influential music theorist in Italy between Guido of Arezzo and Tinctoris.

JAN HERLINGER

Marchi, Giovanni Francesco Maria (*d* Milan, 10 Dec 1740). Italian composer. He was promoted from assistant organist to organist of Milan Cathedral in 1713, holding the post until his death. His Italian oratorios were performed in various Milanese churches between 1719 and 1731. After this date he turned to opera with some success, judging from the eminence of the theatres where these works were produced. 17 arias, recently discovered, demonstrate his sense of melodrama, modelled on the historical and mythological styles of Zeno and Metastasio.

PIERO WEISS/MARIELLA BUSNELLI

Marchion de Civilibus. *See* PREPOSITUS BRIXIENSIS.

Marchioni, Nicolò. *See* AMATI, NICOLÒ.

Marchisio. Family name of two Italian singers. Barbara Marchisio (*b* Turin, 6 Dec 1833; *d* Mira, 19 April 1919), contralto, studied with her brother Antonino and with Fabbrica in Turin, making her début in 1856 at Vicenza as Adalgisa and then appearing in Madrid as Rosina. Her

sister Carlotta Marchisio (*b* Turin, 8 Dec 1835; *d* Turin, 28 June 1872), soprano, also studied with their brother and Fabbrica, and made her début in 1856 at Madrid as Norma. The sisters first sang together at Turin in 1858 in Rossini's *Matilde di Shabran* (Carlotta as Matilde, Barbara as Edoardo), *Guillaume Tell* (as Mathilde and Jemmy) and *Semiramide* (as Semiramide and Arsace); the same year they appeared at Trieste in Rossini's *Otello* (as Desdemona and Emilia) and in *Norma*, then made their début at La Scala, Milan, in *Semiramide*. They both took part in the première of Petrella's *Il duca di Scilla* (1859). The following season they sang in *Il trovatore* (as Leonora and Azucena), *La Cenerentola* (as Clorinda and Cenerentola) and *La sonnambula* (as Amina and Teresa).

In 1860 they sang in the first performance of their brother Antonino Marchisio's *Piccarda Donati* at Parma, then made their début at the Paris Opéra in *Semiramide* (in French) and also appeared in *Guillaume Tell*. Their London début was at Her Majesty's Theatre in 1862 in *Semiramide*, and Carlotta also sang Isabelle (*Robert le diable*). They appeared in *La forza del destino* (given as *Don Alvaro*) at Rome in 1863 as Leonora and Preziosilla. Other operas in which they both sang included *Le nozze di Figaro*, *I puritani*, *Mosè in Egitto*, *Lucrezia Borgia*, *Il matrimonio segreto*, *Lucia di Lammermoor* and *L'Italiana in Algeri*. The sisters appeared together for the last time in 1871 at Rome in *Otello* and *Il trovatore*. The following year Carlotta died at the age of 36. Barbara sang in Mercadante's *Il giuramento* at La Scala in 1872 and in *Il barbiere di Siviglia* at Venice in 1876, then retired to teach. Both sisters, with voices that were even throughout the scale and unusually flexible, excelled in the florid music of Rossini.

ELIZABETH FORBES

Marchitelli, Pietro [Petrillo] (*b* Villa Santa Maria, nr Chieti, ?1643; *d* Naples, 6 Feb 1729). Italian violinist and composer. He went to Naples in the mid-17th century, entering the Conservatorio di S Maria di Loreto. When his teacher, the violinist Carlo de Vincentiis, died in 1677, he took over as principal violinist of the royal chapel, Naples, remaining in the post for more than 50 years. From 1693 to 1706 he may also have been first violinist at the Teatro di S Bartolomeo (Prota-Giurleo). His confrontation with Arcangelo Corelli in 1702 is discussed by Burney. Marchitelli reached the pinnacle of his career in 1707, shortly after the arrival of the Austrian government in Naples, when he was appointed governor and treasurer of the Congregation of Musicians of the Royal Palace. A detailed inventory of his possessions shows that he had personal links with some of the major artists of the period, and was held in high esteem by certain noble families in the city. His pupils included his nephews Michele Mascitti and Giovanni Sebastiano Sabatino. The latter, perhaps because of Marchitelli's support, succeeded Francesco Scarlatti as a violinist of the royal chapel in 1691.

Marchitelli's sonatas closely follow the model established by Corelli in both form and pattern of movements. However, it is their irregular phrasing and marked contrapuntal style which are of particular interest.

GUIDO OLIVIERI

Marcia (It.). *See* MARCH.

Marciani, Giovanni (*b c*1605; *d* ?in or before 1663). Italian composer, singer and organist. He lived for most, perhaps all, of his life in Rome, entering the Collegio Germanico there as a boy singer on 30 July 1616. From December 1634 to April 1646 he was a paid tenor at the college while the *maestro di cappella* was Carissimi. Simultaneously he was a musician to the Prince of Gallicano (1645–53), an organist at S Luigi dei Francesi (1649–53) and *maestro di cappella* of S Giovanni dei Fiorentini (?1645–1659). His music was included in anthologies published between 1645 and 1663 and in manuscript anthologies of the same period. In a collection of 1663 he is identified as 'formerly' the *maestro di cappella* of S Giovanni dei Fiorentini, probably meaning that he had died before or in that year.

Marciani's surviving music consists of motets, madrigals and cantatas (but not an opera, as stated in *MGG1*). He also wrote oratorios, but none of them seems to survive. In his output the cantatas are important both numerically and musically: they are often of high quality and were certainly influenced by Carissimi, under whom he worked directly for some years. They are varied in form and expressive in musical language. Ranging from short arias in strophic or rondo form to long composite works with recitatives, arias and arioso sections, they show the diversity of Italian cantatas in the mid-17th century. Marciani's style is a flexible and natural one, reflecting the art of fine singing that prevailed at the time.

WORKS

6 motets, 1, 3vv, bc, 1645[2], 1647[2], 1655[1], 1659[1], 1664[1], *I-Bc*
36 cants., 1–3vv, bc (1 with 2 vn; another, 2 vn, lute), *Bc*, *Rc*, *Rdp*, *Vc*, 1646[7]; Canzonette amorose (Rotterdam, 1656) [anon. in last anthology]
4 madrigals, 3vv, bc, 1652[3], 1653[4]

10 orats, 5, 6, 8, 10, 12vv, 2 sacred cants., 3vv, lost, listed in a late 17th-century inventory of music, Bologna

GLORIA ROSE

Marcland, Patrick (*b* Neuilly-sur-Seine, 6 May 1944). French composer. A guitarist by training, he studied at the École Normale de Musique and the Paris Conservatoire. His teachers included Yves-Marie Pasquet, Max Deutsch and Claude Ballif (analysis and composition) and Henrik Brunn (conducting). In 1984 he was awarded the SACEM George Enescu Prize. In addition to composing, he has been active in music publishing.

Closely aligned with French postwar serialism, Marcland's music constantly attests to the primary role he assigns to technique and style. The ways in which he develops material, organizes musical discourse and links colouristic effects, however, though highly rigorous, never suffer from the compositional constraints imposed upon them. His works have been featured internationally at festivals in Royan (1977), Metz (1979), Berlin (1979), New York (1980), Warsaw (1984) and Strasbourg (1996), and are often performed by the ensembles Itinéraire and Intercontemporain. He has also collaborated as both a composer and conductor with choreographers such as Sara Pardo (1974), Odile Duboc (1988) and Nadine Hernu (1996).

WORKS

Dramatic: Stretto (dance score, choreog. S. Pardo), hp, 1978; Peau d'ane (chbr op, after C. Perrault), 1980–81, Paris, 1981; L'angélus (film score, dir. G. Frot-Couraz, choreog. O. Dubuc), 1987–90; Elle venait du côté de la mer (dance score, choreog. B. Réal), Mez, cl, vc, 2 perc, 1988; Jaillissements (film score, dir. R. Sangla, choreog. E. Schwartz), 6 mixed vv, 1990; La porte est refermée la voilà sans lumière (dance score, choreog. L. Marthouret), accdn, 1991; Étude (spectacle musical et chorégraphique, choreog. N. Hernu), hn, tpt, trbn, va, vc, db, 1995

Inst: Mètres, fl, va, hp, 1972; Tresses, str, 1973; Variants, ww, hn, tpt, trbn, perc, hp, 2 vn, 2 va, 2 vc, db, 1974; Failles, fl, vn, hp, orch, 1975–7; Stretto, hp, 1978; Versets, ww, brass, 2 perc, org, str, 1979; Desairs, 2 ob, bn, hpd, 1980; Str Trio, 1987–90; De temps en temps, solo va, fl, cl, tpt, trbn, synth, elec gui, vn, va, vc, db, 1994–5

Vocal: Paroles (M. Marcland), 12 mixed vv, 1981–2; After Long Silence (W.B. Yeats), Mez, cl, vc, 2 perc, 1989; Maldoror (Le Comte de Lautréamont), nar, children's chorus, chorus, orch, 1996

Principal publisher: Éditions Musicales Transatlantiques

CORINNE SCHNEIDER

Marco, Eduardo López-Chavarri y. *See* LÓPEZ-CHAVARRI MARCO, EDUARDO.

Marco, Guy A(nthony) (*b* New York, 4 Oct 1927). American musicologist and librarian. He attended DePaul University and the American Conservatory of Music, Chicago (BM 1951), and received advanced training at the University of Chicago, in music (MA 1952, PhD 1956) and library science (MA 1955). He was librarian and instructor at the Chicago Musical College (1953–4) and librarian and instructor in music and humanities at Chicago City Junior College (1954–60). As dean of the Kent State University library school (1960–77) he developed training for music librarians. He was chief of the general reference and bibliography division, Library of Congress (1977–8), director of the library school, San Jose (California) State University (1981–3), chief of library activities, US Army, Fort Dix (1985–9) and senior fellow at Rosary College, River Forest, Illinois (1990–96), where he directed the music librarian course. He is internationally active as a consultant on library planning. He has written many articles and reviews, primarily on librarianship, but also on 17th- and 18th-century music and on opera.

SIEGMUND LEVARIE

Marco (Aragón), Tomás (*b* Madrid, 12 Sept 1942). Spanish composer and writer on music. He studied law, and was self-taught in music, turning to composition in 1958 and attending courses in Darmstadt in 1962. His works were first performed publicly in 1963. In 1969 he was awarded the National Prize for Music, the first of a long series of honours. He has made a significant contribution in the field of music management, heading up the Spanish National Orchestra, the Alicante Contemporary Music Festival, the Centro para la Difusión de la Música Contemporánea and the General Board for Music and Theatre, among other organizations. He has been involved with some of the most innovative Spanish music groups, such as Zaj (1965), Sonda and the Studio Nueva Generación, which he helped to found in 1967. In the same year he became an editor of new music programmes for Spanish radio.

Before 1970 his music had already acquired features of the 'new simplicity' (Enrique Franco). His music constantly introduces reflections on history, the past, tradition and the mechanisms of memory, and addresses various scientific problems, particularly in the field of physics. Reflection on Spanish tradition, both historical and musical, has given rise to some of his most significant works. One such is *Autodafé*, winner of the Golden Harp and UNESCO Young Composers' prizes (1975 and 1976 respectively).

While his ample catalogue encompasses many genres, his symphonic works stand out. His Symphony no.3 demonstrates his virtuoso treatment of instruments and his ability to create an orchestral sound which recalls electronic music. He regards the genre of the symphony as presenting 'a world of ideas which contains great conceptions of human, philosophical, cosmological or some other order'. This is always accomplished in abstract terms through the musical language itself, without recourse to any naively programmatic elements. His mature period is summarized in his Symphony no.5. With its tragic sense of lost innocence, the work feeds on the past as much as the present, admitting quotation and parody as well as more reverential gestures of homage to times past. Its subtitle, 'Modelos de universo', alludes to the seven cosmological models which suggested the formal schemes of the work's seven parts.

The concertos are also noteworthy, for example his *Concierto Guadiana* (1973), one of a number of pieces he has written for the guitar. He has composed a large

amount of incidental music for the theatre, radio and cinema.

Marco is also a prolific writer on Spanish contemporary music. Having worked as a magazine and newspaper critic from 1962, in 1967 he established the journal *Sonda* for articles on contemporary music, and he has contributed to several other journals.

WORKS
(*selective list*)

STAGE AND VOCAL

Stage: Selene (Marco), 1965–73; Anna Blume (music-theatre piece, K. Schwitters), 1967; Cantos del pozo artesiano (music-theatre piece, E. de Vicente), 1967

Choral: La Pasión segun San Marcos, nar, 3 choruses, chbr ens, 1983; Ceremonia barrocca, chorus, chbr ens, 1991

Other vocal: Jabberwocky (L. Carroll), actress, t sax, pf, 4 perc, tape, slides, 1967; Küche-Kinder-Kirche (G. Grass), Mez, 3 spkrs, pf, perc, 1968; Tea-Party, 2 S, T, Bar, 4 insts, 1969; L'invitation au voyage, S, 5 insts, 1971

INSTRUMENTAL

Syms.: no.1 'Aralar', 1976; no.2, 1985; no.3, 1985; no.4, 1987; no.5 'Modelos de universo', 1989

Marco dell'Arpa. *See* MARAZZOLI, MARCO.

Marcolini [Marcolino] **(da Forlì), Francesco** (*b* Forlì, *c*1510; *d* after 1558). Italian printer and publisher. He was active in Venice between 1535 and 1559 but seems to have printed music for only a few months in 1536. In May 1536 he published a book of lute tablature (RISM 1536[11]) containing works by Francesco Canova da Milano. In the preface he stated his intention to publish the music of Adrian Willaert in separate books of masses, motets and madrigals. In a document of July 1536 recording the granting of a printing privilege to Marcolini in Venice, he claimed to have rediscovered the printing technique of Ottaviano Petrucci, that of using movable type with multiple impressions. Marcolini used this method in his collection of five imitation masses by Willaert, published in September 1536 (a complete copy is in *D-Mu*). The publication was dedicated to Duke Alessandro de' Medici and it seems that Pietro Aretino was involved in the probable support of the project by Alessandro. No other music publications by Marcolini survive.

DAVID KIDGER

Marcolini, Marietta (*b* Florence, *c*1780; *d* 1814 or later). Italian contralto. In 1800 she was singing at the Teatro S Benedetto, Venice; in 1803 she took part in the first performance of P.C. Guglielmi's *La serva bizzarra* at the Teatro Nuovo, Naples. In 1806 she sang at Livorno and Pisa, then at the Teatro Argentina, Rome, in the premières of Tritto's *Andromaca e Pirro* and Nicolini's *Traiano in Cacia* (1807). Marcolini made her début at La Scala in the first performances of Bigatti's *L'amante prigioniero* and of Ercole Paganini's *Le rivali generose* (1809). She created roles in five operas by Rossini: Ernestina in *L'equivoco stravagante* (1811) at Bologna; the title role of Ciro in *Babilonia* (1812) at Ferrara; Clarice in *La pietra del paragone* (1812) at La Scala; Isabella in *L'italiana in Algeri* (1813) at the Teatro S Benedetto; and the title role of *Sigismondo* (1814) at La Fenice, Venice. She was also a renowned exponent of Rossini's Tancredi.

ELIZABETH FORBES

Marcori [Marcuori], **Adamo** (*b* Arezzo, 1763; *d* Montenero, nr Livorno, 25 April 1808). Italian composer. His comic opera *La dispettosa in amore* (Giuseppe Palomba) was performed at the Teatro dei Fiorentini, Naples, in autumn 1791. He was *maestro di cappella* at S Maria della Pieve, Arezzo, by 1796 (according to the often unreliable Masseangeli, he was elected to this post on 22 March 1786). On 19 December 1799 he became *maestro di cappella* at Pisa Cathedral and remained there until his death. According to his obituary in the *Magasin encyclopédique* (1809, i, 135), Marcori's works, mostly sacred, were distinguished by 'a natural and expressive beauty', but marred by a careless disregard of the rules of harmony. The Pisa Cathedral archives formerly possessed a large amount of his music, including many masses, motets, psalms, five Lamentations, four responsories, two *Salve regina*, a *Stabat mater* for two voices and instruments, a *Te Deum* and several complete vespers. There now remain only an introit (*Miserebitur*) and a tract (*Discite a me*), both for four voices and instruments. The autograph of five antiphons for four voices and organ is in the Masseangeli collection (*I-Baf*).

FRANCO BAGGIANI

Marcos y Navas, Francisco (*fl* 1775–85). Spanish music theorist. He held the title of *psalmista* at the church of S Isidro in Madrid. His popular tutor *Arte, ó compendio general del canto-llano, figurado, y órgano*, appeared in several editions between 1777 and 1862. It was similar to the manuals of Montanos-Torres and Romero de Avila, covering both plainsong and mensural music, and containing instructional matter in dialogue form, the basic plainsong repertory and compositions by the author. The first two books are devoted entirely to plainchant, the third to the *canto figurado* or metrical chant used in Spain for the Office hymns, and illustrated by a series of mass Propers by the author. Book 4 discusses mensural polyphony and contains original two-part exercises in modern style. The final book contains the most distinctive material in the treatise: the Lamentations of Jeremiah in *canto melódico*, a melismatic embellishment of plainsong used in Toledo Cathedral and purportedly based on the Mozarabic tradition. The author gave a definition of *canto melódico* in the volume's dedication to Cardinal Lorenzana, the sponsor of a *Misa gótica* and *Breviarium góticum* intended to record the Mozarabic practice.

Marcucci, Ferdinand (*b* Florence, 6 May 1800; *d* Florence, 29 Dec 1871). Italian harpist and composer. He was the son of Curzio Marcucci (1775–1842), a harpist who taught Angelo Bovio, Tiberio Natalucci (1780–1835) and Filippo Scotti (1790–1865). After studying with his father he became solo harpist at the Pergola Theatre in Florence. He played in Paris in 1827 and through Rossini's influence accepted an appointment at the Théâtre Italien, but in 1835 returned to Florence and taught at the Accademia di Belle Arti. Marcucci is credited with founding the Florence school of the harp. Among his pupils were Maria V. Grossi, Giorgio Lorenzi, Rosalinda P. Sacconi and Creti de Rochis. He composed and transcribed works for the solo harp and in combination with other instruments.

Marcuori, Adamo. *See* MARCORI, ADAMO.

Marcus (*fl* ?1408). Composer, possibly active in Florence, who composed in French style. A textless three-voice rondeau is ascribed to him in *I-Fn* Pan. 26 (no.35), a piece added to the manuscript between 1400 and 1420. The next piece (no.36), headed by 'Do.', may also be by him: the three-voice *O lieta stella* in the form of a French ballade. He may be identifiable with a singer at S Reparata, Florence, in 1408.

KURT VON FISCHER/GIANLUCA D'AGOSTINO

Marcus, Adele (*b* Kansas City, MO, 22 Feb 1906; *d* New York, 3 May 1995). American pianist and teacher. After early training in Los Angeles, at the age of 15 she entered the Juilliard Graduate School, where she studied with Josef Lhévinne for four years. She made her début, as a winner of the Naumburg Prize, in New York in 1929; later she studied in Berlin with Schnabel. She taught at the Juilliard School for seven years as Lhévinne's assistant, and then as a faculty member from 1954 to 1990; among her outstanding pupils were Augustin Anievas, Horacio Gutiérrez and Byron Janis. Marcus performed both in recitals and as a soloist with orchestras throughout the USA and in Canada, Europe and Israel; she also gave masterclasses and lectures in the USA, and in 1980 established her own summer piano festival in Norway.

ELLEN HIGHSTEIN

Marcuse, Sibyl (*b* Frankfurt, 13 Feb 1911). American musicologist, of Swiss and English descent. She was educated at several European universities and from 1932 to 1935 lived in China. Following the outbreak of World War II, she emigrated to the USA, where she was naturalized in 1945. She studied at a school for piano technicians in New York and for several summers served as an apprentice to the harpsichord maker John Challis. In 1950 she established herself as a harpsichord and piano technician in New York. Although an autodidact in musicology, she soon gained a reputation as an organologist of encyclopedic knowledge. From 1953 to 1960 she served as curator of the Yale University Collection of Musical Instruments. After retiring, Marcuse published two comprehensive and complementary reference books: *Musical Instruments: a Comprehensive Dictionary* (1964/*R*), which defines and describes individual instruments, and *A Survey of Musical Instruments* (1975), a historical survey that deals with instruments by groups according to the standard Hornbostel-Sachs classification.

HOWARD SCHOTT

Marcussen. Danish firm of organ builders. It was founded in 1806 by Jürgen Marcussen (1781–1860); it operated under the name of Marcussen & Reuter from 1826 to 1848, when it became Marcussen & Søn. Johannes Lassen Zachariassen (1864–1922), a great grandson of the founder, was managing director from 1902 to 1922, and his son Sybrand (1900–60) from 1922 to 1960. Sybrand's son Sybrand Jürgen (*b* Flensburg, 22 Oct 1931) became director in 1960, and the latter's daughter Claudia Zachariassen (*b* Sønderborg, 26 May 1969) joined the firm in 1995. The firm is based in Åbenrå, southern Jutland, and has been active chiefly in Denmark, but it has also built in northern Germany, Sweden, Finland, the Netherlands, Great Britain, Japan and the USA. Among its important works are the organs in Christiansborg Slotskirche, Copenhagen (1829), the Nikolaikirche, Kiel (1842), Odense Domkirke (1862), St Nikolai Kirkesal, Copenhagen (1930), Oscars Kyrka, Stockholm (1949), Sibbo Kyrka (1951), Nicolaikerk, Utrecht (1957), Grundtvig Kirke, Copenhagen (1965), Viborg Domkirke (1966),

Neuer Dom, Linz (1968), Lübeck Dom (1970), Grote of St Laurenskerk, Rotterdam (1973), St Jacobs Kyrka, Stockholm (1977), St Nicolai Kirke, Kolding (1977), Vestervig Kirke (1978), Wichita State University (1986), Vor Frue Kirke, Copenhagen (1995), Tonbridge School Chapel, Kent (1995), and the Bridgewater Hall, Manchester (1996). The firm was one of the first, following the 1925 organ conference in Hamburg and Lübeck, to recognize the superiority of the sonic, structural and technical principles of the Baroque organ, and to return to them in its work.

HANS KLOTZ/OLE OLESEN

Mardones, José (*b* Fontecha, nr León, 14 Aug 1868; *d* Madrid, 4 May 1932). Spanish bass. He studied in Madrid, where he made his début in zarzuelas. In 1908 he joined the Lisbon S Carlos Opera and in 1909 made his North American début in *Aida* with the new Boston Opera. His best role in the most flourishing years of his career was Boito's Mefistofele, which he repeated at the Metropolitan in 1920. He had become leading bass there in 1917, remaining until 1926 and singing in the first performances there of *La forza del destino*, *Luisa Miller*, *Le roi de Lahore* and Spontini's *La vestale*. Returning to Spain, he resumed singing after an illness and made some fine recordings when nearly 60. His reputation was that of an indifferent actor with one of the most magnificent voices of the age. The voice is mightily impressive on recordings, which are also by no means wooden or characterless as interpretations. (*GV*; R. Celletti)

J.B. STEANE

Mardusari [Jaikem], **Nyai Tumenggung** [Bu Bèi, Nyi Bèi] (*b* Wonogiri, Java, 30 April 1909; *d* Surakarta, Java, 14 Sept 1993). Central Javanese PESINDHÈN (female singer with gamelan), dancer, teacher and batik designer. Called Jaikem as a child, she was brought by Prince Mangkunegara VII to his palace in Surakarta in about 1920 to study vocal music with Mas Ajeng Retnaningsih and dance with Radèn Ngabèi Harjosasmoyo, Radèn Ngabèi Atmosutagnyo and Radèn Ngabèi Atmosakseno. She married Mangkunegara VII in 1926. As an employee of the palace, she was granted the name Mardusari and a series of court titles, including Ngabèi (hence her nickname, Bu Bèi) and in 1987, Tumenggung. She taught and recorded at the Konservatori Karawitan Indonesia from 1950–61. In 1957 she established a music and dance school called Penyuarga (Penyuara Gamelan) with the help of two prominent musicians in Surakarta, Sutarman and Prawotosaputro. The leading singer and dancer in the Mangkunegaran palace, she was particularly acclaimed in the genres of *langen driyan* (all-female dance-opera), *temembangan* (classical sung poetry) and *wayang kulit* (shadow puppet theatre); she also composed her own vocal *cèngkok* (melodic patterns) and *wangsalan* (two-line vocal texts). Her vocal style was marked by intelligence, deep feeling and elegant simplicity. She made frequent broadcasts, also recording for Columbia (1928–37), the Mangkunegaran palace, Indra Foux and Lokananta (1957–8, 1975), Radio Republik Indonesia Surakarta, Kusuma Recording, Irama Jakarta (1958), UCLA (1957), Akademi Seni Karawitan Indonesia in Surakarta and the American Society for Eastern Arts in Berkeley, California, where she taught in 1974. The Indonesian government awarded her a prize for artistic creation and service to the arts from the Department of Hankam Kowilhan II in 1976 and the highest award for art, Piagam Wijayakusuma, in 1961.

SUSAN PRATT WALTON

Maréchal, Adolphe (Alphonse) (*b* Liège, 26 Sept 1867; *d* Brussels, 1 Feb 1935). Belgian tenor. He studied at the Liège Conservatory and made his début at Dijon in 1891. After singing for some years in provincial French houses he was engaged by the Opéra-Comique in 1895, where he sang in several premières, most notably those of *Louise* in 1900 and *Grisélidis* in 1901. This led to another important Massenet première, at Monte Carlo, where in 1902 he created the title role in *Le jongleur de Notre Dame*, playing 'his difficult role with infinite address and virtuosity', according to the *Journal de Monaco*. He made his Covent Garden début in 1902 as Don José, acting with 'marked and picturesque power' (*Musical Times*). He also appeared in *Faust*, *Manon* and the première, under Messager, of Herbert Bunning's *The Princess Osra*, with Mary Garden in the title role and the English libretto translated into French. He retired after a crisis of voice and health in 1907. Among his few and rare recordings is a solo from *Le jongleur* which shows a finely tutored voice and an eloquent style.

J.B. STEANE

Maréchal, (Charles) Henri (*b* Paris, 22 Jan 1842; *d* Paris, 12 May 1924). French composer. After first studying literature, he began his musical training in 1859 as a pupil of Chevé for solfège. Later he studied with Batiste (solfège), Laurent (harmony), Chollet (piano) and Massé (composition). Massé's appointment to the Paris Conservatoire in 1866 led Maréchal to enrol there; he continued with Massé and also studied counterpoint and fugue with Chauvet and the organ with Benoist. The following year he became chorus master of the Théâtre Lyrique and in 1870 shared the Prix de Rome (with Charles Edouard Lefebvre) for the cantata *Le jugement de Dieu*. He gained recognition with his *poème sacré La nativité* in 1875, and a year later established himself in the theatre, where his real ambitions lay, with *Les amoureux de Cathérine*. In the same year he wrote *La taverne des Trabans*, which was awarded the Monbinne prize but was not produced until 1881. His remaining works include six operas, a ballet (*Le lac des Aulnes*), incidental music, large-scale choral works, orchestral pieces (of which the symphonic poem *Antar* is best known), chamber music, several piano and organ works, and many songs. He published three

volumes of reminiscences which cover the period until 1874: *Rome: souvenirs d'un musicien* (1904), *Paris: souvenirs d'un musicien* (1907) and *Lettres et souvenirs* (1920), and wrote 'Souvenirs d'un musicien: Alexis Chauvet', published in *Le ménestrel* (12 Aug 1906), pp.245–6; repr. in *L'orgue: cahiers et mémoires*, no.46 (1991), 54–7).

JOHN TREVITT

Maréchal, Maurice (*b* Dijon, 3 Oct 1892; *d* Paris, 19 April 1964). French cellist. He studied at the Dijon Conservatoire and later with Jules Loeb at the Paris Conservatoire, graduating at 19 with a *premier prix*. In 1919, after his army service in World War I, he made his début with the Lamoureux Orchestra, which launched his solo career. He subsequently toured internationally, and in 1926 made a memorable appearance with the Philadelphia Orchestra under Stokowski. Maréchal's superb playing, combined with his interest in contemporary composition, made him one of the major influences on French music of his time. Ravel dedicated his Sonata for violin and cello to Maréchal, who gave the first performance with the violinist Hélène Jourdan-Morhange in 1922; other premières include André Caplet's *Epiphanie* (1923), Ibert's Cello Concerto (1925), Robert Casadesus' Introduction and Polonaise for Cello and Orchestra (1927), Honegger's Cello Concerto (1930) and Jean Françaix' Fantaisie (1934). A keen chamber music player, Maréchal was a member of the Fauré and Franck quartets, with Alfred Cortot and Jacques Thibaud, and from 1922 to 1927 he was cellist of the Casadesus Trio with Robert and Marius Casadesus. Maréchal's playing was once described as possessing 'ineffably beautiful tone, artistic fantasy and poetic penetration'. In later years he developed a muscular disease which affected his right arm, but as a teacher at the Paris Conservatoire (from 1942) he continued to be active until his death.

MARGARET CAMPBELL

Maregal. *See* MADRIGAL, §I.

Marek, Czesław (*b* Przemyśl, 16 Sept 1891; *d* 17 July 1985). Swiss composer, teacher and pianist of Polish birth. He studied in Lemberg (now L'viv) at the Łysenko Music Institute with Loewenhoff (piano) and Niewiadomski (harmony), in Vienna with Leschetizky (piano), Weigl (composition) and Adler (musicology), and in Strasbourg with Pfitzner. After a period as a professor at the Łysenko Music Institute he moved to Zürich in 1915; he remained there until his death in 1985, except for a short appointment as director and professor of composition at the Poznań Conservatory (1929–30). He took Swiss citizenship in 1932. Despite resistance from Swiss colleagues, Marek, without having any official appointment, developed a very successful career as a teacher of music theory, composition and piano until the very last years of his life. His pupils came from all over the world. From 1916 to 1926 he travelled as a pianist, performing in the main musical centres of Europe. In 1972 he published his internationally acknowledged *Lehre des Klavierspiels* (a shorter version was published 1961). Marek considered himself primarily as a composer, and characterized his own compositions as 'classically orientated late Romanticism'. In 1928 he received the Vienna Schubert Prize for his Sinfonia op.28. Other well-known works are the orchestral Suite op.25 and two song cycles composed on Polish folksongs.

KURT VON FISCHER

Marek, George R(ichard) (*b* Vienna, 13 July 1902; *d* New York, 7 Jan 1987). American writer on music, of Austrian birth. He studied at the University of Vienna from 1918 to 1920, when he emigrated to the USA. Beginning his

career as an advertising executive, he was later a vice-president and general manager for the record division of RCA Victor (1950–65), and he was music editor of *Good Housekeeping* (1941–57). He was particularly interested in popularizing music: he was responsible for the series of recordings *Classical Music for People who Hate Classical Music*, and wrote a number of popular biographies of composers and books on opera.

PAULA MORGAN

Marek z Płocka (*b* ?Płock; *fl* 1st half of the 16th century). Polish music theorist. He was educated at the monastery of St Mikołaj, Danzig [now Gdańsk], and was probably taught music by the organist Stanisław Krawczyk. In 1514 he entered a Dominican monastery in Kraków, becoming cantor there in 1517. Marek was probably associated with the Dominican theatre, which in 1518 staged the mystery play *Ścięcie Św. Jana Chrzciciela* ('The beheading of St John the Baptist'), containing an important song, *Pieśń Herodiady pląsającej* ('The song of Herodias dancing'). He also preached, and he took part in preparing evidence for the beatification of Jacek Odrowąż.

Marek's only extant work is his treatise *Hortulus musices*, written in 1518 (the extant manuscript of it, found in the Franciscan monastery at Wschowa, is probably a copy made in Silesia). The treatise is entirely about Gregorian chant, and is preceded by a lengthy introduction in which the author discussed the place of music in the system of *artes liberales*, as well as its definition and classification. The final chapter, 'De cantore', contains detailed instructions for cantors. In its content and treatment of material this treatise conforms with the usual 16th-century chant manuals.

ELŻBIETA WITKOWSKA-ZAREMBA

Marenco, Romualdo (*b* Novi Ligure, 1 March 1841; *d* Milan, 9 Oct 1907). Italian composer, conductor and violinist. He was a violinist and second bassoonist at the Teatro Andrea Doria in Genoa and then started his career as a composer by writing the music for a ballet there, *Lo sbarco di Garibaldi a Marsala*, and two symphonies. Dissatisfied with these early works, he studied counterpoint and composition briefly with Emilio Taddei, but left him to study on his own, using the methods of Fenaroli and Stanislao Mattei. After a period as a first violinist in various orchestras he became in 1873 deputy concert leader and director of ballet music for seven seasons at La Scala. There he won special fame as the musical collaborator with the most distinguished choreographer of the period, Luigi Manzotti, and others such as Ferdinando and Giovanni Pratesi. Manzotti was the master of the *ballo grande*, which treated allegorical and historical subjects of profound significance with huge casts and overwhelming spectacle. Beginning with *Sieba* (1878), the two continued with the celebrated *Excelsior* (1881), *Amor* (1886) and *Sport* (1897), in which Manzotti expressed clearly the yearning for progress and the humanitarian ideals of the age. These works were enthusiastically received at La Scala and throughout Europe; the most famous of them, *Excelsior*, a historical apotheosis of human civilization with a cast of 508, was given 103 times in its first year and in 1889 by the Scala company in Paris at the newly erected Eden-Théâtre. Marenco's music, if not of great originality, is well written, tuneful, inventive, dynamic in rhythm and carefully moulded to the choreographic action.

FRANCESCO BUSSI

Marenzio [Marentio], **Luca** (*b* Coccaglio, nr Brescia, 1553 or 1554; *d* Rome, 22 Aug 1599). Italian composer. He was one of the most prolific and wide-ranging madrigalists of the later 16th century, particularly notable for the detailed word-painting of his early works and the advanced harmonic expressiveness of his later ones.

1. Life. 2. Secular works. 3. Sacred works. 4. Reputation.

1. LIFE. The only evidence of Marenzio's date of birth is the statement made in 1588 by his father, a Brescian notary clerk, that his son Luca, a musician then in the service of the Grand Duke of Tuscany, was 35 years old. Guerrini has suggested that he was named after the saint whose feast falls on 18 October, which would give him a birthdate of 18 October 1553. Cozzando claimed that the family was 'of humble and poor condition', and that

Marenzio was instructed in 'letters and the acquisition of skills' by a local priest, Andrea Masetto. This latter testimony is doubtful, given that the Andrea Masetto to whom the posthumous *Sacrae cantiones* were dedicated was about nine years younger than Marenzio (Guerrini). Guerrini's statement that Marenzio was a chorister in Brescia Cathedral, where Giovanni Contino was the *maestro di cappella*, is without foundation. But Rossi's claim that Marenzio studied with Contino may well be true; Rossi, himself a Brescian who may well have known Marenzio, appears to be a reliable witness (Bizarrini, 71–2). Assuming Rossi is correct it is possible to postulate an early career for Marenzio that fits the few documented details. From about 1568 until his death (1574) Contino was in the service of the Gonzaga family at Mantua; Marenzio may have accompanied him then, since in 1586 he was quoted by Scipione Gonzaga to the effect that 'he remembers having already spent some years in the same service' (i.e. the Gonzaga family at Mantua). Either before or shortly after Contino's death Marenzio entered the service of Cardinal Cristoforo Madruzzo, probably on the recommendation of Contino, who had been Madruzzo's *maestro di cappella* for 12 years in Trent. In the 1570s Madruzzo had resigned his see in Trent and was living in Rome, where he continued to cultivate music. Marenzio remained in the cardinal's service until the latter's death in July 1578, and then transferred to the household of Madruzzo's close friend, Cardinal Luigi d'Este, where he remained until d'Este's death in 1586.

At the beginning of his service with Luigi, Marenzio was 25 years old and known primarily as a singer, although he had already published one madrigal (in RISM 1577[7]). He was also a lutenist and a noted expert on the instrument, as is made clear by the bass Cesare Brancaccio in a letter to Cardinal Luigi d'Este dated 26 February 1581 (Bizarrini, 40). During the eight years that he served the cardinal he became internationally known as a composer, producing many volumes of madrigals that were often reprinted in Italy and published in the north. On the title-page of his first book of madrigals for six voices (1581) he called himself the cardinal's *maestro di cappella*; although Engel maintained that the cardinal had no *cappella* and that Marenzio was the only musician in his service, the cardinal's account books reveal that he employed several others, including the organist Giulio Eremita, a French lutenist, various singers and a musician 'to teach the pages to sing'. In 1579 the cardinal tried to obtain a vacant position in the papal choir for Marenzio, but was prevented by Vatican politics.

Marenzio remained in Rome during his years with Luigi d'Este although he occasionally visited the cardinal's villa in Tivoli and once, from November 1580 to May 1581, visited Ferrara as part of the cardinal's suite. That was just after his first five-voice book had been published, and his next two volumes are dedicated to Duke Alfonso II d'Este and his sister Lucrezia, the Ferrarese relations of his patron. The pieces were probably composed at Ferrara and many were certainly sung during his visit there. Archival evidence suggests that during this visit he participated as a singer in the celebrations of the wedding of Vincenzo Gonzaga and Margherita Farnese (Bizarrini, 108–9). He returned to Rome in summer 1581 and remained there for the next five years. During this period he produced seven more books of madrigals, one of *madrigali spirituali*, one of motets and all five books of canzonets (the last two were not published until early 1587, immediately after the cardinal's death). He was also apparently in demand as a performer; when his services were sought for the Oratorio della SS Trinità for the Lenten season of 1583, the prothonotary requested him from the cardinal in the preceding December 'since so much time is necessary in order to forestall the diligence of others'. The confraternity's account books for 1583 are missing, but payments to Marenzio are recorded for the years 1584 and 1592. In 1595 he also provided the music for the Lenten services of the Arciconfraternita del SS Crocifisso (attached to the church of S Marcello).

Luigi d'Este's strong ties with France are reflected in the dedicatees of several of Marenzio's prints: the Cardinal of Guise (Luigi's nephew), Florimont de Hallwin, Marquis of Piennes and the French ambassador Jean de Vivonne. It was also Cardinal Luigi who encouraged Marenzio to dedicate his third book of madrigals for six voices to Bianca Cappello, the Grand Duchess of Tuscany (1585). At some time in 1583 the cardinal intended to send Marenzio as a gift to the King of France, a plan that seems to have been under consideration for some time, but that finally failed, much to Marenzio's relief. In the same year Duke Guglielmo Gonzaga of Mantua considered Marenzio for the post of his private *maestro di cappella* (not that of the church of S Barbara, as previously assumed) but because of Luigi's plans to send the composer to France he was deemed unavailable. Palestrina's remark at the time that Marenzio 'is no greater a man than Soriano' was designed to console the duke, and was not motivated by malice, bias or a low opinion of Marenzio's skills, as Einstein and Ledbetter have assumed (Bizarrini, 111–12).

Marenzio frequently had difficulty obtaining his salary and board payments from Luigi. On at least one occasion, in 1584, he wrote an intense and anguished letter to the cardinal begging to be paid, 'but in such a way that your order be effected, since other times also Your Lordship has ordered that I be satisfied, but (for what reason I do not know) nothing ever took place'. In 1586 and 1587 he was again considered for the post of *maestro di cappella* at the Mantuan court. There were lengthy negotiations, which broke down when the duke refused to meet Marenzio's demands over salary and other arrangements. By the time of the duke's death on 14 August 1587 these negotiations had been discontinued.

Meanwhile the death of Luigi d'Este on 30 December 1586 had left Marenzio without regular employment. His reluctance to accept the Duke of Mantua's offer, along with his reported remark that he was used to spending 200 scudi a year in Rome, suggests that he was much in demand as a freelance musician and that this informal employment provided an income that was more than adequate. In 1587 Marenzio visited Verona, where he attended sessions of the Accademia Filarmonica and became acquainted with Count Mario Bevilacqua, to whom he dedicated his *Madrigali a quattro, cinque e sei* (1588).

On 13 May 1587 Marenzio was still without a patron, but it is likely that he entered the service of Cardinal Ferdinando de Medici in Rome some time later that year. In a letter written some years later (1595), Ferdinando stated that Marenzio had been in his service 'for the duration of three years' (Kirkendale, 1993, p.245). Since we know that Marenzio was dismissed from the Florentine court on 30 October 1589, we may conclude that

Marenzio entered Ferdinando's service in 1587 and followed him to Florence that same year, when he became grand duke. Before Marenzio moved to Florence, he was also in touch with a close ally of Cardinal Ferdinando, Cardinal Alessandro Montalto, the nephew of Pope Sixtus V and a generous music patron.

Ferdinando may have engaged Marenzio primarily for the preparations of the wedding festivities of May 1589; if so, Marenzio was one of several musicians he took with him to Florence. These celebrations included the six brilliant *intermedi* to *La pellegrina*, of which Marenzio composed the music for the second and third. In Florence he met the grand duke's nephew Virginio Orsini, the Duke of Bracciano, who in 1589 married Flavia Peretti, the sister of Cardinal Montalto. After Marenzio had left Florence at the end of October 1589 he took up residence in the Orsini palace in Rome, where he signed the dedication of his *Quinto libro de madrigali a sei voci* on 1 January 1591.

In this period, it seems that Marenzio was less close to any single patron than in his earlier career and that he moved freely in several musical circles connected with the nobility and cardinals resident in Rome. He maintained connections with Virginio Orsini at least until 1595, although he had left his residence by 1593. In 1592 he was recommended for a post or temporary assignment in Cardinal Montalto's household, but – although Marenzio participated in at least one gathering in Montalto's palace by 1593 – he seems never to have had fixed employment with the cardinal. At about this time Marenzio entered the service of Cardinal Cinzio Aldobrandini, nephew of Pope Clement VIII (who had ascended the throne in 1590) and papal secretary of state. Although Marenzio had an apartment in the Vatican in 1594 he does not seem to have been a member of the papal choir, as Adami suggested. This impression may have originated from the obituary notice in the *Liber mortuorum* of San Lorenzo in Lucina which identifies the composer as 'Luca Marentio Cantore di N[ostro] Sig[no]re'. Such a title might suggest that he had been a papal singer, yet his death is not recorded in the diary of the papal chapel as was the custom when a singer died in office. However, the notice does suggest that Marenzio may have had some private function at the papal court.

Marenzio's high standing at the papal court is confirmed by the commission he received (21 December 1594) from Pope Clement VIII to take over the work that Palestrina and Zoilo had begun on revising the chant books. At the same time he was commissioned to write sacred music, the words of which were audible in accordance with the stipulations of the Council of Trent (Bizarrini, 219–20). Evidence of his fame outside Rome comes from Vicenza, where his name appears in a list dating from 1596 of members *in absentia* of the Accademia Olimpica. Further afield, a remarkable tribute came in the form of collected editions of Marenzio's madrigals by the Antwerp publishers Phalèse and Bellère (five-voice madrigals, 1593; six-voice madrigals, 1594). By this time a few of his madrigals had been published with English texts (RISM 1588[29], 1590[29]), and in 1597 Dowland could add to the cachet of his *First Book of Airs* by reproducing one of several letters he had received from Marenzio. In the summer of 1595 Marenzio agreed to meet Dowland in Rome. A letter from the Jesuit priest John Scudamore dated 7 June 1595 addressed to Nicola Fitherbert in Rome states that Dowland, who had reached Florence, had undertaken the journey expressly for the purpose of meeting Marenzio. On 10 November 1595, in a letter to Sir Robert Cecil, he reiterated his desire to study with Marenzio (Bizarrini, 198), but it is not known if the two men met.

In the summer of 1595 Marenzio was ordered by the pope and Cardinal Cinzio Aldobrandini to take over as *maestro di cappella* of the court of the Polish King Sigismund III following the death of Annibale Stabile. Marenzio and other musicians eventually departed for Warsaw some time between 19 August and 14 October. Peacham's remark that Marenzio went to Poland 'being in displeasure with the pope for overmuch familiarity with a kinswoman of his' is not corroborated by any other source. By March 1596 Marenzio had arrived in Poland and was certainly still there in September when he directed a *Te Deum* to celebrate the birth of a princess. On 6 and 13 October Marenzio directed a mass he had written in the form of an echo. Although this does not survive, there is other evidence of performances of his double-choir music in the form of three pieces which survive in the collection *Melodiae sacrae* (RISM 1604[2]). In addition, banquets provided suitable occasions for the performance of secular music.

By 20 October 1598 Marenzio had returned to Italy. On this date he signed the dedication of his *Ottavo libro de madrigali a cinque voci* to Don Ferrante Gonzaga in Venice. It was the second of three Gonzaga dedications in his later years. (The other two were *Il sesto libro de madrigali a sei voci*, to Margherita Gonzaga d'Este, Duchess of Ferrara, on 30 March 1595 and *Il nono libro de madrigali a cinque voci*, to Duke Vincenzo Gonzaga on 10 May 1599.) Nothing certain is known about Marenzio's movements between 20 October 1598 and his death. In Venice he may have met Cardinal Cinzio Aldobrandini and travelled with him to Milan, where the cardinal resided until December (Macy; Bizarrini). He may also have returned to the Medici fold, for it was at the Villa Medici in Rome that Marenzio died in the care of his brother. Early biographers suggest that the Polish climate ruined his health, a more likely explanation than Peacham's claim that the pope's displeasure caused his final illness. The *avvisi di Roma* carried the news of his death, which suggests that, outwardly at least, he was still in good standing at the papal court. He was buried in the church of S Lorenzo in Lucina 'not without grief from the musicians here [in Rome], who did him honour for his compositions'.

2. Secular works. Marenzio's reputation as a composer is based mainly on his secular works, particularly the madrigals, which occupied much of his attention throughout the two decades of his career. He showed a marked preference for a five-voice texture and produced ten books in this medium, including one of *madrigali spirituali*. His style shows an extraordinary range and endless variety, embracing the seriousness of Rore and the lightness of Andrea Gabrieli, often within a few bars. He treated his chosen poems as a series of short phrases, each providing the material for a single musical idea, and wherever possible he translated verbal imagery into musical symbolism: *Due rose fresche* sung by a duet; physical objects described by a melody tracing the outline of the object (e.g. 'l'arco' in *Scaldava il sol*); words like 'darkness' or 'colour' represented by note coloration; 'eyes' peering from the page in semibreves (e.g. *Occhi*

Luca Marenzio: portrait by an unknown artist (Kunsthistorisches Museum, Vienna)

lucenti); directions or spatial concepts suggested by melodic direction (e.g. 'paradiso' in *Madonna mia gentil*); and solmization puns using syllables abstracted from the poem (e.g. *Mi fa lasso languire* and *Se la mia vita*). In a different type of symbolism, more expressive in intent, affective words such as 'fear' or 'shame' are heightened by an anguished chromatic alteration. Such word-painting is a common feature of his style and has been much discussed, but he rarely allowed it to destroy the unity of a composition.

Not only individual words, but the rhetorical structure of entire sentences and poems is reflected in the music. Analogous or antithetical elements in the texts are all assigned equivalent musical characteristics. For example, the Petrarchan strophe which begins 'Nessun visse già mai di me più lieto, / Nessun vive più tristo e giorni e notti' contains a parallel verse structure connecting two contrasting statements. In Marenzio's setting the two statements are connected by analogous cycles of 5ths starting on the chord of A major and at the same time contrasted by fast and simple declamation giving way to a slower rhythm and suspensions. Tonal structure can likewise have a rhetorical function. The pitch of cadences and their relative weight are carefully chosen to reflect the status of the words within the syntactical hierarchy of the sentence. Thus commas and phrases are more likely to cadence on modally uncharacteristic pitches than full stops; in this way a hierarchy of tonal and pitch relationships is set up. More than any of his contemporaries, Marenzio exploited the shift from one modality to another to depict the meaning of the words or to effect a shift in mood or simply to create a tonal arch.

The pieces in the earliest madrigal books are generally in a pastoral mood, but the tone often suddenly turns serious. There is, moreover, a growing tendency towards seriousness throughout Marenzio's career, reflected in more sombre and intense texts set with richer harmonies, and a greater use of dissonance and chromaticism that approaches audacious extremes. Even in the earliest pieces a delight in sensuous harmonic brightness, using parallel 3rds, 6ths and 10ths, occasionally gives way to harmonic experimentation, the most extreme example of which occurs in *O voi che sospirate*, in which an enharmonic modulation depicts the words 'Muti una volta quel suo antico stil' ('once change [Death's] former style'; see ex.1). The vein of melancholy that runs through Marenzio's works from the beginning is typified by his occasional use of ₵ to indicate a steadier rhythmic pulse than the usual C. Many of the pieces affected are settings of stanzas from Petrarch's sestina *Mia benigna sorte e 'l viver lieto* or of Sannazaro, but a few are more modern madrigal texts (e.g. *Dolorosi martir*).

Both the melancholy tendency and the use of ₵ reach their climax in the *Madrigali a quattro, cinque e sei voci* (1588). In his dedicatory letter, addressed to the Veronese academician Count Mario Bevilacqua and dated 10 December 1587, Marenzio drew attention to the unusual nature of the collection: 'these madrigals which I recently composed in a manner very different from the past, having, both for the imitation of the words and the propriety of the style, arrived at a (so to say) sad gravity'. However, the collection represents not so much a shift in style as a concentration of one strand that was present in his music from the beginning. The collection was never reprinted, and Marenzio's style was to develop in a different direction.

In the later works, a more serious and passionate tone predominates. Engel argued that Marenzio must have been influenced by the Florentine Camerata, an idea that Einstein opposed on the grounds that so fully trained and professional a composer would have had little in common with such amateurs. But the stylistic currents that affected Florence – especially the Neapolitan singing style and monodic solo singing – would have been known to Marenzio in Rome, so the theory of Florentine influence is not so much wrong as unnecessary. From the time of his *Sesto libro de madrigali a cinque voci* (1594) Marenzio began to develop a declamatory style featuring a single soprano and two tenors as opposed to the dual soprano

Ex.1 *O voi che sospirate a miglior note* (II.5)

and single tenor found in many earlier works. This vocal line fluctuates in pitch and in speed in a way that captures the ebb and flow of impassioned speech, reminiscent of the delivery of an actor or solo singer. Dissonances are used with greater licence, in a manner resembling the *sprezzatura* of the first monodists.

Marenzio's stylistic change in the 1590s is paralleled by a change in literary sources. Whereas in his earlier works he preferred Petrarch, Sannazaro and the lyrical poems of Tasso and Guarini, in 1594 Marenzio started a vogue for setting passages from Guarini's controversial new *tragicomedia pastorale*, *Il pastor fido*. He also set several passages from an eclogue, possibly by Tasso, called *Il convito de' pastori*, whose plot resembles that of Guarini's drama. The third new favourite poet is Angelo Grillo, a monk who published sacred poetry in his own name and secular poetry under the pseudonym Livio Celiano. The overwrought, sentimental texts by 'Celiano' owe much to Tasso and Guarini and triggered some of Marenzio's most audacious harmonic experiments (e.g. *Care lagrime mie*).

The ninth and last book for five voices marks a return to a more contrapuntal style, while deliberately expanding on the harmonic asperities found in the immediately preceding books. Petrarch is back, and Dante is represented with the opening text, whose first line spells out Marenzio's intentions: 'Così nel mio parlar voglio esser aspro' ('And so in my diction I mean to be harsh'). Both this and *Crudele acerba* (a stanza from Petrarch's *Mia benigna fortuna*) are showcases of Marenzio's most dissonant manner (ex.2), while *Solo e pensoso* represents his most audacious and extended essay in linear chromaticism. Another important trend in the late compositions is the growing interest in cyclic composition, his sixth book for six voices (1595) consisting almost entirely of two large cycles, the sestina *Giovane donna* and the capitolo *Se quel dolor*.

The *Madrigali spirituali* belong stylistically with the secular works and differ mainly in the nature of their texts. Some are quasi-dramatic depictions of such events as the Annunciation (*Qual mormorio soave*) and others involve the anguish of a tormented soul, not unlike many of Petrarch's sonnets; in the sestina *Non fu mai cervo si veloce al corso* the poet cries out to God for aid, but his torment has clearly been caused by Cupid. Marenzio's three-voice villanellas and canzonettas were published in rapid succession between 1585 and 1587. All five books were prepared for publication by someone other than Marenzio (serious composers affected lack of interest in their productions of light music). They were evidently popular since they were frequently reprinted, and dedications of later volumes in the series refer to the speed with which the earlier ones had been taken up by musicians. In

Ex.2 *Crudele acerba inesorabil' morte* (IX.5)

these works Marenzio cultivated a certain artistic primitiveness, with frequent parallel 5ths and other normally forbidden procedures. Virtually all the works are strophic with the musical pattern *AABCC* for each strophe. Apart from *Donne il celeste lume*, for Cristoforo Castelletti's comedy *Le stravaganze d'amore* (March 1585), his only known works for theatrical performance are the two *intermedi* composed for the 1589 wedding celebration in Florence. Even this music does not survive complete; the depiction of Apollo's fight with the dragon was not published with the rest of the music (in RISM 1591[7]) and is now lost.

3. Sacred works. Marenzio's sacred works, fewer and less well known than his madrigals, comprise about 71 motets and four or five masses. The most outstanding quality of these works is their verbal imagery, often involving subtle religious symbolism; in this way they differ from the more restrained style of some composers in Roman circles, notably Palestrina and Victoria. Marenzio's choice of texts often reflects a preference for excerpts from psalms or vesper antiphons that afford opportunities for portraying a variety of moods and images.

The sacred music falls into three stylistic groups, which in general represent three stages of his career: the early collection of motets, published in 1616 but probably written between 1574 and 1580; the four-part motet book of 1585; and various motets and masses in manuscripts and in collections printed between 1592 and 1621. According to the preface, the early motets were composed 'in the flower of youth, during a return visit to [Marenzio's] homeland'. That may refer to a month's leave granted to him by Luigi d'Este in August 1580, but the word 'youth' suggests an earlier period, as does a certain prolixity in the formal design. There are lengthy points of imitation with repeated entries of voices and rather dense textures. The melodic lines are expansive, often melismatic and occasionally intensified by chromatically altered notes. Allusions to chant melodies occur most often in the motets with Marian texts. The pieces in the 1585 book, the only surviving volume of sacred music published during his lifetime, show a notable change in the conciseness of musical treatment accorded each line of text, and in the textural variety between successive sections. Here word-portrayal depends often on subtle rhythmic effects, such as the use of long repeated notes in the bass or rapid ascending melismas in the upper voices over sustained notes in the lower ones. Marenzio's other sacred works are almost entirely polychoral and can be divided into two categories. The first, settings of full liturgical texts (*Magnificat*, *Te Deum*, the masses etc.), are more broadly flowing, emphasizing segments of the text through contrasts of texture and (in many instances) the doubling of instruments. The second, settings of parts of psalms (*Deus venerunt gentes*, *Exsurgat Deus* etc.), afford an opportunity to represent images through madrigalesque rhythmic and melodic patterns or through the quick alternation of individual words and phrases between choirs.

4. Reputation. Six months after the death of Palestrina the *avvisi di Roma* (12 August 1595) referred to Marenzio as the 'foremost musician in Rome', and Cardinal Cinzio Aldobrandini in a letter to the King of Poland wrote that Marenzio was 'second to none in Italy' (Bizarrini,

208–10). Marenzio's pre-eminence in Italy, which remained unchallenged until Monteverdi was thrust into the limelight as a result of his controversy with Artusi (1600), is reflected by frequent representation in anthologies and by the number of reprints of his early books. His popularity abroad is reflected by the wide diffusion of his earlier madrigals in collections printed as far afield as Antwerp, Nuremberg and London. It was the early works rather than the serious and difficult ones of his last years on which his reputation was mainly based, and which continued to provide the image of his style. Morley praised Marenzio for his 'good ayre and fine invention', implying that his music is more pleasing to the ear than Alfonso Ferrabosco's 'deepe skill' (*A Plaine and Easie Introduction to Practicall Musicke*, 1597/*R*). The word 'ayre' was taken up by Peacham, while the Italian equivalent, 'aria', appears in the writings of Vincenzo Giustiniani (*Discorso sopra la musica*, MS, *c*1628) and G.B. Doni (*Lyra Barberina*, compiled 1632–5). The madrigals of Giovannelli and Marenzio impressed Giustiniani for their 'new air [nuova aria] pleasing to the ear, with easy points of imitation without extraordinary artifice'. Pietro della Valle singled out the much admired and imitated *Liquide perle* as an example of Marenzio's 'grazie' (*Della musica dell'età nostra*, 1640). Alessandro Guarini (*Il farnetico savio, overo Il Tasso*, 1610) described him as 'that musician who goes dispersing delight with his sweetness and lightness, determined above all not to offend the ear, but enticing it with exquisite sweetness', unlike Luzzaschi who 'does not fear harshness, does not fear bitterness, nor does he even shun dissonance contrary to a well formed style'. Although it was the madrigals of the 1580s that were most popular, there was nevertheless a marked appreciation of the more extraordinary ninth book of madrigals for five voices (1599), to judge from the number of its reprints and manuscript scores. Among connoisseurs the achievements of his late style were also recognized. In his division of the musical history into three periods Severo Bonini assigned the madrigals before 1587 to his second period and those after 1587 to the third, for their 'double conceits, dissonances skilfully contrived and resolved, and divine sweetness, [Marenzio] having used affects appropriate to the words' (*Discorsi e regoli sopra la musica*, MS, *c*1650).

Marenzio's posthumous reputation never faded entirely: in England, 17th-century textless viol transcriptions attest an appreciation of the purely musical properties of the madrigals, while a few madrigals were also sung by antiquarian and amateur groups in the 18th and 19th centuries. Marenzio studies received a boost at the time of the quatrocentenary of his birth, but only recently have printed scores of the later works become available, allowing a more balanced appraisal of his achievement.

STEVEN LEDBETTER/JAMES CHATER (1, 2, 4), ROLAND JACKSON (3)

Mareš, Jan Antonín [Maresch, Johann Anton] (*b* Chotěboř, Bohemia, 1719; *d* St Petersburg, 30 May/10 June 1794). Czech horn player, cellist and musical director active in Russia. He learnt music first at Chotěboř, later in Prague and in Dresden where he studied the horn with A.J. Hampel and the cello with Josef Zyka. After working as a music teacher in Berlin he was appointed in 1748 to the orchestra of the Russian grand chancellor, Count A.P. Bestuzhev-Ryumin, at St Petersburg as a horn player. Prince S.K. Narishkin, the master of the hunt to the Empress Elizabeth, entrusted Mareš in 1751 with the reorganization of his hunting band, and in 1757 he was appointed director of the imperial hunting band which he also reorganized. In addition he was a member of the imperial court orchestra from 12 April 1752 (until 1774 as a horn player and later as second cellist). After suffering a stroke in 1789 he retired in 1792.

In 1751 Mareš's hunting band consisted of a central group (12 french horns, two trumpets, two posthorns and two percussion instruments of his own invention) and an accompanying group of hunting horns (first of 16 horns, each playing one note of a D major chord, later of 24 horns encompassing two octaves in semitones). For training the serfs who made up the band he dispensed with staff notation and developed his own.

In 1752 Mareš established an independent group of single-note hunting horns, for which he wrote simple three-part compositions. The following year this group had grown to 36 horns of five sizes (bass, tenor, alto and two discants) spanning three octaves; the players stood in four ranks with the discants at the front. For this group Mareš supplied more challenging four-part compositions and arrangements of symphonies, overtures and arias (Vertkov, 1948; none of Mareš's compositions survives). In 1777 he added a tuning mechanism, a movable copper coupling attached at the bell to lengthen the horn and lower the pitch as much as three semitones; he also added a key which raised the pitch of the instrument one semitone, and occasionally had his players use more than one instrument, or produce higher overtones by overblowing. According to Fitzpatrick (1970) he anticipated Charles Clagget 'in the idea of combining two horns of different pitch by means of a common mouthpiece in order to facilitate a scale of open notes'. Mareš's ensemble even accompanied operas, employing leather-covered wooden horns and special muting devices.

Mareš's horn bands were models for similar groups founded throughout Russia, and 'Russian horn music' ('rogovaya muzïka'), as it became known, remained popular until the 1830s, some horn bands encompassing more than four octaves with 40 musicians playing up to 91 horns.

MILAN POŠTOLKA

Marescalchi, Luigi (*b* Bologna, 1 Feb 1745; *d* Marseilles, 1812). Italian music publisher and composer. About 1770 he began publishing in Venice and, probably in mid-1773, took the violinist and composer Carlo Canobbio (1741–1822) into partnership. Although the enterprise was temporarily abandoned about 1775, the brief period of its duration marked the revival of music publishing in Italy after 70 years of almost total inactivity. In Venice Marescalchi issued some 70 engraved publications, most in oblong format, evenly distributed between vocal pieces (mainly full scores and orchestral parts of single numbers from operas performed in Venice) and instrumental works (ballet, dance, chamber music and opera overtures). Anfossi, Boccherini, Naumann, Paisiello and Marescalchi himself were the composers of more than half of this output. In his Venice publications Marescalchi worked closely with Alessandri & Scattaglia, who were probably responsible for all his music engraving as well as being named on most of the title-pages as his selling agents, at their premises on the Rialto; one title-page also describes them as his printers, and this may have been another of their regular responsibilities. This connection between the two firms has often led cataloguers and bibliographers to ascribe to Alessandri & Scattaglia publications which should properly be regarded as Marescalchi's, with the result that numerous entries in RISM, the *British Union Catalogue* and other works of reference are incorrect.

In 1775 Marescalchi probably visited Lisbon for the revival of his opera *Il tutore ingannato*; during the next ten years he was not engaged in publishing and became more active as a composer (he had studied composition with Padre Martini). Three further operas were written, for Venice, Piacenza and Rome, and more than 30 ballets, mainly for Venice and Rome (most to the choreography of Onorato Viganò). On 15 November 1785 he obtained an exclusive royal licence for the printing of music in Naples, and, in partnership with his brother Francesco, he began to publish there in 1786. He established himself first in the new Palazzo in the strada di Chiaia beside the convent of S Orsola; he was still there late in 1789 but between then and the closing of his business in 1799 he moved to 32 Vicola della Campana, Largo di Castello. For about his first year in Naples he used as retailers the booksellers Antonio Hermil and Giuseppe Maria Porcelli; thereafter he opened his own shop, where he sold music and instruments as well as running a hire library and a

flourishing *copisteria*. His engraved publications of instrumental music included several works by Haydn and Pleyel and an early edition of Mozart's violin and viola duo K423, probably the first work by Mozart to be published in Italy. He published many operatic excerpts in full score, particularly of Bianchi, Cimarosa, P.A. Guglielmi and Paisiello; he also reprinted (as separate numbers) most of Sarti's *Giulio Sabino* from the plates of the Vienna first edition of about 1782 and issued a second edition of Millico's *La pietà d'amore*, his largest publication.

From about 1793 Marescalchi's output of printed editions appears to have diminished, but his exclusive licence was evidently renewed and up to January 1799 the librettos of operas given at the S Carlo and del Fondo theatres still announced that the music could be obtained from him. In June 1799 political rioters destroyed his house and printing works, and he was arrested on a trumped-up charge, imprisoned and shortly afterwards exiled; he went to live in Marseilles. It is possible that the destruction of his business was incited by Neapolitan music copyists, whose livelihood had been badly affected by the licence given him and who had long since petitioned unsuccessfully against it.

Marescalchi had a reputation for unscrupulousness. In common with many contemporary publishers he was frequently guilty of piracy (e.g. his unauthorized publication in 1786 of music from Paisiello's *Olimpiade*) but his reputation for forgery is probably unfounded. It is based on the accusation, repeated in several reference books, that he published works of his own composition under Boccherini's name (six trios for two violins and cello op.7, Gérard, 125–30). Not only are these now thought likely to be authentic works of Boccherini, but Marescalchi never himself published them: they came out in Paris and London only.

RICHARD MACNUTT

Maresch, Johann Anton. *See* MAREŠ, JAN ANTONÍN.

Mareschall [Mareschal; Marescallus], **Samuel** (*b* Tournai, May 1554; *d* Basle, ?Dec 1640). Swiss composer, writer on music, organist and teacher of Flemish birth. Due to the destruction of the Tournai archives his first appearance in documentary records is in Basle. He became organist at Basle Cathedral shortly after Gregor Meyer's death in November 1576, and in 1577 matriculated at Basle University. He was appointed the university's first *Professor musices* and also taught at the Gymnasium and Collegium Alumnorum, holding all four posts until his death at the age of 86. His marriage to the daughter of a Basle preacher, probably in 1578, produced 11 children, and numerous supplications to city authorities attest to his continual anxiety about income. In 1588/9 a curriculum for the re-founded Gymnasium was established, and in response Mareschall published his *Porta musices*, a short treatise and viol tutor. Mareschall's *musica practica* teaching included not only instruments and keyboards but also the singing of four-voice psalms in German and Latin. His *Melodiae Suaves et Concinnae Psalmorum* of 1622 offered a small selection of Latin psalms, to which he appended a brief *Musices rudimenta*.

Mareschall's harmonized German psalms, for which he is best known, appeared in two complete versions in small

choirbook format, both published in Basle in 1606. The 'French' melodies of the Genevan Psalter, set entirely in the highest voice for the first time, as Mareschall advertised and defended, were taken from Lobwasser's psalter; *Der gantz Psalter* initiated a trend for Lobwasser in northern Switzerland that accounted for more than 60 publications over the course of the century. Mareschall also set 'German' Lutheran melodies in cantional style in his *Psalmen Davids* (the earlier existence of this psalter-hymnal in a Leipzig print of 1594, or its identity with the composer's 'lost' Lobwasser psalter, is disputed). The combined volumes were reprinted in the 17th century and enjoyed popularity well into the 18th (editions appeared in 1704, 1717 and 1743), although a revised version had been issued in 1660 by Mareschall's successor, Johann Jakob Wolleb.

At the age of 84 Mareschall began work on four volumes of didactic keyboard music (*CH-Bu* F IX 47–50), primarily intabulating ornamented versions of his French psalm settings and the opening sections of polyphonic vocal works, mostly chansons by Lassus. These appear to have been prepared as a legacy for his friends or students of limited talent. The two largest (*Bu* F IX 48, 49), which also included three short fugues and prelude-like intonations and their transpositions on the 12 tones, were written in the last year of the composer's life with dedications to the Basle law professor Remigius Faesch. An earlier large collection of French and German psalm intabulations, together with the spitirual chanson *Susanne un jour*, was dedicated in 1593 to the Bohemian aristocrat Ladislav Velen de Zerotin (Velké Losiny, Castle Zerotin). These tablatures may offer a distant reflection of Mareschall's own presumably improvised solo and *alternatim* performances on the cathedral's famous instrument, the only major organ intact and in use in Reformation Switzerland.

Mareschall's music, destined as it was for non-professional use (students and congregations) is competent, with curious exceptions (perhaps arising from a written-out improvisational style), but not without interest. That the composer was admired during his lifetime is documented by the contemporary pastor Jakob Menzinger, who commented on the beauty and perfection of the music at the cathedral.

WORKS

VOCAL

Der gantz Psalter von Herrn Ambrosio Lobwasser D. hiebevor auss der Frantzösischen Composition, mit gleicher Melodey und zahl der Syllaben in teutsche Reymen zierlich und lieblich gebracht, 4vv (Basle, 1606) [bound with Psalmen Davids]; ed. in Kendall (1940)

Psalmen Davids, Kirchen Gesänge und geistliche Lieder von D. Martin Luther und andern gottsgelehrten Männer gestellet, 4vv (Basle, 1606) [bound with Der gantz Psalter]; ed. in Kendall (1940)

Melodiae suaves et concinnae psalmorum, 4vv . . . adjectae sunt in calce hujus libelli brevissima Musices rudimenta (Basle, 1622); ed. J.-M. Bonhôte (Brooklyn, NY, 1971), also ed. in Kendall (1940)

2 canons, 4, 5vv, Basle, 1578, Stadtmuseum, Cologne, HM 97/50; ed. in Drux and Niemöller, 29–30

KEYBOARD

158 intabulations: 124 French psalms, 33 German psalms and hymns, 1 chanson spirituelle, Basle, 1593, Velké Losiny, Castle Zerotin, ded. Ladislav Velen de Zerotin; see Kucerova (1984)

38 Psalmen Davids Lobwassers (37 Der gantz Psalter, 1606), Basle, 1638, *CH-Bu* F IX 47; ed. in Kendall (1940), some ed. in CEKM, xxvii (1967), some in R. Ischer, ed., *Samuel Mareschal: Les Psaumes ornementés pour clavier* (Fleurier, 1991–2)

89 intabulations (based on Der gantz Psalter, 1606), Basle, 1640, *Bu* F IX 48, ded. 'Remy Fesch'; ed. in Kendall (1940), some ed. in CEKM, xxvii (1967), some in R. Ischer, ed., *Samuel Mareschal Les Psaumes ornementés pour clavier* (Fleurier, 1991–2)

39 intabulations of opening sections of vocal works by Lassus, Hassler, Merulo and others, Basle, 1640, *Bu* F IX 49, ded. 'R. Faesch'; 22 also in *Bu* F IX 50, Basle, 1639; all ed. in Kendall, index and 4 works ed. in Merian (1927)

3 fugues, 2 dances, 12 intonations with transpositions (Die zwölff toni oder modi utraque scalae), Basle, 1640, *Bu* F IX 49; ed. in Kendall and in CEKM, xxvii (1967)

RAYMOND KENDALL/SARAH DAVIES

Marescotti, André-François (*b* Carouge, Geneva, 30 April 1902; *d* Geneva, 18 May 1995). Swiss composer. After technical and mathematical studies at the Technikum in Geneva he attended the Geneva Conservatoire, where he studied the piano with Alexandre Mottu, instrumentation with Joseph Lauber and composition with Henry Chaix. Later he became a composition pupil of Roger-Ducasse in Paris. He became choirmaster at Sacré-Coeur, Geneva, in 1924, professor of piano at the conservatory in 1931, and choirmaster at St Joseph in 1940. He was also active in a number of Swiss musical organizations. At first Marescotti was strongly influenced by Debussy, Ravel and especially Roussel. Later he became fascinated by the lightness and opportunities for humour offered by neo-classicism. *Fantasque* (1939), written for the Geneva International Music Competition, made Marescotti's name internationally known. In 1942 an encounter with Berg's *Wozzeck* plunged Marescotti into a creative crisis lasting seven years, during which time he devoted himself to studying the music of the Viennese School. From 1948 onwards Marescotti composed with freely atonal, dodecaphonic and later with serial methods. The emotionality of Expressionism, and above all the example of Alban Berg, continued to leave a mark on his work. In 1963 he was awarded the Composer's Prize of the city of Geneva, and in 1964 the prize of the Swiss Musicians' Association. Marescotti also wrote a manual of instrumentation entitled *Les instruments d'orchestre* (Paris, 1950).

WORKS
(*selective list*)

ROMAN BROTBECK

Marescotti [Mariscotti], **Giorgio** [Georges Marescot, Mareschot] (*d* Florence, April 1602). French bookseller and printer, active in Italy. Resident in Florence from the mid-1550s, on 7 April 1558 he matriculated in the *Arte dei medici e speziali* and became associated with Lorenzo Torrentino, the 'stampatore ducale'. By 1563 he was commissioning the Torrentino firm to print books on his behalf, and some time later he acquired the firm's equipment and stock. His production contains nothing of musical interest until Francesco Bocchi's *Discorso sopra la musica* (1580–81). Soon after, he completed Vincenzo Galilei's epochal *Dialogo della musica antica et della moderna* (1581/*R*), and in 1582 he published an anthology of three-part madrigals (RISM 1582[8]), in 1584 a volume of two-part pieces by Vincenzo Galilei, in 1585 a reprint of Arcadelt's *Il primo libro di madrigali a quattro voci*, and in 1596/7 Stefano Venturi del Nibbio's *Il terzo libro de madrigali a cinque*.

Marescotti was the first, and during his lifetime the only, music printer in Florence. His entry into the field was perhaps spurred by the vigorous experimentation in music going on there, and he became the first printer of opera and the new monody. In 1600–01 he printed the first opera scores, Caccini's *Euridice* (*see* ITALY, fig.6) and Peri's *Le musiche sopra l'Euridice*. In late 1601 or early 1602 the printing of Caccini's *Le nuove musiche* (for illustration *see* CACCINI and SINGING, fig.1) was begun 'appresso i Marescotti'; according to the colophon, it was completed in late June 1602 by 'the heirs of Giorgio Marescotti' who also issued Giovanni del Turco's *Il primo libro de madrigali a cinque* in July. Marescotti's music fount later appears in Antonio Brunelli's *Regole utilissime* printed in 1606 by a German printer working in Florence, Volcmar Timan. Giorgio Marescotti printed music only sporadically (of almost 300 titles, fewer than a dozen are devoted to music or music theory), in part because of the economic difficulties facing the printing industry in Tuscany. But his fine editions are not without distinction and interest. His usual printer's mark is a ship amid the waves, with the motto 'Et vult et potest'.

His eldest son and principal heir, Cristofano Marescotti (*b* *c*1580; *d* Sept 1611), took over the firm only after extensive litigation between members of the family on Giorgio's death. He began to sign his own name to publications in 1604 and continued to issue Florentine monody and other music to 1610 (eight music editions bearing his imprint survive, including volumes by Severo Bonini, Marco da Gagliano, Jacopo Peri and Francesco Rasi). His music fount differs from that of his father. In December 1611 the last Marescotti music publication, Piero Benedetti's *Musiche* for solo voice, was published by 'the heirs of Cristofano Marescotti'. Cristofano's widow, Margherita Pugliani, then joined with a new partner, Zanobi di Francesco Pignoni, who later (apparently by mid-1614) bought out the firm.

THOMAS W. BRIDGES/TIM CARTER

Maretzek, Max (*b* Brno, 28 June 1821; *d* New York, 14 May 1897). American conductor, impresario and composer of Czech birth. After working as a conductor and composer in central Europe and Paris he became chorus master at Covent Garden in 1844. In 1848 Edward Fry invited him to conduct Italian opera at the Astor Place Opera House in New York. In 1849 Maretzek began a career as impresario, initially with the Astor Place company, conducting and managing companies in New York (principally at the Academy of Music), and touring the USA, Cuba and Mexico. He managed to engage excellent singers and conducted the American premières of *La traviata* (1856) and *Don Carlos* (1877). His managerial policies helped to establish continuing popular support for opera in New York. In 1878 Maretzek retired from management, though he continued to conduct and teach. He composed an opera, *Sleepy Hollow, or The Headless Horseman* (1879), and wrote two volumes of reminiscences: *Crotchets and Quavers* (New York, 1855) and *Sharps and Flats* (New York, 1890), both reprinted in 1968 as *Revelations of an Opera Manager in 19th Century America*.

WILLIAM BROOKS

Marez Oyens, Tera de [née Wansink] (*b* Velsen, 5 Aug 1932; *d* Hilversum, 29 Aug 1996). Dutch composer. She graduated from the Amsterdam Conservatory in 1953, where she studied piano with Jan Odé. After graduation she studied composition and orchestration privately for two years with Henkemans. Her earliest compositions included religious works, such as choral songs and psalm settings. Raising her four children stimulated her to write educational works and children's operas, such as *Partita for David* (1960) and *Adventures in Music* (1970), both

for school orchestras, and the opera *Van de vos Reynaerde* (1966). She was firmly convinced that acquainting children at an early age with contemporary music would develop their appreciation for this type of music. In 1978 she wrote a manual for school teachers, *Werken met moderne klanken*, a progressive series of short vocal or instrumental, mainly graphically notated, études. Her own workshops on contemporary music, which she continued to present throughout her career, proved her to be a talented teacher. In the 1960s she became interested in electronic music and studied with Gottfried M. Koenig at the Institute for Sonology in Utrecht. Many of her works show that she was often inspired by text. She also explored the sounds of words, stripped of meaning. In the choral work *Bist du bist II* (1973), which uses both graphic and exact notation, only four German words are heard in dramatic, emotional eruptions: 'da', 'der', 'du' and 'bist'. A number of later compositions, such as *Litany of the Victims of War* (1985) and *Sinfonia testimonial* (1987), the latter based on texts by the Chilean writer Ariel Dorfman and the Mexican Rosario Castellanos, express her deep concern with human suffering. She also composed several large-scale dramatic works to texts by her second husband, the political scientist and philosopher Menachem Arnoni, including an oratorio, *The Odyssey of Mr Good-Evil* (1981). In most of her music the texture is spare. Short rapid motifs are repeated in ascending or descending direction in assymetrical patterns. This style effectively highlights the texts in *Vignettes* (1986), seven short haiku-like poems she wrote herself and set for soprano, flute, percussion and piano. From the early 1980s until her death she was involved in the women's movement in music, often representing Dutch women composers at international congresses. She also performed her own works for piano, and conducted amateur and professional choirs and orchestras on an incidental basis. Throughout her life she lectured internationally on music education, group improvisation and the role of women in music, and wrote articles on these subjects. From 1978 to 1988 she taught at the Zwolle Conservatory. She was a prolific composer with an output of over 200 works. Many of her compositions were commissioned by the Dutch Ministry of Culture and various broadcasting networks. In 1995 she was commissioned to write *Unison* for the 50th anniversary of the United Nations. A few months before her death she married Marten Toonder, a renown Dutch writer and cartoonist.

WORKS

HELEN METZELAAR

Margaret of Austria. Patron of music, member of the HABSBURG family.

Margiono, Charlotte (*b* Amsterdam, 24 March 1955). Dutch soprano. After studying with Aafje Heynis at the Arnhem Conservatory, she sang a delightful Mařenka in Kupfer's staging of *The Bartered Bride* at the Komische Oper in 1985, then was admired as Susanna in Berne in 1988, Vitellia (*La clemenza di Tito*) at the Aix Festival the same year and Amelia (*Simon Boccanegra*) with the Netherlands Opera in 1989. She gained international recognition when she undertook Fiordiligi in Jürgen Flimm's arresting production of *Così fan tutte* at Amsterdam in 1990 with Harnoncourt conducting (also recorded), and the same year won plaudits for her Agathe at Amsterdam and her Vitellia with Gardiner at the Holland Festival; she was also praised in the latter role at the Salzburg Festival in 1991 with Colin Davis. Her other Mozart parts include Countess Almaviva (sung at Aix, 1991, and recorded with Harnoncourt), Donna Elvira (recorded with Gardiner) and Pamina. In 1995 she sang Agathe at the Maggio Musicale in Florence, conducted by Sawallisch, and the following year appeared as Desdemona in Amsterdam. In 1999 she added to her repertory Marguerite in a concert performance of *La damnation de Faust* with Haitink in Amsterdam. Margiono is a noted concert singer, especially in the *Missa solemnis*; her recording of the work with Gardiner discloses the lyrical warmth and refined style of her approach. She also gives recitals, often with the mezzo-soprano Birgit Remmert.

ALAN BLYTH

Margola, Franco (*b* Orzinuovi, Brescia, 30 Oct 1908; *d* Nave, nr Brescia, 9 March 1992). Italian composer. He studied the violin at the Brescia Istituto Musicale with Romano Romanini (diploma 1926), and composition at the Parma Conservatory with Guido Guerrini, Carlo Jachino and Achille Longo (diploma 1933). In 1930 he won the Camerata Musicale Napoletana prize with *Il campiello delle streghe*. He taught history of music at the Brescia Istituto Musicale (1936–9) and composition at

the conservatories in Cagliari (1941–9), Bologna (1950–52), Milan (1952–7), Parma (1963–75) and at the Accademia di S Cecilia in Rome (1957–9). He was director of the Messina Liceo Musicale (1939–41) and the Cagliari Conservatory (1960–63).

From the Casella-influenced neo-classicism of his early works, with their linear idiom and calm, unproblematic sound world (e.g. the Trio in A and the String Quartets nos.4 and 5), Margola turned in the postwar years to a free use of 12-note technique. His music retained an unmistakable diatonic imprint and an exemplary expressive simplicity, seen particularly in pieces like the two *Kinderkonzerte*.

WORKS
(*selective list*)

STAGE

Il mito di Caino (1, E. Ziletti), Bergamo, delle Novità, 29 Sept 1940
Il navigatore assurdo (ballet), *c*1949
Il segno sulla fronte (op), 1960–73

VIRGILIO BERNARDONI

Margono bin Sitar (*b* Mlilir, Mediun, East Java, 1920). Javanese gamelan and *kethoprak* (folk theatre) performer, *dalang* (shadow puppeteer) and gamelan maker, active in Malaysia. He came to Malaysia at the age of 22 during World War II. After the Japanese surrender in 1945, Margono was interned by the British and transferred to a Dutch army camp in Sungei Besi with other Javanese war detainees; here he was made to perform *kethoprak* (Javanese folk theatre), *wayang wong* (dance drama) and Javanese gamelan. He escaped from the detention camp and took refuge in Batu Pahat, Johor. Here Margono became well known for his ability as a *dalang* (shadow puppeteer) of *wayang kulit purwa* (Javanese shadow play) (particularly for his skills in *sabetan*, puppet manipulation), as a *kethoprak* performer, and as a gamelan musician. He made his first set of gamelan instruments from iron plates and steel drums in 1954 for a *ludruk* (East Javanese folk theatre) company in his village. Since then he has become the only person in Malaysia known for his skills in making gamelan idiophones from iron. Many of his iron gamelan are made for schools, colleges and cultural organizations. He has received several awards for his commitment to promoting gamelan music in Malaysia.

MOHD. ANIS MD NOR

Mari, Elvira. *See* CASAZZA, ELVIRA.

Maria Antonia Walpurgis, Electress of Saxony (*b* Munich, 18 July 1724; *d* Dresden, 23 April 1780). German princess, composer, singer and patron. The eldest daughter of the Elector Karl Albert of Bavaria (later Emperor Karl VII) and of Archduchess Maria Amalia of Austria, she received her first musical training in Munich from Giovanni Ferrandini and Giovanni Porta. After her marriage in 1747 to Friedrich Christian, later Elector of Saxony, she continued her studies in Dresden with Nicola Porpora and J.A. Hasse. With the Seven Years War and the death of the elector in 1763 the cultural life at the Dresden court declined. Her lively exchange of letters with Frederick the Great of Prussia from 1763 to 1779 bears witness to her increasing sense of personal and artistic isolation; the musical ideals she had grown up with as a pupil and devotee of Hasse and a correspondent of Pietro Metastasio lost their validity, and new music, in particular the new Neapolitan operatic style, found no favour with her.

Maria Antonia Walpurgis was also a patron of the painter Raphael Mengs, the composers Hasse, Porpora and J.G. Naumann and the singers Regina Mingotti and Gertrud Mara (the latter making her début in Maria Antonia's *Talestri* in 1767), and was herself an active participant in the arts. She frequently performed at court as a singer or keyboard player; Burney warmly praised her singing. She took leading roles in court performances of her own operas – *Il trionfo della fedeltà* (summer 1754, Dresden) and *Talestri, regina delle amazzoni* (6 February 1760, Munich, Nymphenburg) – both to her own texts. They were published by Breitkopf, performed in other European capitals and translated into several languages. Their texts are clearly modelled on Metastasio (who made alterations to *Trionfo*), and their music on Hasse, who may have had a hand in the composition of *Trionfo*. The published score of *Trionfo* included her self-portrait,

engraved by Giuseppe Canale, on the title-page. Many other compositions in manuscript in Dresden bear her name, but cannot be authenticated; in many cases her name merely indicates ownership. Among the compositions attributed to her are arias, a pastorale, intermezzos, meditations and motets. She wrote the texts of Hasse's oratorio *La conversione di Sant'Agostino* and several cantatas, and her poems were set to music by Hasse, Naumann, G.B. Ferrandini and Gennaro Manna, among others. Antonio Eximeno's *Dell'origine e delle regole della musica* (Rome, 1774) was dedicated to her and included her portrait. A manuscript thematic catalogue of her library (compiled *c*1750–90) is in the Bayerische Staatsbibliothek, Munich.

GERHARD ALLROGGEN

Mariachi. Ensemble of guitars, *guitarrón* (bass guitar), diatonic harp, violins and trumpet, originating in western Mexico. Few dispute that the ensemble originated in Jalisco, western Mexico; however the *Documento de Rosamorda* (1852) refers to a *mariachi* ensemble in Nayarit. The term is not derived (as has been suggested) from the French 'mariage'; rather it comes from native languages of western Mexico (Náhuatl and Coca language groups) where the term refers to a social event involving dancers performing on a wooden platform. An equivalent Spanish term is *fandango*.

Mariachi orchestration in western Mexico has changed as repertories have undergone modernization. This process has made clear the existence of two main types: traditional *mariachi* with string instruments, and modern *mariachi* with the inclusion of the trumpet. Along with this, there has been a history of substitution of instruments in the traditional ensemble. The older Jalisco *mariachi* was basically a string ensemble. Mendoza (1956) contains illustrations of this early orchestration, with one *guitarrón* (bass guitar with five or six strings and wide convex back) and two *jarana* (flat-back five-string guitar) in an ensemble from Cocula, Jalisco. Indeed, the *guitarrón* itself had replaced the diatonic harp of 28 to 36 strings. In Cocula and certain other neighbouring towns there was a *mariachi* ensemble featuring *arpon grande de la sierra* (harp with 40 strings), vihuela (five-string guitar with convex back), *guitarra de golpe* (flat-back five-string guitar, also called *jarana*) and two violins. The modern orchestration of the Jalisco ensemble includes one or two B♭ trumpets, one *guitarrón* and one or two guitars. Before the advent of the six-string guitar, a *guitarra quinta* (five-string guitar) was used with one or two vihuelas and three or more violins. Currently there are only a few *mariachi* groups that include the diatonic harp; in the few that do include it, the harp is for visual ornamentation rather than having an important musical role, as the sound is less audible owing to the inclusion of trumpets and the multiplication of the numbers of violins and strumming guitars. In the older orchestration, the harp was balanced by only one or two guitars and one or two violins.

There are several references to the presence of the trumpet in Jalisco *mariachi* ensembles, but no shared opinion regarding who was responsible for its inclusion. According to local history, the first *mariachi* ensembles that migrated to Mexico City in the 1930s were from Cocula, and these included both the trumpet and woodwind instruments. Rafael (1982, pp.124–5) mentions the cases of the Mariachi Reyes and Concho Andrade ensembles (the latter named after a well-known *guitarrón* player) both of which came from Cocula and included one cornet (*piston*) and one clarinet. Another version of events suggests that the Silvestre Vargas Mariachi from Tecalitlón was the first to include trumpet in the ensemble. However Juregui (1990) believes that the inclusion of trumpet was the idea of Amilio Azcraga, founder of XEW radio station in Mexico City. All versions agree that the instrument was included because of its powerful and higher pitch, which was ideal for radio broadcasts.

The trumpet gave the *mariachi* ensemble a new image, and it was subsequently hired for stage performances and spectaculars. Stanford (1984) mentions that his informants from Tuxpan, Jalisco, recall the presence of trumpets in *mariachi* ensembles from the 1930s, at the time when *mariachi* music began to be promoted in Mexican films and on radio. Stanford stresses the devastating effect the inclusion of the trumpet initially had on traditional ensembles, particularly in causing the role of the violin to atrophy. According to Stanford, the violin players in the first modern *mariachi* groups (after the inclusion of the trumpet) subsequently viewed their instrument as less important, and began to play out of tune and with less care. In small *mariachi* ensembles, the violin was retained only to complete the overall visual image. Stanford describes *mariachi* with trumpet and multiple violins (incorporated to balance the trumpet, but unfortunately obscuring other instruments) as *orquestra de mariachi*.

Stanford (1984) stresses the diatonic harp as the basic chordophone of old-style *mariachi*. Its presence is documented from the 16th century, although Bravo (1974) suggests that the harp came from a similar string ensemble known in the 17th century as 'Venetian orchestra', and comprising various types of vihuela, guitars, psaltery and chitarrone. The diatonic harp was not common in older *mariachi* ensembles from Los Altos or central Jalisco, but was the main instrument in *mariachi* ensembles from southern Jalisco. Indeed, the sound of the harp characterized music from coastal and lower lands in Jalisco, Colima and Michoacán; the best-known *arperos* (diatonic harp players) from western Mexico since the mid-20th century have come from Michoacán.

In the evolution of the *mariachi* ensemble, the diatonic harp was replaced by the *guitarrón*. Formerly, its strings were made of animal intestine, but are now made of plastic or metal. The most common form of *guitarrón* is tuned *a–d–g–c–e–a* and is descended from the archlute.

Stanford has noted that it was formerly rare to find both *guitarrón* and diatonic harp playing in the same ensemble; where it was found, the *guitarrón* reinforced the weak sound of the lower strings of the harp. The large size of the diatonic harp and the difficulty of accommodating it in early vehicles may be one of the reasons for its replacement by the *guitarrón*. Before the arrival of the automobile, the harp was transported from village to village by rail, or by mules and horses following *caminos de arriera* (field tracks). Indeed, the *caminos de arriera* were the routes for 'walking mariachis', who followed in the steps of muleteers: Juregui (1990) cites the 1852 *Documento*, found in Nayarit, which refers to *fandangos* (dance and music gatherings) featuring walking *mariachi* ensembles.

The inclusion of the guitar in the ensemble is described by Stanford as a replacement for the vihuela, although this instrument has also remained in the ensemble. The Mexican vihuela bears some similarities to the Spanish *vihuela de mano*. The five-string Mexican version is tuned *a–d–g–b–e* and has a convex back. Older *mariachi* ensembles from southern Jalisco also included *guitarra de golpe* (*jarana*); however this instrument has disappeared from the modern ensemble.

Another type of characteristic *mariachi* from Los Altos and Zacatecas was the *mariachi con tambora* (with bass drum) or *tambora ranchera* (guitar, violins, vihuela, *guitarrón*, snare drum and bass drum). In the opinion of several writers from Los Altos, the inclusion of the bass drum (an indigenous instrument) designates this ensemble as an indigenous *mariachi*. Currently there are few *mariachi* with *tambora*, although several exist in certain areas of Jalisco.

ARTURO CHAMORRO

Maria Laach. Benedictine abbey near Koblenz on the Laacher See, Germany. Its Romanesque church, built between 1092 and 1220, towers over the monastery. From the time it was founded by Count Palatine Heinrich II the monastery was inhabited by monks without a break until its dissolution in 1802, after which the church and the library were plundered for their treasures. The monastery then changed hands several times: from 1862 to 1873 it belonged to the Jesuits and from 1892 it was again inhabited by monks from the Benedictine community of Beuron. In the ensuing period the monastery became one of the first and most important centres for the revival of Gregorian chant in the Rhineland. In 1910 a double organ, divided between the west gallery and the west transept, was installed in the church. It contained 66 stops and was built by Stahlhut of Aachen; in 1956 it was enlarged to 78 stops and was one of the first organs with fully electric transmission to have sliderless wind-chests. There are plans to bring together the two parts of this organ in the west gallery, and to install a new choir organ (Klais/Bonn) on the west wall of the south transept. Since the time of Ildefons Herwegen (abbot 1913–46), Maria Laach has provided a great stimulus for liturgical revival and for the appreciation of Gregorian chant. The *Jahrbuch für Liturgiewissenschaft*, produced by the abbey and published from 1921 in Münster and from 1950 as *Archiv für Liturgiewissenschaft* (published in Regensburg), contains up-to-date information on Gregorian studies; Urbanus Bomm was appointed compiler in 1927. The abbey's chanting tends towards the Benedictine style as developed at Solesmes but with its own characteristic tone-quality and interpretation; the neumatic notation is taken as an indication for artistic shaping. The cantors of the abbey have been Gregor Böckeler (until 1922), Ambrosius Stock (until 1932), Urbanus Bomm (until 1968) and Willibrord Heckenbach (1968–), who in 1972 also became the editor for German-speaking countries of the periodical *Musica sacra*, the journal of the Allgemeiner Deutscher Cäcilienverein, and in 1984 began to teach Gregorian chant at the Staatliche Hochschule für Musik in Cologne. The organist and monk Anselm Ross, who was active in Laach between 1931 and 1963, was well known as an organist and teacher. Regular concerts of church music in the abbey church attract visitors from all over the Rhineland.

Manuscripts of musicological interest from the abbey include a sacramentary (*c*1150, now *D-DS* LB891) containing 15 prefaces, two Sanctus incipits, two melodies for the Lord's Prayer and ten intonations for the Gloria in Lorraine notation on uncoloured lines; a 12th- and 13th-century manuscript in several parts (formerly Berlin lat.qu. 106, now *D-Tu* Rose 955), which was a guide for cantors and which contains information for the establishment of the calendar, the *Musica* of Wilhelm of Hirsau (*d* 1091) and that of his pupil Theogerus of Metz (*d* 1120); a tonary and formulae for the psalm tones, and a didactic poem with 12 strophes arranged in pairs and set to neumes; and a sacramentary (now *GB-Lbl* Harl.2835) belonging to Johann Augustin Machhausen (abbot 1552–68) containing, in Gothic notation, altar chants that include five intonations for the Gloria preceded by the ends of the corresponding Kyries, probably indicating performance without organ. Machhausen's *Rituale monasticae hyparchiae coenobii Lacensis* (*D-BNu* S354) lays down the orders of service.

HEINZ ANTON HÖHNEN

Mariana, Juan de (*b* Talavera, 1536; *d* Toledo, 16 Feb 1623). Spanish historian and social philosopher. He studied at the University of Alcalá de Henares, became a Jesuit at the age of 18 and taught in Rome, Sicily and Paris. In 1574 he returned to the Jesuit house at Toledo, remaining there for the rest of his life in scholarly activity. He is best known for his history of Spain (*Historiae de rebus Hispaniae*), which he published in 1592 and subsequently enlarged and translated into Spanish. His writings concerning music occur in two lesser works, one dealing with rulers (*De rege et regis institutione*, Toledo, 1599; ed. L. Sánchez Agesta, Madrid, 1981), and the other condemning the popular entertainments of his time (originally published at Cologne in 1609 with the title 'De spectaculis' as the third section of his *Tractatus VII*; later translated by the author as 'Tratado contra los juegos publicos'). In the former work he elaborated on the classical concept of the moderating influence of music and discussed in detail the place it should occupy in the life of a prince. In the latter he condemned as lascivious the popular and theatrical music of his time; his description – among the first – of the saraband, which he stated to be a recent Spanish invention, is of particular interest.

ALMONTE HOWELL

Mariana Islands. *See* MICRONESIA, §IV.

Marian antiphon. *See* ANTIPHON, §5(v).

Mariani, Angelo (Maurizio Gaspare) (*b* Ravenna, 11 Oct 1821; *d* Genoa, 13 June 1873). Italian conductor and composer. At the Accademia Filarmonica in Ravenna he studied the violin under Pietro Casalini and Giovanni Nostini, and counterpoint under the cathedral organist, Gerolamo Roberti. In 1842 he was appointed bandmaster at Sant'Agata Feltria and was soon playing the violin and viola in the orchestras of Rimini and Macerata, where he attracted the attention of Rossini with two of his own overtures and a concerto. In 1843 he was teacher and orchestral director to the Philharmonic Society of Faenza, and in June 1844 he directed a brief season of opera at Trent, interrupting a period of study in composition at Bologna undertaken on Rossini's advice. Over the next two years he was concert director and conductor at Messina, where, by his own account, his attempts to enforce discipline among the players were resented as coming from a 'too young foreigner'. After two visits to Naples, where he met with encouragement from Mercadante, Mariani moved in 1846 to Milan, where his performance on 1 July at the Teatro Re of *I due Foscari* so delighted Verdi that he hoped to engage Mariani for *Macbeth* in Florence; but his financial terms proved too high. In August at the Teatro Carcano he was much applauded for his playing of the concertante violin solo in *I Lombardi alla prima crociata* (at the time operas in Italy were still directed by the orchestral leader working from a cued violin part). In 1847 Mariani was threatened with imprisonment by the Austrian authorities for having given too rebellious an expression to *Nabucco*. In November he left to conduct a season at Copenhagen, which was cut short by the death of Christian VIII, for whom he composed a Requiem. Offered the post of director of the royal chapel, Copenhagen, he chose instead to return to Italy to volunteer for military service during the uprising of 1848, though whether he took part in the fighting remains uncertain. In September of that year he accepted an engagement as musical director of the new Italian theatre at Constantinople. There he remained for two years, composing a number of salon pieces, two dramatic cantatas and a new Turkish national anthem, until ill-health drove him back to Italy. After further spells at Naples and Messina, by now fully appreciative of his gifts, in 1852 he obtained the post of resident conductor at the Teatro Carlo Fenice, Genoa on the recommendation of Saverio Mercadante, which he retained until his death, though with freedom to conduct elsewhere, notably Bologna, whose autumn season was entrusted to him regularly from 1860 onwards.

Mariani's association with Verdi began with the première of *Aroldo* at Rimini in 1857, after which a warm friendship developed between the two men. Over the next 12 years Mariani devoted himself to Verdi's service, whether in musical or domestic matters (he was responsible for procuring the composer's winter residence in Genoa). His performance of *Don Carlo* at Bologna in 1867 won golden opinions from critics and public alike. However, Mariani's failure to act on Ricordi's instruction urging the Bologna authorities to sanction the performance of the composite Mass (Verdi's own idea) designed to mark the anniversary of Rossini's death in 1868 marked the beginning of friction between the two men. The subsequent hostility of Verdi's agent Mauro Corticelli, and the singer Teresa Stolz, for a while Mariani's fiancée but by now an intimate of the Verdi household, aggravated the situation even further. In 1871 Mariani offered to conduct the première of *Aida* at Cairo, but Verdi decided to send someone else. When the chosen conductor proved unavailable, Verdi turned to Mariani, who, by now broken in health, dithered and finally declined. The two men never spoke again. Meanwhile, Mariani covered himself with glory with the Italian première of *Lohengrin* at Bologna (1 November 1871), the first Wagner opera to be heard south of the Alps. *Tannhäuser* followed (11 November 1872), after which Mariani returned to Genoa, where after prolonged suffering he died of intestinal cancer.

Alongside Michele Costa and Luigi Arditi, active only abroad, and Giovanni Bottesini and Carlo Pedrotti, Mariani was one of the first Italian conductors in the modern sense of the word, uniting the two functions of *maestro concertatore* (often the composer himself), who rehearsed the singers at the piano, and the *primo violino*, who set the tempo of each number with his bow arm before joining in the performance. In total command of every musical and stage aspect, he was able to present each work as a unified conception. Letters from Meyerbeer, Mercadante, Rossini and Wagner bear witness to his extraordinary skill in communication. Nor was his activity confined to opera. In 1853 he gave Genoa its first taste of Beethoven's 'Eroica', dismissed by the local critic with the one word, 'difficult'. His numerous compositions are eclectic in style, occasionally experimental, but otherwise unremarkable.

WORKS

published in Milan unless otherwise stated

VOCAL

Cants.: Matilde, o La fidanzata del guerriero, S, vv, orch, *I-Mr**, vs (?1850); Gli esuli, unpubd; L'addio, S, vv, orch, Genoa, Carlo Felice, for marriage of Maria Pia of Savoy, 28 Sept 1862 (Turin, 1862)

Songs: La rimembranza, romanza (?1846); Il giglio: canto d'un orfana, romanza (?1846); Il giovane accatone, romanza (?1847); Passata, presente e futuro, romanza (?1849); Inno nazionale turco (?1850); Rimembranze del Bosforo, 6 songs (?1852); Il trovatore nella Liguria, 8 songs (?1855); Liete e triste rimembranze, 5 songs (?1856); Album, 7 songs, 1 duet (?1856); 22 melodie italiane (London, ?1859) [incl. many of the preceding]; La rosa felsinea, 8 songs (?1864); Il colle di Carignano, 8 songs (?1871); Care memorie della Liguria, 5 songs, 1 duet (?1872); Ad un fiume, romanza (London, 1877); La lira, in *Anacreonte odi tradotte da Andrea Maffei* (?1877); Chiamatelo destino, romanza (?1878)

Sacred: Requiem, unpubd; Salve regina, T, vv, org (?1856); Alma Redemptoris mater, S/T, hmn/org/pf (?1857); Mag, SATB, orch, unpubd; other works, lost

INSTRUMENTAL

Orch: Sym., B♭, unpubd, *FZc*; Sym., B♭, lost; Sym., c, unpubd, *Gl*; L'appassionata, waltz, arr. pf (?1863)

Chbr: Fantasia, bn, pf (?1846); Una notte sul Bosforo, vc, pf (?1850); Rimembranze di Arenzano, 4 pensieri romantici, vc, pf (?1857)

Pf: Baby-polka, 4 hands (?1850); Rimembranze del Bosforo: Ottavia, polka-mazurka, 4 hands (?1851); Rimembranze del Bosforo: Virginia, polka-mazurka, 4 hands (?1851); 4 pensieri a guisa di polka-mazurka (?1853); A lei, pensiero melancolico (?1856)

Mariani, Enrico. The name under which JAMES HENRY MAPLESON sang at Lodi and Verona.

Mariani, Giovanni Lorenzo (*b* Lucca, bap. 17 Oct 1722; *d* Genoa, 20 March 1793). Italian composer. He studied with Padre Martini in Bologna (1746–53) and became a member of the local Accademia Filarmonica in 1751. In December 1753 he started working for Franceso Maria della Rovere as *maestro di cappella* of Savona Cathedral. Unsatisfied with his position, in 1779 he applied for the post of *maestro di cappella* of Milan Cathedral, a position awarded to Giuseppe Sarti after a controversial competition. He remained at Savona until 1792, then moved to Genoa, where he died the following year. Erudite and also talented in poetry, he was admitted to the *Colonia degli Arcadi Sabazi* of Savona in 1754 under the name 'Mirtindo Acrejo'. Apart from composing cantatas for the annual Arcadian *accademie* (now lost), he wrote almost exclusively sacred music, especially for eight voices. His extant works (mostly preserved in *I-Bc*, *Rsc*, *SAa*, *Md*, *Baf* and the Archivio Chiesa N.S. del Rimedio, Genoa) include liturgical pieces, motets and masses (one a coronation Mass for doge M.A. Cambiaso, ed. G.E. Cortese, Genoa, 1997). Mariani corresponded with Padre Martini (letters in *I-Bc*, *Bsf*) and Giovenale Sacchi, and his pupils included Luigi Lamberti and Francesco Gnecco.

MAURIZIO TARRINI

Maribor. Slovenian town, under Austrian rule until 1919. Records of church music go back to the 13th century. In the late 16th century, when many musicians left the Slovenian region, among them was the Maribor native Daniel Lagkhner. Music of the Baroque period and later is held in the archives of the Catholic diocese and of the main parish church, the latter including manuscripts of the composer Valentin Lechner, who worked in Maribor between 1800 and 1805. There is documentary evidence of professional musicians playing at social gatherings from the Baroque era onwards. Subsequent musical institutions included the Casinoverein (1823), the Musikverein (1825), which had a music school, and the Männergesangverein, which branched off from the Musikverein in 1846 and continued to exist for another 90 years. Liszt played in the knights' hall of Count Brandis's castle on 16 June 1846, and Wolf was at the Gymnasium during the years 1873–5.

The Slovenksa Čitalnica (1861) provided a centre for Slovenian culture up to the outbreak of World War I, during which period the development of Slovenian music was fostered by the Ceciljansko Društvo (Cecilian Society), Slovensko Bralno in Pevsko Društvo (Slovenian Reading and Singing Society) and Katoliško Pevsko Društvo (Catholic Singing Society). The association Glasbena Matica (1919–41) presided over the golden years of Slovenian music in Maribor; it had a mixed choir, a symphony orchestra and a conservatory (later two), and provided a forum for some of the most highly regarded Slovenian composers in roles as conductors, teachers or critics. Slavko Osterc began his musical training in Maribor as a pupil of Emerik Beran, and composed his first pieces there.

In 1946 the Koncertna Poslovalnica (Concert Agency) took control. Demetrij Žebre, the first postwar conductor of the opera, formed his players into the Maribor PO (1952–65), which was refounded in 1993 to give about eight concerts a year. A junior conservatory (now the Srednja Glasbena Šola Maribor, or School of Music and Ballet) was founded in 1945, and in 1964 a department of music education was instituted at the Academy of Education; this department was transferred to the university in 1987.

MANICA ŠPENDAL

Marić, Ljubica (*b* Kragujevac, 18 March 1909). Serbian composer. She studied composition with Slavenski at the Stanković Music School, Belgrade, and with Suk at the Prague Conservatory, where she also attended Alois Hába's classes in quarter-tone music and the conducting

classes of Method Doležil and Nikolay Malko. She later returned to Belgrade as a professor at the Stanković School and as a teacher of theory at the Academy of Music; in 1963 she was elected a member of the Serbian Academy of Arts and Sciences.

Marić's early compositions boldly explored atonality, athematicism and quarter-tone music and were well received at festivals in Amsterdam and Strasbourg (1933). Her affinity with Serbian medieval culture, which she expressed in a personal and contemporary manner, enriched her mature style of the 1950s. The novel combination of old and new is best exemplified in her much-acclaimed cantata *Pesme prostora* ('Songs of Space', 1956), based on inscriptions from Bogumil tombstones. Many of her orchestral and chamber works were inspired by the melodic principles of the *oktōēchos*, the ancient cycle of Orthodox liturgical music that acted on her as a kind of 'ancestral memory' and provided a tonal basis for her music.

WORKS
(*selective list*)

Oktōēchos cycle: Muzika oktoiha, 1, orch, 1958; Vizantijski koncert [Byzantine Conc.], pf, orch, 1959; Prag sna [The Threshold of Dreams] (cant.), 2vv, reciter, chbr orch, 1961; Ostinato super tema octoicha, hp, pf, str, 1963

MELITA MILIN

Marie, Jean-Etienne (*b* Pont-l'Evêque, 22 Nov 1917; *d* Nice, 25 Dec 1989). French composer. After studying business and theology, he became a student of Messiaen and Milhaud at the Paris Conservatoire (1946–9). A radio producer with RTF (1949–75), he founded the Cercle Culturel du Conservatoire de Paris (1947), the Schola Cantorum experimental music course (1959–71), the Centre International de Recherche Musicales (1968), the Semaines de Musique Contemporaine d'Orléans (1968) and the Musiques Actuelles Nice Côte d'Azur (MANCA) festival (1979). From 1970 to 1975 he taught at the University of Paris, where he completed the doctorate in 1978. He was made an Officier des Arts et des Lettres in 1985. In his works he employed a multiplicity of autonomous, antagonistic and co-existing time structures, from the most advanced mathematical formalizations to the freest improvisations. His experimental compositions combine orchestral or solo instrumental forces and electronics (*Milieu divin*, 1969), link audiovisual research to spatialized performance (*BSN 240*, 1969) and associate the use of microtonal instruments with pre-recorded and mixed temperaments (*Tombeau de Julian Carrillo*, 1966). His interest in microtones led him to develop synthesizers (Oberheim, EMS) with potentiometers allowing for regulation of the variability of microtones and the plurality of micro-temperaments.

PASCALE CRITON

Marié de l'Isle, Célestine. *See* GALLI-MARIÉ, CÉLESTINE.

Marien, Ambrosio (*b* Artois; *d* in or after 1584). French composer active in Italy. An Italian madrigal by him was published in the second book of five-voice madrigals by Pietro Vinci (RISM 1567[24]), a Sicilian who he claimed was his teacher. His own books of madrigals, *Primo libro de madrigali* (Venice, 1580) and *Secondo libro de madrigali* (Venice, 1584[9]), both for four voices, are dedicated to members of the noble Gesualdo family, and the dedications suggest that he was employed by the family in Naples when the volumes were published. The

madrigals are attractive and facile, with a hint of harmonic colouring in works such as *Anima bella* from the second book, but they lack the rhythmic interest, textural contrasts and chromatic movement traditionally associated with Neapolitan composers of the following decades.

GLENN WATKINS/CLYTUS GOTTWALD

Marienklage (Ger.: 'Mary's lament'; Lat. *planctus Mariae*). A unique form of medieval Passion play, in which the 'Complaint of Mary' at the foot of the cross was the central action. It was especially popular in Germany – hence the adoption of the modern German term in literature on the subject – and, in simpler forms, in Italy.

For further information and bibliography *see* MEDIEVAL DRAMA, §III, 2(i); *see also* PLANCTUS.

Marien Trompet (Ger.). *See* TRUMPET MARINE.

Mariétan, Pierre (*b* Monthey, 23 Sept 1935). Swiss composer and conductor. He studied with Marescotti and others at the Geneva Conservatory (1955–60) and, from 1960 to 1963, with Zimmermann (composition) and Koenig (electronic music) in Cologne at the Staatliche Hochschule für Musik and the Hochschule für Musik der Stadt Köln. He also attended the Darmstadt summer courses (1960–61) and the classes given by Boulez and Stockhausen at the Basle Academy of Music (1961–3). In the mid-1960s he worked in the electronic music studios of WDR and held scholarships to the Cologne Courses for New Music (1963–6), directed by Stockhausen and Pousseur. During this period he appeared in most western European countries as a conductor of contemporary music. In Paris in 1966 he founded an instrumental ensemble the Groupe d'Etude et de Réalisation Musicales (GERM). From 1972 to 1977 he directed the Garges-lès-Gonesse Conservatory. He has also taught at the Universities of Paris I and VIII (1969–88), and has lectured on acoustics at the Ecole d'Architecture, La Villette.

The decisive influence on Mariétan's early work was serialism, the music of Boulez especially. In the 1960s he turned to composing sketch-scores and guidelines for improvisation, some of the former being intended for amateurs and children. Since the 1970s he has been principally concerned with combining composed music, what he calls 'music of the interior', with everyday environmental sounds, 'music of the exterior'. This preoccupation has led him to electronic and radiophonic composition – *Paysmusique* brings together the sounds of 96 voices speaking in different Swiss dialects – as well as to the creation, sometimes in collaboration with architects, of sound installations and sound environments. His acoustical studies of 'rumblings', low-frequency sounds in urban areas, have fed into a number of works, notably *Le bruit court*.

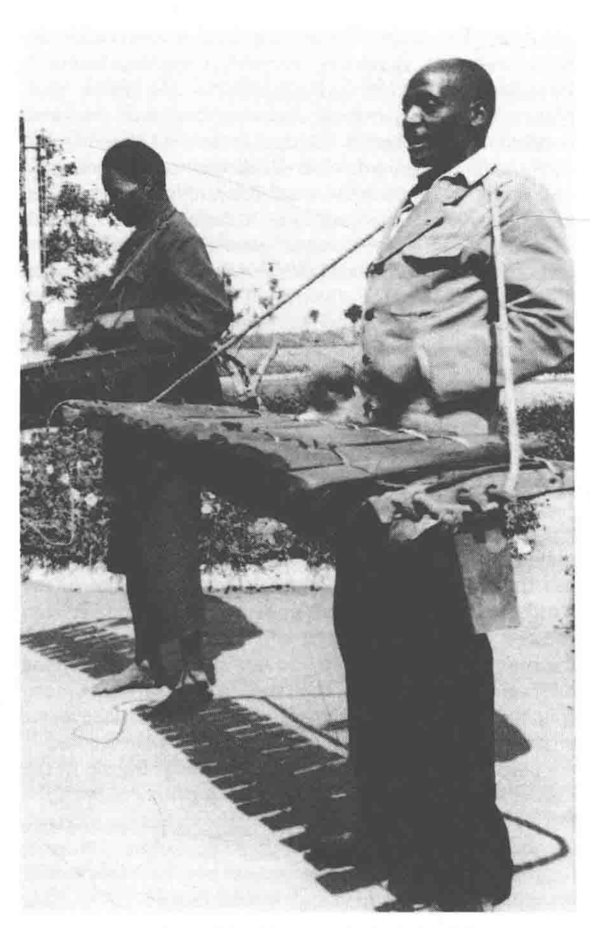
FRITZ MUGGLER/R

Marigalis. *See* MADRIGAL.



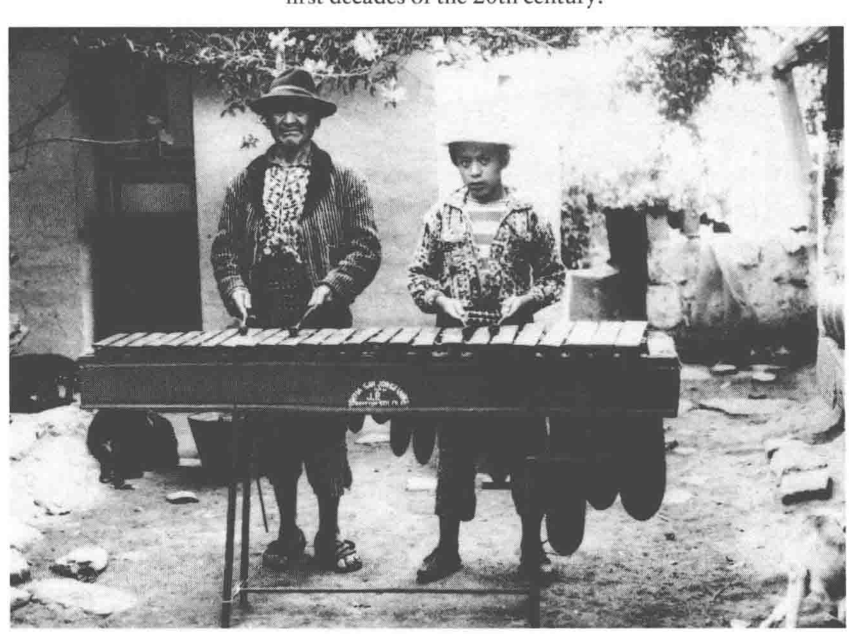
Mariinsky Theatre. *See* ST PETERSBURG, §2(ii).

Marimba. Term for a group of idiophones, some of which are plucked (lamellophones) and some of which are struck (xylophones). In parts of eastern and southern Africa, it may denote either type of instrument. In Latin America, it is mostly used for the calabash-resonated xylophone introduced from Africa, but in 19th-century Brazil it also applied to calabash-resonated lamellophones of African origin, and in Colombia it is used generically to denote any melodic instruments other than aerophones (see List, 1968). The name is now almost universally applied to the commercially manufactured, fully resonated orchestral xylophone developed from Latin American models. For full classification details, *see* IDIOPHONE; for marimba lamellophones, *see* LAMELLOPHONE, §2(i). *See also* XYLOPHONE, §§3 and 5 and VIBRAPHONE.

1. Africa and Latin America. 2. The modern orchestral marimba.

1. AFRICA AND LATIN AMERICA. Trough-resonated xylophones are called *marimba* among the Zaramo on the Tanzanian coast near Dar es Salaam (Hyslop, 1974), as are similar instruments recorded by Hugh Tracey in Zanzibar. Lamellophones, which were a 19th-century import into central Tanzania from the Congo through the Bagamoyo–Kijiji caravan trade route, came to be called *marimba madogo* ('small xylophone(s)') in Kiswahili.

The term *marimba* (fig.1) is composed of the word stem *-rimba* (or *-limba*) and the prefix *ma-*, expressing an accumulation of objects. Accordingly, the stem alone,



1. Marimbas (timbila) of the Chopi people, Quissico, Inhambane district, Mozambique

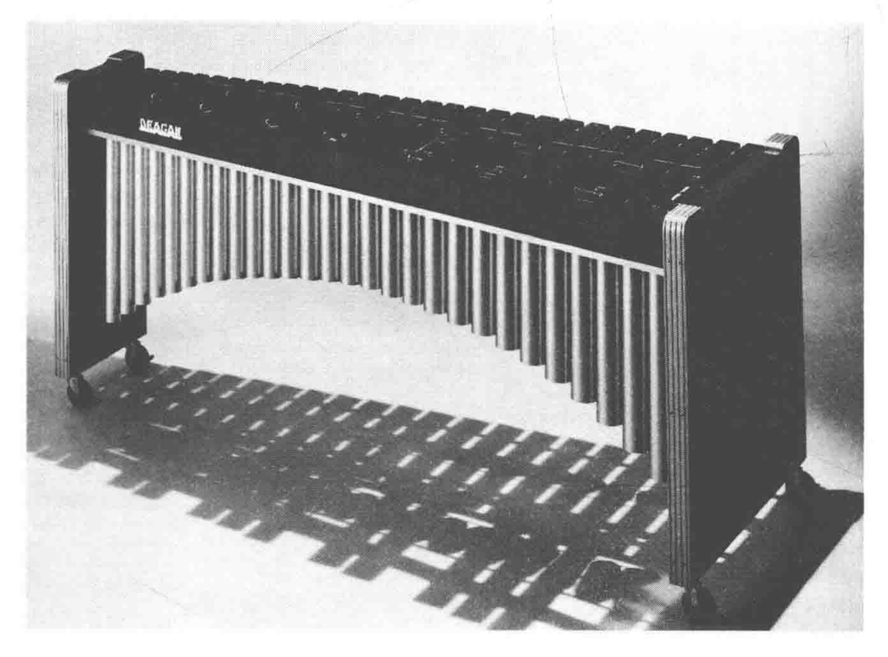
limba, is used in southern Malawi, eastern Zambia and parts of central Mozambique to denote a single-note xylophone. In the Zambezi valley, large lamellophones with up to 36 notes, played by Phodzo (Podzo), Dzimba and other musicians, are often called *malimba* ('l' and 'r' are one phoneme in many Bantu languages and are therefore interchangeable). The geographical distribution of the word stems *-rimba* and *-limba* with a variety of prefixes covers most of South-east Africa, with extensions into southern Tanzania and northern Angola, where xylophones are called *madimba* among the Mbondo of Malanji province.

In the 16th and 17th centuries Portuguese travellers, traders and administrators adopted the term from Bantu language speakers in South-east Africa and introduced it in their territories, notably in Brazil, where slaves recruited from South-east and Central African areas began to reconstruct musical instruments from their home countries. On his journey to northern Brazil in 1783 to 1792, Alexandre Rodrigues Ferreira reported a 16-note lamellophone, found with a slave who most certainly came from south-western Angola, under the designation 'marimba, instrumento que tocão os Prétos'. The same term has survived until today for a gourd-resonated xylophone used at Bairro de São Francisco, Municipio de São Sebastião, in the State of São Paulo (Setti, 1994).

With the reconstruction of Central African and South-east African xylophone models by slaves in various New World places, the term *marimba* became a generic label for such instruments in New World countries, such as Colombia, Ecuador, Guatemala (fig.2) and Panama, continuing long after these instruments had migrated into Amerindian cultures, notably in Guatemala, Nicaragua and other countries of Central America. In Cuba, xylophones did not establish a foothold, but a large box-resonated lamellophone was developed, most probably from (smaller) eastern Nigerian and southern Cameroonian models. A new term, *marimbula*, emerged through addition of the (Spanish) suffix *-ula*, and these lamellophones rapidly spread across the Caribbean during the first decades of the 20th century.

2. Marimba de tecomates of the Cakchiguel-Maya of San Jorge la Laguna, Guatemala

With the original meanings of the word *marimba* now largely forgotten in New World places, the name came to be used in the 20th century for other New World instruments of African origin as well. In Colombia, George List (1966) reported the application of the name *marimba* in particular for a type of mouth-bow that clearly has roots in the Bight of Biafra (an area extending from eastern Nigeria to Gabon).



During the first half of the 20th century, European musicologists used the term *marimba* as a general name for African and New World gourd- or bamboo-tube resonated xylophones but never for lamellophones, which they incorrectly called '*sanza*'. Later research has clarified the term's etymology, its geographical distribution in Africa and the history of its introduction into Central and South America.

2. THE MODERN ORCHESTRAL MARIMBA. The manufacture of the modern marimba (fig.3) as used in the orchestra began in the USA in 1910, the earliest experiments being made by J.C. Deagan and U.G. Leedy. Stopped metal tubes graduated in length served as resonators, and for very deep notes were made U-shaped. A vibrating membrane (mirliton) feature, which is found on some African and Latin American instruments, was used in certain early models (e.g. the *nadimba*). Later experiments included the *octarimba* (obsolete) in which two narrow bars an octave apart in pitch were arranged side by side, the octaves being struck simultaneously by fork beaters. The marimba became a popular instrument in vaudeville and light ensembles. It was considerably enhanced by Clair Omar Musser, virtuoso and composer, who gave a memorable concert with his 100-piece marimba band in 1935 at Carnegie Hall in New York.

With the exception of Percy Grainger, who scored for the marimba and *nadimba* in the suite *In a Nutshell* (1916), serious composers neglected the marimba until after World War II. Milhaud's Concerto for marimba and vibraphone (1947), in which the technique of four-hammer playing was exploited, was one of the first postwar compositions to make extensive use of the marimba. The instrument is being increasingly used in the large orchestra. It occurs in Richard Rodney Bennett's First Symphony (1965), K.A. Hartmann's Eighth Symphony (1960–62; which includes cadenzas for two marimbas), Messiaen's *Chronochromie* (1959–60) and Carl Orff's *Antigonae* (1941–9). Concertos for marimba and orchestra have been written by several composers, including Robert Kurka, James Basta and Paul Creston. Composers who have written music for solo marimba include Mitchell Peters (*Yellow After the Sun*), Gordon Stout (*Two Mexican Dances*, 1977), Paul Smadbeck (*Rhythm Song*, 1991), Keiko Abe (*Michi*, 1979, *Variations on Japanese Childrens' Songs*) and Minoru Miki (*Marimba Supirichuaru*, 1989).

The last quarter of the 20th century saw the development of a vastly enlarged repertory involving the adoption of revolutionary new playing techniques and various improvements to the marimba including the adoption of a greater range. The original four-mallet technique for bar percussion instruments was designed to facilitate the playing of chords. The 'traditional grip', as it is known, has the shafts of the mallets crossed in the palm of the hand, with the outside shaft under the inside and between the first and second fingers, and the inside mallet under the thumb, and the thumb and first finger controlling the interval that is played. The 'traditional grip' has given way to: (1) the 'Burton grip' (after the jazz vibraphone virtuoso Gary Burton), in which the shafts are crossed in the palm of the hand with the outside shaft on top of the inside, and the grip has an axle pivot principal with the third and fourth fingers controlling the size of the interval; (2) the 'Musser' grip (named after Clair Omar Musser), in which the mallets are not crossed but the inside mallet is controlled by the first and second fingers, the outside by the third and fourth fingers; and (3) a variant of the latter developed by the marimba virtuoso Leigh Howard Stevens, which he describes as a 'child of Musser grip'.

Marimbas today are found in a variety of sizes. The standard 'concert grand' of four and a third octaves is still available, but new solo marimba repertory requires

3. Modern four-octave orchestral marimba by J.C. Deagan, Chicago

instruments of five octaves, *C–c''''*. Hard mallets should not be used, particularly on the lower register, as they will easily crack the bars and in any case rob the instrument of its characteristic mellow tone quality. Music for the instrument is written (at actual pitch) in treble or bass clef, or sometimes on a double staff. The so-called 'steel marimba', manufactured from 1916 by the Leedy Drum Co., is in fact a vibraphone. An instrument that combines characteristics of both xylophone and marimba is variously called xylo-marimba, marimba-xylophone and XYLORIMBA.

HARRY PARTCH constructed five tuned idiophones, four of which form a family based on the traditional marimba principle: the Diamond Marimba (1946), the Quadrangularis Reversum (1965), the Bass Marimba (1950, revised 1960), and the Marimba Eroica (1951 and 1954). (For further details, see *GroveI*, 'Marimba', §3; R. Roberts.)

Marimbaphone. An obsolete metallophone in the form of a steel marimba introduced about 1920 by J.C. Deagan of Chicago. The term remains in use to signify a marimba. Deagan's instrument comprised a series of shallow metal bars arranged chromatically and individually tube-resonated. The tone of the instrument resembled that of the CELESTA (marimba gongs are similarly constructed). The marimbaphone was used primarily in marimba bands and as a solo instrument by stage artists. Percy Grainger was one of the few composers to score for it.

JAMES BLADES

Marimba-xylophone. *See* XYLORIMBA.

Marin, Constantin (*b* Urleta, Buzău district, 27 Feb 1925). Romanian conductor. He studied at the Bucharest Conservatory and became conductor of various student ensembles, including the Bucharest University Choir (1948), the Artistic Ensemble of the Union of Communist Youth (1953) and the Capella corala Gheorghe Cucu (1958–63). As musical director of Romanian Opera (1966–9) he fostered contemporary Romanian works, as he also did with the Madrigal Chamber Choir, which he formed at the Conservatory in 1963. The choir's main concern is with pre-Classical music, and especially early Romanian Byzantine music, which it has performed on tour in Europe and North America. He was a professor at the Academy of Music in Bucharest and has composed choral and vocal music.

His son Ion Marin (*b* Bucharest, 8 July 1960), also a conductor, studied in Bucharest and at the Mozarteum in Salzburg, and attended the Accademia Musicale Chigiana in Siena. In 1981 he became musical director of the Transylvania PO. He was resident conductor of the Vienna Staatsoper (1987–91) as Abbado's assistant, and in 1989 toured Japan with the company. In 1991 he made his London début, with the LSO, and his US début, conducting the Dallas Opera. The following year he made his Metropolitan début with *Semiramide*. He has appeared as a guest conductor with the BBC SO, the CBSO, the Philadelphia Orchestra, the Montreal SO and other orchestras. Among his recordings are vivid, idiomatic readings of *Lucia di Lammermoor* and several Rossini operas.

VIOREL COSMA

Marín, José [Josef, Joseph, Juseppe] (*b* ?1618/19; *d* Madrid, 8 March 1699). Spanish composer and singer. He sang tenor in the royal chapel of Felipe IV from December 1644 to June 1649, receiving a substantial salary increase in January 1648. After travels possibly to Rome for

ordination and to the Indies, he had returned by 1654 when, according to the *Avisos* of Jerónimo Barrionuevo and other documents (in *E-Mah*), he was involved in criminal activities and later exiled.

Marín was possibly a singer at the Convento de la Encarnación during this time, as his petition of 1692 mentions 14 years in royal service, but this is unconfirmed. He does not appear in official documents of 1663–91, but in 1674 Domingo Ortiz de Zárate, a tenor in the Mercedarian convent in Madrid, sent a vocal piece by Marín to a friend in Segovia.

Between 1686 and 1694 Martín García de Olague, organist at the Trinitarian convent in Madrid and from 1695 at Cuenca Cathedral, copied a manuscript (possibly commissioned by Miguel Martín, an adult treble singer in the royal chapel) of 51 secular vernacular *tonos*, composed or arranged by Marín in a version for voice and five-course guitar, known as the *Cancionero de Marín* (*GB-Cfm* 727).

Marín's financial resources were probably limited, as he requested royal pensions on the basis of poverty in January 1649 and April 1692 and died intestate. The *Gazeta de Madrid* of 17 March 1699 reported his death 'at the age of 80', stating that he was 'known within and outside Spain for his rare ability in the composition and performance of music'.

In addition to the *Cancionero*, ten other secular and two sacred *tonos* survive (in *E-Bcd* and *GCA-Gc*). Marín's *tonos* exploit Spanish harmonic and rhythmic conventions, with their distinctive cadences and extended hemiolas, to the full. None is directly connected to specific events or performing contexts, but several are settings of *tono* texts from *teatro menor*. *Corazón que en prisión* (*Cancionero*, no.10; ed. E. Pujol, Paris, n.d.) appears in at least 12 musical and textual concordances. In the *Cancionero* the guitar part is similar in style to Francisco Guerau's *Poema harmónico* (Madrid, 1694/*R*), with discreet two- and three-voice continuo realizations without strummed chords. The collection is important, not only as a significant body of music but also as one of the few surviving examples of complete realizations of 17th-century Spanish continuo parts.

M. JUNE YAKELEY

Marin, Marie-Martin Marcel, Vicomte de (*b* Saint Jean-de-Luz, nr Bayonne, 8 Sept 1769; *d* Toulouse, after 1861). French harpist and composer of Italian descent. His precocious natural talent was fostered from an early age by his father, the violinist Guillaume Marcel de Marin (*b* Guadeloupe, 1737), who is known to have composed a *Stabat mater* (Paris, n.d.) and other sacred works. While still very young Marin studied the violin in Italy with Nardini, then the harp in Paris (probably with Christian Hochbrucker and Krumpholtz). At the age of 14 he was made a member of the Arcadian Academy in Rome. He was said to be without equal in skilful improvisations and full-score playing, as well as performing Bach fugues and other keyboard music on the harp.

After a short period of military service in France, Marin began to travel throughout Europe in 1786. When the Revolution broke out he went to England, where he was quite successful as a teacher and composer. Among his friends and benefactors was Muzio Clementi, who arranged some of his harp sonatas for piano (opp.6, 15). He retired to Toulouse, where he played only in salons or private circles.

Fétis described Marin's compositions as 'truly Classical'. He published many works for the harp in Paris and London, including sonatas (opp.6, 10, 15, 16), variations on popular airs (opp.11, 13), duets (opp.8, 12, 17; some with violin or piano), *romances* with harp accompaniment, a quintet for harp and string quartet (op.14), arrangements of works by Mozart and Beethoven and many small pieces; he also wrote a few chamber works for strings. His compositions show great variety of dynamics, rhythm and sound, and in some ways they presage the works of the 19th-century virtuoso Elias Parish Alvars.

HANS J. ZINGEL

Marinelli, Gaetano (*b* Naples, 3 June 1754; *d* after 1820). Italian composer. He was a pupil of Manna and P.A. Gallo at the Conservatorio di S Maria di Loreto, Naples, and then from 1772 at the Pietà dei Turchini, where he studied under Cafaro and Lorenzo Fago and became a *maestrino*. In 1776 his intermezzo *Il barone di Sardafritta*, perhaps a student work, was performed at a Naples convent. The autograph of a sacred cantata, *Tobia alle nozze con Sara*, is dated January 1781. His first known comic opera was *I tre rivali*, for the Teatro Pace, Rome, in Carnival 1784 (an earlier work for that theatre is considered doubtful). The next year he wrote *Gli uccellatori* for the Teatro della Pergola, Florence.

In 1786 he married in Naples and went to Madrid, where he lived until 1789, working as a singing teacher. In Carnival 1790 two comic operas were performed in Naples, *La contadina semplice* and *La bizzarra contadina*, in December another, *Gli accidenti inaspettati*, and on 30 May 1791 he achieved a performance at S Carlo with his first *opera seria*, *Lucio Papirio*. This led to a contract for the spectacle opera *La vendetta di Medea*, given in Venice in 1792, a year in which he wrote a total of four operas. Thereafter he wrote two or three a year, mainly for Naples and Venice, but after 1796, when Napoleon invaded Italy, his output dropped, with some apparently barren years. Marinelli is said to have been in the service of the Duke of Bavaria, so one or more visits to Munich may account for the apparent gaps in his output. However, there is no evidence that he was still working in Munich in 1811, as is sometimes stated. Marinelli had moved to Portugal by 1817, when he composed a wedding cantata for the crown prince, Dom Pedro. He was said to have been teaching singing at Oporto about 1820. Only one non-stage work by him is known today, a *Stabat mater* for two sopranos, bass and instruments. According to Gerber, several numbers from Marinelli's operas were popular with amateurs, and Gervasoni called him an 'excellent composer' who 'has a style that is very expressive and of a particular newness'.

While Marinelli's serious operas for Naples consist primarily of recitatives and arias with one or two duets, *La vendetta di Medea* exhibits the radical departures from traditional Italian practice then taking place in Venice. Elements formerly found only in French-inspired operas, such as choruses, here co-exist with multi-sectional ensemble finales hitherto the province of comic opera. Many scenes are realized entirely in obbligato recitative. The Act 1 solo scena for Medea (soprano) involves a chorus of Furies that acts as a second character. Marinelli explored the textural options of obbligato recitative, solo with chorus, a cavatina with interruptions by the Furies, and finally an aria with a tutti closing. Staged death, new to Italian opera, takes repugnant form at the end of the opera, when Medea, enraged at the treachery of Giasone [Jason] (soprano castrato), murders their children on stage and exits in a flying carriage, leaving the palace in ruins and calling down a rain of fire. *Issipile* and *Germanico* are equally notable for their use of the chorus, ensembles and unusual constructions. Some of Marinelli's sinfonias (in one movement) have slow introductions. Wind instruments, including english horn, are used in recitatives as well as in arias and ensembles, and Marinelli exploits contrasts of key (as in the finale of *Medea*) and tempo as well as timbre for expressive purposes. Arias in either rounded ternary or rondò forms often have two tempos and even two metres. In the comic operas of the 1790s some of the larger ensembles incorporate extensive action in constructions similar to the finale.

DENNIS LIBBY, MARITA P. McCLYMONDS

Mariner, Francesc (*b* Barcelona, Jan 1720; *d* Barcelona, Feb 1789). Catalan composer and organist. According to

Rafel d'Amat i de Cortada (in a contemporary manuscript), he was organist at Barcelona Cathedral until 1786. His compositions (mostly in *E-MO* and other Catalan archives) include such traditional Spanish keyboard forms as the tiento, *obra lleno, partido* and *entrada*, as well as more recently imported Italian forms such as the toccata, sonata, rondo, pastoral and overture. (A number of his keyboard works have been edited by M. Voortman in *Francesc Mariner (1720–1789): obres per a clave*, Barcelona, 1997.) He also composed many sets of liturgical versets for psalms, canticles and masses, often based on plainsong cantus firmi. Like the forms, the style is transitional; some of his works show the close imitation and florid glosa figuration of earlier Spanish instrumental music, while others employ the lighter, more homophonic textures of the early Classical period.

ALMONTE HOWELL/JOSEP M. VILAR TORRENS

Marinera [chilena, cueca]. A social, recreational couple dance of Peru. It is directly related to the national dance of Chile (the *cueca* or *chilena*) and is named in honour of the seamen who died in the War of the Pacific against Chile, when as a result of Peru's defeat the dance had to be renamed to avoid its association with the 'enemy'. It is descended from the *zamacueca* or *zambacueca* found in Bolivia, Peru and Chile.

Using the DÉCIMA form, its octosyllabic verse is set strophically, while its *seguidilla* refrains alternate 6/8, 3/4 metre (*sesquiatera*). Subject matter is diverse, and includes historical narrative and socio-political commentary. In urban areas it has largely been replaced in popularity by the *vals criollo*. Among the mestizo population of the Peruvian Andes *marinera* melodies are more obviously pentatonic than those of the Peruvian coast and are sung in high-pitched, nasal style. Its choreography is a courtship pantomime between man and woman, echoing the mating process of cock and hen in the farmyard. It has a fixed structure with a series of complex moves and footwork, both parties advancing and retreating with step footwork, circling each other, flirting with handkerchiefs held in the right hand, waved around shoulders. There are many regional variations and the relationship adopted by couples for the dance tends to indicate their marital or single status. The choreography is similar to that of the Colombian BAMBUCO.

The *marinera limeña* functions in two contexts, as a dance and also as a *jarana*. This takes the form of a *contrapunto* or *desafío* challenge between two or more singers improvising using the *décima* form, the ten lines divided into three verses (4 + 4 + 2). This is followed by the *resbalosa* and *fuga*, a quatrain in couplets, the competition continuing until one opponent wins by outwitting the other in verse. A popular tradition within oral Afro-Peruvian culture, there are various historic collections of texts.

WILLIAM GRADANTE/R

Marini, Biagio (*b* Brescia, 5 Feb 1594; *d* Venice, 1663). Italian composer and instrumentalist. He seems to have come from an established Brescian family. An uncle, Giacinto Bondioli, was also a composer and may have been one of his teachers; there is no evidence to support the claim that he studied with G.B. Fontana, another Brescian. On 26 April 1615 Marini was appointed as a violinist at S Marco, Venice, and thus probably worked under Monteverdi. By 1620 he was back in Brescia, as *maestro di cappella* at S Eufemia and music director of the Accademia degli Erranti; on 30 January 1621 he was hired as an instrumentalist to the Farnese court at Parma. Between 1623 and 1649 he served, part of the time as Kapellmeister, at the Wittelsbach court at Neuburg an die Donau, but he was also away for extended periods, in Brussels (in 1624), Milan (1631–2), Bergamo (1632), Düsseldorf (in 1640 and 1644–5), Brescia and possibly Venice. He was again in Milan in 1649, as *maestro di cappella* at S Maria della Scala, and worked in Ferrara and Venice in 1651–3. By 1654 he was once again in Milan and then in Vicenza during 1655–6. Three marriages are documented; a document from 1641 mentions five children. The *atto di morte* recording his death cites his age as about 76 years (reproduced in Fano, 1973).

All of Marini's extant music is in printed form. At least seven volumes are lost, others are incomplete, and there is a curious time-lag of several years between the dedications and publication of opp.7–9. Marini's vocal music spans many of the vocal genres of the time, including the strophic air, monody, and large-scale concertato madrigal with instruments. Op.2 (1618) is notable for the first appearance in print of a *lettera amorosa* (Monteverdi's well-known examples appeared in 1619). The publication of opp.13 and 16, in the 1640s, marked the culmination of his work with the secular concertato madrigal: op.16 was especially indebted to Monteverdi's *Madrigali guerrieri ed amorosi*. In the 1650s, Marini seems to have focussed his attention on sacred music, here too exploiting the concertato style. As in his final volume of instrumental music, tonal direction is strongest in these late works.

It is as a composer of instrumental music, however, that Marini is best known. His op.1 (1617) contains sinfonias, sonatas, canzonas and dances, all for one or two violins and continuo. Stylistic distinctions between sonatas and longer sinfonias are not always clear. The sinfonias *La Ponte* and *La Gardana*, and the sonata *La Orlandina*, all for one violin with continuo, are the first datable examples of an extended solo piece for violin (or cornett) in which the continuo part is truly accompanimental. Two sonatas, *La Foscarina* and *La Agguzzona*, both for two violins and continuo, are the most substantial works in the collection; they are divided into several broad sections. The term *tremolo con l'arco* in *La Foscarina* is the first specific request for this effect, and slurring indications appear in both sonatas; both features point to the establishment of a string idiom.

Passages requiring double stopping and the use of the improvisatory instruction 'affetti' both first appear in the solo instrumental pieces of op.2; another solo work, based on the romanesca, is found in op.3. Marini's largest and most innovatory collection of instrumental music is op.8, which contains examples of virtually all the instrumental genres of the time. The trio sonatas are longer than those in op.1, while the third and fourth sonatas for solo violin and continuo represent, along with those of G.B. Fontana, the first notable achievements in the genre. In these works Marini explored unusual instrumental effects such as triple stopping (in the *Capriccio in modo di un lira*) and scordatura, as well as unusual compositional procedures (the *Sonata senza cadenza*).

It is unfortunate that there is a gap of 29 years between op.8 and Marini's next and last completely instrumental print, op.22. Instrumental music from the intervening

years is represented only by four sonatas in op.15 and two ballettos in op.16. Two kinds of sonata, *da camera* and *da chiesa*, are mentioned on the title-page of op.22, but individual sonatas are not labelled. Four of the six sonatas in the collection are clearly divided into separate contrasting sections, pointing towards the future multi-movement sonatas. Dances and sinfonias are also included, and the *Balletto secondo* is a true dance suite. Consistent with Marini's increased interest in the use of relatively large concerted forces, as exemplified in the vocal works of the 1640s, these pieces are on the whole more fully scored.

Marini's instrumental music is of a high level of craftsmanship, and he generally avoided merely mechanical solutions to compositional problems. His melodic writing has an individual lyricism. Over the course of his career, Marini's works show an increasing tendency toward tonally conceived writing: his last publication, op.22, includes sequences modulating by 5ths as well as his boldest forays into chromaticism, his most unusual chordal progressions, and his most extended use of fugal imitation.

WORKS

op.
1 Affetti musicali, 1–2 vn/cornetts, bc (Venice, 1617/*R* 1985 in Archivium musicum: collana di testi vari, vii); ed. in *Monumenti musicali italiani*, xv (1990)
2 Madrigali e symfonie, a 1–5 (Venice, 1618), inc.
3 Arie, madrigali et corenti, a 1–3 (Venice, 1620); facs. in AntMI, *Monumenta brixiensa*, viii (1970)
5 Scherzi e canzonette, 1–2vv, chit, vn (Parma, 1622/*R* 1980 in Archivium musicum: La cantata barocca, vi)
6 Le lagrime d'Erminia in stile recitativo, 1v, chit/kbd (Parma, 1623)
7 Per le musiche di camera concerti, a 4–6 (Venice, 1634, ded. 1624)
8 Sonate, symphonie … e retornelli, a 1–6 (Venice, 1629, ded. 1626); 17 ed. in Collegium musicum, 2nd ser., x (1981)
9 Madrigaletti, 1–4vv, chit, bc (Venice, 1635, ded. 1625)

THOMAS D. DUNN

Marini, Carlo Antonio. *See* MARINO, CARLO ANTONIO.

Marini, Francesco Maria (*fl* 1637). Italian composer. All that is known of his life is that he directed the music at the principal church in the republic of San Marino in 1637. His one surviving publication is *Concerti spirituali concertati a 2–7 et con instrumenti, libro 1* (Venice, 1637; 2 motets repr. in RISM 1646[4]). That so few works survive is a matter for regret, since they show a surprisingly competent talent for a comparative outpost such as San Marino, geographically far removed from the centres of composition in the 1630s. The motets are in the modern concertato style and demonstrate a feeling for imaginative word-setting; it is those that include obbligato instruments to which the greatest interest attaches. The setting of *Jesu dulcis memoria* is for the unusual (for northern Italy) scoring of solo alto and four *viole*. It is long, intense in mood and written in a low register for the voice; a falling 4th on the word 'Jesu' acts as a unifying idea throughout. The instruments engage in dialogue with the voice as well as providing contrasting interludes (not ritornellos). This can also be seen in the charming *Omnes gentes* for two sopranos, two violins and continuo, where the often quite extended sections for violins and voices respectively are closely integrated and there is a clear if simple scheme of modulations. A larger work, *Anima mea in aeterna*, is scored for two balanced groups of SSB and the instrumental equivalent – two violins and cello – and continuo: this is in effect a kind of updated double-choir medium. Here the violins have considerable polyphonic independence in the impressive tuttis that punctuate the other varied sections. (J. Roche: *North Italian Church Music in the Age of Monteverdi*, Oxford, 1984)

JEROME ROCHE/ELIZABETH ROCHE

Marini [Marino], **Gioseffo** [Giuseppe] (*b* Pesaro, 3 Oct 1610; *d* after 1638). Italian composer. In 1618 he was *maestro di cappella* to the town of Pordenone, Friuli, and in 1621 held a similar position at Gorizia. Three printed volumes of music by him are known: *Il primo libro de madrigali a cinque voci* (Venice, 1617); *Il secondo libro de madrigali a cinque voci*, with continuo (Venice, 1618); and *Messe e motetti a otto voci*, with organ continuo (Venice, 1621). There are seven pieces by him in the Pelplin organ tablatures (in *PL-PE*), probably from his 1621 volume (see A. Sutkowski and A. Osostowicz-Sutkowska, eds.: *The Pelpin Tablature: a Thematic*

Catalogue, AMP, i, 1963; vols. ii–vii are facsimiles of the works). □

Marinis [Marini], **Giovanni de.** Italian composer, some of whose works were printed in a collection by GIOVANNI PIETRO GALLO.

Marinković, Josif (*b* Vranjevo, 15 Sept 1851; *d* Belgrade, 13 May 1931). Serbian composer and conductor. He studied composition with František Skuherský at the Organ School in Prague. From 1881 to 1924 he was active in Belgrade as a choral conductor, notably of the Belgrade Choral Society (1881–7) and the academic choir Obilić (1889–1900), and as music teacher in a number of schools. In 1907 he was elected to membership of the Serbian Royal Academy.

Marinković played an important role in Serbian musical life at the end of the 19th century. His output includes many unaccompanied choral works based on folktunes, such as the 11 suites of rhapsodies entitled *Kola* ('Ring Dances'), choral works on patriotic subjects, for example *Narodni zbor* ('National Meeting') and *Junački poklič* ('Call of the Hero'); and choral works with piano accompaniment approaching the scale of cantatas, including *Zadovoljna reka* ('The Contented River'), a pastorale in rondo form, and *Potočara* ('The Water-Mill'). The most significant part of his work consists of numerous songs, for which he may be called the founder of the Serbian Romantic lied. He also composed incidental music, sacred works and piano pieces.

WORKS
(*selective list*)

Stage: Sudjaje [The Witch Sisters] (incid music, L. Petrović), Belgrade, National, 12 Oct 1894

Mixed choir, pf: Zadovoljna reka [The Contented River], pastorale, 1881; Na veliki petak [On Good Friday], 1883; Jadna majka [The Poor Mother], 1884; Molitva [The Prayer], 1889, rev. 1931; Dižimo škole, 1890; Proletnja zora [The Springtime Dawn], 1899; Potočara [The Water-Mill], 1910; Dositeju Obradoviću [Cantata to Dositej Obradović], 1911

Male choir (unacc.): Narodni zbor [National Meeting], 1876; 11 Kola [11 Ring Dances], 1881–97; Pesmom srcu [To the Heart with a Song], 1882; Radnička pesma [Song of Workmen], 1890; Slavija, *c*1907; Himma Balkana [The Balkan Anthem], *c*1908; Junački poklič [Call of the Hero], 1910

Songs: Stojanke [Oh, Stojanka], 1883; Molitva [The Prayer], 1889; Grm [The Bush], 1893; Kaži mi kaži [Tell me, oh, tell me], 1931; Iz grad u grad [From Town to Town], 1931; Ala je lep ovaj svet [How Beautiful this World is], 1931; Potok žubori [The Brook is Murmuring], 1931; Rastanak [The Separation], 1931; Čežnja [Yearning]

Other: Liturgy, mixed choir, *c*1889; Pomen [Requiem], *c*1929; Sonatine, pf, 4 hands

STANA ÐURIC-KLAJN/ROKSANDA PEJOVIĆ

Marino, Alessandro (*b* Venice, mid-16th century; *d* before 1605). Italian composer. He was an Augustinian monk and from 1570 to 1596 a canon of S Giovanni in Laterano. In 1584 he founded the Virtuosa Compagnia dei Musici di Roma, the ancestor of the Congregazione (later Accademia) di S Cecilia, which was approved by a bull of Sixtus V in 1585, but he did not contribute to the madrigal anthology produced by that group (RISM 1589[7]). His book of *madrigali spirituali* also includes a 12-part instrumental canzona, *La bella Roncinetta*.

RUTH I. DEFORD

Marino [Marini], **Carlo Antonio** (*b* ?Albino, nr Bergamo, 1670–71; *d* ?Bergamo, in or after 1717). Italian violinist, cellist and composer. His family lived in Bergamo from 1673, many of them being musicians at S Maria Maggiore, which he served for most of his life: he was a boy soprano from 1681 to 1684, occasional violinist from 1683 to 1686, second violinist from 1686 to 1696 and first violinist from 1700 to 1705, when the string orchestra at the church was disbanded on account of war. He was much in demand for leading opera orchestras in other north Italian cities.

Marino's seven published volumes of instrumental music are characteristic of Italian sonatas and dances in the last decades of the 17th century. The op.1 *Sonate da camera* consist of ten dance pairs, all quite short and remaining in the tonic at the mid-point of the binary form. The op.2 suites are longer (balletto, corrente, *giga* and menuet) and usually have an internal cadence on the dominant. The four-movement sonatas of opp.3, 6 and 7 are remarkable for their elaborate cello parts. Ten of them include viola parts and were probably performed orchestrally at S Maria Maggiore. Marino's op.8 solo violin sonatas (similiar to those of Corelli but without double stopping) and the manuscript cello sonata are rather more virtuosic than the sonatas for two violins. The amorous solo cantatas (op.4) are long, adventurous and humorous. Marino's instrumental music was sufficiently popular to be reprinted in Amsterdam. (W. Apel: *Die Italienische Violinmusik im 17. Jahrhundert*, Wiesbaden, 1983; Eng. trans., 1990)

ROBIN BOWMAN/SANDRA MANGSEN

Marino, Giambattista [Giovan Battista] (*b* Naples, 18 Oct 1569; *d* Naples, 25 March 1625). Italian poet. His peripatetic career was dogged by scandal, although he enjoyed the patronage of Cardinal Pietro Aldobrandini in Rome and Ravenna (1602–10), the Duke of Savoy (officially from 1610, although contacts date from 1608), Maria de' Medici in Paris (1616–23) and Cardinal Maurizio of Savoy in Rome. His extravagant poetic style – seen in his *Rime* (Venice, 1602; revised as *La lira* in 1608, with a third part published in 1614), *La galleria* (Milan, 1620), *La sampogna* (Paris, 1620) and the pseudo-epic *Adone* (Paris, 1623) – established important trends. He did not move widely in musical circles, although he dedicated poems to musicians (Tommaso Pecci) and patrons (Jacopo Corsi), and presumably knew Sigismondo d'India in Turin. But well over 800 musical settings of his poems (for a list see Simon and Gidrol) were published before 1650 in all the current scorings and styles. By this criterion, his popularity was second only to that of Battista Guarini.

His epigrammatic style, focussing on the compressed elaboration of witty, usually erotic conceits to invoke a sense of *meraviglia* at the poet's art, found numerous imitators among his friends (Angelo Grillo, Fulvio Testi) and even his enemies (Gaspare Murtola, Tommaso Stigliani). However, by the end of the 17th century Marino and the Marinists came under heavy criticism for their artifice-ridden mannerism, a critical stance enshrined in the 19th-century condemnation of 'secentismo' as marking a severe decline in the Italian literary tradition. Literary historians have begun to reassess Marino, but musicologists have been slow to follow suit: Einstein implicitly linked Marinism to the decline of the madrigal, and Tomlinson has seen Marinist *concettismo* as having a deadening effect on Monteverdi and others in the shift from the Renaissance to the Baroque era.

Marino was unusual for his time in producing few stage works. He wrote a number of laments, including one of Ariadne (following Rinuccini's famous model) set by Pellegrino Possenti in 1623, and Monteverdi reportedly planned to include his lament of Hero and Leander in his sixth book of madrigals (1614). Portions of his *Adone* also provided the basis for Domenico Mazzocchi's opera *La catena d'Adone* (1626). But Marino's art was essentially that of a lyric poet of style, wit and daring.

TIM CARTER

Marino, Gioseffo [Giuseppe]. *See* MARINI, GIOSEFFO.

Marinoni. Several Italian singers in the late 16th and early 17th centuries bore this name. The relationship between them is not known.

(1) Giovan Battista Marinoni (i) (*fl* 1580–1612). Singer (possibly bass) in service at the Gonzaga court, Mantua, from the early 1580s until about 1612. Duke Vincenzo Gonzaga granted him Mantuan citizenship on 9 January 1601 and used him in several official and unofficial capacities. He was one of four musicians (headed by Monteverdi) who accompanied the duke on his campaign in Hungary against the Turks in 1595. He may have left Mantua during the extensive restructuring of the court music in the spring and summer of 1612 after the accession of Francesco Gonzaga. Whether he (like Monteverdi) moved to S Marco, Venice, remains uncertain – the reference to a Marinoni in various Venetian records from 1613 may be one or more other singers – but Vio is clear that he was not the same musician as Giovan Battista Marinoni (ii), with whom he is generally confused.

(2) Giovan Battista Marinoni ['Giove'] (ii) (*b* 1596; *d* ?Venice, 1657). Singer and editor. Whether he is one of the Marinonis who appear in various Venetian records from 1613 onwards remains unclear, but he was certainly employed as a tenor in S Marco from 6 July 1623 until early 1642. In 1627 he took part in the annual celebrations of the Scuola di S Rocco and in 1632 was a candidate for a canonry at S Marco. He is recorded as a singer in Padua in the early 1640s, and was *maestro di cappella* at the cathedral there in 1646. This was the Marinoni who, according to Caberloti, directed the music at a memorial service for Monteverdi in S Maria Gloriosa dei Frari, Venice, in December 1643, a few days after Monteverdi's funeral: Caberloti styles him 'molto illustre e molto reverendo signor d. Gio. Battista Marinoni cognominato Giove'. Marinoni also edited a collection of poetry (*Fiori poetici*) commemorating the composer which appeared the next year. He seems to have returned to S Marco on 20 January 1647; he was still there in February 1652 and may have remained there until his death.

(3) Girolamo Marinoni (*b* Fossombrone; *fl* 1612–14). Singer and composer. He sang at S Marco, Venice, from January 1612 and was given a rise in salary two years later for good service. A solo spiritual madrigal by him was published in RISM 1613[3], and there is music of some distinction in his *Primo libro de motetti*, 1v (Venice, 1614; one work, *Assumpta es Maria*, ed. in H. Goldschmidt: *Die italienische Gesangsmethode des XVII. Jahrhunderts*, Breslau, 1890, appx, 36ff). These solo

motets are more modern than those of most Venetian composers of the time and perhaps show the influence of Monteverdi in their up-to-date *fioriture* and pleasant melody.

DENIS ARNOLD/TIM CARTER

Marinov, Ivan (*b* Sofia, 17 Oct 1928). Bulgarian composer and conductor. A son of Tsvetana Dyakovich, an opera singer and professor of singing at the Sofia State Conservatory, he graduated from the Sofia State Academy in 1955 as a pupil of Veselin Stoyanov and Hadjiev in composition and of Goleminov in conducting. Subsequently he worked for some years under the auspices of the Ministry of Culture as an opera conductor and as music director of the Bulgarian film studios. He was appointed conductor of the National Opera in Plovdiv in 1962 and of that in Sofia in 1966. At the same time he was a secretary of the Bulgarian Composers' Union and of the UNESCO National Music Committee. During the period 1973–5 he was a vice-president of the committee for art and culture. He has appeared as a guest conductor throughout Europe and in Cuba. His works are richly and broadly constructed, favouring programmatic development and a dramatic impulse.

LADA BRASHOVANOVA

Marinuzzi, Gino (i) (*b* Palermo, 24 March 1882; *d* Milan, 17 Aug 1945). Italian conductor and composer, father of Gino Marinuzzi (ii). He studied composition with Zuelli at the Palermo Conservatory, where his requiem mass in memory of Umberto I was performed in 1900 at the Pantheon in Palermo. In 1901 he made his first appearance as conductor at the Teatro Massimo, Palermo, in Verdi's *Rigoletto*, the beginning of a career that brought him international renown, and critical acclaim for his excellent technique. He built up a wide repertory including contemporary music, especially that of Richard Strauss, whose music he was one of the first to make known in Italy, and of Puccini, conducting the première of *La rondine* at Monte Carlo in 1917. He succeeded Busoni as director of the Bologna Conservatory in 1916, but resigned in 1918. In 1920–21 he was artistic director of the Chicago Opera Association. From 1928 to 1934 he was permanent conductor and artistic director of the Rome Opera, then moving to La Scala, Milan; he remained at La Scala until 1945, acting also as sovrintendente during his last years.

Considered one of the foremost Italian interpreters of Wagner and an excellent exponent of the lesser-known operas of Donizetti and Bellini, he often appeared at the Maggio Musicale in Florence. His compositions include three operas: *Barberina* (1903, Palermo), *Jacquerie* (1918, Buenos Aires) and *Palla de' Mozzi* (1932, La Scala). In 1982 a study conference was organized at La Scala to mark the centenary of his birth.

LEONARDO PINZAUTI

Marinuzzi, Gino (ii) (*b* New York, 7 April 1920). Italian composer and conductor, son of Gino Marinuzzi (i). He completed a diploma in piano performance with Vincenzo Calace (1941), and another in composition with Giulio Cesare Paribeni and Renzo Rossi at the Milan Conservatory (1942), but was active as a performer and conductor before finishing his studies. From 1946 to 1951 he held the post of assistant conductor at the Teatro dell'Opera da Camera, Rome. He made his début as a conductor in 1947 during a tour of Spain by the Opera's ballet company. Later he devoted himself primarily to composition, writing music for film and radio and becoming interested in electronic music. In 1956 he co-founded with Federico Savina what was to become the sound studio of the Accademia Filarmonica Romana. He also created, with Paolo Ketoff and Givliano Strini, the *Fonosynth 2 elettronico* (1958–62), an integrated system for electronic music composition comprising a series of oscillators, an impulse generator, a white-noise generator and several filters. In the 1960s he co-founded R7, an association for the development of experimental and electronic music in Italy.

STEFANO A.E. LEONI

Mario, Giovanni Matteo, Cavaliere de Candia (*b* Cagliari, 17 Oct 1810; *d* Rome, 11 Dec 1883). Italian tenor. He was an army officer but was forced to desert and go into exile because of his association with Mazzini's 'Young Italy' party. He studied in Paris with Ponchard and Bordogni and was coached by Meyerbeer himself for his Opéra début as Robert le diable (1838); he also sang the title role of *Le comte Ory*. His London début, as Gennaro in *Lucrezia Borgia*, was at Her Majesty's (1839); Lucrezia was sung by Giulia Grisi, his stage partner for the next 22 years and his lifelong companion. He also appeared as Nemorino and Pollione. He returned to Paris to make his début at the Théâtre Italien as Nemorino and sang in the first performance of Halévy's *Le drapier* at the Opéra.

Thereafter, Mario and Grisi divided their time between Paris and London. In winter 1840–41 Mario transferred to the Théâtre Italien. He sang Orombello in *Beatrice di Tenda*, the first of ten new roles, including Almaviva, that year. He began to take over parts written for Rubini or habitually sung by him, among them Arturo (*I puritani*) and Elvino (*La sonnambula*). He took on four Donizetti roles during the next two years, Edgardo, Percy (*Anna Bolena*), Carlo (*Linda di Chamounix*) and Ernesto in the première of *Don Pasquale*. In 1843 he sang four Rossini roles, Otello, Gianetto (*La gazza ladra*), Lindoro (*L'italiana in Algeri*) and Don Ramiro (*La Cenerentola*). During the next three seasons in London he created the title role of Costa's *Don Carlos* (1844) and sang Paolino in *Il matrimonio segreto*, Ferrando, and Oronte in *I Lombardi*. In Paris he took over Gualtiero, a favourite Rubini role, in *Il pirata* (1844) and sang Jacopo in *I due Foscari* (Verdi wrote a cabaletta especially for him).

In 1847 Mario and Grisi transferred from Her Majesty's Theatre to Covent Garden, where he sang with the Royal Italian Opera every season (except 1869) until his retirement in 1871. During the winters he appeared at St Petersburg (1849–53, 1868–70), Paris (1853–64), New York (1854) and Madrid (1859, 1864). He was able to return to Italy but never sang there professionally. At Covent Garden his roles included James (*La donna del lago*), Fernand (*La favorite*), Raoul (*Les Huguenots*), Masaniello (*La muette de Portici*), John of Leyden (*Le prophète*), Raimbaut (*Robert le diable*), Eléazar (*La Juive*) and Tamino; he also sang the Duke in the London première of *Rigoletto* (1853).

In St Petersburg he sang in Alary's *Sardanapale* (1852) and in New York took the role of Idreno (*Semiramide*). At the Théâtre Italien he appeared as Manrico, Alfredo and Lyonel (*Martha*). On 15 May 1858 he sang in *Les Huguenots* at the reopening of Covent Garden after the 1856 fire. He attempted the title role of *Don Giovanni* but soon reverted to the part of Ottavio. He appeared in the Paris première of *Un ballo in maschera* (1861); his last new roles at Covent Garden were in Gounod's *Faust* (1864; see illustration) and *Roméo et Juliette* (1867).

Mario's voice was a lyric tenor of great sweetness and beauty, with a range from *c* to *c''*; for the roles he inherited from Rubini he added a falsetto extension up to *f''*. Nemorino, Ernesto and Gennaro were the successes of his earlier years, while the Duke of Mantua, Raoul and Faust were the most admired roles of his maturity. Almaviva, which he sang more than a hundred times in London alone, personified for 30 years his vocal charm and dramatic grace.

ELIZABETH FORBES

Marionette opera, marionette theatre. *See* PUPPET OPERA, PUPPET THEATRE.

Mariotte, Antoine (*b* Avignon, 22 Dec 1875; *d* Paris, 22 Dec 1944). French conductor, composer and administrator. He abandoned a naval career to study composition under d'Indy at the Schola Cantorum and held conducting posts as well as teaching the piano in the conservatories at Lyons and Orléans. From 1936 to 1939 he was director of the Opéra-Comique. His first opera, *Salomé*, was composed before that of Richard Strauss but was not performed until after the première of Strauss's opera. Disputes over the rights to Wilde's play, which Mariotte's opera sets in the original French, hindered productions of the opera, though it was well received. His works use the full range of operatic effects including imaginative choral writing, especially in *Esther*, which has oriental set pieces punctuating the unfolding of the drama, treated with striking rhythmic power. His work as a whole shows him to have been familiar with various contemporary styles. *Le vieux roi* tells a tale of Celtic honour and adultery, while the lighter *Gargantua* is set in four self-contained tableaux. Although he was primarily a vocal composer, his *Impressions urbaines*, adorned with a cover depicting modern-day town scenes, are an unusual example of instrumental realism.

RICHARD LANGHAM SMITH

Mariscotti, Giorgio. *See* MARESCOTTI, GIORGIO.

Marius, Jean (*d* 6 April 1720). French inventor and builder of musical instruments. He had a degree in law, was considered a skilled mathematician, and, from 1718, served as adjunct mechanician at the Académie Royale des Sciences in Paris. In music, he is known principally for his *clavecin brisé*, a harpsichord built in three parts that folded by means of hinges so that it was portable, and his *clavecin à maillets*, a keyboard instrument with hammer-action, an action of which he was the inventor in France. He also designed a portable organ, adapted the monochord to serve the tuning of harpsichords, built a bowed keyboard instrument, and conducted acoustical experiments with JOSEPH SAUVEUR. Among his inventions in other fields are a folding umbrella, a collapsible tent, a machine to sow seeds, improvements to the pocket watch, a water pump and a novel type of candle. He sought approbation from the Académie for most of his inventions, which are described in archival documents (especially in the *dossier Marius*, held in the Archives of the Académie). Marius submitted four different sets of actions for the *clavecin à maillets* to the Académie: one had hammers (*maillets*) entirely replacing the jacks; another combined hammers and jacks so that they could be used separately or together; a third included means of activating strings from beneath as well as from above; and the fourth was an upright model (these are described in Harding).

Approbation was granted by the Académie for the *clavecin brisé* (on 24 January 1700) and the *clavecin à maillets* (on 14 May and 23 June 1716), and line-drawings of both were published by the Académie in its *Machines et inventions* (1735). But in both cases, the granting of a royal privilege was contested through legal challenges brought by the guild of instrument builders in Paris, who argued that neither invention was new, and that each was modelled on an existing, earlier type. Marius, an independent builder, fought off the challenge to the *clavecin brisé* successfully, registered his letters patent from the king in the parliament of Paris (on 30 Sept 1702), and proceeded to refine and produce his instrument for the market (examples survive in the instrument collections at the Brussels Conservatory, the Staatliches Institut für Musikforschung in Berlin, the University of Leipzig, the Paris Conservatoire and the Thibault Collection in Paris). He lost the suit against his *clavecin à maillets*, however, and no complete hammer-action keyboard instrument is known to have been built by Marius.

ALBERT COHEN

Mariz, Vasco (*b* Rio de Janeiro, 22 Jan 1921). Brazilian musicologist, singer and diplomat. At the Conservatório Brasileiro de Música he studied composition with Oscar Lorenzo Fernândez, singing with Vera Janacopulos and chamber music with Francisco Mignone; concurrently he studied law at the University of Brazil (graduated 1943). After making his operatic début in Mozart's *Le nozze di Figaro* (1945), he embarked on a diplomatic career: he served in the Cultural Division of the Ministry of Foreign Affairs, organized the first collection of music records for distribution abroad, and acted as cultural attaché and ambassador to many countries, including Portugal, Yugoslavia, Argentina, Italy, the USA, Ecuador, Israel, Peru and Germany. He was chairman of the Inter-American Music Council in Washington (1967–9) and of the Second Inter-American Conference of Music Education (Colombia, 1968); he was also the Brazilian delegate to the UNESCO General Conference (Paris, 1970). After his retirement from the diplomatic corps (1987), he became a member of the Federal Council of Culture, was president of the Brazilian Academy of Music (1991–3) and coordinated several music projects for FUNARTE (the National Arts Foundation). In his musicological studies he has dealt with 20th-century Brazilian music, especially the work of Villa-Lobos and other nationalist composers, with Brazilian art and popular song, and with experimental trends in Brazilian music.

GERARD BÉHAGUE

Marizápalos (Sp.). A Spanish dance-song and musical pattern used as a basis for variation in the 17th and 18th centuries. It belongs to the class of dances known as *bailes* (as opposed to the more restrictive and subdued *danzas*), and as such allowed movements of the hands, hips and upper body. Its origins may be traceable to Calderón de la Barca's *entremés Las jácaras*, in which the character Mari Zarpa strolls about forever singing the *jácara*; its melodic features resemble certain motivic cells that were virtually obligatory in *jácara* improvisations.

The *marizápalos* is nearly always written in A minor or D minor, an important exception being Santiago de Murcia's G minor setting of sweeping proportions found in his *Resumen de acompañar la parte con la guitarra* (engraved Antwerp, 1714; published Madrid, 1717), arguably the best composition in this publication. Unlike many of the Spanish *bailes* and *danzas*, which were based on prescribed chordal progressions with no obligatory 'tune', the *marizápalos* has a standardized melody too; this begins with a rest on the first beat, and then ascends stepwise from tonic to dominant (a feature associated with the most prevalent *jácara* motivic cell; ex.1). The rest at the beginning of the melody allows for smooth connection between each variation, since the final cadence on the tonic inevitably falls on the rest at the beginning of the ensuing variation. A seamless, fluid texture thus results. Other distinguishing features include the progression through the circle of 5ths in the second phase and the hemiola that draws the piece to a close.

The couplets of the *marizápalos*, rich in scintillating word play and *double entendre*, were probably written by Jerónimo de Camargo y Zárate in the mid-17th century. The opening stanza, beginning: 'Marizápalos was a young girl, head over heels in love with Pedro Martín; she was the niece of the esteemed priest, the jewel of the village, the flower of Madrid', appears in nearly every extant version of the text. The remaining stanzas are not uniform between one source and another, but they generally tell the same story. The saucy Marizápalos sneaks off to a thicket without her uncle's knowledge and meets her beloved Pedro Martín in a clandestine rendezvous. Their passion is interrupted by the untimely sound of the curate's footsteps.

Not only did the *marizápalos* appear in numerous works by such dramatists as Antonio de Solís, Luis Quiñones de Benavente, Diego de Torres and Zamora, but most of the important 17th- and 18th-century instrumental music tutors and anthologies include variations based on its musical structure. It was clearly part of the standard repertory, as is evident from numerous anonymous manuscripts for guitar or harp and the Baroque guitar settings of Gaspar Sanz, Francisco Guerau, Sebastián de Aguirre, Murcia, Antonio de Santa Cruz, and Miguel Pérez de Závala. The large-scale settings of Murcia and Pérez de Závala reveal some of their most complex and ambitious architectural structures.

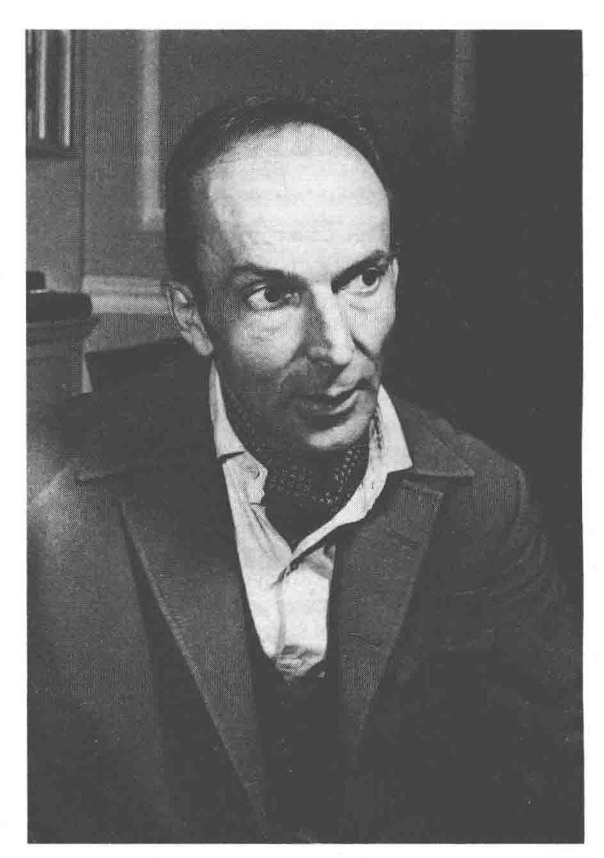
CRAIG H. RUSSELL

Markevitch, Igor (*b* Kiev, 27 July 1912; *d* Antibes, 7 March 1983). French composer and conductor of Ukrainian birth. When he was two years old he left Kiev with his parents for Paris; the family settled in Switzerland two years later. His early musical education was initiated by his father, Boris Nikolayevich, a pianist, and continued by one of his father's pupils. At the age of 13 he played his piano suite *Noces* to Cortot, who arranged both his entry (after two years) to the Ecole Normale de Musique, and the publication of *Noces* by Senart. After three years' study with Cortot and Nadia Boulanger, the 16-year-old composer was introduced to Diaghilev, and played him part of his work-in-progress (the *Sinfonietta*). He was rewarded with commissions for a piano concerto and a ballet.

With the composer as soloist, the concerto was performed in the gala concert inaugurating the Diaghilev

Ex.1 Marizápalos Progression



company's 1929 Covent Garden seasons. Diaghilev's death later that year ended the ballet project, but some of the music already written for it was incorporated in the *Cantate* whose première in Paris in June 1930 was a notable success, confirmed later that year by the equal success of the Concerto Grosso. With Milhaud, Cocteau and the conductor Roger Désormière now among his leading advocates, Markevitch was already attracting attention abroad, and reaping the rewards of an exclusive publishing contract with Schott. In June 1933 the sensational Paris première, under Désormière, of *L'envol d'Icare*, confirmed Markevitch's reputation in European modernist circles.

In the introduction to the second (1936) edition of *Music Ho!*, Constant Lambert noted the emergence of Markevitch 'as the leading figure of the Franco-Russian school'; and that reputation, though hotly contested, survived until the outbreak of World War II. Yet his links with Paris and its artistic salons had been loosened by his decision to set up home in Switzerland after his marriage to Nizhinsky's daughter Kyra in April 1935. The changed circumstances are reflected in the fact that the much sought-after world-première of his oratorio *Le paradis perdu* was in London (December 1935), and that his overtly post-Skryabinesque *Cantique d'amour*, addressed in the first place to Kyra, had its world première in Rome (1937), thus confirming a link with the Italian modernists that had been forged by the performance of *Psaume* at the 1934 ISCM festival in Florence.

It was to Florence that Markevitch repaired with his wife soon after the outbreak of World War II. He had never fulfilled the domiciliary conditions of Swiss citizenship and had been technically stateless since the 1917 Russian revolution. His removal to Florence at a time when Mussolini was still affirming Italy's neutrality may have seemed a matter of mere expediency. Six months later, when Italy entered the war, its implications were very different, but access to neutral Switzerland was now difficult.

Like other composers whose positions and livelihood had been increasingly endangered by the economic and political circumstances of the 1930s, Markevitch had for the past three years been seeking work as conductor and pianist. He had previously studied conducting privately with Pierre Monteux, and had scored notable successes conducting the Dutch première of *Rebus* and the London première of *Le paradis perdu* (replacing the indisposed Scherchen). As a pianist, meanwhile, he had formed a duo in Switzerland with Suzanne Wetzel. He now began intensive piano studies with Casella: pianistically rather than compositionally, Casella's influence is evident in the work that turned out to be Markevitch's last, the *Variations, fugue et envoi sur un thème d'Handel*. Once recovered from a protracted and serious illness, he resumed his relationship with the orchestra of the Maggio Musicale, but allowed his creative plans to remain in abeyance. Although *Icare*, the 1943 revision of *L'envol d'Icare*, is markedly different in character from the original version and altogether more traditional, it represents less a re-composition than a profound self-assessment by a musician who had essentially abandoned composition.

Markevitch joined the Italian resistance in October 1943 and acquitted himself bravely. By 1947 he was already launched on his 'second life' as an internationally renowned conductor. He travelled widely as a guest conductor (making his American début with the Boston SO in 1955) and held resident principal appointments with many orchestras including the Stockholm SO (1952–5), the Montreal SO (1956–60), the Havana PO (1957–8), Concerts Lamoureux, Paris (1957–61) and the Spanish Radio and Television Orchestra (1965–9). He also gave classes at the Salzburg Mozarteum (1948–56), Mexico City (1957–8), the Moscow Conservatory (1963), Madrid (1965–9) and from 1969 at Monte Carlo. He had made the first recordings of works by Lili Boulanger, Dallapiccola, Halffter, Milhaud and Mompou, and recorded all Tchaikovsky's symphonies with the LSO during the 1960s. Markevitch combined a volatile personality with meticulous attention to the composer's instructions, and while his performances may sometimes betray a certain inflexibility of control, their musical character is never weakened by sentimental indulgence of expression. During his heyday as a conductor he studiously neglected his own music, declaring that for the time being there was no pressing need to perform it, and that it could safely be left to the tests and conclusions of later times. By the start of the 1970s, however, his hitherto phenomenally acute hearing had so deteriorated that his scope for conducting was much diminished. With more time for reflection and study, he began work on a new edition of the Beethoven symphonies, and wrote the first volume of what was to have been a two-part autobiography. A work of real literary and intellectual distinction, but often as cavalier with regard to the sensibilities of others as to the verifiable facts of his own career as a composer, it is tellingly

Igor Markevitch

entitled *Être et avoir été*, and stops short at the fateful transition from a composer's world to a conductor's.

It was in the same cause of self-examination and reappraisal that in 1978 Markevitch accepted an invitation from the Philharmonic Society of Brussels to conduct a concert performance of *Le paradis perdu*. Encouraged by the enthusiastic response of press and public alike, he now committed himself to the revival and re-publication of his works (excluding only the Piano Concerto). From his twin bases in the South of France and the Swiss canton of Vaud, he reanimated and reorganised his international career. Far advanced with his plans for establishing an international master-course and summer festival close to his home in St. Cézaire (Alpes-Maritimes), he acquired French citizenship by special dispensation from President Mitterand. His subsequent conducting tour in the Soviet Union ended with a personal triumph in his native city of Kiev. Returning, much elated, to St. Cézaire, he fell suddenly ill and died within a matter of days, leaving his plans and business affairs in disarray, and only a torso of the second volume of *Être et avoir été*.

In 1980, Markevitch's lifelong friend and admirer Nadia Boulanger had candidly expressed the view that his undoubted gifts as a conductor had been at the expense of his greater gifts and higher responsibility as a composer. By his twentieth year and the completion of *Rebus* he had already fulfilled the promise manifest ever since the *Sinfonietta* of 1928. At this stage his fierce determination to avoid the most readily available models, whether Stravinsky on the one hand or Satie and Les Six on the other, is as striking as the debt to Hindemith (unnoticed though it generally was at the time). But the prelude to *Rebus*, as Pierre Souvtchinsky remarked in his important essay of 1932, already hints at a quite new sound-world. It was, in fact, the world of *L'envol d'Icare*, with its quarter-tone tunings and its gamelan-like modalities and heterophonies. The gamelan and other non-Western influences remain prominent in the five major scores Markevitch composed between 1932 and 1937: *Hymnes*, *Psaume*, *Le paradis perdu*, *Cantique d'amour*, and the first sinfonia concertante, *Le nouvel âge*. Various synthetic non-tonal chord-structures punctuate *L'envol* and its successors and while the bass-free birdsong polyphonies of that work seem to anticipate Messiaen – not least in their polyrhythmic aspects – they share with the synthetic chords an ancestry in Skryabin that is only revealed in the subsequent works, where the bird-song references tend to be homophonic and the harmonic textures richer. Yet his true self-discovery was not achieved in the notoriously opium-induced sonic visions of *L'envol d'Icare*, but in the sober solitude of his collaboration with C.F. Ramuz. The idea of composing a full-length 'concert' for soprano and a chamber ensemble in variable dispositions from string quartet to tutti of 12 players was clearly indebted to Hindemith's concept of the *Plöner Musiktag* (1932), but was brought to life by the spirit and sense of his step-by-step collaboration with Ramuz on a 'concert' based on the seasons as a traditional metaphor for the life-cycle. The work survives as a 50-minute torso to which Markevitch gave the title *La taille de l'homme: concert inachevé*. Part one ends with a sonata whose flagrantly post-Beethovenian rondo-finale holds out the promise of the double fugue with which the entire concert was to have ended.

Although part two had not progressed beyond a few isolated sketches and modal experiments when the collaboration with Ramuz was interrupted, the 'concert inachevé' was in effect continued, philosophically and poetically, by the so-called 'Sinfonia Concertante', *Lorenzo il Magnifico* and concluded, musically, by the *Variations, Fugue et envoi surun thème d'Handel*. Together with *Cantique d'amour* and *La taille de l'homme*, the works composed in Italy clearly represent the beginnings of a mature synthesis between the promise of the early neo-classical pieces and the modernist vitalism of their successors. After Markevitch's untimely death, the notion that *Icare* (confused with *L'envol d'Icare*) had been the nearest he came to success as a composer, and also the final testament to his alleged failure, achieved wide journalistic currency, thanks to its obvious mythological associations. More recently, Richard Taruskin has reinforced that particular notion (1998) with a more general and scholarly observation to the effect that Markevitch's besetting fault was a certain four-squareness, especially with regard to harmonic rhythm. In truth, the precocious virtuosity of the early works, up to and including *Rebus*, had not been achieved without technical faults and limitations of various kinds, whether harmonic, melodic, or structural. Still present, though partly concealed and partly solved or avoided, in the works from *L'envol d'Icare* to *Le paradis perdu*, they are at last being surmounted in the works of the late 1930s and early 40s. It is in these late works, rather than in either version of the Icarus myth, that Markevitch was beginning to reveal his true stature and a new promise that tragically was never fulfilled.

WORKS

(*selective list*)

Vocal: Cantate (J. Cocteau), S, male chorus, orch, 1929–30; Psaume, S, small orch, opt. unison 6 S, 1933; Le paradis perdu (orat, Markevitch, after J. Milton), S, Mez, T, mixed chorus, orch, 1933–5; poèmes (Cocteau, Plato, J. von Goethe), high v, pf, 1935, no.3 arr. opt. C, small orch as Hymne à la mort, 1936 [incl. in rev. of orch work Hymnes]; La taille de l'homme: concert inachevé (C.F. Ramuz), S, 12 insts, 1937 [orig. title L'oraison musicale: concert en 2 parties]; Lorenzo il magnifico (L. de Medici), S, orch, 1940

Orch: Sinfonietta, F, 1928–9; Pf Conc., 1929; Conc. grosso, 1930; Partita, pf, small orch, 1931; Rebus, ballet suite, 1931; Cinéma-ouverture, 1932; L'envol d'Icare, ballet, 1932, arr. 2 pf, 4 perc, rev. for orch as Icare, 1943; Hymnes, small orch, 1932–3, rev. for opt. C, small orch, 1980; Petite suite d'après Schumann, small orch, 1933; Cantique d'amour, 1936; Le nouvel âge, 1937, version for 2 pf; Le bleu Danube, 1944 [after J. Strauss]

Chbr: Noces, suite, pf, 1925; Sérénade, vn, cl, bn, 1931; Galop, opt. fl, ob, cl, bn, hn, pf trio, perc, 1932; Stefan le poète, pf, 1939–40; Variations, fugue et envoi sur un thème d'Handel, pf, 1941

Arrs.: M.P. Moussorgsky: 6 Songs, 1v, orch, 1945; M.I. Glinka: Russian Ov., 1946; J.S. Bach: Das musikalische Opfer, small orch, 1949–50

Edn: L. van Beethoven: Symphonies (Luynes, 1982)

Principal publishers: Boosey & Hawkes, Schott, Suvini Zerboni

DAVID DREW with NOËL GOODWIN

Markham, Ricardus (*fl* *c*1425–50). Composer, presumably English. His solitary Credo survives in an 'English' fascicle in the Trent manuscripts (2nd layer, *I-TRmp* 92). This is a fine setting after the late manner of Power and Dunstaple, with duets for each possible combination of the three voices; the chant is not used; in full sections the text is split between i and ii; the tonality hovers remarkably between G and F.

BRIAN TROWELL

Markiert (Ger.: 'marked'). *See* MARCATO.

Markig (Ger.: 'vigorous'). A direction found particularly on long violin lines by Bruckner: *markig, lang gezogen* ('energetic, with long bows') appears in the Adagio of his Sixth Symphony, and *sehr markig* in the finale of his Eighth.

Markl, Jaroslav (*b* Dvůr Králové nad Labem, 14 June 1931; *d* Prague, 28 Dec 1985). Czech musicologist. He studied musicology, ethnography and folklore under Očadlík and Sychra at Prague University (1949–53), where he took the doctorate in 1953 with a dissertation on realism in Czech folksong. Subsequently he worked as a research assistant and then as assistant lecturer at the musicology department of Prague University, transferring in 1958 to the Institute for Ethnographical and Folklore Studies of the Czechoslovak Academy of Sciences in Prague, where he became head of the music department. He obtained the CSc in 1958 for his work on early folksong collection in Bohemia. In his research he systematically developed his particular interest in folk music, concentrating at first on Czech folklore, but later including Slavonic and Balkan studies. He also undertook extensive work as a popularizer, particularly on Czech radio, and worked in the organization of the Czech committee of the International Folk Music Council.

JOSEF BEK

Markordt, Siegfried (*b* Hanover, *c*1720; *d* Amsterdam, bur. 10 April 1781). Dutch music publisher and musician of German birth. On 27 August 1765 Markordt became a burgher of Amsterdam. He founded his music shop and publishing house 'à la Salle d'Estampes au haut de l'Escalier de la Bourse'. In the years 1766 to 1780 Markordt was active both as a double bass player and as a supplier of strings and repairer of instruments in the chapel of the Mozes- en Ääronkerk. After his death the firm was continued by his widow Johanna van Rhee and his son Daniel Jan, after 1785 'Sur le Rokkin, vis à vis la Barque de la Haye'. What happened to the firm after the death of his widow (bur. 12 March 1801) is unclear. On 2 January 1808 the firm of J.J. Hummel announced the purchase of Markordt's music business.

The firm of Markordt made an important contribution to music publishing in Amsterdam in the second half of the 18th century. Besides many instrumental works (symphonies, concertos, chamber music) by J.C. Bach, J.-J. Boutmy, Dittersdorf, Esser, Just, F.P. Ricci, Schwindl and others, Markordt published much French operatic music (e.g. more than 30 volumes of *Extrait d'airs choisies*

des operas nouveaux) by, among others, Dalayrac, Dezède, Gaveaux, Grétry, Monsigny and F.-A. Philidor. An important Dutch psalm-book by C.G. Tubel (*c*1770) was published together with J. Wernink.

PAUL VAN REIJEN

Markov, Albert (*b* Kharkiv, 8 May 1933). American violinist of Ukranian birth. He studied with P. Stolyarsky and J. Meksin at the Music School, Sverdlovsk, A. Lescinsky at the Music School, Kharkiv, and Y. Yankelevich and (for composition) Khachaturian at the Gnesin Music Institute, Moscow. He made his concerto début in 1958 with the Moscow PO, and won gold medals in the Queen Elisabeth Competition in Brussels (1959) and the Moscow Tchaikovsky Competition (1962). Markov subsequently appeared as a soloist throughout the USSR and Eastern Europe, and as a member of the Moscow State Philharmonic Soloists gave concerts with Rostropovich, Kogan, David Oistrakh and Richter. After Yankelevich's death in 1960 Markov succeeded him as professor at the Gnesin Music Institute. He emigrated to the USA in 1975 and the following year made his recital début in New York and his US orchestral début with the Houston SO. He became director of the Rondo Chamber Orchestra in 1981 and in 1995 founded the Albert Markov Music Festival in Nova Scotia. He was appointed a professor at the Manhattan School of Music in 1981, and has published *Violin Technique* (New York, 1984) and editions of violin repertory. Markov has composed a violin concerto (1988) and many works for solo violin and string ensemble, and has made numerous recordings, including his own violin concerto with the Russian National Orchestra. His playing displays an infallible technique, a sweet, rich tone and a profound musical intellect. He plays a Peresson violin dated 1976.

For bibliography, *see* MARKOV, ALEXANDER.

MARGARET CAMPBELL

Markov, Alexander (*b* Moscow, 24 Jan 1963). American violinist of Russian birth. He studied at the Central Music School, Moscow, with Andrievsky and his father, Albert Markov, the Gnesin music school with Markov and the Manhattan School of Music, New York. He played at Carnegie Hall aged 16, won the gold medal in the Paganini International Competition in 1982 and made his recital début at Carnegie Hall in 1983. His recording of Paganini's 24 Caprices was issued on CD and video, and also televised in several European countries. He has also recorded Paganini's first and second concertos. Markov has established himself as an international soloist and plays throughout Europe and the USA: he made his British début in 1993 with the BBC PO, and his Wigmore Hall début playing all 24 Paganini Caprices in 1997. Possessed of a brilliant technique, he is an invariably stylish and unsentimental artist. He plays an exceptionally fine Peresson violin dated 1970.

MARGARET CAMPBELL

Markova, Dame **Alicia** [Marks, Lilian Alicia] (*b* London, 1 Dec 1910). English dancer. *See* BALLET, §3(ii).

Markowski, Andrzej [Andrzejewski, Marek] (*b* Lublin, 22 Aug 1924; *d* Warsaw, 30 Oct 1986). Polish conductor and composer. He studied theory and composition with A. Malawski in Lublin (1939–41) and composition with Alec Rowley at Trinity College of Music, London (1946–7); at the Warsaw State High School he studied composition with Piotr Rytel and Tadeusz Szeligowski and conducting with Witold Rowicki (1947–55). He began conducting at the Szczecin theatre (1949–50) and was conductor of the Poznań PO (1954–5) the Silesian PO at Katowice (1955–9) and the Kraków PO (1959–64). At Kraków he organized an annual festival, Kraków Spring for Young Musicians. From 1965 to 1969 he was conductor of the Wrocław State Philharmonia and in 1966 he initiated an oratorio and cantata festival, Wratislavia Cantans. From 1971 to 1978 he was conductor of the Warsaw National PO. He was a distinguished interpreter of contemporary music and often toured abroad, taking part in festivals of contemporary music and conducting works by Polish composers. As a composer he was active mainly in film music, on which he lectured at Darmstadt, and his compositions included instrumental and chamber music, *musique concrète* and electronic music, and music for the theatre. He received a State Prize in 1974.

MIECZYSŁAWA HANUSZEWSKA

Marks, Edward B(ennett) (*b* Troy, NY, 28 Nov 1865; *d* Mineola, NY, 17 Dec 1945). American music publisher. In 1894 he and Joseph Stern established in New York the music publishing firm of Joseph W. Stern & Company. In 1920 Marks purchased Stern's interest and renamed the firm the Edward B. Marks Music Company; in 1932 it became the Edward B. Marks Music Corporation. The firm was a leading publisher of American and Latin American popular music. One of its earliest successes was *The Little Lost Child* (1894), written by Marks and Stern, which sold more than a million copies and was the first song to be introduced to singing audiences through illustrated slides. The firm also issued *Sweet Rosie O'Grady* (1896), *Take back your gold* (1897), *Under the Bamboo Tree* (1902), *Malagueña* (1928), *The Peanut Vendor* (1931), *Paper Doll* (1942) and *More* (1963). During the 1930s Marks began to publish much serious music; its composers include Beglarian, Bolcom, Chatman, Curtis-Smith, Davidovsky, Dello Joio, Michael Ellison, Robert Jager, Ernesto Lecuona, Moevs, Ptaszynska, Alfred Reed, Sessions, Alan Shulman, Hale Smith, Thorne, Gilbert Trythall and Ward-Steinman. After Marks's death his son Herbert Edward Marks served as president of the firm until 1971. In 1983 the firm was purchased by Freddy Bienstock and the Hammerstein Music and Theatre Company. In 1984 Hal Leonard became the distributor of its printed publications and Theodore Presser the agent for its rental music. The complete Marks catalogue, which includes the music publishers Alameda, Bolcom, George M. Cohan and Piedmont, is administered by Bienstock's firm Carlin America.

Markull, Friedrich Wilhelm (*b* Reichenbach, nr Elbing, Prussia, 17 Feb 1816; *d* Danzig [now Gdańsk], 30 April 1887). German organist, pianist and composer. He studied composition and organ under Friedrich Schneider at Dessau. In 1836 he was appointed principal organist at the Marienkirche in Danzig, and conductor of the Gesangverein there. He enjoyed a high reputation as a pianist and gave excellent concerts of chamber music, besides acting as critic for the *Danziger Zeitung*. His compositions, about 50 of which were published, include three operas, *Maja und Alpino, oder Die bezauberte Rose* (1843), *Der König von Zion* (1850) and *Das Walpurgisfest* (1855); two oratorios, *Johannes der Täufer* (1845) and *Das Gedächtniss der Entschlafenen* (a requiem using selected texts from the German Bible, produced by Spohr at Kassel in 1856), his most significant works; Psalm lxxxvi; several symphonies; numerous songs and characteristic piano pieces; several works for organ including a *Choralbuch* (1845) which shows the influence of the Bach revival; and keyboard arrangements of the symphonies of Haydn, Mozart, Beethoven and Schubert.

HERBERT S. OAKELEY

Marlboro Music School and Festival. Chamber music programme founded in Marlboro, Vermont, in 1951 by Rudolf Serkin (former artistic director), Adolf and Hermann Busch, and Marcel and Louis Moyse. They conceived it as a workshop in which there would be no students or teachers, only participants. Casals, Schneider, Galimir and Horszowski are among the artists who participated regularly. Public performances are given weekly at Marlboro College during a five-week summer season. The festival has reached a wide audience through its recording series, the many taped performances it makes available to broadcasting stations, and through Musicians from Marlboro, a touring programme created in 1965 which engages musicians from the summer school and festival to perform throughout the USA. The ensembles often combine veteran performers with less experienced players, consistent with the ideals of the festival.

JAMES CHUTE/R

Marle, Nicolas de (*fl* 1544–68). French composer. The title-page of his parody mass on Mithou's *O gente brunette* printed by Du Chemin in 1568 describes him as choirmaster at Noyon Cathedral. Both his other masses are also parodies, on *Je suis desheritée* by Cadéac and on *Panis quem ego dabo* by Lupus. Marle's 12 chansons, printed mainly by Attaingnant and Du Chemin between 1544 and 1554, represent both types then current: predominantly homophonic settings of courtly *épigrammes* by François I, Marot and others, and light imitative and syllabic settings of rustic anecdotes, for example *Frere Jehan, Un gros lourdault* (both in RISM 1550^{5}) and *Une bergiere* (1545^{10}; ed. in SCC, xix, 1991).

WORKS
all for 4 voices

Missa ad imitationem moduli (Je suis desheritée) (Paris, 1557); Kyrie I ed. R. Mitjana, *Catalogue critique et descriptif des imprimés de musique des XVIe et XVIIe siècles, conservés à la bibliothèque de l'Université royale d'Upsala*, i (Uppsala, 1911), 269

Missa ad imitationem moduli (Panis quem ego dabo) (Paris, 1558)

Missa ... ad imitationem cantionis 'O gente brunette' (Paris, 1568)

12 chansons, 1544^{7}, 1545^{10}, 1550^{5}, 1550^{7}, 1550^{12}, 1551^{9}, 1554^{21}; 5 ed. in RRMR, xxxviii (1981); 1 ed. in SCC, xix (1991)

FRANK DOBBINS

Marley, Bob [Robert Nesta] (*b* Nine Mile, nr St Ann's Bay, Jamaica, 6 Feb 1945; *d* Miami, 11 May 1981). Jamaican reggae singer, songwriter, guitarist and bandleader. The son of a Jamaican farm girl and an Anglo-Jamaican agriculture inspector, he was raised in the rural parish of St Ann before moving to Kingston, aged seven, to be closer to his father. At 15 he was singing under the tutelage of established vocalists Joe Higgs and Desmond Dekker, and made his first ska record, *Judge Not*, as Robert Marley in 1960. In 1963, with Peter Tosh and Bunny Livingston, he formed the Wailers, a harmony trio patterned after the Impressions, whose songs the Wailers covered before recording their own hits, *Simmer Down* (1964) and *Put it On* (1965) for the producer Clement Dodd. During the 1960s the Wailers evolved with Jamaican pop music through the rude boy, rock steady and early reggae styles, working with the producers Leslie Kong and especially Lee 'Scratch' Perry, whose rhythm section, Aston Barrett (bass guitar) and his brother Carlton Barrett (drums), was gradually absorbed into the Wailers. By 1972 the group had recorded their biggest Jamaican hit, *Trenchtown Rock* (1971), entered into an informal alliance with Prime Minister Michael Manley's political party and embraced the tenets of the Rastafarians, Jamaica's alternative spiritual nationality. In 1972 the group began to work with Chris Blackwell, whose Island Records label released the first Wailers album, *Catch a Fire*, that year. After *Burnin'* (1973), Tosh and Livingston left and the group became known as Bob Marley and the Wailers.

Emerging from Jamaica at the head of the burgeoning reggae movement of the 1970s, Marley rebuilt his group, adding a female vocal trio that included his wife, Rita, and electric guitars as Blackwell pushed Jamaican music towards a rock audience. Thus Marley built a worldwide following for reggae and his hypnotic performances and revolutionary anthems. His high voice conveyed an unshakable conviction in his lyrics of protest and spirituality, accented by his trademark arsenal of trills, yodels and scat vocalisms. Albums like *Rastaman Vibration* (1976), *Survival* (1979) and *Uprising* (1980) established Marley as an international champion of freedom and human rights. A hero of anti-colonial movements, his song *Zimbabwe* (1979) was so inspirational to the guerrilla army fighting for that country's independence that Marley was invited to perform at the ceremony marking the end of British rule in 1980. Diagnosed with cancer in 1977, he refused a recommended amputation and continued to tour until his illness forced the

cancellation of a world tour in September 1980. On his deathbed he was awarded the Jamaican Order of Merit.

Since his death, Marley has become a secular saint and avatar of Third World culture, and his image lives on T-shirts around the world. His performances, with their incantatory power backed by the propulsive swing of the reggae bassline, have become legendary. Enormously significant as a singer and songwriter, his influence is indelibly imprinted on Jamaican music, rock and especially rap and areas of British dance music.

STEPHEN DAVIS

Marliani, Count **Marco Aurelio** (*b* Milan, Aug 1805; *d* Bologna, 8 May 1849). Italian composer. Born into a wealthy family, he studied philosophy at Siena, and at the same time studied music privately. He graduated in 1830 and moved to Paris the same year, partly for political reasons (he had given all his money to the Carbonarist cause). He was a singing teacher in Paris, where Giulia Grisi was among his pupils, he was also appointed consul-general of Spain. Meanwhile he made progress in composition, benefiting from Rossini's teaching, and made his début as an opera composer with *Il bravo* in 1834. He returned to Italy in 1847, and the following year joined the army as captain of the general staff in the first war of independence; for his acts of courage he was promoted to the rank of major. He died during a battle against the Austrians. Marliani's best known and most successful opera, *La xacarilla*, is musically clear, fluent and elegant, though it owes its success partly to Scribe's skilful libretto.(GroveO, F. Bussi)

WORKS

Ops: Il bravo (dramma tragico, 3, A. Berrettoni), Paris, Italien, 1 Feb 1834; Le marchand forain (commedia, 3, E. Planard and P. Duport), Paris, OC (Bourse), 1 Oct 1834; Ildegonda (os, 3, P. Giannone), Paris, Italien, 7 March 1837; La xacarilla (3, E. Scribe), Paris, Opéra, 28 Oct 1839; as Lazzarillo, o I contrabbandieri (ob, 2, Berrettoni), Venice, S Benedetto, 23 Feb 1842; Gusmano il buono, o L'assedio di Tarifa (tragedia lirica, 3, G.C. Mattioli), Bologna, Comunale, 7 Nov 1847
Other: La gipsy, ballet, 1839, collab. M. Benoist and A. Thomas; songs, 1v, pf; potpourris, pf, and pf 4 hands [on themes from La xacarilla]

FRANCESCO BUSSI

Marlowe [Sapira], **Sylvia** (*b* New York, 26 Sept 1908; *d* New York, 10 Dec 1981). American harpsichordist. After learning the piano and organ at school and university, she continued her musical education at the Ecole Normale in Paris, studying the piano and organ, and composition with Nadia Boulanger. It was there that she first heard Landowska, whose harpsichord playing impressed her deeply, although she did not study with her until years later. On returning to the USA, Marlowe received a national music award to perform Bach's *Das wohltemperirte Clavier* on the piano in a series of radio broadcasts. Gradually she gave up the piano in favour of the harpsichord. For some years she specialized in radio broadcasting, presenting Renaissance and Baroque solo and chamber works as well as a wide range of contemporary music, including jazz. Although she never lost her interest in popular American music, and even performed in nightclubs, she became increasingly concerned with concert recitals, performances with orchestra, and recordings. She made concert tours in North and South America, Europe and East Asia. In 1948 Marlowe was appointed to the faculty of the Mannes College of Music in New York and in 1957 she organized the Harpsichord Music Society, which aimed at fostering the creation of a contemporary repertory of solos and chamber works. She commissioned works by Carter, Haieff, Hovhaness, Reiti, Rorem and Sauguet. Her repertory was extensive and her sensitive playing was distinguished by a highly developed sense of style. She made many recordings and edited harpsichord works of Couperin.

HOWARD SCHOTT/R

Marmontel, Antoine-François (*b* Clermont-Ferrand, 16 July 1816; *d* Paris, 16 Jan 1898). French pianist and teacher. He was a pupil of Zimmermann at the Paris Conservatoire where he won the *premier prix* in 1832, playing a concerto by Alkan. He then studied composition with Le Sueur and in 1835 won a *deuxième prix* in counterpoint and fugue with Halévy. He taught solfège at the Conservatoire from 1837 and piano as a temporary replacement for Herz in 1846. In 1848 he succeeded Zimmermann, and he retained this class until his retirement in 1887. His reputation as a teacher was outstanding; his pupils included Albéniz, Debussy, d'Indy, Diémer, MacDowell, Pierné and Planté. He also taught his son Antonin-Emile-Louis Corbaz (*b* Paris, 24 Nov 1850; *d* Paris, 23 July 1907), who won the *premier prix* in piano at the Conservatoire in 1867 and taught piano there from 1901 until his death.

Marmontel's many piano studies and other piano solo pieces including sonatas number about 200. He also edited more than 300 piano works for Heugel's series 'Ecole classique du piano'.

DAVID CHARLTON/CHARLES TIMBRELL

Marmontel, Jean François (*b* Bort, Corrèze, 11 July 1723; *d* Abloville, Eure, 31 Dec 1799). French man of letters and librettist. Educated by Jesuits at Mauriac and Clermont-Ferrand, he was at first destined for the church. His success as *lauréat des jeux floraux* at Toulouse (1746, 1747) and the encouragement of Voltaire led him to Paris. Declaring himself too inexperienced in real life to follow Voltaire's advice to write comedies, he began his theatrical career by imitating the master in tragedy. *Denys le tyran*

(1748), was exceptionally well received, but its successors failed and he abandoned the genre.

Marmontel was befriended by Mme de Pompadour, through whose patronage he became secrétaire des bâtiments du roi, and by La Pouplinière. Through him he met Rameau, for whom he wrote four librettos. He was, however, already in sympathy with Encyclopedist musical preferences, which were then turning towards Italy. As a friend of Diderot and d'Alembert he contributed literary and musical articles to the *Encyclopédie*, including one on declamation and another on criticism. He also contributed to the *Mercure de France*, of which he was editor from 1758 to 1760. He could usually count, in later years, on a friendly reception from the *Mercure* towards his collaborations with musicians. He was elected to the Académie Française in 1763 and succeeded d'Alembert as its permanent secretary in 1783. His literary works include the *Contes moraux*, some of which (*La bergère des alpes*, *Annette et Lubin*, *Les mariages samnites*, *L'amitié à l'épreuve*, for example) were made into operas by Marmontel and others, and novels, of which *Les Incas* provided the subject of Méhul's *Cora*. His philosophical novel *Bélisaire* (1767), in the tradition of Fénélon's *Télémaque*, was roundly condemned by authority and defended by Voltaire, and became his greatest literary triumph.

Marmontel's librettos for Rameau include the charming *La guirlande* and other pastoral pieces, or single acts for *opéras-ballets*. He wrote his first *tragédie lyrique* for Dauvergne as part of an attempt to regenerate French opera by a modest admixture of Italian music. His principal librettos, however, were for Grétry and Niccolò Piccinni. *Le Huron*, in 1768, established Grétry's reputation, and was followed by successful comedies and the ambitious magic opera *Zémire et Azor*. The basis in fairy-tale is characteristic of the author of the *Contes*, and the varied emotions of the Beauty and the Beast story stimulated Grétry to his most ambitious score to date. Even without the later setting by Spohr, this became Marmontel's most widely performed work. The poem of *Céphale et Procris* was blamed for the opera's comparative failure, which led to a falling-out with the composer.

Piccinni became Marmontel's pupil in French language and accentuation. Marmontel wrote the most abrasive of Piccinnist pamphlets, *Essai sur les révolutions de la musique en France*, in which he compared the melodic truth of the periodic style established by Vinci with the alleged barbarity of Gluck. The *Essai* was printed twice in 1777 and reprinted, with profuse criticisms, in Leblond's 1781 collection, *Mémoires pour servir à l'histoire de la révolution dans la musique* (it is also reprinted in Lesure). Marmontel responded to the sallies of Arnaud with a satirical poem, *Polymnie*, which was widely circulated but not printed until 1820.

Marmontel wanted to reform French opera along Encyclopedist lines, keeping its design while using Italian music. The music he encouraged was 'reformed', paradoxically, on lines suggested by Gluck, being free of lengthy ritornellos and showy roulades. Following work on *Bellérophon* in 1773, he turned to the father of the *tragédie lyrique*, becoming known as 'le savetier de Quinault'. According to Ginguené he adapted *Thésée*, *Isis*, *Roland*, *Atys*, *Amadis* and *Persée*. He retained the choruses and *divertissements* and most of the recitative, but made space for arias and ensembles; he also condensed the action into three acts, with drastic results in *Persée*. Only three adaptations were used; Gossec's *Thésée* and J.C. Bach's *Amadis* were 'marmontelisés', as Grimm put it, by others. *Atys* is the most satisfactory adaptation, with nearly all the action retained, but it was spoilt on its revival by a contrived happy ending. Marmontel also adapted Metastasio's *Demofoonte* for Cherubini, again dangerously simplifying the plot.

Of Marmontel's original librettos, the comedies and pastorals are attractively written, while *Didon* and *Pénélope* are distinguished tragedies; the former, coming at the height of Piccinni's popularity, was Marmontel's second most enduring theatrical work. Out of sympathy with the Revolution, Marmontel retired to the country, where he enjoyed enough peace to write his memoirs (published in *Oeuvres posthumes*, i–iv, 1804). In these he gave a full, if naturally biassed, account of his theatrical career and his collaborations with composers. The accounts of his own youth and of French society make this book perhaps his most enduring achievement.

WRITINGS

LIBRETTOS

La guirlande ou Les fleurs enchantées (acte de ballet), Rameau, 1751; Acante et Céphise, ou La sympathie (pastorale-héroïque, 3), Rameau, 1751; Les sybarites (entrée de ballet), Rameau, 1753 (also in revival of Rameau, Les surprises de l'Amour, 1757); Lysis et Délie (pastorale), Rameau, comp. 1753; Hercule mourant (tragédie lyrique), Dauvergne, 1761; Annette et Lubin (comédie, with C.-S. Favart), La Borde, 1762 (1768, as La nouvelle Annette); La bergère des alpes (pastorale), Kohaut, 1766;

Le Huron (oc, after Voltaire: *L'ingénu*), Grétry, 1768; Lucile (comédie), Grétry, 1769; Silvain (comédie, after S. Gessner: *Erast*), Grétry, 1770 (Ger., Benda, 1776); L'ami de la maison (comédie), Grétry, 1771; Zémire et Azor (comédie-ballet, after J.M. Le Prince de Beaumont: *La belle et la bête*), Grétry, 1771 (Ger., Spohr, 1819); Bellérophon (op, after T. Corneille and B. le Bovier de Fontenelle), Lully, arr. P.-M. Berton and L. Granier, 1773; Céphale et Procris, ou L'amour conjugal (tragédie lyrique, after Ovid), Grétry, 1773

La fausse magie (oc), Grétry, 1775; Roland (tragédie lyrique, after P. Quinault), N. Piccinni, 1778; Atys (tragédie lyrique, after Quinault), N. Piccinni, 1780, rev. 1783; Persée (tragédie lyrique, after Quinault), Philidor, 1780; Le Sigisbée, ou Le fat corrigé, 1782 (comédie), L. Piccinni, 1804; Didon (tragédie lyrique), N. Piccinni, 1783; Le dormeur éveillé (oc), N. Piccinni, 1783; Pénélope (tragédie lyrique), N. Piccinni, 1785; Démophoön (tragédie lyrique, after P. Metastasio), Cherubini, 1788; Antigone (opéra lyrique), Zingarelli, 1790; ? Armide, ou les Statues (op), L.-F. Boutmy (n.d.)

JULIAN RUSHTON

Maronite church music. *See* SYRIAN CHURCH MUSIC.

Maros, Miklós (*b* Pécs, 14 Nov 1943). Swedish composer of Hungarian birth. The son of the composer Rudolf Maros, he studied composition with Ferenc Szabó at the Liszt Academy in Budapest. He then went to Sweden at the suggestion of Ligeti and continued his studies with Lidholm and Ligeti at the Royal College of Music in Stockholm (1968–72). He taught electro-acoustic music at the Electronic Music Studio (EMS) in Stockholm (1971–8) and at the Royal College of Music (1976–80). Together with his wife, the Hungarian-born singer Ilona Marós, he formed the Marós Ensemble in 1972, which focussed on contemporary music. In 1980–81 he spent a year in West Berlin as a DAAD scholar. He has received a lifetime's artist's award from the Swedish government.

Maros was one of a small number of composers in Sweden who worked, early on, with instrumental and electro-acoustic music in parallel. His five *Manipulations* are live electronic arrangements using the 'Svensson Box' of living sound sources such as voice, bassoon, cello, zither and trumpet. His list of works covers most instrumental combinations, often with vocal elements intended especially for his wife's high lyrical soprano voice. His music is often a multi-dimensional and oscillating musical fabric, built on solid traditional ground but open to new sound and harmony effects in an advanced approach to timbre; there are also elements of quarter-tones and microtonality.

ROLF HAGLUND

Maros, Rudolf (*b* Stachy, Bohemia, 19 Jan 1917; *d* Budapest, 3 Aug 1982). Hungarian composer and teacher. He graduated from the teachers' training college, in Győr in 1937 and studied with Kodály (composition) and Temesváry (viola) at the Budapest Academy of Music (1939–42), playing the viola during this period in a Budapest orchestra. In 1942 he took a teaching appointment at the secondary music school in Pécs, and in summer 1949 he studied composition in Alois Hába's master class in Prague. That year he was appointed to the staff of the Budapest Academy, where he teaches wind chamber music, theory and orchestration. He attended several Darmstadt summer courses from 1959, and in 1971 he went to West Berlin on a fellowship.

The characteristic features of Maros's early music, which was strongly influenced by Kodály, are simple formal patterns, diatonic harmonized melody and a folkloristic style. In the second half of the 1950s his music underwent a gradual change until in the orchestral *Ricercare* (1959) he produced his first 12-note serial piece. He soon moved away from strict serialism, building such works as the *Cinque studi* for orchestra (1960) on the manipulation of small motivic units defined by interval. From this he moved on to the sensitive exploitation of shifting and opposed colours, notably in the *Eufonia* series for orchestra (1963–5), in which 12-note clusters undergo subtle changes of timbre and octave placement. Rhythm here is quite fluid and there is almost no isolated melody; these aspects became subjects of interest again in *Gemma* (1968) and *Monumentum* (1969), the latter a powerful impression of the year 1945, with hope emerging from turmoil. Subsequent works reveal some integration of traditional elements into the style developed in the compositions of the 1960s; many of Maros's works from all periods show a Bartókian delight in arch forms.

WORKS
(*selective list*)

Ballets: Bányászballada [Miner's Ballad], 1961; Quadro soltos (Musica da ballo), 1968; Reflexionen, 1971; Dance Pictures, 1971; Metropolis, 1972; The Poltroon, 1972

Orch: Bábjáték nyitány [Ov. for a Puppet Show], 1944; Conc. grosso, 1948; Sinfonia, str, 1956; Ricercare, 1959; 5 studi, 1960; Eufonia 1, 1963, 2, 1964, 3, 1965; Gemma, 1968; Monumentum,

1969; Jegyzetek [Notices], str, 1972; Tájképek [Landscapes], str, 1974; Töredék [Fragment], 1977

Chbr and solo inst: 2 str qts, 1947, 1955; Divertimento, str trio, 1956; Musica leggiera, wind qnt, 1956; 6 Bagatelles, org, 1961; Musica da camera, 11 insts, 1966; Suite, harp, 1966; Trio, harp, vn, va, 1967; Consort, wind qnt, 1970; Albumblätter, db, 1973; Trio, vn, va, hpd, 1974; 4 tanulmány [4 Studies], 4 perc, 1975

Vocal: 2 sirató [2 Laments] (S. Weöres), S, ens, 1963; Sirató (Hung. folk texts), S, ens, 1969; Nyúlfark kantáta [A Tiny Cant.] (Weöres), S, A, SAB, pf, str, 1973; Messzesegek [Remoteness], SATB, 1974; Strófák (G. Futó), 1v, perc, hp, 1977

Principal publisher: Editio Musica

F. ANDRÁS WILHEIM

Marot, Clément (*b* Cahors, ?1496; *d* Turin, ?Sept 1544). French poet. After serving Nicolas de Neufville, Seigneur de Villeroy, as a page, and working as a clerk in the law courts of Paris, in 1519 he became secretary to Marguerite d'Angoulême, sister of François I and later Queen of Navarre. When in 1526 and again in 1527 he was imprisoned as a suspected Lutheran he petitioned the king, who interceded on his behalf and appointed him *valet de chambre*. The reaction to a Protestant poster campaign in October 1534 against the Mass ('L'affaire des placards') implicated Marot, who, fearing arrest, fled to Marguerite's court at Navarre and then to Ferrara, where he joined his fellow valet, the singer Jean de Bouchefort, in the retinue of the king's cousin Renée, wife of Duke Ercole II. After the edict of Coucy, which promised amnesty to repentant Protestants, Marot returned to Paris by way of Venice and Lyons in 1536, but he clearly remained an evangelical humanist and continued work (begun at the instigation of Marguerite d'Angoulême) on verse translations of the Psalms. 13 of them were published anonymously at Strasbourg in 1539, set to the tunes that have since been adopted by the Calvinist liturgy. In 1541, a collection of 30, without music, was published, with others, at Antwerp; other editions followed, eventually including translations of 53 psalms. A new threat of persecution induced the poet to seek refuge at Geneva late in 1542. In spite of Calvin's support for continued work on the Psalter, Marot continued to hope for a return to royal favour and at the end of 1543 he left for Savoy and Piedmont, where he died.

Marot was the first poet to achieve real fame throughout French-speaking lands: he was the doyen of the literary world, imitated by almost every poet of the second quarter of the 16th century. His lyric verse was published and reprinted at Paris, Lyons and smaller centres and is frequently found in anonymous anthologies. His psalms were issued outside France in Antwerp, Strasbourg and Geneva, and were immensely popular with both Huguenots and Catholics. His early works (mostly in the *formes fixes*) represent the end of the medieval *rhétoriqueur* tradition, yet even his rondeaux reveal Petrarchan and more recent Italian influences, and the 42 chansons reflect popular tradition refined and polished. Both rondeaux and chansons treat mainly amorous subjects in a brief and impersonal manner avoiding passion and sentimentality. During his first exile he evolved new genres and wrote some of the earliest French sonnets and *épigrammes*. Most of his psalms, like the chansons, are constructed in isometric strophes with alternating masculine and feminine rhyme, but they have infinite variety in structure, metre and versification.

Marot's excellence in short lyric forms, his subtle, witty and graceful style, his artful simplicity and spontaneous language, his brevity, rhythmic vivacity, prosodic precision and metrical sobriety combined to make him the favourite poet of the polyphonic chanson in France and the Low Countries. Of all French poets only Ronsard was set more frequently. More than 200 settings of over 100 texts survive, principally chansons and *épigrammes*. A number of poems appeared in musical settings copied in manuscript or printed collections before they were published in volumes of Marot's verse. The main contemporary composers were Sermisy and Janequin, but some 60 others include Conseil, Le Heurteur, Sandrin, Arcadelt, Gardano, Certon, Willaert and Gombert. After Marot's death most of the settings were by Netherlanders, such as Crecquillon, Canis, Manchicourt, Clemens non Papa, Waelrant, Castro, Turnhout, Faignient, Pevernage and Sweelinck, who were slower in their response to the latest literary fashions. Calvin adopted Marot's 30 psalms for liturgical and domestic use and augmented the small monophonic repertory of the Protestant community at Strasbourg, fitting them to tunes adapted from Catholic, Lutheran or secular models. They were published in 1539 as *Aulcuns pseaulmes et cantiques*, and in 1542 at Geneva, as *La forme des prieres et chantz ecclesiastiques*. An enlarged edition of 50 appeared in 1543, and with translations by Bèze, these became the basis of later Calvinist psalters. Polyphonic settings by Bourgeois, Mornable, Certon, Jambe de Fer, Colin, Janequin and Goudimel reflect their enormous popularity during the next three decades. Marot's elegant and humorous verse was admired during the 17th and 18th centuries but the 19th preferred that of Ronsard and the Pléiade. More recent composers who have used poems by Marot in songs for voice and piano include Ravel, Enescu, Warlock, Binet, Françaix and Rivier.

Although Rollin's thesis that Marot continued the troubadour tradition by composing and singing his own tunes is unsubstantiated, the poet's musical references are often in a more practical vein than the lyrical metaphors of the Pléiade. His references to singing and to many instruments (including the 'double chalumeau' made by Claude Raffi of Lyons) suggest some musicianship on his part. He composed a lament for 'Jean Chauvin Menestrier' who was drowned in the Seine in 1537 and addressed an *épigramme* to the lutenist Alberto da Ripa. *Coq à l'âne*, an epistle addressed to another poet, Lyon Jamet, mentions 'Vermont bassecontre' and there are archival documents linking Marot with other musicians including the cornettist Antoine Poinsson and the flautist Michel Huet. According to Becker the poet fled from Paris in 1534 with Roger (?Pathie), one of François I's chamber musicians. The poet-musician Eustorg de Beaulieu wrote to Marot during his exile in Switzerland, expressing his hope that they would meet, but this wish was probably not fulfilled. Marot's works are edited by G. Defaux (*Oeuvres poétiques complètes*, Paris, 1990–93; *Cinquante pseaumes*, Paris, 1995).

FRANK DOBBINS

Marot [Marotus] **de Caserta, Antonellus.** *See* ANTONELLO DA CASERTA.

Maróthy, János (*b* Budapest, 23 Dec 1925). Hungarian musicologist. After World War II he studied aesthetics with Lukács at Budapest University, taking the doctorate in 1948, and composition with Viski at the Budapest Academy of Music (to 1951); he completed a postgraduate course in musicology with Szabolcsi (1951–4) and in 1959 took the *kandidátus* degree in musicology with a dissertation on the birth of European folksong in the social and musical transformations between antiquity and the Middle Ages. In 1966 he took the DSc with a dissertation on music, the bourgeoisie and the proletariat. Between 1949 and 1951 he edited the Hungarian music reviews *Éneklő nép* and *Új zenei szemle*, and was subsequently appointed assistant lecturer at the Budapest Academy of Music (1955–7). He was appointed associate professor (1974), then professor (1980) of music aesthetics at Budapest University. In 1954 he became a research fellow at the Hungarian Academy of Sciences and from 1961 at its Institute for Musicology. He is a member of the editorial board of the periodicals *Magyar zene* and *Studia musicologica*, and corresponding editor of *Popular Music* (1982–7) and *Musica/Realtà* (1987–).

Maróthy has focussed mainly on the social determinants of music, folk music, workers' songs in Hungary, and the contemporary Hungarian composer Ferenc Szabó; since the late 1970s he has studied a branch of acoustics he has called 'ethomusicology'.

VERA LAMPERT

Marotta, Cesare [Vito; Cesarello] (*b* Sant'Agata, Puglia, *c*1580; *d* Rome, 28 July 1630). Italian composer. He entered the service of Cardinal Montalto in Rome on 26 August 1604. He provided music for numerous stage spectacles, including a set of *intermedi* (1612 and 1616, texts by Guarini) and *Amor pudico* (1614), the first Roman secular opera. All of his surviving works are for solo voice and continuo. *O dell'ombrosa notte amati orrori* (*c*1612) alternates recitative and aria styles stanza by stanza, providing an important precedent for the chamber cantata.

Marotta's wife Ippolita (*b c*1577; *d* Rome, 10 June 1650) entered the service of Cardinal Montalto with her husband. She attained wide fame as a singer of monody and opera, and was favourably compared with Andreana Basile and Francesca Caccini.

JOHN WALTER HILL

Marotta, Erasmo (*b* Randazzo, Sicily, 24 Feb 1576/1578; *d* Palermo, 6 Oct 1641). Italian composer. His precious voice and great inclination for music meant that he was sent to Rome while still an adolescent (see Aguilera). G.P. Flaccomio included him among the nine composers who each set the double madrigal *Le risa a vicenda* (RISM 1598[8]) in competition: the collection was dedicated in Rome on 20 August 1598 to Cardinal Del Monte. Marotta was in the service of Cardinal Mattei in Rome, when on 1 January 1600 he dedicated to him his first book of madrigals for five voices, entitled *Aminta musicale*, a setting of verses from Tasso's *Aminta*. The one exception is *Mentre Madonna*, 'on the air of the passo e mezzo siciliano'.

Marotta was already a priest in the Roman Curia, when in 1610 he applied to join the Society of Jesus. On 10 May 1612 he began to serve his novitiate with the Jesuits in Palermo, transferring in March 1613 to the novitiate in Messina. During Holy Week of that year, in S Nicolò

dei Gentiluomini, Messina, he introduced to Sicily the practice of singing the Passion with solo voices and basso continuo accompaniment, taking the part of Christ himself. He returned to Palermo often, where in 1618 his *intermedi* for the sacred tragedy *Pelagius martyr*, by the Jesuit Fabrizio de Spuches, were performed by order of the Viceroy. His music and singing won overwhelming success, but as a Jesuit priest Marotta was no longer permitted to sing and play in public. Between 1620 and 1622 he was rector of the college at Mineo, a small city near Catania. He returned to Palermo in 1623 and remained there until his death, undertaking diplomatic missions to Rome and Naples (1627–8), and to his native town of Randazzo (1628–9) to supervise the construction of the local college.

A sense of caution may have led him to entrust to a relation, possibly his nephew, Agapito Marotta, the task of editing for three voices his *Raccolta di mottetti* in Palermo in 1635. It contains 36 motets for two to five voices, a psalm, and a Marian litany for five or six voices, all with basso continuo, 'nel grave et affettuoso stile'. The 'well concerted harmony . . . equally gentle and devout' is always dense, full, varied, and filled with bold dissonances and chromaticisms. The composer shows an extraordinary imagination which continually surprises in the effective way the sense of the words is conveyed. Marotta's refined music, particularly advanced in the context of Italian music of the period, has its roots in Sicilian folklore. In contrast with Pietro Vinci, who concealed them, Marotta loved to declare his folkloric subjects in the titles of his compositions: the motet *Sancta Maria a due canti o tenori sopra un'aria siciliana* is based on the traditional song for decanting the must of wine; and the madrigal *Mentre Madonna* contains the oldest written version of the *furnarisca*, the dominant air or tune of Sicilian folklore.

The second tenor's manuscript part of Marotta's Miserere and motets for Fridays in Lent, for eight voices and organ basso continuo, has recently been discovered in the Jesuits' Casa professa in Palermo (see Calagna). A volume in the possession of the Graz court in 1672, described as 'Musica cum quatuor vocibus', is lost (see Federhofer, who misread the composer's name as 'Mazeta'); it was probably a book of madrigals.

WORKS

Le risa a vicenda, madrigal, 5vv (Rome, 1598[8]); ed in MRS, xii (1993)

Aminta musicale . . . il primo libro de' madrigali, 5vv, con un dialogo, 8vv (Venice, 1600); 1 ed. in MRS, vi (1991)

Intermedi for Fabrizio de Spuches, Pelagius martyr (sacra tragedia), Palermo, 1618 (lost)

Raccolta di mottetti, libro primo, 2–5vv, with a psalm, 3vv, and litany, 5 or 6vv, all with bc (Palermo, 1635); ed. in Calagna

Miserere e mottetti per li venerdì di quaresima, 8vv, bc, Palermo, Casa professa, inc.; ed. in Calagna

1 madrigal, 1603[1] (lost), in *VogelB*

LORENZO BIANCONI/PAOLO EMILIO CARAPEZZA

Marpurg, Friedrich Wilhelm (*b* Seehof, nr Wendemark, Brandenburg, 21 Nov 1718; *d* Berlin, 22 May 1795). German critic, journalist, theorist and composer. Gerber claimed that Marpurg had told him that he lived in Paris around 1746; Carl Spazier confirmed this, adding that Marpurg was friendly with Voltaire, D'Alembert and others when he was secretary to a 'General Bodenburg'. This is generally assumed to refer to Generallieutenant Friedrich Rudolph Graf von Rothenburg, a favourite of Frederick the Great and Prussian emissary to Paris in 1744–5, and the dedicatee of Marpurg's *Der critische Musicus an der Spree* (1749–50).

From 1749 to 1763 Marpurg devoted himself almost exclusively to writing and editing books and periodicals about music and to composing and editing lieder and works for keyboard. In 1752, at the request of the heirs of J.S. Bach, he wrote a notable preface for a new edition of *Die Kunst der Fuge*. In 1755 J.G.I. Breitkopf asked him to review the first work printed with Breitkopf's improved system of movable type, and subsequently published many of his works. Their correspondence shows that this was a period of severe financial difficulties for Marpurg, as do various letters from Kirnberger to Forkel. Through Kirnberger's efforts Marpurg obtained a position in the Prussian state lottery in 1763; in 1766 he was appointed director, a post he held until the end of his life. Though there is evidence that he continued to review music and engage in other musical activities after 1763, very little appeared with his signature in his later years.

Marpurg's three periodicals, *Der critische Musicus an der Spree* (1749–50), *Historisch-kritische Beyträge zur Aufnahme der Musik* (1754–62, 1778) and *Kritische Briefe über die Tonkunst* (1760–64), were not only edited but also largely written by him. The intention of the first was to present discussions of the important musical topics of the day, such as the relative merits of French, Italian and German music and performance. Most of these were directed at the middle-class amateur and included several delightful satires on bourgeois musical attitudes. Marpurg also gave his readers a course in elementary music theory and translations of French essays in musical aesthetics such as Grandval's *Essai sur le bon goust en musique* (1732). The *Historisch-kritische Beyträge* were more professional in style and content than the *Critischer Musicus*, including reviews of books about music, short biographies of important musicians, reports on musical inventions and discussions of theoretical questions; an entire issue was devoted to tuning and temperament (1778). The last periodical, the *Kritische Briefe*, employed the format of a collection of letters composed on behalf of an imaginary society very much like that devised by Addison and Steele for their *Spectator*. The letters were addressed to various musicians and most were signed with pseudonyms, all of which seem to have represented Marpurg. The contents are similar to those of the *Historisch-kritische Beyträge* but also include extended polemics with Kirnberger about fugue and with Georg Andreas Sorge over the merits of Rameau's theories, a lengthy series of articles about the composition of recitative, and 59 short musical compositions by contemporaries. In 1786 Marpurg published his *Legende einiger Musikheiligen* consisting mainly of anecdotes about music

and musicians including such contemporaries as Joseph Haydn and the Abbé Vogler. The collection is an imitation of the popular musical almanacs of Forkel and Junker.

At the beginning of his career as a music journalist Marpurg advocated the conventional view that the proper function of art was to move the audience (affective aesthetics) through the imitation of nature. Like most of his German contemporaries he derived his ideas from the works of the early 18th-century French writers on music, including Du Bos, Batteux and Bollioud-Mermet. For example, he doubted the value of purely instrumental music. In time his attitude changed; he accepted and praised modern instrumental music and the focus of his critical concern shifted from the audience to the work itself and even to the composer's relation to the work in question. This change in critical approach is representative of a general change in the 1760s and 1770s in Germany.

Marpurg's didactic works cover keyboard performance, thoroughbass and composition. They are well organized and well written, but neither forward-looking nor original (in certain cases he admitted his debt to others). Of his theoretical treatises, the *Abhandlung von der Fuge* (1753–4) is the encyclopedic and authoritative discussion of fugal practice in late Baroque music. It is systematic in the tradition of Fux, though at the same time up to date in describing and discussing the tonal counterpoint of J.S. Bach, and gathers examples from works by composers from Frescobaldi to Telemann. The many quotations from Bach's music and the numerous references to him as the supreme master of counterpoint and fugue in the preface contribute to the work's historical significance. Marpurg's descriptions of small- and large-scale contrapuntal and fugal procedures, based largely on Bach's works, are forerunners of modern textbook descriptions of the classical fugue. Yet in its own day the subject of the *Abhandlung* was considered old-fashioned: in the preface Marpurg adopted a defensive tone, pleading that fugal technique was as necessary to the *galant* style as it had been to the strict, and the book underwent only one German edition and one in French (his own translation) in his lifetime. The re-publication of the work several times during the first half of the 19th century coincided with the introduction of the music of J.S. Bach to the general public by Zelter, Mendelssohn and their followers.

Marpurg's translation (1757) of D'Alembert's *Elémens de musique* was largely responsible for the propagation of Rameau's theories in Germany. Yet his knowledge of these ideas was defective, leaving him at a disadvantage in his controversies over them with Kirnberger and Sorge. Similarly, Marpurg's knowledge of music history was little better than that of most of his contemporaries, making his efforts in that area of little interest. But his recognition of the importance of original sources is demonstrated by his plea to the readers of his periodicals to assist Martin Gerbert in locating and describing extant medieval manuscripts.

Marpurg's compositions consist largely of strophic songs of the kind composed in north Germany in the mid-18th century. He was very active as a compiler and editor of such songs and of keyboard works suited to amateur performers. Most of his surviving compositions appear in these collections; they are competent but not outstanding. In addition he published a set of six sonatas for keyboard (*c*1755), a collection of fugues (1777) and two collections of chorale preludes. The sonatas are similar to those composed by C.P.E. Bach in the 1740s, the fugues are correct in detail and plan but uninteresting, and the chorale preludes are mostly routine cantus firmus treatments.

WORKS

Kbd: 6 sonate, hpd (Nuremberg, *c*1755); Fughe e capricci, hpd/org, op.1 (Berlin, 1777); Versuch in figurirten Chorälen, org/hpd (Berlin and Amsterdam, *c*1789), Zweyter Versuch (Berlin and Amsterdam, *c*1792); sonata, in Collection recreative, hpd (Nuremberg, *c*1760); rondeau, minuet, in Nebenstunden der Berlinischen Musen, i (Berlin, 1762); 3 canons, in *Berlinische musikalische Zeitung* (4 Jan 1794), 201; variations on Ich schlieff, da träumte mir, *c*1761–3, *D-Bsb* [? intended for Musikalisches Allerley (Berlin, 1761–3)]; Allemande, *Bsb*

Vocal: 11 songs, Ps xxxix, in Musikalisches Allerley (Berlin, 1761–3); song in Nebenstunden der Berlinischen Musen, i (Berlin, 1762); Die schlauen Mädchen, listed in Breitkopf catalogue (1765); at least 4 songs in F.W. Marpurg: *Kritische Briefe über die Tonkunst* (Berlin, 1760–64/*R*); Recueil des [24] chansons (Berlin, 1762), attrib. Marpurg

Collections [all ed. Marpurg]: [38] Neue Lieder zum singen beym Clavier (Berlin, 1756) [22 by Marpurg]; [48] Berlinische Oden und Lieder (Leipzig, 1756) [24 by Marpurg]; Raccolta delle più nuove composizioni di clavicembalo … per l'anno 1756 (Leipzig, 1756) [9 by Marpurg], Raccolta … per l'anno 1757 (Leipzig, 1757) [6 by Marpurg]; [34] Geistliche, moralische und weltliche Oden (Berlin, 1758) [22 by Marpurg]; [32] Geistliche Oden in Melodien gesetzt von einigen Tonkünstlern in Berlin (Berlin, 1758) [16 by Marpurg]; [36] Berlinische Oden und Lieder, ii (Leipzig, 1759) [12 by Marpurg]; Clavierstücke mit einem practischen Unterricht, i (Berlin, 1762) [1 piece by Marpurg], ii (Berlin, 1762) [2 pieces by Marpurg]; [43] Berlinische Oden und Lieder, iii (Leipzig, 1763) [30 by Marpurg]; ?pieces in Friedrich Wilhelm Marpurgs Fugensammlung, i (Berlin, 1758), Herrn Professor Gellerts Oden und Lieder nebst einigen Fabeln … auf das Clavier in die Musik gesetzt (Leipzig, 1759)

WRITINGS

Der critische Musicus an der Spree (Berlin, 1749–50/*R*) [periodical; pubd collectively as *Des critischen Musicus an der Spree erster Band* (Berlin, 1750)]

Die Kunst das Clavier zu spielen, durch den Verfasser des critischen Musicus an der Spree (Berlin, 1750, enlarged 4/1762/*R*; Fr. trans., Berlin, 1756/*R*, as *Principes du clavecin*, 2/1760)

Marquesas Islands. *See* POLYNESIA, §§I, 1, 2(ii), 3 AND II, 3.

Marques Lésbio, António. *See* LÉSBIO, ANTÓNIO MARQUES.

Marqués y García, Pedro Miguel (*b* Palma de Mallorca, 23 May 1843; *d* Palma de Mallorca, 25 Feb 1918). Spanish composer. He studied the violin in Paris with Alard (Sarasate's teacher) and at the Conservatoire; he also became a friend of Berlioz, who gave him lessons in instrumentation. Upon his return to Madrid in 1867 he continued his studies at the Madrid Conservatory with Jesús Monasterio; later he taught as the master's assistant. He was appointed professor of music at the Colegio de la Inclusa and as inspector of music schools.

Marqués was the first Spanish composer to write five symphonies in the standard four-movement form. His First Symphony betrays the influence of Berlioz; its music, subtitled 'historia de una día', is loosely based on a literary plot, and the last movement recapitulates material from the previous movements. He also wrote a popular *Pequeño método de violin* and many zarzuelas, including the very successful *El anillo de hierro*, performed in 1878, and *El monaguillo*, performed in 1891.

ANTONIO IGLESIAS/ANTONI PIZÀ

Márquez (Navarro), (Jesús) Arturo (*b* Álamos, Sonora, 20 Dec 1950). Mexican composer. He studied the piano, the violin and the trombone (1965–8) and then the piano and theory at the Conservatorio Nacional (1970–75). Following composition lessons with Gutiérrez Heras, Quintanar and Ibarra (1976–9), he went to Paris to study with Jacques Castérèrede (1980–82) and later, on a Fulbright fellowship, took the MA in composition at the California Institute of the Arts (1990). Márquez has been, among other appointments, leader of the Navojoa Municipal Band (1969–70) and teacher of composition at the Escuela Nacional de Música (1986–8, 1990–96).

His work has been characterized by a steady exploration of medium and language. This is particularly evident from his numerous interdisciplinary works (theatre, dance, cinema, photography – *Música de cámara*), as well as in his search for new sounds (*Son a Tamayo*, *Ollesta* and others). Nevertheless, Márquez has not solely followed the mixed-media and electro-acoustic route: indeed in the 1990s such works as *Homenaje a Gismonti* and above all his series of *Danzones* employ an accessible idiom in which 20th-century popular urban music, its rhythms and its melodic phrases are incorporated into conventional musical argument. The use of this style – also heard in Márquez's film scores – signals an abandonment of the avant-garde elements of his earlier works.

RICARDO MIRANDA-PÉREZ

Márquez Lacasa, Juan Antonio (*b* Havana, 8 Feb 1945). Cuban composer and conductor. At the age of 18 he worked as an accompanist and composer for stagings at the Guiñol Nacional de Cuba and Teatro Estudio. He went on to graduate in composition at the Instituto Superior de Arte, Havana, in 1981, where his teachers included Ardévol, Fernández Barroso, Duchezne Cuzán, Fariñas and Valera. As a conductor he worked with the orchestra of the Teatro Nacional de Opera y Ballet and the Teatro Lírico Nacional. In 1971 he started working as musical adviser to the Instituto Cubano del Arte e Industria Cinematográficos (ICAIC), and he devoted himself to composition and conducting for the cinema. His name is associated with a large number of films, including animation and documentary (e.g. *El enemigo principal*, *Tupac Amaru*, *Técnicas de duelo* and *Barroco*). With Brouwer, he was artistic director of the Grupo de Experimentación Sonora del ICAIC, responsible for many concerts and for the first recording produced by the group in 1972 on the EGREM label. In 1987 he taught film music editing at the Escuela Internacional de Cine y TV, in Cuba. His music uses many of the technical procedures associated with the vanguard of the 1960s and 70s, though with a tonal harmonic language. The cinema was a significant factor in the stylistic diversity of his music.

WORKS
(*selective list*)

Berceuse, pf, 1968; Str Trio, 1968; Danzón, orch, 1974; Trío para metales, perc, 1974; Wind Qnt, 1975; Sexta primera, str orch, 1976; Una para once, 10 perc, kbd, 1976; Suite al amor, 1v, orch, 1991
Film scores: El enemigo principal (dir. J. Sanfinés), 1972; Tupac Amaru (dir. F. García), 1986; Técnicas de duelo (dir. S. Cabrera), 1987; Barroco (dir. P. Leduc), 1988

VICTORIA ELI RODRÍGUEZ

Marraco, José Sancho. *See* SANCHO MARRACO, JOSÉ.

Marraco y Ferrer, José (*b* Barcelona, 6 April 1835; *d* Barcelona, 7 April 1913). Spanish composer. He was a pupil of Ramón Villanova, and became a violin teacher at the Teatro Principal and choirmaster at the Gran Teatro del Liceo. In 1863 he was appointed *maestro de capilla* at Barcelona Cathedral, where he remained until his death. His most important compositions are a Requiem, performed in 1860, a *Te Deum* for the 25th year of the papacy of Pius IX, a *Sequencia de Pascua* and a symphony for large orchestra.

ANTONIO IGLESIAS

Marri, Ascanio (*b* Siena, *c*1530; *d* Montefiascone, 1575). Italian composer and instrumentalist. In 1546, while still a choirboy at Siena Cathedral (1542–8), he became a supernumerary in the wind band at the Palazzo Pubblico. He gained a permanent post there as trombonist in 1551. By 1570 he was leader of the group and was serving in that capacity in 1575 when he assumed additional duties as *maestro di cappella* of Siena Cathedral, just a few months before his early death. The 15 madrigals of his *Primo libro de madrigali a sei voci* (Venice, 1574), decidedly conservative for the time, demonstrate a solid polyphonic technique and a sure command of the harmonic practices of an earlier generation. His next publication, *Il primo libro de madrigali a cinque voci* (now incomplete), appeared in the year of his death, as did two other five-part madrigals in *Il quinto libro delle Muse* (RISM 1575[12]). For his patrons among the Sienese nobility, several of whom are mentioned in his works, he composed various entertainments, among them a 'cantata pastorale' for May Day. The scenario and texts, though not the music, were later published (Siena, 1589) along with detailed descriptions of the costumes worn by the singers, instrumentalists and others who took part in the performance.

FRANK A. D'ACCONE

Marriner, Sir **Neville** (*b* Lincoln, 15 April 1924). English conductor and violinist. His studies at the RCM were interrupted by wartime military service, after which he returned there and also spent a year at the Paris Conservatoire studying with René Benedetti. A year of teaching at Eton College (1947–8) was followed by practical experience as second violin in the Martin String Quartet, and he also joined Thurston Dart in forming the Jacobean Ensemble, specializing in 17th- and 18th-century music. He taught the violin at the RCM (1949–59), then took lessons in conducting with Pierre Monteux at his summer school at Hancock, Maine. From 1952 he was a violinist with the Philharmonia Orchestra, and for 12 years (1956–68) principal second violin of the LSO.

During this period Marriner formed first the Virtuoso String Trio, and in 1959 the Academy of St Martin-in-the-Fields, which under his longstanding direction has gained many international recording awards. In 1969 he also became musical director of the Los Angeles Chamber Orchestra (a post occupying him for about three months annually), which he introduced to Britain at the 1974 Bath Festival, and afterwards in London. In addition to these appointments he was associate conductor of the Northern Sinfonia (1971–3), and he succeeded André Previn as artistic collaborator with the Greater London Council for the South Bank Summer Music concert series at the Queen Elizabeth Hall, 1975–7. From 1978 to 1986 he was music director and conductor of the Minnesota Orchestra; this appointment brought him frequent guest engagements in the USA, where he was also artistic director of the Meadowbrook Festival, Michigan (1979–84). He returned to Europe in 1986 as music director of the Stuttgart RSO, a post he held until 1989.

Throughout this period he continued to work with the Academy of St Martin-in-the-Fields.

Marriner's experience as an ensemble violinist of sensitive style and responsive skill is reflected in performances distinguished by clarity, buoyant vitality, crisp ensemble and technical polish. He has made numerous recordings, mainly with the Academy of St Martin-in-the-Fields, of music ranging from Corelli, Bach and Handel to Tippett and Maw. His complete Mozart symphonies have been admired for their elegance and athleticism, although some critics have found the later works, and his complete cycle of Schubert symphonies, too preoccupied with surface brightness. Marriner's direction is at its most consistently vital and penetrating in recordings such as his first set of Handel's *Concerti grossi* op.6, Mozart's Requiem, Haydn's *The Creation*, *Il barbiere di Siviglia* and Stravinsky's *Pulcinella* suite. He was made a CBE in 1979 and knighted in 1985.

NOËL GOODWIN

Marrocco, W(illiam) Thomas (*b* West New York, NJ, 5 Dec 1909; *d* Eugene, OR, 1 Jan 1999). American musicologist. He trained as a violinist at the Conservatorio di Musica S Pietro a Majella in Naples and performed for several years with the Roth String Quartet. He attended the Eastman School of Music, where he took the BM in 1934 and, after teaching at Elmira College (1936–9), the MM in 1940. He was a visiting instructor at Iowa State University from 1945 to 1946. From 1946 to 1949 he taught violin and music history at the University of Kansas. From 1950 to 1980 he was professor of music at the University of California at Los Angeles, where in 1952 he completed his doctorate with a dissertation on Jacopo da Bologna. In 1976 he spent a period at the Chinese University of Hong Kong as associate director of the University of California Study Centre there, and as visiting professor of music (1969–70).

Marrocco specialized in the music of 14th-century Italy. He edited the entire body of Italian secular music of the Ars Nova for L'Oiseau-Lyre and published separate editions of Italian cacce and the works of Jacopo da Bologna. He was also interested in early American music; his *Music in America*, edited with H. Gleason, was one of the first such anthologies and provides particularly valuable examples of the New England and Southern folk traditions.

PAULA MORGAN

Mars, Jean Odéo de. *See* DEMARS, JEAN ODÉO.

Marsalis, Branford (Iweanya) (*b* Breaux Bridge, LA, 1960). American jazz and popular saxophonist, brother of Wynton Marsalis. After studying at Southern University, Louisiana, and Berklee College of Music, he played alto and baritone saxophone with Art Blakey's Jazz Messengers for five months and then toured with Clark Terry. He spent three years playing tenor in his brother Wynton's quintet during which time he also recorded with such musicians as Dizzy Gillespie and Miles Davis (he appears on Davis's album *Decoy*; 1983–4, Col.), and in 1983 he toured with Wynton, Ron Carter, Herbie Hancock and Tony Williams as the quintet V.S.O.P. II. In 1985 he joined a group led by the English rock singer Sting, which included other jazz musicians but played in a combination of styles including funk, rock and soul, as can be heard on the live album *Bring on the Night* (A&M, 1985). Marsalis then worked with his own quintet and achieved popular acclaim in 1987 with a video of his bop version of *Royal Garden Blues* on which he played soprano. Later he renewed his associations with Sting for further recordings (1987 and 1989) and an international tour (1988). In 1994 Marsalis recorded an album for Columbia entitled *Buckshot LeFonque* (a pseudonym used by Cannonball Adderley), which incorporated a combination of styles including blues, funk, heavy metal, hip-hop, jazz, rap and reggae and used samples from the work of John Coltrane, Duke Ellington and James Brown. Although he began his career in the shadow of his brother, as part of a movement which aimed at reviving jazz styles of the 1930s to 60s (as on his album *Trio Jeepy*; 1988, Col.), Branford is a skilful performer whose versatility and broadminded approach has resulted in some of the more innovatory uses of jazz as a contemporary medium.

DAVID WILD/R

Marsalis, Wynton (Learson) (*b* New Orleans, 18 Oct 1961). American trumpeter, composer, bandleader and educationist, brother of Branford Marsalis. From an early age he studied both jazz and classical music. When he was 14 he performed Haydn's Trumpet Concerto with the New Orleans PO and while a student at the Juilliard School he joined Art Blakey's Jazz Messengers (1980). He toured in a quartet with Herbie Hancock, Ron Carter and Tony Williams and recorded his first album as leader (1981), then in early 1982 left Blakey to form a quintet (1982–5) with his brother Branford; he also toured with Hancock in 1983 as a member of the quintet V.S.O.P. II. In 1984 he became the first musician to win Grammy awards for both a jazz recording and a classical recording. Marsalis completed his first large-scale suite, *Soul Gestures in Southern Blues*, in 1988.

His virtuosity and ability to articulate his thoughts on music brought him respect from powerful musical circles that had never before been willing to take jazz seriously. Thus in 1987 at Lincoln Center he established a jazz programme, of which he is the artistic director and which in 1995 was redefined as an autonomous jazz division. While performing and organizing Lincoln Center jazz concerts and the Lincoln Center Jazz Orchestra, Marsalis established a septet (1988), whose members played in many of his major works, including suites, film music, his first two ballets and his oratorio *Blood on the Fields* (1994). He disbanded the septet in 1994 to devote more time to his activities at Lincoln Center. The following year his first string quartet, written in a hybrid jazz and classical style, was performed. In 1996 Marsalis completed his third ballet and during the next year he toured the USA and Europe. Since 1994 he has hosted a number of educational series on television and radio, including 'Marsalis on Music' (1994) for PBS TV. In 1997 he received the Pulitzer prize for *Blood on the Fields*.

Though not an innovator, Marsalis is an extraordinarily gifted trumpeter with a dazzling technique and a feeling for jazz, and his first albums made an enormous impression. Initially influenced by Clifford Brown and Freddie Hubbard, during the latter half of the 1980s he set aside his activities in Classical and Baroque music to focus on emulating the style of Miles Davis's mid-1960s quintet and then to investigate swing trumpet playing, in which setting he showed a special interest in the growl and plunger techniques developed by Bubber Miley and others of Ellington's orchestra. In this capacity he is the leading exponent of the bop revival and of a broader-ranging neo-conservatism in jazz style of the 1980s onwards. If Marsalis has found a strong musical identity, it is not as a trumpeter, but as a composer of large-scale works that take in aspects of bop, swing, New Orleans jazz, blues and gospel, while also ranging into areas of dissonant avant-garde art music. Perhaps the most successful of these ambitious works are *In this House, on this Morning* (1992) and *Blood on the Fields*, in which his programmatic conception helps to unify a compositional approach that relies far more on pastiche than on large-scale architecture.

As a highly visible advocate for jazz, Marsalis has become a controversial figure whose policies have been much criticized. His steadfast stylistic narrowmindedness has prompted strong reactions from both jazz writers and distinguished musicians including Keith Jarrett, Herbie Hancock, Lester Bowie and Cecil Taylor. Intolerant of avant-garde and jazz-fusion styles, he has taken his position at Lincoln Center as an opportunity to shut out those musics of which he disapproves. However he has also worked tirelessly to bring huge new (especially young) audiences to jazz. As a champion of African-American achievements, he has done much to correct the lopsided emphasis on white big bands that has characterized American jazz education for decades; for many years he has endeavoured to make Ellington's big band music available to all college and school jazz ensembles. He has also taken the time to identify and to meet hundreds of promising young jazz players whose musical education he has helped to organize and support. Marsalis's greatest achievements may ultimately be as an educator rather than as a musician.

WORKS
(*selective list*)

for jazz orch unless otherwise stated

Dramatic (ballets unless otherwise stated): Tune in Tomorrow (film score), *c*1990; Citi Movement (choreog. G. Fagan), jazz combo, Brooklyn, Academy of Music, Dec 1991; Jazz '6 Syncopated Movements' (choreog. P. Martins), 1993, New York, State Theater, Jan 1993; Jump Start (choreog. T. Tharp), New York, Metropolitan Opera, May 1995; Sweet Release (choreog. J. Jameson), 1996, New York, State Theater, Aug 1996
Vocal: In this House, on this Morning, 1v, jazz combo, 1992; Blood on the Fields (orat), vv, jazz orch, 1994
Inst: Soul Gestures in Southern Blues, jazz combo, 1987–8; Majesty of the Blues, jazz combo, 1988; (At the) Octoroon Ball, str qt, 1995

BARRY KERNFELD

Marsand, Anselmo (Luigi) (*b* Venice, 1769; *d* Venice, 4 Jan 1841). Italian composer and organist. He studied with Bonaventura Furlanetto, the *maestro di cappella* of S Marco, and became first a Benedictine monk, later a Franciscan friar. He was the most remarkable of the last Classical composers in Venice, and in his 600 compositions showed a richness of inspiration which set him apart from others of his time. Working first at a Benedictine monastery in Murano, then at the monastery of S Giorgio

Maggiore and the church of SS Giovanni e Paolo, Marsand became *maestro di cappella* at S Antonio in Padua, succeeding Antonio Calegari (1829). On 1 July 1832 Marsand left that post to return to Venice, where he lived in straitened circumstances, helped by friends, until his death.

High-spirited and restless, often careless about his affairs, he was largely misunderstood by his contemporaries. He wrote on the cover of a requiem mass: 'Once I was in the Order of the Benedictines, now I am in the Franciscan Order; from now on, I do not know where I will be, but very likely in the Order of the Dead'. Of exceptional merit are a *Missa exacordalis* (1816) dedicated to the memory of Guido of Arezzo and the responses for Holy Week, written for the choir of S Marco.

Marsand's autograph scores are in Venice (in *I-Vnm*, *Vs*, *Vlevi*, *Vmc* and *Vqs*).

MARY JANE PHILLIPS-MATZ

Marsch (Ger.). *See* MARCH.

Marschner, Adolf Eduard (*b* Grüneberg, Silesia [now Źielona Góra, Poland], 5 March 1810; *d* Leipzig, 9 Sept 1853). German composer. He was the nephew of Heinrich August Marschner. Required to support himself completely by the age of 15, he paid his own way through the Gymnasium in Görlitz by giving piano lessons and concerts. In 1831 he entered the University of Leipzig to study law but was more fitted to be a musician. He therefore resumed teaching the piano and took up composing but was never able to eke out more than a miserable existence. This caused his health to fail early on, and he died having published only about 30 compositions. These were however well received. Reviews of his solo songs and piano character-pieces (mostly in *Allgemeine musikalische Zeitung*) describe his music as pleasantly simple and unpretentious. He is best known, however, for his four-part *Männerchöre*. Their rigidly tonal, folklike chordal texture is typical of the genre, and he devoted special care to using melody to reinforce the theme of the text. For example, vocal lines in *Schiffers Abschied* mimic the bustle of the wind and the billowing of sails, and *Reiterlied* evokes an image of galloping horses and bugle calls. Due to their easy accessibility, about a dozen have been published several times in well-known *Männerchor* anthologies, including the *Regensburger Liedercranz*, H. Pfeil's *Liederschatz für Männerchor* and J. Schwarz's *Männerchor-Album*. The serenade *Warum bist du so ferne?*, published in at least nine editions, remains the most popular. A few have been translated into English and published in Great Britain and the USA. The anthology *200 alte und neue Studenten-, Soldaten-, und Volks-Lieder* (Leipzig, *c*1840), edited by Marschner and E.H.L. Richter, survived numerous reprintings over 40 years.

A.DEAN PALMER

Marschner, Heinrich August (*b* Zittau, 16 Aug 1795; *d* Hanover, 14 Dec 1861). German composer. He was the most important exponent of German Romantic opera in the generation between Weber and Wagner.

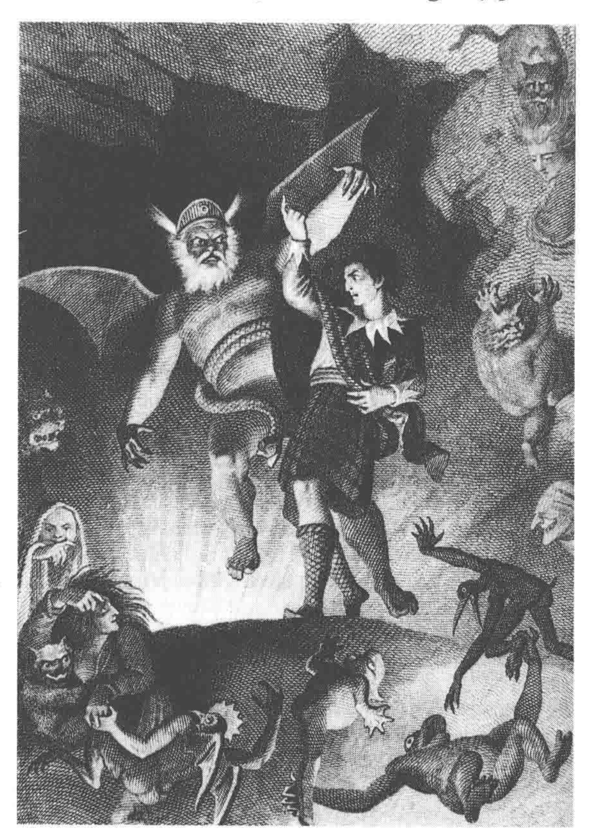
1. Life and works. 2. Style.

1. LIFE AND WORKS. Marschner's father was a master craftsman, working with horn and ivory. Although both parents possessed musical talent, Marschner's father encouraged him to pursue music only as an amateur and to choose a more stable career. From 1804 to 1813, therefore, the boy undertook courses in liberal studies at the gymnasium in Zittau and in nearby Bautzen. Some musical instruction was permitted, however, and his teachers included Karl Gottlieb Hering, August Bergt and Friedrich Schneider. His first stage work, *Die stolze Bäuerin*, was a ballet performed successfully in Zittau in 1810.

In spring 1813 Marschner left Zittau for Prague, where he met Tomášek. From there he went on to Leipzig to study law, but his interests seemed to centre less on legal studies than on his evening association with such men as the publisher Friedrich Hofmeister, the music critic J.A. Wendt and Friedrich Rochlitz, founder of the *Allgemeine musikalische Zeitung*. It was at this time that he began to develop an interest in opera and tried his hand at setting Caterino Mazzolà's adaptation of Metastasio's *La clemenza di Tito*, which he obtained from a copy of Mozart's version. Although he completed the work, it was never

1. *Heinrich August Marschner*

staged and apart from a few bars of one aria it is lost. In 1815 Marschner visited Karlsbad (now Karlovy Vary), where he spent much time in the company of the pianist Count Thaddeus Amadé de Varkony of Vienna (later a patron of Liszt). Varkony took him to Vienna, where he secured him an audience with Beethoven, and then to Hungary; there he met Count Johann Nepomuk Zichy, who employed him as domestic music teacher.



Soon after settling at Zichy's estate in Pressburg (now Bratislava), Marschner composed *Der Kiffhaeuser Berg* (1816). Based on Thuringian legends set in the Harz Mountains, near Goslar, this work, really a typical Viennese Singspiel, is a bourgeois comedy that centres on the efforts of two young peasants to obtain permission to marry, the girl's father having disappeared 20 years before as the victim of a dwarf's potion. Although the work is engaging and contains a clever sextet for pipe smokers ('Krik! krik! krik!'), it suffers from many supernatural digressions that contribute nothing to the plot. For this reason, it never caught on. The same can be said of Marschner's next Singspiel, *Saidar und Zulima* (1818), now lost. In his autobiography of 1818, Marschner mentions beginning work on *Das stille Volk*, a Zauberspiel by August Gottlieb Hornbostel, a physician and not insignificant amateur playwright, but no sketches have survived. After these disappointments, Marschner abandoned the Singspiel in favour of the historically based 'rescue opera', then popular in Vienna. *Heinrich IV und D'Aubigné*, whose libretto Hornbostel based rather loosely on the exploits of Henry IV of France (a Catholic) and his Huguenot equerry, Théodore-Agrippa d'Aubigné, at least gave Marschner some exposure in the musical mainstream, for Weber had the work performed in Dresden in 1820. Yet it lacked significant dramatic events and bored its audiences. Marschner was married twice during this period, first to Emilie von Cerva (1817), who died only six months later, then to Eugenie Franziska Jaeggi (1820). This marriage produced one son, Alfred, who emigrated to America in 1848.

Dissatisfied with the anonymity that cultural life in Pressburg appeared to promise him, Marschner moved in 1821 to Dresden, where Heinrich von Könneritz, director of the Saxon Hoftheater, introduced him to court circles and secured him a commission to compose incidental music to Heinrich von Kleist's *Prinz Friedrich von Homburg*, a historical drama surrounding the Battle of Fehrbellin (1675) with characters motivated by emotion rather than the rationalism popularized by the German dramatist Gotthold Lessing. The première with Marschner's music (1821, Dresden) was reviewed favourably by Ludwig Tieck and the play was given with limited success in other cities. Late in 1822 Marschner began a collaboration with Friedrich Kind, a leading literary figure in Dresden after the Berlin success of Weber's *Der Freischütz*, for which Kind had provided the libretto. First Marschner wrote incidental music for Kind's *Schön Ella* (1823, Dresden), a romantic tragedy based on G.A. Bürger's ballad *Lenore*, which, like *Der Freischütz*, makes use of supernatural intervention to drive home a moral. Unlike *Der Freischütz*, however, *Schön Ella* is severely flawed in its drama. An even greater fiasco was Carl Gottfried Theodor Winkler's play *Ali Baba, oder Die 40 Räuber*, for which Marschner also provided incidental music (1823, Dresden).

Towards the end of 1823 Weber began to suffer from tuberculosis, and both of his assistants had been ill as well, so he petitioned the court for additional help. Through the machinations of Könneritz, Marschner was appointed over Weber's objections, and he ended up directing both the Italian and the German companies. During the next two years he was so busy that he had time to compose only one opera and incidental music for two plays. To a libretto by Kind, he wrote *Der Holzdieb* (1823), a rustic, countrified Singspiel in one act, devoid of supernatural elements and conceived in a style reminiscent of Schenk's *Der Dorfbarbier* and Weigl's *Die Schweizerfamilie*. Its well-integrated action demands that most of the six characters be on stage throughout the work, providing Marschner with an opportunity to develop the techniques of ensemble writing that were to characterize his mature works. Considerable mystery, however, surrounds the incidental music that Marschner wrote at this time. Fresh from successes in Berlin, Carl Eduard von Holtei, a distinguished journalist and actor, brought to the Dresden stage in 1825 his Liederspiel *Die Wiener in Berlin*, a dialogue farce (*Mundartsoper*) in the Viennese style of Adolf Bäuerle and Meyer von Schauensee. Much of the music derives from pre-existing sources, but additional songs were provided by Marschner and others. In 1826 Dresden audiences also saw *Alexander und Darius* by Friedrich von Uechtritz, a five-act historical drama in the style of Schiller. *Alexander's Feast*, which Handel wrote for Dryden's *Ode for St Cecilia's Day*, accompanied the first three acts, and since the narrative of Dryden's poem overlapped approximately the same portion of Uechtritz's drama, it was necessary for Marschner to write additional music only for the remaining two acts. Notable is the melodrama in which Alexander and the slave girl Thaïs use firebrands to burn the palace of Darius at Persepolis (Act 5 scene viii).

The year 1826 saw the death of Weber, and since Könneritz's successor, Wolf von Lüttichau, had no interest in hiring Marschner to replace him, Marschner was forced to travel, hoping to make a living by freelance appearances with his third wife, the singer Marianne Wohlbrück, whom he had married (1826) shortly after the death of Eugenie in 1825. After stops in Berlin and Breslau (now Wrocław) the couple arrived in Danzig (now Gdańsk), where they obtained a six-month contract with Marschner as music director and Marianne as leading soprano. Here Marschner completed and produced his first through-composed opera, *Lucretia* (1820–26), based on Sextus Tarquinius's supposed rape in 509 BCE of Lucretia Collatinus and her subsequent suicide. A weak attempt to emulate Spontini, *Lucretia* slipped into oblivion after only three performances.

When their contract expired in Danzig, the couple travelled to Magdeburg, where Marschner became acquainted with his brother-in-law Wilhelm August Wohlbrück, a popular actor. The two seized upon the idea of collaborating on an opera involving vampires. Such a topic fitted into the short-lived literary movement in Germany called the 'Schauerromantik', then at its peak of popularity. The first of Marschner's three famous operas, *Der Vampyr* (composed in 1827) focusses on the efforts of the vampire to secure another year of life on earth in exchange for the murder of three virgins (fig.2). Wohlbrück constructed an effective libretto from multiple literary sources and the work has held the interest of the

opera-going public ever since the resounding success of its Leipzig première in 1828. Called a romantic opera, it is in many respects similar in musical construction to Weber's *Der Freischütz*.

Wohlbrück and Marschner decided next to write an opera based on a novel by Sir Walter Scott after Marschner attended a performance in Leipzig of Joseph von Auffenberg's *Löwe von Kurdistan*, based on Scott's *The Talisman*. The result was a setting of the Ivanhoe story, *Der Templer und die Jüdin* (1829). Wohlbrück adapted his libretto from Johann Reinhold Lenz's *Das Gericht der Templer*, which in turn was based on one or more of the many plays that appeared in England after the publication of Scott's novel. The original story seemed to be eminently stageworthy, and Wohlbrück's libretto follows it rather closely. This time Marschner's model was Weber's *Euryanthe*, and many numbers from *Der Templer*, notably 'Wer ist der Ritter hochgeehrt', were later sung as concert pieces. Following phenomenal success in Leipzig, the opera was performed throughout Europe but is rarely revived owing to the cost of the sets and properties.

By 1830 Marschner was in demand throughout Europe, but his interests centred on the Königstädtisches Theater in Berlin, whose director, Karl Friedrich Cerf, had invited him to write a comic opera. The result, *Des Falkners Braut* (1832), an italianate piece in the style of Rossini, failed, mainly because Wohlbrück had tried to create a comic libretto from a tragic model (A.J.K. Spindler's short story of the same name). Worse, there is clearly not enough material for three acts and the plot, lacking any compelling humour, is sterile; when the work was revived in England in 1838, the libretto was replaced by one about Robin Hood.

Despite international recognition, the Marschners were forced to support themselves in Leipzig through Marianne's singing engagements and his occasional conducting contracts and royalties. At the end of 1830, however, Marschner obtained the permanent position of Hofkapellmeister in Hanover and moved his family there the following year. Shortly thereafter, he received a libretto entitled *Hans Heiling* from the famous actor, playwright and theatre historian Eduard Devrient, who had developed it from several legends surrounding the Hans Heiling Cliffs. Hewn from the mountains by the River Eger (now Ohře) in Bohemia, these formations were popularly thought to have been created when Hans Heiling, king of the earth spirits, turned an entire wedding procession to stone. For the first time, Marschner was dealing with a librettist who really understood the exigencies of drama. Though they were separated geographically, an exchange of letters between the two indicates a constant flow of adjustments between music and text until both were satisfied that a theatrically functional work had been constructed. The resulting romantic opera was an overwhelming success.

Although Marschner lived for nearly 30 years after the première of *Hans Heiling* (1833), it represented the zenith of his creative powers, and not one stage work that he produced after it enjoyed any popularity. The first of these, a romantic opera entitled *Das Schloss am Aetna* (1836) and set to a libretto by August von Klingemann, Generaldirektor of the Brunswick Hoftheater, was a confused rehash of the dramatic themes present in *Der Freischütz*. It was followed by the comic opera *Der Bäbu* (1838, *bäbu* means 'nobleman' in parts of India). An oriental spoof reminiscent of Mozart's *Die Entführung aus dem Serail*, Wohlbrück's rambling libretto is cluttered with disparate elements that simply fail to hang together. Nonetheless, the opera contains some beautiful melodies, and parts of it have been broadcast by German radio. In *Kaiser Adolph von Nassau* (1845) and *Austin* (1852), Marschner returned to the realm of the historical narrative in an apparent attempt to emulate French grand opera. Heribert Rau based his libretto for *Kaiser Adolph* on the life of Adolph of Nassau (?1250–1298), King of Frankfurt, who amassed so many territories through conquest, purchase and political intrigue that the Electors deposed him in favour of Albert I, who killed him in battle and defeated his armies. With the exception of some memorable choruses, the music is banal, and Wagner, who conducted the première in Dresden, claimed to have brought a stillborn child into the world. Marianne Wohlbrück-Marschner's libretto to *Austin* concerns the events surrounding Ferdinand the Catholic's annexation in 1512 of Navarre, a strategically important buffer state between France and Spain. To acquire the territory, Ferdinand poisoned the young Navarrese king, Francisco I (nicknamed 'Austin'), bringing to the throne Francisco's sister and, through marriage to her, his own son.

In 1854 Marianne died, but Marschner soon fell in love with a singer 31 years his junior, Theresa Janda. After their marriage (1855), he turned again to dramatic composition. Considerably more successful than his

previous few operas was his incidental music for Julius Rodenberg's rustic comedy *Waldmüllers Margret* (1855, Hanover) and for Salomon Hermann von Mosenthal's *Der Goldschmied von Ulm* (1856, Dresden), a folk legend with supernatural overtones similar to those he had treated so successfully in *Hans Heiling*. His last opera, *Sangeskönig Hiarne, oder Das Tyrsingschwert* (composed in 1857–8), was not a success. It is based on a libretto which Wilhelm Grothe adapted from Esaias Tegnér's poetical version of the medieval saga of Fridthjof, a Viking who longs to marry Ingeborg but fails to do so because he is a mere vassal to her father, Bele, while Bele's ancestry derives from the god Odin. In this final effort, Marschner attempted to emulate Wagner, but the libretto suffers for want of a well-defined hero. Attempts to have the work performed in Germany during Marschner's lifetime were unsuccessful, and although he interpolated ballets to 'qualify' it for production at the Paris Opéra during the time *Tannhäuser* was being performed there, nothing came of this either. Thanks, however, to the invention of an electrical sword for special effects, several performances took place towards the end of the century. In 1859 the Hanoverian court chose to retire Marschner, rather against his wishes, and he died two years later.

In addition to operas and incidental music, Marschner wrote three operatic *Gelegenheitgedichte* (pageants) entitled *Festspiel zur Feier der Vermählung des Kronprinzen von Hannover und der Prinzessin Marie von Altenburg* (1843), *Natur und Kunst* (1852) and *Der Zauberspiegel* (1854). All were intended for private performance at the Hanoverian court. Outside opera, he is best known for his choral music particularly the *Männergesänge* he wrote in the 1820s.

2. Style. Marschner was a great eclectic, for he systematically worked through all major genres of opera from Mozart onwards. Much of the time the result was an unequivocal failure, but this was not the case with his German Romantic operas. With the Singspiel and Weber as points of departure, he broke new ground that was eventually exploited by Wagner, first evident in *Der fliegende Holländer*. His most important contribution was formal expansion. In the 18th century the typical Singspiel had been a series of fairly short, numbered songs in predictable forms connected by spoken dialogue. This changed little in the early 19th century, even when the Singspiel developed into Romantic opera on the one hand and the post-Mozartian comic opera of the Biedermeier group on the other, despite some through-composed exceptions. Marschner enlarged the individual forms of Singspiel and combined them into what may be termed 'ensemble complexes', containing multiple numbered subsections and nearly always one or more ensembles. Weber had done this in a few places (such as the Wolf's Glen Scene in *Der Freischütz*), but with Marschner it became the rule. The ensemble complex helped to organize the action through musical and formal means into dramatically complete and self-contained subsections – which could be described as through-composed 'sub-operas'. Some became so large that one might reasonably ask why Marschner did not simply write out his operas entirely in through-composed form. Certainly there were precedents for this, not only in Spohr's *Faust* and Hoffmann's *Undine* (both landmarks of 1816) but also in his own *Lucretia*. The reason is that structurally these works were based on Italian and French models, and Marschner, having inveighed vehemently and frequently against the encroachment of foreign styles upon German opera, was attempting to retain the essentially German formal character of serious Romantic opera, which required spoken dialogue to connect musical sections. Consequently, when in *Der fliegende Holländer* Wagner eliminated the last vestiges of speech, he created a work that was transitional between Romantic opera and his later music dramas, rather than a pure example of the former. Of course, Wagner's efforts to impose a second level of organization on *Der fliegende Holländer* by creating a symmetrical formal scheme around Senta's ballad, in order to frame it as the psychological apex of the drama, exceeded any of Marschner's attempts at formal innovation, but Marschner's ensemble complexes had provided Wagner with the building blocks.

Marschner developed the psychological aspects of Romantic opera and thus added a new dimension to its dramatic organization. Whenever the supernatural was present in Singspiel, its function was typically to facilitate plot development: divine intervention could be invoked to make almost anything happen without need of explanation. Supernatural characters in Zauberspiel might even approach mortal characters in number and possess similar foibles and weaknesses. In *Der Freischütz*, this changed. Here both good and bad supernatural characters had power transcending that of mortals, and they used it to try to swing the tide of the drama towards their own objectives. Except for Max, whose moral weakness made him vulnerable to manipulation, each main character, mortal or supernatural, statically represented either good or evil. But Marschner placed the attributes of Weber's separate good and evil personages inside a single, centrally significant character. This device allowed Marschner's dramas to become all the more complex, since the psychological conflict within one character could be worked out in the larger dimensions and external action of the drama as a whole. Because this kind of character is closely related to the title role in Mozart's *Don Giovanni*, it is not surprising that Marschner made him invariably a dramatic baritone, but it is notable that he can be either supernatural or mortal. Cast as the vampire Ruthven in *Der Vampyr*, the Templar Bois-Guilbert in *Der Templer und die Jüdin* and Heiling himself in *Hans Heiling*, this complex figure with built-in foil migrated through Marschner's operas directly into the title role in Wagner's *Der fliegende Holländer*.

Marschner employed additional dramatic techniques to support the generally sombre ambience of his romantic operas. One was melodrama. Ever since the experimental days of Rousseau and Benda, speaking or acting against orchestral accompaniment had proved an effective means of heightening dramatic tension. Mozart, Beethoven and Weber had all used it, and in Marschner it became particularly important. Instances include the passage in which the light of the moon revives the murdered vampire in *Der Vampyr* and the scene in *Hans Heiling* where Gertrude must weather a summer storm in her hut. On the other hand, comic relief is necessary to keep operas of this sort from becoming oppressive. Particularly successful examples of this in *Der Vampyr* are the drinking-song and the antics of Suse Blunt, who jumps on to a table to castigate her husband and his cronies for drunkenness.

In general, Marschner worked within the common-practice musical style of his contemporaries, but he

excelled in some techniques that were advanced for his day. First, he increased the scope of the opera orchestra, adding particularly to the low brass. Where Weber would have favoured horns, Marschner preferred the texture of three trombones, whose effect, perhaps indebted to the temple scene in *Die Zauberflöte*, can be considerably more sombre than that which horns would have provided. Second, while Weber stuck primarily to the conventional harmonies of German folksong, Marschner extended the bounds of tonality with chromatic lines in both melody and bass – sometimes to accomplish a rapid modulation to a remote key, sometimes (like Wagner) to avoid a cadence altogether, and occasionally to convey a mood of foreboding. Marschner's prime consideration was to write music that would bind intimately with the drama; as a result, he is accused of being a poor melodist, and the closed forms in his operas do not possess the accessible, folklike charm of Weber's. In consequence, there will probably never be a thoroughgoing resurgence of interest in Marschner's operas, although several revivals of *Hans Heiling* and *Der Vampyr* have taken place from the 1970s onwards in Germany, Great Britain and America.

Even in his least successful operas, such as *Kaiser Adolf* and *Austin*, Marschner consistently earned praise from reviewers for his beautiful choruses. It is not surprising, then, that outside music for the stage, he was most successful with his choral works. Chief among them were his *Männerchöre*, conceived in the spirit of 'Im Herbst da muss man trinken' from *Der Vampyr*. During the Leipzig years (1827–9), Marschner became a charter member of *Der Tunnel über der Pleisse*, one of several *Tunnelgesellschaften* (literary societies) that grew up in the 1820s and were modelled after M.G. Saphir's *Tunnel über der Spree* in Berlin. Marschner's group, which included G.W. Fink, editor of the *Allgemeine musikalische Zeitung*, and the composer Heinrich Dorn, met on Sunday evenings to promote humorous nonsense and sing men's choruses. For this group and others like it Marschner provided several outstanding cycles, including opp.46, 52, 93 and 172. Folklike in harmony and homophonic in texture, with occasional instances of a single voice striking out to lead the others, these works are designed to show off the beauty produced by the close harmony of unaccompanied men's voices. When the heyday of the *Tunnelgesellschaften* waned in the 1880s, Marschner's choruses passed to the singing societies that have kept choral music alive in German cities to the present day.

Marschner published over 60 volumes of solo songs – some 300 individual pieces. As long as he remained close to the German folk idiom he understood and propagated in his Romantic operas, as he did in opp.51, 61, 73, 173, 184 and 187, as well as in his *Balladen* and *Romanzen*,such as *Die Monduhr* (op.102 no.2), he reached the heart of his audience. His exotic works, such as the four volumes of quasi-programmatic songs entitled *Bilder des Orients* (op.90) and the *Klänge aus Osten* (op.109), an effort to create a new genre of dramatic cantata, also excited interest. Many of the solo lieder, though, were simply a means of putting food on the table. Lippert notes that, preoccupied with efforts to stage his operas, Marschner never mentions his lieder in his letters. Many seem to float along with an 'unmotivated tedium' (Lippert) in the melody supported by mechanical accompanimental devices, such as unrelenting semiquavers and a *colla parte* bass.

Marschner was least successful in the realm of instrumental music. Significantly, major works, such as symphonies and piano concertos, appear to exist only as unpublished relics in archives. In a review of perhaps his best-known instrumental piece, the Trio no.2 (op.111), Schumann is guarded in his evaluation. While the total impression is favourable, he says, the deficiencies of the work emerge upon closer examination. Themes tend to be melodically weak, and development sections do not get past the initial ideas presented. The upper voice predominates, and there is little polyphonic interest, as if the composer could simply not break away from the more familiar environment of supporting a soloist in opera with a subordinate accompaniment. Movements pursue modulations to unrelated keys and lack stylistic unity; in fact, they sometimes appear to have been conceived during different periods of the composer's artistic development. Such problems occur frequently in Marschner's instrumental works, particularly those in sonata form, although he is universally praised for his piano parts in chamber music, a fact that has caused his piano trios (the second of which has been recorded) and the op.158 Piano Quartet to retain lasting interest among specialists.

Marschner became acquainted with the guitar during his student days in Leipzig. Some of his earliest works, including the Bagatelles (op.4) and the Lieder (op.5), are for this instrument, and he continued to write creatively for the guitar throughout his life. His early guitar works, especially the Bagatelles, remained among his most popular non-operatic compositions in the 20th century.

WORKS

Many MSS were destroyed in World War II; the primary repositories include *A-Wn*, *D-Bsb*, *F-Pn* and *US-Wc*. Opp.9, 51, 108, 123 and 154 are each assigned to two works; and opp.124, 153 are not assigned.

Almost all Marschner's works were published without date, but most can be dated approximately from publishers' plate numbers and by their appearance in successive editions and supplements of trade catalogues such as the Whistling-Hofmeister *Handbuch der musikalischen Literatur* (Leipzig, 1817–1943).

STAGE

grosse romantische Opern unless otherwise stated

Die stolze Bäuerin (ballet), 1810, Zittau, lost

Marseilles (Fr. Marseille). City on the Mediterranean in France. It was founded in the 6th century BCE by a Phocaean colony.

1. Churches and early secular music. 2. Opera. 3. Concert life. 4. Education.

1. CHURCHES AND EARLY SECULAR MUSIC. In the 5th century a monastery dedicated to St Peter and St Paul was built by Cassian and became the centre of religious music in Provence; the Gallican rite was celebrated there. In the 8th century the monastery church became a cathedral dedicated to St Victor. It was rebuilt in the 10th century, when it came under the rule of the Benedictines, and again in the 14th. Acoustic vessels in the vault, probably from the late 13th century, suggest that chant rather than modern polyphony was performed there. A manuscript breviary of St Victor (1498) was printed in 1508, making it among the earliest printed editions of music. During the

16th century all religious festivals and state visits were marked by open-air morality and Passion plays and secular festivities.

From the mid-12th century Marseilles was a centre for secular art music. Foreign troubadours stayed or lived there; Folquet de Marseille was one of the first Provençal troubadours, and his 13th-century successors in Marseilles included Raimond de las Salas, Barral, Paulet de Marseille, Bertan Carbonel de Marseille and Rostan Béranguier de Marseille. Their presence, and visits from such troubadours as Elias de Barjols and Peire Vidal and foreigners including Sordel, is evidence of the importance of artistic activity among the powerful in *langue d'oc* society. During the 14th century an important guild of minstrels (*ménétriers*) flourished in the service of the rich bourgeoisie, performing new polyphonic pieces for voices and instruments and providing musical accompaniment for secular and mystery plays. The town itself maintained tower musicians during the 14th and 15th centuries.

In 1481 Marseilles, like Provence, was annexed by the King of France, and the Marseilles bourgeoisie increasingly adopted court tastes. Court influence was particularly evident in the music for festivities honouring royal visits, such as those of François I in 1517 and (with Pope Clement VII) in 1533, and in the musical divertissements organized by the governors of Provence – in 1548 there were so many carnival balls that instrumentalists had to be brought in from outside. Gradually viol players, encouraged by the school (1546) of Barthélémy de la Crous, replaced the minstrels, who moved into the villages where they cultivated the art of *tambourin* (pipe and tabor). The arrival of violinists is documented from the end of the 16th century: some are mentioned among the musicians who played at balls given by the Duke of Guise, governor and lieutenant-general of Provence.

In the 17th century musical activity remained intense and Marseilles kept pace with Paris musical fashions. It had become a cultural centre whose influence spread to Toulon, Nice, Aix-en-Provence, Arles, Montepellier and Sète, Avignon and Nîmes, and even to Genoa. Two violin bands were needed for secular musical festivities. During this period the main churches replaced their Italianate organs with instruments of Nordic design: St Victor (1630), La Major (1657, replacing an organ of 1615), Les Accoules (1663), St Laurent (1684) and St Martin (1688). In St Victor and La Major, which had become a cathedral, up to 60 musicians gathered for important religious and state occasions. The Desmazures, *maîtres de chapelle*, organists, composers and teachers, played a significant part in musical life. During the 17th century property-owning, intellectual society gave up its role in street festivities in favour of indoor performances, away from the lower classes.

2. Opera. The Phocaeans in Gaul introduced the Hellenic taste for theatrical performances; the people of Marseilles have been known ever since for their love of song and spectacle. When the Phocaean republic became a municipality of the Roman province (*c*146 BC) a theatre in Greek style, the oldest in Gaul, was built there for plays and concerts.

On 28 January 1685, having obtained a licence, Pierre Gautier put on the first performance at the Marseilles Académie de Musique, the first provincial opera house. A new building was erected in 1694; it collapsed in 1707. Performances were given in the former Jeu de Paume until it was destroyed in 1739. Meanwhile a new opera house had come into use in 1733. The aesthetic disputes of Paris were taken up in Marseilles, for instance between the adherents of Lully and those of Rameau. The Académie de Musique had varying locations and financial fortunes but its repertory was always exemplary, including works by Lully, Rameau and Gluck, comic operas from Grétry to Boieldieu, and dramatic works inspired by the Revolution. First performances in Marseilles often followed Paris premières within a year. According to contemporary accounts the company was excellent; the public was demanding and often noisy. The present opera house was inaugurated on 31 October 1787 with a revival of Gluck's *Armide*; in the early 19th century, as the Grand Théâtre, it gave ballets and operas, notably by Meyerbeer and Halévy. The Grand Théâtre was almost completely destroyed by fire in 1919. It was rebuilt, and reopened in 1924 with Reyer's *Sigurd*, conducted by the composer.

The 20th century saw the development of Marseilles operetta, chiefly by Vincent Scotto and performed at the Théâtre Alcazar. Its many successes included *Au son des guitares* (1913) with the song 'Tant qu'il y aura des étoiles'; *Zou, le Midi bouge*, with the foxtrot 'Adieu Venise provençale'; and *Un de la Canebière* (1936), with its slow foxtrot 'Vous avez l'éclat de la rose'. The post-war opera repertory included works by Halévy (still well received) and occasionally modern works (Berg's *Lulu*, 1969; Penderecki's *The Devils of Loudun*, 1972). This last production was created for the Festival d'Opéra Contemporain, which existed from 1971 to 1975 on the initiative of Louis Ducreux and was conducted by Reynald Giovaninetti. The festival had been preceded by the première in 1970 of Louis Saguer's *Mariana Pineda*. Opera programming then became more traditional, with revivals of works dating from the 17th century to 1920. Exceptions have been Henri Tomasi's *Don Juan de Manara* in 1988, Britten's *Peter Grimes* in 1991 and Landowski's *Montségur* in 1993.

3. Concert life. In 1717 an Académie de Concerts was founded; through its organization and the skill of its musicians it became one of the most famous in the country. Until 1793 it functioned two evenings each week; programmes included motets, dramatic arias and ariettas as well as instrumental works (with symphonies by Haydn among them in its later years). During the 18th century Marseilles was the birthplace of the writers on music J.B. Jourdan, P.-J. Roussier and J.J.F. Bastide; the organist, composer and teacher Laurent Demazures; and the composers Alexandre Loüet, Saint-Amans, Della-Maria and Stanislas Champein.

In the early 19th century a society of chansonniers (satirical songwriters) modelled on the Parisian Caveau was formed (1810). The success of the *romance* reached ordinary people, and fashionable opera airs were sung in the street until industrialization segregated the artisan working class. In 1844 Antoine Maurel first put on his Christmas *Pastorale*, a tradition which still persists. Charles V of Spain, exiled in Marseilles, encouraged lively and erudite musical activity, particularly chamber music. String quartet groups were formed among the high society of Marseilles. A chamber music society presented works by Beethoven and Mendelssohn, and several male choral societies were conducted by the *maîtres de chapelle*. The Choeurs Trotebas (1832) of about 50 male voices achieved high technical and artistic standards and played an

important role in the town's main musical events, both religious and secular. After the Restoration weekly open-air singing gatherings (known as *l'assaou de cant*) became popular. In 1806 the Concerts Thubaneau was formed. Its members, most of them amateurs, assiduously attended rehearsals and clubbed together to pay their conductor and chorus master. Considered unrivalled in the provinces, it performed symphonic music, soon adding Romantic works to its Classical repertory. It was succeeded by the more popular Société Philharmonique (1840), the Cercle Musical and then the Cercle Lyrique. A Cercle des Beaux-Arts gave rise to a Union des Arts and then a Cercle Artistique. The Concerts Populaires were founded in 1871, followed by the Société des Concerts Populaires de Musique Classique in 1880, and the present Concerts Classiques in 1886. In 1845 a Berlioz Festival was organized.

In the second half of the century many amateur musical societies were founded, some a mixture of social groups, others consisting mostly of Italian immigrants. They performed both indoors and in the open air, always to large audiences. Art music continued to flourish in the salons of the rich bourgeoisie. Théodore Thurner (1833–1907), piano teacher, organist and composer, was an outstanding personality of the period. In 1940 Countess Lily Pastré founded a society called *Pour que l'esprit vive* to provide material aid for exiled musicians of Marseilles. She organized events at her estate at Montredon; notable in 1942 were Jacques Ibert's *Le songe d'une nuit d'été*, and an all-Mozart event, *Mozart dans un parc enchanté* with Clara Haskil.

Current Marseilles musical life includes public symphony concerts, Concerts Classiques and concerts given by the Société de Musique de Chambre (open only to members), the Goethe Institute and the Italian Institute (specializing in early and 20th-century music) and the Choeur Gabriel Fauré. The vocal ensemble Musicatreize, directed by Roland Hayrabedian, concentrates on contemporary repertory. The Cité de la Musique, inaugurated in 1991 and maintained by the municipality, comprises the Laboratoire Musique et Informatique de Marseille, the Groupe de Musique Expérimentale de Marseille and the Groupe de Recherche en Improvisations Musicales. Contemporary music is heard there, and medieval and Baroque music at the Bastide de La Magalone.

4. Education. In 1546 Barthélémy de la Crous opened a secular school for 'viols, lutes and other instruments' which was subsidized by the town. A music school was set up in 1817 and supported by the Bureau de Bienfaisance, to teach singing to needy children who would then be taken into concert organizations or would sing for religious ceremonies. In 1821 the Ecole Spéciale Gratuite de Musique was founded, with financial support from the town under the direction of the Florentine Barsotti; Ernest Reyer studied there. In 1841 it became a branch of the Paris Conservatoire. In 1852 the Ecole Communale de Musique et de Déclamation was reorganized, with a concert hall in which Vieuxtemps and Joachim appeared. In 1872 it moved to new premises; these now house the Marseilles Conservatoire, where Pierre Barbizet (director from 1963) initiated the Lundis du Conservatoire (a series of concerts featuring young artists). He established three new classes, the first of their kind in a French conservatory: jazz under Guy Longnon, guitar under René Bartoli and electronic music under Marcel Frémiot. The latter gave rise to the Groupe de Musique Expérimentale de Marseille and then, in 1984, to the Laboratoire Musique et Informatique de Marseille.

MARCEL FRÉMIOT

Marsh, Alfonso (i) (*b* London, bap. 28 Jan 1627; *d* London, 9 April 1681). English composer, lutenist and bass. He was the son of Robert Marsh, one of King Charles I's musicians for the lutes and voices. He sang the part of Pirrhus in William Davenant's *The Siege of Rhodes* (1656). On 9 November 1660 he was admitted to the King's Private Musick in Ordinary as a lutenist and singer at £40 a year with livery allowance of £16 2s. 6d (with effect from the previous midsummer), and he is listed among the Gentlemen of the Chapel Royal at the coronation of Charles II on 23 April 1661. Anthony Wood called him 'a great songster & Lutinist', but Samuel Pepys, who met him on 19 August 1661, said 'his voice is quite lost'. Marsh was one of the wardens of the 'Corporacon for regulateing the Art and Science of Musique' (1676–7), and his signature is in the minute book from 1672 to 1679 (*GB-Lbl* Harl.1911). He wrote songs for the following plays: Davenant's *Law against Lovers* (1662) and *The Unfortunate Lovers* (?1664), John Dryden's *An Evening's Love* (1668) and *The Conquest of Granada*, part 1 (1670), and Thomas Duffet's *The Spanish Rogue* (1673). About 30 songs were printed by John Playford in such collections as *The Treasury of Musick* (RISM 1669[5]) and various books in the *Choice Ayres, Songs & Dialogues* series (1673[3]–1679[7]; in MLE, A5 repr. 1989). The majority are strophic, tuneful triple-time songs. One of the characters in *An Evening's Love* describes *After the pangs of a desperate lover* (published in 1673, 1675 and 1676) as 'a Song a l'*Angloise*', and it is indeed typical of the lighter English ayre of the period. A few longer songs are more declamatory. In addition to the printed songs there are two in manuscript (*Lbl* Harl.7549, voice part only, and *Llp* 1041). (*AshbeeR*, i, v, viii; *BDA*; *BDECM*; *SpinkES*.)

IAN SPINK

Marsh, Alfonso (ii) (*b* London; *d* London, 5 April 1692). English composer, lutenist and tenor. He was the son of Alfonso Marsh (i). He sang the part of Africa in the prologue of Crowne's *Calisto*, given at court in February 1675. He was sworn in as a Gentleman of the Chapel Royal on 25 April 1676, and as such sang at the coronations of James II (1685) and William and Mary (1689). His appointment to the King's Private Musick does not seem to have occurred until 20 July 1689. He is listed as one of the lay clerks at Westminster Abbey in 1691. John Playford published four songs by him in *Choice Ayres, Songs & Dialogues* (RISM 1673[3], 1676[3]; repr. 1989 in MLE, A5); the three that were published by Henry Playford in *The Theater of Music* (1687[5]; repr. 1983 in MLE, A1) and *The Banquet of Musick* (1688[6], 1688[7]) are probably by him rather than his father. (See *AshbeeR*, *BDA* and *BDECM*.)

IAN SPINK

Marsh, Howard (Warren) (*b* Bluffton, IN; *d* Long Branch, NJ, 7 Aug 1969). American singer and actor. One of Broadway's most popular leading men of the 1920s, Marsh is best remembered for creating the roles of Prince Karl Franz in *The Student Prince* (1924) and Gaylord Ravenal in *Show Boat* (1927). After studying law and finance he became a banker in Indianapolis, but eschewed his career to study music in New York. He made his New York début as Count de Cluny in *The Grass Widow* (1917). Subsequent Broadway credits included *Greenwich Village Follies* (1920), Baron Schober in *Blossom Time* (1921), Ned Hamilton in *Cherry Blossoms* (1927), the poet in *The Well of Romance* (1930), and leading roles in Gilbert and Sullivan revivals in 1931 and 1935. Although regarded as a quintessential operetta singer, he later sang in nightclubs and hotels in New York and Miami.

WILLIAM A. EVERETT

Marsh, John (*b* Dorking, 31 May 1752; *d* Chichester, 31 Oct 1828). English composer and writer. Despite his showing an early interest in music, his father, a Royal Naval captain, denied him a musical education during his school years at Greenwich Academy, intending that he too should follow a naval career. In 1768, however, he persuaded his father to allow him to undertake legal training and he was articled to a solicitor in Romsey. During the two years before leaving home in Gosport, then his father's station, Marsh took up the violin, studying with Wafer, the organist of Gosport Chapel. This was his only formal musical training, but enabled him to become sufficiently proficient to join in the subscription concerts in Portsmouth and Gosport. In Romsey he applied himself as assiduously to music as to law, teaching himself to play the spinet, viola (which became a particular favourite), cello, oboe and organ. These were also the years of his first retained compositions, works written specifically for a series of subscription concerts he founded in the town. Following the completion of his clerkship in 1773, Marsh set up practice in Romsey and the following year married Elizabeth Brown, the daughter of a Salisbury doctor. In 1776 he moved to a partnership in Salisbury, where he took up residence in a house near Close Gate. During the seven years that he lived in Salisbury, Marsh played an active role in the city's thriving musical life: he was a violinist at the subscription concert series, of which he became leader in 1780, a member of the Catch Club and an occasional substitute organist at cathedral services. He had by now become a prolific composer; a number of his symphonies had been introduced both at the subscription concerts and at the annual Salisbury Festival.

In 1783, having inherited an estate in Kent, Marsh abandoned his career as a practising lawyer and moved with his family to Nethersole House, some ten miles from Canterbury. He was immediately offered the directorship of the ailing Canterbury Concert, which he set about reorganizing with characteristic energy, soon transforming the Concert into a successful organization. Marsh recognised that he could ill-afford the upkeep of a large estate and within two years was again making plans to move. Following a short period at a prebendial house in the precincts of Canterbury Cathedral, the family moved to Chichester in the spring of 1787. The house in North Pallant (no longer standing) that Marsh bought from the poet William Hayley was to remain his home for the remaining 40 years of his life. As at Canterbury, his arrival coincided with a period when local concert life was at a low ebb and Marsh was again given the challenge of reviving the subscription concerts as manager and leader. His success ensured that Chichester enjoyed a thriving concert life until 1813, when he retired from concert leadership. Although he never lost interest in music, the last 15 years of his life were mainly devoted to his family and extensive travels, during which he frequently managed to take in one or more of the provincial music festivals. Active and in good health until the final months of his life, Marsh died at his home after a short illness and was buried a week later at All Saints, West Pallant.

Although Marsh took a lively and active interest in music throughout his long life, it was, as he pointed out in the autobiographical sketch he provided for John Sainsbury, 'not his only pursuit'. The journal that he kept for most of his life reveals a man of extraordinarily diversified interests, ranging from astronomy (on which he wrote two published books) and campanology to a part-time military career as an officer in the sometimes unruly Chichester Volunteers during the Napoleonic Wars. In addition to Marsh's extensive writings on music, his published articles address such topics as religious philosophy and geometry. His writings on musical topics cover a wide range of subjects, and reveal an unusually balanced and sensible approach to arguments such as the relative merits of 'ancient' and 'modern' compositions. Marsh was also occupied with the prevailing low standards of cathedral music: in the preface to his *Cathedral Chant Book* (1808) he laid the foundations for the reform of Anglican psalm chanting.

The most important of Marsh's extant compositions, the *Eight Favorite Symphonies* published between 1784 and 1800, reveal a composer well-versed in the requirements of the mixed professional and amateur provincial orchestras he encountered. Concertante parts for more able players are judiciously juxtaposed with easier tutti writing, and in a work like the *Conversation Sinfonie*, for two orchestras, composed in 1778, Marsh also shows a keen awareness of orchestral colour, disposing his two groups so as to pit high instruments against low. He was one of the first musicians in England to appreciate Haydn's stature, and his finest surviving symphony, *A Favorite Symphony*, no.6 in D major (1796), pays particular homage in a four-movement work scored for full Classical orchestra including trumpets and timpani.

In general terms the symphonies are characterised by an open, direct freshness and strong melodic appeal, qualities also in evidence in the five-movement string quartet of 1785. The anthems are confident and effective examples of the later Georgian verse anthem. Marsh's special concern for affective word setting is articulated in his criticism of certain aspects of William Boyce's setting of *By the waters of Babylon* (Ps cxxxvii) in the preface to his *Six Anthems*, op.18.

WORKS

all published in London

ORCHESTRAL AND CHAMBER

A Conversation Sinfonie for 2 Orchestras, 2 vn, 2 va, 3 b, 2 ob, 2 hn, timp (1784)
A Favorite Symphony, no.1, B♭ (1784)
A Favorite Symphony, no.2, B♭ (1784)
A Favorite Symphony, no.3, D (1784)
A Quartetto composed in imitation of the stile of Haydn's Opera Prima, 2 vn, va, vc (1785)
A Favorite Symphony, no.4, F (1789)
An Overture and 8 Sonatinas, pf, vn, vc (1794)
A Favorite Symphony, no.5, E♭ (1797)
A Favorite Symphony, no.6, D (1797)
A Favorite Symphony, 'La Chasse', no.7, E♭ (1800)
A Favorite Symphony, no.8, G (1800)
Three Finales or Short Concluding Pieces for Concerts (1801)
3 Overtures (in 5 parts) for small concerts or private musical parties, op.37 (1803)
3 Overtures in several parts . . . composed after the manner of the Ancient Masters (1825)
Arrs.: Haydn: Symphony no.74, vn, pf (1789)
Lost (many are arrs. of other works by Marsh): Concertante, D (1781); 30 syms.; 15 orch concs.; Conc., 2 hn; Org Conc.; Vn Conc.; Air with Variations, org, orch; 2 rondeaux, vn, orch; military music and marches; 4 Fugues; Witches Dance for Locke's Macbeth; 2 double trios, fl, vn, 2 va, 2 b; Qnt, fl, 2 vn, va, vc; Qnt, 2 vn, 2 va, vc; 9 str qts; 2 divertimentos; 6 str trios; 3 vn duets; Vn Solo; arr. of Dettingen TeD, sextet (1812)

KEYBOARD

Fugue, org duet (1783) [pubd with 2 arrs. of works by Handel]
18 Voluntaries, org (1791)
20 Voluntaries, org, second sett (1792)
An Overture and 6 Pieces, org (1799)
A Third Set of Voluntaries . . . to which are prefixed 23 preludes or short introductions for verse anthems, org (1806)
Works by Corelli, Handel, Geminiani, Haydn, Mozart and others arr. as voluntaries, org, 6 vols (1806–14); arr. of T. Carter: Ov. to The Rival Candidates, pf/hpd 4 hands (1783)
A Fourth Set of Voluntaries, org (1815)
A Fifth Set of Voluntaries, org (1822)
Lost: 3 Marches, pf (1791), arr. of military music; Chichester Volunteers, pf (1802), arr. of sym. no.26; Voluntaries, org (1806); over 160 other org voluntaries; Tpt Piece, org duet; Sonata, C, pf; Sonatina, G, pf; arrs. of ovs. by Giardini and T. Arne, hpd duet (1782)

SACRED VOCAL

A Verse Anthem in 4 parts, from the 150th Psalm . . . to which are added 10 new psalm tunes . . . also 5 chants and 3 hymns (1785)
14 New Psalm Tunes in 4 parts and Different Stiles (1790), also incl. 2 hymns and some chants
6 Anthems in 4 parts with a verse Sanctus & Kyrie, op.18 (1797)
24 New Chants in 4 Parts, op.42 (1804)
Te Deum and Jubilate, D, org acc. (*c*1880)
ed.: The Cathedral Chant Book, 3 vols (1808) [*c*200 chants]
Lost: Collection of Psalms, Hymns & Anthems for the Use of Country Choirs (1811); 10 Original Sacred Melodies with New Zealander's Welcome to English Missionaries (1823); 7 anthems, chants, 11 hymns, ps settings, service settings, TeD, other works

SECULAR VOCAL

Lucy's Call from Colin's Tomb (song), 1v, orch (1786)
2 Serious & 2 Cheerful Glees, op.10 (1787)
The City Feast, or Man of True Taste (glee), vv, insts (1789)
The Dying Christian to his Soul (The Christian's Glorious Triumph)(ode, Pope), 1v, pf (1797)
Happy are we met, 5vv, op.30 (1801)
Cowper's Stanzas to Mary (song) (1804)
Lost: at least 18 glees, 19 songs, other works

WRITINGS

other writings cited in Sainsbury, lost

'A Comparison between the Ancient and Modern Styles of Music', *Monthly Magazine*, ii (1796–7), 981–5; repr. in Cudworth (1955)

BRIAN ROBINS

Marsh, Robert C(harles) (*b* Columbus, OH, 5 Aug 1924). American music critic. He studied journalism (BS 1945) and philosophy (MA 1946) at Northwestern University, and music and philosophy at Cornell, the University of Chicago, Harvard (with Hindemith, 1948–51), Oxford and Cambridge (with Thurston Dart, 1953–6). He taught at various colleges from 1947 to 1968. He was music critic for the Chicago *Sun-Times* (1956–93) and wrote approximately 200 articles each year for that newspaper. He wrote the only biography of Toscanini to appear during the conductor's lifetime, *Toscanini and the Art of Orchestral Performance*, and he contributed regularly to *High Fidelity* (1954–72) and *Saturday Review*. He shared the Peabody Award for music broadcasting in 1976 and in 1983 won a Deems Taylor Award from ASCAP for music criticism. Marsh was one of the most important music critics in the Midwest, by virtue of his association for so many years with the musical centre of the area. Through his books and other writings, he has established his reputation as an authority on the history of opera in the USA, and the style and technique of orchestral conducting.

PATRICK J. SMITH/MAUREEN BUJA

Marsh, Roger (*b* Bournemouth, 10 Dec 1949). English composer. He studied composition privately with Ian Kellam (1966–8) and then with Rands at the University of York (1968–75), gaining his DPhil (composition) in 1975. From 1976 to 1978 he was Harkness Fellow at the University of California, San Diego, subsequently becoming lecturer at the University of Keele (1978–88), before moving to the University of York in 1988 where he was appointed senior lecturer in 1991 and professor in 1999. During 1993 he was visiting professor of composition at Harvard University. In 1987 he became associated with Midland Music Theatre as a director and performer, and he is also conductor and director of the contemporary music ensemble Black Hair.

The principal influences on Marsh's music are Stravinsky and Berio. The voice is a primary element and works frequently derive from mythological or literary sources, in particular Joyce, as in *Not a soul but ourselves* ... (1977) with a text from *Finnegans Wake*. This piece, commissioned and performed widely by the Extended Vocal Techniques Ensemble, San Diego, established Marsh's name; it was subsequently received by Electric Phoenix (Wergo 60094, 1977). A major preoccupation has been music theatre: several works arise from a re-examination of stories and concepts from the Old Testament in terms of late 20th-century sensibilities. They are characterized by humour and irony, for example in the dramatic oratorio *Samson* (1983) and the melodrama *The Song of Abigail* (1985). A number of these pieces have come to form an extended drama, *The Big Bang* (1989). Marsh has also explored unconventional spatial possibilities in instrumental composition, for instance in *Kagura* (1991) for chamber ensemble, inspired by the formation of a gagaku orchestra in Kurosawa's film *Dreams*. His BBC Proms commission, *Stepping Out* (1990) for piano and orchestra, and the orchestral *Espace* (1993–4) show him exploiting similar antiphonal interplay on a larger scale.

WORKS

ANDREW BURN

Marsh, Stephan Hale Alonzo (*b* London, 4 Jan 1805; *d* San Francisco, 21 Jan 1888). Australian composer and harpist of British birth. He was a pupil of Bochsa, and as a harpist in English and continental centres his early career was sponsored by the Duchess of Kent. He emigrated to Australia and settled in Sydney in March 1842, where he became an active recitalist, concert promoter, teacher of the harp and piano and an associate of Wallace and Nathan. His early Australian compositions were mainly of an ephemeral patriotic nature and include the *Australian Valse* (1843), *Hail to Thee, O Mighty One* for orchestra, chorus and military band (1845), *Advance, Australia* (1846) and *Dr Leichhardt's March*, which was published in London in 1846. He also wrote sacred works, polkas, waltzes and quadrilles. He lived from 1852 to 1872 in Melbourne, where his most notable work was the three-act opera *The Gentleman in Black* (E. Searle, 1861), the first original production by W.S. Lyster's professional opera company. He was chiefly engaged in teaching and assisting his brother Henry Marsh in establishing a Melbourne branch of their successful Sydney music publishing and warehouse business. He left for Japan in 1872 and lived in California from 1874 until his death.

ELIZABETH WOOD

Marshall. British amplifier manufacturer. After requests from British rock guitarists and bass players who needed an affordable amplifier capable of high sound levels, the drum teacher and music shop owner Jim Marshall teamed up with his service engineer Ken Bran in 1962 to produce a British-made musical instrument amplifier based on the Californian-made Fender Bassman. Marshall and Bran's amplifiers were soon developed into the famous 'Marshall stack', consisting of an amplifier head containing the valves, circuitry and controls sitting on top of two 'four-by-twelve' cabinets, each containing four Celestion 12-inch (30·48 cm) loudspeakers. Delivering 50 watts RMS and frequently more, the 'stacks' provided exactly the sort of high power demanded by emerging players such as Pete Townshend of The Who and Jimi Hendrix. Players such as these were playing electric guitars through Marshall amplifiers at increasingly extreme volume levels

in the late 1960s as venues became larger and outdoor festivals more popular. Marshall also produced 'combo' amplifiers which combined the amplifier and loudspeakers within one cabinet. Building on the fame of their early innovations, Marshall has become a leading supplier of equipment wherever high quality and high volume amplification is required.

TONY BACON

Marshall, Frank (*b* Mataron, 28 Nov 1883; *d* Barcelona, 29 May 1959). Catalan pianist and teacher of English origin. After graduating from the conservatory in Barcelona he came under the influence of Granados, who asked to oversee his training. Although Granados insisted that he would need to make radical changes to every aspect of his playing, Marshall eventually became teaching assistant to Granados at his academy, where he was later appointed associate director. While the main emphasis of Marshall's career lay in teaching, he did not entirely abandon the concert platform, and his performances of his friend Falla's *Noches en los jardines de España* under the composer's baton were particularly admired. He also made a number of commercial recordings with Conchita Supervia. On the death of Granados in 1916, Marshall took his place as director of the academy, which later changed its name to the Acadèmia Frank Marshall. Under his directorship, which continued until his death, the academy maintained the ideals of its founder, with a focus on the development of a distinctive approach to voicing, sonority and subtle inflections of pedalling. These ideals are exemplified at their most refined in the playing of his protégéé Alicia de Larŕocha, whom Marshall nominated in his will as his successor. Marshall played an important role in the consolidation of a distinctive Catalan tradition of pianism, and followed the example of Granados in publishing a pragmatic *Estudio práctico sobre los pedales del piano* (Madrid, 1919), in which he attempted a precise system of notation for pedalling, along with a companion volume, *La sonoridad del piano* (Barcelona, n.d.).

CHARLES HOPKINS

Marshall, Ingram D(ouglass) (*b* Mount Vernon, NY, 10 May 1942). American composer, performer and critic. Marshall received the BA in 1964 from Lake Forest College, and then studied musicology with Paul Henry Lang and electronic music with Ussachevsky at Columbia (1965–7). He continued to work on electronic composition with Subotnick at the New York University Composers Workshop and the California Institute of the Arts (MFA 1971), as well as studying in Bali with K.A.T. Wasitodipura in 1971. He taught at the California Institute (1971–4) and at Evergreen State College (1985–9) and has been guest professor at San Francisco Conservatory, Brooklyn College and Yale University. On a Fulbright research award in Sweden in 1975, he explored 'text-sound' poetry, which was cogently adapted in his first major composition, *The Fragility Cycles* (1976). This work, performed widely by the composer both in the USA and Europe, marked the culmination of Marshall's early electronic experimentation, distinctive for its humane use of technology and the grave, self-abnegating lyricism that still marks much of his output.

Marshall lived until 1985 in San Francisco, where he composed his best-known piece, *Fog Tropes*, combining brass and the *musique concrète* of foghorns recorded on the bay. During this period he also wrote programme notes for the San Francisco SO and music criticism for local journals. He subsequently moved to Washington and then, in 1989, to Connecticut, where he composed and wrote programme notes for Carnegie Hall, sleeve notes for Nonesuch and New Albion Records, and contributed to *Opus* magazine.

The programmatic element in Marshall's work is most pronounced in his collaborations with photographer Jim Bengston, whose slides accompanied the music of *Eberbach* and *Alcatraz*. Otherwise, his pieces not only incorporate taped sounds of nature but also fragments of classical music, often so recontextualized as to be unrecognizable, e.g. Beethoven's Waldstein Sonata in *Woodstone*. He has also included fragments of folk music and hymnody, the latter of which has become pre-eminent in his work of the 1990s, especially in *Evensongs* and *Hymnodic Delays*. Until 1985 Marshall was the principal performer of his music – supplementing the tape parts as a keyboard player, a *gambuh* player and a bass reciter-chanter. However, more recently he has wedded electronics to traditional chamber and orchestral idioms, most masterfully in the sinfonia *Kingdom Come*. Nevertheless his music has remained the same in its dream-like sense of time, evoked by notes of long duration and repetition that ally him to minimalism, and an elegiac, occasionally neo-Romantic, expressiveness, most notably in *Gradual Requiem*, commemorating his father. Marshall has recorded for Ibu, New Albion, Nonesuch and New World. He has been honoured with a Guggenheim Fellowship and the Award in Music from the American Academy.

EDWARD STRICKLAND

Marshall, Julian (*b* nr Leeds, 24 June 1836; *d* London, 21 Nov 1903). English collector and writer on music. From a Yorkshire industrial family, he sang in the choir of Leeds Parish Church under S.S. Wesley. He went to London in 1861 to pursue his interest in art, racket games and music, about all of which he wrote. One of the principal contributors to the first edition of Grove's *Dictionary*, Marshall was also secretary to the Mendelssohn Scholarship Foundation from 1871. His first collection, of prints and engravings, was sold at Sotheby's in 1864. Thereafter he concentrated on printed and manuscript music. His printed Handel scores and librettos were sold to Arthur J. Balfour (later 1st Earl) in 1876 and are now in the National Library of Scotland. Between 1878 and 1881, while the Musical Association was campaigning for greater emphasis on music in the national library, Marshall sold over 400 volumes of music manuscripts to the British Museum (*GB-Lbl* Add. MSS 30930–34, 31384–823), among them Beethoven's Pastoral Symphony sketchbook and autograph scores by Purcell, Haydn and Mozart. Most of his collection of printed music was dispersed in sales between 1884 and 1922. Marshall's wife (née Ashton, *b* 1843; *d* 1922) composed, conducted the South Hampstead Orchestra and also wrote for the first edition of Grove's *Dictionary*.

ARTHUR SEARLE

Marshall, Robert L(ewis) (*b* New York, 12 Oct 1939). American musicologist. He went to Columbia University, and took the BA there in 1960. The same year, he began graduate studies at Princeton University, working with Arthur Mendel and Oliver Strunk. He studied with Georg von Dadelsen at the University of Hamburg (1962–5), then returned to Princeton, taking the PhD in 1968. In 1966 he was appointed to the faculty at the University of Chicago and was chairman of the department of music from 1972 to 1978. In 1983 he joined the faculty of Brandeis University; he was named Louis, Frances and Jeffrey Sachar Professor in 1985, and chaired the department from 1985 to 1993. Marshall's special interest is 18th-century music, particularly the works of J.S. Bach. He is also interested in the history of German church music to 1750, Lutheran chorale settings and 17th-century keyboard music. His two-volume monograph on Bach's compositional process was the first detailed study of the autograph scores of the vocal works and the first attempt to find in these scores manifestations of Bach's creative process.

PAULA MORGAN

Marshall, William (*b* Fochabers, Banff, 27 Dec 1748; *d* Craigellachie, Banff, 29 May 1833). Scottish fiddle-composer and violinist. He was one of the outstanding fiddle-composers of his time; Burns called him 'the first composer of strathspeys of the age', and many of his 250 dance tunes and airs have firm places in today's fiddle repertory. His best-known pieces are *Miss Admiral Gordon's Strathspey* (to which Burns wrote words in 1788) and *Craigellachie Bridge* (composed in 1815 to celebrate a new suspension bridge over the River Spey).

Of working-class background, Marshall entered domestic service at the age of 12 with the Duke of Gordon at Gordon Castle, Fochabers, and was soon promoted to butler, a post involving travelling with the family to Edinburgh and London. In middle age he was further promoted, becoming estates factor. He remained, in the strictest sense, an amateur musician. He was a talented mathematician, which led him to a range of demanding hobbies (surveying, astronomy, clock making). It also affected his compositions, which have a steely precision of effect, both technical and emotional, unlike any Scots-fiddle writing before or since.

Two collections of Marshall's tunes were published during his lifetime (Edinburgh, 1781 and 1822) and one posthumously (Edinburgh, 1845). A favourite form of his was the 'slow strathspey' (a piece in strathspey time but too slow for dancing), which he did much to develop,

even if he did not actually invent it. Some of his correspondence survives (*GB-En*).

DAVID JOHNSON

Marshall-Hall, George W(illiam) L(ouis) (*b* London, 28 March 1862; *d* Melbourne, 18 July 1915). Australian composer of English birth. In 1880 he was appointed organist at Oxford Military College, having studied privately in Berlin under Carl August Haupt. In 1883 he attended the RCM, studying organ with Walter Parratt, composition with Hubert Parry and counterpoint with Frederick Bridge. He was organist and choirmaster at Newton College, Newton Abbot (1884–6), and then assistant to Alan Gray, music master at Wellington College. In 1888 he became director of the orchestra and choral society at the London Organ School and College of Music, where he also taught composition and singing.

In 1891 Marshall-Hall emigrated to Australia to become the first Ormond Professor of Music at the University of Melbourne. He founded the Marshall-Hall Orchestra (1892), which inherited the standards, scores and some of the personnel of its lapsed predecessors, the 1888 Centennial Exhibition Orchestra formed under Sir Frederick Hymen Cowen and its successor, the Victorian Orchestra. The orchestra gave first performances of many of Marshall-Hall's instrumental and vocal compositions, and over the next 20 years he established a body of prayers recognized by visiting musicians as equal to the general order of those in Europe. He also introduced orchestral music new to the colony and gained a reputation as a conductor of the first rank.

However, from the time that he arrived in Melbourne, the views he expressed in articles and lectures were considered outrageous, and his temper, his wild public behaviour and loud speech made him enemies. In 1894–5 with W.A. Laver, he established the Melbourne University Conservatorium, introducing a course unfashionably centred on interpretative sensibility built on technical efficiency. Following the publication of his collection of poems, *Hymns Ancient and Modern*, in 1898, he was accused in the press of lewdness, animalism, lasciviousness and anti-clericalism. The public debate that ensued brought the question of freedom of speech to the fore, creating national interest but destroying Marshall-Hall's reputation in the process. When his tenure was not renewed in 1900, he set up his own Conservatorium as a rival to that of the university, dividing the music community's loyalties for a generation.

The Marshall-Hall Orchestra failed in 1912. Disillusioned, the composer returned to Europe in 1913 to promote his own music. The full-length opera *Romeo and Juliet* was scheduled for production at the Stadttheater, Nuremberg, but was cancelled. *Stella*, a one-act opera, was produced at the London Palladium on 8 June 1914. War put an end to further negotiations. In 1915 Marshall-Hall was reinstated as Ormond Professor and returned to Australia in triumph. Six months later he died of peritonitis.

Marshall-Hall's earlier works are strongly influenced by Wagner, with the later period passing into the shadow of Puccini. Much of his output is in an ultra-romantic style little understood in the period following his death, and the music fell into near-total neglect. In the 1930s Percy Grainger bought the manuscripts, which were the first Australian work to be preserved for his Musuem at the University of Melbourne in 1935.

Marsick, Armand (Louis Joseph) (*b* Liège, 20 Sept 1877; *d* Haine-St Paul, Hainaut, 30 April 1959). Belgian composer and conductor, nephew of Martin Marsick. He performed at the conservatory concerts in Nancy, and there he studied composition with Ropartz. Moving to Paris as leader of the Colonne concerts, he completed his studies under d'Indy. In 1908 he was appointed conductor and professor of composition at the Athens Conservatory; from 1922 to 1927 he directed the Bilbao Conservatory. He returned to Belgium as professor of harmony at the Liège Conservatory (1927–42), where he initiated the Association des Concerts Populaires Liégeois (1927–39). His orchestral music, often inspired by trips abroad, has a descriptive character. His orchestration is powerfully suggestive; the operas, notably *Lara*, are in the *verismo* tradition.

HENRI VANHULST

Marsick, Martin Pierre (Joseph) (*b* Jupille-sur-Meuse, nr Liège, 9 March 1847; *d* Paris, 21 Oct 1924). Belgian violinist and composer. He entered the Liège Conservatory at the age of seven and won first prize in solfège two years later. He studied the violin with Dupont, Rodolphe Massart and Désiré Heynberg, winning a gold medal with the highest distinction in 1864. From 1865 to 1867 he studied the violin with Léonard at the Brussels Conservatory, and from 1868 to 1869 he studied with Lambert Massart at the Paris Conservatoire, winning a *premier prix* in violin in the latter year; simultaneously he played in the Opéra orchestra. A scholarship from the Belgian government enabled him to go to Berlin in 1870 to study with Joachim. From 1875 onwards, he was heard at the Concerts Populaires (J. Pasdeloup), the Concerts Colonne (Ed. Colonne), the Nouveaux Concerts (Ch. Lamoureux) and at the Concerts du Conservatoire, and from 1877 he toured Europe. With Rémy, Van Waefelghem and Delsart he formed the Quatour Marsick, a string quartet which soon ranked among the best in Paris. In 1892 he replaced Eugène Sauzay as violin teacher at the Paris Conservatoire, an appointment which he held until 1900. His students included Carl Flesch, Jacques Thibaud and Georges Enesco. He made concert tours of Russia (1885) and the United States (1895–6). His playing was praised for its big sound and facile bow technique and he was particularly well known for his interpretations of Vieuxtemps (who supported him enthusiastically) and Wieniawski. Marsick owned several violins among which a very fine Stradivarius dating fom 1705, known today as the Marsick. It was later owned by David Oistrakh.

PATRICK PEIRE/CÉCILE TARDIF

Marsili, Carlo (*b* Lucca, 9 June 1828; *d* Lucca, 27 May 1878). Italian composer. He studied harmony, counterpoint and composition in Lucca under Michele Puccini and in 1848 became *maestro di cappella* at the Seminario Decanale there. On 19 June 1851, after a brilliant showing in the public competition, he was named *maestro di cappella* at the church of the Cavalieri di S Stefano, Pisa. On 27 June 1865 he was made director of the conservatory in Lucca, the Istituto Musicale Pacini, a post he held, together with that in Pisa, until his death. He was a member of many academies, including that of Bologna from 1865, and a *consigliere* of musical societies.

Marsili's compositions are mainly sacred, written for churches in Lucca and Pisa, although he composed one stage work, a *melodramma buffo* entitled *Il casino di campagna* (Lucca, 1851). His only published work, a mass for three voices, organ and bass, won a contest sponsored by the Duke of S Clemente at Florence in 1862. A grandiose requiem for Rossini, first performed at Pisa, was especially admired.

FRANCO BAGGIANI

Marsolier, Louis de. *See* MOLLIER LOUIS DE.

Marsolo [Marsoli], **Pietro Maria** (*b* Messina, Sicily, *c*1580; *d* after 1614). Italian composer. He was active in Ferrara between 1604 and 1614; in 1615 he was *maestro di cappella* of the city of Piacenza. An earlier period that he spent in the choir of the cathedral at Rieti, near Rome, is confirmed only by documents relating to his position as *maestro di cappella* of the cathedral at Fano, near Pesaro, from December 1608 to May 1610. After his return to Ferrara (where he had been ordained priest by 1608) he was employed until 1614 as *maestro di cappella* of the cathedral and *maestro di musica* of the Accademia degli Intrepidi. In 1612 he sought unsuccessfully to succeed Monteverdi at the Mantuan court. It appears from his four letters to Duke Francesco Gonzaga II of 2, 23, 26 and 30 September 1612 (*I-MAa*) that Monteverdi's successor must have been chosen by competition; the vocal and instrumental music that Marsolo sent to Mantua is lost, as are the canzonettas to texts of Bernardo Morando written for the birth of Maria Farnese (Piacenza, 1615).

The roots of Marsolo's style lie in the 16th century, and he was praised by Artusi and Romano Micheli. His sacred music shows the poise (*decor*) and restraint (*mediocritas*) characteristic of north Italian sacred music after the Council of Trent. In the preface to the *Madrigali boscarecci* he stated that he had written them 'for four voices on purpose to distinguish them from the common run of compositions, since pieces for so few voices are becoming rare in the modern style of composing'. Marsolo's most significant volume is his second set of four-part madrigals of 1614, which contains reworkings of monodic madrigals (for the most part hitherto unknown) by Caccini (ten), Giuseppino (three), Achille

Falcone, Rasi, Bartolomeo Roy, Sebastiáno Raval, Lelio Bertani, Gioseffo Guami, Capovia and Angelo da Napoli (the last two of whom have not been identified). In endeavouring to refashion these monodies as polyphonic madrigals for four voices and continuo and in the choice of his models (dating from about 1590 to 1600) Marsolo reveals the retrospective nature of his musical personality, even if the results often approach the concertato style.

LORENZO BIANCONI

Marson, George (*b* Worcester, *c*1573; *d* Canterbury, 3 Feb 1632). English composer. He was admitted to Trinity College, Cambridge, in 1595, and he graduated with a MusB in 1598. Soon after this he succeeded George Juxon as organist and Master of the Choristers at Canterbury Cathedral, though his post was not confirmed by the chapter acts until 25 November 1603. On 10 May 1604 he was ordained priest and deacon in London and became a minor canon soon after. On 27 February 1607 he was inducted as rector of St Mary Magdalene, Canterbury, holding this office concurrently with his cathedral posts and also serving the nearby hamlet of Nackington. The cathedral records show that he helped to teach the choristers the viol and bandora. Towards the end of his life he delegated some of his responsibilities, his son John succeeding him as rector of St Mary Magdalene on his resignation on 24 October 1631. The inventory taken at his death notes four virginals, two viols and a lute among his possessions. Marson's music suffers from a limited and repetitive harmonic vocabulary, but there is much that is attractive and it is unfortunate that a true appreciation of his work is hampered by incomplete sources. Most of his music is in manuscripts connected with John Barnard – perhaps the same John Barnard who was lay clerk at Canterbury under Marson's direction from 1618 to 1622. Three short services survive incomplete, including the 'Creed made for Dr Hunt', presumably the Canterbury prebendary Richard Hunt, who was resident there from 1614. Some psalm settings incorporate a refrain for full choir set between solo verses. *O gracious God of heaven*, a five-part full anthem, is a sombre and expressive piece; the strange text of *O Lord who still doth guide our land*, a five-part verse anthem, suggests that the work was written for some royal visit or celebration. Marson also contributed a lively madrigal to Morley's *The Triumphes of Oriana* (RISM 1601[16]).

WORKS
MSS incomplete; in GB-Lcm unless otherwise stated

Service, D, ?4vv, org, *GB-DRc*; Second Service, a, 4vv; Third Service, d ('Creed made for Dr Hunt'), 4/4vv; Cantate Domino, 5vv; Preces, 4/4vv; 3 psalms, 4, 5vv (2 attrib. 'Marson'); 3 full anthems, 5, 6vv (1 lost, listed in *Lcm* catalogue; 1 attrib. 'Marson'); Verse anthem, ?/5vv (attrib. 'Marson'); Madrigal, 5vv, 1601[16]

ANDREW ASHBEE

Marsyas. A Phrygian satyr or Silenus in classical myth. He probably originated as a water spirit native to Asia Minor and Syria; the myths of many peoples concerning the origins of music also concern water. From an early period, however, he was associated with the double AULOS, introduced into Greece from the Near East, and with the composition of aulos music for the Asiatic mother-goddess CYBELE.

Various Greek mythographers, followed by OVID (*Metamorphoses*, vi.383–7; *Fasti*, vi.695–710), told the story of his contest with APOLLO. Athena invented the double aulos but threw it away because it distorted her features (Plutarch, *On the Control of Anger*, 456b; Athenaeus, xiv, 616e–f, quoting Melanippides, *Marsyas*; cf Pausanias, *Description of Greece*, i.24.1). Marsyas found the pipes and mastered them, then challenged Apollo to a musical competition judged by the MUSES. Apollo, victorious, had the satyr flayed (Diodorus Siculus, iii.59; Apollodorus, i.4.2). From the blood that ran down (as the more common version has it) came the river Marsyas; other aetiological connections were known to antiquity. Many recent scholars have interpreted the myth as reflecting the victory of Hellenic song, accompanied by the kithara, over Asiatic aulos music; this perhaps exaggerates the degree of actual rivalry.

Various late classical writers made Marsyas the inventor of the double aulos, or the son of its inventor Hyagnis. Marsyas in turn is supposed to have taught Olympus (*see* OLYMPUS THE MYSIAN), a legendary figure from the beginning of Greek music history (Plato, *Symposium*, 215c; Pseudo-Plutarch, *On Music*, 1132e–f; Apuleius, *Florida*, i.3.11), although in some sources (e.g. Apollodorus, i.4.2), Marsyas is the son of Olympus. According to a fragment preserved in Plutarch's *On the Control of Anger* (456b–c), perhaps by Simonides, Marsyas invented the PHORBEIA, which is commonly though by no means universally worn by performers playing the aulos. A striking feature of the myth is the ambivalent attitude displayed towards the instrument itself, at once claimed and disowned by native Greek tradition.

WARREN ANDERSON/THOMAS J. MATHIESEN

Márta, István (*b* Budapest, 14 June 1952). Hungarian composer. He studied composition at the Liszt Academy of Music under Rezső Sugár (1972–81). Between 1975 and 1982 he managed the Young Composers' Group, and from 1980 to 1983 was a member of '180', an ensemble which specialized in the performance of minimalist works and repetitive music; in 1980 he co-founded the broader-based Mandel Quartet, performing on the harpsichord, synthesizer and percussion. He has lectured on classical music history and 20th-century musical analysis at the jazz faculty of the Béla Bartók Musical Training College, and has organized 'happenings' and directed arts festivals since 1985. He became musical director of the Petőfi Theatre in Veszprém and the New Theatre in Budapest in 1988 and 1994, respectively; from 1990 to 1992 he was musical director of the National Theatre. An experimental composer, his works employ technical procedures associated with repetitive music (Babaházi történet, for percussion), and contain references to folk music as well as elements of the classical and light music traditions. He has composed scores for over 150 stage and film productions.

ANNA DALOS

Marteau, Henri (*b* Reims, 31 March 1874; *d* Lichtenberg, 3 Oct 1934). Swedish violinist, composer and conductor of French birth. He started lessons at the age of five, and his principal teacher until he was 17 was Léonard. He made many appearances as a child, including those in Vienna in 1884 and in London in 1888, both under Richter. In 1891 he entered Garcin's class at the Paris Conservatoire and won a *premier prix* within a year. From 1893 to 1899 Marteau toured in the USA, Sweden and Russia. In 1900 he became a professor of the violin at the Geneva Conservatoire and in 1908 succeeded Joachim at the Hochschule für Musik, Berlin. As a Frenchman living in Germany, Marteau had difficulties during World War I but he was permitted to continue teaching until 1915. He went to Sweden (he had been elected to the Swedish Royal Academy of Music in 1900), took Swedish nationality and became conductor of the orchestra at Göteborg until 1920. He did much to promote the works of Berwald, then almost forgotten, and instituted a fund to encourage the performance of Swedish music. After the war he joined the Prague Conservatory, took up concert tours again and played in Stockholm for the last time in April 1934.

In his earlier years Marteau was regarded as one of the greatest violinists of his time. He was particularly celebrated as an interpreter of Mozart, whose complete violin works he played at a time when they were rarely performed. He also played the works of Bach and of his own contemporaries, among them Max Reger, of whose Violin Concerto he gave the first performance. Marteau composed a great deal. His works include a cantata *La voix de Jeanne d'Arc*, two violin concertos, a cello concerto, a *Sinfonia gloria naturae* for large orchestra, many instrumental and choral works, much chamber music, cadenzas to violin concertos and an opera, *Meister Schwalbe* (Plauen, 1921); he published a translation of Joachim's and Moser's *Violinschule* (as *Traité du violon*, Paris, 1905).

Martello [Martelli], **Pier Jacopo** (*b* Bologna, 28 April 1665; *d* Bologna, 10 May 1727). Italian librettist, dramatist and essayist. A student of medicine, law and philosophy, he was employed from 1697 as an assistant in the chancellery of the Bolognese senate, from 1708 to 1718 as secretary of the Bolognese Embassy in Rome, and from 1718 as secretary of the senate in Bologna. In 1698 he helped found 'Renia', Bologna's colony of the Arcadian Academy, where he assumed the pseudonym Mirtillo Dianidio. He wrote a number of librettos for operas performed at Bologna in the 1690s, among them *Perseo* and *Tisbe*

(both Malvezzi, 1697), set by various composers, *L'Apollo geloso* (Perti, Formagliari, 1698) and a pastorale *Gli amici* (Albergati, Malvezzi, 1699). He then turned to spoken tragedy, using 14-syllable rhyming lines imitative of alexandrines and later known as *versi martelliani*, which were little admired, though occasionally used by Goldoni and others. During 1713 he travelled with other Italian literati to Paris, where he wrote *L'impostore: dialogo sopra la tragedia antica e moderna* (Paris, 1714), revised as *Della tragedia antica e moderna* (Rome, 1715, 2/1735) with a dialogue on opera. The dialogue, with 'Aristotle' as the mentor, shows Martello on the side of reform, pressing the claims of the mythological plot above the historical and satirizing opera-house abuses.

□

Martenot, Maurice (*b* Paris, 14 Oct 1898; *d* Clichy, nr Paris, 8 Oct 1980). French musician and inventor. He is best known for his electronic musical instrument, the ONDES MARTENOT, which he first demonstrated on 20 April 1928 at the Paris Opéra. He was also a conductor and professor at the Ecole Normale de Musique in Paris, and director of the Ecole d'Art Martenot at Neuilly-sur-Seine, near Paris. He wrote several pedagogical works, of which the most important is *Méthode Martenot* (Paris, 1952).

HUBERT S. HOWE JR/R

Martha and the Vandellas. American soul vocal group. Martha Reeves (*b* Alabama, 18 July 1941) worked as a secretary for the Motown Record Corporation; she came to the attention of Berry Gordy, the company's president, when she formed a backing group, with Rosalind Ashford (*b* Alabama, 2 Sept 1949) and Annette Sterling that sang backing vocals on Marvin Gaye's *Stubborn Kind of Fellow* (1962). Taking the name Martha and the Vandellas the group began to record for the Motown subsidiary, Gordy Records on their own account, and their single, *Come and get these memories* (1963), reached no.30 in the pop chart; this was followed by *Heat Wave* a few months later. Reeves's aggressive, flamboyant style and the sympathetic writing and production of the Holland-Dozier-Holland team helped the Vandellas avoid being categorized simply as a girl group; in fact they recorded some of the toughest music produced by Motown, including Marvin Gaye and Mickey Stevenson's *Dancing in the street* (1964), a good example of the obsessive, sophisticated offbeat style typical of the Motown sound. A succession of infectious hit singles followed, culminating with the delightful *Jimmy Mack* (1967); the group made no further hit recordings and disbanded in 1972, after which Reeves pursued a solo career with slight success.

Marti, Heinz (*b* Berne, 7 May 1934). Swiss composer. At the Berne Conservatory he studied the viola with Marton and theory and composition with Veress; then from 1965 to 1968 he was a pupil of Klaus Huber at the Basle Musik-Akademie. He played the viola in various orchestras including the Beromünster RO, the Zürich Tonhalle and the orchestra of the Zürich Opera. From 1970 his reputation as a composer spread, leading to commissions from the Montreux Festival, the Zürich Tonhalle Gesellschaft and the canton of Zürich. Marti's music was strongly influenced by Huber, particularly in its revolving around tonal axes and its use of small intervals. From 1975 he began to move away from his hitherto extensive use of serial techniques.

Martí [Martinez], **Samuel** (*b* El Paso, TX, 18 May 1906; *d* Tepoztlán, 29 March 1975). Mexican ethnomusicologist, conductor and violinist. He studied first in El Paso at the Manuel Gil Academy of Music, then at the Conservatory of Music in Chicago, where he was also active as a violinist. On moving to Mérida (1935) he founded and directed the Orquesta Sinfónica de Yucatán and the Conciertos Martí, which remained active for over 20 years. Subsequently he settled in Mexico City and devoted himself to ethnomusicological research, concentrating on pre-Columbian music, instruments and dances of Mexican cultures, a subject he pioneered. In 1968 he discovered a new Mixtec archaeological site in the heart of the Sierra Madre of Oaxaca, which proved to be one of the richest areas of pre-Columbian culture.

GERARD BÉHAGUE

Martianus (Minneus Felix) Capella (*fl* Carthage, ?early 5th century). Latin writer. His only known work, *De nuptiis Philologiae et Mercurii* (formerly often called *Satyricon* because of its affinity to Menippean satire) in nine books, is a fantasy in which seven bridesmaids, one for each of the *artes*, decribe the arts they personify. From his own remarks it seems that he was a resident of Carthage and perhaps a lawyer by vocation, to judge from some idiosyncrasies of vocabulary and statements made in two separate places in his book. He is generally assumed to have lived before 439 CE, when Carthage was sacked by the Vandals.

Martianus's main interest was to compile information on each of the liberal arts, couched in terms of an elaborate allegory. The direct sources for his discussions of grammar, dialectic and rhetoric are not known, but those for the quadrivial sciences are less obscure. His treatment of geometry is a geographic exercise drawn from Pliny and Solinus; that of arithmetic relies on Nicomachus and Euclid, although it is unlikely he consulted these sources directly; for astronomy, he is thought to have transmitted Posidonius through a Latin intermediary; as for music, the greater part of book 9 (Willis, §§936–95) is, with some rearrangements, deliberate or accidental omissions, and insertions of passages from other Greek or Latin sources, virtually a translation of *On Music*, i.4–19, of ARISTIDES QUINTILIANUS. The possibility remains that Martianus relied on a single encyclopedic source no longer extant for the entire corpus of his information.

Like all late classical music theorists, Martianus avoids giving details of contemporary musical practice, preferring instead to concentrate on music as a fundamentally mathematical phenomenon. It is not possible to say whether his decision was based on a lack of knowledge about such practice, or whether he considered that a discussion of contemporary performance was inappropriate in a manual on the verbal and mathematical arts. The opening allegory of book 9 gives way to Harmonia reciting common stories about the ethical powers of music, followed by a proposal to discuss melodic composition. The resulting discussion, which is not based on Aristides, is simply a description of the Greek musical system (complete with Greek pitch names) and a mention of 15 'tropi' – five principal, each with two subsidiaries. The focus then shifts to Aristides, whom Martianus follows in his division and subdivision of the discipline 'harmonia' into descending triads. The subject of harmonics receives a sevenfold subdivision, including pitches, intervals, systems, genera, tonoi, change of systems, and melodic construction. As a natural result of discrepancies in detail between his sources, Martianus ennumerates 28 separate pitches here where earlier he had listed only 18. Finally, a similar division and subdivision of rhythm, continuing the transmission of Aristides, concludes book 9 and consists of substantive remarks on rhythm from the point of view of Greco-Latin metrics.

Perhaps the most important thing about *De nuptiis Philologiae et Mercurii* as a whole is that it was widely read from the 9th century onwards. Not only was it the object of four Carolingian commentaries (by Johannes Scottus Eriugena, Martin of Laon – the latter formerly attributed to Dunchad – Remigius of Auxerre and an anonymous author) and a 10th-century German translation of books 1 and 2 by Notker Labeo, but its allegory, images and vocabulary were adopted by many later writers, such as John of Salisbury, Alain de Lille and Thierry of Chartres. It is not, however, much drawn on by medieval specialist writers on music, perhaps because its merit is primarily literary, not informative or philosophical. There are at least three literary points of interest: the fundamental allegory with its rich cast of characters and baroque imagery; the mixing of verse (often metrically abstruse) and prose throughout the nine books, except in the encyclopedic or technical sections of books 3 to 9; and the bizarre style and vocabulary, with startlingly many *hapax legomena*. None of these points applies to the core of book 9, which is straightforward in its reliance on Aristides. The popularity of the work in the medieval schools may have rested on its usefulness as a handbook of the liberal arts intermediate in scope and difficulty between Cassiodorus's compilation and the more elaborate monographs, such as Boethius's on music and arithmetic.

LAWRENCE GUSHEE/BRADLEY JON TUCKER

Martin, C.F. American firm of guitar manufacturers. It was founded in New York by Christian Friedrich Martin (*b* Markneukirchen, Germany, 31 Jan 1796; *d* Nazareth, PA, 16 Feb 1873). Martin and his father, Johann Georg Martin, were members of the cabinet makers' guild in Markneukirchen, and were described as guitar makers during a legal dispute. Martin is mentioned as having made guitars since before 1826 and as having been foreman in the factory of the Viennese maker of guitars and violins, Johann Georg Stauffer. In September 1833 Martin emigrated to the USA, setting up a shop and workshop at 196 Hudson Street, New York. A fellow guitar maker from Markneukirchen, Heinrich Schatz, bought land near Nazareth, Pennsylvania, in 1835, and

by 1837 was making guitars and selling them through Martin's New York shop, some guitars bearing the label 'Martin and Schatz'. In 1839 Martin moved to the Nazareth area and sold his inventory to Ludecus & Wolter. Towards the end of this period Martin also had an association with Charles Bruno, founder of the musical merchandise house C. Bruno & Son, some guitars being labelled 'Martin and Bruno'. By 1850 Martin had a New York sales outlet at 385 Broadway, and some guitars of this period are labelled 'Martin and Coupa'. In 1850 the Martin factory was enlarged and in 1859 was moved to Main and North Street, Nazareth. The firm C.A. Zoebisch & Sons, at 46 Maiden Lane, New York, became Martin's distribution centre, maintaining this role until 1898.

In 1867 the founder and his son, Christian Frederick jr (1825–88), formed a partnership with the founder's nephew C.F. Hartman under the name C.F. Martin & Co.; in 1921 the company was incorporated. A new workshop and factory were built in 1964 close to the original family home. Until 1982, when C. Hugh Bloom became president, the business was headed by further members of the Martin family: Frank Henry (1866–1948), Christian Frederick III (1894–1986) and Frank Herbert (*b* 1933). Christian Frederick IV (*b* 1955) became chief executive officer in 1986.

Martin's earliest guitars were influenced by the German maker Stauffer, but as the 19th century progressed the Martin brand came to be associated with more distinctive instruments. Martin's designs for the shape and construction of acoustic steel-strung flat-top guitars have influenced virtually every other manufacturer, and include the perfecting of 'X'-bracing (*c*1850) and the 14th-fret neck-to-body join (1929). One of the best and most popular Martin innovations is the Dreadnought (introduced in 1931), a large, flat-top acoustic guitar with a distinctive wide-waisted shape that has been much copied. Martin guitars are given model numbers based on a system of coding that can indicate size, shape and other design features. The firm has also, at various times, produced electric guitars, carved-top guitars, mandolins, ukuleles and tiples, but the principal part of their production is now devoted to flat-top guitars, in which they have few rivals. Since 1970 guitars based on Martin designs have been built in Japan and marketed under the name Sigma.

Martin, Claude (*b* Couches; *fl* 1549–57). French theorist and composer. Together with Loys Bourgeois, he was one of the first to satisfy a growing demand among the French nobility and bourgeoisie by publishing treatises explaining musical techniques. The first version of his *Elementorum musices practicae pars prior* (Paris, 1550/*R*) was dedicated to the humanist parliamentarian Jean de Brinon. Its two parts explain melodic and rhythmic notation, following the mainstream of earlier theoretical writings. It ends with two four-voice 'exercises' on Virgil's *Dulces exuviae*. In 1556 he provided an abbreviated, simplified version in French which could compete with the similar vernacular treatises by Guilliaud, Jambe de Fer and Menehou printed by N. Du Chemin between 1554 and 1558. A *Magnificat* and nine chansons by him were published in collections printed by Du Chemin. The chansons are typical of the Parisian genre of the mid-16th century. Most of the texts are *épigrammes* by poets of Marot's generation. These are set essentially homophonically but with occasional imitative counterpoint and pre-cadential melismas; duple metre predominates and the rhyme scheme of the poem is often reflected in the musical structure, not only in the careful correspondence of musical and textual rhythm but in clear forms involving repetition.

WORKS

Elementorum musices practicae pars prior (Paris, 1550/*R*; Fr. trans., abridged, *Institution musicale … extraicte de la première partie des Elemens de musique practique*, 1554) (contains 2 Dulces exuviae dum fata, 4vv)

FRANK DOBBINS

Martin, Désiré. *See* BEAULIEU, DÉSIRÉ.

Martín, Edgardo (*b* Cienfuegos, 6 Oct 1915). Cuban composer, musicologist, teacher and administrator. One of the most important, senior figures in Cuban music, he began his musical studies at the age of seven with his aunt, Aurea Suárez (a native of Madrid). He went on to study with Jascha Fischermann in Havana (1936–7) and with Ardévol at the Havana Conservatory (1939–46), whose example in particular led him to become part of Cuba's outward-looking artistic avant garde. As a teacher of history and aesthetics he worked at the Havana Conservatory (1945–68), the National School of Arts (1968–9) and the university summer courses (1945–70). He also worked as a music critic for various newspapers between 1943 and 1967. He belonged to the progressive associations Grupo de Renovación Musical (1942–48) and Nuestro Tiempo (1950–59). He served on numerous committees set up to reform music teaching in the country, worked in aid of various provincial music societies and in 1968 he founded the National Composers' Collective. His music embraces many different genres and styles and was influenced by personal acquaintance with Villa-Lobos, Copland, Dessau, Guarnieri, Galindo, de Pablo and others. As a musicologist he contributed hundreds of articles on historical and technical subjects, as well as programme notes and newspaper articles.

DAVID TUNLEY

Martin, François (ii) (*b* *c*1727; *d* Paris, 1757). French composer and cellist. His date of birth is deduced from a reference in the obituary for Jean-Marie Leclair *l'ainé* in the *Mercure de France* of November 1764; the March 1757 issue referred to him as 'Feu M. Martin'. The August 1745 issue of the *Mercure* describes the young Martin as a 'très excellent violoncelle'; he may have been a pupil of Berteau. The following year a *privilège générale* enabled him to publish six sonatas for the cello, op.2 (op.1 was not published until 1748) and six trios, op.3; the latter were dedicated to his patron, the Duke of Gramont, and are remarkable for the absence of a continuo part and the prominence of the cello, which assumes a role equal to those of the two violins.

When in April 1747 Martin performed a cello sonata of his own at the Concert Spirituel he was already an *ordinaire de l'Académie royale de musique* (1746–8). He acquired two additional royal privileges, on 21 April 1752 for sonatas, trios and other instrumental works, and on 9 March 1753 for a collection of 'foreign' instrumental works (perhaps the *Douze recueils de nouveautés ou Aventures de Cythère*, the *Six recueils des étrennes d'Apollon, ou L'élite des nouveaux airs*, the *Quatre recueils de menuets* and the *Quatre recueils de contredanses*, published posthumously, resulted from these privileges).

Between 1747 and 1754 Martin composed *petits* and *grands* motets for the Concert Spirituel calling for soloists, chorus and orchestra. The *petits motets* were more italianate, with angular melodies and unusual combinations of instruments and voices; they were never published. His *Cantate Domino* and *inclina Domine* were especially popular and much praised. Also at this time he composed chamber cantatas for amateur performance at the estate of the Duke of Gramont at Puteaux. *Domino* was much praised. However, his most significant contribution was in the realm of symphonic music. In 1750 he provided the third entrée to *Amusements lyriques*, a ballet for Puteaux; Levasseur composed the first entrée and Leclair the second. A year later he published *Six symphonies et ouvertures* op.4 and an unprecedented *Symphonie à cors de chasse*. Between 1751 and 1755, his symphonies and overtures were often performed at the Concert Spirituel according to the *Mercure*. While many of his French contemporaries were still composing large ensemble pieces in the older suite form, Martin was writing modern three-movement, richly harmonic pre-Classical symphonies, with two-part themes, thematic development and recapitulations. La Laurencie and Saint-Foix noted Martin's sensitive handling of instrumental timbres in his symphonies. By grading the dynamic indications, Martin created crescendos and decrescendos. Brook remarked on Martin's audacious use of chromaticism and his feeling for minor keys. The *Mercure* (May 1752) said that while Martin was gifted, he was held back by his timidity and modesty.

JULIE ANNE SADIE

Martin, Frank (*b* Geneva, 15 Sept 1890; *d* Naarden, 21 Nov 1974). Swiss composer. He was the tenth and youngest child of a Calvinist minister. His ancestors were of French descent, and as Huguenots fled to Geneva in the 18th century. Martin began to compose when he was eight years old. He had only one music teacher, Joseph Lauber, who had studied in Zürich and Munich, and who taught Martin the piano, harmony and composition, but not counterpoint. Martin never went to a conservatory: although he knew at the age of 16 that he wanted to be a musician, and already had something to offer as a composer, he began to study mathematics and physics at his parents' wish, but did not complete the course. After World War I he lived in Zürich, Rome and Paris. In 1926, having returned to Geneva, he participated in the congress on rhythmic musical education convened by Emile Jaques-Dalcroze. First as a pupil and, after a period of two years, as a teacher of rhythmic theory at the Institut Jaques-Dalcroze, he worked closely with its founder and director. At the same time he was active as a pianist and harpsichordist; he lectured on chamber music at the conservatory and was director of the private music school Technicum Moderne de Musique. From 1943 to 1946 he was president of the Swiss Musicians' Union. In 1946 he moved to the Netherlands, in the first instance to Amsterdam and then to his own house in Naarden. From there he held a composition class at the Cologne Hochschule für Musik (1950–57). To an increasing extent he travelled all over the world performing his works. The growing regard for him at home and abroad was reflected in many prizes and honours, and his works came to enjoy a firm place in the repertories of orchestras and choirs. He was survived by his third wife, Maria (née Boeke), whom he had married in 1940.

The extremely prolonged development of his characteristic style makes it impossible to place Martin in any particular school or to compare him with any other composer. A great deal of German music was played in his family, and this was true of Geneva's musical life in general before the effect of Ansermet's work was felt (from 1917). A performance of the *St Matthew Passion* made a very deep impression on the 12-year-old boy. For a long time he was unable to detach himself from Bach's harmony; its influence is apparent until the Piano Quintet (1919) and reminiscences of it remain even in *Golgotha* (1945–8). From an early age his favourite instrument was the piano, and all his life he considered harmony to be the most important musical element. Besides Bach, he was influenced by Schumann and Chopin; in the First Violin Sonata (1913) the influence of Franck also becomes evident. This resulted in a complicated point of departure: a composer who was French in outlook was entrenched in a style essentially determined by German antecedents, and in a harmonic style to be conquered only by a radical upheaval.

The earliest works bear witness to this conflict: the *Trois poèmes païens*, performed in Vevey in 1911 at the Swiss Composers' Festival, and the oratorio-like *Les dithyrambes*, performed by Ansermet in 1918. As a result of meeting this conductor, who was to give the first performances of most of his works, Martin came to terms with Ravel and Debussy. In the *Quatre sonnets à Cassandre*, composed to poems by Ronsard in 1921, and the earliest work which Martin acknowledged in later life, he moved to a linear, consciously archaic style, restricted to modal melody and perfect triads and evading the tonal gravitation of Classical and Romantic harmony. Experiments with ancient, Indian and Bulgarian rhythms and with folk music filled the next decade (e.g. the *Trio sur des mélodies populaires irlandaises*, 1925, and *Rythmes* for orchestra, 1926). But this new harmonic freedom was paid for by the renunciation of chromaticism and dissonant chords. After 1933 Martin found what he required in the 12-note technique of Schoenberg, which he adopted in the *Quatre pièces brèves* for guitar (1933), the First Piano Concerto (1933–4), the *Rhapsodie* for five strings (1935), his most uncompromising work, the equally stringent but less dissonant String Trio (1936) and the Symphony (1937), which uses jazz instruments. His application of 12-note technique is unorthodox, and Martin rejected Schoenberg's aesthetics. For in the future too, harmony remained the determining factor for Martin:

Frank Martin

harmony within an extended tonality, with a strong personal stamp.

The first work in his mature style is the secular oratorio *Le vin herbé* for 12 solo voices with the accompaniment of seven strings and piano. The text is taken from Joseph Bédier's novel *Tristan et Iseut* and includes the prologue, three chapters and the epilogue without any alteration. The choir relates, and comments on, the action, and individual members detach themselves for passages of dialogue. Melodic inflection and a subtle rhythmic treatment match normal dramatic speech. 12-note themes generally appear in only one voice, frequently with equal note values, sometimes as an ostinato, but seldom using octave transpositions. In the accompaniment, perfect triads are deployed in unusual progressions. Dissonant chords are developed in smooth part-writing, often over a static bass which indicates the momentary tonal centre. As a result of Martin's 'gliding tonality', a movement rarely ends in its initial key (see Billeter, 1969, 1970).

These features remained in Martin's music after *Le vin herbé*. He had produced the Ballade for alto saxophone just before the first part of the oratorio, and three further ballades, for flute, for piano and for trombone, came immediately after. He wrote two more later in his career, for cello (1949) and for viola (1972). The ballades are one-movement works in several sections for a solo instrument accompanied by a piano or chamber orchestra. They are full of dramatic tension and dynamism: even ostinato elements are repeated seldom more than twice without alteration or development. Phrases are never merely juxtaposed: he rarely used a static or simple element, even when he chose a static form, as in the *Passacaille* (1944).

Composition did not come easily to Martin. He repeatedly spoke of the anxiety he felt when starting work on a composition, because his ideas were still unformed. In vocal works the text provides a scaffolding; in instrumental works he allowed himself to be directed by a specific task, such as an unusual combination of instruments. The *Petite symphonie concertante*, by far the most widely known of Martin's works, was commissioned by Sacher. It was to utilize all the common string instruments: bowed strings in the double string orchestra, plucked and struck instruments with the solo group of harp, harpsichord and piano. The combination of greatly differing intensities and the reconciliation of different timbres yield fascinating musical effects. Effective ideas are never employed in a manner that is merely evocative. The two-movement work is of an ingenious, original form, and yet readily comprehensible in broad outline.

Martin's understanding of the tone-colours of instruments and their potential for virtuoso performance offered him an inexhaustible source of ideas, and has helped ensure his continued popularity with performers. As well as in the Ballades, and in his only major solo piano work, the Preludes (1948), Martin's feeling for instruments is particularly evident in the concertos. There the orchestral as much as the solo writing proves ideally suited to the medium: the *Concerto pour 7 instruments à vent* (1949) illustrates both to striking effect.

Martin had not set any religious texts, apart from two attempts at liturgical music in the 1920s, which long remained unpublished. Then in 1944 Radio Geneva commissioned him to write a choral work to be broadcast on armistice day. Martin regarded this as a most exacting task: only biblical words seemed adequate to the purpose, and thus originated the short oratorio *In terra pax*, the first part of which expresses the gloom of wartime, the second the joys of earthly peace, the third forgiveness among human beings, while the last refers to divine peace. Shortly after the completion of *In terra pax*, in the spring of 1945, Martin was profoundly impressed by Rembrandt's etching *The Three Crosses*, and it was then that his idea of the great Passion work *Golgotha* began to take shape. He resisted the idea of a liturgical work on the Bach model, preferring to present the events of the Passion and let the hearer draw his own conclusions. There are contemplative settings of meditations of St Augustine between the seven 'pictures', giving a formal unity to the whole. The Gospel recitatives are distributed between various soloists and, at particularly dramatic junctures, entrusted to the chorus, which, much as in *Le vin herbé*, chants homophonically.

In the two operas *Der Sturm* and *Monsieur de Pourceaugnac*, Martin's sense of the poetic, the atmospheric and the humorous are displayed. The Gospel Nativity narrative is used in what is not really an opera, but a 'scenic oratorio', *Le mystère de la Nativité*, based on part of the vast 15th-century mystery play by Arnoul Greban, *Le mystère de la Passion*. The short oratorio *Pilate* (1964) originates from the same source. The three levels of action on the stage (at the very bottom hell with the devils, in the middle the earthly scenes, at the top the heavenly world) have three corresponding musical sounds: the grotesque apparition of hell is illustrated by almost atonal music, the angels sing in a completely simple style, while the music for the action on earth mediates between the two.

While Martin proved adept at moving between such stylistic extremes, his music always retained a recognizable sound, a personal style. But this does not mean that the style did not develop. Indeed his creative powers remained undiminished, his expressive range seemingly inexhaustible. The first new stylistic step is recognizable in his Cello Concerto (1965–6), which successfully integrates pentatonicism within an otherwise chromatic harmonic language, through an extension of his notion of 'gliding tonality'. Two other new elements were brought to him by his two youngest children: the sounds of electric guitars and flamenco rhythms. Martin used the first in the *Ballade des pendus* (1969), and again two years later in the two other songs of *Poèmes de la mort* for three male voices and three electric guitars, in which the stylistic allusions to pop music help to express in grotesque manner the black humour of Villon's text. In the complex rhythmic superpositions of flamenco dances, Martin found a counterpart to the rhythmic experiments that had preoccupied him for much of his career, and also the inspiration for the *Trois dances* (1970), written for Sacher, Heinz and Ursula Holliger, and the *Fantaisie sur des rythmes flamenco* (1973), written for Paul Badura-Skoda, works which also show him experimenting with incomplete chromatic clusters.

Sacred works dominate the last years of Martin's life. Even the instrumental works – such as Polyptyque for violin and two string orchestras (1973), a set of six pictures of the Passion of Christ – are religious in inspiration. Most important among these late works is the *Requiem* (1971–2). Martin had intended to write a Requiem for decades, but the final stimulus came only in

January 1971 during a journey which took in the sacred architecture of Venice, Paestum and Monreale. As with the French and German verses he had used in earlier works, he mastered here the natural prosody of the Latin language. His last work, the cantata *Et la vie l'emporta*, written during his last illness, reflects the struggle between life and death and the ultimate victory of life. The orchestration of the last part was completed, following the composer's indications, by his friend Bernard Reichel.

Martin frequently wrote about his own work and about music in general; in his last years, he was exercised particularly by the question of the responsibility of the composer. His beliefs are, perhaps, best summarized in this statement (1966):

Whatever the movements of the soul, the spirit, the sensibility that are manifested in one's work, and whether the state is one of anguish or even despair, one's art inevitably bears the sign of ... this liberation, this sublimation which evokes in us a finished form, and which is, I think, what is called 'beauty'.

WORKS

STAGE

Oedipe-Roi (incid music, J. Lacroix, after Sophocles), chorus, inst ens, 1922, cond. Martin, Geneva, Comédie, 21 Nov 1922
Oedipe à Colone (incid music, A. Secretan, after Sophocles), S, Bar, small chorus, small orch, 1923, cond. Martin, Geneva, Comédie, 1923
Le divorce (incid music, J.-F. Regnard), fl, sax (or cl and basset-hn), perc, pf, str, 1928; Geneva, Studio d'art dramatique, April 1928; unpubd
La nique à Satan (spectacle populaire, A. Rudhardt), Bar, children's chorus, female chorus, male chorus, wind insts, 2 pf, perc, db, 1930–31, cond. Martin, Geneva, 25 Feb 1933
Roméo et Juliette (incid music, R. Morax, after W. Shakespeare), A, chorus, fl, basset-hn, vn, b viol, db, perc, 1929, cond. Martin, Mézières, 1 June 1929
Die blaue Blume, ballet, 1935, unorchd, unpubd
Das Märchen vom Aschenbrödel (ballet, M.-E. Kreis, after Grimm), S, Mez, A, T, small orch, 1941; cond. P. Sacher, Basle, Stadttheater, 12 March 1942
La voix des siècles (incid music), chorus, military or wind band, 1942; cond. R. Vuataz, Geneva, 4 July 1942; unpubd
Ein Totentanz zu Basel im Jahre 1943 (spectacle dansé en plein air, M. de Meyenbourg), boys' chorus, str orch, jazz ens, Basle drums, 1943; cond. Sacher, Basle, Münsterplatz, 27 May 1943; unpubd
Athalie (incid music, J. Racine), A, 2 female chorus, small orch, 1946; cond. A. Paychère, Ecole supérieure de jeunes filles, 7 May 1947; unpubd
Der Sturm (op, 3, after W. Shakespeare, Ger. trans. A.W. von Schlegel), 1952–5; cond. E. Ansermet, Vienna, Staatsoper, 17 June 1956
Le mystère de la Nativité (oratorio/spectacle, after A. Greban: *Le mystère de la Passion*), 1957–9; concert perf., cond. Ansermet, Geneva, 23 Dec 1959; staged, cond. H. Wallberg, Salzburg, 15 Aug 1960
Monsieur de Pourceaugnac (op, 3, Molière), 1960–2; cond. Ansermet, Geneva, Grand Théâtre, 23 April 1963

CHORAL

Motet (? Pauline Martin), chorus, orch, *c*1907, unpubd
Pourquoi voient-ils le jour? (motet, Bible: *Job* iii.20–23), chorus, orch, 1909, in short score only
Ode et sonnet (P. de Ronsard), 3 female vv, vc ad lib, 1912
Les dithyrambes (orat, Pierre Martin), 4 solo vv, chorus, children's chorus, orch, 1915–18; cond. Ansermet, Lausanne, 16 June 1918
Chantons, je vous en prie (Greban: *Le mystère de la Passion*), chorus, 1920, unpubd
Mass, double chorus, 1922/1926; cond. F.W. Brunnert, Hamburg, 2 Nov 1963
Jeux du Rhône (R.-L. Piachaud), chorus, wind band, 1929; cond. Martin, Geneva, 6 July 1929; unpubd
Cantate pour le temps de Noël (Bible), 8vv, chorus, boy's chorus, str, 2 b viol, hpd, org, 1929–30; cond. A. Koch, Lucerne, St Franz Xaver, 4 Dec 1994
Le coucou (canon, P.J. Toulet), 7 female vv, 1930
Chanson (C.F. Ramuz: *Le petit village*), 4 female vv, 1930
Chanson en canon (Ramuz: *Le petit village*), mixed chorus, 1930
Est ist ein Schnitter, heisst der Tod (popular), chorus, 1935, unpubd
Le vin herbé (orat, J. Bédier: *Le roman de Tristan et Iseut*), 12 solo vv, 2 vn, 2 va, 2 vc, db, pf, 1938–41; Part 1, 'Le philtre', concert perf., cond. R. Blum, Zürich, 16 April 1940; complete, concert perf., cond. R. Blum, Zürich, 28 March 1942; staged, cond. F. Fricsay, Salzburg, 15 Aug 1948
Cantate pour le 1er août (C. Clerc), 4vv/chorus, org/pf, 1941, Radio Geneva, 1 Aug 1941
3 choral works, 1943–4: Janeton (R. Stähli), male chorus; Si Charlotte avait voulu (Stähli), male chorus; Petite église (H. Devain), male/female chorus
Canon pour Werner Reinhart (Ronsard), 8vv, 1944, unpubd
In terra pax (orat, Bible), S, A, T, Bar, B, 2 chorus, orch, 1944; cond. Ansermet, Radio Geneva, 7 May 1945
A la foire d'amour (F. Bourquin), male chorus, 1945, unpubd
Chanson des jours de pluie (R. Stähli), male chorus, 1945, unpubd, adapted to text by Bourquin as A la fontaine, male chorus, 1945, unpubd
Golgotha (orat, Bible, St Augustine), S, A, T, Bar, B, chorus, orch, org, 1945–8; cond. S. Baud-Bovy, Geneva, 29 April 1949
Ariel (Shakespeare: *The Tempest*), 5 songs, 4S, 4A, 4T, 4B, 1950; cond. F. de Nobel, Amsterdam, 17 March 1953
Pseaumes de Genève (C. Marot, T. de Bèze), chorus, boys' chorus, orch, org, 1958, cond. Ansermet, Geneva, 4 June 1959
Ode à la musique (G. de Machaut), chorus, tpt, 2 hn, 3 trbn, db, pf, 1961; cond. Martin, Bienne, 23 June 1962
Verse à boire (popular), chorus, 1961; cond. de Nobel, Amsterdam, 26 June 1963
Pilate (orat, after Greban: *Le mystère de la Passion*), Mez, T, Bar, B, chorus, orch, 1964; cond. A. La Rosa Parodi, Rome, 14 Nov 1964
Requiem, S, A, T, B, chorus, orch, org, 1971–2; cond. Martin, Lausanne, 4 May 1973
Et la vie l'emporta (cant., M. Zundel, M. Luther etc), A, Bar, chorus, 2 fl, ob, ob d'amore, hpd, hp, org, str, 1974, C. Perret, P. Huttenlocher; cond. M. Corboz, Nyon, 13 June 1975

SOLO VOCAL

Tête de linotte, 1v, pf, 1899, unpubd
An * (N. Lenau), 1v, pf, 1909, unpubd
3 poèmes païens (Leconte de Lisle), Bar, orch, 1910; L. de la Cruz-Froelich; cond. J. Lauber, Vevey, 20 May 1911
Le roy a fait battre tambour (popular), A, small orch, 1916
4 sonnets à Cassandre (Ronsard), Mez, fl, va, vc, 1921; C. Wyss, cond. Martin, Geneva, 7 April 1923
Chanson de Mezzetin (P. Verlaine), S, ob/mand, vn, vc, 1923, unpubd
Malborough (M. Achard), 1v, fl, wind, perc, pf/hpd, *c*1928, unpubd
Der Cornet (Die Weise von Liebe und Tod des Cornets Christoph Rilke) (R.M. Rilke), A, small orch, 1942–3; E. Cavelti, cond. Sacher, Basle, 9 Feb 1945
6 Monologe aus Jedermann (H. von Hofmannsthal), Bar, pf, 1943–4; M. Christmann, Martin, Gstaad, 5 Aug 1944; orchd 1949, Cavelti, cond. R. Kubelik, Venice, 9 Sept 1949
Dédicace (Ronsard), T, pf, 1945; H. Cuénod, Martin, Geneva, 6 July 1945
Quant n'ont assez fait do-do (C. d'Orléans), T, gui, pf duet, 1947; Cuénod, H. Leeb, M. Lipatti, Martin, Laren, 9 Oct 1947; unpubd
3 chants de Noël (A. Rudhardt), S, fl, pf, 1947; Françoise, Maria and Frank Martin, Naarden, Christmas 1947
Suite from 'Der Sturm', Bar, orch, 1952–5; D. Fischer-Dieskau, cond. Ansermet, Lausanne/Geneva, 6/8 March 1961
Drey Minnelieder (anon., D. von Eist, W. von der Vogelweide), S, pf or S, fl, va, vc; 1960, Berlin, RIAS, 1960
Maria-Triptychon, S, vn, orch: Ave Maria, 1968, Magnificat, 1967, Stabat mater, 1968; Magnificat, I. Seefried, W. Schneiderhahn, cond. B. Haitink, Lucerne, 14 Aug 1968; complete, cond. J. Fournet, Rotterdam, 13 Nov 1969
Poèmes de la mort (F. Villon), T, Bar, B, 3 elec gui, 1969–71; G. Hirst, J. Reardon, H. Beattie, M. Best, E. Flower, S. Silverman, New York, 12 Dec 1971
Agnus Dei, A, org, 1971–2 [from Requiem]

ORCHESTRAL

3 chansons du XVIII siècle, ?1911, unpubd
Suite, 1913; cond. Martin, St Gallen, 14 June 1913
Symphonie burlesque sur des mélodies populaires savoyardes, 1915; cond. P. Secretan, Geneva, Feb 1916

Esquisse, orch, 1920; cond. Ansermet, Geneva, 1920
Entr'acte, 1924, unpubd [orch of Ouverture et foxtrot, 2 pf, 1924]
Rythmes, 3 movts, 1926; cond. Ansermet, Geneva, 12 March 1927
Piano Concerto no.1, 1933–4; W. Gieseking, cond. Ansermet, Geneva, 22 Jan 1936
Guitare, 1934; cond. Ansermet, Geneva, 21 Nov 1934 [arr. of 4 pièces brèves, gui, 1933]
Danse de la peur, 2 pf, small orch, 1935; M. and D. Lipatti, cond. E. Appia, Geneva, 28 June 1944 [from ballet Die blaue Blume]
Symphony, 1936–7, cond. Ansermet, Lausanne/Geneva, 7/9 March 1938
Ballade, a sax, str, perc, pf, 1938; S. Rascher, Sidney, summer 1938
Ballade, pf, orch, 1939, W. Frey, cond. Ansermet, Zürich, 1 Feb 1944
Du Rhône au Rhin, band/orch, 1939, festival march for Swiss National Exhibition, cond. V. Andreae, Zürich, 6 May 1939
Ballade, fl, str, pf, 1941; J. Bopp, cond. Sacher, Basle, 28 Nov 1941; arr. fl, orch, Ansermet, 1939; A. Pepin, cond. Ansermet, Lausanne/Geneva, 27/29 Nov 1939 [from Ballade, fl, pf, 1939]
Ballade, trbn/t sax, small orch, 1941; T. Morley, cond. Ansermet, Geneva, 26 Jan 1942 [from Ballade, trbn/t sax, pf, 1940]
Marche des 22 cantons and Marche de Genava, wind or military band, 1942 [from La voix des siècles]
Petite symphonie concertante, hp, hpd, pf, 2 str orch, 1944–5; C. Blaser, H. Andreae, R. am Bach, cond. Sacher, Zürich, 17 May 1946; arr. as Symphonie concertante, orch, 1946, cond. Ansermet, Lucerne, 16 Aug 1947
Ouverture pour Athalie, 1946 [from Athalie (incid music)]
Ballade, vc, small orch, 1949; A. Wenzinger, cond. Sacher, Zürich, 17 Nov 1950 [from Ballade, vc, pf, 1949]
Concerto for 7 Wind Instruments, wind qnt, tpt, trbn, perc, str, 1949; cond. L. Balmer, Berne, 25 Oct 1949
Violin Concerto, 1950–51; H. Schneeberger, cond. Sacher, Basle, 24 Jan 1952
Harpsichord Concerto, small orch, 1951–2; I. Nef, cond. F. Previtali, Venice, 14 Sept 1952
Passacaille, str, 1952, cond. K. Münchinger, Frankfurt, 16 Oct 1953; orchd 1962, cond. Martin, Berlin, 30 May 1963 [from Passacaille, org, 1944]
Sonata da chiesa, va d'amore, str, 1952; A. Arcidiacono, cond. V. Brun, Turin, 29 April 1953 [from Sonata da chiesa, va d'amore, org, 1938]; arr. fl, str by V. Desarzens, 1958; M. Clement, cond. V. Desarzens, Lausanne, 15 Sept 1959
Pavane couleur du temps, small orch, 1954 [from chbr work, 1920]
Etudes, str, 1955–6; cond. Sacher, Basle, 23 Nov 1956
Ouverture en hommage à Mozart, 1956, cond. Ansermet, Radio Geneva, 10 Dec 1956
Ouverture en rondeau, 1958; cond. Ansermet, Lucerne, 13 Aug 1958
Inter arma caritas, 1 movt, 1963; cond. Ansermet, Geneva, 1 Sept 1963
Les quatre éléments, 1963–4; cond. Ansermet, Lausanne/Geneva, 5/7 Oct 1964
Cello Concerto, 1965–6; P. Fournier, cond. Sacher, Basle, 26 Jan 1967
Piano Concerto no.2, 1968–9; P. Badura-Skoda, cond. Desarzens, Paris/ORTF, 24 June 1970
Erasmi monumentum, orch, org, 1969, cond. J. Fournet, Rotterdam, 27 Oct 1969 [3rd movt from Inter arma caritas]
3 danses, ob, hp, str qnt, str orch, 1970; H. and U. Holliger, cond. Sacher, Zürich, 9 Oct 1970
Ballade, va, wind, hp, hpd, timp, 1972; R. Golan, cond. H. Eder, Salzburg, 20 Jan 1973
Polyptyque: 6 images de la Passion du Christ, vn, 2 str orch, 1973, Y. Menuhin, cond. E. de Stoutz, Lausanne, 9 Sept 1973

CHAMBER AND INSTRUMENTAL

Pour papa, 2 ocarinas, pf, 1900, unpubd
Piano Piece, c, ?1902, unpubd [fragment]
Sonata no.1, op.1, pf, vn, 1913; M. Breitmeyer, J. Lauber, Thun, 10 July 1915
Piano Quintet, 1919, Martin, De Boer Qt, Zürich, 1919
Pavane couleur du temps, str qnt/pf duet, 1920, orchd 1954
Ouverture et foxtrot, 2 pf, 1924, arr. as Concert, wind, pf, 1924, unpubd; orchd as Entr'acte, 1924

BERNHARD BILLETER

Martin, Sir **George (Clement) (i)** (*b* Lambourn, Berks., 11 Sept 1844; *d* London, 23 Feb 1916). English organist and composer. He studied locally, and later, when he was organist at Lambourn, with Stainer at Oxford. He was appointed private organist to the Duke of Buccleuch at Dalkeith in 1871. At St Paul's Cathedral he became choirmaster in 1874, deputy organist in 1876 and organist, following Stainer's resignation, in 1888. His academic distinctions included BMus (Oxford, 1868), FCO (1875), the Lambeth MusD (1883) and DMus (Oxford, 1912). He was appointed teacher of the organ at the Royal College of Music in 1883.

Apart from a few secular songs, Martin was a profuse composer of anthems and settings of the services of the Anglican church. His most important composition is a *Te Deum* setting which was performed on the steps of St Paul's at Queen Victoria's Diamond Jubilee (1897); it is scored for military band and 'Great Paul' (the cathedral's bell pitched in F); shortly after its performance Martin received a knighthood. He also made organ arrangements and performing editions of sacred vocal music.

G.B. SHARP/CHRISTOPHER KENT

Martin, Sir **George (ii)** (*b* London, 3 Jan 1926). English record producer and composer. He studied oboe and composition at the GSM from 1946 to 1948 before joining Parlophone Records. There he supervised recordings of comedy material, jazz and Scottish dance music before signing the Beatles to a recording contract in 1962. Over the next eight years he played a key role as producer, arranger and performer in the group's recording career, notably in providing string arrangements for *Eleanor Rigby*, *Yesterday* and other songs. Martin also produced hit records by other Liverpool musicians such as Cilla Black and Gerry and the Pacemakers. In 1965 he left Parlophone to become one of the first freelance record producers. Martin subsequently worked with Sir Paul McCartney, Ella Fitzgerald, Neil Sedaka, America and many other recording artists. He organized a new recording of Dylan Thomas' verse drama *Under Milk Wood* in 1988. His AIR company built a studio on Montserrat which was destroyed in the hurricane of 1989. Martin also arranged and conducted two albums of instrumental versions of Beatles' songs. He was knighted in 1996. (G. Martin and J. Hornsby: *All You Need is Ears*, New York, 1979)

DAVE LAING

Martin, George William (*b* London, 8 March 1825; *d* London, 16 April 1881). English teacher, conductor and composer. Trained as a chorister at St Paul's Cathedral under William Hawes, Martin taught music at the Normal College for Army Schoolmasters, Chelsea, and St John's Training College, Battersea, from 1845, and was appointed organist of Christ Church, Battersea, in 1849. He became noted for his skill in training choirs of schoolchildren; and he conducted the Metropolitan Schools Choral Society, the National Choral Society and other similar massed choirs in public performances for some years. Martin composed many prizewinning glees, partsongs and other choral pieces, edited various oratorios by Handel and Haydn, and was the editor of several minor musical periodicals. He died in extreme poverty.

BERNARR RAINBOW

Martin, György (*b* Budapest, 5 Feb 1932; *d* Budapest, 31 Oct 1983). Hungarian ethnochoreologist and ethnomusicologist. He studied anthropology, history and literature at Budapest University (1950–54), where his teachers included Gyula Ortutay, István Tálasi and Lajos Vargyas, and in 1963 took his doctorate at Budapest University with a dissertation on dance motifs in the Sárköz-Danubian region. Concurrently he was a professional solo dancer in a folklore group and worked in the folkdance section of the Institute of Folk Arts (1955–65). After fieldwork in Ethiopia (1965) he became a research assistant in the folk music research group of the Hungarian Academy of Sciences (1965–74); when this became part of the Musicological Institute (1974) he was appointed head of the folkdance department. He took the CSc in 1969 with a dissertation on the round-dance of Hungarian girls. In 1950 he began extensive fieldwork, collecting, recording and filming in about 500 Hungarian villages, and in Romania, Slovakia and Yugoslavia. He also undertook comparative research on the Carpathian basin and the Balkan countries, and was interested in the relations between the historical sources and existing folkdance practice. He devoted numerous writings to the connection between the dance and its music, and the structural analysis of dance types according to motif; his observations on the function of musical tempo, rhythm and metre in the dance are a valuable contribution to ethnomusicological research.

MARIA DOMOKOS

Martin, Hugh (*b* Birmingham, AL, 11 Aug 1914). American composer, lyricist, vocal arranger and pianist. He began his professional career as a rehearsal pianist and vocal arranger for such productions as *Hooray for What?* (1937), *One for the Money* (1939) and *Streets of Paris* (1939); he has subsequently been the vocal arranger for many leading Broadway shows by composers including Kern, Porter and Rodgers, and a coach to singers including Lena Horne and Judy Garland. He met Ralph Blane (*b* Broken Arrow, OK, 26 July 1914; *d* Broken Arrow, OK, 13 Nov 1995) when they both performed with the singing quartet the Martins, and subsequently they collaborated on the successful stage musical *Best Foot Forward* (1941; film, 1943). They went on to contribute songs to films, including the classic MGM musical *Meet Me in St Louis* (1944), in which Judy Garland introduced their most famous numbers, 'The Boy Next Door', 'Have yourself a merry little Christmas' and 'The Trolley Song'. Martin was invited to write a musical for London, and the resulting *Love from Judy* (1952) with the lyricist Jack (later Timothy) Gray, was a West End success. An expanded version of *Meet Me in St Louis* for the stage in 1960 contained many fine additional numbers, including the ballad 'You are for loving'. The score of Martin's 1964 show with Gray, an adaptation of Noël Coward's *Blithe Spirit* as *High Spirits*, exemplifies the characteristics of Martin's style: his frequent use of jazz-inflected harmonies, whose chromaticism often leads to strong contrapuntal accompanimental lines and counter melodies, is used to effect in the duet 'I know your heart', while his lyrical style encompasses the strong sweep of 'Forever and a Day' and the touching simplicity of 'If I Gave You'.

WORKS
(*selective list*)

Stage musicals: Best Foot Forward, 1941, collab. R. Blane [film, 1943]; Look Ma, I'm Dancin', 1948; Make a Wish!, 1951; Love from Judy, 1952; Meet Me in St Louis, 1960, rev. 1989 [after film, 1944]; High Spirits, 1964
Revues: Airs on a Shoestring, 1953; They Don't Make 'em like That Anymore, 1972
Vocal arrs. for stage shows (composer in parentheses): Hooray for What? (H. Arlen), 1937; The Boys from Syracuse (R. Rodgers), 1938; Du Barry was a Lady (C. Porter), 1939; Stars in your Eyes (S. Schwartz), 1939; Too Many Girls (Rodgers), 1939; Very Warm for May (J. Kern), 1939; Cabin in the Sky (V. Duke), 1940; Louisiana Purchase (I. Berlin), 1940; Lorelei (Schwartz), 1974
Songs for films, incl. The joint is really jumping in Carnegie Hall (in Thousands Cheer, 1943); What do you think I am? (Broadway Rhythm, 1944); The Boy Next Door, Have yourself a merry little Christmas, The Trolley Song (Meet Me in St Louis, 1944); Love (Ziegfeld Follies, 1946); Pass that Peace Pipe (Good News, 1947); The Girl Next Door [reworked from The Boy Next Door], I never felt better (Athena, 1954); My Hill-Billy Heart, An Occasional Man (The Girl Rush, 1955); All the Colours of the Rainbow, I don't know what I want (The Girl Most Likely, 1958)
Other contribs. to film scores, incl. One Sunday Afternoon, 1948; Summer Holiday, 1948; My Dream is Yours, 1949; My Blue Heaven, 1950; The West Point Story, 1950; Skirts Ahoy!, 1952; The French Line, 1953

JOHN SNELSON

Martin, J. (*fl* late 17th century). French composer. He can perhaps be identified with Jean Martin, 'ordinaire de la musique' to the Duke of Orléans. A volume by J. Martin entitled *Premier livre d'airs sérieux et à boire à deux, trois ou quatre parties, entremelez de symphonies en trio pour les violons et les flûtes, avec des accompagnements dans les récits* was published in Paris in 1688. It has on occasion been incorrectly ascribed to François Martin (i). Its contents are interesting precursors of the French cantatas of the following century. (F. Gaussen: 'Actes d'état-civil de musiciens français 1651–1681', *RMFC*, i (1960), 153–65)

DAVID TUNLEY

Martin, (Nicolas-)Jean-Blaise [Blès] (*b* Paris, 24 Feb 1768; *d* Ronzières, nr Lyons, 28 Oct 1837). French baritone. He studied music at an early age and auditioned unsuccessfully for the Opéra as both a violinist and a singer. He made his début at the Théâtre de Monsieur in 1789 in *Le marquis de Tulipano*, a French version of Paisiello's opera *Il matrimonio inaspettato*. Lessons with Mme Dugazon and Talma helped him to overcome his deficiencies as an actor and in 1794 he moved to the Théâtre Favart, remaining there until it merged with the Feydeau to form the Opéra-Comique in 1801. Martin specialized in comic servant roles in new operas by

Dalayrac, Boieldieu, Méhul, Isouard and others. He retired from the Opéra-Comique in 1823 but returned briefly in 1826 and 1833, when he appeared in Halévy's *Les souvenirs de Lafleur*, a pasticcio incorporating songs from his most successful roles. He was also a member of the imperial chapel (later the royal chapel) from its foundation until July 1830, and taught singing at the Paris Conservatoire from 1816 to 1818 and 1832 to 1837.

Martin's voice combined the range and quality of a tenor and a baritone, spanning two and a half octaves from E♭ to *a′*, with an additional octave in falsetto. His exceptional range influenced vocal characterization in *opéras comiques* for over a century, and high-lying 'baryton Martin' roles can be found in operas by Hérold (*Zampa*), Gounod (Valentin in *Faust*), Bizet (Escamillo in *Carmen*, Ernesto in *Don Procopio*, the Duke of Rothsay in *La jolie fille de Perth* and Splendiano in *Djamileh*), Debussy (Pelléas) and Ravel (Ramiro in *L'heure espagnole*). Martin was also noted for his facility in rapid vocalization, sometimes inappropriately applied. He composed a one-act *opéra comique*, *Les oiseaux de mer*, produced at the Théâtre Feydeau in 1796.

PHILIP ROBINSON

Martin, Jonathan (*b* c1715; *d* Westminster, 4 April 1737). English organist. He was a chorister in the Chapel Royal under Croft, after whose death he had lessons from Thomas Roseingrave. He had benefit concerts in May 1735 and April 1736: in the second, at Stationers' Hall, he played an organ solo. On 21 June 1736 he was admitted one of the organists of the Chapel Royal, having already deputized there. It was agreed that he should occasionally compose for the chapel, on the understanding that Boyce (one of the composers) would sometimes undertake his duty at the organ; however, Martin's only surviving composition is 'To thee, O gentle sleep', a song in Nicholas Rowe's play *Tamerlane*.

WATKINS SHAW/DONALD BURROWS

Martin, Laurent (*b* Toulon, 6 June 1959). French composer. At first a jazz pianist, he discovered contemporary classical music only when settling in Paris in 1987. He studied at the Paris Conservatoire with Jolas and Bancquart, and has been in residence at the Villa Medici in Rome (1993–4) and the Casa de Velasquez in Madrid (1997–8). In a relatively short period Martin has established a sizable and coherent output. Writing mainly for small instrumental groups, he creates a dynamic of fluidly evolving microtonal textures from the interweaving strands of his material. In *Leucade* he demonstrates effective writing for the orchestra and a burgeoning sense of dramatic rhetoric.

JEREMY DRAKE

Martin, Mary (Virginia) (*b* Weatherford, TX, 1 Dec 1913; *d* Rancho Mirage, CA, 3 Nov 1990). American actress, singer and dancer. Her mother was a violinist. Martin taught social and stage dance, sang on radio and in films, and achieved fame in 1938 performing 'My heart belongs to daddy' in Cole Porter's *Leave it to me*, a song with which she remained associated throughout her career. Her first film role was in *The Great Victor Herbert* (1939) and her later films included *Birth of the Blues* (1941) and *Night and Day* (1946). She performed in Broadway musicals, beginning with Weill's *One Touch of Venus* (1943, including the song 'That's him'). Richard Rodgers and Oscar Hammerstein II wrote *South Pacific* (1949) for her and the bass Ezio Pinza; Rodgers recalled (in his autobiography, *Musical Stages*, 1975) that Martin, concerned about their unequal voices, was promised no duets: moreover, 'her songs were colloquial, direct, sunny and youthful, whereas his were sophisticated, romantic, even philosophical' in lyrics and music. She recreated her stage success as Nellie Forbush in the film of the show (1958), and later suggested adapting the film *The Trapp Family Singers*, which Rodgers and Hammerstein accomplished as their final work together, *The Sound of Music* (1959). Rodgers praised Martin's extraordinary diligence in vocal preparation and interpretation of his songs.

Until the late 1960s Martin continued to star in Broadway shows, including *I Do! I Do!* (1966), in films, and in children's musicals for television, most notably versions of the stage musical *Peter Pan* in the 1950s. One of the best-loved American musical performers, she created several vibrant roles with her clear soprano and her warmth, vigour, control and agility. She wrote the autobiography *My Heart Belongs* (New York, 1976) and made many recordings.

DEANE L. ROOT

Martin, Nicolas (*b* ?Saint Jean-de-Maurienne, 1498; *d* ?Saint Jean-de-Maurienne, 1566). French composer and poet. His first known position was at the cathedral of Saint Jean-de-Maurienne. When he was dismissed from there, by Archbishop Jerôme Ricevali who disapproved of his 'chansons follettes', he moved first to Chambéry and then, by 1555, to Lyons. He evidently returned to Saint Jean-de-Maurienne, for in March 1565 he organized a mystery play on the Passion to divert the townspeople during an epidemic. Although mid-16th-century accounts referred to performances of his motets, his only surviving music is a collection of monophonic noëls and chansons, 12 in French and 21 in Savoyard dialect, entitled *Noëlz et chansons nouvellement composez tant en vulgaire françoys que savoysien dict patoys* (Lyons, 1555; ed. J. Orsier, Paris, 1879). Macé Bonhomme, who reprinted the collection a year later, explained that Martin had written both words and music.

FRANK DOBBINS

Martinček, Dušan (*b* Prešov, 19 June 1936). Slovak composer. He studied composition with Anna Kafendová at the Bratislava Conservatory, and from 1951 took private lessons with Albrecht, Zimmer and Cikker. From 1956 to 1962 he attended the Bratislava Academy of Music and Dramatic Art, studying the piano with Rudolf Macudziński and composition with Cikker. From 1973 to 1986 he was lecturer in theory at the academy; in 1992 he was appointed professor of composition.

His music draws from the 19th and early 20th century tradition, in particular the music of Skryabin, Rachmaninoff and Prokofiev. A further source of inspiration has been the music of the Balkans. At the start of his career he employed a conventional musical language based on motivic development. His musical forms are established models such as the fugue, theme and variations and sonata form. The typical features of his piano pieces include exuberance, technical virtuosity and a concerto-like style of writing. In the late 1970s he combined serial technique with sonata form, reducing thematic subjects to short, few-note cells, as in the fourth and sixth piano sonatas. In the early 1980s he created a new musical language from his existing technique: the primary motivic-thematic material is reduced to intervals which are heard both horizontally and vertically. This led to a more dissonant harmony, poly-metric experiments and sudden pitch clusters, as in *Animation* (1983–6), the String Quartet (1982–5) and *Prerušené ticho* ('Interrupted Silence', 1989).

Martineau, Malcolm (*b* Edinburgh, 3 Feb 1960). Scottish pianist. He studied at St Catharine's College, Cambridge, and at the RCM, his teachers including Geoffrey Parsons, Kendall Taylor and Joyce Rathbone. In his early years he worked as accompanist for the Walter Grüner International Lieder Competition (where he won a prize as best accompanist) and at the Britten-Pears School at Aldeburgh, when he worked in masterclasses given by many well-known artists. He has partnered noted singers, among them Thomas Allen, Janet Baker, Barbara Bonney, Felicity Lott, Simon Keenlyside and Bryn Terfel, and recorded with the last two. In London he has presented all the songs of Debussy and a major Britten series. At the 1998 Edinburgh Festival he presented an extensive series of Wolf lieder. A prolific recording artist, he has committed to disc all Fauré's songs with Sarah Walker and the complete folksong settings of Beethoven and Britten. Martineau is both an accomplished technician and a searching, versatile interpreter of the whole genre of song.

ALAN BLYTH

Martinelli, Caterina (*b* Rome, 1589 or 1590; *d* Mantua, 7 March 1608). Italian singer. She was brought into the service of the Gonzagas at Mantua in August 1603, where she lodged for three years with Monteverdi, whose wife may have been her teacher. She may also have studied with Francesco Rasi, but her musical training was probably overseen by Monteverdi himself, and she was soon part of a female vocal ensemble which he directed. Her singing clearly pleased Duke Vincenzo, and in 1606 he presented her with a house. She sang the role of Venus in Marco da Gagliano's *La Dafne*, given at Mantua in February 1608. A few weeks later, when about to create the title role in Monteverdi's *Arianna*, she died of smallpox. Monteverdi wrote the part with her in mind, and at the duke's request he composed in her memory his fine madrigal cycle *Lagrime d'amante al sepolcro dell'amata*. The duke, deeply affected by her death, made arrangements for the celebration in perpetuity of masses for her soul by the Carmelite fathers. The order was suppressed, and the church and her tomb razed in 1773.

DENIS ARNOLD/EDMOND STRAINCHAMPS

Martinelli, Giovanni (*b* Montagnana, 22 Oct 1885; *d* New York, 2 Feb 1969). Italian tenor. After study in Milan, he made his stage début there at the Teatro Dal Verme in Verdi's *Ernani* in 1910. In the following year he sang Dick Johnson in *La fanciulla del West* at Rome under Toscanini, later his 'passport role' to many theatres. He appeared at Covent Garden during five seasons between 1912 and 1937, singing over 90 performances in 15 operas, among which the *Otello* and *Turandot* of his last season were particularly memorable. The Metropolitan

Giovanni Martinelli in the title role of Verdi's 'Otello'

Opera, however, became the centre of his career for 31 consecutive seasons from 1913, with a few still later appearances in 1945. He sang with the company in 926 performances in a total of 38 operas.

Over the years Martinelli developed an unimpeachable technique and scrupulous style, and after the death of Caruso became the leading exponent of such dramatic and heroic roles as Verdi's Manrico, Radames, Don Alvaro and, eventually, Otello. He displayed his skills as a singing actor in the roles of Samson and Eléazar (*La Juive*). The clarion ring of his upper register, the distinctness and purity of his declamation and the sustained legato phrasing made possible by remarkable breath control were the outstanding features of his mature style; he retained his vocal powers to an advanced age, making his final appearances as Emperor Altoum (*Turandot*) as late as 1967. His many recordings, especially those made by the Victor company between 1914 and 1939, well display his splendid tone and style. Even more compelling are his off-the-air recordings from the Metropolitan, of which *Otello* is the most important.

DESMOND SHAWE-TAYLOR/ALAN BLYTH

Martinenghi, Antonio Francesco (*fl* 1677–1705). Italian composer. He held the rank of Cavaliere and worked in Milan and Pavia. Only the librettos of his three known operas survive: *La fedeltà mascherata* (Pavia, 1677, by G.B. Novarese), *L'Arsiade* (Milan, 1700, P. d'Averara) and *Il Meleagro* (Pavia, 1705). The music for *Il Meleagro* was written in collaboration with Paolo Magni and Bernardo Sabadino. Likewise only the librettos of three oratorios by him are extant: *La fuga trionfale* (Pavia, 1690), *La vittoria de trionfanti, o sia Il trionfo della grazia* (Pavia, 1691) and *La morte delusa* (Milan, 1703). His only surviving music is a solo motet (in RISM 1679¹, =1681¹). A Francesco Martinenghi of Pavia, who together with Perti and Vannarelli reset Minato's *La prosperità di Elio Seiano* (Milan, 1699), is probably identical with this composer.

SERGIO LATTES

Martinengo, Gabriele (*b c*1527; *d* Verona, 17 Dec 1584). Italian composer. He attended the Scuola degli Accoliti, Verona, between 1536 and 1539; having finished his studies, he decided not to become a priest. In 1547 he entered the competition for the post of *maestro di cappella* at the Accademia Filarmonica in Verona, but was unsuccessful. Thereafter nothing is known about him until 1560 when he was in charge of the music at Zara Cathedral in Dalmatia. In that year he was invited to a similar post at Udine Cathedral on the recommendation of Willaert and after some negotiations he went there in 1561 at the annual salary of 70 ducats. He was also paid a smaller sum by the municipality for his services on civic occasions. He remained in Udine until 1566 when he was appointed *maestro di cappella* at Verona Cathedral, where he served until his death. A registry document for 1583 bears witness to the presence 'in the house of the Accoliti', Verona, of 'the singer Gabriele Martinengo', aged 56, his wife Eufemia and their 15-year-old son Giulio Cesare. Martinengo was a minor composer of madrigals. From the poems which he chose to set to music it seems likely that he belonged to the Willaert school of composers rather than to those associated with the Accademia in Verona.

DENIS ARNOLD/TIZIANA MORSANUTO

Martinengo, Giulio Cesare (*b* ?Verona, 1564 or *c*1568; *d* Venice, 10 July 1613). Italian composer, son of GABRIELE MARTINENGO. A Veronese document of 1583 registers the presence of the purportedly 15-year-old Giulio Cesare in the 'house of the Accoliti' Verona, together with his parents (in another document, however, his mother declares that he was born in 1564). He most likely studied at the Scuola degli Accoliti, Verona, where his father was a teacher. In the last decade of the 16th century he was a priest, chaplain and tenor in the choir of Verona Cathedral. On 17 May 1596 he obtained a chaplaincy in

the church of S Stefano, Verona. In November 1600 he was appointed *maestro di cappella* at Udine Cathedral where he was awarded a chaplaincy in 1601. He was noted as a teacher in the singing school for young priests. It was primarily on the strength of his good service that he was appointed successor to Giovanni Croce as *maestro di cappella* of S Marco, Venice, after the usual test, on Ascension Day in 1609, although according to a French observer 'la musique fut fort bonne'. His period of office was not distinguished. It seems he acquired debts which the authorities of S Marco were still paying off nearly two years after his death, and the music establishment was left in disarray. Martinengo died after a period of illness and was succeeded by Monteverdi. Little of his music survives, but his solo motet *Regnum mundi*, printed in Simonetti's *Ghirlanda sacra* (RISM 1625²; ed. in Moser, 52), shows considerable mastery of the concertato style developed by Viadana. The three madrigal books mentioned by Fétis are almost certainly by Gabriele Martinengo.

DENIS ARNOLD/TIZIANA MORSANUTO

Martines, Maria Anna. *See* MARTÍNEZ, MARIANNE VON.

Martinet, Jean-Louis (*b* Sainte Bazeille, Lot et Garonne, 8 Nov 1912). French composer. He studied at the Schola Cantorum (fugue with Koechlin) and the Paris Conservatoire (composition with Roger-Ducasse, conducting with Münch and Désormière), taking a *premier prix* for composition in 1943. At the Conservatoire he was also a member of Messiaen's analysis class in the group around Boulez; and, like Boulez, he studied 12-note serialism with Leibowitz in 1945. Also in that year he completed his first large-scale composition, the sumptuous symphonic poem *Orphée*, whose style derives from Messiaen, Debussy and Stravinsky. In adopting serialism he moved to a harder, drier, more contrapuntal manner, now indebted to Bartók and Webern. Again like Boulez, he found stimulus in the poetry of Char at this time, but a work such as *Prométhée* shows how distant he was from his colleague: Martinet's style is more 'classical' in its serialism, considerably less richly elaborated in rhythm and colour. Density of idea appears the aim, rather than tumultuous invention. In 1952 Martinet was awarded the Grand Prix Musical of the city of Paris, and at about the same time he decided that a stylistic simplification was necessary if he was to reach a large audience. Among the works that followed this change of direction, the *Mouvement symphonique no.1* for strings is an accomplished, tonal piece, somewhat Bartókian in its frenetic opening rondo, somewhat Messiaen-like in the modal lyricism of the slow section that completes the work. Martinet was appointed professor at the Montreal Conservatory in 1971.

PAUL GRIFFITHS/R

Martínez, Anna Katharina von. *See* MARTÍNEZ, MARIANNE VON.

Martínez (Izquierdo), Ernest (*b* Barcelona, 11 June 1962). Spanish composer and conductor. He studied at the Barcelona Conservatory, where he was much influenced by the Catalan conductor Antoni Ros-Marbà. In 1985 he founded and began directing the ensemble Barcelona 216, specializing in modern music. He was appointed assistant conductor of the National Youth Orchestra (1985) and obtained the same post in the National Orchestra of Spain (1988). After an invitation by Boulez, he moved to Paris (1989), where he worked for some time as assistant conductor of the Ensemble InterContemporain.

Martínez is undoubtedly one of the most talented composers of the Spanish younger generation, possessing a personal language free from any recognizable influence. His best works exploit the possibilities of opposing forces (*Música* for 10 cellos and orchestra, *Norte-Sur*), and the heartfelt, subtle musical references lend a strong sense of unity to them. His music flows with spontaneity and conciseness, but it is solidly constructed and skilfully written for every instrument.

He has devoted much time to his conducting career, being very active both at home and abroad, especially in Finland and France. He has given premières in Helsinki, and performed in several major concert halls in Europe and America. Among the works he has performed is Martin Matalon's new soundtrack for Fritz Lang's film *Metropolis*. He was appointed music director of the Pablo Sarasate Orchestra in Pamplona and has appeared regularly as a guest conductor with the most important Spanish orchestras.

LUIS CARLOS GAGO

Martínez, Juan (*fl* early 16th century). Spanish music theorist. He was a priest and *maestro de los moços de coro* (altar boys) at Seville Cathedral from 1525 until at least 1536. His *Arte de canto llano* (Alcalá de Henares, 1532) was popular enough to go through several editions (including a Portuguese translation printed in Coimbra in 1603, 1612 and 1625), and offers a good introduction to a number of aspects of plainchant. Martínez allowed a compass of 20 notes in solmization, and three types of melodic movement that he called *deduccional* (following the *deduciones*, certain of the hexachords), *igual* (equal) and *disjuntivo*(disjunct). His rules concerning alteration, hexachords and word-setting correspond to the usual practice of the time. He defined the intervals empirically and included a brief exposition of the classical theory behind the different types; he analysed the different octaves, distinguishing the authentic from the plagal, and divided the modes into perfect, imperfect, *plusquamperfectos*, *mixtos* and *comixtos*, and irregular. His most controversial view was in the use of accidentals in chant, where he was prepared to use up to ten different added sharps and flats. He was highly respected, and cited by authorities as late as Cerone and Thalesio.

F.J. LEÓN TELLO

Martínez, Marianne [Anna Katharina] **von** (*b* Vienna, 4 May 1744; *d* Vienna, 13 Dec 1812). Austrian composer of Spanish descent. She was the daughter of a Neapolitan who had come to Vienna as 'gentiluomo' to the papal nuncio. She spent her childhood under the educational guidance of Metastasio, a friend of the family who lived in the same house; she was taught singing, the piano and composition by Porpora and Haydn, who were also living there, by Giuseppe Bonno and possibly by J.A. Hasse. As a child she had attracted attention at court with her beautiful voice and her keyboard playing, and in 1761 a mass by her was performed in the court church.

She acknowledged in 1773, when she became an honorary member of the Bologna Accademia Filarmonica, that as a composer she took as her principal models Hasse, Jommelli and Galuppi. Not only did she possess a thorough understanding of imitation and fugue, but she also knew how to set words in the Baroque manner. Her predilection for coloratura passages, leaps over wide intervals and trills indicate that she herself must have been an excellent singer. In 1772 Burney praised her singing for all the typical virtues of the Italian school as well as for 'touching expression'.

Burney's remark that her vocal works were 'neither common, nor unnaturally new' applies to her instrumental works as well. A typical composer of the early Classical period in Vienna, she wrote in the Italian style. As a harpsichordist she was influenced by C.P.E. Bach. Sometimes she created a composition of several movements from a single idea (e.g. the Harpsichord Concerto in G, 1772). Her frequent development of motifs, decoration techniques and rapid runs show that she was concerned to impress her public with virtuosity, suiting the taste of the Viennese salons.

After Metastasio's death in 1782, the Martínez family, as heirs of his large estate (Marianne was bequeathed 20,000 florins, Metastasio's harpsichord and his music library), were able to maintain a substantial household. Many notable personalities, including Haydn and Mozart, attended her musical soirées there; Michael Kelly heard her playing one of Mozart's four-hand sonatas with the composer and described her as still 'possessing the gaiety and vivacity of a girl'. In the 1790s she started a singing school in her house, which produced several outstanding singers.

HELENE WESSELY (work-list with IRVING GODT)

Martinez (Mijares), Odaline de la (Caridad) ['Chachi'] (*b* Matanzas, 31 Oct 1949). American conductor and composer of Cuban birth. She emigrated to the USA in 1961 and became an American citizen in 1971. After attending Tulane University (BFA 1972), she studied composition with Paul Patterson at the RAM, London (1972–6), and with Reginald Smith Brindle (1975–7) at the University of Surrey (MM 1977). She has received numerous awards, including a Marshall Scholarship (1972–5), a Watson Fellowship (1975–6), a Danforth Fellowship (1975–80) and a Guggenheim Fellowship (1980–81). In 1987 she won the Brazilian Villa-Lobos

Medal for outstanding performances of his work. Martinez moved to London in 1972. She is best known in Europe as the conductor of Lontano, a professional chamber ensemble she helped found in 1976 to perform and record contemporary music; the group is based in London but tours widely. In 1982 she founded the Contemporary Chamber Orchestra (later renamed London Chamber Symphony), of which she is principal conductor, and in 1987 became the first woman to conduct a full programme at the Proms. The following year she conducted the première of Berthold Goldschmidt's opera *Beatrice Cenci* and the European stage première of Villa-Lobos's opera *Yerma*, and in 1994 conducted Ethel Smyth's *The Wreckers* at the Proms. In 1990 she organized an all-women orchestra (now called European Women's Orchestra) for the first Chard Festival of Women in Music (UK) and in 1992 established the record company LORELT (Lontano Records Ltd) to record Latin-American composers as well as women composers from all periods. Martinez's own works are eclectic, influenced by George Crumb, by electronic music, and by her Latin-American heritage. Much of her music possesses a simple and direct 'minimalist' quality. The opera *Sister Aimee* (1978–83), based on the life of the American evangelist Aimee Semple McPherson, makes use of a host of styles and techniques, including gospel music and aleatory procedures. Martinez's recordings with Lontano include two collections of works by British women composers (with works by herself, Eleanor Alberga, Lindsay Cooper, Nicola LeFanu, Elizabeth Maconchy, Melinda Maxwell, Hilary Tann, Errollyn Wallen and Judith Weir), three operas by Weir and chamber and choral music by Villa-Lobos.

WORKS

STEPHEN MONTAGUE

Martínez, Samuel. *See* MARTÍ, SAMUEL.

Martínez, Vicente (*b* ?1740; *d* Albarracín, 1801). Spanish composer. He became *maestro de capilla* of Albarracín Cathedral in June 1764, replacing Juan Montón y Mallén, who had moved to the same position in Segovia. He remained in this post until his retirement in 1792. Of his liturgical compositions 95 survive in the archives of Albarracín Cathedral, many scored for four or more voices, accompanied by violins, trumpets and continuo (bassoon, double bass or organ). These works include 47 villancicos, 44 cantatas, vespers settings and two masses (one for five voices, dated 1764, and a four-voice setting, dated 1790). One motet for Holy Week also survives (*E-SEG*). His works are in an Italian style, and while the villancicos show popular influences, the Latin works are more serious.

JESUS M. MUNETA MARTÍNEZ

Martínez de Bizcargui, Gonzalo (*b* Azcoitia; *d* ?after 1538). Spanish theorist and *maestro de capilla* at Burgos Cathedral. His principal work, *Arte de canto llano et de contrapunto et canto de órgano con proporciones et modos* (Zaragoza, 1508; 3/1511/*R*; enlarged 5/1515; 12/1538, ed. A. Seay, Colorado Springs, 1979; 15/1550), is the most successful Spanish plainchant tutor of the 16th century. Martínez was indebted to GUILLERMO DE PODIO (*Ars musicorum*, Valencia, 1495), but disagreed with the earlier theorist on several points. Like Ramis de Pareia, he considered the diatonic semitone (e.g. A–B♭) larger than the chromatic (e.g. B♭–B♮) in opposition to the Pythagorean tradition as transmitted by Boethius. This position brought him into conflict with JUAN DE ESPINOSA who accused him of 'teaching and writing formal heresies in music'. In other matters Martínez was conservative, and his treatise is useful for its full and clear explanations with numerous examples. He also edited *Intonationes según uso de los modernos que hoy cantan et intonan en la yglesia romana* (Burgos, 1515/*R*) and according to Donostia composed a *Salve* for four voices.

F.J. LEÓN TELLO

Martínez de la Roca (y Bolea), Joaquín (*b* Saragossa, *c*1676; *d* Toledo, *c*1756). Spanish composer and organist. He studied with Nassarre and was organist of El Pilar Cathedral at Saragossa from 10 March 1695 to 13 October 1699; he returned as both *maestro de capilla* and organist, 1709–15. Next he was chief organist at Palencia Cathedral and, from 1723, of Toledo Cathedral. He composed Epiphany villancicos for 1710 and 1713 (known through imprints). His extensive music for the three-act historical play produced at Saragossa to celebrate the birth of the crown prince Philip, *Los desagravios de Troya*, was published at Madrid in 1712 and is the earliest Spanish theatrical printed score; the opening symphonia, scored for oboes, trumpet, violins, string bass and continuo, and the music for a ballet between Acts 1 and 2, owe much to French models. In the long interlude

between Acts 2 and 3 four women sing successively in French, Portuguese, Italian and Spanish to show the distinctions then prevalent in national styles. Martínez while at Palencia published two pamphlets condemning Francesc Valls for harmonic licences, but Valls countered by citing examples from a ten-voice *Miserere* and a seven-voice villancico by Martínez with dissonances more daring than those in Valls's own works.

Martínez Torner, Eduardo. *See* TORNER, EDUARDO M(ARTÍNEZ).

Martínez Verdugo, Sebastián (*b* Madrid, *c*1575; *d* Madrid, 12 May 1654). Spanish organist and composer. He was the son of Sebastián Martínez, organist of the Descalzas Reales convent, Madrid, in 1594 while Victoria was *maestro de capilla*. On 17 and 18 December 1594 he competed unsuccessfully against Jerónimo Peraza (ii) for the post of organist of Palencia Cathedral. On 5 April 1596 Philip II appointed him one of the two Spanish-born keyboard players in the royal chapel at Lisbon, with an annual salary of 60,000 réis, beginning retroactively on 30 November 1595. Uncomfortable in Portuguese surroundings, he returned about 1598 to Spain, first as organist of Cuenca Cathedral and from 3 June 1600 until no later than 16 February 1607 as organist of Málaga Cathedral. He then went to Madrid, where he followed Bernardo Clavijo del Castillo as organist of the Spanish royal chapel, continuing in that post until his death. He wrote a Christmas villancico, *Canta missa de gallo un niño*, for three and five voices, which was in the library of King João IV of Portugal.

ROBERT STEVENSON

Martini, Francesco (*b* At [now Ath] in the diocese of Cambrai, ?*c*1560; *d* Rome, 14 Oct 1626). Flemish composer and instrumentalist, mainly active in Italy. He was a priest. According to Cametti he was born in 1568. Pitoni, however, identified him as the successor of Victoria as *maestro di cappella* at the Collegio Germanico in 1577–8. The documents there refer only to a 'Maestro Francesco'; Casimiri believed this was Francesco Soriano while Culley opted for Martini, but the question must remain open. According to Aringhi, Martini served as *maestro di cappella* at the Seminario Romano; Casimiri postulated the dates 1594–1602 but again there is no archival evidence. The first unambiguous Roman reference is his acceptance into the Congregazione dell'Oratorio on 5 October 1602. From August 1603, after the expulsion of Prospero Santini, Martini assumed responsibility for the congregation's music and in May 1605 he was named *perfetto della musica*, a post he occupied until his death (apart from the three years, April 1623–April 1626, when he was replaced by Girolamo Rosini). These were the years in which both the Chiesa Nuova and the attached oratory consolidated their musical reputations.

Martini was well thought of by his colleagues and was highly commended by G.F. Anerio who called him one of the best composers of the time. Only two volumes of printed music survive; the dedication of the *Motecta festorum* suggests that it was his first ('has veluti primitias frugum mearum'). The 1617 Marian motets and litanies show a composer in good command of the standard four- and eight-voice idioms of the time, with a somewhat conservative slant. At the same time he was very much at home in the sectionalised 'concertato all romana' as shown by *Magnificat* settings for eight and 16 voices, which survive in manuscript. Both have virtuoso reduced-voice sections which alternate with the tutti. The eight-voice setting provides two alternative settings of the even verses for (mainly) two solo voices which, according to a rubric in the manuscript, could be placed on separate platforms with their own organs. Four surviving non-concertato pieces for four choirs must have been written for Vespers of S Filippo Neri; they include a setting of *Serve bone et fidelis*, for the liturgy of a Confessor, as well as a *Magnificat* and *Dixit Dominus* and produce a good sonorous effect. Two three-voice *laude* appeared in Ancina's *Tempio armonico* (RISM 1599[6]) and one for eight voices is found in *I-Rv*.

NOEL O'REGAN

Martini, Georgius. *See* GEORGIUS A BRUGIS.

Martini, [Padre] **Giovanni Battista** (*b* Bologna, 24 April 1706; *d* Bologna, 3 Aug 1784). Italian writer on music, teacher and composer. Referred to at his death as 'Dio della musica de' nostri tempi', he is one of the most famous figures in 18th-century music. He had his first music lessons from his father Antonio Maria, a violinist and cellist; subsequent teachers were Angelo Predieri, Giovanni Antonio Ricieri, Francesco Antonio Pistocchi (singing) and Giacomo Antonio Perti (composition). In 1721, after indicating his wish to become a monk, Martini was sent to the Franciscan Conventual monastery in Lugo di Romagna. He returned to Bologna towards the end of 1722 and played the organ at S Francesco. In 1725 he succeeded Padre Ferdinando Gridi as *maestro di cappella* of S Francesco. He occupied that post until the last years of his life, and lived in the convent attached to the church. Martini received minor orders in 1725, and four years later was ordained a priest. His first extant works date from 1724 and the first publication of his music appeared in 1734, *Litaniae atque antiphonae finales Beatae Virginis Mariae*; only three other collections of his music, all secular, were published during his lifetime.

In 1758, at the age of 52, Martini was made a member of the Accademia dell'Istituto delle Scienze di Bologna, after presenting the 'Dissertatio de usu progressionis geometricae in musica'. In the same year he was also admitted to the Accademia Filarmonica – belated recognition in this case, because the rules prohibiting the admission of monks had to be waived. Martini's relationship with the Accademia is a matter of controversy. He was certainly not the author of the *Catalogo degli aggregati della Accademia filarmonica di Bologna*, an important manuscript long attributed to him but actually by O. Penna (*c*1736), though he was involved in the reworking of part of the *Catalogo* which resulted in the anonymous publication 'Serie cronologica de' principi dell'Accademia de' filarmonici' (in the *Diario bolognese*, 1776). In any case, Martini seems to have remained somewhat independent of the Accademia and its members. In 1776 he was elected a member of the Arcadian Academy in Rome, with the name Aristosseno Anfioneo.

Martini devoted himself assiduously to composing, writing and teaching, and he seldom left Bologna. He visited Florence, Siena and Pisa in 1759, and Rome on several occasions. He was offered positions in the Vatican, and possibly in Padua, but he chose to remain in the city of his birth. Although he lived to the age of 78, he apparently suffered from poor health, which may account for the fact that he travelled so little. According to contemporary accounts, Martini's pupil and successor at S Francesco, Padre Stanislao Mattei, was alone with him when he died; Martini's last words to Mattei were reported to have been: 'Muoio contento; so in che mani lascio il mio posto ed i miei scritti'

Despite the lack of biographical detail, there are many descriptions of Martini's extremely active creative life in different areas. He was a most unusual man: an indefatigable worker with wide interests and tremendous energy, and at the same time a warm and vital person. Burney wrote of him:

> Upon so short an acquaintance I never liked any man more; and I felt as little reserve with him after a few hours conversation, as with an old friend or beloved brother; it was impossible for confidence to be more cordial, especially between two persons whose pursuits were the same.

The 20-year-old Mozart wrote to him: 'I never cease to grieve that I am far away from that one person in the world whom I love, revere and esteem most of all'.

Martini refrained as much as possible from polemics and personal conflicts, but he was firm in his opinions. His relationship with Giordano Riccati in his later years and his refusal in 1776 to collaborate on a proposed *Nuova enciclopedia* on account of its 'French' orientation in music theory show a less attractive side to his character. Earlier on he had exhibited a kind of passive resistance to Rameau's request to the Istituto dell'Accademia for an official opinion on the latter's *Nouvelles réflexions sur le principe sonore* (1758–9), and had been consistently suspicious – albeit without strong scientific objections – of Tartini's theories about the *terzo suono*. He maintained, however, good relationships with colleagues whose views he did not share (e.g. F.A. Vallotti and Tartini himself). His character, as revealed in the portrait by Angelo Crescimbeni (see illustration), has been described as a

Giovanni Battista Martini: portrait by an unknown artist (Biblioteca Universitaria, Bologna) after an original by Angelo Crescimbeni

mixture of affability and underlying arrogance (Morelli). A degree of self-assurance derived from his vast knowledge and an undoubted generosity served as the basis of Martini's success and fame as a teacher. Although the extent of his teaching activities with individual students is not always clear (it ranged from many years to a few lessons), at least 69 composers learnt substantially from him and 35 others received some less clearly defined instruction. Among the former were J.C. Bach, Bertoni, Grétry, Jommelli, Mozart and Naumann; Martini taught them primarily counterpoint, often preparing advanced students for admission to the Accademia Filarmonica. He also devoted some time to singing instruction, as witness a number of surviving *solfeggi*. Martini's network of students was important for his activity as a collector of music and music-related documents; he probably used income from teaching to increase his music library, which was estimated by Burney at about 17,000 volumes in 1770. Personal contacts with the most famous musicians, scholars and rulers in Europe were valuable for the same purpose. Some items, including the important library of Ercole Bottrigari, came into Martini's possession by bequest (1751); others were either purchased or exchanged for copies of his own greatly valued printed works.

One of Martini's most important legacies is his extensive correspondence (about 6000 letters), only a small part of which has been published. Some letters were probably dispersed (or exchanged for other documents) during the 19th century. As well as including letters from such well-known figures as J.F. Agricola, Burney, Gerbert, Locatelli, Marpurg, Metastasio, Quantz, Rameau, Soler and Tartini, the collection forms one of the most important sources for the study of 18th-century musical life and thought in Italy; especially so in this respect is the correspondence with Girolamo Chiti. Martini's library includes also collections of letters by three earlier musicians, P.F. Tosi, G.P. Colonna and G.A. Perti.

Martini assembled also a unique collection of portraits, including both contemporary and earlier musicians. In 1773 he claimed to own 80 such portraits and at the time of his death the collection numbered 300; it seems, then, that in the later years of his life a composer's inclusion had become a much sought-after status symbol. Martini concentrated on those he considered the most celebrated ancient and modern 'scienziati di musica' and specifically on those who had gained renown through printed editions. Living musicians were directly requested to contribute a portrait, and substantial attention was given to the *maestri di cappella* of the most notable Italian churches as well as to the most important theatre composers. Foreign musicians were also included, some of whom, such as Antonio Eximeno, had been Martini's opponents. The collection suffered some losses after Martini's death but it was also added to during the 19th and early 20th centuries. Together with most of Martini's library it served as the basis of the present Civico Museo Bibliografico Musicale in Bologna.

Martini's position as a music historian rests on his *Storia della musica*, of which he was able to complete only three large volumes which do not go beyond Greek music. His view of medieval music is revealed in the preparatory work he did in manuscript (dated *c*1774–84) for the fourth of the projected five volumes, which is sufficiently complete to indicate that Martini did not go beyond the traditional 16th-century schematization based on the three figures of Pope Gregory, Guido of Arezzo and Johannes de Muris. While Martini applied new standards of scholarship to previous writings (his reading of the sources, for instance, allowed him to refute the proposition that Johannes de Muris was the 'inventor' of musical figures), he was unable to form as comprehensive a picture as that presented by the less erudite but more forward-looking Charles Burney in the second volume of his *General History* (1782). Although somewhat disappointing from a modern historiographical perspective, the *Storia della musica* contains valuable observations on the intimate nature of plainchant (*canto fermo*) as opposed to *canto figurato*. Perhaps better than any other 18th-century writer on music, Martini expressed an awareness of the different sensibilities that regulate monodic and polyphonic, tonally orientated music, and he also propagated the conviction that, through a deep understanding of the features proper to modal music, the ancient sensibility could be perpetuated in a modern musical language adapted to the original nature of *canto fermo*.

Martini's didactic approach is best represented in the two volumes of his *Esemplare, o sia Saggio fondamentale pratico di contrappunto* (1774–6). This is a compendium of extracts from musical works intended for advanced students and is based 'on the example rather than on the rule, on judgment rather than precept' (Reich); Knud Jeppesen, however, argued that it is rather 'a collection of intelligently commented examples of vocal polyphony than a real counterpoint handbook' (quoted in E. Darbellay: 'L'*Esemplare* du Padre Martini: une exégèse musicologique du "stile asservato"'; see *Padre Martini: Bologna 1984*, 137–71). Despite the apparent modernity of the approach through examples, the organization is traditional and perhaps conceptually indebted in its analytical purpose to the broader but incomplete *Guida armonica* of G.O. Pitoni (of which Martini was certainly aware). The whole work, but especially the first volume, represents a passionate defence of the aesthetic specificities of church styles. Martini supported the idea of multiple styles inherited from the 17th century, comparing it to the potential levelling implied by modern theories (specifically that of Rameau). The assumption that 'the whole art of composition consists in uniting the nature of *canto fermo* with that of the *canto figurato*' led Martini, on the one hand, to support a comparatively archaic language in sacred music and, on the other, to attribute to plainchant an 'expressive' character:

> The *canto fermo*, through melody alone, through the varied distribution of intervals, arranged by step or by leap, and most of all through the different disposition [in the various modes] of the diatonic semitone, has the power to excite in the souls of listeners earnest affections and thereby to move them to piety.

Paradoxically then, Martini reveals a modern attitude in his application to plainchant of the 17th-century 'expressive' paradigm while at the same time cherishing an outmoded desire to perpetuate the individual character of the various modes in chant-based modern settings. Any judgment on sacred music by Martini should then keep into account his aesthetic ideals and could only be based on the retrieval of a sensibility for a *canto fermo*-based musical language which was already evidently fading out in his time. Martini's compositions not based on plainchant present a considerable variety of styles, and it is not yet clear whether this diversity should be attributed to his

stylistic development over the years or to the multi-stylistic approach supported in his theoretical works. His *Sonate d'intavolatura* (1742), possibly reflecting acquaintance with J.S. Bach's *Clavier-Übung I* (Martini being one of the few non-German composers to have come into contact with Bach's music) as well as with some of his choral works and organ pieces, are written in a luxuriant counterpoint. Martini however wrote more often in the current homophonic style based on thin textures and the supremacy of the treble. He was not interested in re-introducing polyphony (as G.B. Sammartini was, for example) or in the possibilities of sonata style. He might well be seen as a conservative composer, but in fact a simple opposition of progressiveness versus conservativeness does not account for the complexity of his relationship with tradition or of his views on the social and moral function of music (particularly that for the Catholic liturgy). Martini's lasting heritage is perhaps best represented by the breadth of his interests (especially evident in the manuscript *Miscellanee*) and by the historical awareness of his (unaccomplished) projects, rather than by any individual production.

WORKS

*c*1500 compositions are extant, and *c*1000 canons, mostly in *I-Bc*; other sources include *A-Wn*, *B-Bc*, *D-Bsb*, *Dl*, *MÜp*, *Rp*, *I-Ac*, *Baf*, *Bsf*, *Bsp*, *BGc*, *Fc*, *LT*, *MOe*, *Nc*, *PAc*, *PIst*, *Ps*, *Rsc*, *Vc*, *GB-Cfm*, *Lbl*. No definitive catalogue exists; Busi and Zaccaria have incomplete lists, Wiechens has an extensive list of the sacred music, Brofsky (1963) a thematic catalogue of the instrumental music.

HOWARD BROFSKY/S. DURANTE

Martini, Giuseppe. *See* SAMMARTINI, GIUSEPPE.

Martini, Jean-Paul-Gilles [Martin, Johann Paul Aegidius; Schwarzendorf; Martini il Tedesco] (*b* Freystadt, Bavaria, 31 Aug 1741; *d* Paris, 10 Feb 1816). French composer of German birth.

1. LIFE. A son of the organist Andreas Martin, he was trained first by his father and later at the Jesuit seminary in Neuburg. In 1758 he began studies in philosophy at the University of Fribourg, supporting himself by playing the organ at the local Franciscan convent. During this period he was known as Schwarzendorf. In 1760 he arrived destitute in Nancy, where his musical gifts soon brought him to the attention of two influential patrons: in Fléville the Marchioness of Desarmoises, who held what was reputed to be the most aristocratic and witty salon in the provinces, and in Lunéville Stanislas I, the exiled King of Poland, Duke of Lorraine and father-in-law of Louis XV. Shortly after Stanislas's death in 1764 Martini went to Paris, where his instrumental works began to appear under the name 'Martini il Tedesco' to distinguish him from G.B. Martini.

Thanks probably to his Lorraine patrons, Martini had introductions to important courtiers. After winning a contest for march composition, he received the recommendation of the Duke of Choiseul and was consequently appointed to the Marquis of Chamborant's regiment (with responsibility for composing military music, now apparently lost) and, more importantly, to a post in the service of the Prince of Condé. In 1773 the prince promoted him to the position of *intendant de la musique*, in which he wrote chamber music, *romances* and chansons, and composed and arranged theatre music. The Duchess of Bourbon lent her support to the première of *Le fermier cru sourd*, but to no avail. Martini's celebration of Louis XVI's accession, *Henri IV*, met with better success, though the king reportedly found it boring and sycophantic. Court performances of many of Martini's works followed. His resetting of Favart's *Annette et Lubin* brought him to the attention of the Count of Artois (the

future Charles X), who then appointed him his *directeur de la musique* and had the opera presented at Fontainebleu (6 February 1789).

In 1787 Martini became the unofficial director of the *concerts de la reine*, and two years later he was appointed general director of the Théâtre de Monsieur (later the Théâtre Feydeau). However, with the fall of the monarchy (1792) the latter position disappeared, and his principal patrons emigrated. One of his collaborators, the Chevalier de Curt, published in London a collection of Martini's songs (many of them connected to members of the royal family) and his *Prière pour le roi*, which by 1793 would have been considered subversive in France. His involvement with the court was well known, and he risked arrest as a supporter of the *ancien régime*; he left the capital for Lyons and returned only with the end of the Terror (late 1794). With the Thermidorian Reaction he again benefited from official support; although his proposal for the reform of music education was not adopted, he received a special government grant in 1795 and an appointment as *inspecteur* to the new Conservatoire (he assumed duties in 1798 and retired, unwillingly, in 1802). He also participated in government-sponsored *fêtes*.

Martini adapted skilfully to the changing regimes. After the signing of the concordat re-establishing Roman Catholicism in France (1802) and the failure of his most recent operas to stay in the repertory, he turned increasingly to church music. He also served the imperial regime, and his *Messe solemnelle* and *Te Deum* were performed on official state occasions. His *scène héroïque* in honour of Napoleon's marriage in 1810 to Marie-Louise of Austria includes representations of classical Greece (Sappho), the French heritage (Corneille) and the emperor's favourite bard ('Ossian'). Yet with the Restoration of the Bourbons he insisted on – and received – his appointment as *surintendant de la musique du roi* (to which in 1788 he had been named *en survivance*, next in line after the death of the current holder). His last compositions were written for the royal chapel; for some he reworked compositons of the previous decade.

2. Works. Late in life Martini stressed his accomplishments in five areas: opera, *romances* and chansons, band music, church music, and theory and music education. He claimed, perhaps exaggeratedly, to have introduced to the French the German practice of scoring military music for six parts (two clarinets, two horns, two bassoons) instead of the traditional oboe and bassoon or fife and drum. His approach is evident from the music for the entr'acte between acts 2 and 3 of *Henri IV*, which includes straightforward harmonizations of military calls, and a newly composed orchestral march, basically in a six-part texture with doublings and written in a bright and rousing style that had a wide appeal, as numerous arrangements attest.

Martini also took pride in being the first to replace basso continuo in French song with obbligato keyboard. Whatever the merits of this claim, his collections of *romances* and chansons were important models in the 1780s and later. The *Romance du chevrier*, or *Plaisir d'amour* (from his first collection), remains in the repertory; its gentle melancholy and sentimentality are matched by a suave vocal line and discreet, but effective accompaniment. Martini's other songs encompass the pastoral, the narrative, the satirical and the comic. He also set verses by leading lyric poets of his time, and his choices illustrate several contemporary concerns (Shakespeare's arrival on the Continent, maternal devotion, political persecution).

Fétis painted an unflattering portrait of Martini as a pedagogue. Still, his writings, while offering little that was new, represent another link between German and French practices. His sacred music, highly regarded in his day, combines old-fashioned procedures, such as fugue and cantus firmus, with more modern theatrical and dramatic effects for soloists, chorus and full orchestra which are in part the legacy of the Revolutionary *fête*.

Martini's enduring reputation is due mainly to his operas, of which *L'amoureux de quinze ans* is the best. It achieved a long-lived popularity unusual for a work that began as a *pièce de circonstance*. The sentimental libretto lent itself well to brief *airs*, duets, marches and dances, allowing his gift for melodies in a gracious and simple style to come to the fore. *Le droit du seigneur* was also successful, but *Annette et Lubin* could not compete with the popularity of the original vaudeville work, and *Le rendez-vous bien employé*, failed because it was too 'noble'.

The première of *Henri IV* marked an important innovation in the repertory of the Comédie-Italienne in that the plot centres on historical events and has a king as a central figure; although the libretto was justly condemned, the opera was a precedent for later works. Fanfares, marches and heroic vocal pieces dominate the score; Martini also made effective use of a pseudo-traditional *air*, 'Charmante Gabrielle'. The emphasis on spectacle coupled with the military music added to the work's impact. In *Sapho* Martini maintained a generally Classical *tragédie lyrique* style, but, learning from more recent developments, he also used details in orchestration and harmony to establish moods and to illustrate dramatic moments.

Martini's friend and collaborator, the Princess von Salm, ranked him among the innovators of French opera. This is perhaps an exaggeration; nonetheless, in *Henri IV* and *Sapho* he contributed to the broadening of subjects and styles thought suitable for secondary theatres, and in *L'amoureux de quinze ans* and *Le droit du seigneur* he proved himself a worthy contemporary of Grétry and Dalayrac. His contribution to solo song was significant, and his output as a whole is a fine example of that of a successful court musician at a time when court patronage was on the wane.

WORKS

OPERAS

La convalescence de Thémire (divertissement, 1, Gaultier), Fléville, Marchioness of Desarmoises, 20 Feb 1765, *F-Pn* [to celebrate her recovery from illness; probably fully staged]

L'amoureux de quinze ans, ou La double fête (cmda, 3, P. Laujon), Paris, Comédie-Italienne (Bourgogne), 18 April 1771 (Paris, 1771) [for the marriage of the Duke of Bourbon]

Le nouveau-né (cmda, 3, Laujon), Chantilly, Duke of Bourbon's, late sum. or early aut. 1772 [for the birth of the Duke of Enghien]

Le fermier cru sourd, ou Les méfiances (cmda, 3, Laujon), Paris, Comédie-Italienne (Bourgogne), 7 Dec 1772

Le rendez-vous bien employé (comédie-parade, 1, L. Anseaume), Paris, Comédie-Italienne (Bourgogne), 10 Feb 1774

Henri IV [Henri IV, ou La bataille d'Ivry] (drame lyrique, 3, B.F. de Rosoi), Paris, Comédie-Italienne (Bourgogne), 14 Nov 1774 (Paris, 1775/*R* in FO, lxiv [forthcoming]) [for the accession of Louis XVI]

Le droit du seigneur (cmda, 3, F.G. Desfontaines and Laval), Fontainebleau, 17 Oct 1783 (Paris, 1784)

L'amant sylphe, ou La féerie de l'amour (cmda, 3, A.-F. Quétant), Fontainebleau, 24 Oct 1783 (Paris, 1783)

Annette et Lubin (oc, 1, M.-J.-B. Favart, J.F. Marmontel, J.B. Lourdet de Santerre and C.-S. Favart), Gennevilliers, Count of Vaudreuil's, 1785 (Paris, 1789)

Sapho (tragédie lyrique, 3, C.M. Pipelet de Leury [later the Princess von Salm-Reifferscheid-Dyck], Paris, Amis de la Patrie [Louvois], 12 Dec 1794 (Paris, 1795), rev. *c*1805 (?1805), unperf.

[Sophie de Pierrefeu, ou] Le désastre de Messine (drame lyrique/fait historique, 3, J.-A. de Réveroni Saint-Cyr), intended for 1797–8, unperf., lib (Paris, 1804) [cited as Sophie, ou Le tremblement de terre de Messine in Salm-Reifferscheid-Dyck, iv, 1841–2]

Ziméo (opéra, 3, Lourdet de Santerre), Paris, Feydeau, 16 Oct 1800 (Paris, 1800)

La maison louée, ou La maison à deux maîtres (cmda, 3, Desfontaines), Paris, OC (Feydeau), 30 Aug 1806, lib in *F-Pan*

Chanson in L.-A. Beffroy de Reigny and L.-C.-A. Chardiny: L'histoire universelle, Paris, Monsieur, 16 Dec 1790

Choruses in: Le couvent, ou Le bienfait de la loi [Amélie, ou Le couvent] (drame, 2, J.B. Pujoulx), Paris, Monsieur, 3 March 1791

Spurious: Camille, ou Le souterrain, 1796, *F-Pn*, *S-St*, attrib. 'Martini', probably by Martín y Soler; Le poëte supposé, ou Les préparatifs de la fête [lib. of Le nouveau né, rev. Laujon, set by S. Champein, 1782]; La partie de campagne, by L.-E. Jadin, 1810; Les rendezvous nocturnes [Fr. trans. of title of play, in It., in repertory of Comédie-Italienne 1740–79, sometimes confused with Le rendez-vous bien employé]

SACRED VOCAL

for vv, orch unless otherwise stated

Messe solemnelle (Ky, Gl, Cr, Laudabo nomen Dei, Cantate Domino, O salutaris hostia, Ag, Domine salvum fac Imperatorem Napoleonem/regem/principem) (Paris, 1808), rev. version, by *c*1815, *F-Pn*

Messe des morts à grand orchestre (Paris, *c*1815)

8 other masses: no.1 (Exultate Dominum Deum, Cantate Domino, Deus judex justus), no.2 (A solis ortu, Laudate Dominum), no.3 (Ky, Dilexi quoniam exaudiet Dominus), no.4 (Super flumina Babylonis), no.5 (Inclina Domine aurem tuam), no.6 (Ky, Laudabo nomen Dei), no.7 (Ky, ?Les dernières paroles de Jesus Christ, lost: see Lefebvre), no.8 (Ky, In te Domine speravi): all by *c*1815, *Pn*

Te Deum, perf. Paris, Concert Spirituel, 1790, lost

Te Deum (Paris, 1809) [?based on Te Deum, 1790]

Domine salvum fac Imperatorem Napoleonem, vv, bc (Paris, 1809), rev. as Domine salvum fac regem, by *c*1815, *Pn*

Other sacred: 6 pss, S, Mez, pf/org, vc ad lib (Paris, *c*1805); 2 O salutaris hostia, vv, bc, both (Paris, 1809); 6 other O salutaris hostia, most with orch, by *c*1815, *Pn*; Deus Deus meus respice in me, Domine in virtute tua, Domine salvum fac regem, Ecce sacerdos magnus, unacc. vv, Laudate Dominum, Laudate pueri Dominum, S, orch, all by *c*1815, *Pn*

SECULAR VOCAL

Political chansons and hymnes: Prière pour le roi (London, 1793); Chant funèbre (C.M. Pipelet, later von Salm-Reifferscheid-Dyck), *c*1794, text in Salm-Reifferscheid-Dyck 1841–2, ii; Hymne à l'agriculture (Pipelet), vv, band *F-Pn* (inc.), arr. with bc (Paris, 1796); Anniversaire de la fondation de la République (M.J. Chénier), vv, band (Paris, 1798); Chant triomphal (Leclerc), vv, band, 1798, *Pn* (inc.); Chant d'allégresse, 1801

M. ELIZABETH C. BARTLET

Martini, Johannes (*b* Leuze, *c*1430–40; *d* Ferrara, between late Oct and late Dec 1497). South Netherlandish composer. He is thought by some biographers to be the 'Ioannes Martinus' mentioned by the 16th-century writer Jacques de Meyere as having two brothers named Thomas and Petrus, all *cantores* who came originally from Armentières. A document (see Starr) specifies his place of origin as 'Luce'; whether this refers to Leuze near Tournai or Lueze near Namur is uncertain. In a letter of 10 December 1471 written by Duke Ercole I d'Este of Ferrara to the Bishop of Konstanz, the newly installed duke announced his intention to create a musical chapel at his court and to hire a 'D. Martinus de Alemania', who though then visiting Ferrara was in service at Konstanz. It is not clear whether this singer was the 'Johannes

Martini cantor capelle' who was later at Ferrara. On the other hand, a document of 27 January 1473 states that a 'Giovanni d'Alemagna' was installed in the ducal chapel at Ferrara, and this undoubtedly refers to the composer, so it can be accepted that Martini's long association with the ducal chapel began no later than January 1473 and, apart from a brief interruption in 1474, lasted until his death. In 1474 he spent a brief period in the rival chapel of Duke Galeazzo Maria Sforza in Milan and visited Mantua (according to a travel permit of 28 February 1474 issued by Galeazzo Maria Sforza). A list of singers in the Sforza chapel dated 15 July 1474 includes Martini together with Compère and 'Josquin'; all three received the relatively low stipend of five ducats a month. An earlier list of Milanese court singers compiled some time between 1472 and 1474 does not contain his name, and court records show that he returned to Ferrara in November 1474. The account books of the ducal musical establishment at Ferrara list him in these years as 'Zohane Martini de Barbante' (Brabant) and also as 'Zohane Martino todescho cantadore compositore', recognizing him as a composer holding a position of leadership in the chapel. He received not only an above-average salary but also a house in Ferrara and income from benefices procured for him with the duke's help. Correspondence between Duke Ercole I and his ambassadors in Rome shows that Martini himself travelled to Rome in February 1487 and again in November 1488 to negotiate his claims to benefices.

In 1487 Martini was a member of the Ferrarese retinue that accompanied the eight-year-old Ippolito d'Este (the second son of Ercole) to Hungary for his installation as Archbishop of Esztergom. He returned to Ferrara by the autumn of that year. In 1489 he is mentioned in letters between Duke Ercole and Queen Beatrice of Hungary as a friend of the organist Paul Hofhaimer, whom she was anxious to bring into her own service. In 1479 there is a record of payment for a *Libro da canto da vespero per la capella ... composto per Giovan Martin componitore*; this is undoubtedly the large, two-volume manuscript *I-MOe* α.M.1.11–12. The two volumes contain vesper psalms, hymns and *Magnificat* settings attributed to Johannes Martini and Giovanni Brebis, another member of the Ferrara chapel. This is one of the earliest known manuscripts containing sacred music, particularly psalms, for double chorus and it reflects the division of the court chapel into a double choir from the early years of Ercole's reign to 1482, pointed out by the contemporary writer Sabadino degli Arienti. In 1491 and 1492 Martini corresponded with Ercole's daughter Isabella d'Este Gonzaga (he may have been her music tutor before she went to Mantua to marry Francesco Gonzaga on 15 February 1490). Martini is also the leading figure in an important chanson collection compiled in honour of the marriage (*I-Rc* 2856), which bears the arms of both the Este and Gonzaga families. A portrait often thought to represent Martini is found in an illuminated initial on folio 2*v* of *I-Fn* B.R.229 (printed in Reese, pl.III), but Brown has cast doubt on this in his edition of the manuscript.

Martini composed both sacred and secular music. The preponderance of masses over motets is more nearly characteristic of the generation of the later Du Fay and of Ockeghem than of Josquin's. Compared with Josquin, Martini gives the impression of being a more conservative musician whose work is still more concerned with structural devices than with text expression. His secular music includes principally three-voice settings of French texts as well as some settings of Italian texts for three or four voices. His music contains skilful imitative devices, and an elaborate contrapuntal style where this is appropriate to the genre (as in his masses and motets): it makes extensive use of small-scale repetition of motifs and of sequential writing at times not unlike Obrecht's. On the other hand, his vesper psalms written with Brebis are in a simple homophonic style fitting to their liturgical functions.

WORKS

Editions: *Johannes Martini: Magnificat e messe*, ed. B. Disertori, AMMM, xii (1964) [D]; *A Florentine Chansonnier from the Time of Lorenzo the Magnificent: Florence, Biblioteca Nazionale Central, MS Banco Rari 229*, ed. H.M. Brown, MRM, vii (1983) [B]

MASSES

Edition: *Johannes Martini: The Masses*, ed. E. Moohan and M. Steib, RRMMA, xxxiv–xxxv (1999), 34–5 [incl. all masses and full source information]

Missa 'Cela sans plus', 4vv (on Lannoy's chanson)
Missa 'Coda di pavon', 4vv (on Barbingant's Der Pfoben Scwancz)
Missa 'Cucu', 4vv, ed. in DTÖ, cxx (1970)
Missa 'Dio te salvi Gotterello', 4vv
Missa dominicalis, 4vv
Missa ferialis, 4vv (Ky, San, Ag only)
Missa ['In Feuers Hitz'], 3vv
Missa 'Io ne tengo quanto a te', 4vv, D
Missa 'La martinella', 4vv (on his own chanson)
Missa 'Ma bouche rit', 4vv, 2 versions, 1 ed. in D (on Ockeghem's chanson)
Missa 'Or sus, or sus', 4vv (on anon. chanson)

LEWIS LOCKWOOD/MURRAY STEIB

Martini, (Giovanni) Marco (*b* Venice, *c*1650; *d* Venice, 6 March 1730). Italian composer and instrumentalist. About 1680–81 he was active at Milan under the protection of Count Vitaliano Borromeo and from 2 April 1686 to 31 July 1693 he served the Duke of Modena. He collaborated closely with the Accademia de' Dissonanti, adapting the Roman concerto grosso style to the academic cantata. On 10 November 1689 he was elected honorary member of the Accademia Filarmonica, Bologna. Between 31 May 1699 and 3 February 1700 he was *maestro di coro* of the Venetian Ospedale dei Mendicanti; on 7 September 1704 he was narrowly defeated for the post of second organist at S Marco, where he was employed as a violinist in 1684 and 1693, but no longer in 1708. His will (*I-Vas*) lists the books on music theory in his possession.

Martinique and Guadeloupe. The islands of Martinique and Guadeloupe, with FRENCH GUIANA on the South American mainland are former French colonies incorporated into the French nation in 1946 as overseas *départements*. Colonized in the early 1600s, Martinique and Guadeloupe quickly became two of France's most lucrative possessions. Slavery ended in the 1840s, but until the end of World War II the islands retained a primarily agricultural economy based on the labour of a largely African-descended population. Since becoming *départements* in 1946, the islands have seen rapid urbanization plus large-scale migration to metropolitan France.

In each department a full range of internationally circulating music exists, from Western classical to rock, jazz, rap and Caribbean popular styles such as salsa and reggae. This article discusses only the major indigenous genres; musical terms are in Creole, the language of the majority of people (French is the official language).

1. Martinique: (i) Rural traditions (ii) Instruments and performance (iii) Urban traditions. 2. Guadeloupe. 3. Commercial music.

1. MARTINIQUE.

(i) Rural traditions. In Martinique (as elsewhere in the Caribbean) slaves were allowed their own dances outdoors on Saturday afternoons and nights, after Mass on Sundays and on holidays. Music also accompanied *koud'min* (Fr. *coups de main*) work parties, typically for farming and house-building. Early slave dances of the French Antilles and other islands were frequently (and perhaps indiscriminately) labelled *kalenda*, *bamboula*, *djouba* or *chica* in colonial literature. Descriptions of each of these varied; one common theme involved drums laid on the ground with the drummer straddling the drum and using one heel to change the pitch, often with a second percussionist striking the side of the drum with a pair of sticks. These practices suggest a Central African (Congolese) derivation. Choreography included solo dances and group circle dances; however, slaves soon adapted slaveowners' choreography. In the early 1700s French contredanse, with the basic pattern of two facing lines, became popular; a 1722 account by Labat of a dance he saw in Martinique and called *kalenda* (but which closely resembles today's *mabelo*) described this choreography. Quadrille (*kwadril*) became popular in France about 1780 and spread through the New World in the early 1800s. In Martinique at least two adaptations of quarille developed: *bèlè* (Fr. *belair*) from the North Atlantic region and *haute taille* (or *réjane*) from the mid-Atlantic.

After Abolition the most frequent rural dance events were secular entertainments known as *swaré* and held on weekend nights in large outdoor sheds (*paillasse*). Admission was charged and food and drink were sold. Until the 1980s, various dance styles remained strongly regional. Those of the North Atlantic region, around the town of Sainte-Marie, have enjoyed the greatest prestige due to the influence of roughly a dozen large families that for

several generations have specialized in performance at a virtuoso level. North Atlantic dance genres include *bèlè*, *lalin klé* and *kalenda*. *Bèlè* includes *bidjin bèlè*, *bèlia*, *gran bèlè*, *bèlè pitché* and *bèlè marin*; all use *kwadril* format, but with their own movements, songs and drum patterns. The main type of performance is *swaré bèlè* and is held on weekend nights; theoretically, it is open to all, but participation as a dancer, drummer or lead singer is limited to knowledgeable performers who perform sets of five or six dances and then yield the floor to others. In contrast, *lalin klé* ('full moon') dances are loosely choreographed, with the lead singer acting as *konmandé* (caller), and are open to all. Formerly held on nights of a full moon, *lalin klé* are now danced at *swaré bèlè* as opportunities for everyone to participate. They include *ting bang* and *woulé mango*, both circle dances, and *bènèzwél*, *kanigwé* and *mabelo*, line dances derived from contredanse. *Swaré bèlè* are also the setting for *kalenda*, a dance for successive soloists (formerly male, but now also female).

After World War II, modernization temporarily disrupted rural performance. The specialist performing families of Sainte-Marie found work in the folkloric troupes that emerged in the 1950s, but were largely ignored by urban audiences. In the 1980s, younger urban dwellers began reviving interest in traditional music; many were nationalists and viewed *bèlè* as an emblem of their ethnic heritage. They turned mainly to the Sainte-Marie performers for knowledge and inspiration, so that the Sainte-Marie dances are now the best known of Martinique's regional traditions, danced at *swaré bèlè* sponsored by non-profit cultural organizations, cultural centres, towns or *quartiers* on the occasion of their annual *fête patronale* and by restaurant or cockfighting pit owners. Tourist shows at hotels provide non-participatory contexts.

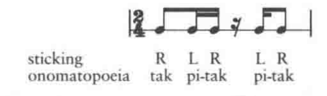
Other regional traditions include the above-mentioned *haute taille* (*réjane*) and *bèlè du sud*, a complex of dances from the south with movements and music similar to Sainte-Marie *bèlè* but danced by an unspecified number of couples. Certain regional work musics are still remembered but no longer used for work: the North Atlantic *fouyté* and the Northern caribbean *lasoté*, both of which probably accompanied communal planting; and *lavwa bèf*, songs encouraging oxen to work.

Danmyé (or *ladjia*), traditionally performed throughout the island (including the cities) and recently revived along with *bèlè*, is similar to the Brazilian *capoiera* in its combination of dance and combat.

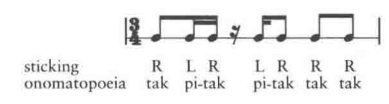
(ii) Instruments and performance. Sainte-Marie *bèlè*, *kalenda* and *danmyé* are all accompanied on the *tanbou bèlè* drum (also called *ka* by older musicians). The lone drummer plays both steady rhythmic patterns and improvisations marking choreographic changes. The drum is single-headed, open at one end and about 65 cm high with a goatskin head about 30 cm in diameter. The transverse playing style allows not only heel control, which is found on several other Caribbean islands (e.g. Jamaican *kumina* and Haitian *djouba*), but also a lateral twisting of the left forearm and wrist that creates a continuous roll with the left fingers and sustains the stronger notes struck by the right hand. This technique is similar to that of many frame drums (e.g. Brazilian *pandeiro* and Puerto Rican *pandereta*).

A second musician plays a steady ostinato on the side of the drum with *tibwa* (Fr. *petit bois*), a pair of sticks about 40 cm long and 1·5 cm thick. Sometimes *tibwa* are played on a length of bamboo mounted on a stand. Often a *chacha* (single-cylinder metal rattle) or two are added to the ensemble, but are considered extra. In practice more than one drummer may accompany a dance, but taking turns. Two *tibwa* players often play simultaneously. In *lalin klé* and *bèlè du sud*, however, two or three drummers play in near-unison.

The *tibwa* patterns are considered the basic rhythm of the dance; ex.1 illustrates the two most frequent patterns. Call-and-response singing completes the ensemble, with the lead singers choosing the sequence of dances through their selection of songs. All songs are in Creole and concern relations between the sexes, local gossip and current politics.



The mid-Atlantic quadrille dances are usually accompanied by accordion, violin, *chacha* and *tanbou di bas*, a frame drum played by both striking and rubbing. One player acts as *konmandé*, directing the dancers. In common with other quadrille adaptations throughout the Caribbean, quadrilles from Martinique involve a 'set' of dances, each with its own choreography and music. In the mid-1990s only one quadrille group was active.



(iii) Urban traditions. Carnival is found in both urban centres and towns. It has had a complex history, waxing and waning with economic and demographic changes. During the 20th century (until World War II) *musique Créole* bands (see §3) riding on carts or trucks played a fast style of *biguine* known as *biguine vidé*, or simply *vidé*. Carnival declined during the war and did not fully resurge until the 1980s, when *groups à pied*, marching bands of 50 or more percussionists and brass players, plus costumed dancers, became popular. In most *vidé* songs the band acts as the song leader while onlookers shout the responses. Percussion consists of drumkit components, homemade drums built from plastic plumbing and food containers, *tanbou débonda*, *gwoka*, *chacha*, *tibwa* and various struck bells.

Groups à pied are organized mainly as cultural associations, identified with specific neighbourhoods. In Carnival they perform alongside other forms of music and display, including theme-costumed groups, traditional individual masqueraders, spontaneous *vidés* of friends and hangers-on, *biguine* song contests, costume contests, decorated cars and floats, and paid-admission parties (*zouks*).

Chanté Noël is a fairly recent tradition, consisting of lively *biguines* and *mazouks* (mazurkas) on Christmas themes, sung informally at Christmas parties. *Chouval*

Ex.1 Common *tibwa* patterns

R = right; L = left

bwa ('wooden horse') was originally played for hand-pushed carousels, of which only one remains. The repertory consists of *musique Créole*; instrumentation includes accordion, clarinet, saxophone, bamboo flute, *tibwa* (played on bamboo), *tanbou débonda* ('two-buttocks drum', a two-headed cylindrical drum played horizontally with sticks) and assorted percussion.

Guadeloupean *gwoka* drumming (§2) became popular with urban youth in the 1960s and has been indigenized; in fact, *gwoka* is better known in Martinique than *bèlè*. Although the initial interest in *gwoka* arose from the nationalist-ethnic movement *retour aux sources* (inspired by the *négritude* of political leader Aimé Césaire), this specific meaning has largely been lost.

2. GUADELOUPE. Documentation of slave music is better for Guadeloupe than for Martinique. In the 1600s and 1700s rural slaves' free-time musical dances were known as *bamboula* or *gwotambou* (Fr. *gros tanbou*); there were also *koud'min*. In towns, *sociétés* (mutual aid societies) developed in order to raise funds to purchase slaves' freedom, to pay for funerals and for entertainment. Their organization was often elaborate, with hierarchical 'royal courts'. They sponsored regularly occurring music and dance events, with entrance fees and, in some cases, written invitations. This form of organization spread into the countryside, so that after Abolition (if not sooner) these societies existed for both *balakadri* (quadrille balls) and *bamboulas*.

Guadeloupean *balakadri* persisted into the 20th century and, despite disruption after World War II, made a comeback in the 1980s. The Guadeloupean-administered island of Marie-Galante has also had a vital and well-documented *balakadri* tradition. As in Martinique (and the Creole-speaking island of St Lucia), *kwadril* dances are in sets consisting of proper quadrilles, plus creolized versions of 19th-century couple dances: *biguines*, *mazouks* and *valses Créoles*. Instrumentation consists of variable combinations of accordion, guitar, violin, *tanbou dibas*, *chacha* (either a single metal cylinder as in Martinique, or a spherical calabash without a handle, held in both hands), *malakach* (maracas), triangle, *bwa* (*tibwa*) and *syak*, a bamboo rasp one metre long, grooved on both top and bottom, held with one end on the belly and the other on a door or wall and scraped with both hands. A *konmandé* completes the ensemble.

By the 20th century *bamboula* dances became known as *swaréléwòz* (Fr. *soirées la rose*) or simply *léwòz*, after the La Rose *société* (various La Rose associations with differing purposes, but usually incorporating music, are found in St Lucia, French Guiana and elsewhere). After 1946 formal drum *sociétés* lapsed, but the drumming tradition was revitalized by urban youth during the 1960s; as in Martinique, the revival incorporated nationalist politics. The revitalized tradition is often termed *gwoka* after the drums used, while dance events are *swaréléwòz*, *kout tanbou* ('drum stroke') or *kout mizik* ('music stroke').

The term *gwoka* may derive from *gros ka* ('big drum'), or from Bantu *ngoma* (drum). A *gwoka* ensemble consists of from two to five *boula*, drums built very much like the *tanbou bèlè* of Martinique and played transversely (occasionally with heel technique) plus one *makyé* (Fr. *marqueur*), a smaller, higher-pitched drum held upright between the legs. The *boula* play in near-unison while the *makyé* matches the rhythm and energy of the dancers. One or more calabash *chacha* may be added, as well as *tibwa* played on bamboo (some musicians state that *tibwa* has only recently been adopted from Martinique).

The seven traditional rhythms are *léwòz*, *graj*, *woulé*, *toumblak*, *padjanbèl*, *menndé* and *kaladja*. Dancing is largely improvised (though some defined steps exist) by successive soloists (male and female). Songs are in call-and-response form, in Creole, and concern relations between the sexes and topical matters.

Funeral wakes have two contrasting traditions. Outside the house, men perform *bouladjèl* ('mouth drum'), a call-and-response, competitive percussive vocalization. Song leaders change frequently as singers challenge one another. Inside, women sing *kantikamò* (Fr. *cantiques à la mort*), also in call-and-response form. The men arrive on their own to support the mourners while the women are invited and their songs dedicated to the dead and the spiritual world.

Martial arts dance forms also exist, known as *mayolé*, *sovéyan* and *bènaden*. Each is accompanied by *gwoka* ensemble and call-and-response singing.

Carnival music in Guadeloupe, *mizik vidé*, took a new turn in the 1980s, led by the group Akiyo, a large percussion-and-vocals ensemble featuring songs and costumes on strongly nationalist, anti-colonial themes. Percussion includes *boula*, *makyé*, *tanbou bas* (bass drums) with one and two heads, *tanbou chan* (a small high-pitched drum) and *chacha*.

3. COMMERCIAL MUSIC. *Musique Créole* (also *musique traditionelle* or *patrimoine*) refers to three song types dating from the 18th and 19th centuries: *biguine*, *mazouk* (mazurka) and *valse Créole*. Instrumentation varies, but typically includes some combination of clarinet, saxophone, trombone, accordion, bamboo flute, *chacha*, *tibwa*, drumkit, piano, bass and banjo. *Biguine* is the best-known of these styles outside the French Antilles, having been performed in Paris by emigrant musicians as early as the 1920s. *Biguine* is somewhat more associated with Guadeloupe and *mazouk* with Martinique. The ostinato patterns of *tibwa* form the rhythmic bass of both these styles.

Musique Créole continued to be popular through the 1950s and 60s in jazz big-band format, but by the late 60s audiences turned to foreign styles, first Haitian *konpa dirèk* (*see* HAITI, §II, 3(iii)) and then Dominican *cadence*. Not until the late 1970s did a new indigenous style, *zouk*, recapture the public. An invention of the group Kassav', *zouk* featured singing in Creole, a rhythm section composed of musicians from both Guadeloupe and Martinique, a French horn section, multiple catchy melodies per song, *tibwa*-, *gwoka*- and *vidé*-based rhythms (laid over a base of *konpa dirèk*) and state-of-the-art production values. It appealed to Antilleans' sense of both local identity and cosmopolitan modernity. *Zouk* has also had success in France, Francophone Africa and other Caribbean islands.

Certain more esoteric styles have also made an impact. During the 1970s and 80s singer and bamboo flautist Eugene Mona from Martinique recorded a series of intense, politically-charged songs based on an eclectic combination of *biguine*, *gwoka*, rock and reggae. The 1970s groups Falfrett, Difé and Pakatak mixed *musique Créole* and jazz with *gwoka* and other Afro-Caribbean percussion. Malavoi, an acoustic group led by pianist-composer Paul Rosine, boasted a four-violin front line and blended Martinican quadrille with jazz, adding *zouk*

touches in the late 1980s. In Guadeloupe, guitarist-composer Gérard Lockel developed a jazz style based on the rhythms and modes of *gwoka*; although his experimental sound has been admired by musicians, it has not been widely popular, and the only Martinican bands to attempt a similar transformation (of *bèlè*) have been Bèlènou and Creativ' Sim.

In the early 1990s Jamaican dancehall (a genre combining reggae with rapping) became popular among French Antillean youth, who responded with RAGGA. While similar to dancehall, *ragga* is marked as French Antillean by rapping in Creole and the addition of a standard *tibwa* rhythm.

JULIAN GERSTIN

Martin le Franc (*b* county of Aumale, *c*1410; *d* 1461). French poet, churchman and diplomat. He studied at the University of Paris, obtaining the degree of Master of Arts, and entered the service of Duke Amadeus VIII of Savoy (later antipope Felix V), probably in the mid-1430s. Most of his numerous ecclesiastical positions stemmed from his connections with the court of Savoy. Named an apostolic protonotary by Felix in 1439, he later became provost of Lausanne Cathedral (from 1443), abbot of the monastery of Novalesa, near Turin (sometime before 1459), and held canonries at Turin (from 1444) and Geneva (from 1447). In March 1447 Felix sent him as papal legate to the court of Philip 'the Good', Duke of Burgundy, to whom Martin dedicated his two long allegorical poems, *Le champion des dames* (1440–42; partly ed. A. Piaget, Lausanne, 1968) and *L'estrif de Fortune et de Vertu* (1447–8). Even after Felix's abdication in 1449 Martin remained a protonotary under Pope Nicholas V, and from 1450 served Duke Louis I of Savoy as *maître des requêtes*. His other extant works include a *Complainte du livre du champion des dames a maistre Martin le Franc son acteur* (written in response to the poor reception the *Champion* had received at the Burgundian court; ed. in Paris), a Latin dialogue (Dole, Bibliothèque municipale, 55–7), a rondeau (*Le jour m'est nuit*, ed. in Raynaud) and a French translation of the Prologue to the book of Jeremiah in the so-called 'Bible Servion'. The composer Guillaume Du Fay (who also served at the court of Savoy at various times during the 1430s and 1450s) owned a manuscript containing 'eglogas magistri Martini le Franc'; however, no such eclogues are known to have survived. A poem of 48 verses included at the end of the dedication copy of *Le champion des dames* may be by him (*B-Br* 9466, f.180; ed. in Brooks).

Martin le Franc is important to the history of music because of information he provided concerning music and musicians in France during the second quarter of the 15th century, in particular several references he made to Du Fay and Binchois. The earliest of these, dating probably from the mid-1430s, appeared in a letter to the secretaries of the chancellery of Savoy, the primary topic of which is the nature of rhetorical eloquence. In his discussion of the importance of *imitatio* (the emulation of models) for the art of speaking well, he drew one of his examples from music, noting that a musician was deemed excellent if in his compositions he imitated ('similfacit') the 'celestial concords' of Du Fay and the 'most agreeable songs' of Binchois. Beyond being the earliest written acknowledgment of the two composers' pre-eminence, the passage is significant as well for its use of rhetorical terminology in referring to music, anticipating a practice that would become more common later in the century.

In the fourth book of his *Champion* Martin mentioned that the composers Tapissier, Carmen and Cesaris had not long before astonished all Paris with their music. Yet these composers, he said, had been surpassed in excellence by Du Fay and Binchois:

> For theirs is a new practice of making elegant concord [*frisque concordance*] in loud and soft music with *ficta*, with rests and with mutation [*en fainte, en pause et en muance*], and they have taken of the English manner [*contenance angloise*] and followed Dunstable, whereby wondrous pleasure makes their music joyous and famous.

The meaning of these frequently cited lines continues to be a matter of debate among scholars, the scarcity of comparable passages from the period making their precise

significance difficult to determine. They have often been interpreted as referring to the putative influence of English music on continental composers of the generation of Du Fay and Binchois, with 'contenance angloise' understood as an allusion to certain distinctively English style features. Though Martin employed terms that have specifically musical meanings ('fainte'; 'pause'; 'muance'), how these may relate either to the 'contenance angloise' (which he in no way defined) or to a 'new practice' of composition is left unclear, as might be expected in a long poetic work that makes only passing reference to music.

In a subsequent stanza of *Champion*, Martin reported that he had seen Du Fay and Binchois listening with astonishment and envy to two blind musicians of the Burgundian court (most probably the minstrels Jehan de Cordoval and Jehan Ferrendes). This account almost certainly refers to the court's visit to Chambéry in February 1434 for the wedding of Louis of Savoy and Anne de Lusignan. A miniature in a copy of *Champion* (*F-Pn* fr.12476, f.98) depicts Du Fay and Binchois together; Du Fay stands next to a portative organ while Binchois holds a small harp.

CRAIG WRIGHT/SEAN GALLAGHER

Martín-Moreno, Antonio (*b* Granada, 19 Sept 1948). Spanish musicologist and music administrator. He studied music at the Madrid Royal Conservatory and philosophy at the Comillas-Madrid and Complutense Universities. He took the doctorate at the Autonomous University of Barcelona, with a dissertation on the musical ideas of Feijóo. He has taught at the Italian Institute in Barcelona, the Autonomous University of Barcelona and the University of Málaga; in 1988 he became professor at the University of Granada. Martín-Moreno's research centres on 18th-century Spanish music, especially music theory and stage music. He has been an active participant in the reconstruction of Spanish musical life since the end of the dictatorship, introducing musicology as a field of specialization to Spanish universities, and developing various research projects. He was co-founder of the Autonomous University of Barcelona's Centre for Musical Documentation and Ricart Matas Institute of Musical Research (1974–5), and a founding partner and member of the governing board of the Spanish Musicological Society (1977–82). He was the first director of the Rafael Mitjana School of Further Musical Education at the University of Málaga.

XOÁN M. CARREIRA

Martinn, Jacob-Joseph-Balthasar (*b* Antwerp, 1 May 1775; *d* Paris, 10 Oct 1836). Flemish violinist and composer. Son of a Bohemian bandmaster, he was a choirboy at St Jacobskerk, Antwerp, where a mass by him was performed in 1793. Soon afterwards he went to Paris and played in the orchestra first at the Théâtre du Vaudeville and then at the Opéra Italien. After the foundation of the Imperial schools he taught the violin at the Lycée Charlemagne. His works include two symphonies concertantes, six string quartets, trios, duos and other chamber works. He also wrote pedagogical works, including the *Méthode élémentaire de violon* (Paris, *c*1810), *Grande méthode de violon* (Paris, n.d.) and *Méthode élémentaire d'alto* (ed. J. Frey, Paris, 1841).

JOHN LADE/R

Martino, Donald (James) (*b* Plainfield, NJ, 16 May 1931). American composer. He attended Syracuse (BM 1952) and Princeton (MFA 1954) universities and studied composition with Bacon, Sessions, and Babbitt; on a Fulbright scholarship (1954–6) he studied with Dallapiccola in Florence. Martino taught at the Third Street Settlement in New York (1956–7), Princeton University (1957–9), and Yale University (1959–69), and from 1969 to 1981 was chairman of the composition department at the New England Conservatory; he also taught at Harvard University in 1971. After serving as Irving Fine Professor of Music at Brandeis University from 1980 to 1983, he joined the faculty of Harvard in 1983; he retired as Walter Bigelow Rosen Professor Emeritus in 1992. He spent several summers lecturing on contemporary music at the Berkshire Music Center, where he was composer-in-residence in 1973. In 1978 he founded a publishing company, Dantalian, Inc., for the promotion of his own music. Martino's honours include awards from BMI (1953, 1954), the National Institute of Arts and Letters (1967), and the NEA (1977, 1987, 1989), a Brandeis University Creative Arts Award (1964), three Guggenheim fellowships (1967–8, 1973–4, 1982–3), the Classical Critics Citation (1976), a Kennedy Center Friedham Award (1985) and commissions from such organizations as the Boston SO, the Koussevitzky Foundation, and the Coolidge Foundation. A Naumburg Award in 1973 resulted in the composition of *Notturno*, for which he won a Pulitzer Prize in 1974. In 1981 he became a member of the Institute of the American Academy and Institute of Arts and Letters, and in 1987 a fellow of the American Academy of Arts and Sciences.

Martino's imagination and devotion to craft are evident both in his ensemble and solo works. The latter contain numerous detailed and distinctive notations for fingerings, bowings, attacks, releases, etc., to ensure that all sounds are produced in as integral and precise a manner as that in which they were conceived; yet the many *espressivo* and tempo indications allow the performer considerable flexibility within a rigorous framework. Martino not only employs the attributes unique to a particular instrument but seems to enlarge them: it is as if a new instrument has been invented, and by the end of a work the listener's preconceptions and experience of the instrument and of music itself may be enriched, even radically transformed.

Martino deploys this original understanding of instrumental sonority and technique to project refined structural ideas with great force and drama. Register, dynamics and specific modes of tone production are used to mark structurally significant pitch sets, as well as to provide opportunities for imposing instrumental virtuosity. For example, in the first section of his work for solo cello, *Parisonatina al'dodecafonia* (1964), each mode of performance (harmonics, *presso il ponticello*, pizzicato, *sul tasto*, and *col legno battuto*) is associated with a particular 12-tone pitch-class set, thus articulating an intricate polyphonic structure. The note-to-note pitch progression is also significant; it consists of six presentations of different hexachords from the polyphonically projected sets discussed above. Overall the music possesses an effect of textual intricacy, virtuosity, intense lyricism, colouristic variety and high drama. A polyphonic effect is also created in solo instrumental works for violin, flute, clarinet and piano. For example, in the opening of the *Fantasy-Variations* for violin (1962) and *Pianississimo* for piano (1970) the 'simultaneously progressing total-set forms' are delineated by registral stratification and differentiated dynamics and articulation; in subsequent passages, set forms are presented consecutively in relatively homogeneous contexts.

Martino's chamber ensemble pieces are characterized by interplays between densely textured blocks of sound and solo passages; elegantly contoured lines reminiscent of cadenzas emerge out of the denser patches only to be subsumed within the next polyphonic block. The solos in the Concerto for Wind Quintet (1964) and the woodwind tunes in *Notturno* (1973) are memorable in this regard. In form, much of his music can be described as rondo-like. Individual sections contain harmonic progressions (often aggregate-forming partitions of linear 12-tone sets) which are derived from the set that opens the work. The order of the set is often most clearly presented in solo passages, while constituent 'set-motif members' may be distributed in a variety of ways among various instruments in the densely textured sections. In ex.1, from *Notturno*, a segment immediately following a vibraphone solo presents six set forms, one in each instrument. Segments of the set forms are variously partitioned, forming six vertical aggregates. The latter three aggregates are each partitioned into six dyads (each instrument presenting one dyad), and the same interval class is presented in each instrument during the unfolding of aggregates four, five and six.

Martino's exploration of colour, polyphony and virtuosic potential has been further brought to bear on concertos for piano (1965), cello (1972), alto saxophone (1987), violin (1996) and three clarinets (1977), which he has referred to as a 'superclarinet'. He has been especially resourceful in realizing the dialectic of the individual and the group implicit in the concerto genre, especially pushing the solo part to equal or even supersede the orchestra in its capacity to contain structural and timbral richness. In both the concertos for string instruments the relationship between solo instrument and a *divisi* group of strings becomes crucial in affecting an eventual rapprochement between soloist and orchestra.

In works of the 1970s Martino was concerned particularly with longer-range linear connections between pitches. He extended the technique of presenting structurally significant sets as timbrally and/or registrally connected non-consecutive pitches within a single instrumental line. In conceiving means to connect non-consecutive pitches over long musical spans, Martino developed a concept of 'outer-voice structure' related to

Ex.1 *Notturno*, bars 31–8

Schenker's notion of *Ausensatz* in tonal music (see Rothstein, 1980).

More recently, Martino has further extended his technical and expressive range, for example integrating tonal and post-tonal harmony (*The White Island* for chorus and orchestra, 1985), and combining jazz harmony, diverse stylistic and literal quotation, self-parody and satire (*From the Other Side*, 1988). In the Concerto for violin and orchestra (1966), he adapts longstanding techniques to spin out extended, voluptuous foreground melodies while combining a characteristic contrapuntal and expressive volatility with new methods for controlling harmonic rhythm and set structure.

Martino's music has been aptly described as expressive, dense, lucid, dramatic and romantic. But it is his ability to conjure up a world of palpable musical presences and conceptions, which persevere in intensity from the beginning to the end of one piece and from one piece to another, that seems most remarkable.

Martino, Giuseppe. *See* SAMMARTINI, GIUSEPPE.

Martinon, Jean (*b* Lyons, 10 Jan 1910; *d* Paris, 1 March 1976). French conductor and composer. The violin was his principal study at the Lyons and Paris conservatoires, and he won a *premier prix* on his graduation at Paris in 1928. Further studies followed, in composition with Roussel and in conducting with Munch and Desormière. On the outbreak of war, he was conscripted into the French army and taken prisoner in 1940. While a prisoner he composed jazz and choral works, including *Chant des captifs*, and was awarded a composition prize by the city of Paris in 1946.

On his release Martinon took a leading part in the reorganization of French musical life, becoming conductor of the Concerts du Conservatoire in Paris, and of the Bordeaux PO from 1946. He also started to tour widely as a guest conductor, making his London début in 1947 with the LPO, of which he became a regular associate conductor during the next two seasons. His North American début was in 1957 as guest conductor with the Boston SO, and he held resident principal appointments with the Radio Éireann orchestra, Dublin (1947–50), the Concerts Lamoureux, Paris (1951–7), Israel PO (1957–9), City of Düsseldorf (1959–63), Chicago SO (1963–9), French National Radio Orchestra (from 1968) and The Hague Residentie-Orkest (from 1974).

As a conductor Martinon successfully imparted virtuoso qualities to an orchestra without cultivating a virtuoso personality; his performances were distinguished by a concern for translucent orchestral textures. His repertory showed a special concern for French composers, and for Prokofiev and Bartók, whose music he acknowledged as a strong influence on his own compositions. His recordings included a cycle of Prokofiev symphonies, and notable sets of Debussy and Ravel orchestral works.

He devoted part of each year to composing. His Symphony no.3 *Irlandaise* was composed after a guest visit to the orchestra of Radio Éireann. His Violin Concerto no.2 was written for Szeryng, and his Cello Concerto for Fournier, who gave the first performances. An opera, *Hécube*, with a libretto by Serge Moreux after Euripides, was first staged at Strasbourg in 1956, and among the works Martinon introduced during his Chicago appointment was his Symphony no.4, *Altitudes*, commissioned to celebrate the 75th anniversary of the Chicago SO (1966).

NOËL GOODWIN

Martïnov, Ivan Ivanovich (*b* Karachyov, 2/15 Jan 1908). Russian musicologist. In 1936 he graduated from the Moscow Conservatory, where he studied music history with Al'shvang and the piano with Vasily Argamakov. He taught music history at the conservatories of Tashkent (1936–7) and Khar'kiv (1938–9), and then until 1942 at the Moscow Conservatory. From 1948 until 1952 he was in charge of the folklore section of the journal *Sovetskaya muzïka*. He was secretary of the RSFSR Composers' Union (1960–68), and in 1969 became president of the musicology committee of the Moscow Composers' Union. He wrote chiefly about 20th-century music, and his studies of eastern and central European music, together with those of Spanish music, are widely used in musical history courses in Russian conservatories.

LEV GINZBURG/LYUDMILA KORABEL'NIKOVA

Martïnov, Nikolay Avksent'yevich (*b* Leningrad, 20 June 1938). Russian composer. He attended the choral school of the Academic Cappella (1944–55) and then studied musicology at the Leningrad Conservatory with Druskin, graduating in 1960. After holding posts as a lecturer at the Novosibirsk Filarmoniya (1960–62) and as senior lecturer at the Novosibirsk Conservatory (1962–3), he returned to the Leningrad Conservatory to pursue post-graduate study with Druskin (1963–6), concurrently

attending Shostakovich's composition class as an occasional student. He wrote his thesis on the work of Davidenko and was awarded a *Kandidatura* in 1975. In 1966 he joined the orchestration department at the Leningrad Conservatory, where he became a senior lecturer in 1977, a professor in 1985, and head of department in 1985.

Among Martïnov's compositions are four symphonies, numerous vocal works to texts by Russian poets and ballet scores written in collaboration with the ballet-master Nikolay Boyarchikov including *Gerakl* ('Heracles') and *Peterburgskiye videniya* ('Visions of St Petersburg'). He has also made arrangements for television ballet productions of music by Shostakovich (*Gamlet*) and Prokofiev (*Tsar' Boris*, *Pikovaya dama*), and has composed numerous film scores and incidental music for the theatre and for television serializations of classic literary works. Martïnov's work follows the traditions of Russian music. Martïnov is also the author of a monograph on Aleksandr Davidenko, and a number of articles including one on Shostakovich, based on his notebooks and Shostakovich's letters to him.

LYUDMILA KOVNATSKAYA

Martïnov, Vladimir Ivanovich (*b* Moscow, 20 Feb 1946). Russian composer. Having graduated from the Moscow Conservatory (he studied composition with Sidel'nikov and the piano with M.L. Mezhlumov there until 1970), since 1971 he has been a member of the Union of Composers and from 1979 he taught at the Moscow Sacred Academy.

Martïnov's work as a creative artist is varied and productive, testifying to the range of his artistic interests which include folklore, the avant garde (especially minimalism), jazz, rock music and old Russian church music. He took part in ethnographic expeditions to the north of Russia, the Caucasus and Pamir (1968–74); the direct influence of the folk traditions he encountered can be found in early works such as the overture for symphony orchestra and also in *Noch' v Galitsii* ('A Night in Galicia') of 1996. A participant in avant-garde festivals and activities (in Moscow, Leningrad, Tallinn and Riga, 1972–6), he organized the first musical event in the USSR in the House of Scholars in 1973. He later worked in the experimental studio for electronic music (1973–8), and in 1975 he became involved with the rock group *Boomerang*, forming his own group *Forpost* in 1976. He has taken part in jazz and rock festivals in Moscow and Novosibirsk. In 1976 he became the composer of the first minimalist works in Russia (*Listok iz al'boma* ('Album Leaf') and the Partita for unaccompanied violin).

Martïnov has compiled and edited collections of Flemish, Italian, English and French masters of the polyphonic schools and in 1979 he focussed his attention on Russian sacred music: in particular, he studied and deciphered old Russian musical texts from collections of singers' manuscripts. This amounted to a reconstruction of the 16th- and 17th-century services of the Cathedral of the Assumption, Moscow, the monastery of the Trinity and St Sargius, Sergiyev Posad, and the Cathedral of the Honoured Resurrection on Uspenskiy vrazhok (Moscow). An active scholar in this field, he is the author of *Istoriya Bogosluzhebnogo peniya* [The history of singing in the divine service] in addition to numerous choral works on religious texts, in particular a Liturgy and an All-Night Vigil. His works are frequently large-scale and stylistically synthetic (*Apokalipsis*, *Plach proroka Iyeremii* ('The Lament of the Prophet Jeremiah')) and several have been written in collaboration with exceptional Russian performers (Gridenko, Kremer, Bashmet and Rozhdestvensky). The author of over 50 film scores, he has worked with directors such as Gerasimov, Abdrashidov, Viktyuk and Vasil'yev. His music has been played in both Russian and European festivals, ranging from the Moscow Autumn to the Almeida.

WORKS
(*selective list*)

Stage: Seraficheskiye videniya Frantsiska Assizskogo [The Seraphic Visions of St Francis of Assisi] (rock op), 1978; Uprazhneniya i tantsï Guido [Guido's exercises and dances] (op), 1997
Orch: Fl Conc., 1968; Ob Conc., 1968; Uvertyura v chest' Sapel'kina [Ov., in Honour of Sapel'kin], 1970; Voidite! [Come In!], vn, str, celeste, 1985
Choral: 4 stikhotvoreniya [4 Poems] (V. Khlebnikov), chorus, chbr orch, 1963; Rozhdestvenskaya muzïka [Christmas Music], children's chorus, ens, 1976; Lik Rossii [The Face of Russia] (M. Lomonosov), 1986; Plach proroka Iyeremii [Lament of the Prophet Jeremiah], 1992; Stabat mater, chorus, str, 1994; Requiem, solo vv, chorus, str, 1995
Vocal: 5 russkikh narodnïkh pesen [5 Russ. Folk Songs], 1v, chbr ens, 1964; Passionlieder (Ger. poets), S, chbr orch, 1977; Opus post I (N. Zabolotsky), S, pf, perc, 1984; Magnificat quinti toni, Ct, vn, str, 1993; Opus post II (Zabolotsky), S, pf, perc, 1993; Noch' v Galitsii [A Night in Galicia] (Khlebnikov, I. Sakharov),

folk insts and singers, str ens, 1996; Canticum fratris Solis octo tonorum (St Francis of Assisi), inst ens, solo vv, 1997

Chbr: Str Qt, 1966; Seranadï [Serenades], ens, 1968; Epistole amorose, ens, 1970; Kanzonï, 2 vn, 1972; Variantï, vn, pf, 1972; Okhrannaya ot kometui kogouteka [Safeguard Against the Comet Kogoutek], 2 pf, 8 hands, 1973; Sonata, vn, pf, 1973; Music for pf, db, perc, 1974; Music for pf, 2 vn, perc, 1974; Listok iz al'boma [Album Leaf], vn, pf, chbr, ens, rock group, 1976; Iyerarkhiya razumnïkh tsennostey [The Hierarchy of Various Values] after Khlebnikov, perc ens, 1977; Dvenadtsat' pobed korolya Artura [The Twelve Victories of King Arthur], 7 pf, 1990; Triumf aèrobiki [The Triumph of Aerobics], perc ens, 1990; Predmetï i figurï (D. Kharms), perc ens, vn, 1998

Solo inst: Geksagramma [Hexagram], pf, 1971; Asana, db, 1974, Partita, vn, 1976; Osennyaya pesnya [Autumnal Song], hpd, tape, 1978; Tantsï Kali-Yugi èzotericheskiye [The Kali-yugi Esoteric Dances], pf/inst ens, 1995; Muzïka dlya Tat'yanï i Ameriki [Music for Tat'yana and America], vn, 1995

ALLA VLADIMIROVNA GRIGOR'YEVA

Martin Peu d'Argent. *See* PEUDARGENT, MARTIN.

Martín Pompey, Angel (*b* Montejo de la Sierra, Madrid, 1 Oct 1902). Spanish composer. He studied at the Real Conservatorio de Música, Madrid, where his teachers included del Campo. His first major compositional success came in 1921 with the première of his *Quereres primeros* at the Teatro Luminoso in Madrid. From 1934 to 1947 he was Bartolomé Pérez Casas's assistant at the Madrid Conservatory. He was appointed music director of the Madrid Teatro Español in 1939. He later taught at the Colegio de Nuestra Señora del Pilar, a post he held for 40 years. During the 1960s and 70s he was a music critic for the daily papers *Ya* and *ABC*. His honours include a stipend from the Real Academia de Bellas Artes de S Fernando, a bursary from the Fundación Juan March, the Madrid Composition Prize (1990) and the National Prize (1999).

Martín Pompey's oeuvre is notable for its diversity; conservative tonal works permeated by the local colour of Madrid stand alongside polyphonic compositions influenced by the Second Viennese School. His deep religious faith and his unmistakable sense of humour are also reflected in his extensive catalogue. Although he has described himself as a 'theatrical composer', his most interesting compositions are his chamber works. Del Campo is said to have referred to him as 'the Spanish Brahms'.

WORKS
(*selective list*)

Stage: Quereres primeros (sainete lírico, 1, J. Muñoz Román and D. Serrano), 1921, Madrid, 1921; El rayo de sol (sainete lírico, 2, Muñoz Román and A. CHRISTIANE HEINE

Martins (Freire), Francisco (*b* Évora, *c*1620 or *c*1625; *d* Elvas, 20 March 1680). Portuguese composer. On 20 June 1629 (Barbosa Machado) or 16 August 1634 (Alegria, *História*) he became a choirboy at Évora Cathedral, where his uncle Domingos Martins de Almeida had been master of the choirboys from 1608 to about 1618, and where he studied with either Manuel Rebello or António Rodrigues Vilalva, depending on his date of entry. By 27 December 1650 he had entered the priesthood and was *mestre de capela* of Elvas Cathedral, a post that he held for the rest of his life at an annual salary of 37,500 réis. His expressive, chromatically inflected works demonstrate the high quality of musical practice even at the lesser Portuguese cathedrals in the 17th century.

ROBERT STEVENSON

Martins, Maria de Lurdes (Clara da Silva) (*b* Lisbon, 26 May 1926). Portuguese composer. She studied at the Lisbon Conservatory with her mother Maria Helena Martins. There she finished the higher degree in piano and composition in 1949, having worked with Artur Santos, Jorge Croner de Vasconcelos, Marcos Garin and Santiago Kastner. Between 1959 and 1960 she obtained a grant from the Calouste Gulbenkian Foundation to study composition at the Munich Hochschule für Musik with Genzmer and also attended courses with Stockhausen in Darmstadt. She attended seminars with Maderna and obtained a diploma in Orff-Schulwerk at the Salzburg Mozarteum (1965). She also attended many courses abroad dedicated to methods of music learning by children (Kodály, Orff). She served as the founder-president of the Portuguese Musical Education Association (1972) and founder-director of the Torres Vedras Music School (1978–83). She taught at the Lisbon Conservatory (1983–96) and is now retired.

Martins's music contains neo-classical characteristics based on Hindemith and also a modern nationalism inspired by Bartók. From the 1960s her music developed slowly towards serial technique and harmonies based on clusters. In recent years her work shows a tendency to fuse various musical universes, resulting in a multi-faceted aesthetic perspective, as best exemplified by the opera *Três máscaras* (1986) and the Piano Concerto (1990).

SÉRGIO AZEVEDO

Martinstrompete [Martintrompete, Schalmei]. A type of mouth-blown free-reed instrument. It is worked with piston valves, and is named after its inventor Max Bernhardt Martin of Markneukirchen who originally conceived such instruments (1911) for car horns. The instrument consists of a number of conical brass horns, each containing a free-reed which sounds at a certain pitch and which may be selected by a piston valve placed between the horns and the mouthpiece. In the 1920s models able to play melodies were played in ensembles (*Schalmei-Kapellen*) and spread quickly, especially in working-class *Turn und Arbeitersportvereine*, and were adopted by the German Communist Party (KPD) and cultivated in East Germany until the 1960s. For further information see C. Ahrens, E. Honecker and U. Lindenberg: 'Vor 60 Jahren patentiert: die Martintrompete', *IZ*, xli (1987), 743–5.

MARTIN KIRNBAUER

Martinů, Bohuslav (Jan) (*b* Polička, Bohemia, 8 Dec 1890; *d* Liestal, Switzerland, 28 Aug 1959). Czech composer. Although he spent most of his creative life away from his native Czechoslovakia, he is widely regarded, after Janáček, as the most substantial Czech composer of the 20th century.

1. LIFE. Martinů was born in the small market town of Polička just on the Bohemian side of the Bohemian-Moravian border. Until 1902, when they moved to a house in the centre of the town, his family lived at the top of the church tower, where his father combined his cobbler's trade with fire-watching and ringing bells for services. Martinů started school in 1897 followed by violin lessons twice a week. He developed fast as a violinist, leading the Polička string quartet and in 1905 giving his first performance as a soloist. Another successful recital the next year encouraged high hopes of a career as a virtuoso leading to the key event of his early life: the local community raised funds to send him to the Prague Conservatory, the entrance exam for which he passed in September 1906.

His studies in Prague were a desultory record of poor attendance and suspension; after the near complete failure of his studies at the conservatory, a year (1909–10) in its organ department resulted in expulsion for 'incorrigible negligence'. More positively, he found Prague's cultural life captivating, found a firm and later influential friend in the violinist Stanislav Novák and was profoundly stirred by the Prague première (in German) of Debussy's *Pelléas et Mélisande* (1908). In order to acquire a professional qualification, Martinů took the state teaching examination, failing in 1911 but passing the next year. Although he had begun to compose *Tři jezdci* ('The Three Riders') for string quartet as early as 1900, his first major outpouring of works came in 1910, when he wrote, along with piano music and some 14 songs, Smrt Tintagilova ('La mort de Tintagiles') and *Anděl smrti* ('The Angel of Death') for orchestra.

During the First World War Martinů lived with his family in Polička and eluded conscription by a combination of simulated and real ill-health while sustaining himself by teaching the violin. These years allowed him to concentrate on composition, resulting in formative

works such as the orchestral Nocturne and *Koleda* ('Carol') and culminating in the nationalist *Česká rapsódie*, of which the second performance on 24 January 1919, in the presence of President Masaryk, did much for his reputation in Prague. After 1913 he often deputized as a second violinist with the Czech Philharmonic; in the spring of 1919 he travelled with the orchstra on a tour which included Geneva, London and Paris, and between 1920 and 1923 he became a full member. He produced important works in this period, including the ballets *Istar* and *Kdo je na světě nejmocnější* ('Who is the Most Powerful in the World?'), and studied briefly in Suk's composition class at the Prague Conservatory.

Having been much attracted by Paris, Martinů, with the aid of a small scholarship from the ministry of education, returned there in October 1923 to study with Roussel. Although he often visited Prague and took frequent summer holidays in Polička, Martinů never again lived in Czechoslovakia. In Paris his range of musical experiences vastly increased: apart from lessons with Roussel he heard the music of Stravinsky and Les Six and jazz. Impressed by *La bagarre*, Koussevitzky took an interest in Martinů and in 1927 gave its hugely successful première in Boston with the Boston SO. Late in 1926 Martinů began to live with Charlotte Quennehen, whose activities as a dressmaker did much to alleviate his near poverty. Martinů became increasingly prolific towards the end of the 1920s, completing his first opera, *Voják a tanečnice* ('The Soldier and the Dancer'), much chamber music, inlcuding his important Second String Quartet and a number of jazz-inspired works including the orchestral *Le jazz*, the chamber Jazz Suite and the operas *Les larmes du couteau* and *Les trois souhaits*.

By the 1930s many aspects of Martinů's style were established and his reputation was growing. His works

Bohuslav Martinů

were given, though not very frequently, in Prague and Brno; performances included the premières of the Second Piano Concerto (1935) and the opera *Julietta* (1938), both conducted by Václav Talich. Other important premières included those of the First Cello Concerto in Berlin (1931), the Concerto for string quartet and orchestra under Malcolm Sargent in London (1932) followed rapidly in Boston by Koussevitzky, and the orchestral *Inventions* at the ISCM Festival during the 1934 Venice Biennale. While the compositions of the 1930s reveal a penchant for Baroque forms and procedures, Martinů was also showing an interest in the folk music and culture of Czechoslovakia in such works as the opera-ballet *Špalíček* ('The Chap-Book'), the *Staročeská říkadla* ('Old Czech Nursery Rhymes') and *Kytice* ('Garland').

Despite his mother's lack of enthusiasm for Charlotte, Martinů married her in 1931. During preparations for the première of *Julietta* in 1937, Martinů met the promising young composer and conductor, Vítězslava Kaprálová. Encouraging her to come to work with him in Paris in the autumn of 1937, he began an affair which developed strongly over the next year. In June 1938 he went with her to London where she conducted her *Vojenská sinfonie* ('Military Symphony'). Later that summer Martinů spent his last holiday in Czechoslovakia and in September went to Schönenberg in Switzerland, where he completed the Double Concerto for two string orchestras, piano and timpani for Paul Sacher and the Basle Chamber Orchestra.

With the completion of the Nazi invasion of Czechoslovakia in March 1939, Martinů, named as cultural attaché by the Czechoslovak opposition, assisted the large number of Czech artists coming to Paris as refugees. Kaprálová began an affair with the writer Jiří Mucha and married him two months before her death from tuberculosis in 1940. Too old for military service at the start of the war, Martinů composed the nationally-coloured *Polní mše* ('Field Mass'), dedicated to the Free Czechoslovak Army Band. His personal situation worsened when his music was blacklisted by the Nazis in the protectorate of Bohemia and Moravia, and as the Germans approached Paris in the spring of 1940 he fled with Charlotte to the south of France, provisionally settling in Aix-en-Provence at the beginning of September. In the last three months of the year he continued to compose, including the Sinfonietta giocosa for piano and small orchestra. Early in 1941 they went via Marseilles to Lisbon seeking passage to the United States, eventually leaving Portugal on the SS Exeter on 21 March.

Although Martinů spent a considerable time in or near New York during the war years, in the summers he would leave the city. His excursions included stays at Middlebury (Vermont), Darien and Ridgefield (Connecticut) and Cape Cod and South Orleans (Massachusetts) as well as composition teaching at Tanglewood in 1942. Depression and homesickness compounded by a poor knowledge of English made for a difficult start in America, but Martinů soon began composing again. Koussevitzky provided an important stimulus with a commission for an orchestral work, resulting in Martinů's first symphony (1942). This was followed in yearly succession by four more, the last of which was dedicated to the Czech Philharmonic and first performed under Kubelík at the first Prague Spring Festival in 1947.

At the end of the war in Europe, Martinů accepted the offer of a composition professorship at the newly-founded Prague Conservatory, but remained resident in America for the next seven years. In part this lack of a return to Europe was explained by a serious fall Martinů incurred while teaching at Tanglewood in the summer of 1946. Recovery was slow and he suffered from tinnitus, headaches and depression for a number of years. His indecisiveness about taking up his post in Prague was reinforced by the loss of his close friend Stanislav Novák, the deteriorating political situation in Czechoslovakia and the pursuit of an affair with the young composer Roe Barstow. Composition, not least the important *Toccata e due canzoni*, was also severely disrupted by the accident and it was only by 1948 that Martinů was producing work again in quantity. After spending the summer of 1948 in France and Switzerland, Martinů returned to New York to take up teaching appointments at Princeton and the Mannes School of Music. Over the next three years he composed steadily including the Sinfonia Concertante (1949) and a second Piano Trio (1950); in 1952 he completed two operas for television, *What Men Live By* and *The Marriage*. He also began work on his Sixth Symphony (*Fantaisies symphoniques*) which he completed in 1953.

With the help of a Guggenheim scholarship Martinů returned to Europe in May 1953, living at first in Paris then in September moving to Nice where he spent much of the next two years. This contented phase resulted in major compositions such as the opera *Mirandolina*, the oratorio *Gilgameš* and, inspired by an encounter with the artist's work during a summer trip to Italy in 1954, *Les fresques de Piero della Francesca*. A return to New York in October 1955, though marked by considerable productivity, including a sonata for viola, sonatinas for clarinet and trumpet and the completion of the Fourth Piano Concerto, depressed Martinů and in May 1956 he returned to Europe and a teaching post at the American Academy of Music in Rome, which he held until the summer of 1957.

While staying in New York, Martinů began work on the greatest project of his final years, the opera *The Greek Passion* based on *Christ Recrucified* by the novelist Nikos Kazantzakis, whom he had met in Antibes in 1954. Another important strand in his last years was a nostalgic interest in his native Polička, and this resulted in four remarkably beautiful and dramatically complex cantatas setting folk-inspired verse by Miloslav Bureš. Martinů moved to Switzerland in November 1957 and was based there until his death. Towards the end of 1958 he became ill with stomach problems and his health deteriorated over the next year. Despite illness, this final year was richly productive: Martinů completed *The Greek Passion*, composed the second nonet, the cantata *Mikeš z hor* ('Mikeš from the Mountains'), *Madrigaly* ('Part-Song Book'), the cantata *The Prophecy of Isaiah* and much chamber music. On 8 August 1959 he entered the hospital at Liestal suffering from stomach cancer and died there on 28 August. In 1979 his body was reinterred in the family grave in Polička.

On his own admission, Martinů's boyhood in the tower affected him in later life. Compositionally, he stated that he strove to embody in his work the space constantly before his eyes as a child; as a man, the isolation may well have contributed to the elusive quality of his personality and a tendency to disorientation when first encountering new places. This disorientation and the narrow provincialism of his background undoubtedly compounded his inability to handle the academic side of life in Prague; on the other hand, he soon adapted to metropolitan cultural life in both Prague and Paris. The monolithic architecture and hectic pace of New York proved far less congenial and resulted in bouts of depression increased by worries about his home, first under the Nazis and then under the Communists, a psychological state certainly exacerbated by his accident. He could sometimes appear withdrawn and abstracted in later years. His relationship with Charlotte, despite her loyalty at crucial stages, was fragmented by his infidelity, but although they were not soul-mates, Martinů retained a sentimental affection for her and they remained man and wife until his death. Compulsive aspects of his personality surfaced in his chain-smoking, voracious reading and a frequently workaholic approach to composition. As a teacher he was mercurial and unmethodical, but although his manner with students reflected his own lack of ease with academic discipline, his ability to maximize the potential he saw in embryonic work was highly valued.

2. Music. Although Martinů did not produce work in quantity until his late 20s, he was, by 20th-century standards, very prolific, possessing a facility that allowed him to write in virtually every instrumental and vocal genre. The music of his main composition teachers had a certain impact on him: Suk in the use of Impressionist orchestration and Roussel in his discrimination concerning orchestral timbre; among his Czech predecessors he admired Dvořák, and the influence of Janáček on his setting of the Czech language is clear. The two non-Czech modern composers who were most decisively influential were Debussy and Stravinsky. The presence of the former can be felt at its most undiluted in the First String Quartet and of the latter in *Half-Time*. Although these mainly harmonic and timbral influences were quickly absorbed, they could surface as late as works such as the Sixth Symphony and the 1959 nonet. Jazz became a major force in Martinů's music between the mid-1920s and the early 1930s. Elements of the style are strong in the operas *The Soldier and the Dancer*, *Les larmes du couteau* and *Les trois souhaits*, in the ballet *La revue de cuisine* and in the Sextet for wind and piano, while in the orchestral *Le jazz* he emulates Paul Whiteman's big-band sound.

Martinů was profoundly receptive to earlier musics as inspiration and as a means of extending his style. An encounter with English madrigals in 1922 prompted a study of Renaissance polyphony. In the 1930s he was much taken by the concerto grossi of Bach, Corelli and Vivaldi, and when engaged on symphonic compositions in the 1940s he cited Beethoven as an exemplar. Notre Dame polyphony also exerted an influence in the late 1940s as did the music of Monteverdi in the 1950s. Many of these early influences fuelled inspiration rather than prompting pastiche: the ritornelli and coloratura in the opera *Ariane* have a neo-classical rather than a Monteverdian air, and Martinů's works which are routinely seen as owing something to the concerto grosso tradition, such as the Double Concerto of 1938, have a typically symphonic motivic intensity.

Despite this range of influences, the description of Martinů as an eclectic is misleading. He had developed a personal voice by the late 1920s and for the rest of his

career Martinů's style remained one of the most distinctive of the mid-20th century. To some extent the sense of isolation which characterized his personal life guaranteed his musical individuality: while he was responsive to new ideas he was never part of any identifiable school. Syncopated, sprung rhythms and the superimposition of closely spaced harmonies against a fundamentally tonal background are features apparent in his music as early as the orchestral Nocturne in F♯ minor of 1915, and they remained fundamental aspects of his mature style. Although Martinů spoke with enthusiasm about his leaning towards the concerto grosso principle, his approach to the development of ideas, many of them extremely short, amounting to little more than three- or four-note figures rotating around a central pitch, can certainly be construed as symphonic. This naturally symphonic bent emerged strongly in his major orchestral works of the 1940s and 50s enhanced by orchestration which on the page can look thick, but in performance is invariably luminous.

Martinů's modernist tendencies emerging in the late 1920s did much to strengthen the musical language of the Fifth String Quartet and the Double Concerto, both from 1938, in which the fast movements are energized by powerful motor rhythms. Though Martinů's harmonies could be extremely dissonant, especially in the late 1920s and the 1930s, they were founded on a fundamentally tonal harmonic framework. Strengthening throughout the 1930s, this tonal basis was particularly prominent in works with a national accent, such as the opera-ballet *The Chap-Book*, the opera *Hry o Marii* ('The Plays of Mary') and the cantata *Garland*. This tendency crystallized even more strongly in the symphonic works of the 1940s, notably in the Second Cello Concerto, and reached an apotheosis in the 1950s in the cantatas on texts by Bureš and in his five completed operas from this decade. Martinů's harmonic language was founded on a range of progressions, some of which were surprisingly conventional, and strong cadence patterns, the most characteristic being a modified plagal cadence formed by a chord of the dominant thirteenth (e.g. with its bass on G) resolving on to the major chord a 4th lower (bass on D), sometimes known as the Moravian cadence. He also showed a predilection for harmonizing themes in 6ths and 3rds, and his pervasive use of second-inversion chords often seems to ascribe to them the tonic function.

In a large output some works will inevitably fall below par. These usually contain poorly assimilated elements, such as the Brahmsian figurations in the Third Piano Concerto. In general, however, Martinů's music from the late 1920s onwards displays a high degree of quality and consistency: his six symphonies are among the most successful of the 20th century and his extensive corpus of chamber music provides a range of performers with a large repertory of high quality. His vocal works reflect his particular genius at its most penetrating. In musical-theatrical terms he was often at the forefront of experiment, composing pioneering film, radio and television operas. His strong literary instincts gave him a remarkable sensitivity to words and dramatic situation benefiting not only his operas but small ensemble works, such as the exquisite *Part-Song Book* of 1959, and larger-scale choral compositions, notably *Field Mass* and *Gilgameš*. Hitherto, commentary on Martinů has been limited, but, with the establishment of the Martinů Foundation in Prague (1995), studies of the composer have acquired new impetus. In terms of influence, Martinů does not loom large in the 20th century, but the range of his work and fresh approach to tonality mean that his music remains an extensive and increasingly durable resource for performers and audiences.

WORKS

(complete list apart from early works)

H – *number in Halbreich*

DRAMATIC

operas

H	
162	Voják a tanečnice [The Soldier and the Dancer] (3, J.L. Budín [J. Löwenbach], after Plautus: *Pseudolus*), 1926–7; Brno, 5 May 1928
